Painlevé Paul French politician. Born in Paris Dec 5, 1863, he became a professor of mathematics at the Sorbonne, and in 1906 was elected an independent Socialist deputy for Paris, but it was not until he became a member of M. Briand's cabinet in 1913 that he became important. He was Minister of War in March, 1917, in Ribot's cabinet, and formed his own cabinet in Sept. 1917. He met Lloyd George and Orlando at Rapallo and their discussions resulted in the foundation of the Supreme Allied Council of Versailles. He was defeated by Clemenceau in Nov., and was not again Premier until 1925, since when he has been War Minister in several cabinets. In 1932 he joined the government of M. Herriot. He died in 1933.

Paint Preparation of a pigment mixed with an appropriate vehicle. Some pigments are of mineral origin such as umbers, ochres and siennas; others are derived from plants such as madders, gamboge and indigo. A few such as saffron, carmine and Indian yellow are of animal origin, while many synthetic dyestuffs are used as pigments.

Pigments are prepared by washing and grinding, and finally mixing with a medium such as linseed oil and turpentine in oil painting, water in water colour, size in distemper, and wax in encaustic painting.

The Painter's Company is one of the ancient livery companies of the City of London, and has its offices in Little Trinity Lane, E.C.

Painting One of the fine arts. It dates back to palaeolithic times when early man made remarkable drawings on the walls of caves in flax tints and brilliant polychrome fresco, using as pigments various earthy substances. In later times in Egypt and Greece mineral and some organic pigments were used with gum as the usual medium. In mediaeval Italy the artists painted in fresco and

tempera, but the early work was flat, then with the Renaissance came the study of light and shade and the beginnings of perspective, the pioneer artists being Masaccio, Uccello, Mantegna and Leonardo.

With the Van Dycks in the Netherlands originated oil painting, later carried to a high level of excellence by the Dutch and Flemish schools under Rubens, Rembrandt, Hals and others. In Italy the new method was taken up by Leonardo, Perugino and other great artists, and used by the Venetian School under Titoretto and Veronese. From these times onward, great progress in oil painting has been made in France, Spain and England as represented by the works of many great masters.

A further development came with the rise of water-colour painting in England during the 18th century. This is now an important branch of the art.

Paisley Burgh of Renfrewshire. It stands on the Clyde about 7 m S.W. of Glasgow. It is the centre of important cotton thread manufacture. Formerly it was famous for its shawls. Shipbuilding is now an industry owing to the widening of the Clyde. Extensive starch, cornflour, bleaching, dye, chemical, fireclay, pottery and engineering works have been developed. Pop (1931) 86,441.

Palaeobotany Study of fossil plants. From the remotest times they occur in more or less recognisable forms as external plant impressions and casts, petrifications of stems, seeds and other organs, and mummified masses of plant material such as coal. By tracing the relationship of groups now widely divergent through common ancestors now extinct, they throw light both on geographical distribution and on the successive appearance of more and more highly organised forms. During the long pre-Cambrian age unicellular forms were gradually accompanied by cryptogams, represented in the palaeozoic by immense horse tails, lycopods, conifers and cycads. Flowering plants occur from mesozoic times onwards.

Palaeography Study of ancient handwriting, specifically on flexible materials. Ancient MSS were written with reeds, stiles or quills. From ancient Egypt onwards literary and non-literary forms of script existed side by side. The one beginning as separate capital letters, passed into the hook hands which in the 15th century determined the form of printed types. The other, comprising swift cursive scripts, passed into national handwritings. Palaeography throws light upon the date, origin and genuineness of MSS. See EPIGRAPHY.

Palaeolithic Term denoting the rudely chipped and flaked flints and other implements produced by man during the older phase of the prehistoric stone age. These palaeoliths are intermediate between colths and neoliths. Scattered throughout Europe, they accompany other evidences of a primeval civilisation collectively called palaeolithic, associated with animals now extinct and with human remains of primitive form. It spread throughout the world before the neolithic phase began, and survived into recent times in Tasmania and elsewhere.

Palaeontology Study of past life on the globe, especially as revealed by fossil remains. It comprises palaeobotany (qv) and palaeozoology, the term sometimes denotes the latter alone. The

description of the fossil organisms themselves is called palaeontology. See FOSSILS

Palaeozoic Name given to the division of fossiliferous rocks extending from the Cambrian system through the Ordovician, Silurian, Devonian and Carboniferous to the Permian. They comprise sandstones, shales and slates, often highly metamorphosed, with limestones in places, and coal. They contain abundant remains of invertebrates, fishes, reptiles, amphibians and non-flowering plants.

Palate Roof of the mouth. It forms a partition between the mouth and the nasal cavity above it. Comprising in front the fixed bony plate or hard palate, it projects behind into a muscular layer or soft palate, ending in a free border or uvula, all covered with mucous membrane on both sides. See CLEFT PALATE

Palatine Originally signified "pertaining to a palace," and consequently invested with special privileges. A Count Palatine was a feudal lord with supreme judicial authority over a province, and a County Palatine, a province under such a ruler. The only County Palatine remaining in England is Durham, the palatine privileges of which are believed to have been conferred during the Norman Conquest. Certain ancient customs of the palatinates are retained.

One of the hills of Rome (q.v.) is called the Palatine. Augustus, Tiberius and Nero had palaces here.

Pale The Portion of Ireland which, from the time of Henry II to that of Elizabeth, was subject to English, not Celtic, law. Its size varied according to the strength of the authorities. The Anglo-Saxon rulers were called Lords of the Pale. There was a "Calais pale" in France till 1558, and an "English pale" in Scotland under the Tudors.

Palermo Capital and seaport of Sicily in N.W. of the island. Originally a Phoenician colony of 8th-6th century B.C., it was also an important Carthaginian centre until acquired by Rome in 254 B.C. There were successive Byzantine, Saracenic, Norman, Spanish, Italian, and French occupations. Finally Palermo was liberated by Garibaldi who entered it in triumph on May 27, 1860. It has a university founded in 1779, and a new harbour, including a shipyard and a dry dock. It has a broadcasting station (542 M., 6 kW.) Pop. 468,979.

Palestine The Holy Land of Christianity and the scene of most of the events of Biblical history. It is bounded on the N by Syria, on the W by the Mediterranean, on the E by the Syrian and Arabian deserts, and on the S by Arabia. Conquered by the Ottoman Turks in the early part of the 16th century, it was reconquered in 1917 by a British force under Gen. Allenby, who entered Jerusalem on Dec. 9, and subsequently cleared the whole country of Turkish troops. After the war Great Britain was granted a mandate for Palestine by the League of Nations on July 24, 1922.

The area under the British mandate is about 10,000 sq. m. and the pop. in 1931 was 1,035,154, of whom 759,952 were Moslems, 175,000 Jews, and 90,607 Christians, the remainder being Druzes, Samaritans, Bahais, Sikhs, Hindus and Metawichs. The chief town is Jerusalem (q.v.). Arab villages number about 750. Jewish colonies are grouped in four districts, Judaea, Samaria, Lower and Upper Galilee.

The head of the British Administration is the High Commissioner. There are three administrative districts, Northern (Haifa), Jerusalem, Southern (Jaffa), each under a governor. The chief ports are Jaffa, Haifa and Acre. The country comprises four zones, a maritime plain, an inland plateau, a great valley, and Transjordan, east of the Jordan, which merges into the Arabian Desert. A singular feature is the Dead Sea, which is about 1300 ft. below sea-level, is 46 m. long, and has an average width of 8½ m., is intensely salt.

Palestrina Giovanni Pierluigi Da. Italian composer. Born in 1526, he devoted his talents to the service of the Church and became chapel master at the Vatican in 1551. In 1555 he lost the post and went to St. John Lateran, but was restored to the Vatican in 1571. One of the greatest polyphonic composers, he left behind him many motets, masses, hymns and other works. He died Feb. 2, 1594.

Palgrave Francis Turner. English poet and critic. Born Sept. 28, 1824, he was educated at Balliol and became Fellow of Exeter College, Oxford. He became private secretary to Earl Granville, official in the education department, and professor of poetry at Oxford (1886-1895). His works include *Idylls and Songs* (1851), *Essays on Art* (1866), *Lyrical Poems* (1871), and *Visions of England* (1881). He also edited various collections of lyrical and religious poetry, notably the *Golden Treasury of English Songs and Lyrics* (1861, re-edited 1896). He died Oct. 21, 1897.

Sir Francis Turner Palgrave, father of above, was born in July, 1788. He was the son of a Jewish stockbroker named Cohen, but assumed his mother-in-law's maiden name on his marriage in 1823. He was called to the Bar in 1827, and knighted 1832, and was appointed Deputy Keeper of H.M.'s Records, 1838-1861. His works include *The English Commonwealth* (1832) and a *History of Normandy and of England* (1851-1861). He died July 6, 1861.

Pali Language and form of script of Buddhist sacred books. It was the living tongue of cultured India from the 7th century B.C. onwards, and continued in use for at least ten centuries, being ultimately displaced as Brahmanism regained its hold. Its use was retained by Buddhist scholars in Ceylon, Burma and Siam.

Palimpsest Ancient manuscript imperfectly effaced and its material, usually parchment, re-used. Chemical and photographic means occasionally restore the original writing, sometimes recovering valuable texts, thus, the 12th-century Ephraem Codex in Paris revealed 5th-century portions of Greek Biblical texts. There are some double palimpsests. Palimpsest monumental brasses or stone slabs, reversed for re-use, also exist.

Palissy Bernard. French potter. Born at Agen in France about 1510, he became a glass painter and settled at Saintes. He spent sixteen years in attempts to make enamelled ware, but finally won fame as the producer of pieces bearing coloured plants and animals in high relief. He was imprisoned as a Huguenot in 1562, but released by royal favour, and granted a workshop at the Tuilleries. He was arrested in 1585, he was thrown into the Bastille where he died in 1589.

Palladio Andrea. Italian architect and founder of the Palladian style of architecture. Born Nov. 30, 1518, Palladio

published in 1570 *Quattro Libridell Architettura*. This greatly influenced Inigo Jones (q.v.), who, after studying in Venice, introduced the Palladian style into England, and wrote notes on the *Quattro Libri*, which are incorporated in the English translation, published 1715. Palladio's masterpiece is the Church of the Redentor at Venice. He died in 1580.

Palladium In Greek legend, an archaic wooden image of Pallas Athena kept in the citadel of Troy for safe guarding the city. Its abstraction by the Greek heroes Odysseus and Diomedes led to the fall of Troy. Another legend claimed that Aeneas took it or another to Italy, where it was preserved in Rome.

Palladium Rare metallic element having the symbol Pd and atomic weight 106.7, palladium is silvery white in colour and like platinum is unaltered by exposure to air, but is slowly attacked by nitric acid. It has been used for parts of chronometers and astronomical instruments, also in certain silver alloys, but the supply now is very limited.

Pallas (Athena) Goddess of wisdom, war and the liberal arts in the Greek mythology. She is said to have sprung fully armed from the head of Zeus, and is represented armed and carrying a shield bearing the Medusa's head.

Pallium (or Pall) Ecclesiastical vestment. The Roman Catholic Church reserves it for the Pope, archbishops and by ancient usage seven specified continental bishops. It comprises a narrow shoulder band of white lamb's wool, with short lapels before and behind, embroidered with six crosses and decorated with three jewelled pins.

Pall Mall Thoroughfare in London, so called from the game of *Paille Maille* played here in the time of James II. Originally an open green in part of St James's Palace, houses began to be built about 1650, and a street was completed about 40 years later. Nell Gwynn lived at No. 79 from 1671 to her death in 1687. Pall Mall, which runs from Trafalgar Sq. to St. James's St., contains many famous clubs.

Palm (*Palme*) Natural order of endogenous plants, mostly large trees, natives of tropical and subtropical regions. Various estimated at 600-1000 species, bearing crowns of spreading fan-shaped or feathery leaves, their economic products are important for habitations, clothing, utensils, food and drink. The coconut's seed-kernels, the date palm's pulpy fruit, the sago palm's farinaceous pith and the cashew palm's terminal buds are edible. Other species yield palm sugar or jaggery, palm wine or toddy, candle wax, oil, vegetable ivory fans, rattans, leaf stalk fibre, leaves for thatch, and the like. The only European species, *Chamaerops humilis*, the Mediterranean fan palm is utilised for basketry, hats and vegetable horse hair. See DATE, PALM OIL, PALMYRA, ETC.

Palma Jacopo Italian painter, known as Vecchio (old). Born at Serbellina near Bergamo in 1480, he was famous for the richness of his colouring, and for his portraits of women. His most celebrated pictures are six paintings in the Church of S. Maria Formosa at Venice with S. Barbara in the centre and 'The Three Graces' in the Dresden Gallery. He died in 1528.

Palmas Las Palmas Chief city of the Canary Islands and a popular health resort. It has a considerable harbour, and is a coaling station and port of call for numerous ocean-going steamships. Shipbuilding and fishing are the principal industries. Fruit and cochineal are exported. Pop. (1931) 79,444.

Palmer Monksland pilgrim. He bore in his hand a branch of palm, he tokening the fact that he had visited the Holy Land. He had no dwelling place, but journeyed from shrine to shrine, existing entirely on charity.

Palmerston Viscount English statesman. Born at Broadlands near Romsey, Hants, Oct. 20 1784. Henry John Temple became 3rd viscount in 1802, entered Parliament in 1806 and was Junior Lord of the Admiralty and Secretary at War, 1809-1828. In 1830 he became Foreign Secretary under Earl Grey but went out with the Whigs in 1841. He was Foreign Secretary again in 1846 under Lord John Russell. In 1850 a vote of censure on his foreign policy was carried in the House of Commons but defeated in the Lords. In 1851 he angered the queen by expressing approval of the *coup d'état* of Louis Napoleon without consulting her and was forced to resign. He was Home Secretary under Aberdeen in 1852 and Prime Minister in 1853, when he vigorously prosecuted the Russian War. Defeated in 1857, he came back was again defeated, and in 1859 again Prime Minister, retaining office until his death Oct. 18, 1865. He is buried in Westminster Abbey.

Palmistry Art or practice of reading the hand. It comprises chiromancy, or character reading, and chiromancy, or foretelling the future, and operates by inspection of lines and markings on the human palm. This form of divination of great antiquity, has developed a complex system of interpretation, entirely non-rational which names the thumb and fingers after certain planets, and draws lines over the palm to represent life, fate and love, crossed by others which represent head and heart. See FORTUNE TELLING.

Palm Oil Fatty substance from the fruits of several palms pre-eminently the W. African oil palm *Elaeis guineensis*. The boiled pericarp yields an orange-red fat, comprising tripalmitin and triolein, which melts at 80.5°F. It serves for making soap, candles and railway carriage grease. Palm kernels yield a white oil used like coconut oil in making margarine.

Palmyra Ancient city of Syria. Situated in a desert oasis 120 m. N.E. of Damascus, its Old Testament name Tadmor still survives. Under the Roman Empire its position on the Euphrates caravan route made it influential and opulent as magnificent ruins attest. Prominent under Hadrian, it enjoyed a brief 3rd century independence, culminating in Queen Zenobia's capture by Aurelian 272.

The Palmyra Palm is a tree indigenous to India and Indo-China with a tropical African variety (*Borassus flabellifer*). It yields sugar, toddy, matting, basketry, fans and timber.

Pamir Mountains region of Central Asia mostly Russian. It forms a central knot 13,000 ft high and upwards, from which radiate ranges and rivers into N.W. India, Russia, Chinese Turkistan and Afghanistan. The N. slope drains into the Aral

Sea and the Tarim basin, tho S. connects the Hindn Kush and Karakoram ranges

Pampas Plains of Argentina They extend from the Andean foothills to the Paraná River and the Atlantic coast The sandy and clayey soil resembles Russian steppeland The E treeless grasslands support catfio, sheep and horses, and produce wheat Tho more sterilo W includes saline deposits The grasslands produce pampas grass, *Cortaderia argentea* It forms tufts of leathory leaves 5 to 7 ft long, and stems bearing dense silky silvery-white panicles 10 to 12 ft. high Pampas Indians is the collective name for 8 American Indians of the Argentine plains

Pan In Greek mythology the god of shepherds, huntsmen and rural people, also protector of flocks and herds, wild beasts and bees Chief of the Satyrs and inventor of the syrinx or Pan's pipes, he is supposed to have inspired sudden fear, hence the word *panic* He is represented with two small horns and lower limbs of a goat.

Panama Central American republic Its area is 32,380 sq m Pop (1930) (excluding Canal Zone) 467,459 Tho inhabitants are mostly a mixed race of Spanish, Indian and Negro origin Tho state is administered by a president assisted by three vice-presidents and a cabinet of five ministers, and is divided up into nine provinces The capital, Panama, had in 1930 a pop of 82,827 There is a university at Panama.

Panama Canal Canal connecting the Atlantic and Pacific Oceans It was constructed as the result of a treaty (1903) between U.S and Panama granting the use and control of a zone 5 m wide on each side of the canal route Tho canal is about 40 m long from deep water in the Caribbean to deep water in the Pacific. The width is from 300 to 1000 ft and the minimum depth 41 ft. Tho average time of passage is 7 to 8 hours Informally opened to traffic Aug 15, 1914, landslides caused interruptions up to 1917, but since then the channel has been kept clear Tho official opening was on June 12, 1920 Tho Hay-Pauncefote Treaty (1901) provides for the use of the canal under equal terms by vessels of all nations In 1934 over 5500 vessels passed through the canal

Pancras Patron saint of children Born in Phrygia of noble parentage, he refused to renounce Christianity at Diocletian's bidding, and was beheaded c 293 when 14 years old Ho is commemorated on May 12 A London borough and several British churches bear his name, as did the Clunian Priory. Leaves

Pancreas Large glandular organ situated behind the stomach and having a duct opening into the small intestine close to the bile duct. It secretes an alkaline digestive fluid which converts starch into sugar, fats into glycerine and fatty acids, and peptones into aminoacids In addition an internal secretion, *insulin*, is concerned in the assimilation of glucose

Pandora In Greek mythology, according to Hesiod, the first woman upon whom the gods lavished their choicest gifts Though forbidden to do so, she opened a box containing all human ills and allowed these to escape, but managed to save the good gift of hope

Pangbourne Village of Berkshire on the Thames, 5½ m N.W. of Reading and on the G.W. Riv It is much

frequented by anglers It has a college for training officers for the mercantile marine. Pop 1235

Pangeneses In biology the name given to a theory put forward by Charles Darwin to explain the power of the egg cell to reproduce the different parts of the body According to this hypothesis each cell of the body throws off minute germules which ultimately become stored in the egg cells, and on development reproduce each part of the body

Pangolin Genus of toothless mammals (*Manis*) occurring in S Asia and tropical Africa Short-legged, with lizard-like bodies and tails protected by overlapping horny scales, they roll into a ball when disturbed Called also scaly anteaters, they capture termites with their long, worm-like tongues There are three Asiatic and four African species, the largest 6 ft long

Pankhurst Emmeline British suffragist Born July 14, 1858, she was the daughter of Robert Goulden of Manchester, and married, 1879, R M Pankhurst, barrister and advocate of woman's suffrage (d 1898) She helped to found the Woman's Franchise League (1889) In 1903 she was instrumental, with her daughter, Christabel, in founding the Women's Social and Political Union Arrested in 1908 for breaches of the peace, she was imprisoned, but was released on grounds of health Imprisoned in 1912, she went on hunger strike, and was released In 1913 she was sentenced to 3 years penal servitude, but again refused food and was released During the Great War she lent her organisation to the cause of recruiting and munitions With the extension of the suffrage to women in 1918, she joined the Conservative Party She died June 14, 1928

Pansy Perennial herb of the violet order (*Viola tricolor*), indigenous to Europe, N and W Asia and N. Africa From various species and subspecies have been derived innumerable hybridised forms much esteemed by gardeners, including selfs, white grounds and yellow grounds, besides the bedding varieties called tufted pansies or violas The French name is *pensée*, "thought" See HEARTSEASE

Pantheism Metaphysical doctrine which identifies the universe with God The term, "all-God," introduced by John Toland, 1705, denotes a system of thought or attitude of mind traceable in ancient India, in certain of the Greek philosophers and in such modern philosophers as Spinoza, Fichte, Schelling and Hegel A form of monism, it is a theism or an atheism according to the emphasis placed upon personality

Pantheon Name, "belonging to all gods," applied to the best preserved ancient temple in Rome Erected by Hadrian, A.D. 120-4, it occupied the site of an earlier temple built by Agrippa in 27 B.C. Consecrated 69, it is now the Church of Santa Maria Rotonda Tho Pantheon in Paris, built in 1754-90, dedicated as a church to S Genovève, was set apart as a mausoleum for illustrious Frenchmen, 1792

Panther Large carnivorous mammal of the cat family indistinguishable from the Old World leopard (*p*) Medieval fabulous besa-ies regarded them as distinct. Modern sportsmen tend to call panthers tho larger, and leopards the smaller examples. In

N America the name, colloquialised as "paintor," denotes the puma (*q v*), which in S America is sometimes called the cougar (*q v*)

Papacy The Term employed in two senses (1) ecclesiastical, denoting the system under which the Pope, as successor of S Peter and Vicar of Christ governs the Catholic Church as its supreme head, and (2) historical, signifying the papal influence viewed as a political force in history Up to, and including, the Middle Ages the history of the Papacy was to a considerable extent the history of Europe and under Innocent III in the 13th century the Pope became a sort of emperor England for a time being practically governed by his legates

Thanks to bequests and voluntary grants, a temporal Papal State grew up with, at length, an area of 17,000 sq m, and Rome as the centre of government. After the Austro-Italian War of 1859 nearly two thirds of this territory was added to the kingdom of Italy, Rome and its environs being preserved for the Pope by the French In 1870 Rome was adopted as the seat of government of united Italy, and the Papacy restricted to the Vatican The temporal power of the Pope remained in suspense until 1929 when, by the Treaty of Feb 11, the full and independent sovereignty of the Holy See in the city of the Vatican was recognised, and payments were agreed upon in settlement of the Vatican's claims for compensation for loss of temporal power The outstanding ecclesiastical overt in the recent history of the Papacy was the affirmation of the infallibility of the Pope in 1870

Papaw Small evergreen tree akin to the passion flower order, of S American origin (*Carica papaya*) Now widely naturalised throughout the tropics, its long stalked seven lobed leaves, 2 ft across, shelter melon shaped yellow fruits 10 in long They are eaten raw, hulled or pickled The unripe fruit yields the digestive ferment papain

Papen Franz von German politician Born Oct 29, 1879, he entered the army, later joined the diplomatic service, and in 1914 was an attaché in Washington There he worked hard in his country's interests and against the Allies, on this account the United States Government secured his recall to Germany in 1916 He then went to Gallipoli as a staff officer In 1931 Papen was elected a member of the diet of Prussia, and became the chief proprietor of the newspaper *Germania* A member of the centre party he supported the ministry of Dr Brüning, whom he succeeded as chancellor in May, 1932 In March, 1933, he became Reich Commissioner for Prussia and in July, 1934, special German minister in Vienna

Paper Material made from fibrous vegetable pulp and used for writing and other purposes The art of paper making was practised by the Chinese and Japanese in early times by the Arabs after the 7th century, and by the Moors in Spain in the 12th century From Spain it spread over Europe to England where the first paper mill was established in the 15th century

The first paper was hand made from rag fibres, but now numerous fibrous materials are used in addition, including straw, esparto grass and chemical and mechanical wood pulp The introduction of machinery about 1798 revolutionised papermaking and the invention of the sulphite process for making chemical wood pulp brought about the production of cheap paper for newspapers etc.

Papier Mâché Name given to a hard, light material made from paper pulp and used for making boxes, trays and similar articles, for internal architectural decoration It is prepared by pressing pulp into moulds or by subjecting pasted sheets of paper to high pressure Papier mâché may be japanned, varnished, gilded or inlaid

Papua (British New Guinea) Southern eastern part of the island of New Guinea (*q v*) with other small islands in the vicinity Area, 90,540 sq m of which 87,786 are on the mainland Pop (1932) Europeans, 1144, Papuans (estimated), 275,000 Papua is administered by the Australian Commonwealth under the Papua Act of the Federal Parliament (1905) Ports of entry are Port Moresby, Samarai and Daru There is an important mining industry Rubber, coconuts and sisal hemp are cultivated, and valuable mineral deposits and timber growths are worked There is a regular steamer trade between Port Moresby and Sydney

Papyrus Kind of paper used by the ancient Egyptians It was prepared by cutting into long strips the central pith of the stems of the paper rush, *Cyperus papyrus*, laying others across, moistening, pressing, drying, polishing and writing upon it with a reed pen The rush, formerly plentiful in the delta, has receded to the Upper Nile but grows occasionally elsewhere Thousands of papyri have been collected in Egypt, including classical Greek texts Their study is called papyrology

Pará City and port of Brazil Sometimes called Belém it is situated on the banks of the Pará River and is the capital of the Brazilian State of Pará It is the chief commercial centre of the Amazon districts, the rubber trade being the most important It has a good harbour Pop (1930) 279,491

Parabola Term in geometry for a curved figure or conic section formed by the intersection of a cone and a plane parallel to one side The form of the parabola varies as the cutting plane approaches the side of the cone

Paracelsus German physician Born about 1493, his real name was Theophrastus Bombastus von Hohenheim, his father being a Swiss physician He himself studied medicine, and acquiring fame as a practitioner, was appointed lecturer at Basle University His objectionable habits and violent temper brought about his expulsion and for twelve years he was a wanderer, settling finally at Salzburg, where he died Sept. 24, 1541

Parachute Form of life saving apparatus used by aeronauts to descend safely from a height In its usual form it consists of a silk fabric made in the shape of an umbrella with cords attached at the circumference, and fastened to straps on the back of the person The parachute is carried in a bag fastened to the body of the operator, and is released either automatically or by means of a rip cord Parachutes have been known since the end of the 18th century, and the first successful descent from a balloon was made in 1797 by the French aeronaut, Garnerin

Paradise Word denoting an Oriental monarch's park or pleasure, variously translated in the Old Testament It is used of an orchard of pomegranates in Cant. ii R.V. margin It is the septuagint Greek version of Eden (*q v*) and is used in the New

Testament of an intermediate state (Luke xxiii, 2 Cor xii), or of the heavenly counterpart of Eden, Rev ii.) The mediæval conception of the Christian paradise was elaborated by Dante and Milton. The Koran depicts in picturesque imagery the rewards of the Islamic paradise.

Paraffin Term used in organic chemistry for a large series of hydrocarbons possessing similar chemical properties though differing in physical characters and molecular complexity. More generally the term is used for a burning oil obtained from petroleum and shales, also for the solid wax-like substance from the same source. Paraffin wax varies considerably in consistency from a jelly to a hard cake, and is used in pharmacy, candle, match and waterproofing industries, also as an electrical insulator.

Paraguay South American Republic situated between the Paraguay and Parana rivers and bounded on the north by Brazil and Bolivia and on the south by the Argentine. Paraguay proper has an area of about 62,000 sq. m., but there is a large tract of territory (the Chaco, *qv*) claimed by both Paraguay and Bolivia (*qr*). The total pop. is about 800,000. It is a fertile country with excellent grazing land supporting millions of cattle. Agriculture is the basis of the country's wealth. One of the chief exports is Yerba maté or Paraguayan tea. Tobacco is also grown, and there is an important timber industry.

The capital is Asunción (*qv*) from which there is a railway to Encarnación on the Parana River. Roman Catholicism is the established State religion. There is a small defence force of about 100 officers and 2500 men. Legislative authority is vested in a Congress of two houses, a Senate and a Chamber of Deputies, the executive being in the hands of a President elected for a term of four years, assisted by five ministers. In Aug. 1932 the dispute with Bolivia over the frontier territory broke out anew, and led to the Gran Chaco War. In 1933 the combatants refused the mediations of the League of Nations, and in 1935 Paraguay signified her intention to withdraw from the League. In June, 1935, an agreement was reached and hostilities came to an end.

Parallax Astronomical term for the apparent change in position of a celestial body caused by a change in position of the observer, and especially applied to the amount of apparent motion due to this displacement. It is of great importance, as upon the determining of the parallax, astronomers can calculate the distance and magnitude of celestial bodies. Diurnal or geocentric parallax is the apparent difference in position of a body as seen from the earth's surface and from the centre of the earth.

Parallel Term applied in geometry to lines in the same plane that do not meet in either direction. With reference to latitude a parallel is a small circle whose plane cuts the earth's axis at right angles and which, therefore, has an east and west direction. In military science parallels are trenches dug parallel to the defences of a fortress to give cover to the besiegers.

Paralysis Loss of the power of muscular action, sensation or function in any part of the body. Associated, organically or functionally, with disorder in the brain, spinal cord or peripheral nerves, it may be general; affect one side only, hemi-

plegia, the lower half of the body, paraplegia, or be localised, *cf* facial paralysis, drop-wrist. Hysterical paralysis, without any discoverable lesion, may simulate any organic form. Paralysis agitans, shaking palsy, is a chronic disease of advanced life.

Parana City and port of Argentina. Founded in 1730 by colonists from Santa Fé, from 1852 to 1861 it was the capital of the Argentine Confederation. Pop. (1931) 66,204.

Paranoia Chronic mental disorder characterised by systematised delusions of persecution. Disturbances of various fundamental emotions and sentiments, such as vanity and fear, combined with a credulous constitution, may result in delusions of grandeur or persecution, other forms of the disease are amatory or querulous.

Parasite In biology, any organism animal or vegetable, nourished wholly or partially at the expense of another organism upon or within which it lives. Except for a few fishes animal parasites are invertebrate, including lice, scale insects, ticks, leeches, tape-worms and still lower forms. Among parasitic flowering plants are dodders, broomrapes and mistletoe. Parasitic plants are most frequently fungi and bacteria, and occasion many parasitic diseases in men, other animals and plants. The study of parasites is called parasitology.

TREATMENT FOR PARASITES *Internal*.—The usual remedy for tape worms is oil of male fern (1 drachm), given before breakfast after a fast from 6 p.m. the previous evening. Four hours after the dose, and not sooner, give castor oil.

External.—There are three species of animal parasites acquired in unclean surroundings: the Body Louse infests the underclothes, which should be thoroughly disinfected with steam; the Crab Louse is found on the hairy parts of the body and is got rid of by the application of antiseptic lotions and ointments; the Head Louse lays its eggs (nits) on the hair near the roots, which must be soaked with crude paraffin or oil of sassafras for three nights.

Paravane Appliance used in the Great War against mines and submarines. The paravane was somewhat kite-shaped with a torpedo-like body. It was towed by a wire from a ship, being kept away from the sides by the action of hydrovanes and at a prescribed depth by a rudder controlled by hydrostatic valves. The head was armed with a cutter for severing the moorings of a mine, or with a striking device for exploding a depth charge when used against submarines.

Parcel Post System of transport and delivery by the Post Office of packages not exceeding specified weights and dimensions. Highly organised in Great Britain, it includes carriage of parcels throughout the Empire and to most foreign countries, also facilities for registration, insurance and payment of cash on delivery of purchased articles. Limits of weight for inland parcels, 11 lb., limit of size, length 3 ft. 6 in., length and girth combined, 6 ft. Parcels for abroad are subject to customs duty, and if containing dutiable articles a declaration respecting them must be signed by the sender.

Parchment Writing material used for deeds and other documents of a permanent character, and prepared from the skins of various animals. Ordinary parchment is made from the skins of the sheep and

goat. Vellum from the skins of the calf, kid or lamb, a tough variety for book binding from pig skin, and a parchment for drums from asses' skins. The hair or wool is removed and the skin, after steeping, is stretched on a frame, scraped and rubbed with pumice.

Pardon Dispensation granted by the Pope, remitting that temporal punishment of sin which would otherwise be inflicted, either in this world by penance or in Purgatory. Such pardons are called Indulgences and in the 16th century were the cause of much scandal owing to the sale of them by Pope Leo X, as a means of obtaining funds for rebuilding St. Peter's Church at Rome. The Romish doctrine of "pardon" is repudiated by the Church of England in the 22nd Article of Religion.

The name Pardon is also given to religious gatherings in Brittany associated with the desire of obtaining absolution for sins or cures for bodily ailments. The religious ceremonial is sometimes followed by a sort of village feast.

Pardon In law the remission of the punishment attached to the commission of a crime. By English law pardon is the sole prerogative of the king, and is now exercised by delegation, the king acting on the representation of the Home Secretary. The king, however, cannot pardon a private, as distinct from a public offence, so as to prejudice a person injured by the offence, and the king's pardon cannot be pleaded as a bar to impeachment by the House of Commons. Pardon may be actual or constructive, the latter being obtained by endurance of the punishment. It may also be free or conditional on commutation of the sentence. An Act of Indemnity is a species of pardon.

Parent Father or mother. The parents of a child are its natural guardians till it attains the age of 21, or unless it marries before reaching that age. The primary right resides in the father, but custody of the child may be granted to the mother under the Divorce Acts, the Infants' Custody Act and the Guardianship of Infants Act. Parents' liability for maintenance of their children is governed by statutes, the Act of 37 and 58 Vict. imposing on them the duty of providing adequate food, clothing, medicinal aid and lodging for children in their custody until the boys attain 14 years and the girls 16. Education of children and parents' responsibility for it is regulated by various Elementary Education Acts. See EDUCATION.

Pariah Name applied by Europeans to any casteless Hindu, and hence to any social outcast. The Paraiyans or Pariahs of the Tamil country in Madras are an agricultural caste, classed as untouchable, but not the lowest. Pariah dogs in Oriental towns and villages are animals of domesticated origin which have become half wild.

Pari-Mutuel System employed in France and elsewhere in order to collect a tax on the amount staked in betting on the Turf. It is on much the same principle as a cash register, every bet made being registered, and both the amount staked on each horse in a particular race and the total amount staked on all the horses in the race being shown publicly. In the Totalisator (q.v.), which is superseding the Pari-Mutuel, human agency is replaced by electrical power.

Paris Small genus of perennial herbs of the lily order, indigenous to temperate Europe and Asia. Their short un-

branched stems, rising from creeping root-stocks, bear a whorl of 4 to 9 leaves with a single yellow-green flower whose fœtid smell, attractive to flies, assists cross fertilisation. A red bordered species, *P. polyphylla*, is grown in gardens. See HERB PARIS.

Paris In Greek mythology a son of Priam, King of Troy. Abandoned as an infant on Mt. Ida in consequence of a prophecy that he would cause the destruction of the city, he was reared by a shepherd, and later gave judgment in the claim of the three goddesses Hera, Pallas and Aphrodite, to a golden apple inscribed "For the Fairest." Deciding in favour of Aphrodite, he was rewarded by the love of Helen (q.v.), wife of Menelaus. Her abduction by Paris led to the siege of Troy in which Paris was slain.

Paris Capital city of France. The city occupies both banks of the Seine and two islands, 110 m. direct from the river's mouth. One of the world's greatest and most beautiful cities, it has developed in 2000 years from a group of huts (the Romans called it Lutetia, "the muddy") to be one of the world's leading centres of culture.

Its historical importance dates from A.D. 508, when Clovis (q.v.) chose it as his capital, building on the Ile de la Cité. The decay of feudalism and the rise of the guilds in the 11th century hastened the city's growth, while the first municipal authority dates from the 13th century. A great scholastic centre also, Paris, however, became more and more of political importance. After 1559 the kings resided in the Louvre (q.v.) which had been rebuilt by Charles V (1337-1380), in whose reign also the Bastille was built. In 1422 the English took the city and held it against Joan of Arc in 1429.

Modern Paris dates from the Renaissance. Catherine de Medici began to build the Tuilleries (q.v.) in 1564, and the Pont Neuf was begun in 1577. Quays were constructed and the city spread, its rate of growth increasing under Louis XIV, the "Grand Monarque" (1638-1715), who, however, removed the royal residence to Versailles.

Paris itself regained its importance during the Revolution and under Napoleon, becoming an industrial and economic centre throughout the 19th century and gradually merging with its suburbs. To day more than thirty bridges cross the Seine, and the public boulevards and squares are renowned for their beauty.

Paris is rich in famous buildings. Besides those already mentioned there are the cathedral of Notre Dame (1163-1230), the Hotel de Ville, Palais Royal, Champs Elysees, Palais de Justice, the Conciergerie (an ancient prison), Bibliothèque Nationale, Hôtel des Invalides (where Napoleon lies buried), the Sainte Chapelle, the Panthéon, burial place of France's great men, the Arc de Triomphe, the Palais du Luxembourg with its wonderful gardens, the Opéra, Champ de Mars, and the Eiffel Tower. St. Germain l'Auxerrois is a well known church, and the cemetery of Père Lachaise is famous. Montmartre, the Quartier Latin, the Bois de Boulogne, Auteuil and Longchamps are districts too well known to require description. The chief educational institutions are the University of Paris and the Sorbonne.

Transport by road, river and rail is well organised while from the air Paris is well served by the great aerodrome at Le Bourget. It has eight broadcasting stations, the two most powerful operating on 1725 M., 75 kW, and

4471 M, 07 kW The city's shops and restaurants are world famous. Her manufactures include almost every form of industry. The city is still a fortified stronghold with two rings of detached forts. Besieged and captured by the Prussians in 1870, it narrowly escaped a second capture in Sept., 1914, when taxicabs were hastily commandeered to rush every available soldier into the line of defence. Area about 30 sq. m. Pop. (1931) 2,871,039.

Park Mungo Scottish explorer. Born at Foulshiel on the Yarrow, Sept. 20, 1771, he was, by profession, a doctor. His services were accepted in 1795 by the African Association, and, starting from Senegal, he reached the Niger at Segha, after an adventurous journey. He traced the course of the river for some distance but fell ill and was brought back to Senegal after an absence of nineteen months. From 1801-1803 he practised as a doctor at Peebles. In 1805 he undertook another African journey, this time at government expense. Starting from Fasilka on the Gambia, he reached the Niger, but was attacked by natives and drowned in Jan. 1806.

Parker Sir Gilbert British novelist. Born in Canada, Nov. 23, 1862, he was educated at Trinity College, Toronto. After travelling extensively he organised the first Imperial Universities Conference in London, 1903. He was M.P. for Gravesend from 1900-18, was knighted in 1902 and created a baronet in 1915. He was Chairman of the African Association for nine years and took charge of American Publicity in the Great War. His writings include poems, plays and novels, the last-named dealing largely with French Canadian life. He also wrote a *History of Old Quebec* in 1903. A later publication was *The Promised Land* (1923). He died in 1932.

Parkes Sir Henry Australian statesman. Born at Stoneligh in Warwickshire, May 27, 1815, he emigrated at the age of 24 and engaged in journalism at Sydney. His able discussion of public questions led to his being elected in 1854 a member of the Legislative Council. In 1866 he became a member of the ministry in which he subsequently held several offices, becoming Premier of New South Wales in 1872. He was premier five times, and was a warm supporter of Free Trade. He died April 27, 1896.

Parkhurst District in the Isle of Wight called Parkhurst Forest. At one time there was a military station near the prison can accommodate more than 700 convicts.

Park Lane Fashionable London thoroughfare overlooking Hyde Park and running from Piccadilly to Oxford St. It has important historical associations and contains the mansions of many well-known figures in modern life. Some of the old houses have now been demolished, and hotels erected in their place.

Parkstone Summer resort in Dorset lying between Poole and Bournemouth, on the S. Ry. Pop. 6550.

Parliament Word used for the legislature of Great Britain and other self-governing parts of the British Empire. It should be distinguished from the parliaments of France before the Revolution which were in the main judicial bodies. The English Parliament has been developed from the Witan of the Anglo-Saxon kings and the King's council of the Normans. Those

bodies met to advise the king on important matters of state, they were without any rules of membership and met when the king required them. In the 13th century knights of the shire and representatives from the town joined the barons, abbots and bishops who had hitherto formed the council, and with their arrival parliament in the modern sense began. Simon de Montfort first called men from the towns, and has been called the founder of parliament, but it was Edward I who assembled, in 1295, the model parliament that was a pattern for later legislatures.

At first parliament was an assembly of one house, but early in the 13th century it was divided into two, a form it has since retained, the House of Lords and House of Commons. The Lords were much more powerful, the Commons being merely asked for their assent, which was usually taken for granted, but gradually the Commons made themselves equal to the Lords and in the 19th century became definitely the dominant partner. This was due to the control they acquired over finance, and after a time it became the rule that finance was the province of the Commons.

At first, like a witan or a council, a parliament met wherever the king happened to be and sat for as long as he wished. A careful king could do without a parliament perhaps for years, but one who wanted a good deal of money, as did Henry IV, was obliged to call frequent parliaments. The Tudor sovereigns managed to make their parliaments register their will, but in the time of the Stuarts there was the memorable struggle between king and parliament, which became a civil war. In 1689 parliament made a settlement of the crown, and in 1694 passed a triennial act, which said that not more than three years must pass without the calling of a parliament. This was due to the action of Charles I and Charles II, each of whom ruled without a parliament for a long period.

Parliamentary government, or the control of the executive by the legislature, especially by that branch which represents the people, was a direct consequence of the victory of the parliament in the Civil War, but it only took shape at the Revolution of 1688. In 1715 a septennial act was passed by which a parliament could sit for seven years, and this remained the law until 1911, when the Parliament Act reduced the period to five years. Nevertheless, parliament, being a sovereign body, can prolong its own existence as it did during the Great War. The Parliament Act of 1911 made the House of Lords subordinate to the House of Commons. The Lords is now a revising chamber only. It can delay the passing of a bill into law for two years, but that is all. If the Commons, under the required conditions, pass a measure three times that bill becomes law, whether the Lords oppose or not. Money bills cannot be touched by the Lords.

A parliament is called together by the sovereign. Its sittings are divided into sessions, each occupying a year or thereabouts, and each opened by the king or his representative. Each session is prorogued but a parliament is dissolved. This is done on the advice of the Prime Minister and a general election must follow.

The parliaments in Canada, Australia, South Africa and elsewhere follow very largely the British model, both in constitution and practice except that their second chambers contain no hereditary elements and have rather more

power than the House of Lords See COMMONS, HOUSE OF, LORDS, HOUSE OF

Parma City of Italy It lies in a fertile tract of the Plain of Lombardy The Royal University of Parma, founded 1601, now has faculties in law, medicine and natural science Considerable trade is carried on in grain, cattle and dairy produce Pop (1931) 71,282

Parma Duchy of Papal possession from 1512 1545, when the Pope Paul III (Alexander Farnese) invested his bastard son, Pierluigi, with the duchies of Parma and Piacenza There were eight dukes of Parma from 1545 to 1731 The duchy then passed and repossessed alternately into the hands of Spain and Austria till 1860, when it was formally incorporated into the Kingdom of Italy, becoming a province with an area of 1334 sq m and a pop (1931) of 373,095 Capital, Parma

Parmoor Baron English politician Charles Alfred Cripps was born Oct. 3, 1852, and educated at Winchester and New College, Oxford Called to the bar in 1877 he became a Q C in 1890, and made a great reputation as an ecclesiastical lawyer He was elected M P for the Strand Division of Gloucestershire in 1895 representing that constituency until 1900 Later he represented Stretford, Lancs, and Wycombe Division of Bucks He was made a K C V O in 1908 and elevated to the peerage in 1914 Specially appointed a judicial member of the Privy Council in 1914, he became Lord President of the Council in the Socialist Ministry of 1924 and held this post again from 1929-31 He has written on *Principles of Compensation* and *The Laws of Church and Clergy*

Parnassus Mountain range in the Greek province of Phocis, the principal feature of which is the mountain of the same name, 8000 ft in height, and famed in Greek mythology as the abode of the Muses Near the summit was the Castalian spring draughts from which were supposed to give poetic inspiration On the lower slopes was the cave of Delphi (q v) from which oracles were delivered by the Pythones

Parnell Charles Stewart Irish Nationalist politician Born June 27 1846, he studied at Cambridge and in 1875 was returned as a Home Ruler for County Meath Throwing himself energetically into Irish political affairs, he skillfully organised the Irish Party in the House of Commons and ruled it with a rod of iron Having initiated a system of deliberate obstruction in Parliamentary business he and his followers acquired considerable influence and, after wrecking the first Salisbury Government, contracted an alliance with Mr Gladstone in the hope of realising Irish Home Rule ambitions Attacked by *The Times* for his supposed complicity in Irish crime Parnell brought an action and obtained £25,000 damages An entanglement in a divorce case led to the loss of his leadership of the Irish Party and his withdrawal into private life He died at Brighton, Oct. 6, 1891

Parotid Gland Name given to the largest of the salivary glands, situated below and in front of the ear and filling the recess beneath the angle of the lower jaw An inflammatory condition of the parotid gives rise to the disease known as mumps and it is also the seat of tubercular abscesses.

Parr Thomas English centenarian Believed to have been the longest lived of British centenarians, although the reputed year of his birth, 1483, has been questioned "Old Parr" as he is traditionally called, was a Shropshire farm servant and after marrying his second wife at the age of 120, went on working for a further ten years He went to London to see Charles I, and died from a surfeit of royal hospitality in 1635

Parrakeet Name indefinitely applied to various small parrots, often with long and slender tails Among aviary favourites are the red billed genus *Palacornis*, including the Indian rose ringed, ring necked and blossom headed parakeets Australian budgerigars and other grass parakeets are favourite cage birds There are also swamp parakeets and ground parakeets See LOVE BIRD

Parramatta Town of New South Wales. It is noted for its orchids and orange groves It has a well known public school, King's School Pop (1931) 16,700

Parrot Order of birds of high intelligence and organisation inhabiting tropical and subtropical regions (*Psittaci*) The upper jaw is hinged to the skull They are usually expert climbers, each foot having two toes forward and two backward Of 500 species S America has most followed by the E Indies, Australia and Polynesia, a few in Asia and Africa, and one in N America Many have gorgeous colouring, the sexes being usually alike Some readily learn to talk, especially the African grey parrot See COCKATOO, LORY, MACAW, PARRAKEET

Parry Sir Charles Hubert English composer Born at Bournemouth, Feb. 27 1848, he was educated at Eton and Exeter College Oxford He obtained his Mus BAO at age of 18, Mus D, Cambridge, 1883, Oxford, 1884, Dublin, 1891 and was knighted, 1898 He became First Professor and later Principal of the Royal College of Music, Choralus of Oxford University, 1883, and Professor of Music in 1900 His works include concertos, symphonies and other compositions He also wrote on music in Grove's Dictionary and his *Studies of Great Composers* and *The Evolution of the Art of Music* are recognised classics of musical literature He died Oct. 7, 1918

Parry Sir William Edward Arctic explorer Born at Bath, Dec. 19, 1790, the son of an eminent physician, he entered the Royal Navy and served against the Danes in 1808 In 1810 he was sent to the Arctic for protection of the whale fisheries Later he took part in five Arctic expeditions, four of which he commanded throughout The first, under Sir John Ross (q v), was in 1818, the others in 1819, 1821-23, 1824-25, and 1827 The last was an unsuccessful attempt to reach the North Pole on sledges from Spitzbergen To his credit is the discovery of Barrow Strait and Melville Island Knighted in 1829 and appointed Departmental Comptroller in 1837, he became Superintendent of Haslar Hospital in 1846 He was made rear admiral, 1852, and governor of Greenwich Hospital, 1853 He died July 8, 1855

Parsees (or Parsis) Religious community in India and parts of Persia At the 7th century Arab conquest many Persians who refused to embrace Islam fled to Gujarat, taking with them their Zoroastrian faith, most of them afterwards settled in

Bombay Their descendants, still speaking Gujarati now comprise 111,853 in India, and about 10,000 in Persia

Parsley Biennial umbelliferous herb, perhaps of Mediterranean origin (*Petroselinum crispum*) Introduced into Tudor England, its crisp, curled, mossy leaves are much used when fresh for garnishing, and either fresh or dried for flavouring A Hamburg variety, with turnip shaped root, is boiled for use in soups or eaten as a separate dish

Parsnip Biennial umbelliferous herb, native of Europe and Siberia (*Pucedanum sativum*) Wild in Britain, its thin, woody root has become, under cultivation since Roman times, a long, snoculent, whitish, tapering root, palatable and nutritious, containing sugar, and surpassing the carrot as a milk producing cattle food It also serves for making country wine See COW PARSNIP

Parsons Sir Charles Algernon British engineer and inventor of the steam turbine Born June 13, 1854, the fourth son of the 3rd Earl of Rosse, he was educated privately and at St. John's College, Cambridge He founded the firm of C A Parsons & Co, Engineers, Heaton, Newcastle-on-Tyne, and was also Chairman of the Parsons Marine Steam Turbine Co, Ltd and Chairman of Rosse Ltd, Optical Works, Clapham Common He was created K C B, 1911 and given the O M, 1927 He was President of the Institute of Physics, British Association, and North-East Coast Institution of Engineers and Shipbuilders He died Feb 12, 1931

Parsonstown (or Birr) Town in Offaly, Irish Free State, 62 m W S W of Dublin In the castle, belonging to the Rosse family, there is an observatory containing the great reflecting telescope installed by Lord Rosse, with which important astronomical discoveries have been made Pop (1926) 3,391

Parthenogenesis Term in biology for a method of reproduction in which an individual is developed from an unfertilised egg-cell In some types parthenogenesis has reached a stage where the male is absent entirely as in some gall flies and saw flies in others such as the aphides or green fly males appear after a succession of parthenogenetic stages In the honey bee the eggs of the queen bee if unfertilised develop nevertheless and become males

Parthenon Temple at Athens dedicated to Pallas Athene Considerable ruins are still in existence It was begun about 450 B C, under the direction of the sculptor, Phidias It was 227 ft long and 101 ft in breadth and was pure Doric in style In beauty of design and decoration it has no equal It suffered damage during a siege by the Venetians in 1687, and some of the sculpture was removed by Lord Elgin in 1812 These pieces are in the British Museum under the name of the Elgin Marbles (q v)

Parthia In ancient geography a country S E of the Caspian and E of Media The Kingdom of Parthia, which had previously belonged to the empire of the Seleucidae lasted from about 250 B C to about A D 190 The Parthian Army consisted chiefly of mounted archers, and from their habit of turning and shooting their arrows when in feigned retreat the term "Parthian glance" is derived The Parthians were long in conflict with Rome and in 53 B C, defeated and slew

Crassus. They were finally subdued by Trajan, Antoninus and Caracalla

Partick Suburb of Glasgow, separated from it by the Kelvin It has shipbuilding yards and paper staining, flour milling, machine-making and other hardware industries

Partnership Defined in the Partnership Act of 1890 as "the relation which subsists between persons carrying on a business in common with a view to profit" The relation, however, between members of a company registered under the Companies Act or formed by Royal Charter is not a partnership within the meaning of the Act A private partnership cannot be formed of more than 10 persons for banking or 20 for any other business A "sleeping partner" may participate in the profits without taking any active share in the management and without appearing to the world to be a partner, but, like any other partner, he is responsible for the firm's debts Many other regulations and conditions are set forth in the Act

Partridge Name denoting various game birds of the pheasant sub-family The British grey partridge, *Perdix cinerea*, preferring arable land, extends throughout Europe, being associated in Asia with related forms The red-legged or French partridge, *Caccabis rufa*, a native of S W. Europe introduced into Britain about 1770, is now common, especially in eastern England, preferring uncultivated moorland Partridge shooting in Great Britain and Ireland is legal from Sept. 1 to Feb 1 See GAME

Partridge Sir Bernard English artist Born in London, Oct 11 1861, son of Professor Richard Partridge, F.R.S., President of Royal College of Surgeons, he was educated at Stonyhurst College and worked from 1880-84 in stained glass designing and decorative painting, subsequently in book and press illustration He joined the staff of *Punch* in 1891, later becoming its chief cartoonist, and was knighted in 1925

Pascal Blaise French philosopher, mathematician and scientist Born June 19, 1623, at Clermont-Ferrand in Auvergne, he was the son of a president of the Court of Aids who settled later first in Paris and subsequently in Rouen At the latter centre Blaise came into close touch with the Jansenists, with whose doctrines he became identified To this period belong various scientific studies and researches, including the Puy de Dome experiments on atmospheric pressure and the invention of an ingenious calculating machine In 1647 Pascal returned to Paris, and in 1654 underwent a second conversion His famous *Provincial Letters*, an ironical exposition of Jesuit moral theology (1656-57), created a profound sensation and are still regarded as models of style Of his *Pensées*, first published posthumously in 1669, numerous editions—French and English—have appeared He died Aug 19, 1662

Pasha Turkish and Egyptian title. Originally it was bestowed only on military commanders who were graded according to the one, two or three horse tails which they were empowered to display when on a campaign as symbols of authority Later the title was granted also to civilian high officials, Christian as well as Moslem, in Turkish or Egyptian service

Passchendaele Low ridge in Belgium, about 7½ m

N E of Ypres, the scene of heavy fighting in the Great War. In June 1917, the Second British Army under Sir Herbert Plumer advanced and stormed the Messines Wytschaete Ridges, but it was not until Nov 6 that the Passchendaele Ridge was carried, and the Third Battle of Ypres concluded. In the great German offensive of March April, 1918, Passchendaele was necessarily abandoned, but was recaptured in the general advance of the Allies shortly before the conclusion of the Armistice.

Passfield Baron Sidney James Webb was born July 13, 1869. At one time he was a clerk in the lower division of the War Office. A noted economist, he became, in 1912, professor at the London School of Economics. In 1922 he entered Parliament. He has been a member of several royal commissions and numerous departmental committees. In the Socialist Ministry of 1924 he was President of the Board of Trade, and in 1929 he became Secretary of State for the Colonies. He is the author of many works on economic and social subjects.

Lady Passfield, better known as Beatrice Webb, is the daughter of Richard Potter, at one time Chairman of the G W Rly. She is keenly interested in social and industrial questions, and was a member of the Royal Commission on Poor Law and Unemployment, 1905-09. She is the author of *The Co-operative Movement in Great Britain* and, with her husband, whom she married in 1892, of *The History of Trade Unionism* and other works. She published an autobiography in 1926. In 1933 appeared a biography, *Sidney and Beatrice Webb*, by Mrs Mary Agnes Hamilton.

Passion The Term denoting the sufferings of Jesus Christ from the agony in the Garden to the death on the Cross. The recital of these sufferings in the early church at Passiontide was accompanied by the chanting of the narrative portions by selected male voices, and the choral representation of the crowds. Under Reformation influence musicians wrote definite compositions, exemplified pre-eminently in J S Bach's *Passion of St. Matthew*. Representations in art are also called *Passions*, e.g., Albert Dürer's

Passion Flower Large genus of climbing herbs and shrubs (*Passiflora*) natives of tropical S America. The common bine passion flower, *P. caerulea*, is hardy in Britain. See *Corona*.

Passionist Roman Catholic priestly order, entitled the Congregation of Discalced Clerks of the Most Holy Cross and Passion of our Lord Jesus Christ. Founded by S Paul of the Cross, 1720, it received papal sanction, 1737, and reached Britain 1841, the headquarters since 1876 being at Highgate.

Passion Play Religious drama presenting scenes of Christ's passion. A form of mystery or miracle play characteristic of Mediaeval Europe, it has survived at Oberammergau (q.v.). In 1930 the play was presented 33 times, May Sept. by about 600 of the villagers as a religious act.

Passive Resistance Term used to describe deliberate refusal on conscientious grounds to comply with laws, regulations or orders, coupled with willingness to undergo the prescribed penalties. Anyone submitting to imprisonment in consequence of non payment of what he or she considers to be unjust rates or other dues is a passive resister.

Passover Jewish festival. It was traditionally instituted by Moses to commemorate the passing over of the Hebrew thresholds, on which the blood of the sacrificial lamb had been sprinkled, when Egypt's firstborn were smitten at the time of the Exodus. With it was associated a seven-day festival of unleavened bread. The twofold feast was observed down to the destruction of Jerusalem, A.D. 70. That of unleavened bread alone is still observed by Jews, that of the Pontateuhal Passover by the Samaritans.

Passport A permission to travel necessary in the case of most foreign countries, and, when granted, ensuring some measure of protection. Passports are granted by the Foreign Office to natural born British subjects, and to persons naturalised in the U.K., in the British Dominions and Colonies and in India. Applications must be accompanied by two copies of the applicant's photograph and a signed declaration in accordance with the Regulations. British passports are only available for travel to the countries named therein, but may be endorsed for additional countries. They must be renewed after two years from date of issue.

Pasteur Louis French chemist. Born at Dôle, Dec 27, 1822, he studied at Besançon and Paris, where in 1867, after holding academic posts at Strasburg and Lille he became Professor of Chemistry at the Sorbonne. He was elected member of the French Academy in 1882. His researches in fermentations proved of great value in the manufacture of vinegar and the prevention of wine diseases. Thanks to his experiments prophylactic treatment of diphtheria, tubercular disease, cholera, yellow fever and plague, as well as hydrophobia, has become possible. He died Sept. 28, 1895.

In 1888 the Pasteur Institute was founded by public subscription as a research laboratory.

PASTEURISATION Method of preserving milk and rendering harmless any disease germs it may contain, particularly tubercle bacilli. The milk is kept for half an hour at a heat of 145-150° F., and then cooled. In some countries pasteurisation is enforced by law before milk can be sold.

Pastorale (1) A kind of operetta on rustic themes originating with the Renaissance stagings of Virgil's *Eclogues* and culminating in the spectacular ballets of the French Court in the 17th century, of which Lully's *Acis and Galathea* is an example. (2) An idyllic composition conventionally in compound time with simple melody and sometimes a drone bass.

Patagonia Region of S America. Discovered by Magellan in 1520, it comprises the southern extremity of S America and has been divided politically since 1881 between Chile and the Argentine. The Andes forming the boundary. The aboriginals, who were of unusually large stature, are now nearly extinct. Coal is found in the Argentine section, and in the Chilean large tracts are devoted to sheep farming. East of the Andes Patagonia is largely an elevated plateau. Western Patagonia is damp and forested.

Pateley Bridge Market town of Yorkshire, W R., 28 m north west of York and 213 from London by the L N E Rly. Situated on the Nidd it is a centre for livestock farming and has stone quarries and lead mines. Pop (1931) 5555.

Patent Grant from the Crown by Letters Patent to an inventor of the sole right of making, using or selling his invention during a specified period. It is essential to the validity of the patent that the subject-matter of it should be an invention, that the invention should be new, and that it should be useful, i.e. fulfil the purpose for which it was designed by the patentee. In applying for a patent it is usual to submit a Provisional as well as a Complete Specification, and the former, if filed separately and accepted, gives protection for nine months. The Complete Specification is the final basis of the patent and, if unopposed and the regulated fees are paid, the grant of the patent remains in force for a period not exceeding sixteen years. Infringement is actionable. Most foreign countries have their own patent laws and the cost of a worldwide patent may run into hundreds of pounds.

Patent Office Department of the British government. It deals with all applications for Letters Patent in Great Britain and is situated in Southampton Buildings, Chancery Lane, London, W.C.2. At its head is a Comptroller-General. The Patent Office publishes specifications of accepted inventions. It has an excellent reference library.

Pater Walter Horatio English critic and man of letters. Born in London, Aug. 4, 1839, he was educated at King's School, Canterbury, and Queen's College, Oxford. His works, which are famed for their style, include *Studies in the History of the Renaissance* (1873), *Marius, the Epicurean* (1885), *Imaginary Portraits* (1887), *Appreciations* (1889) of Lamb, Wordsworth, Coleridge and others, and *Miscellaneous Studies*, posthumously published in 1895. He died at Oxford, July 30, 1894, leaving unfinished a medieval romance, *Gaston de la Tour*, which was subsequently published in 1897.

Paternoster Row London thoroughfare. It was famous in Queen Elizabeth's time for its taverns. Pepys, in 1660-66, paid several visits to the mercery shops which then flourished here. At No. 38 *Robinson Crusoe* was published in 1720. Nos. 48-49 occupy the site of the "Old Chapter" Tavern, frequented by Goldsmith. This became the Chapter Coffee House at which Charlotte and Anne Brontë lodged on their first visit to London in 1848.

Pathan Name applied throughout India to the Iranian peoples of the N.W. Frontier Province and to related trans-frontier tribes in E. Afghanistan. Of Moslem faith, their language is Pashto.

Pathology Study of disease. It seeks to determine the causation of diseases, their anatomical and physiological features, and the structural changes and morbid processes which they present. Besides human and animal diseases, bodily and mental, plant-diseases are also the concern of pathology. Experimental pathology studies morbid processes induced artificially in other organisms.

Patina Greenish, varnish-like film which forms on ancient bronze and copper through exposure to atmospheric conditions. It can also be produced by the action of certain chemical substances.

Patio Architectural term derived from the Spanish and applied to the open courtyard or enclosure connected with many houses in Spain and Spanish-American countries.

Patmore Coventry Kersey Dighton. English poet and critic. Born at Woodford in Essex, July 23, 1823, he was a librarian at the British Museum from 1847 to 1868. His first volume of poems was published in 1844, his second in 1853. His best-known work, *The Angel in the House*, dealing with domestic love, appeared in 1854. Collected editions of his poems were issued in 1878 and 1886. He died Nov. 26, 1896.

Patmos Aegean island. Small and mountainous, one of the Sporades, in the Grecian Archipelago off the W. coast of Asia Minor, it formerly belonged to Turkey, but is now part of Greece. Here S. John is supposed to have lived in exile about A.D. 90, and to have seen the vision described in the Book of Revelation. There is a monastery dedicated to S. John the Divine in the island. Pop. 2550.

Paton Sir Joseph Noel British painter. Born at Dunfermline, Dec. 13, 1821, he studied at the Royal Academy, London. Subsequently he became a member of the Royal Scottish Academy, and was Queen's Limner for Scotland from 1865. He was knighted in 1867. He excelled in the treatment of allegorical, religious and legendary subjects, among his most notable pictures being "The Pursuit of Pleasure," "Christ and Mary at the Sepulchre" and "Mors Janua Vitae." He was a competent sculptor, and published two volumes of poems. He died Dec. 26, 1901.

Patriarch Head of a family or tribe. The name denotes specifically various O.T. figures, either fathers of the human race, e.g., Noah, or progenitors of the Hebrew people, e.g., Abraham, Isaac and Jacob, their forefathers and Jacob's twelve sons. Applied to the head of the Jewish Sanhedrin, it denoted in early Christianity outstanding metropolitan bishops, being limited in the 7th century to the bishops of Alexandria, Antioch, Constantinople, Jerusalem and Rome. The pope is styled patriarch of the West. See **EASTERN CHURCH**.

Patricia District of Ontario, Canada. Its area is 146,400 sq. m. Formerly part of the N.W. Territories, it was added to Ontario in 1912, and named after Princess Patricia, daughter of H.R.H. The Duke of Connaught who was Governor General of Canada at the time.

Patrick Saint. Patron saint of Ireland. Born about 387, probably near Durnharton, Scotland, he was captured by Irish raiders when 16 years old, escaped to the continent and studied at Tours. Pope Celestine I consecrated him bishop, entrusting him with Ireland's conversion. Landing in Wicklow, he established missionary settlements in Armagh and elsewhere. He died at Saul, near Downpatrick, according to some legends as late as 493 but more probably in 461. He left a Confession, an epistle to Coroticus and a hymn. He is commemorated on March 17.

Patron (and Patronage) Term originally applied to a Roman patrician to whom plebeians, under the name of clients, attached themselves for protection. Now largely used in connection with Church benefices, patrons of which have the right of nominating, subject to episcopal confirmation, incumbents when the living falls vacant. The patronage of many benefices is in the hands of bishops, colleges and other institutions.

Patteson John Coleridge English bishop. Born April 1, 1827,

after a brilliant Oxford career, he took Orders and joined Bishop Solwyn in missionary work. Consecrated Bishop of Molanesia in 1861, he served 10 years in that capacity, and was attacked and murdered by natives, Sept 20, 1871.

Patti Adelina Famous singer Born in Madrid, Feb 19, 1843, she made her operatic debut in 1859 in "Luola di Lammermoor." She first appeared in London in 1861. She was received everywhere throughout her career with extraordinary enthusiasm. She made her last appearance at the Albert Hall in 1906. She married three times, and died Sept 27, 1910.

Pau City of S W France. It is a noted winter health resort. Henry VI is said to have been born in one of the rooms of the castle (1553). Pop (1931) 38,962.

Paul Saint and Apostle Born at Tarsus in Asia Minor, he was trained as a Rabbi under Gamaliel at Jerusalem. As a young Pharisee he took an active part in the persecution of Christ's followers, but on his way to Damascus for the purpose of making further arrests he saw Christ in a vision and was converted. After three years' preparation he revisited Jerusalem, and then embarked on his first mission tour in Cyprus, Pisidia, Pamphilia and Lycaonia. On his return he engaged in a controversy with S. Peter concerning the admission to the Christian Church of Gentiles, whom he championed, and to whom his subsequent missionary efforts were devoted. His second and third missions took him through Galatia and Phrygia to Macedonia and Achaia. Tried at Caesarea for causing disturbances he was sentenced to imprisonment and, appealing to Caesar, was sent to Rome where, after two years' captivity, tradition says, he was executed under Nero in A.D. 64.

It is impossible to overestimate the importance of S. Paul in Christian history. More than any other he was responsible for the spread of Christianity throughout the Roman Empire while his theological and moral principles have exerted a profound influence on later thought and on the civilised world.

Paul, Epistles of *See* ROMANS, CORINTHIANS, GALATIANS, EPHESIANS, PHILIPPIANS, COLOSSIANS, THESSALONIANS, TIMOTHY, TITUS, PHILEMON, HEBREWS, EPISTLE TO

Paul I Tsar of Russia Born Oct 1, 1754, he was the second son of Peter III and the Empress Catherine II at whose death in 1796 he succeeded to the throne. He rapidly became unpopular by reason of his violent temper and disposition. Having first declared in favour of the Allies against France, he quarrelled with England and then joined Bonaparte. His nobles conspired to compel him to abdicate, and in a scuffle with them he was strangled and killed, March 11, 1801.

Paul-Boncour Joseph French politician He was born at S Aignan, Aug 4, 1873. As an independent socialist he was elected to the Chamber and became labour minister (1911) in the Cabinet. After the war, in which he served he took an important part in the work of the League of Nations, as a French representative. In 1932 he became minister for war in the Cabinet headed by Edouard Herriot (qv).

Pauperism In England a pauper is a person who receives poor law relief for himself, or his dependents, and before he can do so, must prove himself

destitute and incapable of providing the physical necessities. The relief is either "indoor," which means maintenance at a workhouse, infirmary, asylum or school, or "outdoor," when allowances are made in money kind or medical attendance. In 1934 1,516,933 persons obtained poor law relief in England as against 1,488,173 in 1933.

Pavia Town of Lombardy, Italy. Situated on the river Po, 2 m. above its junction with the river Po, it is on the main line from Milan to Genoa. Here in 1525 Francis I of France was defeated and captured by Lannoy, Viceroy of Naples. The battle was one of the first to show the superiority of firearms over pike and lance. Formerly a fortress it was captured and sacked by Napoleon in 1796. Volta made his first electrical experiments here. There are numerous iron foundries, military engineering and electrical production works. Pop (1931) 50,325.

Pavlova Anna, Russian dancer Born at St. Petersburg, Jan 31, 1885, she entered the Imperial Ballet School at the age of 10. Attached to, and later *prima ballerina* of, the Marianski Theatre, St. Petersburg, she subsequently appeared at the Imperial Opera House and first visited London with Michael Mordkin in 1910. In 1923-24-25 she appeared with her own company at the Covent Garden Opera House, always meeting with enthusiastic reception. She died Jan 22, 1931.

Pawnbroker Pawnbroking, or the lending of money on articles pawned or pledged is of great antiquity, pawnshops existing in China at least two or three thousand years ago. Greeks and Romans were familiar with pawnbroking, but among the Jews it was expressly prohibited under the Mosaic Law. The Jews, however, in mediaeval times were almost the only pawnbrokers in England till they were succeeded by the Lombards, who introduced the now familiar trade sign of the three golden balls. The pawnbroker's licence dates from 1785, and there has since been considerable legislation in England on the subject of pawnbroking. The latest enactment was the Pawnbrokers Act of 1922 which included numerous regulations respecting interest, the sale of unredeemed pledges and so forth.

Paxton Sir Joseph British architect. Born Aug 3, 1801, his principal claim to fame is his design for the Crystal Palace in 1851. He began his career as head gardener to the Duke of Devonshire at Chatsworth, where he exercised his ingenuity in designing glass houses. He was knighted in 1851, was elected Member for Coventry in 1854 and died June 8, 1865.

Paysandú City of Uruguay. Situated on the E bank of the Uruguay, 170 m. N. of Buenos Aires, it is the capital of the Paysandú department, occupying 5115 sq. m., and raising cattle and sheep. Their products, livestock, wool, hides, refrigerated, salted and canned meats and tongues, constitute the town's prosperity. Metal ores are mined. Pop (1932) 26,000. Dept 74,257.

Pea Annual climbing leguminous herb (*Pisum sativum*). Introduced into Tudor England, field peas preceded the garden forms, which have arisen from cross fertilisation and selection. The sweet-pea (*Lathyrus*) is closely allied.

Peabody George American merchant and philanthropist. Born at S Danvers Mass. Feb 18 1795, he came to

London in 1837, where he spent his large fortune in philanthropic schemes. The Peabody Trust was established in 1862. It was designed to provide houses for the working classes of London. He died in London, Nov. 4, 1869, and was buried in America.

Peace River of Canada. It rises in the Rocky Mts., in British Columbia, and flows into Alberta. It is about 400 m long and falls into the Great Slave Lake. Its tributaries include the Smoky and the Finlay. The Valley of the Peace contains a very rich coal field, and plans have been formulated for developing the district.

Peach Fruit-tree of the rose order, (*Prunus persica*). Cultivated in ancient Persia and China, perhaps derived from the almond, it was introduced into Tudor England. The roundish fleshy drupes, 2-3 in across, covered with down, ripen in Britain in favourable situations, being usually grafted on plum or almond stock and fan-trained to walls with S W aspect. Large market supplies are grown in France, Delaware and California, which has developed a large canning and drying industry.

Peacock Male bird of a genus of game-fowl (*Pavo*), indigenous to India and S E Asia. In the breeding season, its upper tail-coverts develop spray-like webs interspersed with glittering "eyes," the whole train being displayed vertically in a semi-circle. The more plainly feathered peahen lacks the train. The Common *P. cristatus* of India and Ceylon, was domesticated in antiquity, albino examples furnish white peafowl. The Burmese *P. muticus*, extending to Malaya and Java, is more brilliant still.

Peak District of Derbyshire, extending from Chesterfield to Buxton, and from Ashbourne to Glossop. It forms the S. end of the Pennine Hills. Kinder Scout is the highest point, it is 2088 ft. At Castleton is found the famous Blue John (purple fluor spar). Chatsworth (q v) is situated in this district.

Pear Fruit-tree of the rose order (*Pyrus communis*), native from E Europe to W Asia and the Himalayas. The wild pear of British thickets is doubtfully indigenous. There are innumerable varieties, usually grafted on free or pear stock, or, for the dwarf and pyramidal trees of gardens, on quince stock. Fermented pear juice furnishes the alcoholic beverage called perry. Pearwood, hard and even-grained, serves for drawing-squares and curves, and when oilised for camera-shutters.

Pearl Calcareous secretion formed in many bivalve molluscs but chiefly in the so-called pearl oysters (*Meleagrina*), and the freshwater mussels of the genus *Unio*. A pearl consists of extremely thin concentric layers of calcium carbonate deposited around some foreign object or parasite, and the iridescent colours are due to interference of light caused by the thinness of the layers. Pearls vary in colour from white to pink or black, their value depending upon their size and purity of colour. The principal fisheries are in the Persian Gulf, the Gulf of Mannar in Ceylon, the South Pacific and the Gulf of Mexico.

Peary Robert Edwin. American explorer. Born May 6, 1856, he joined the American Navy, and after working on the survey for the Nicaragua Ship Canal, was enabled to carry out the Arctic exploration. In 1891-92 he led a sledging expedition towards the North Pole, a journey of 1300 m, and,

after other expeditions, succeeded in discovering the North Pole, 1909. He died Feb 19, 1920.

Pease Quaker family founded by Joseph Pease, a woollen manufacturer at Darlington, somewhere about 1760. His son, Edward (1767-1858), extended his activities to the coal and iron industries, and also to banking. Joseph and Henry, Edward's sons, were both Members of Parliament, as were members of the next two generations. Sir Joseph Whitwell Pease (1828-1903) became a baronet in 1882. His son Alfred Edward was well-known as a sportsman, while Joseph Alhott was a politician and was created Lord Gainsford in 1916. Herbert Pike Pease was also a politician, and in 1923 became Baron Darlington.

Peat Partially decomposed vegetable matter found on or near the surface in many of the cooler parts of the world in swampy places. Its carbon content is sufficiently high to enable it to be used for fuel.

Peccary Genus of hoofed mammals constituting the indigenous swine of America (*Dicotyles*). They are tailless, have the upper tusks directed downwards and lack the outer toe on the hind feet. Fierce and gregarious, the collared peccary, 3 ft long, ranges from Arkansas to Patagonia, the somewhat larger white-lipped variety from British Honduras to Paraguay.

Peckham London district in the metropolitan borough of Camberwell, S E. Peckham Rye Park was opened in 1894 and has more than 42 acres.

Pectin Series of vegetable mucilages obtained from various seeds, fruits and roots. In the beetroot, carrot and the pulp of ripe fruits such as the apple and pear, a soluble colloidal material, pectose, occurs, and by the action of a ferment is converted into pectum, which forms the basis of fruit jellies and jams.

Pediculosis (or Phthiriasis). Skin affection occasioned by lice on the body. These are wingless, suctorial parasitic insects related to bugs and bird-lice. Both the head louse and the crab-louse, which infests the pubic hair and sometimes armpits and eyebrows, are removable by paraffin preparations. The clothes louse or body-louse requires bathing in baking soda, applying sulphur ointment, and baking the clothing in a disinfecting oven. Apart from their irritation, lice are noxious because they may spread typhus and some relaxing fevers.

Pediment Architectural term for the low sloping gable, usually triangular in shape, on the front of classic buildings and revived as an ornamental structure in Renaissance architecture usually over porticoes and windows, supported by carved brackets. Sometimes the pediment is bowed, or when the central part is omitted it is termed a broken pediment.

Pedometer Instrument resembling in form a watch, used for registering the number of steps taken by a person in walking, thus determining the distance covered. A weight which swings with the movement of the body causes the mechanism to revolve and this movement is recorded on a dial, adjustments being made for the length of the step.

Peebles Burgh and county town of Peeblesshire. Situated on the Tweed it has cloth manufactures. It is served by the L.N.E. and L.V.S. Rlys. Pop 5537.

Peeblesshire County of Scotland, otherwise known as Tweeddale It has an area of 347 sq m It is watered by the River Tweed and its affluents, and is mainly a pastoral, sheep rearing county Its county town is Peebles It is served by the L.N.E. and L.M.S. Ryhs Pop 15,300

Peel Small fortified tower, usually square and of massive construction, it was common in the border counties of England and Wales in the 15th and 16th centuries They were used as refuges from bands of raiders Several examples are still standing in Cumberland and adjacent counties

Peel Watering place and fishing town on this W coast of the Isle of Man It has historical associations and interesting ruins of the 12th century Pop 2455

Peel Viscount English title, created in 1895 and bestowed upon Arthur Wellesley Peel, youngest son of Sir Robert Peel Born Aug 3, 1829, he was educated at Eton and Balliol College Oxford had a distinguished parliamentary career and held various offices, being chosen Speaker in 1885 He was created a viscount when he retired in 1895, and died Oct 24 1912 He was an ardent temperance reformer

William Robert Wellesley Peel, the 2nd viscount was born Jan 7, 1867, the eldest son of the 1st viscount, and was educated at Harrow and Balliol College, Oxford He was called to the bar in 1893, and sat in Parliament, first for a division of Manchester (1900-06), and then for Taunton (1909) until he entered the House of Lords at his father's death in 1912 He held various offices In 1923 he was Secretary of State for India, and in 1931 became Lord Privy Seal in the National Government, an office which he held for a short period only He was made an earl in 1929

Peel Sir Robert British statesman Born near Bury, Lancs., Feb 6, 1788, he was educated at Harrow and Christ Church Oxford, and entered Parliament at the age of 21, holding office as Secretary for Ireland when he was 24 In 1822 he became Home Secretary, and in this capacity formed the new police force, known to this day as Peelers He was three times Prime Minister, in 1834 1839 and 1841, on this last occasion holding the office for five years Peel now restored the disorderly national finances passed the Bank Charter Act which still regulates the country's currency, and repealed the penal laws against Catholics Finally, in 1846, he repealed the Corn Laws in face of tremendous opposition but was defeated on the Irish Coercion Bill, resigned and went into opposition He died July 2, 1850

Peel John Cumberland yeoman Born Nov 13 1776 he is chiefly known as the hero of the song "Dye Ken John Peel?" which was written by J. W. Graves about 1829 He was born and lived at Coldbeck, where he died Nov 13 1854

Peele George English dramatist. Born about 1558 and educated at Christ's Hospital and Christ Church, Oxford he wrote historical plays and masques which had considerable influence on Shakespeare and Milton These include *Edward I* *The Arraignment of Paris* and *David and Fair Bethsabe* He died about 1598

Peerage Name used for the peers as a body and also for all members of their families. Only countries with a

hereditary ruler possess a peerage English peers and representative peers from Scotland and Ireland sit in the House of Lords

There are five ranks in the British peerage, duke, marquess earl, viscount and baron The lay lords, although they sit in the House of Lords are not peers The position of the bishops is more ambiguous It is held that they are peers, because they sit in the House of Lords by right of succession Peers have the right to be tried when necessary by their peers A peerage is created by letters patent, and this states how the title shall descend It may, therefore, be limited to sons, or may pass to a daughter or a nephew A woman can be a peeress, but cannot sit in the House of Lords

Pegasus In Greek mythology the winged steed of Bellerophon who slew the Chimæra with his aid He came into being from the blood of the gorgon, Medusa, when Persens cut off her head The Pegasus Club is an association of members of the Bar who are interested in hunting and racing It holds an annual point-to-point meeting The name is taken from the oriet of the Inner Temple which is a winged horse

Pekinese Dog Breed of lap dog Of Chinese origin, it differs from English toy spaniels in having a flat skull and tail curled over the loins Preferably weighing 5 to 6 lb It is heavy in front, with short broad muzzle, falling away lion like behind Long haired, with thick undercoat, it is light red or yellow, mottled with white

Peking Former capital of China, now known as Peking, a very ancient and populous city lying about 100 m from the Gulf of Chihli Kublai Khan established it as capital of the Chinese Empire in 1264 and it consists of the Chinese city and the Tartar city, the latter being surrounded by walls built in 1421, while those of the Chinese city were built in 1544 Inside the Tartar city is the Imperial city, while inside that again is the Forbidden city Here are many ancient and wonderful buildings, including the Temple of Confucius and the Temple of Heaven. The population is about 1,300,000

Pelargonium Genus of herbs of the geranium order Often half shrubby, they are distinguished from geraniums by having stalked umbels of flowers with irregular corollas and upper sepals spurred. See GERANIUM

Pelee Mont. Volcano, 4400 ft in height, on the island of Martinique in the French West Indies The lower slopes of the mountain consisted of dense wooded country, but in 1902 two eruptions occurred and totally destroyed the neighbouring town of St Pierre and adjacent villages

Pelham Henry British statesman Born 1696 the younger brother of Thomas Holles Pelham, afterwards Duke of Newcastle, he was educated at Westminster and Oxford, entered Parliament in 1717 as member for Seaford, and held various offices, becoming Prime Minister in 1743 an office which he held for 11 years He died March 6, 1754

Pelias Character in Greek mythology Having usurped the throne of Jason's father he despatched Jason to find the Golden Fleece, hoping that he would not return

Pelican Genus of waterfowl (*Pelecanus*), allied to cormorants, widely distributed in tropical and sub tropical regions.

Their long furrowed beaks have extensible pouches attached to the lower mandible for collecting fish food. They have rough, harsh plumage and short, rounded tails. The common pelican (*P. onocrotalus*) 5 ft. long, inhabits S.E. Europe, S.W. Asia and N.E. Africa.

Peloponnese Southern portion of ancient Greece, now known as Morea. It was connected with Greece proper by the Isthmus of Corinth. The word means the "Island of Pelops." Various races inhabited it, beginning with the Pelasgians, and followed by the Achaeans, Ionians and others. Later it was under the supremacy of Sparta until the Thebans conquered the Spartans at the Battle of Leuctra in 371 B.C.

Peloponnesian War War between Athens and Sparta, from 431-404 B.C. In the first period, which was concluded by the Peace of Nicias (421 B.C.), both sides had their successes. In the second, Sicily was the centre of hostilities. In the third, Sparta had the advantage. Athens was captured by Lysander in 405, the city's walls were destroyed and her power broken, leaving Sparta temporarily supreme.

Pelops In Greek mythology, grandson of Zeus and son of Tantalus, King of Phrygia. He married Hippodamia, daughter of Oenomaus, King of Elis, and succeeded him as king. Legends concerning him deal with his being killed by his father, cut to pieces and belied as a repast for the gods. Hermes eventually put the pieces together again, and restored him to life.

Pelorus Jack Name given to a famous grampus in the Pelorus Sound, which for many years accompanied vessels for a given distance between Wellington and Nelson, New Zealand. It was protected by a special resolution of the legislative council.

Pelvis Name given to the bony framework or hip girdle forming a basin-like cavity protecting certain abdominal viscera and giving attachment to the lower limbs. It consists of two innominate bones, each composed of three elements: ilium, ischium and pubis, which are separate bones in early life but soon become fused into one bone. The pelvic bones are united behind to the sacrum of the backbone and in front to one another by the pubic symphysis.

Pembrey See BURY PORT.

Pembroke Municipal borough and county town of Pembrokeshire. A walled town with a medieval castle, and the nearest harbour to Ireland. It was at one time an important fortified post, and was taken by Cromwell in the Civil War. The modern town grew up around the naval dockyard, which, however, was closed in 1925. Pop (1931) 12,008.

Pembroke Manufacturing town of Ontario, Canada, situated on the Allumette Lake. It has varied industries, including mills, brickyards, lumbering and tanning. Pop (1931) 9,302.

Pembroke Earl of British title held in turn by the families of Clare, de Valence and Herbert, as well as by certain members of the royal house at different periods. It was created in 1138 and bestowed upon Gilbert de Clare, who was followed by his son Richard (Strongbow). He was succeeded by William Marshall, his son-in-law, but in 1245 the title became extinct. William de

Valence then secured it by marriage, and it was held by his family until 1321. In 1551 Sir William Herbert was made Earl of Pembroke, and the present Earl, Reginald Herbert, is his descendant. The family seat is Wilton House, near Salisbury.

Pembroke Dock Dockyard on Milford Haven in Pembrokeshire, Wales, formerly known as Paterchurch. It was inaugurated as a government dockyard in 1811, being transferred from Milford, and forms part of the borough of Pembroke, two miles away. The dock was closed in 1925.

Pembrokeshire County of Wales, the most westerly in the principality. It has an area of 614 sq. in. Pembroke is the county town, and its chief ports are Fishguard and Newport. Haverfordwest and Tenby are municipal boroughs. The county contains part of the South Wales coalfield. Pop (1931) 87,179.

Pembrokeshire is very rich in early remains, both megalithic and Romano-British. Its contacts with Ireland and Brittany made it a centre of Celtic Christianity, and many Celtic crosses remain. Its importance in mediaeval times is attested by the many castles. Long a county palatine, it lost this distinction with the passing of the Act of Union in 1536.

Pemmican Dried buffalo meat or lean venison pounded and mixed into flat cakes with boiling fat. Originally a North American Indian food, it is now manufactured from beef for use in Arctic explorations, being of value owing to its capacity for remaining good for an indefinite period if kept dry.

Penal Servitude Form of punishment which superseded that of transportation in English law by the Penal Servitude Act of 1853. Such imprisonment may be for a maximum of three years or for life, but some degree of remission may be earned by the good conduct of the prisoner, who is then granted a ticket of leave. Prisoners undergoing penal servitude wear the distinctive broad arrow dress and have to do some form of useful work.

Penance Variant form of the word "penitence" denoting specifically the outward acts manifesting repentance, either voluntary or performed under ecclesiastical discipline. Protestants hold that Divine forgiveness follows true sorrow for sin irrespective of imposed acts. The Roman Catholic Church, ranking penance as one of the seven sacraments, regards it as comprehending contrition, confession to an approved priest, satisfaction by accomplishing penitential works and absolution.

Penang British Crown Colony, one of the Straits Settlements, consisting of Penang Island and Province Wellesley on the main land. George Town, an important port, is on Penang Island, which is 111 sq. m. in area, while Province Wellesley is 232. It is traversed by a railway running from Siam to Singapore. Pop (1932) 367,177.

Penarth Seaport of Glamorganshire. An urban district and watering place, it stands 4 m. from Cardiff, on the G.W.R. It owes its prosperity to its docks. Pop 17,097.

Pendlebury Name given to a district of Lancashire, lying 3½ m. N.W. of Manchester, and served by the L.M.S. Ry. Pop 10,130.

Pendleside Series

Geological formation soon typically at Pendlo Hill, Lancs., between Stoke on Trent and Settle. It consists of shales and black limestones, 1000 1500 ft thick, and lies between the upper Carboniferous Limestones and the Millstone Grits.

Pendulum Term applied to a weight or rigid body so suspended as to swing freely on a horizontal axis, the oscillations being due to the influence of gravity. The pendulum has many applications, Galileo applied it to measure the human pulse. In certain types of stationary engines it forms part of the counter balance mechanism. In clocks it is a device for regulating the working of the parts and Foucault used it to demonstrate the rotation of the earth.

Penelope In Greek legend, the wife of Ulysses or Odysseus. During the protracted absence of her husband she was besieged by suitors, but she told them that before she could accept any of them she must finish the robe she was making for her father in law. She worked at this all day and at night and did all she had done.

Penge Urban district of Kent, and a suburb of London, lying 6 m. to the south by the S. Rly. Part of the Crystal Palace park is in the district. Pop 26 430.

Penguin Family of flightless sea birds inhabiting S. temperate and antarctic regions. The backward position of the short legs, the webbed feet, stiff tails and erect station on land give them an ungainly appearance. The wings are transformed into paddles covered with sooty feathers. From Antarctica they extend north to the Cape, Australia, New Zealand, Falklands and other islands, forming in places immense breeding "rookeries." The largest are the king and emperor penguins, *Apelodites* rock hoppers, *Endymis*, are crested. See JACKASS.

Penicuik Police burgh of Midlothian, Scotland. It lies 10 m. from Edinburgh, by the L. N. E. Rly. Pop (1931) 2673.

Peninsula Term used in geography for a piece of land nearly surrounded by water. For example, Spain and Portugal form the Iberian Peninsula, which is bounded by the Bay of Biscay on the north, the Atlantic on the west, the Mediterranean on the south and south-east, but is joined to France on the north-east.

Peninsular War (1808-1814) Fought against France in the Iberian Peninsula by Great Britain, Spain and Portugal. The immediate cause was the revolt of the Spanish people against Napoleon's brother, Joseph, whom he had made King of Spain. The Allied forces were under the command of Sir Arthur Wellesley, afterwards Duke of Wellington, and outstanding victories were won at Vimeiro, Albuera (1811), and Salamanca (1812). There were further victories at Vittoria and Orthez. Napoleon's abdication in 1814 concluded the war.

Penistone Market town of Yorkshire (W.R.), 12 m. from Sheffield. Its industries include brewing, steel works and saw mills, and the neighbourhood is rich in coal and stone. It is served by the L. N. E. and L. M. S. Rlys. Pop 3791.

Penkridge Town of Staffordshire. An agricultural centre, it is 10 m. N. of Wolverhampton and 134 m. from London by the L. M. S. Rly. Pop (1931) 2570.

Penmaenmawr

Watering place and urban district of Caernarvonshire. It lies 4 m. from Conway amid beautiful scenery and is served by the L. M. S. Rly. Pop 4000.

Penn Sir William British admiral. Born in 1021, he fought on the Parliamentary side in the Civil War, but in 1660 accompanied Montagu to bring Charles II. back, and was knighted aboard the *Naseby*. He died on Sept. 10, 1670.

His son, William, was a prominent Quaker, the founder of Pennsylvania. Born Oct. 14, 1644, he was expelled from England in 1661 because of his faith travelled abroad, and later suffered imprisonment on the same account. He founded Pennsylvania in 1671, where he spent some years between 1684 and 1701. He died at Ruscombe on May 30, 1718.

Pennant

Long, narrow flag usually pointed at the end. It is carried by lancer regiments on their lances, and is flown in the Navy at the mast head of a vessel in commission. The paying off pennant, or pondant, is a very long streamer with a bladder at the end, and is flown by a ship when she returns to port to pay off. Originally the pennant was the knight bachelor's flag which he bore at the end of his lance.

Pennine Chain

Mountainous region forming a high plateau cut by deep river valleys, extending from the Scottish border in the north to the Vale of Trent in the south and including the Peak tableland of Derbyshire. The chief heights are Cross Fell, 2892 ft., Mickle Fell, 2591 ft., Wharfedale, 2414 ft., Ingleborough, 2373 ft., Pen-y-ghent, 2270 ft. and Kinder scot in the Peak district, 2088 ft.

Pennsylvania

State of the U.S.A. It lies between New York State on the N., New Jersey on the E., Maryland and West Virginia on the S. and Ohio on the W., and touches Lake Erie in the N.W. Its area of 45 126 sq. m. is traversed by the Appalachian Mountains. The chief rivers are the Delaware, Susquehanna and Allegheny. Harrisburg is the capital. Other large cities are Philadelphia and Pittsburgh.

Pennsylvania is ruled by a governor elected for four years, a senate of 50 members, and a house of 203 representatives. The state is enormously rich in minerals, particularly coal and iron, limestone and glass sand. Its most important manufactures are iron and steel, silk, machinery, electrical goods, books etc., and knitted goods. Pop (1930) 9,631,350.

Pennsylvania was first settled by Swedes and Dutch, but owes its true foundation and first constitution to William Penn (q.v.). The state played an important part in the War of Independence, and it was at Philadelphia that the Declaration of Independence was adopted. The state entered the federation in 1787, but the present constitution dates from 1873.

Penny

Bronze coin of the value of one twelfth of a shilling introduced in 1860 to supersede the copper coins in use since 1872. Previous to this latter date silver pennies were coined but they gradually decreased in weight and the only silver coins of this value now made are issued as Maundy money. The early silver pennies were marked with a cross like indentation to allow of separation in halfpennies and farthings. The standard weight of a bronze penny is 145 83333 grains troy.

Pennyroyal Perennial labiate herb, (*Mentha pulegium*), native of Europe and W Asia. Abundant in England and parts of Ireland, sometimes grown in Scottish gardens, its much-branched prostrate leafy stem, up to 12 ins long, with small ovate-oblong toothed leaves, bears dense whorls of small, hairy, tubular, lilac flowers. It was formerly much used medicinally.

Pennywort (*Cotyledon umbilicus*) Species of the order, *Crasulacea*, known also as navelwort. A flowering wild plant that flourishes on dry walls and in rocky crevices. It has succulent leaves depressed in the centre and greenish yellow flowers borne on erect spikes.

Penology Branch of criminology, dealing with the study of punishment. Punishment for offences against the community goes back as far as history, and was largely based on the idea of retribution, if not of vengeance. Modern development, of quite recent growth, endeavours to select punishment which permits reclamation while protecting society.

Penrhyn Slate quarrying district of Caernarvonshire, situated near the entrance of the Menai Strait. This facilitates the shipping of the slate from Port Penrhyn.

The title of Baron Penrhyn was created in 1763 and is now borne by the family of Douglas Pennant, the original creation, which was held by Richard Penrhyn, having become extinct with his death in 1808. The family seat is Penrhyn Castle.

Penrith Ancient market town of Cumberland, near Carlisle, on the L N E Ry. It has an agricultural trade as well as brewing and tanning industries. Pop 9065.

Penryn Market town of Cornwall, situated on the Penryn River and served by the G W Ry. A prosperous seaport of the Middle Ages, its chief industries to day are tanning, brewing and granite polishing and exporting. Paper and chemicals are also manufactured. Pop 3151.

Penshurst Village of Kent, chiefly distinguished for Penshurst Place and its park of 350 acres. Here, Sir Philip Sidney was born and the mansion is still owned by his descendant, Lord de L'Isle and Dudley. Pop 1570.

Pension Retiring allowance or a grant made to an aged or needy person. A pension may be non-contributory, as those granted to members of the fighting services and to civil servants after a certain term of service, or contributory, as when it is given as a superannuation provision by a trade union. Many large employers of labour have a pension fund to which they contribute a portion, the remainder being provided by the workers' contributions.

The State schemes include the old age pension (7s) introduced in 1908, and the pensions granted under National Health Insurance Acts (1925-9). The latter scheme provides a pension of 10s per week each for the insured worker and his wife at the age of 65. The workers make weekly payments in contribution by means of stamps affixed to a card. The Health Insurance scheme also provides a pension of 10s for the widow of the worker, receiving 5s for the first and 3s for other children. Orphaned children of an insured worker receive 7s 6d. each. The same

acts provide for a blind person receiving a pension of 10s per week at the age of 50.

What are termed civil list pensions are granted by the crown to necessitous persons who have attained distinction in art, literature or science, or to their dependents.

Pensions Ministry of British Government department, formed in 1916 for the administration of pensions to members of the war services and their dependents. The headquarters are at 18 Great Smith Street, Westminster.

Pensnett Coal-mining town of Staffordshire. Other industries are the manufacture of iron and glass.

Pentateuch Greek name meaning "five volume book," used since the 2nd century A.D. for the first five Old Testament books, Genesis, Exodus, Leviticus, Numbers, Deuteronomy. They constituted the Hebrew *Torah* or Book of the Law, and were inscribed on a single roll. The Samaritan Pentateuch, in the Samaritan script, derived from the roll taken to Samaria in Ezra's day, exists in various ancient copies, which furnish valuable textual confirmation of this portion of the LXX Greek version of the Hebrew Bible. See HEXATEUCH.

Pentecost Greek word meaning "fiftieth," used in the Greek New Testament to denote the Jewish harvest festival or feast of weeks, held on the 50th day after Passover, and preceding the Jewish New Year by 113 days. It acquired a supreme significance to the Christian Church because on that day, called in English, Whitsunday, the Holy Spirit descended on the apostles (Acts II). The Roman Catholic Church preserves the name, all the following Sundays until Advent being called "after Pentecost."

Pentland Firth Strait off Scotland between Caithness and the Orkneys connecting the North Sea with the Atlantic Ocean. It is navigable but dangerous, owing to tidal currents and whirlpools. At the Eastern entrance are the Pentland Skerries with two lighthouses. The channel is 14 m long.

Pentland Hills Range of hills in Scotland. They are in the counties of Edinburgh, Peebles and Lanark and extend for some 16 m. The highest point is Carnethy (1980 ft.).

Pentonville District of London. To the north of the city, it is in the borough of Islington. Therein is Pentonville Prison. The district owes its name to the fact that in the 18th century the land belonged to Henry Penton, M.P.

Pentstemon Large genus of perennial half-hardy herbs of the figwort order, natives of N temperate and subtropical America, especially California. Showy garden varieties have been developed.

Penumbra Term in optics for the partial shadow surrounding the umbra or total shadow formed on a screen when an opaque body is placed so as to intercept the light from a luminous object. An example is the region of partial shadow seen round the darker disc in an eclipse.

Penzance Seaport and watering place of Cornwall situated at the head of Mount's Bay, 8 m from Land's End. It has a good harbour and docks, is a fishing centre, especially for pilchards, and exports tin, copper and china clay. Pop 12 100.

Pepper Perennial climbing shrub (*Piper nigrum*) typical of the popper order indigenous to the Malabar coast of India. Widely cultivated in Malaya, especially Penang, as well as the Philippines, W Indies and other tropical lands, it produces a black or white spice derived from the dried fruits, respectively ground with and without the husks. See CATENIF PEPPER.

Peppermint European perennial late herb (*Mentha piperita*) Growing wild in Britain, with creeping rootstock, opposite coarsely toothed leaves and loosely spiked flowers, it is cultivated in black and white varieties in England, continental Europe and the U S A for its pungent essential oil, which contains menthol. This comes still more freely from allied Japanese and Chinese forms.

Pepper Tree Tropical American tree of the cashew order (*Schinus molle*). It is grown in warm countries for shade and ornament, the aromatic berries furnishing a vinous beverage and pepper substitute in S Europe, and an astringent for the gums in Peru, called Peruvian mastic. Riviera visitors sometimes misname 'popper tree' the Indian bead tree (*Melia azedarach*).

Pepsin Proteolytic ferment or enzyme occurring in the gastric juice secreted by the gastric glands in the wall of the stomach. In the presence of hydrochloric acid pepsin converts food proteins into soluble peptones which are assimilated readily by the stomach. For medical purposes pepsin is used in a dried form or in various solutions.

Pepys Samuel English civil servant and diarist. He was the fifth son of a tailor, and was born on Feb 23, 1633, in London, where most of his life was spent. Educated at St Paul's School and Magdalene College and Trinity Hall Cambridge, he secured a post in the Navy Office while he held several important public appointments in the course of his life and sat in Parliament for Castle Rising. He died on May 26, 1703. His diary, written in cipher, runs from Jan, 1659, to May, 1690, and is a masterly picture of the times in which he lived, as well as being a unique revelation of character. It was first deciphered in 1819/22 by John Smith, and published in 1825. Since then innumerable editions have been issued.

Perak One of the Federated Malay States with an area of 7 800 sq m. It has tin mines and rubber plantations while rice and fruit are also grown here. It is ruled by its own sultan, but is under British protection. Pop (1931) 765,989.

Perch Genus of spiny finned freshwater fishes (*Perca*). The common perch (*P. fluviatilis*), seldom exceeding 3 lbs, inhabits rivers and lakes in Britain and elsewhere. It is bronze green with golden reflections, having five or seven dark cross bands and red fins.

Percy English family which has held various peerages since the day of the first William de Percy, one of the Conqueror's barons. The 12th Baron Percy became Earl of Northumberland in 1377, and the Dukes of Northumberland after many lapses and recreations of the title, are still Percies, though Sir Hugh Smithson, created duke in 1766, assumed the name by deed poll. The famous Hotspur, who was killed at Shrewsbury in 1403, was Sir Henry Percy, son of the first Earl of Northumberland.

Pere-Lachaise Parisian cemetery, named after Father François de La Chaise (qv), superior of the Jesuits in Paris, to whom the land originally belonged. It covers about 212 acres. Many famous people are buried here, including Abbéard and Héloïse and other more recent celebrities, literary, artistic and military. A Mohammedan cemetery with its mosque lies alongside. It became a municipal cemetery in 1804.

Perennial Plant that lives more than two years. All trees and shrubs being perennial the term denotes more particularly herbs which are not annual or biennial. They may have perennial tap roots, hardy bulbs or fibrous roots arising anew annually or periodically. Tropical perennials often become annuals when transplanted to colder climates.

Perfume Substance which has a pleasant sweet-smelling odour, as in the case of certain gums, essential oils of plants, some animal products and synthetic compounds. For incense odoriferous gums such as frankincense or olibanum, and gum benzoïn, are used along with sandalwood. Musk, civet and ambergris are animal perfumes, and the essential oils are represented by otto of roses, the oils of lavender, rosemary, patchouli, etc. Many synthetic perfumes are used as substitutes for the natural ones.

Pergola Term derived from the Italian word for an arbour and applied to a long series of light arches erected over a garden path, and constructed of trellis, iron with brick or stone foundations, or of undressed oak and fir wood. A pergola is used for climbing plants such as roses, jasmine, etc.

Peri Beings of a nature partaking of demon and fairy existing in Persian myth. Although not malevolent they are not deemed fit for the Persian Paradise.

Pericarditis Inflammation of the pericardium (qv). It may be dry or accompanied by liquid effusions with the formation of adhesions. Rarely independent it is most commonly associated with acute rheumatism, but also attends Bright's disease, scarlatina and other fevers. There are pains over the heart, rapid and feeble pulse action and difficult breathing.

Pericardium Conical membranous sac containing the heart and the origins of the great vessels. A dense unyielding fibrous layer is lined with a serous layer whose inner surface secretes a thin lubricating fluid which facilitates the heart's natural movements. The apex lies behind the breastbone, the base being in relation to the diaphragm.

Pericles Athenian statesman, son of Xanthippus and Agariste. Born about 499 B.C., he began to take part in public affairs in 469 B.C. and distinguished himself as a general as well as a statesman notably in his recovery of the rebellious island of Euboea in 446 B.C. He also subdued Samos in 440 B.C. Under his administration Athens was developed and embellished and he was the patron of the sculptor Phidias. His policy during the Peloponnesian Wars was one of concentration in Athens, leaving the rest of Attica to its fate. In 430 B.C. he lost both his sons during the terrible outbreak of plague. He died in 429 B.C.

Peridot Name given to the transparent olive green and hottle-green

varieties of the mineral olivine, a silicate of iron and magnesium, used as gemstones

Perigee Term in astronomy for the point in the lunar orbit where the moon is nearest to the earth, the opposite position being termed apogee ($q\tau$)

Perihelion Astronomical term for the position in the orbit of the earth, a planet, or comet, at which that body is at its nearest distance to the sun

Perim British island in the Straits of Bab-el-Mandeb at the southern end of the Red Sea. It is a coaling and cable station, but is otherwise of small importance

Periodic Law Chemical classification of the elements. The task first engaged the attention of chemists late in the 18th century. In the 19th, an arrangement in order of atomic weights was suggested, which Mendeleeff elaborated, observing that certain properties became periodic, notably the valency. It is now incorporated in the modern concept of atomic structure

Periscope Optical instrument used in trench warfare and in submarines for enabling an observer to see surrounding objects from a lower level. In its simple forms it consists of two mirrors set at an angle on a frame, or of reflecting prisms and mirrors fixed in a vertical tube, the upper mirrors or prisms reflecting an image to the lower set, and thence to the eye. The submarine periscope has in addition lenses and eyepieces to magnify

Peritoneum Membrane lining the walls of the abdominal and pelvic cavities and investing their contained viscera. The two layers, parietal and visceral, comprise a thin elastic serous sac, entirely closed except in the female, whose Fallopian tubes communicate with it. Numerous folds hold the parts in position, the frontal apron called the great omentum is liable to increased deposition of fat in the corpulent. The mesenteries connect the intestines with the backbone, and ligaments support some organs

Peritonitis Inflammation of the peritoneum ($q\tau$). Often called loosely inflammation of the bowels, by confusion with enteritis ($q\tau$). In acute forms this disease is usually indicated by severe abdominal pains, and may be caused by micro-organisms entering through wounds from outside or internal perforations due to strangulated hernia, obstruction of the bowels, appendicitis, burst abscesses and the like. The chronic form is either tubercular in origin and secondary to consumption, or local and non-tubercular. Should perforated bowel be suspected, operation is essential.

Periwinkle Cosmopolitan genus of marine snails (*Littorina*). Shore dwellers, in some tropical regions they ascend mangrove trees and are found far inland. Of several British species the commonest, *L. littorea*, with stout stony shell and strong horny operculum, is a favourite food, especially in inland towns, being also used as cod-bait off Newfoundland

Periwinkle Genus of perennial evergreen herbs or trailing undershrubs of the dogbane order (*Pinca*), natives of temperate Europe, Asia and N. Africa. Long naturalised in Britain, the greater, *P. major*, and lesser *P. minor*, with bluish-purple, salver-shaped corollas, are cultivated in gardens there being double-flowered

white varieties and others with gold or silver variegated foliage

Perjury Making a false statement on oath, a misdemeanour punishable by fine, imprisonment, or penal servitude. The oath must be a lawful one, and the statement must be material to the issue. To suborn perjury, i.e., promise another to swear falsely, is a misdemeanour with like penalties

Perkin Sir William Henry English chemist and founder of the aniline dye industry. He was born in London, March 12, 1838, and educated at the City of London School, choosing chemistry as his career. The famous Perkin's purple dye was discovered while he was trying to prepare quinine synthetically, and other commercially important discoveries followed. He was knighted in 1873 and died July 14, 1907

Permanganates Name applied to the salts derived from permanganic acid, the most important being permanganate of potash which, in aqueous solution, is a deep purple liquid readily decomposed with evolution of oxygen when in contact with organic matter. Hence its use as a disinfectant and chemical oxidising agent. Condy's fluid is a solution of crude sodium permanganate

Permian Series of rocks formerly known as Now Red Sandstone, but named by Murchison after Perm in Russia where the beds are well developed. The Permian System consists of beds of red sandstone, marls, breccias and magnesian limestone, overlying the Carboniferous rocks. In north east England the magnesian limestone, which supplied good building stone and lime, is associated with marl slates, gypsum and rock-salt. In the Midlands breccias occur, and in S. Devon red sandstone and coarse breccias

Permutation Term in mathematics for the linear arrangement of numbers or letters in every possible order, thus a and b may be arranged as ab and ba , giving two permutations, or a, b, c as $abc, acb, bac, bca, cab, cba$, giving six permutations. Algebraic formulae are used for calculating permutations of any given quantity

Pernambuco Province of Brazil. On the eastern coast, it covers 49,560 sq. m., pop. 2,369,814, and produces sugar, cotton, etc. The capital, which has the same name, is also known as Recife. It is an important port with exports of cotton, sugar, etc. The harbour is a good one, the town being built on a reef, an island and the mainland. Pop. 340,543

Perpendicular Name given to a period of Gothic architecture in England from about 1350 to 1547. The Perpendicular style was characterised by the persistent expression of verticality throughout a building even in the window tracery and the extensive use of paneling having numerous vertical lines, over walls, buttresses, parapets, etc. Other distinctive features were the fan tracery vaulting, flatter arches, flying buttresses and open timber roofs.

Perpetual Motion Idea long prevalent that some machine could be constructed which, when once in motion, would continue to do useful work without any outside supply of energy. The idea is impracticable, as inertia and friction can only be overcome by the expenditure of energy which cannot be "created."

Persephone (or Proserpina) In Greek legend, daughter of Zeus and the earth-goddess Demeter. Carried off while flower-gathering by Pluto, ruler of the underworld, she became its queen. In her absence Demeter forbade the earth to yield increase and Zeus had to send Hermes to fetch her back. Her rape and return symbolise the sowing and growth of corn.

Perseus In Greek myth, the hero son of Danaë by Zeus. He was sent by Polydectes, King of Seriphos to win the head of Medusa, the Gorgon. He succeeded, aided by Athena and on his return journey saved Andromeda from the sea monster and married her. Later he became King of Argos and is the legendary founder of Mycenae.

In astronomy Perseus is a constellation traversed by the Milky Way, extending from Cassiopeia to Taurus.

Pershing John Joseph. American soldier. Born, Sept 13, 1860, he served as a lieutenant against the Indians, and in 1898 fought in the Spanish American War. In 1902 he commanded an expedition against the Moros of Mindanao and held various administrative appointments. When the U.S.A. declared war on Germany in 1917 he became commander-in-chief and was on the Western front with the American Expeditionary Force until the Armistice. He was chief of staff from 1921-24. In 1931 he published *My Experiences in the World War*.

Pershore Town of Worcestershire. It stands on the Avon, 113 m from London and 8 from Worcester on the G.W. Rly. The town is the centre of a district wherein fruit and vegetables are grown and jam making is an industry. Pop 3400.

Persia (Iran). Country of Asia, lying between Turkey and the Persian Gulf on the West and South Turkistan and Afghanistan on the East, Transcaucasia and the Caspian Sea on the North. It has an area of 628,000 sq m, consisting of tableland with a mean altitude of 3000-5000 ft. There is only one navigable river, the Karun. The climate is mostly dry and very hot. Dates are cultivated and cereals grown while opium and tobacco form profitable crops. Oil, of which Persia has great resources, is the principal export, followed by carpets, for which the country is famous, opium, fruit and raw cotton are also exported. Teheran is the modern capital. Isfahan the ancient one. Abadan is the chief oil producing centre, and Bushire the chief port. The population is 10,000,000, of which a third are nomads.

Persia is a constitutional monarchy under a monarch known as the Shah. It has a long and interesting history, beginning with the Sumerians, continuing through the Medes to Alexander the Great and the Achaemenids and Turkish conquests, and the present day. Great archaeological finds have been made on the sites of Persepolis and Susa. The religion to day is divided between Mohammedans, Sunnites, Jews and Armenians and Nestorian Christians. There is a rich and ancient literature, and its art is among the most remarkable of the pre-Christian world.

Persian Gulf Arm of the Indian Ocean lying between Persia and Arabia. It is 550 m long and 75,000 sq m in area. It contains the Bahrain Islands, and its principal harbours are Bushire and Bandar Abbas. The Shatt-el Arab flows into it.

Persimmon (or Date-plum). Deciduous tree of the ebony family (*Diospyros virginiana*). It produces a sweet, orange yellow, 1 in. diam. Its dark close-grained timber serves for weaving shuttles, golf club heads, etc. The larger Japanese persimmon (*D. kaiku*), of which 800 varieties are cultivated in E. Asia, U.S.A., and elsewhere, is of apple size.

Personation English legal term meaning a pretence of being another person—what in ordinary speech would be called "impersonation." The False Personation Act of 1874 makes personation a felony if it be designed to extract money or property. Among the most famous of personation cases is the Tichborne case of 1871.

Perspective Term used in art for the method of delineation of objects upon a plane surface as they appear to the eye. Perspective is divided into linear and aerial, the former being concerned with the form and arrangement of objects as they appear to be modified by distance, and the latter with the impression of atmosphere and space in regard to colour and distinctness. Aerial perspective was first clearly interpreted by Claude Lorraine in the 17th century.

Perspiration Term applied to a process by which water is excreted from the skin by means of the sweat glands, simple tubular structures occurring in large numbers all over the body. The lower portion of a sweat gland is coiled into a knot and lies in the deeper layer of the true skin while the upper part forms a duct leading to the surface. Perspiration aids in regulating the temperature of the body and is increased by dry heat and exercise—also by certain emotions.

PERSPIRING FEET—This condition is due to a disturbance of the nerves supplying the sweat glands, and medical advice should be sought as there is usually some fault in diet or constitution.

Treatment—Plunge the feet alternately into quite hot and very cold water night and morning. Repeat this six or seven times, the last immersion being in cold water, after which the feet should be dried thoroughly with a rough towel and dusted with a powder consisting of equal parts of powdered starch, boracic acid, and salicylic acid. Use this powder to dust the insides of the socks, which should be of silk or wool and never of cotton, and make sure that the shoes do not cramp the feet.

Perth County town of Perthshire, situated on the Tay, and known as the "Fair City," owing to its beautiful position. It is served by the L.M.S. Rly., and has large industries of which dyeing is the chief. Others are glass and linen making, while brewing, ironfounding and the manufacture of floor cloth are important. Pop 34,807.

Perth has interesting historical associations. It was the capital of Scotland until the 16th century. It has been the scene of many sieges and battles. Here is a magnificent bridge across the Tay.

The Earl of Perth is a title borne by the family of Drummond since 1605 and has a strong Jacobite tradition. A dukedom was bestowed on the earl by James II., but this, which had no real validity, was abandoned in 1853, by George Drummond who remained Earl of Perth and Melfort.

Perth Capital of Western Australia, at the mouth of the Swan River and

founded in 1829. In 1856 it was made a municipality, but its prosperity and growth date from the discovery of gold in the neighbourhood in 1891. Fremantle (q v) is the port. Pop (1931) 209,729.

Perthshire Midland county of Scotland lying to the North of Stirling, with an area of 2528 sq m. Of the Grampians many heights rise to 3000 ft and more. It is watered by the Tay, and has many lochs, including Tay, Katrine and Achray. Other famous spots are the Carse of Gowrie and the pass of Killiecrankie, where Viscount Dundee at the head of the Jacobite forces defeated the royal force under General MacKay in 1689. The county town is Perth (q v). Bialgowrie, Dunblane Auchtermadar, Pitlochry and Aberfeldy are other towns.

The county is mainly agricultural and is served by the LMS and LNE Rlys. Pop (1931) 120,772.

Peru Republic of South America lying between Ecuador and Colombia on the North, the South Pacific on the West, Brazil on the East, and Bolivia and Chile on the south. It has an area of 482,133 sq m, and a population est. at 6,147,000 (1927), half of which consists of aboriginals. Lima is the capital and Callao is the principal port. The country is mountainous, and is rich in minerals, of which the most important is copper, but petroleum and silver are also found. There is coal, but it has not yet been utilised. Vegetation is luxuriant and profitable, and includes sugar, coffee and cotton.

Peru is a centre of ancient civilisations. The Inca civilisation which Pizarro found when he conquered Peru in the mid-sixteenth century was virtually destroyed by the advancing Spaniards.

The Government is a republic under a president who holds office for four years, with a cabinet, senate and representative house.

Perugia City of Italy. The capital of the province of Perugia, it is of ancient Etruscan origin and played a considerable part in history. In mediaeval times it was long independent supporting the Guelphs, but fell before the Farnese family in 1534. Occupied by the French in 1797, in 1849 it was seized by Austria, finally being united to Piedmont in 1860.

Among its many notable buildings are a Gothic cathedral, the Palazzo Comunale (begun 1297), containing an important art collection, and other famous buildings and churches, decorated by Perugino, Raphael and others. Its famous university dates from 1307.

The modern city manufactures liquors and silk, and is a centre of the wine and oil trade. Pop (1931) 79,270.

Perugino Italian painter whose real name was Pietro Vannucci. He was born at Città della Pieve about 1446, and worked in Florence, where he had received his training in the school of Verrocchio, and in Perugia. In 1480 Pope Sixtus IV commissioned him to work on the decoration of the Sistine Chapel. Later, when he was once more in Florence, Raphael was among his pupils. He painted mostly religious subjects. He died 1524.

Peruvian Bark Name formerly applied to the bark of various species of *cinchona*, natives of the valley forests of Peru, Bolivia and Ecuador from which quinine and allied alkaloids are extracted. Widely grown in Java, Sikkim,

Ceylon, Jamaica and elsewhere, yellow or calisaya bark yields the most quinine, red bark the most cinchonidine.

Peseta Monetary unit of Spain. A silver coin whose standard value is 9½d. There is a gold piece of 25 pesetas.

Peshawar District and town of the North-West Frontier Province, India, belonging to Great Britain. The district is watered by the Kahul River. It has an area of 2611 sq m and a population of 865,000. The town is important because of its strategic position at the entrance of the Khyber Pass. It is a great trade centre and has a pop. of 121,866 (1931). It passed into British hands in 1848. In 1930 there was fighting between the Afghans and British.

Peso Monetary unit. Derived from the old Spanish dollar, it is now a monetary unit comprising 100 centavos represented by actual silver coinages, and theoretically gold ones, in Mexico, Argentina, Chile, Colombia, Guatemala, Panama, Cuba, Paraguay and Uruguay. In some Central and S. American countries national synonyms, e.g. quetzal in Guatemala, occur.

Pestalozzi Johann Heinrich Swiss reformer and educationist. He was born at Zürich, Jan. 12, 1746, and interested himself in education. By 1780 he had established a school for waifs and strays at Nuhof, and from 1798-99 he organised a school for orphans at Stanz. His educational system was based on the importance of observation with its consequent perception. His writings include *The Evening Hours of a Hermit*, and *How Gertrude Teaches her Children*. He died Feb. 17, 1827.

Pétain Henri Philippe French soldier. Born April 24, 1856, he passed out of St. Cyr in 1878, and in 1902 was instructor of the military school at Châlons. When the Great War broke out he commanded the 4th brigade. He did notable service during the war, including the command of the defences of Verdun in 1916. In 1918 he was made commander-in-chief of the French armies under Foch as *generalissimo*, and in Nov. one week after the Armistice, he became a Marshal of France. In 1925 he supervised reinforcements sent against rebels in Morocco.

Petal Botanical name for the floral leaves forming the corolla or inner whorl of a flower. In most plants the petals are coloured and form a single whorl as in the foxglove, but sometimes there is a double whorl as in the poppy. Petals are free or united, and as their chief function is to attract insects for purposes of pollination there are many other variations in colour, form and insertion upon the floral axis.

Petard Device formerly used in warfare for destroying a gate or palisade of a fortress. A petard consisted of an iron case shaped like a half cone and containing a heavy charge of gunpowder, which was fired by means of a fuse. The petard was fastened to a plank having hooks for attaching it to the gate or palisade.

Peter One of the twelve apostles. Named Simon, son of Jonas, and originally a Galilean fisherman, he was one of Christ's earliest disciples, forming with James and John His innermost circle. His confession concerning the Messiahship of Jesus, the bestowal of his second name Cephass or Peter, and the risen Lord's commission to "feed My sheep," prepared him for a dominant

place in the infant church. He was traditionally martyred under Nero in Rome, being commemorated on June 29.

Peter Epistles of Two New Testament books. The first exhorts the scattered Christian community in Asia Minor to live worthily in a hostile world. Its traditional ascription to the apostle is generally upheld. The second differing in style and language, presents problems which occasioned controversy even in the 3rd century. It may have been the work of a writer utilising the apostle's name, and was the last of the catholic epistles to receive canonical rank.

Peter King of Serbia. Born at Belgrade. July 11, 1844 he was a member of the great Karageorgevitch family. He was elected king after the assassination of Alexander in 1903. He fought with the Serbian army during the Great War, but when his country was reconquered and became Yugoslavia, he retired to Belgrade. He died Aug 18, 1921.

Peter I Tsar of Russia, known as The Great. Born May 30, 1872, he became tsar in 1882 together with his brother Feodor. He was a keen soldier and devoted himself to the reorganisation of his army and navy, having for a time studied shipbuilding at Deptford. In 1896 he went to war with Turkey, and three years later with Sweden, when he was beaten at Narva by Charles XII. He married Catherine, the wife of a Swedish soldier, who eventually succeeded him as Catherine I. In 1703 he founded St. Petersburg. He died Jan 28, 1725.

Peter II, grandson of Peter the Great by his only son Alexis, was born Oct. 11, 1715, and came to the throne in 1727, but, after a reign of little importance, died Jan. 29, 1730.

Peter III, was another grandson of Peter the Great by his daughter Anne. Born Feb. 23, 1728, he succeeded to the throne in 1762, but was deposed by his wife, Catherine II, and was strangled, July 18, 1762.

Peterborough City of Northamptonshire. Situated on the River Nene, it is an important railway junction served by the L.M.S. and L.N.E. Ry. It is the chief town of the Soke of Peterborough, a separate administrative county with a population of 51,845. The city has several industries of which the chief is the manufacture of agricultural implements and railway stock. The present cathedral stands on the site of a Saxon one and is largely Norman. Pop 43,558.

Peterborough Manufacturing town of Ontario, Canada, 72 m. from Toronto, on the River Otonabee. Its principal industries are lumbering and flour mills. Pop (1931) 22,327.

Peterhead Fishing port of East Aberdeenshire, situated on Peterhead Bay. Besides the herring fishery, here is a granite polishing industry and some lesser manufactures. The harbour has graving docks. Pop 13,700.

Peterloo Massacre of Popular name—suggested by Waterloo—given to the events which occurred at St. Peter's Fields, Manchester, in August, 1819, when a huge reform meeting, while it was being addressed by "Orator," Hunt was dispersed by a body of Yeomanry and Hussars, with casualties amounting to 11 killed and over 500 wounded.

Petersfield Market town of Hampshire, on the S. Ry., 20 m.

N.N.E. of Portsmouth and 54 from London. Pop 4000.

Peter the Hermit Medieval preacher associated with the first crusade. He was a priest at Amiens when Pope Urban II declared a crusade at Clermont, thereafter becoming famous for his inspiring advocacy of its claims. His legendary share in originating the crusade is unhistorical. He died c. 1115 and was buried at his abbey, now ruined, near Huy, Belgium.

Petiole Botanical name for the stalk of a foliage leaf, a petiole is typically cylindrical but usually has a slightly flattened upper surface with the basal portion often grooved to carry off water. It is present in most dicotyledons but not usually in monocotyledons. Its function is to expose the leaf to suitable illumination.

Petition In law it is a formal application made in writing to the sovereign, to Parliament, or to a court of law. It is loosely applied to any formal written request, such as that made to the home secretary by the friends or relatives of a person condemned to death, asking for a reprieve.

The Petition of Right was drawn up by Parliament in 1628 and presented to Charles I. It embodied constitutional demands which were agreed to by the king under pressure and became a statute called "The Bill of Rights." A subject who wishes to proceed against the crown to day must do so by means of a 'petition of right'.

Petra Ancient stronghold of Edom, situated on the Wadi Musa brook in a valley between the Dead Sea and the Gulf of Akaba. Excavations have revealed some wonderful buildings, notably the Temple of El Dohr, a Greek structure hewn out of the red rock. Some of the older work shows Egyptian influence, but the finest is Graeco-Roman. Petra was used in the Great War as a base for Colonel Lawrence's attack against the 4th Turkish army.

Petrarch Italian poet, more properly, Francesco Petrarca. He was born in Arezzo, July 20, 1304, the son of an exiled Florentine notary, and was educated at Avignon and afterwards at Montpellier and Bologna. Here he became an enthusiastic classical scholar especially of Cicero and Virgil. After he returned to Avignon, in 1327, he met Laura who was to become his inspiration. Her identity is unknown, but she may have been Laure de Noves.

Petrarch wrote both in prose and verse, but he will be remembered principally by his lyrics and by the sonnets to the form of which he gave his name. He died July 18, 1374.

Petrel World wide sub family of oceanic birds of powerful flight. The name denotes the habit some have of apparently walking on the water like S. Peter. The fulmar (*Fulmarus glacialis*), 19 ins long, breeds in Shetland and the outer Hebrides, the sooty storm petrel or Mother Carey's chicken (*Procellaria pelagica*), 6 ins long, breeds in the Scillies and Lundy. Visitors to the Cape and Australia encounter respectively the Cape pigeon or pintado petrel and the great petrel, 32 ins, seldom N. of the equator.

Petrie Sir William Matthew Flinders English Egyptologist. He was born at Charlton, Kent, June 3, 1853. Since 1880 Egyptian archaeology has been his special province. In the Fayum (1888-9) he unearthed important papyri, and investigated the ancient

Lachish in 1890 His subsequent researches have for the most part been carried on in the great tombs of Egypt From 1892 to 1933 he filled the Chair of Egyptology in University College, London He has written extensively on the results of his discoveries

Petroleum Mineral oil consisting of hydro-carbons and varying in colour from dark green, brown to black Petroleum is derived from the decomposition of organic matter in rocks, usually porous sandstones or limestones From the crude oil by fractional distillation are obtained petrol or motor spirit, paraffin oil and wax, fuel oils and asphalt. *See* Oil.

Petrology Specialised branch of geology dealing with the composition, structure and classification of rocks, their origin and sequence of formation In this study the geological relations of the rocks, their constituent minerals and the method of aggregation of these have to be considered Microscopic examination entails the cutting of thin rock sections and a special technique dealing with the optical characters of minerals as determinative and discriminative characters particularly in igneous rocks

Petty Officer Rank in the British Navy, corresponding to that of non-commissioned officer in the Army They are usually men of education and intelligence chosen from among the leading seamen and examined in elementary seamanship

Petty Sessions In England the sitting of a court of law It consists of two or more justices of the peace or of a stipendiary magistrate Such a court can deal summarily only with certain minor offences, and its powers of punishment are restricted

Petunia Genus of perennial ornamental herbs of the deadly nightshade family, chiefly S American Averaging 12-18 in high, sometimes with viscid leaves, the funnel-shaped or salver-shaped solitary flowers are white, red, blue and violet.

Petworth Village of Sussex It is 55 m from London and 24 m from Chichester, on the S Ry Petworth House, the seat of Lord Leonfield, occupies the site of a castle

Pevensey Watling place of Sussex It is on Pevensey Bay, 6 m from Eastbourne, on the S Ry Pevensey occupies the site of Anderida, the Roman fortress, whose outer walls remain, and here William the Conqueror landed in 1066 Pevensey was then a seaport and as such it flourished until the receding sea made the harbour useless The keep and four round towers of the castle are well-known Pop 750

Pewsey Town of Wiltshire, on the Avon, 7 m from Marlborough and 76 m from London by the G.W Ry It is the centre of the rich agricultural district known as the Vale of Pewsey Pop 1700

Pewter Alloy of lead and tin used for making flagons, jugs, plates, etc The common metal consists of 80 per cent tin and 20 per cent lead, but the finest pewter is mostly tin with only a little lead and copper Other metals, antimony or zinc, may be added for special purposes The Pewterers' Company is one of the oldest City of London Livery Companies, dating from 1474, and has its hall in Lime Street, E C

Phaedra In Greek legend, daughter of Minos, King of Crete and Pasiphae Wedding Theseus, King of Athens, she fell in love with her stepson, Hippolytus When her advances were rejected she hanged herself, leaving a letter containing a false accusation The story is the subject of tragedies by Sophocles, Euripides and Racine

Phaethon In Greek mythology, son of the sun-god Helios and the nymph Clymene Attempting to drive his father's chariot his strength failed, he approached the earth so closely as to scorch it, and Zeus struck him with a thunderbolt into the River Eridanus or Po

Phagocyte Biological term. It refers to white corpuscles (leucocytes) of the blood which can consume bacteria or other cells and envelop particles, which invade the body The phagocytes can leave the blood vessels, and they take part in natural recovery in inflammation and in healing damaged tissue

Pharaoh Kingly title in ancient Egypt. The Egyptian word, "great house," denoting in the pyramid age the royal estates, was used symbolically from the Middle Kingdom onwards, just as the Sublime Porte formerly designated the Turkish sultan The first pharaoh named in the Old Testament is Shishak, those preceding him in Hebrew history still lack precise identification

Pharisee Religious party among the Jews originating in the Maccabean age. A branch of the Chasidim, their teaching upheld the precise observance of the Mosaic law, both canonical and traditional, they believed in the resurrection of the body and the existence of angels and spirits, thus rejecting the positions held by the Sadducees

Pharmacopoeia Standard and authoritative work on the composition, preparation and dosage of drugs and pharmaceutical compounds issued in various countries The British Pharmacopoeia is issued from time to time by the General Medical Council

Pharmacy Art of preparing drugs and compounding medicines In its cruder form it was practised in early times by the priests, and in the Middle Ages in Europe by the monks In its modern form it requires a knowledge of *materia medica* and chemistry, as well as the system of dosage

The Pharmaceutical Society, established in 1841, is the examining body for those qualifying for registration as pharmaceutical chemists under the Pharmacy Acts

Pharos Small island off the coast of Egypt Here stood the great lighthouse, or Pharos, built by Ptolemy I, about 260 B.C., which was one of the Seven Wonders of the World Alexander the Great built a great mole to unite the island to his new city of Alexandria on the coast opposite

Pharynx Cavity at the back of the mouth and extending from the posterior nares to the epiglottis and larynx, where it joins the oesophagus Into the upper portion of the pharynx open the eustachian tubes on either side The pharynx is liable to inflammation giving rise to acute or chronic pharyngitis, the former being due to a common cold or to scarlet fever, etc Chronic pharyngitis or relaxed throat occurs from over strain of the voice or excessive smoking

Pheasant Genus of game-birds of Asiatic origin (*Phasianus*) They have short slightly-curved bills, short wings

and long tails Introduced into Roman Britain, the common *P. colchicus*, is now mostly reared by hand the shooting season lasts from Oct 1 to Feb 1 Several other species occur in English coverts, e.g., Reeve's from N China, with 5 ft black and white tail, Chinese ring-necked and Japanese green pheasants

Pheasant's Eye Genus of annual or perennial herbs of the hutorcup family (*Adonis*), natives of temperate Europe and Asia Having much divided leaves the annual form, growing wild in Britain, with dark-centred crimson petals, is a garden favourite Perennial forms with bright yellow flowers from SW Europe are also cultivated

Pheidias Greatest of the ancient Greek sculptors He was born c 400 B.C. Under Pericles he superintended all the works of art designed to beautify Athens The frieze in the Temple of Athena, called the Parthenon, much of which still survives in the British Museum, was designed by him and executed by his pupils under his immediate supervision, while he himself sculptured the statue of Athena His statue of Zeus at Olympia was one of the wonders of the ancient world He died in prison, a victim of the jealousy of his enemies, in 432

Phenacetin Carholio derivative of coal tar used in medicine Comparing colourless, tasteless and odourless crystals, slightly soluble in water, it is employed in 5 gr or 10 gr doses, either in cachets or powdered in water, for relieving pain and reducing feverish temperatures.

Philadelphia One of the principal cities of Pennsylvania, U.S.A., and an important port, situated on the Delaware River It is a great industrial and educational centre and has a university Its area is nearly 130 sq m Founded and named by William Penn in 1682 it has always been in the forefront of American intellectual and political life Its industries include shipping in all its branches, locomotives, and all industries connected with educational work It has medical and legal schools, and a vigorous artistic life nourished on its famous art galleries It has two broadcasting stations (49.6 M, 0.6 kW and 313 M, 0.6 kW) Pop 1,950,961

The ancient city of Philadelphia, one of the seven churches of Asia, was in Lydia, and on its site now stands Ala-Shehr, a walled city, 80 m. from Smyrna

Philately Science of stamp-collecting It originated in France in 1862, and in England dates from the Royal Philatelic Society's first meeting, April 10, 1889 World famous stamp collections are those of the late King George V and the late Philippe von Ferrari part of the latter realised £402,966 at auction in 1922-1925

Philemon Greek dramatist born about 360 B.C. and dying in 263 B.C. He wrote nearly a hundred plays and founded the New Greek Comedy

Philemon Infinitesimal Christian citizen of Colossae in S. Paul's day The apostle's New Testament letter to him is a charming personal note, appealing to his kindness to condone the offence of his runaway slave, Onesimus, who was now returning to his duty and, like his master, was one of the apostle's spiritual children

Philip Christian saint He was one of the seven entrusted by the early

Christian community with certain temporal affairs as deacons, thereby relieving the apostles After his colleague Stephen's martyrdom he preached in Samaria, baptized Queen Candace's Ethiopian eunuch, and subsequently entertained S. Paul at Caesarea when journeying to Jerusalem Philip the deacon is commemorated on June 6

Philip Six kings of France Philip I (1069-1108) increased the power of the French crown by adding to the royal domains Philip II (Philip Augustus, 1180-1223) established a strong monarchy He took from the English kings the greater part of their lands in France and secured his possession by his victory over the combined forces of John and the Emperor Otto IV at Bouvines in 1214 He strengthened the royal authority by crushing rebellious vassals, allying with the towns and the merchants and organising a good administration His policy was followed by his successors Philip IV (1285-1314) was involved in a struggle with Pope Boniface VIII, in which he gained the victory, again strengthening the authority of the French Crown In the reign of Philip VI (1328-1350) the Hundred Years War with England began Philip himself led the French forces, which were routed at Crécy, 1346

Philip Five kings of Spain, of whom the most important was Philip II Born May 21, 1527, he succeeded his father the Emperor Charles V (q.v.) in 1556 His second wife was Mary, Queen of England. A bigoted Catholic, his chief object was to restore the supremacy of the Catholic Church, overthrown by the Reformation. This policy resulted in war with his subjects in the Netherlands and led eventually to the establishment of the independent United Provinces In France he supported the Catholic party, led by the Guises He carried on a long struggle with Elizabeth of England, supporting plots in favour of Mary, Queen of Scots Elizabeth in turn gave help to the Netherlands, and English seamen plundered Spanish galleons returning from America The complete defeat of the Great Armada in 1588 finally broke the power of Spain Philip died Sept 13, 1598, and was succeeded by his son, Philip III

Philip of Macedon King of Macedonia from 369-336 B.C. On his accession he entered upon a career as a military leader, which made him ruler of the whole of Greece Against his ambitious designs the Athenian orator, Demosthenes (q.v.) directed his famous *Philippic* orations He was murdered at the age of 48 on the eve of his departure for a Persian campaign, but not before he had laid the foundations for the even greater conquests of his son Alexander

Philippi City founded by Philip of Macedonia in Macedonia S. Paul founded a church here to which he addressed an epistle

The Battle of Philippi was fought in 42 B.C. and was a victory gained by Octavian and Antony over Brutus and Cassius

Philippians Epistle to the New Testament hook comprising the last letter of S. Paul now extant. Its authenticity is fully established It was sent from prison, apparently in Rome, to Philippi, the scene of the apostle's earliest European labours

Philippine Islands Group of islands between the Pacific Ocean and the China Sea discovered

by Magellan in 1521 and ceded by Spain to the U.S.A in 1899. The largest are Luzon, 40,814 sq m. and Mindanao, 36,906 sq m. Manila, on Luzon, is the capital. The islands are very productive and well timbered. Rice, coconuts, sugar, hemp and tobacco are the principal crops, while the forests yield valuable timber. Education is well organised and there is a university. Pop (1942) 12,590,369.

Philistines Ancient people occupying the Palestine coast-lands S of Jeppa. Apparently of Anatolian origin, their confederacy of five cities, Ekron, Ashdod, Gath, Ashkelon and Gaza, came into conflict with Israel under Samson, Samuel and David. Legendary association with a giant race lacks archaeological support. They accepted Assyrian domination, c 700 BC.

Phillpotts Eden British novelist and dramatist. Born in India, Nov 4, 1862, and educated at Plymouth, he published a series of novels with a Devonshire and especially a Dartmoor setting. These include *Children of the Mist* (1898), *The American Prisoner* (1904), *The Mother* (1908), and *Widecombe Fair* (1913). *The Owl of Athens* appeared in 1936. Of his plays, *The Farmer's Wife* (1917) and *Yellow Sands* (1926) were outstanding successes.

Philology Term denoting originally the study of what is said and written, now reserved for the study of the words themselves. It may investigate the beginnings of human speech or the origin, meaning and use of an individual language's component parts. Comparative philology arose when Sir W. Jones, 1786, observed that Sanskrit, Zond, Greek, Latin, Celtic and Gothic constituted one, the Aryan, family. Other groups are the Semitic, Altaic, Austic, Bantu, etc. Human speech is classified as isolating or monosyllabic, each word having a radical value only, e.g., Chinese, or inflectional, certain elements expressing grammatical relations. Some, e.g., Turkish, with inflections of independent form and meaning, were formerly called agglutinative. Some, e.g., Latin, attaching inflections to roots, are called synthetic, some, e.g., English, replacing inflections by independent elements, are analytic.

Philomela In Greek legend, daughter of Pandion, King of Athens. The Thracian King Tereus married her sister, Procne, whom he concealed and, pretending that she was dead, married Philomela also. In revenge the flesh of his own son, Itys, was served up to him. Tereus pursued her with an axe and she became the nightingale.

Philosophy Term meaning the knowledge of, or search for, the ultimate principles of knowledge or being. It is derived from Greek words meaning "love of wisdom". Schwegler defines philosophy as "reflection, the thinking consideration of things". Philosophy, the same writer says, distinguishes itself from the empirical sciences not by its matter, which is the same as that of the latter, but by its form, or method, its mode of knowing.

Socrates used the term, in contradistinction to the name of sophists (wise men) adopted by Protagoras, Prodicus, Gorgias and other of his contemporaries, to denote his own attitude towards the questions debated by the Greek teachers. The term philosophy had a wider meaning in the Middle Ages than now, being divided into natural philosophy, moral philosophy and metaphysical philosophy. The first

is now called physical science, and the second ethics, while metaphysics denotes the philosophy of cause and effect, or the nature of being.

Phlebitis Inflammation of the veins. It results from inflammation of the surrounding tissue, blood poisoning, etc., and may lead to the formation of blood-clots. In some cases surgical treatment is necessary, while in all cases complete rest is essential, especially where a clot may have formed.

Phlox Genus of herbs, mostly perennials, allied to Jacob's Ladder, of N. American origin, one occurs in Siberia. With simple leaves and salver-shaped flowers, panicle or single, many garden forms have come from the perennial *P. paniculata* and *P. maculata*, and the dwarf moss-pink, *P. sabulata*. The half-hardy annual, *P. drummondii*, has also yielded vivid blooms.

Phoenicia Strip of Syrian coast-land between Lebanon and the Mediterranean. The Phoenicians (the Sidonians of the Bible) were great colonisers. They founded Carthage (q.v.) and were the greatest merchants and seamen of the period. Tyre and Sidon were their principal cities, and the Tyrian purple, a rich dye, one of their main objects of commerce. They penetrated as far as Cornwall and the Scilly Isles where they traded for tin. Their place in history ends with the fall of Tyre to Alexander the Great in 332 B.C.

Phoenix Mythical bird of gorgeous plumage. Only one male bird was supposed to exist, and it lived, according to various accounts, from 500 to 12,954 years. At the end of this time it burnt itself on its nest, a new phoenix arising from the ashes.

Phoenix Industrial city situated on the Salt River in Maricopa Co., Arizona, U.S.A. It is the capital of the state and has a trade in fruit, olives and livestock. It has a population of 48,118 (1940).

The Phoenix Islands are a small uninhabited group lying between the Equator and Samoa.

Phoenix Park Public Park of Dublin, comprising 1752 acres, and surrounding the Viceregal Lodge and other official residences. The zoological gardens are also included. In 1882 Lord Frederick Cavendish and T. H. Burke were murdered here.

Phonetics Study of speech-sounds, especially in man. The human voice, inarticulate or articulate, results from the passage of air through the larynx. Modified by the vibrating vocal cords and the relation of the mouth-parts to the mouth and nose-cavities, which act as sounding boards, the volume and resonance of the sounds produced are determined by physiological principles. Modern authorities classify consonants according to the place of articulation as labials, sibilants, interdental, dental, palatal and guttural. Vowels are modified voiced sounds without audible friction. The International Phonetic Association uses a system of script which clearly individualises the pronunciation of words in a language.

Phonograph Machine for recording and reproducing sounds. Invented by Edison. In its earlier form it consisted of a revolving metal cylinder with a spiral groove cut in its surface which was covered with tinfoil, the groove forming the path of a needle connected with a delicate diaphragm. Sound waves entering a receiver set up vibrations in the diaphragm, causing

the needle to indent the tin foil. The metal cylinder is now replaced by one of wax.

Phosphates Compounds of phosphoric acid and various bases. In commerce it means, chiefly, phosphates of lime, occurring as mineral deposits and used largely as fertiliser. The impure massive form of the mineral apatite known as phosphorite consists of calcium phosphate, fluoride and chloride, and is an important source of phosphates. Other phosphatic deposits represent mineralised guano or other organic material. For manurial purposes the natural phosphates are converted into superphosphate by treatment with sulphuric acid.

Phosphorescence Power possessed by certain animals and plants of emitting light, a property shared also by some minerals. It occurs in the glow worm, firefly and many marine creatures, especially the deep sea fauna. The phosphorescence of the sea is largely due to swarms of minute protozoa (*Noctiluca*). Some minerals, such as the diamond and fluor spar, become luminous in the dark, either by friction, heat or previous exposure to sunlight.

Phosphorus Non-metallic element having the symbol P and atomic weight 31.0. It is widely distributed in nature as phosphates, occurring mostly as calcium phosphate. It is a yellowish wax-like solid, which readily oxidises in the air, emitting a pale greenish light. By heating to between 240° and 250° C, it is converted into an allotropic non-poisonous and non-luminous form, red phosphorus, used in match manufacturing. Phosphorus is employed in making vermin killers, phosphor bronze and various organic compounds.

Photo-Chemistry Branch of physical chemistry. It covers the chemical effects of electromagnetic radiations of various wave lengths, from the invisible infra-red rays at one end of the scale through visible light rays to ultra-violet, X-rays and the most penetrating gamma rays at the other. Photography is the best known development, but the effects of the invisible rays are the subject of special study leading to important results in the higher branches of chemical science.

Photo-Electricity Branch of physics dealing with the electrical effect of radiations on metallic and other surfaces. It was long known that certain radiations facilitated the passage of electrical discharges, now recognised as due to their power of causing the emission of electrons. The photo-electric cell is a development now widely used, especially in connection with television and the sound film.

Photo-Engraving Printing term. Exposure of a prepared plate under the negative of a line drawing renders the lines insoluble while the balance may be removed, enabling reproductions to be printed. Pictures must first be photographed through a "screen," breaking the image into dots. Exposure and development of a prepared copper plate under the negative permits the copper plate subsequently to be etched into similar dots from which reproductions may be printed.

Photography Process by which pictures are produced by the action of light upon surfaces treated with chemicals sensitive to light. In the 18th century chemists had noticed the action of

light upon silver salts and other substances and the production of fugitive images upon a suitable material, but about 1826 a Frenchman, Nicéphore, succeeded in producing pictures or "heliographs" by means of a sensitive film of bitumen and in collaboration with Daguerre further improved his process.

In 1839 Daguerre invented the daguerrotype in which metal plates coated with silver iodide were used. Meanwhile Fox Talbot discovered the art of fixing silver nitrate negatives with common salt, thus producing permanent prints. This process was improved further by the use of hyposulphite of soda by Herschel, and the introduction of glass instead of paper for negatives followed by the use of sensitised albumen films. The next advance was made in 1851 by a sculptor, Scott Archer, who introduced the wet plate with collodion sensitised by silver iodide. In turn the wet plate process was superseded by the dry plate or gelatine bromide process in 1871 and more recent developments have been in colour and motion photography and the use of roll films.

Photometer Optical instrument used for measuring the intensity of light and the comparison of the illuminating power of light from different sources. In photometry the unit is the light from a standard sperm candle burning 120 grains per hour, the illuminating power of light from any source being expressed in terms of candle power. The different forms of photometers are constructed so as to enable the observer to judge the equality of illumination of two adjacent surfaces.

Photophone Apparatus devised by Prof. Graham Bell in 1880 for transmitting articulate speech to a distance along a beam of light. The principle involved in the photophone is the sensitivity of the element selenium, its electrical conductivity being increased by exposure to light.

Photosphere Name given in astronomy to the luminous envelope or radiating surface of the sun, from which light is emitted. Its surface is not uniform in texture, as by aid of the telescope it is seen to have a mottled appearance formed by brilliant areas in a less luminous network, the "rice grains" of Langley and Janssen.

Phrenology Empirical system of psychology claiming that mental faculties and disposition may be gauged from the shape of the skull. Founded early in the 19th century by F. J. Gall, and developed especially by J. K. Spurzheim, who left him in 1813, it asserted that mental powers comprise innate faculties independently located in definite brain regions whose size corresponds with the skull's individual configuration. Popularised for a time in Great Britain and America, the system utilised phrenological charts, locating 42 faculties emotional or intellectual.

Phthisis Greek word, "wasting," formerly applied—like consumption—specifically to the wasting lung disease now called tuberculosis (*q.v.*). It should be distinguished from chronic interstitial pneumonia.

Phylloxera Genus of insects belonging to the aphides or plant lice family. One, *Phylloxera vastatrix*, a native of North America, is the most dreaded insect pest of the grape vine. It appeared in France about 1860 and spread over Europe, ruining the vineyards, and later ravaged in turn many other parts of the world.

Physician One skilled in the art and practice of medicine. Only those who are qualified in medicine, surgery and midwifery are allowed to practise as medical practitioners and are registered as such under the Act of 1858.

The Royal College of Physicians whose headquarters is in Pall Mall East was established in the early 16th century. It gives degrees of licentiate and fellowship, L.R.C.P. and F.R.C.P.

In Scotland the Royal College of Physicians of Edinburgh was founded in 1681 and has its hall in Queen Street, there is a similar institution in Dublin.

Physics Term applied to the branch of science dealing with physical phenomena and with the laws governing these natural events. The science is based necessarily upon experimental work to obtain data for the stating of the mathematical laws which rule this material universe. In this investigation a study is made of the properties of matter and the phenomena relating to the manifestation of energy in its various forms. The range of study being so wide, physics is broken up into sub-divisions, such as mechanics, dynamics, optics, sound, heat, electricity, magnetism and radiation. In each branch the subject may be considered from a practical or mathematical standpoint.

Physiognomy Art of judging the character of a person from the countenance or external appearance. Although a belief in this art is very old and widespread it has been found difficult to formulate definite rules in accordance with scientific ideas. At the same time physiognomical methods have been found useful in pathology and criminology.

Physiology Section of biology concerned with the functions or life processes, as distinct from morphology, the study of form and structure. In its earlier phase the study of living organisms was mainly from the point of view of morphology, but in comparatively recent years it became recognised that form and structure must be interpreted in terms of the life activities of plants and animals.

Owing to the ever increasing range of investigation, physiology has widened out into the study of the organism in relation to its environment, forming the branch of ecology. Another branch, comparative physiology, deals with the comparative study of the functions in different groups of organisms. Further, the progress of physiology has been dependent upon the advances made in the allied sciences of chemistry and physics, a knowledge of the special technique of these being essential for physiological investigation.

Pianoforte Percussive musical instrument. Cristofori, born in 1651, evolved from the dulcimer his *Clavicembalo col piano e forte*, the first of true pianofortes. Silbermann improved it, Stein, Shudi and Broadwood added the pedals, and Clementi and Beethoven influenced its subsequent evolution. The keyboard comprises a seven times recurrent group of seven white and five black digitals, each of which, when depressed, moves internal mechanism causing a felt-covered hammer to strike one of a series of wires of graduated length and varied gauge and tension. Unwanted vibrations are checked by dampers, which can be put out of action by the right pedal. The left pedal diminishes sound-volume by preventing in three ways

(varying according to the pianoforte's make) the full impact of hammer-force on the wires.

Piastre Coin denomination. The Turkish lira, nominally 188, contains 100 piastres each 40 paras. Silver pieces of $\frac{1}{2}$, 1, 5, 10 and 20 piastres are coined besides copper fractions, and theoretically gold pieces also. The Egyptian pound, nominally 20s 6½d is coined in similar denominations, besides nickel and bronze fractions. French Indo-China uses a silver piastre, nominally 2s.

Piave River of Italy. It rises in the Carnic Alps and flows through the north of the country until it falls into the sea by two mouths near Venice. It is about 140 m long. There was some fighting along the river during the Great War. After their defeat at Caporetto in Oct., 1917, the Italians fell back behind the Piave, where, with the assistance of some British troops, they prevented the Austrians from advancing further. In June, 1918, there was renewed fighting. The Austrians crossed the river, but were driven back. Towards the end of the following October the Italians and the British contingent advanced from the Piave and drove the enemy before them until the armistice.

Piazza Italian word for a square or open space. The most famous is the piazza of St. Mark in Venice. They are found in other Italian cities.

Picardy Province of France before the Revolution. It now covers the department of Somme and portions of those of Aisne, Oise and Pas de Calais. Its principal city was Amiens, on the Somme. The province was ceded to Philip the Good, Duke of Burgundy, in 1435, and annexed to the crown of France in 1477.

Picasso Name taken by Pablo Ruiz, Spanish painter. Born at Malaga, on Oct. 23, 1881, he came to Paris and was associated with Braque (1866-12) becoming known for his cubist works. He was influenced by Cézanne and El Greco. Later he reverted to the manner of Ingres, turning out pictures in a less challenging style. In 1931 an exhibition of his works was held in London.

Piccadilly London thoroughfare. It runs from Hyde Park corner to Piccadilly Circus. Here are a number of the principal clubs, several hotels, and Burlington House, occupied by the Royal Academy, the Royal Society of Arts, etc. Regent St. crosses Piccadilly Circus, and Coventry St., Shaftesbury Ave., and Glasshouse St. lead out of it.

Piccolo Smallest flute. It sounds an octave higher than the concert flute, and than its written part. It is pitched in D for ordinary orchestral use, in E flat and F for military band purposes.

Pickering Market town and urban district of Yorkshire (N.R.), 32 m from York, on the L.N.E. Rly. (Junction). The church (partly Norman) contains ancient mural paintings. Pop. (1931) 3668.

Picketing Term denoting the posting of persons about a works, during a strike, to dissuade the employees from working. Made illegal in 1875 (as far as any compulsion was brought to bear by the pickets), what is termed peaceful picketing was legalised by an Act of 1908. An enactment of 1927, following on the general strike of 1926, made picketing illegal, if committed in respect of a strike declared unlawful. See TRADE UNION.

Pickford Mary (née Smith) American cinema actress Born in Toronto, April 8, 1893, she married Douglas Fairbanks, March 28, 1920. Appearing on the stage in 1898, she afterwards acted in New York, and began screen work under D W Griffith. The Mary Pickford Film Corporation was formed in 1916 and gave her the highest salary in the profession. She appeared in many films, including *Rebecca of Sunnybrook Farm*, *Daddy Long Legs* and *Coquette*. In 1919 she became an independent producer.

Picric Acid Synthetic compound also known as trinitrophenol, prepared by the nitration of phenol or carbolic acid, or by the nitration of monochlorobenzene, picric acid is a poisonous, yellow crystalline substance used in the manufacture of explosives (lyddite), as a dye for cotton, and in medicine as an antiseptic, and in the treatment of burns.

Pictography (or Picture writing) Use of pictorial symbols to denote facts, events or ideas. Derived from the primeval arts of design, it was man's earliest method of making a more or less self-explanatory record. In the early metal ages of the Old World it was destined to pass into a alphabetic writing. Carried during the pre-metallic age into America, it developed local systems of picture writing among the N American plains Indians, and a more complex symbolism among the pre-Columbian Maya and Aztec peoples.

Pictou Seaport of Nova Scotia, Canada. It is on the north side of Pictou Bay, an inlet of Northumberland Strait, 118 m from Halifax. Coal is exported. Pop 3000.

Picts People occupying E Scotland from pre Roman times onwards. Apparently sharing N Britain with the 3rd century Caledonians, and first mentioned in Constantine Chlorus' campaigns, 296 and 306, their subsequent incursions S of Hadrian's Wall helped the Scots to harass the Roman power. Their turbulent history is scantily recorded down to Kenneth MacAlpin, a Pict by maternal descent, who united Pict and Scot under one rule, 844.

Piedmont Department (*compartimento*) of N W Italy, including the provinces of Alessandria, Novara, Cuneo, Turin, Aosta and Veracelli. Lake Maggiore is on its E border, and its French and Swiss borders are mountainous, enclosing fertile plains which produce fruit, chestnuts, olives, rice and wine. The Po and its tributaries traverse the district, which covers an area of about 11 300 sq m. For centuries it formed part of the dominions of Savoy, was occupied by the French, 1796, passing to Sardinia in 1814. It became part of the kingdom of Italy in 1859.

Pier Architectural term applied to an isolated mass of masonry, forming the wall between two adjacent windows or openings or to the massive columns of a Norman arcade, also to the clustered columns of some Romanesque churches as in the nave of S Miniato, Florence. Norman piers of the 11th and 12th centuries are usually massive with a rubble core faced by ashlar, and are rectangular or more or less circular, the two types often being used alternately in an arcade.

Pietà Term in art used for a representation of the Virgin embracing the dead body of Jesus, or of similar scenes at the deposition from the Cross. La Pietà, a group

of sculpture of this type executed in S Peter's Rome, was one of the early masterpieces of Michelangelo, and this subject also has been the theme of many paintings.

Pietermaritzburg City of South Africa, also called Maritzburg, the capital of Natal. Founded by the Boers in 1839, it stands near the Umsindusi River, 73 m by rail from Durban. Industries comprise brickmaking, tanning and brewing. Pop 20,671 (whites).

Pig Animal belonging to the family *Suidae* of the order *Ungulata*. The group comprises, besides the true pig, the wart-hog, bush pig and babyrussa. Domesticated pigs are derived from the wild boar. Principal British breeds include the large white, middle white, small white, Tamworth, large black, small black, Lincoln and Berkshire. Though in a wild state the pig frequents marshy regions it is a mistake to suppose that the domesticated animal is dirty or loves to wallow in mud. It pays to provide pigs with cleanly, roomy and well ventilated sties. An omnivorous feeder, the pig requires proper, well varied diet, and will not thrive on garbage. See BACON.

Pig Iron Crude iron, the product of the blast furnace, containing about 3 per cent of carbon and small quantities of silicon, manganese, sulphur and phosphorus. It is hard, brittle and moderately fusible, and is cast in U shaped moulds called "pigs".

Pigeon In general, all birds belonging to the order *Columbiformes* (true pigeons, doves and certain extinct birds, e.g. the dodo). In its more limited meaning the name is given to members of the genus *Columba*, comprising about 70 species, the typical pigeons widely distributed over all but the coldest regions, the genus is particularly numerous in Australia, Malay Archipelago, New Guinea and adjacent islands.

British species include the wood pigeon, stock dove and blue rock. Domesticated pigeons include many fancy varieties with widely differing characteristics. The homer is used for message carrying, the carrier being a purely fancy strain. The pouter has an extremely large crop, the tumbler is distinguished for its manner of flight, the fantail by its widely expanding tail. Much attention is paid to the training of homing pigeons for long distance flights and periodical contests are held, the birds being flown from far distant starting places to their home.

Pigment Colouring matter. In painting it may be of mineral, vegetable, animal or synthetic origin. As a rule mineral pigments are the most permanent, while animal and vegetable are fugitive. Synthetic substances such as alizarin and aniline derivatives now replace many of the older natural pigments.

Pigment is present in the epidermis of many mammals, in birds chiefly in the feathers, and in fish, insects and crustaceans in special secreting cells. Apart from pigments the colours of plumage, hairs, etc., are due largely to reflection, interference and other optical effects. Haemoglobin, the colouring matter of blood, and its derivatives form the commonest of the animal pigments.

Pig Sticking Sport of hunting the wild boar, popular in India. Huntsmen in parties of three or four pursue the animal, when beaten out of cover, and endeavour to ride it down and spear it.

Since the boar, when wounded, may turn and show fight, pig sticking involves some danger, and demands coolness, nerve, and excellent horsemanship

Pike Infantry thrusting weapon. It comprised a long straight shaft and sharply-pointed metal head, conical or flat and spearlike, the butt being sometimes spiked. It dominated the infantry equipment of 15th century Europe, especially among the Swiss, who used 18 ft pikes besides various types of halberds. The 17th century bayonet displaced the pike.

Pike Family of soft-finned, freshwater fishes inhabiting N temperate regions. The voracious common pike, *Esox lucius*, of Britain and Europe, prefers lakes and sluggish reaches. Its long compressed body, up to 30 lb and more, is covered with small scales, the large mouth being armed with strong teeth. The young are called jack.

Pilaster Architectural term for a flat rectangular column, either fluted or non-fluted, built into and partly projecting from a wall. In Renaissance architecture slender pilasters often separated the round-headed windows from one another in secular Italian buildings, and in the Tudor and Stuart period walls were often covered with classical pilasters.

Pilate Pontius, Roman procurator of Judaea, Samaria and Idumaea, under whom Jesus Christ suffered crucifixion. Coming from Tiberius' household, apparently a freedman, his unsympathetic ten years' governorship, A.D. 26-36, is noted with indignation by Josephus and Philo. His attitude during the trial of Jesus has in all ages been variously interpreted. The Abyssinian Church commemorates him as a saint on June 25, the Eastern Church his wife, Procula, on Oct. 27. Legend exiles him to Gaul, ascribing his end to suicide.

Pilatus Mountain of Switzerland, about 5 m from the south arm of the Lake of Lucerne, 6996 ft high. The name has no connection with Pontius Pilate, but is derived from Mons Pileatus, "the cloud capped mountain."

Pilchard Marine food-fish of the herring family (*Sardina pilchardus*), abundant in the Mediterranean and on the Atlantic coasts of N Europe to the English Channel. The sardines of the W coast of France, 5-7½ in long, tinned in oil for export, are immature fish of the same stock as that up to 14 in long, which furnishes the pilchard fishery off Cornwall and adjacent coasts. An allied species occurs on the Pacific coast of America, New Zealand and Japan.

Pile-Dwelling Primitive habitation built on piles. This constructional method arose in neolithic Europe, especially on shallow lake margins, and continued through the early metal ages. It still occurs in aboriginal Africa, pile-granaries for protection from animal depredation being also used, as formerly by the Maori. Borneo raises piles 40 ft high. In New Guinea and neighbouring islands pile-villages resembling those of neolithic Europe often extend far out to sea. They occur also in the Burmese Shan States and the Nicobars. See LAKE-DWELLING.

Piles (or haemorrhoids). Dilated condition of the veins at the lower end of the rectum, sometimes protruding through the anus and accompanied by bleeding. Since they are usually caused by constipation or some internal

disorder, strict attention should be paid to the diet and general health. Diet should be simple and contain plenty of fruit and vegetables, alcohol is prohibited, drastic purges should be avoided, but the bowels can be regulated with liquid paraffin. Scrupulous cleanliness of the parts is essential, and the application of vaseline will aid in defecation. If the condition is severe a doctor should be consulted.

Pilewort (or Lesser Celandine). Perennial herb of the buttercup family (*Ranunculus ficaria*). The fibrous roots develop annually several small stout cylindrical tubers, used by herbalists for curing piles, and when boiled an agreeable pot-herb. The shining stalked heart shaped leaves contrast with the starry, single bright-yellow, 1 in flowers. See CELANDINE.

Pilgrim One who, from religious motives, journeys to a place held sacred. Pilgrimages are undertaken for penance, in discharge of religious obligation, or in quest of bodily or spiritual benefit. The practice, traceable to ancient Greece and W Asia, still prevails in India, and is enjoined upon Moslems to Mecca and elsewhere. Christian pilgrimage to Palestine especially developed after Constantine. Medieval Europe also fostered visiting the tombs of saints, as those in Rome, St James of Compostela, Becket at Canterbury and Our Lady of Walsingham, while curative pilgrimages are still made to Lourdes.

Pilgrim Fathers Earliest settlers of the Plymouth colony, Massachusetts, and specifically the first company of emigrants who sailed from Plymouth, Devon, in the *Mayflower*, reaching Plymouth Rock, Massachusetts, 1620. They were Puritans, largely from SE England, who left the homeland under a royal promise of non-interference with their freedom of worship overseas. The tercentenary of their sailing occasioned enthusiastic celebrations in England, Holland and America, 1920. The oldest Congregational church in London, founded in the New Kent Road, 1616, was enlarged by American subscribers in memory of Southwark men who sailed in the *Mayflower*, 1856, being called the Pilgrim Fathers Memorial Church. See MAYFLOWER.

Pilgrimage of Grace

Insurrection in the N of England, 1536-7. Occasioned by the dissolution of the smaller monasteries and various economic grievances, a Lincolnshire rising was quickly suppressed. A more formidable one, headed by Robert Aske and other Catholic gentry, broke out in Yorkshire, the leaders were executed, and a Council of the North established.

Pilgrim's Way Road used by pilgrims through Winchester to the shrine of St Thomas à Becket at Canterbury, following, in part, a more ancient track. It is about 120 m long and goes via Alresford, Farnham, Albury Pk, Burford Bridge, Merstham, Chevening, Mosham, West Malling, Hollingbourne and Charing.

Pilgrim Trust Fund founded in 1930 by an American, Edward Stephen Harkness. He set aside a sum of £2,000,000, the interest of which is devoted to assisting charitable causes in Great Britain, in recognition of the way the country had discharged its obligations since the war. A trust was formally instituted with Mr Stanley Baldwin, M.P., as president and Mr Thomas Jones as secretary.

Pillory Form of punishment used in England and some European countries. It consisted of a wooden frame supported upon a post, the culprit's head and hands being thrust through holes in the frame. In the 17th century it was used for punishing offences such as unlicensed publishing of books and seditious libel. At the beginning of the 19th century it was still in use for perjury, but was abolished in 1837.

Pilot Person who navigates a ship or controls an aircraft. A licensed pilot is employed to navigate a ship into or out of a port or harbour, through a river, channel or road. When a vessel wishes to enter, e.g., a port, a recognised signal is made and a local pilot goes out to board the vessel for the purpose. An outgoing ship drops the pilot after he has conducted her into open water. Generally it is compulsory for a ship to be conducted by a licensed pilot when entering or leaving a port. The master or mate, however, may be a qualified pilot. Licensing is carried out by the local chief officer of customs.

Pilots for aircraft are certificated after completing specified training and passing appropriate tests.

Pilot Fish Subtropical marine fish of the horse mackerel family (*Naucrates ductor*). About 12 in long, spindle shaped, steel blue with dark vertical bars, it often accompanies sharks and ships, doubtless for the food supply. The popular notions that it warns sharks of the baited hook and sailors of the proximity of land are alike fabulous.

Pilsudski Joseph Polish statesman. A Lithuanian, born in Nov 1867, he was in conflict with the authorities while still a student, on account of his nationalist and socialist tendencies, and was exiled, spending 4 years in Siberia. Escaping from a later imprisonment in St. Petersburg, 1901, he visited Britain and the East, but the outbreak of the Great War found Pilsudski again in Poland, whence he invaded Russia with a Polish army. He was chosen President of the new republic set up in Poland, 1919, resigning, 1922. He was made Marshal, 1920. He headed a revolt in 1926 which brought about the fall of the government, himself becoming Premier and Minister of War. Resigning the major office, 1928, he became virtual dictator. Pilsudski again became Prime Minister in 1930 but in March, 1932, he was appointed Minister of Military Affairs, and Alexander Prystor took office as Premier. Pilsudski died on May 12, 1935. He wrote many historical works dealing mainly with Poland's struggles for independence, including *Historical Corrections* (1931).

Pitdown Skull Fossil human bones discovered at Pit Down, Sussex, 1911-13. Quaternary gravels yielded fragments of a skull, partly mineralised, the right half of a lower jaw and some teeth. Subsequently an implement hewn from an elephant's thigh bone emerged close by. Named *Eoanthropus*, "dawn man," the remains represent the oldest known human race in Europe.

Pimento (or Jamaica Pepper) Dried fruit of a W. Indian evergreen tree of the myrtle order (*Pimenta officinalis*), widely grown in Jamaica and Central America. Also called allspice, because its flavour supposedly combines those of cinnamon, nutmeg and cloves. Its essential oil, largely eugenol, is used in pharmacy like oil of cloves, and for perfuming soaps.

Pimlico District of London between Chelsea and Westminster, in the city of Westminster. It is bounded by the Thames on the S and E, Chelsea on the W, and Belgrave and Victoria St. Westminster on the N. Pimlico Road connects Royal Hospital Rd. and Buckingham Palace Rd.

Pimpernel Genus of herbs of the primrose order (*Anagallis*) natives of Europe, Asia and N. Africa. The wheel-shaped corollas of *A. arvensis* scarlet in Britain, blue in continental Europe, expand in clear forenoons; hence the name poor man's weather glass. The allied bog pimpernel has rosy, funnel-shaped corollas.

Pinchbeck Roddish-yellow alloy of copper formerly much used in the manufacture of cheap jewellery and cases for watches. Its composition varying from 80 to 93 per cent copper, with 20 to 7 per cent zinc. It was named after Christopher Pinchbeck, an 18th century London watchmaker who is said to have invented it.

Pindar Greek lyric poet. Born near Thebes, about 522 B.C. He composed, at the age of 20, a choral ode in honour of a victor at the Pythian games. His *Epinicia* or odes are divided into four books dealing respectively with the Olympian, Pythian, Nemean and Isthmian games. He died in 443 B.C.

Pine Genus of large evergreen coniferous bearing trees (*Pinus*), widely distributed in the N. hemisphere. Pines differ from firs in having the needle-shaped leaves clustered in twos to fives. The only species indigenous to Britain is *P. sylvestris*, 70-100 ft. high, popularly called the Scotch fir. The most important timber tree of N. Europe, it also yields turpentine, resin and tar.

Pineapple S. American perennial herb of the *Bromelia* order (*Ananas sativus*), now naturalised throughout the Old World tropics. The edible fruit consists of the flower-spike consolidated into a richly perfumed succulent mass, much improved under cultivation. Introduced into 17th century Europe, it is raised in hothouses while large canning and export industries have arisen in Singapore, the Azores, Fiji, Hawaii and Natal. Fibre prepared from the leaves yields the grass-cloth of Formosa, Java and the Philippines.

Pinero Sir Arthur Wing. British dramatist. Born May 24, 1855, he was an actor 1874 to 1881. He produced comedies at the Court Theatre, 1885-93, including *The Magistrate*, *The Cabinet Minister*, *The Amazons*. Elsewhere he staged *The Profligate*, 1889, and *Sweet Lavender*, 1888. *The Second Mrs. Tanqueray* gave Pinero a leading position among British playwrights. Other plays include *Trelawney of the Wells*, *The Gay Lord Quex*, *Mid Channel* and *A Cold June* (1932). He was knighted in 1909. He died on Nov. 23, 1934.

Ping Pong Table tennis game introduced about 1901. It is played on a table 9 ft. by 5 ft., divided by a low net, into two courts. Light wooden racquets and a small celluloid ball are used. Each player serves five times in succession, and the ball must hit the table on the player's side and thence bounce into the opponent's court. No volleying is permitted. Game is 21 up, but it goes beyond that figure if the players are 20 all.

Pink Name denoting cultivated forms of various species of *Dianthus* (q.v.). The pinks of English gardens, single or double

derivo from a Mediterranean form, *D. plumaria*, naturalised in parts of Britain since Stuart times, with rough-edged leaves and fragrant rose-purple flowers, often fringe-petalled. Some tufted rock-pinks come from the native Choddar and Maldon pinks. Brilliant blooms are furnished by the China or India and Japan pinks.

Pinkerton Allan American detective. Born Aug 25, 1819, he emigrated to America in 1842, and opened a detective agency in Chicago in 1850. In 1861 Pinkerton organised the U.S. Secret Service, and was Lincoln's guard. He brought about, in 1876, the suppression of the Molly Maguires, an Irish secret society which had terrorised the coal-producing regions of Pennsylvania. He died on July 1, 1884.

Pinkerton's Detective Agency was carried on by his sons, and became famous for the part it played in solving notable crimes. Allan Pinkerton, a grandson, died in 1930.

Pink Eye Contagious and infectious disease of horses (equine influenza). The membranes of the eye become red and swollen, so that the eye takes on a deep red tinge. The name is also applied to an infective conjunctivitis in human beings.

Pinkie Battle of Fought Sept 10, 1547, near Musselburgh, between an English army of 16,000, led by the Protector, Somerset, and the Scots, 23,000 strong. The purpose of the invasion was the enforcement of a treaty of marriage between Edward VI and Mary, Queen of Scots. The Scots were completely defeated.

Pinnace Name given to a small sailing boat, often schooner-rigged, and provided with oars for use if needed, also to an eight-oared boat. Pinnaces are used generally as tenders for larger vessels and form part of the equipment of a warship, the modern pinnace, however, usually being motor driven.

Pinner District of Middlesex, 3 m from Harrow-on-the-Hill and 13 m NW of London, on the Pla (Metro, L M S and L N E Rlys). The flint stone church of St John the Baptist dates from the 14th century, and contains a mural monument to H J Pye, the poet laureate.

Pint Measure of capacity both for liquids and dry goods. The English pint is one-eighth of an imperial gallon, equivalent to 4 gills. In compounding medicines a fluid measure is used, a pint being equal to 20 fluid ounces. A Scottish pint is approximately equal to three imperial pints.

Pinxton Market town of Derbyshire, 6 m from Mansfield, by L M S and L N E Rlys. Extensive coal mines are near, and lace is made. Pop 5348.

Piozzi Hester Lynch English authoress. Born at Bodreel, Caernarvonshire, Jan. 16, 1741, she married, in 1763, Henry Thrale (d 1781), a wealthy brewer. They lived at Streatham, London, and here began their famous friendship with Dr Johnson. Mrs Thrale, in 1784, married Gabriel Piozzi, an Italian music master and went with him to Florence. In her *Anecdotes* is a vivid account of Johnson. She also wrote *The Three Warnings*, a novel, and an autobiography. She died at Clifton, May 2, 1821.

Pipe Cylindrical instrument with holes through which air passes, making musical sounds. All wind instruments, including the organ, are "pipes."

There are (1) Whistle pipes (like Panpipes), (2) Reedpipes, single-reed (like the clarinet), double-reed (like the oboe), and free (like the harmonium), (3) Pipes with cup mouth-pieces (like the trumpet).

Organ pipes can be "flue," "reed," "stopped" or "open." See REED.

The tobacco pipe was invented in pre-Columbian America, specimens being found in ancient Indian mounds. Introduced into England by Raleigh in 1586, it was first regularly manufactured out of clay in London in 1619. Briar pipes, a later development, are made from the Mediterranean tree-heath, or *bruyère* root, of E France and Italy. See TOBACCO.

Pipe Clay Fine white plastic clay containing a higher percentage of silica than kaolin or china clay, and used for making pipes, tiles and as cleaning material for leather.

Pipe-Fish Name of a group of long, slender, tuft-gilled fishes akin to the sea-horse, generally found in the waters of tropical and temperate sea-coasts. The males mostly have pouches for safeguarding the eggs until hatched. Five species in British waters include the sea adder, 2 ft long, the great pipe fish, 18 in., and the worm pipe fish, 6 in.

Pipe Line Continuous line of pipes for carrying water from a reservoir, or for the transport of petroleum from the oil well to the refinery or port. Oil can thus be brought over great distances, as in the United States where there are over 90,000 m of underground pipes of 4 to 12 in in diameter also in Persia where oil is carried for 150 m across deserts and over mountains.

Pipe Roll Name given to the early financial records of the Exchequer consisting of a series of parchments originally rolled up together into a pipe like roll. The first record dates from the reign of Henry I, and a continuous series exist from the time of Henry II down to 1834.

Pipit Genus of song-birds akin to the wagtails (*Anthus*), widespread especially in the Old World. Of three British species the commonest, the meadow pipit or titlark, is partly resident, partly migratory. The tree-pipit, a summer visitor, is called the wood-lark in Scotland.

Pippin Name for several varieties of apple, pre-eminently Newtown Ribston, golden, Blenheim, lemon and Cox's orange pippin. It formerly denoted any apple raised from pips, not by grafting.

Piquet Card game. The two players use 32 cards, twos to sixes being eliminated. Derived from the Italian 16th century *romba*, and played in Tudor England in a Spanish form called cent, it was renamed piquet when Charles I married Henrietta Maria. Each player receives twelve cards, the other eight being available, face downwards for exchange. Points count for various combination and tricks. Since about 1880 rubicon piquet, playing 100 points or six hands, has largely superseded the older five hand rule.

Piracy Any act of robbery and depredation which if committed upon land, would constitute felony is piracy if committed upon the high seas. Certain other offences are statutory piracies namely, an act of hostility at sea by a natural-born British subject under colour of a foreign commission, the assisting of an enemy at sea by the same

in time of war, mutiny, the running away with a ship, guns, ammunition or goods, the voluntary yielding up of these to a pirate. The penalty was formerly death, the pirate being tried by an admiralty court, now it is penal servitude for life or less, and offenders are tried in the ordinary way. Piracy is still common in Chinese waters.

Piraeus Seaport of Greece on the Saronic Gulf, 6 m SW of Athens. Founded by Theseus and Pericles. It was connected to Athens by two walls. Piraeus was destroyed by Sulla 86 B.C. and rebuilt in 1835 after Greece regained independence from the Turks. Piraeus is now connected with Athens by railway, and its modernisation was started in 1929. Pop. 261,330.

Pirandello Luigi Italian dramatist and novelist. Born near Girgenti, Sicily, June 28, 1867, after graduating at Bonn University, he taught in Rome, producing his first book, *Mal Gioconda* in 1889. In 1910, having published many novels and stories, he began to write plays, the best known being *Six Characters in Search of an Author* (1921), *Henry the Fourth* (1922), *Ciascuno a Suo Modo* (1924). *The Life that I Gave Him* appeared in London in 1934. His plays have won him wide recognition by their brilliance and originality.

Pisa City of Italy, on the Arno, 7 m from its mouth in the Ligurian Sea and 50 m by railway from Florence. The Gothic cathedral (1093-1118) is a magnificent white marble structure with an elliptical dome 190 ft high and the campanile or Leaning Tower (1174-1350) is notable. In 1409 the Council of Pisa was held to deal with the schism which arose as a result of the residence of the rival pontiffs at Avignon. Pop. (1931) 73,041.

Pisano Andrea Italian sculptor and architect, born at Pontedera, c. 1270. He decorated, in relief, a set of bronze doors for the baptistry at Florence. He died, c. 1349. Niccolò Pisano, born c. 1206, produced the sculptured pulpit in the baptistry of Pisa, his birthplace, and also that of the cathedral at Siena. He died in 1378. Giovanni, his son, born c. 1250, built the tomb of Benedict XI at Perugia. He died c. 1330. Vittore Pisano or Pisanello, was an artist and medallist. Born at San Vigilio, c. 1380, he was responsible for portrait medals of many of the contemporary princes. He died in 1456.

Piscina Latin word denoting in ecclesiastical usage a shallow stone basin draining to the earth, used by the priest for ablutions after the Mass. Usually niched in the sanctuary wall on the altar's S. side, it often survives in English pre-Reformation churches from the 13th century onwards, sometimes in elaborate architectural settings.

Pistachio Nut Kernels of fruit horn by the *Pistachio verae*. They are bright-green in colour and taste like sweet almonds. They contain over 50 per cent. of oil and about 23 per cent. of albuminoids, and are much used in cookery.

Pistol Small firearm. It was invented at the beginning of the 16th century, the wheel lock mechanism being used in these and later forms of pistols, although about a century later the flint-lock came into use. The introduction of the percussion cap for larger firearms in the early 19th century led to its use in pistols superseding the older methods.

The revolver with rifled barrel and revolving cartridge cylinder also came into favour, displacing the old type of pistol, as the modern automatic pistol is tending to supersede the revolver.

Pistole Former gold coin of Spain, a double escudo, now obsolete, worth about 17s. The name (French) was also used for the French louis d'or and other gold coins.

Piston Part of a pump or engine. It is a circular plate or short cylinder of metal or other material fitted into a hollow cylinder, in which it moves backward and forward the movement being caused by fluid or steam pressure. Pistons are used in pumps and various forms of engines.

Pitcairn Small island in the Pacific, equidistant from Lima, Peru and Auckland, N.Z. It was discovered in 1767 by an officer of the *Carteret* and is occupied by descendants of the mutineers of H.M.S. *Bounty* (1790). It was annexed by Great Britain in 1839. Its area is 2 sq m.

Pitch Height or depth of sound. Low pitch is produced by slow, high pitch by rapid vibrations. Standards of pitch have always varied. Apart from ancient practice, there have been the following standards.

Classical Pitch, estimated at A = 415 to 429 vibrations per second, C = 498 to 515 vibrations per second.

2. High Pitch (caused through the increasing brilliance of orchestral playing) which was in 1859 legalised in France as A = 435 vibrations per second, C true = 522 vibrations per second. C by equal temperament = 517 vibrations per second.

3. New Philharmonic Pitch. In 1896 the Philharmonic Society adopted a standard of A = 439 vibrations at 68° Fahrenheit or A = 435 at 59° Fahrenheit. This low standard is now general in concert use.

English military bands played at High Pitch until 1928 when they were instructed to adopt the Philharmonic Pitch. A = 439 vibrations per second, B flat 465.1 vibrations per second, C = 522 vibrations per second—at 68° Fahrenheit.

On Armistice Day, 1930, the Brigade of Guards publicly set the new standard.

Pitch Term used in mechanics for the distance between the centres of gear teeth or the crests of screw threads. The pitch is generally referred to as so many threads to the inch, thus four per inch would mean four threads and four spaces per inch in length, the pitch in this case being termed 4 in.

Pitch Black, viscous substance obtained from coal tar as a residue in the still after fractional distillation. It is obtained also from the distillation of oils and wood tar. Mineral pitch is the name often given to natural asphalt or bitumen, and Burgundy pitch is the resinous exudation from the spruce fir, *Picea excelsa*.

Pitchblende Mineral consisting of a mixture of uranium oxides with oxides, sulphides and arsenides of lead, iron and other metals. Dark brown or black with a pitch like lustre, it is the chief ore of uranium and radium as well as various rare metals. Pitchblende occurs in small veins in gneiss schist and slate in Cornwall, Norway, Joachimsthal in Bohemia, and North America. The Bohemian pitchblende is worked chiefly for sodium uranate and indirectly for radium.

Pitch Lake Name given to a lake of asphalt at La Brea, in the extreme S W of the Island of Trinidad. Its area is about 100 acres and while the asphalt is firm and solid near the shore it is soft and boiling at the centre.

Pitcher Plant Insectivorous plant with pitcher shaped leaf organs. A large genus of shrubs, *Nepenthes*, found in eastern tropical forests, bears such receptacles, the thick, corrugated mouths produce sweet excretions attractive to running insects, which collect within and are digested by other glandular secretions. In the E United States the side saddle plant, *Sarracenia*, also bears insectivorous pitchers.

Pitlochry Village and summer resort of Perthshire, on the Tummel, 28 m from Perth, on the LMS Ry., near the Pass of Killiecrankie and Loch Tummel. Pop 2341.

Pitman Sir Isaac, Inventor of the Pitman System of Shorthand. He was born at Trowbridge, Wilts., Jan. 4, 1813, and became a schoolmaster. He published his *Stenographic Sound Hand*, 1837, and two years later set up a printing establishment at Bath. His main object became the teaching and development of his phonographic system of shorthand, which met with extraordinary success. The *Phonetic Journal*, afterwards known as *Pitman's Journal*, was begun in 1842. He was knighted in 1891. He died at Bath, Jan. 12, 1897.

Pitt William, British statesman. Born May 28, 1759, second son of the Earl of Chatham, he took his degree at Cambridge 1777, and was called to the bar in 1780. Elected MP for Appleby, 1781, he was made Chancellor of the Exchequer by Shelburne, July, 1782, but the government fell in the following February. In Dec., 1783, North and Fox's coalition came to an end and Pitt formed a government in which he had to face the opposition of a large parliamentary majority. In 1784 he returned to power, and introduced a number of financial reforms, reorganising the East India Co., and doing away with many sinecures in the Customs Service. He established the sinking fund in 1786.

The outbreak of the French Revolution made many difficulties, and in 1793 Britain went to war with France, Pitt being Minister of War. He suppressed the Irish Rebellion of 1789 and effected the union of the two parliaments by the Act of 1800. He had intended to include a measure for Catholic emancipation, but, owing to the opposition of the king, abandoned this and resigned office early in 1801. He returned in 1804 when fear of a Napoleonic invasion brought him support from all parties. Hearing the tidings of Napoleon's success at Austerlitz, Pitt, then in poor health, returned from Bath to London where he died on Jan. 23, 1806.

Pittenweem Seaport town and burgh of Fife-shire, on the Firth of Forth, 9 m from St Andrews. The industries are fishing and the curing of fish. Pop (1930) 1619.

Pittsburg City of Pennsylvania, U.S.A., situated at the point where the Monongahela and Alleghany rivers join to form the Ohio River. On a number of railway lines (Pennsylvania, Baltimore and Ohio, etc.), Pittsburg is one of the chief iron and steel working districts of the world. Other industries include the manufacture of

locomotives, rails, piping machinery and apparatus, tinplates, bricks, glass, cement and chemicals. Andrew Carnegie came here in 1848 and set up iron and steel works. He founded the Carnegie Institute for technical education in 1900. The city has three broadcasting stations (48.86, 25.25 and 19.72 M). Pop (1930) 669,817.

Pityriasis Name of various scaling skin affections. *Pityriasis alba* is commonly known as dandruff. *P. rosea* attacks the trunk and upper parts of lower limbs, where pinkish spots develop. These shed greasy scales from the edges. *P. versicolor* is a parasitic disease, due to a fungus, the patches being irregular and brownish. A more serious disease, often fatal, is *P. rubra*. There is a widespread redness, and large papor-like scales are shed.

Pius Name borne by a number of Popes. Pius X., born June 2, 1835, was pontiff from 1903 until his death on Aug. 20, 1914. He had to deal with the situation created by the separation of Church and State in France by Briand. He also adopted strenuous measures against the modernists.

Pius XI., born May 31, 1857, was chosen pope in 1922, on the death of Benedito XV. The notable achievement of his pontificate was the ending of the anomalous condition between state and church existing since 1870, and the re-establishment of the temporal power of the papacy in 1929, which involved the creation of the Vatican City as a state ruled by the pontiff. An enthusiastic mountaineer in earlier years, his *Climbs on Alpine Peaks* appeared in 1923.

Pizarro Francisco, Spanish conqueror of Peru. Born at Trujillo, Estremadura, c. 1478, he entered the Spanish Army and saw service in Italy. He made a voyage of exploration to America and was with Balboa when the latter discovered the Pacific (1513). The conquest of Mexico (1520) aroused in Pizarro the desire to secure Peru. He made a voyage there in 1526, but had insufficient forces to attempt a settlement, and it was not till six years later that Pizarro, Almagro, and 183 men landed at Tumbes. By an act of treachery he captured and executed Atahualpa, and set up Manco as ruler. Cuzco was taken in 1533 and on Jan. 6, 1535, Pizarro founded the city of Lima as the new capital. Almagro conquered Chilo, while Pizarro retained control of the N. part of the territory. In 1537 Almagro came to the relief of Cuzco, then besieged by an Indian army, and the revolt was suppressed. Later, war broke out between the two factions and Almagro was defeated and executed by the Pizarrists. In 1538 Pizarro himself was assassinated on June 26, 1541, at Lima by the Almagrists.

Placer Term used in mining for alluvial deposits containing gold and tin ores, as well as rarer metals, and consisting of sands, grits and fine to coarse gravels. They represent generally river and lake deposits of recent geological formation, but in Anstralia and California the placers or "deep leads" are ancient river beds buried beneath basalt.

Plague Term formerly embracing various epidemic diseases, now restricted to a malignant fever whose specific cause, *Bacillus pestis*, was identified, 1894. Epidemics occurred during the Roman Empire in mediæval Europe, notably in the 14th century Black Death, and in modern times in Hong Kong, Australia, India, Russia and elsewhere. Three

fourths of all plague cases are hnbonic, the remainder are septicaemic, without localised glandular swellings, or pneumatic, with cough and dark expectoration. Mortality is high, especially among Orientals. No specific remedy is known. Haffkine's anti plague serum has had some success. See GREAT PLAGUE.

Plaice Marine food fish of the flatfish family (*Pleuronectes platessa*), inhabiting N. European waters, from Iceland to S. of Britain. Allied to the dab and flounder (*qv*), but orange spotted, it may attain 8 10 lb., measuring 30 in. or more, but mostly marketed at half that size. Unlike the turbot, its two eyes occupy the same transverse line.

Plaistow District of London. Between Canning Town and West Ham, 4½ m. from London (Fenchurch Street), on the L.N.E. and L.M.S. Rlys., it houses a number of factories, chemical works and engineering establishments. Pop. 35,900.

Plane Genus of large trees (*Platanus*), constituting an order allied to the walnut, natives of N. temperate regions. They have large deciduous palm-shaped leaves and smooth, whitish bark, scaling off annually in patches, the fruits being small, long stalked spiky balls. The oriental plane was introduced into India from England. The western plane or American plane, *P. acerifolia*, is a hybridised derivative from both. Its timber is valued for cabinet work.

Plane Term used in geometry for any perfectly level surface—that is, one upon which a straight line joining any two points will lie entirely on the surface. In aerodynamics the term is applied to the plane or curved structures acting as wings and tail of an aeroplane for purposes of flight.

Planet Name given to one of the bodies in the solar system that revolve round the sun in elliptical orbits. The four planets, Mercury, Venus, Earth and Mars are nearest to the sun and are often termed the inner planets. Beyond Mars lies the belt of Asteroids and the outer planets, Jupiter, Saturn, Uranus and Neptune. Uranus, formerly known as Herschel, was discovered in 1781, and certain irregularities in this planet's movements led to the further discovery of Neptune in 1846. The presence of a still more remote planet was suspected, and in Jan., 1930, its existence was confirmed, and to this outermost member of the Solar System the name Pluto was given.

Planimeter Instrument for measuring the area of a plane figure and usually consisting of two hinged rods, the end of one of which is fixed, while the end of the other moves freely, tracing the boundaries of the figure to be measured. The difference between the readings of a small graduated wheel attached to the tracing arm before and after the tracing gives a number proportional to the area.

Plankton Biological name for the floating animal and plant life of the sea, also of rivers and lakes. Those organisms are for the most part microscopic, and their immense numbers in many instances give a green or reddish tint to the water. The plankton forms the food of many fishes and other marine animals. As part of the food of the cod it is the origin of the vitamins A and D contained in its liver.

Plant General term for vegetable organisms from the simplest unicellular type to the highly complex herb or tree. In structure and form there is the greatest diversity, for while in the lower types the plant body is but little differentiated, in the flowering plants there is a well-defined root, stem, leaf and flower. Plants feed upon simple inorganic materials and are essentially passive and anabolic organisms. Reproduction ranges from simple fission in bacteria and budding in yeast to the complex sexual process seen in the floral mechanism of the higher plants.

Plantagenet Surname applied to the Angevin Kings of England. The house included Henry II, Richard I, John, Henry III, Edward I, Edward II, Edward III, Richard II, Henry IV, Henry V, Henry VI, Edward IV, Edward V and Richard III. At the death of Richard II the house of Plantagenet became divided into the two branches of Lancaster and York, so that the line may be regarded as ending with the death of Richard II in 1399. The name is derived from the *planta genista*, or broom plant, the badge of the house.

Plantain Name denoting various broad leaved plants. *Plantago* is a genus of herbs, mostly noxious weeds with inconspicuous flowers, distributed over all temperate regions. There are five British species, the fruit-spikes of the waybread or greater plantain being a favourite bird food, the lamb's tongue is a lawn pest. Water plantain, *Aghma plantago*, grows in marshland. See BANANA.

Plantain Lily Genus of perennial herbs of the lily order, (*Funkia*) of Japanese origin. The roots form a bundle of tubers from which emerge large oval or heart shaped leaves parallel veined, sometimes white striped. The flower-stems bear spikes of white or lilac bell shaped flowers.

Plassey Village of Bengal. It is about 90 m. N. of Calcutta, and was the scene of a battle between the Nawab of Bengal, Suraj ud Dowlah and Clive, June 23, 1757. The Nawab's army consisted of 18,000 cavalry and 35,000 foot with 50 guns. Clive's numerically weak forces included 1000 whites and 2100 sepoy with 10 guns. The complete defeat of Suraj ud-Dowlah secured Bengal for the British.

Plaster Cementing material used for making casts of objects and for covering walls and other parts of buildings with a protective and binding layer. For internal walls, ceilings, mouldings etc., plaster of Paris and various modifications, such as Parian and Keene's cements are used, the aim being to obtain a plaster whose setting is slow enough to be easily worked and which will take paint quickly. For external work Portland Cement, mixed with sharp, clean sand, is used as a covering for brickwork, etc.

The Plasterers' Company is one of the City of London Livery Companies.

Plaster of Paris Form of cement composed of calcined gypsum or sulphate of lime. Plaster of Paris receives its name from the abundant deposits at Montmartre near Paris. The gypsum, when burnt at a moderate temperature, yields up about three-fourths of its combined water and when reduced to a fine powder, forms a cement which, on the addition of water to make a paste, rapidly sets or solidifies. It is used for casts and plastering.

Plateau Term applied to a tableland or elevated area of more or less level surface. Some are old plains of erosion that have been uplifted by earth movements, others have as their foundation an eroded plain, submerged and covered with stratified sediments, followed by re-elevation, and termed a plateau of accumulation. In England the Pennine Chain is an example of a plateau with uprising peaks and deep river valleys.

Platinum Metallic element, having the symbol Pt, atomic weight 195.23 and melting point 1775°C. Platinum is a silvery white metal having great ductility and malleability, and is unaffected by moisture, air and ordinary acids. In the ornate state platinum is found as a natural alloy with palladium, osmium, iridium and other rare metals in the form of small, flattened grains in alluvial deposits, chiefly in the Ural Mts., but also in Canada, South Africa and New South Wales. It is used for making crucibles and chemical apparatus, parts of balances, electrical appliances and jewellery. Its salts also are employed in many industrial processes.

Plato Greek philosopher. Born in Athens 427 B.C., he had political ambitions but came under the influence of Socrates (q.v.) and about 387 founded the Academy, an institute for the study of philosophy, remaining in Athens except for two visits to Syracuse in 367 and 361 B.C. Perhaps the greatest of all philosophical writers, his works have come down to us in the form of dramatic dialogues in which the chief speaker is Socrates, into whose mouth Plato put theories developed after the former's death. Of these dialogues, thirty-five remain, the most important being the *Gorgias*, the *Protagoras*, the *Phaedo*, the *Symposium*, the *Lysis* and the *Republic*, in which last Plato anticipated much of the most modern political and sociological theory.

Plato was the first philosopher to formulate satisfactorily the principles of ethics. His philosophy is definitely social, and according to him justice and the good can only be completely attained in the social sphere, in which alone the life of the individual finds its true expression. His philosophy was the source of that great body of thought which became known as Platonism, and, through the medium of the neo-platonic philosophers such as Plotinus (q.v.), profoundly influenced Christian thought.

Platoon Division of a company of infantry. In the British Army there are four to a company of infantry. The platoon is commanded by a 1st or 2nd lieutenant and numbers about 60 men. The name comes from the French *peloton*, small body of men.

Platypus Genus name given in 1799 to the egg-laying water-mole of Australia and Tasmania. It was changed in 1860 to *Ornithorhynchus* (q.v.), but is popularly called "the duck-billed platypus." See DUCKBILL.

Plautus Titus Maccius Roman comic poet. Born about 251 B.C., he wrote plays while employed by a baker, and is said to have been responsible for 130 comedies, of which 20 are extant. They are masterly adaptations from Greek originals, the action rapid, humour keen and shrewd and the characters lifelike. Among later writers indebted to Plautus must be mentioned Shakespeare, Molière, Addison and Dryden. He died 184 B.C.

Playfair Sir Nigel British actor and producer. He was born July 1, 1874, and after taking his degree at Oxford he became an actor and played with Benson, Tree and others. As lessee and manager of the Lyric Theatre, Hammersmith, he has produced a number of successful plays, notably *The Beggar's Opera*. He wrote (1925) *The Story of the Lyric Theatre*, *Riverside Nights* (with A. P. Herbert), *Hammersmith Hoy*, 1930. Knighted in 1928, he died on Aug. 19, 1934.

Pleasley Village of Dorsetshire and Nottinghamshire, 3 m. from Mansfield, on the River Meden. It is served by the L.M.S. and L.N.E. Rlys. There are silk and cotton mills and coal mines in the vicinity. Pop. 2510.

Plebeian In ancient Rome a member of the plebs or common people. Originally the inferior citizens descended from subject peoples transplanted to Rome and including freed and fugitive slaves, resident aliens and others, the plebeians had none of the privileges of the patricians, the descendants of the original settlers and the ruling order. In 494 B.C. they secured the right to elect tribunes. When the decemvirate was set up in 451 three plebeians became decemvirs, and later plebeians gained access to the higher offices, including that of consul (q.v.).

Plebiscite In ancient Rome, a law passed by the plebeians assembled in *comitia, tributa* or tribes. In present-day usage a vote of the whole electorate taken on a distinct issue. The Treaty of Versailles (1919) provided that a plebiscite was to be taken in areas of mixed population to decide frontier questions, nationality, etc.

Pleiades Conspicuous group of stars in the shoulder of the constellation of Taurus, the Bull. The Pleiades form an open cluster of over 2000 stars, of which six or seven are easily visible to the naked eye. They are named after the seven daughters of Atlas and Pleione who, in Greek mythology, were placed among the stars.

Pleistocene Geologists' name for the older formations of the Quaternary or Post-Tertiary system of sedimentary rocks resting on the Pliocene (q.v.) and succeeded by the Recent, those now under deposition. Synchronising with the Glacial or Ice Age, they contain the palaeolithic or older stone-age remains of primeval man, the neolithic being post-glacial.

Pleonaste Variety of the gemstone, spinel. It is an aluminate of magnesia, and contains iron in addition. It occurs as dark-green or black octahedral crystals of a higher specific gravity than typical spinel and as a constituent of garnet-bearing gneisses and other metamorphic rocks. It is also called ceylonite.

Plesiosaurus Genus of extinct paddle-bearing lizards, found fossil in Mesozoic rocks, especially Upper Triassic and Liasic. Small-headed, large-mouthed, with slender-pointed teeth adapted for fish-catching; they were long-necked, with relatively short bodies and tails. Some members of the family were 45 ft. long. Their four approximately-equal paddles facilitated life in the open sea.

Pleurisy Inflammation of the pleura of serous membrane investing the lung and lining the chest. Occurring oftener in an acute than a chronic form it may be dry or fibrinous, the result of exposure or an

accompaniment of other lung-diseases. There are pains in the side, dry cough and friction sounds like creaking leather, it usually yields to careful treatment. Sometimes there is effusion of fluid into the pleural cavity, which may necessitate withdrawal by an aspirator.

Plimsoll Samuel British politician. Born at Bristol, Feb. 10, 1824, he was a clerk at Sheffield and came to London in 1853, commencing business as a coal merchant. In 1868 he became M.P. for Derby and on debarred to end the evils caused by the use of overloaded and unseaworthy ships. The Merchant Shipping Act, in 1876, made compulsory the affixing to a British-owned merchant vessel of a maximum load line, the Plimsoll Mark, and gave power to the authorities to detain a ship which did not comply. The mark is a circle crossed by a horizontal line. Plimsoll resigned his seat in 1880 and died June 3, 1898.

Plinth Architectural term for the projecting base of a wall, or the square base of a column. In mediaeval buildings the plinth may be simply chamfered or in others richly moulded, and in buildings of the perpendicular style in England it is panelled to give vertically. In later architecture it is usually plain.

Pliny Roman writer. His full name was Gaius Plinius Secundus, and he is known as the older to distinguish him from his nephew (see below). Born c. A.D. 23, after serving in Germany he was made procurator in Spain (87). He was appointed commander of the fleet at Misenum by Vespasian, and succeeded, in A.D. 79, to the suffocating vapours from the eruption of Vesuvius which buried Herculaneum and Pompeii. An indefatigable student, his *Natural History* deals also with such arts as sculpture, painting etc. He is said to have read 2000 works in compiling this treatise of 37 books.

Pliny the Younger was a Roman writer. His full name was Gaius Plinius Caecilius Secundus. Born in A.D. 62 he was nephew and adopted son of Pliny the Elder, and in A.D. 80 began to practise as a pleader in the courts. He became in turn senator, military tribune, quaestor, tribune and praetor. Trajan made him consul and later governor of Bithynia. He wrote a panegyric on the Emperor Trajan and also ten books of *Letters*, one containing his official correspondence with Trajan. He died about A.D. 113.

Pliocene Geologists' name for the uppermost formations of the Tertiary system of sedimentary rocks resting on the Miocene, and succeeded by the Pleistocene (q.v.). Most developed in the Mediterranean region and adjacent land northward, they occur in Britain mainly in the Coralline, Red, Norwich, Chillesford and Weybourne Crags and the Cromer Forest bed.

Plotinus Founder of the Neo Platonist School of Philosophy. He was born in Egypt, probably of Roman descent, about the year A.D. 203, and studied Indian and Persian philosophy in the East. His theories are Platonic in their origin but they suggest (in contrast to those of Plato himself) rather a way of mystical escape from the concrete world, than a fulfilment of what is best in it. He died A.D. 270.

Plough Agricultural implement used for turning over the soil thereby loosening and pulverising it, and exposing the new surface to the air in preparation for

sowing seed. It is one of the oldest implements used for tillage, the earliest forms being of wood and simple in character. The modern plough consists of a beam to which is attached a coulter or iron knife blade for cutting the soil, a ploughshare with sharp point and projecting edge, a mould board for raising and turning over the soil and handles or stilt. The hand or animal driven plough is supplemented now by the steam and oil tractor ploughs for large areas.

Plover Widely distributed family of wading birds. British species include the golden plover, 11 in long with its blotched pear-shaped eggs, 2 in long, laid four in a nest. The Kentish, 6½ in long, and ringed, 7½ in long, also come to breed. The grey plover, 12 in long, breeding in Siberia, is a common winter visitor in East Anglia. See LARKING, OYSTER-CATCHER.

Plum Fruit of the cultivated plum tree. Derived from one or more species of *Prunus* of the rose order, the main European varieties originated from the wild plum, *P. domestica*, including the victoria, magnum bonum and greengage. A Japanese species furnished not only Japanese and Californian but also S. African varieties, which withstand transportation to London better than the European stock. N. American species have also influenced the cultivated strains, which are grown as standard trees in orchards or trained to walls. See DAMSON, GREENGAGE, PRUNE.

Plumbago One of the alternative names for graphite, a form of impure carbon occurring as a soft black mineral and used for making pencils, polishes, lubricants, etc.

Plumber One who works in lead especially in connection with fittings in buildings for the gas and water supply and also sanitary and sewage work. Usually plumbing is associated with general sanitary and domestic engineering, including the laying of lead roofing and guttering, the fitting of ventilating appliances, baths and bath heating apparatus, water softening plant, etc. Instruction in the various branches is given at technical classes. The Plumbers' Company is one of the smaller livery companies of the city of London.

Plumer Herbert Charles Onslow, 1st Viscount. British field marshal. Born Mar. 13, 1857, he joined the army in 1876, saw service in the Sudan and S. Africa, and from 1902-14 held various posts becoming Quartermaster General and member of the Army Council. In 1916 he was given command of the 5th Army Corps, and, later, the 2nd Army. In Nov. 1917 he went to Italy in command of the British forces sent to that field, returning to the western front and the 2nd Army again after five months. From 1919-25 he was Governor of Malta, and from 1925-1928 High Commissioner for Transjordan, retiring in Aug. 1928, 1906, he was made a field marshal and a peer in 1919, taking the title of Baron Plumer of Messines. In 1929 he was made a viscount. He died July 16, 1932.

Plumstead District of London, 10½ m. from Charing Cross (S. Ry.). It forms part of the borough of Woolwich, Kent. Pop. 25,800.

Plunkett Sir Horace Curzon. Irish statesman. Youngest son of 16th Baron Dunsany, he was born Oct. 24,

1864 He represented Co Dublin S in Parliament, 1892-1900, founded the Irish Agricultural Organisation Society and established the Agricultural Co operative Movement From 1899-1907 he was Vice-President of the Dept of Agriculture for Ireland In 1917 he was chosen President of the Irish Convention He died Mar 26, 1932

Plural Voting System allowing a person to cast more than one vote in an election, e.g., in virtue of different qualifications, residential and business For parliamentary elections in Gt. Britain a person may not have more than two votes, and these must be given in two constituencies

Plutarch Greek biographer He was born about A.D. 48, at Chaeronea in Boeotia, and after travels in Greece and Egypt opened a school at Rome He is notable for his parallel biographies of eminent Greeks and Romans Disposed in pairs, the characters of the subjects being compared, this collection has great historical value His other writings are grouped under the title *Opera Moralia* He died c. A.D. 122

Pluto Greek God of the lower regions Pluto is the Roman name, the Greek being Hades Brother of Jupiter and Neptune, he was the ruler of the infernal regions, and had dominion over the products of the earth He carried off Proserpine (Persephone) and made her his queen

The discovery of a new planet, later named Pluto, was announced by the Lowell Observatory, Flagstaff, Arizona, in March, 1930

Plymouth City and seaport of Devon On Plymouth Sound, at the mouth of the River Plym, it is 247 m from London on the G.W. and S. Rlys. A port of departure for shipping going to America, Australia, S. Africa and the East, Plymouth is an important mail station and the waters of Cattewater, Mill Bay, Sutton Pool and the Hamoaze accommodate many vessels. Here too is an extensive fishing industry On Plymouth Hoe, overlooking the Sound are the Citadel, a statue of Drake, and a monument to Smeaton, actually part of the old Eddystone lighthouse, which he built Pop (1931) 208,166

The city, which includes the towns of Stonehouse and Devonport (q.v.), gives its name to an earldom Robert Grey Windsor-Clive (d. 1923) was made earl in 1905, but the title was borne from 1680-1843 by another family, that of Hickman Windsor The present earl, Ivor Miles Windsor-Clive was born in 1888 His heir bears the title Viscount Windsor

Plymouth China is a hard paste biscuit ware, and was made by Wm Cookworthy (1768-74)

Plymouth Seaport and town of Massachusetts, U.S.A. It is 37 m. by rail S.E. of Boston, on a branch of Massachusetts Bay Here the Pilgrim Fathers landed from the *Mayflower* in 1620 The landing place is marked by a granite rock over which is a granite canopy A monument to the pilgrims is on a hill above Pop 13,000

Plymouth Brethren Evangelical Christian community formed by John Nelson Darby at Plymouth in 1830 Abandoning an Anglican career, he associated in Dublin with certain persons calling themselves "Brethren," who met regularly for public worship Removing to Plymouth he established there and in other places, including Switzerland, similar self-contained communities, who commemorate the

Lord's Supper every Sunday, while rejecting all ecclesiastical organisation and ordained ministry They number about 80,000 in Great Britain, besides others in Europe, Canada and U.S.A.

Plympton Market town of Devon. It is 5 m from Plymouth, on the G.W. Rly., and stands on the River Plym Sir Joshua Reynolds was born here

Plynlimmon Welsh mountain. It is 10 m W of Llanidloes, on the borders of Montgomeryshire and Cardiganshire, and is 2465 ft in height Here are the sources of the Wyvo and Severn, and of the Llynant and the Rhedol

Plywood Name given to thin boards made of layers of wood, usually three in number, and cemented or glued together under pressure, the grain of the middle layer being placed at right angles to that of the outer layers Plywood is light and has the advantage of being less liable to warp or split than ordinary boards It is used in aeroplane construction and box manufacture, also for furniture and as panels for walls and ceilings

Pneumatic Appliances

Type of appliances in which the power is supplied by compressed air They are used for various percussive purposes such as hammers and drills, also for working hoists, and in modern paint work as a spraying device Pneumatic rock drills are used in mining operations and are provided with devices for turning the drill around as it works and for adapting the blows to the increasing depth of the hole Pointing of large surfaces, especially with cellulose paints, is effectively achieved with a pneumatic apparatus, delivering the paint in the form of an evenly distributed fine spray

Pneumonia Inflammation of the substance of the lung Three forms occur Acute lobar or croupous pneumonia, commonly called congestion of the lungs, is usually caused by a specific micro-organism, *Diplococcus pneumoniae* Congestion of the blood-vessels is followed by a solidified condition resembling liver tissue, called red and grey hepatization, simulating red and grey granite respectively Generally the air-vesicles, by eliminating their morbid contents, quickly resume their normal action Lobular or broncho pneumonia, diffused through the smaller tubes and vesicles, sometimes chronic, is fatal to the young and aged Chronic interstitial pneumonia or cirrhosis of the lung closely resembles the symptoms of tuberculosis See PHTHISIS

Po Longest river in Italy It rises in Monte Vige as a mountain torrent, and flows into the Adriatic, 300 m away It receives all the waters flowing northwards from the Apennines and southwards from the Alps and Lake Garda

Pocahontas Daughter of an American Indian chief, Powhattan, who was the ruler of the tribes of Virginia Born about 1595 she is said to have interceded for the life of Capt. John Smith, when he was captured by her father Later she was taken as a hostage and brought to Jamestown She became a Christian and married John Rolfe a settler She came to England in 1616, and died at Gravesend, 1617

Pocklington Urban district and market town of Yorkshire (E.R.) It is 13 m from York, on the

L.N.E. Rly The industries include the making of agricultural implements, milling and brewing. Pop. (1931) 2640.

Pod Dry seed vessel developed from a single carpel which, when the seeds ripen, usually splits along both edges. Technically a legume, it characterises leguminous plants, e.g., pea, furze. The name popularly denotes also the elongated siliqua or shortened silicle developed from two united carpels with transverse septum characterising cruciferous plants, e.g., cabbage, honesty.

Poe Edgar Allan, American author and poet. He was born at Boston on Jan. 19, 1800 and was adopted at an early age by John Allan. He published *Tamerlane* (poems) in 1827. He wrote for Baltimore Journals and later became editor of the *Southern Literary Messenger*, going to live in Richmond. Other volumes of poems appeared in 1820 and 1831. With *The MS. Found in a Bottle* (1833) he won a prize given by the Baltimore *Saturday Visitor*. Poe excelled in creating an atmosphere of mystery and horror, as in such tales as *The Pit and the Pendulum*, *The Masque of the Red Death*, *The Murders in the Rue Morgue* and *The Fall of the House of Usher*. Among his best-known poems are *The Raven*, *The Bells*, and *Annabel Lee*. He died on Oct. 7, 1849.

Poet Laureate Office of crowned poet, or poet at the Court. The Greeks and Romans used to crown poets with laurel, as Petrarch was thus crowned at Rome in 1374. Though Chaucer and later Skelton styled themselves poet laureate the office really commenced with the giving of a pension of 100 marks to Ben Jonson by James I. Charles I. made the pension £100 and added a tierce of Canary. When Southey was made laureate a money payment was made in lieu of the wine. In modern times the laureateship has been held by Wordsworth, Tennyson, Robert Bridges and John Masefield (1930).

Poetry Form of literary expression, clothed in emotional rhythmical and often symbolical language. Rhyme is not essential, for blank verse has been the vehicle of much of the grandest poetry in all languages. Poetic form varies with fashion. It may be alliteration, assonance, rhymed couplets or the irregular type known as *vers libre*, but all true poetry should appeal both to the mind and the ear. Rules governing metre, accent and similar details come under the heading of prosody. See **LYRIC**, **ODE**.

Pogrom Term used in English newspaper reports in describing attacks upon the Jews in Russia instigated by the authorities (1905-06). It has since been applied to any similar organised attacks on Jewish communities. It is derived from a Russian word meaning "devastation".

Poilu Name given to a French private soldier. The word means "hairy" and, originally applied to a recruit, was used commonly during the Great War for soldiers in the trenches when many were obliged to let their beards grow. The term thus came into general use to denote a common soldier in the French army.

Poincaré Raymond Nicolas Landry, French statesman. Born Aug. 20, 1860, he became a barrister. He entered the Chamber of Deputies, 1887, was Finance Minister, 1894-95 and 1906, and became Premier and Minister of Foreign Affairs in 1912, resigning on his election as President of

the Republic, Jan. 17, 1913. His term of office ended in 1920. In Jan., 1922 he became Premier in succession to Briand, holding this post and also that of Foreign Minister until the election of May, 1924, when he was defeated and resigned. He formed a ministry again in 1926, and was also Finance Minister at the time. He brought about the stabilisation of the franc (June, 1928). Poincaré resigned the premiership, July, 1929. He died in 1934.

Point In mediaeval music, a dot affecting note duration. Known as points of augmentation division perfection and alteration, points fulfilled the functions of modern dots and barlines. Point also denoted a mediaeval note and also a place of dramatic or contrapuntal interest in a composition.

An organ-point is a succession of harmonies progressing over a pedal bass note, also the chord introducing a concerto's *cadenza*.

Pointer Breed of sporting dog. Introduced from 17th century Spain, and improved by foxhound and greyhound crossing, the English pointer is close haired, 24 in. high, and usually parti-coloured such as liver and white but sometimes all liver-coloured or black. It hunts by body scent, and when it scents game stands stiffly with muzzle and tail outstretched, usually with one foot raised.

Point-to-Point Type of steeplechase for hunters, usually over a course of three or four miles. Originally these races were run over a straight course, i.e., from one point to another across country.

Poison Substance which tends to destroy life or impair life when introduced into the body either through the mouth and stomach or by being absorbed into the blood. Poisons may be classified as corrosive, irritant and neurotic, the first named being the mineral acids, alkalies, and salts such as corrosive sublimate. The irritant poisons cause inflammation of the parts and include metallic substances such as arsenic, also various animal and vegetable poisons. Neurotic poisons affect the nervous system and include the narcotics such as morphia, also strychnine, belladonna, alcohol etc. Many of these poisons are scheduled under the Poisons Acts and their sale regulated in various ways.

TREATMENT FOR POISONING In all cases of poisoning immediate action is absolutely necessary, and in many cases the only hope of saving life. A doctor must be called at once, but until he comes the amateur can follow certain broad lines of conduct. If the poisoning is from food, or from poisonous plants or from prussic acid, encourage the patient to be sick. A tablespoonful of mustard or 2 tablespoonfuls of salt in a glass of warm water is a good emetic. In the case of prussic acid, give a very strong mustard emetic at once. After vomiting, give strong tea or black coffee.

If the lips and mouth of the patient are stained or burned (denoting a corrosive poison) it is harmful to give an emetic. Strong tea is the safest antidote.

If sleepy always keep the patient awake, if necessary, by walking him about or slapping his face and chest. If he has collapsed he must be kept warm, and give him a teaspoonful of sal volatile in a little water if he can swallow. If breathing ceases, artificial respiration must be adopted (see under **DROWNING**).

If the throat is swollen so that the patient cannot breathe apply hot cloths, and as soon as he can swallow give drinks of cold tea or coffee.

If the poison is known to be an acid such as nitric, oxalic, or sulphuric, salts of lemon, carbolic, etc., rinse the mouth out with an alkali and give drinks of it. Lime-water or magnesia is good, or, failing these, chalk and water, whitening and water, or even plaster from the ceiling.

If the poison is an alkali such as ammonia or caustic soda, use an acid preparation (vinegar or lemon juice and water, equal parts)

Poitiers Town of W France. Founded in pre-Roman times, it fell to the Franks in 507, when Clovis defeated the Visigoths under Alaric II. Near here Charles Martel defeated the Mohammedans in 732. After the Battle of Poitiers in 1356 (see below) the town became an English possession till retaken in 1373. The town has some Roman remains, a fine cathedral, containing some stained glass of the 12th and 13th centuries, the church of St Jean, the oldest Christian monument in the country, and other very ancient churches. It has a university. Its trade, apart from wine, is mainly agricultural, and its industries include printing and the manufacture of brushes, hosiery, etc.

Poitiers Battle of Fought Sept. 19, 1356, between Edward the Black Prince and the French under King John II. The English forces numbered about 8000 and the French 15,000. The battle resulted in a decisive victory for the Black Prince, the French King being taken prisoner and brought captive to England.

Poker Card game played for money stakes. Introduced into America from France via New Orleans about 1830, it became the now prevalent draw poker, using 52 cards, about 1860. Each player, 2 to 7, received five cards, the game goes to the best hand.

Poker-Work Form of decorative art, effected by burning a design on wood, leather, velvet and other materials with a heated metallic point. First accomplished with a red-hot "poker," e.g., the pyrographic drawings on lime-tree and other woods by John Cranch (1751-1823), it is now done with needles heated in spirit lamps.

Pola Town and seaport of Italy. It is on the peninsula of Istria, 56 m S of Trieste. There are two harbours, naval and commercial. Prior to the fall of the empire, Pola was the chief naval station of Austria-Hungary, and an Austrian fleet was blockaded here by the Italians, who occupied the town late in 1918. Together with Istria, it became a part of Italy by the Treaty of Versailles (1919). There is a cathedral (15th century), a castle (Venetian), and the Roman Amphitheatre and Temple of Augustus. Pop (1931) 55,559.

Poland Republic of Eastern Europe, created under the Treaty of Versailles 1919. It has an area of about 149,960 sq m and a pop of 31,927,773 (1931). Bounded by the Baltic, East Prussia, Lithuania and Latvia on the N, White Russia and Ukraine on the E, it joins Rumania and Czechoslovakia on the S and Germany on the W. It has a port at Gdynia and also uses Memel and Danzig. The capital is Warsaw. There are extensive forests, and important mineral deposits including coal, petroleum, iron and zinc. There are large salt mines, and potash is also found.

HISTORY Until 1772 Poland was an independent state, dated back to the 6th century by tradition, and with a recorded history

commencing with Mieczylaus I (964). The State had a turbulent history, being joined at different times with Hungary and Lithuania. Invasions by Wallachians, Turks and Russians occurred, and Charles Augustus of Sweden seized Poland in 1655. Sobieski (elected king 1674) is famous for his relief of Vienna, besieged by the Turks (1683). In the 18th century the State decayed. A confederation of patriots made a stand against Russia's encroachments in 1768. Four years later came the first partition, territory being annexed by Austria, Russia and Prussia, and later divisions (1793-95) took the remaining parts of Poland, Stanislaus, the last king, abdicating at Grodno in 1795. Napoleon set up a short-lived duchy of Warsaw, and there was another division of territory in 1814.

During the Great War, Poland was seized by Austria-German forces and independence proclaimed in 1916. Pilsudski, who had earlier invaded Russia with a Polish legion was a member of the Council of State. A Republic was proclaimed at Warsaw in 1918, and its independence confirmed by the Peace Treaty of 1919. Pilsudski became first president (resigning 1922) and Paderewski premier. Threatened by Russian invasion in 1921, the Soviet armies were repulsed and a favourable peace secured. Pilsudski died in May, 1935. Earlier in the year Poland's very democratic constitution was replaced by another, giving rather more power to the president.

Polarisation of Light Condition of radiant energy, most noticeable in light, in which some of its properties are different in different directions. Light may be polarised by reflection, at an angle which differs for different substances, or transmission, as through most crystals. Light thus treated will be reflected or transmitted most easily a second time for certain positions of the reflector or crystal, and not at all for positions at right angles to these. The plane of polarisation is rotated by passage of the polarised light through quartz, and by a magnetic field, this effect being also used to distinguish between certain sugars in solution.

Polarisation in a voltaic cell denotes the collection of gas on the surface of the negative electrode, diminishing the supply of current.

Polariscope Optical instrument used for showing the effect of various substances upon polarised light, and generally used as an attachment to the microscope for the study of the characters of thin sections of rocks and minerals. Its essential parts are the analyser and polariser, each consisting of a prism of Iceland spar bisected longitudinally in a plane through its obtuse angles and cemented together to form a "Nicol prism." The analyser is inserted above the object glass and the polariser beneath the microscope stage.

Polar Regions Term applied to those regions which surround the geographical poles and lie within the Arctic and Antarctic circles, 23½° from the poles. In these areas sunlight or darkness extend over 24 hours at a time. They are characterised by extreme cold and the prevalence of ice over both sea and land. The northern ice cap forms a plain at sea level over the Arctic Ocean except over the land surface. The southern ice cap covers an elevated land area. See ANTARCTIC, ARCTIC.

Pole In geography a term applied to the ends of the earth's axis,

the surface around the North Pole appearing to an imaginary observer above it to rotate anti-clockwise, while at the South Pole the direction is clockwise. The magnetic poles are the ends of the earth's axis regarded as a great magnet, and lie near the poles of rotation.

Pole In engineering a term applied to the ends of a magnet, these ends having the property of polarity or two-endedness. One of these, the North Pole, is north seeking, while the other, the South Pole, is south seeking, and the law of magnetic attraction is that unlike poles attract, like poles repel. See MAGNETIC POLES.

Pole Reginald English Cardinal and Archbishop of Canterbury. Born in 1600 at Stourton Castle, Staffs., he went to Oxford, and after entering the Church, spent some years in Italy. In England again, he opposed Henry VIII's divorce from Catherine of Aragon, and in 1532 left the country going to Padua. On the accession of Mary he was appointed papal legate, coming to England in 1564. Pole was made Archbishop of Canterbury in 1556. In 1557 he was recalled and charged with heresy, but died Nov. 17, 1558.

Polecat Carnivorous mammal of the weasel family (*Putorius putorius* or *P. foetidus*), native of Europe and found in Great Britain. A pouch under the tail contains a fetid smelly yellowish substance. It is 18 in. long, with 6 in. bushy tail, sharp nosed with small rounded ears and dark brown pelage, white marked round the head. It usually breeds in rabbit-burrows. Furriers call the fur stoat or stoatlet.

Pole Star Nearest conspicuous star to the N. pole in the sky. It is the 2nd magnitude star *alpha* in the "Little Bear" constellation. The hindmost wheels of Charles's Wain, the *alpha* and *beta* of the "Great Bear," are the pointers, a line through them prolonged $4\frac{1}{2}$ times northwards indicates its whereabouts $1\frac{1}{2}^\circ$ from the true pole.

Polesworth Village of Warwickshire, on the L.M.S. Rly. It is 4 m. from Tamworth, on the River Anker. It is the centre of a colliery district, and there are also quarries. Pop. 6280.

Police Non military force appointed to maintain law and order. In England, before the passing of Peel's Police Act of 1829, there was no organised body. Watchmen in the larger towns, and parish constables in rural districts were the sole persons charged with the duty of preventing crime and keeping order. Peel's measure applied only to the metropolitan area, but eventually similar bodies were formed in the towns and counties, and an Act of 1872 restricted the appointment of parish constables by the justices.

The Metropolitan Police are controlled by the Home Secretary and he has also certain powers over the borough and county police which are otherwise under the control of their respective councils. His department inspects them and exchequer grants are made towards the cost. In 1932 it was decided to take steps to amalgamate some of the smaller police forces with the larger ones. The City of London Police is governed by the Court of Common Council.

Police Court Court of summary jurisdiction. In London they are presided over by a stipendiary (paid) magistrate, as in certain other towns. Generally

however, it is Justices of the Peace (unpaid) who act as judges. Justices are appointed by the crown on the advice of the Lord Chancellor, stipendiaries on the petition of a municipal borough council to the Home Secretary. See MAGISTRATE.

Political Economy Science of the production and distribution of wealth. See ECONOMICS.

Polka Renowned dance of Bohemian origin. Introduced about 1840 it had a great vogue for some fifty or sixty years. The music is in two four time.

Poll Term denoting the voting or taking of votes at an election. It is applied also to the register of those entitled to vote. The place where the votes are recorded is called a polling booth. At company meetings (e.g. for the election of directors) a poll is taken the shareholders having votes proportional to the number of shares held. The word is old English for head. See POLL TAX.

Pollack Soft finned marine food fish of the cod genus (*Gadus pollachius*). Akin to the cod fish but without barbel, greenish with yellow markings, it is taken in the Channel and on Scottish and Irish coasts up to 25 ft. It is found throughout the N. Atlantic.

Pollen Fine dust, generally yellowish produced in the anthers of flowering plants. When mature it comprises separate grains of definite size and shape, usually single celled, and often ornamented. Each grain contains a male element whose union with the female element in an ovule originates the embryo constituting the seed.

Pollination Process of conveying pollen grains to the stigma of a flower, where by penetrating to the ovules in the ovary they effect their fertilisation. Self fertilisation occurs when a flower's pollen reaches its own stigma. Cross fertilisation, essential for one sexed flowers, occurs when pollen reaches the stigma of another flower of the same plant or the flower of another plant of the same species. The transporting agency is usually wind or an insect, humming birds and snails also serve.

Pollokshaws District of Glasgow, with which it was incorporated in 1912. It is an industrial district with iron foundries, cotton mills, etc.

Poll Tax Capitation tax levied on every head. In ancient Athens a poll tax was paid by resident aliens and others. The English Parliament of 1380, held at Northampton, imposed a poll tax, levied on all persons above the age of 15. It was the collection of this which led to Wat Tyler's rebellion of 1381. Charles II. imposed a capitation tax, all subjects being assessed by rank.

Pollux In Greek mythology the twin brother of Castor and a son of Zeus. He was skilled in boxing. The name is given to a star in the constellation of the Heavenly Twins.

Polo Ball game played on horseback long handled mallets being used. Of Persian origin the game has long been played in Eastern countries. In India it became popular among English officers and residents, and was brought to England by the former, a club being formed in London, 1872. The game is played on turf the ground being 300 yd. by 160 yd. The goals are 250 yd. apart, the posts (24 ft. apart) at least 10 ft. high. The ball

must not exceed $3\frac{1}{2}$ in in diameter and $5\frac{1}{2}$ oz in weight. Trained ponies are used. The governing body is the Hurlingham Club.

Polo Marco Italian traveller. He was born at Venice, about 1254. His father was a merchant, and in 1271 Marco accompanied him on a journey to the court of Kublai, and reached Shang in 1275. Marco was given a governorship by the Khan and sent on missions to India and China. In 1298 Marco was taken prisoner by the Genoese. During a captivity lasting until 1299 he compiled an account of his travels. He became a member of the Grand Council of Venice and died Jan. 9, 1324.

Polonaise (1) Stately ceremonial dance, usually in $\frac{3}{4}$ time, dating from Henry of Anjou's election to the Polish throne in 1573. Its rhythm was employed by Chopin and others. (2) Light-skirted bodice looped up at the sides, based upon Polish national costume, and worn at various periods after 1770.

Polperro Village of Cornwall, on the S coast, 13 m from Bodmin. It is a centre of the pilchard fishery.

Poltergeist German word, "racketing spirit," denoting the supposed agent of inexplicable noises in or about a house, e.g., movement of furniture and breakages of crockery. Widely distributed in time and space, often attributed to spiritistic agency, such phenomena are sometimes due to obvious trickery, sometimes elude all intelligible explanation. The lack of adequate motive, and the frequent association with the occurrences of a person of abnormal mental powers, puzzle inquirers. See COCK-LOVE.

Polyandry Plurality of husbands. Observable in mountainous, insular or desert regions, this social institution may occur in a fraternal form, a woman marrying two or more brothers, as among the Indian Todas and the agricultural population of Tibet.

Polyanthus Hardy perennial herb of the primrose order. Bearing an umbel of numerous flowers on a leafless stem, it is thought to have arisen from the crossing of the common primrose and the cowslip. Gardeners produce innumerable strains with handsome tints, red, orange, bronzo, blue and white, some are gold-laced. See NARCISSUS.

Polygamy Term properly denoting plurality of consorts, in contrast with monogamy. It is commonly synonymous with polygyny, "many women," whose antithesis is polyandry, "many husbands." In Christian communities if one party contracts more than one marriage the first only is valid. Polygamy is a recognised social institution in negro Africa, Australia and Melanesia. It was regulated among the early Semites passed into Aryan India and was retained by Mohammedanism. Mormon polygamy ceased in 1890.

Polygon Term used in plane geometry for a plane figure having more than four sides. A polygon is termed regular when it is both equilateral and equilateral. Regular polygons are named according to the number of sides from five to twelve, as follows: pentagon, hexagon, heptagon, octagon, nonagon, decagon, undecagon and duodecagon.

Polyhedron Term used in solid geometry applied to a solid body which is bounded by a number of planes

or faces. Those polyhedra in which the planes are regular, equal and similar are known as the five regular or Platonic solids, and comprise the tetrahedron, cube, octahedron, dodecahedron and icosahedron.

Polynesia Division of Oceania. It extends from lat. 30° N and S of the equator, and is bounded E and W by long. 135° . It includes the more easterly islands, viz., Fiji, Samoa, Hawaiian and Marquesas Islands, and those of the Society, Tuvalu, Phoenix, Tokelau, Hervey and Manahiki groups. The three first-named are the most important.

The so-called Polynesians comprise the aborigines of this region. They are brown-skinned and well developed with an average height of 5 ft. 8 in.

Polyphemus In Greek legend one of the Cyclopes, a son of Neptune. He is represented as a giant with a single eye. Odysseus and his comrades sought shelter in his cave, and some were eaten by the monster. Odysseus, however, gave him strong wine to drink, and when he fell into a deep sleep thereafter put out his eye and fled.

Polyphony Musical combination of various strands of melody, each individually interesting. The polyphonic school of music reached its climax in the 16th century music of Palestrina and his contemporaries, of whom William Byrd was the chief exponent in England.

Polyporus Large widely-distributed genus of fungi. Some of them form on living trees or timber hard and woody brackets, more or less semi-circular, some furnish native dresses, bread and tinder. The purging agaric, *P. officinalis*, formerly used in English pharmacy, is still used among N. American Indians as a purgative and styptic.

Polypus Stalked tumour attached to the surface of a mucous membrane. Usually pear shaped, it may be gelatinous, fibrous, vesicular or malignant, occurring in the nostrils, outer ears, larynx, rectum, bladder or uterus. If accessible from without it is readily removable by being twisted off.

Polytechnic School for affording practical training in arts and sciences. The first London institution of this kind, the Royal Polytechnic Institute, was opened in 1830, and continued, with a break of one year, 1859-60 until 1882. Its successor, the Regent St. Polytechnic, was opened in 1882 by Quintin Hogg (died 1903). There are other London Polytechnics at Clerkenwell, Chelsea, Woolwich, Battersea and Lewisham.

Polytheism Doctrine of a plurality of divine beings superior to man taking part in the government of the world. Conceived as possessing animal, human or superhuman forms and attributes they represent a system of worship observable in ancient civilisations and in modern India. See MONOTHEISM.

Pomegranate Tree of the loosestrife order (*Punica granatum*). It has long been naturalised in the Mediterranean and other sub-tropical regions. The flowers usually scarlet, form an apple-like fruit containing many pulp covered seeds, with a golden red rind containing an astringent principle used in pharmacy, dyeing and tanning.

Pomerania Province of Prussia, formerly a duchy. It has an area of 11,936 sq. m. and is bounded by the

shores of the Baltic, and landward by the territories of Poland and Mecklenburg-Schwerin. The islands of Rügen, Usedom and Wollin, off the coast, belong to Pomerania. The district is divided into the governments of Stettin, Stralsund and Koslin. The principal river is the Oder, with its tributaries, and there are many small lakes. Pop 1,878,781

Pomeranian Dog Breed of dog Called in Germany the Spitz, akin to the Eskimo and other Arctic breeds, it is strongly built, scaling 20 lb and more, long haired with sharply pointed muzzle, upright and pointed ears and thick, bushy, back-curved tail. In Britain it usually occurs in a dwarfed form as the "pom," weighing approximately 5 lb

Pomona (or Mainland) Island of the Orkneys, Scotland the largest of the group. It has an area of 150 sq m. The two inlets of Scapa Flow and Kirkwall Bay divide the island into a larger (W) and a smaller (E) portion, the latter much indented. The W part is chiefly moorland. There are two towns, Stromness and Kirkwall. Pop 14,000

Pompadour Jeanne Antoinette Poisson, Marquise de Favourite of Louis XV of France. Born in Paris on Dec 29, 1721, Louis met her in 1745, and made her his mistress installing her at Versailles. She had great influence over the king, and brought about the Alliance with Austria in the Seven Years' War because of her dislike for Frederick the Great. She had considerable talents and was the centre of a circle including such writers and artists as Voltaire and Greuze. She died on April 15, 1784

Pompeii Ancient ruined city of Italy. It is at the foot of Mt. Vesuvius, 13 m S.E. of Naples. In A.D. 63 a great part of the city was destroyed by an earthquake, and in A.D. 79 Pompeii was buried by a great eruption of the volcano. During the intervening centuries the covering of ashes preserved the city, with its temples, streets, market places, baths and private houses. The excavations of the ruins, which were begun in 1748, have greatly enriched our knowledge of ancient Roman life.

Pompey Gnaeus. Roman triumvir. He was born in 106 B.C., distinguished himself as a general before his 25th birthday and was consul in 70. In 67 he swept the pirates from the Mediterranean within 40 days, and his subsequent eastern campaign (66-63) resulted in a great extension of Roman sovereignty, but at its close the opposition of the Senate caused him to join the first Triumvirate with Caesar and Crassus. As Caesar's influence increased Pompey's declined and when the inevitable civil war broke out, Pompey was decisively defeated at Pharsalus (48) and afterwards murdered in Egypt.

Pondicherry City and seaport on the Coromandel coast, India, belonging to France. It is 100 m S of Madras, and is the capital of French East India. First colonised in 1674, the city was captured by Dutch and English, returning to France again in 1816. The area of the district is 115 sq m. Pop (1931) 43,499

Pondweed Genus of waterweeds of the grassy order (*Polymagelon*). They are aquatic herbs with leaves submerged and translucent or floating

and opaque. Of the numerous British species some have leaves 10 in across, others are threadlike. The allied sweet-scented Cape pondweed, *Oponogelon*, flowers freely during the winter in Great Britain.

Pontefract Borough and market town of Yorkshire (W.R.). It is 13 m S.E. of Leeds and stands near the junction of the Aire and Calder on the L.N.E. and L.M.S. Ryhs. There is a ruined castle, in which Richard II was murdered.

Pommet cakes (liquorice) are made here. Browning, iron founding, and tanning are the staple industries, and corn milling is carried on. Pop (1931) 19,053

Pontypool Urban district and market town of Monmouthshire, on the G.W. Ry. It is 8 m from Newport, with which town it is connected by a canal. Coal mining is an extensive industry, the town being on the S. Wales coal measures. Iron and tin plate are manufactured. Pop (1931) 6788

Pontypridd Urban district and market town of Glamorganshire. It is on the River Taff, 12 m from Cardiff, on the G.W. Ry. There are coal and iron mines and brass and iron foundries. Tin plate is also manufactured. Pop (1931) 42,737

Pony Small horse. Technically these range from 13 hands high down to 10 hands. They are called ponies, those from 13 to 13.3 hands high galloways, and those above them horses. In popular usage the dividing line between ponies and horses is 14 hands, on the N. American prairies hardy mustangs, broken in by Indians, are called ponies. The rough coated ponies bred in N.W. Europe, with luxuriant mane and forelock, are of the domesticated Celtic stock which drew the war chariots of ancient Britain, and have survived in Iceland, Shetland, Wales, and the New Forest.

Poodle Breed of dog. In France and Germany it is a sporting dog. Learning tricks readily, it has become a circus dog. Its coat, corded or curly, is clipped peculiarly on the hindquarters. Toy poodles, scaling 4.5 lb are in demand.

Poole Borough seaport and market town of Dorset. It is on a peninsula in Poole Harbour, 18 m E of Dorchester and 5 m from Bournemouth, on the S. Ry. Pottery is made from clay quarried locally, and other industries include fishing and the manufacture of farm implements. There are oyster beds in the harbour, which is 7 m long, is Brankssea Island. Pop (1931) 57,258

Poona Town of Bombay, India. The town is at the junction of the rivers Mula and Mutha, 120 m from Bombay. Pop (1931) 250,187

Poor Laws Local provision in Great Britain for the indigent dates from an enactment of Elizabeth, 1601 which authorised the building of poor houses, appointment of overseers, and the raising of a rate by a tax on householders. An important Act of 1834 reformed abuses and instituted poor law commissioners. A Poor Law Board was appointed in 1849. The duties were taken over in 1871 by local government boards, and in 1910 the Ministry of Health came into existence, and took over the administration of the poor laws. Another change came about in 1930, when boards of guardians were abolished and their functions taken over by the county and county borough councils.

Pope The Head of the Roman Catholic Church. The title is derived from word meaning father, and was used generally for bishops until 1073, when it became restricted to bishops of Rome. A new pope is elected on the death of the reigning pontiff, by the College of Cardinals. He has supreme authority in matters of faith, and his infallibility when speaking, *ex cathedra*, on matters of faith and morals was declared by a Vatican council in 1870. The same year witnessed the loss of the temporal power, the papal territories being absorbed in the Kingdom of Italy. In 1929 temporal power over a small territory (the Vatican State) was regained when Italy recognised the pontiff's sovereignty. See PAPACY, PIUS XI, VATICAN.

Pope Alexander Poet and satirist. Born in London, May 21, 1688, he early showed poetic talent. His *Essay on Criticism*, 1711, a didactic poem, and *The Rape of the Lock*, satirising contemporary society, published a year later, brought him fame at the early age of 24, and brought the poet into contact with other literary men of the time, including Addison and Swift. Pope translated Homer, which was completed in 1725. The *Essay on Man*, 1733, which has been called Pope's finest work, deals with the philosophy of Bolingbroke (1678-1761). Pope died at Twickenham, May 30, 1744.

Poperinghe Town of Belgium. In the midst of a hop-growing district, it stands on a tributary of the Yser, 6 m W of Ypres. It was taken by the Germans soon after the outbreak of the Great War, and occupied by the Allies in Oct. 1914. Bombarded at various times, it suffered during the German advance in April, 1918. The Church Institute, known as "Toe H" (Tahet House), was established here in 1916.

Poplar Genus of trees of the willow order (*Populus*). Their alternate, deciduous long stalked broadish leaves are usually preceded by the male and female flowers in separate catkins. The rapid growing soft wood timber is unimportant. Black, white, grey Lombardy and aspen, besides American balsam, poplar and cottonwood, are in cultivation. See LOMBARDY, POPLAR.

Poplar Metropolitan borough of London, on the north side of the Thames, served by the L N E Rly. It is composed of the parishes of Poplar, Bromley and Bow, and contains the Isle of Dogs, together with the E and W India and Millwall docks. From the Island Gardens (3 acres) the tunnel to Greenwich starts. It sends two members to Parliament. Pop (1931) 155,083.

Poplin Robe-like fabric with silk warp and worsted weft, brought to England by 17th-century French refugees, and long specially associated with Ireland.

Popocatepetl Active volcano of Mexico (17,520 ft). It is about 45 m S E of Mexico City, between the Valleys of Mexico and Puebla. The name is Aztec, and means "smoking mountain". There was a small eruption in 1802.

Poppy Large genus of herbs typical of the poppy order (*Papaver*). Their milky sap, with narcotic properties, is absent from the seeds, which yield an edible oil. The most important economically is the annual opium poppy, naturalised in S E England. The corn-poppy has yielded under cultivation double flowered forms such as the carnation,

picotee and ranunculus poppy, besides the single flowered white-centred Shirley strain. Perennials include the handsome Oriental, the Arctic and the Iceland poppy.

Population Term applied to the number of living human inhabitants of the world. Since this number varies from time to time, it is almost impossible to arrive at an accurate estimate of the world's population, but the adoption of a periodical census in most of the civilised countries enables statisticians to compute population with far more accuracy than before.

The census, however, is still hampered in countries like Africa and South America by the difficulty of collecting data concerning the inhabitants of the more remote regions. Furthermore, the causes which contribute to decline of population are often incalculable, such as wars, epidemics, sterility for various biological reasons and to-day the increasing popularity of contraception.

The population of the whole world has been estimated at over 1,900,000,000, giving a density of over 33 per sq m. Among independent political units, Barbados, in the West Indies, with about 952 inhabitants per sq m, is the most densely populated. Of the continents, Europe has the greatest density, with Asia second. The other continents are comparatively sparsely populated.

Two types of region favour density of population. One is the moist, warm climate, where rice, the cheapest form of food, can be produced in large quantities, as in China and Japan. The other is in temperate climates, on the great coal and mineral fields, where industry attracts population away from the rural districts, as in Western Europe and U S A.

Numerically, the largest populations are found in China, India and Africa. The population of China has been put at over 460 000 000 but here, as in India and, especially, Africa, the difficulty of census-taking renders the figures somewhat doubtful.

As regards the sexes in Europe, females normally outnumber males, possibly because a man's life subjects him to greater strain and liability to accident. After a war this difference is very much accentuated. In U S A on the other hand, males outnumber females, owing to the fact that males migrate to a new country in larger numbers than females. India, Egypt and Japan also show preponderance of males over females, due to the very high female death rate.

Porcelain Fine pottery with a vitreous, translucent body and a transparent glaze. Of Chinese invention, and often called China, it reached high perfection during the Ming Dynasty, and was imported into Europe, where its composition was discovered and imitated at Meissen, near Dresden, 1713. European porcelain comprises soft-paste, hard-paste and bone porcelain. See CHINA-WARE.

Porchester (Portchester) Village of Hampshire, served by the S Rly, on Portsmouth Harbour. It was the site of a Roman station. For a long time Porchester was a naval station, but the sea receded and rendered the port useless. Here are remains of a Norman castle. Pop 993.

Porcupine Widespread family of rodents. The common porcupine of S Europe and N. Africa, *Hystrix cristata*, 27 in. long, has long, black-and-white

quills or spines along the back for defensive purposes. The short quills of some American species are used by N. American Indians for decorating buckskin garments and moccasins.

Porcupine Grass (1) *Spinifex*, a coarse grass of various species of *Triodia*, growing in inner Australia. The stiff, spiny leaves, 3 ft. high, cause much suffering to man and beast. (2) *Stipa spartea*, a grass abounding in some American prairies. The awns become fixed in sheep's wool, gradually penetrating the skin and causing death.

Pork Uncured flesh of swine as food. The flesh of the pig is forbidden to Jews and Mohammedans, and is regarded by them as unclean. Pork compares favourably with mutton and beef in its nutritive properties, though more difficult of digestion. Comparing a medium fat animal of all three kinds, the percentage composition in pork is—water, 55, dry matter, 45, in mutton—water 57%, dry matter 43, in beef—water, 54, dry matter, 46. The mineral content of pork—2.5%—compares with mutton 4.5 and beef, 5.5. The amount of fat in the three varieties of meat is 28%, 23.5%, and 22.5% respectively. In a fat pig the fat may be practically 50%, and the total dry matter, 61.5%. Pork takes about 1½ times as long as beef for digestion. See Pig.

Porlock Village of Somerset, 6 m. from Minehead. It was once an important seaport, though the sea has since receded and the coast is now a mile or so away. Porlock Hill, nearby, is a noted test hill for motorists. Pop. 970.

Porphyrites Igneous rocks comprising large crystals, sometimes more or less broken, embedded in a ground mass of finer crystals. This is principally plagioclase, with augite, hornblende, biotite, etc., and larger crystals porphyritically developed. Abundant as dikes and intrusive sheets in Lowland Scotland, Alpine Europe, N. America and elsewhere, they are practically altered andesites.

Porphyry Term used in geology for various igneous rocks, characterised by large, conspicuous crystals in the ground mass. Many of these rocks are used as ornamental stones, such as the famous red porphyry with red or white crystals in a red ground mass, found in Egypt.

Porpoise Genus of cetacean mammals inhabiting northern seas (*Phocaena*). The common porpoise, *P. communis*, 5 ft. long, abounds on British coasts. It is killed mainly for its oils. So-called porpoise hide and porpoise laces come from the white whale.

Porson Richard English scholar. Born Dec. 25, 1759 at Cambridge, and educated at Eton and Cambridge, he was elected Professor of Greek in 1793, and became one of the leading Greek scholars of his day. In 1806 he was appointed Librarian at the London Institution. He published an edition of Aeschylus and the *Hecuba*, *Orestes*, *Phoenissa* and *Medea* of Euripides. He died on Sept. 10, 1808. Instituted in his honour, the Porson Prize is an annual award to graduates of Cambridge for a translation of English poetry into Greek verse.

Port Adelaide Seaport of Adelaide, S. Australia. It is 3 m. from Adelaide. On the Gulf of St. Vincent, it has extensive docks and a good harbour.

Industries include the smelting of copper, silver, etc.

Portadown Town and urban district of Co. Armagh, Northern Ireland. On the River Bann, 25 m. from Belfast, on the G. N. Rly., it is a centre for linen manufacture, and has an extensive trade in agricultural produce. Pop. (1926) 11,780.

Portage la Prairie City of Manitoba, Canada. It is 56 m. W. of Winnipeg, C.P. Rly., and is a centre for the export of grain. Pop. (1931) 6,597.

Portarlington Town of the Irish Free State. It is on the River Barrow, 42 m. from Dublin, on the G.S. Rlys. The town gives its name to an earldom, created in 1785. Since 1900 it has been held by Lionel A. H. S. Dawson-Damer (b. 1883). The title of the eldest son is Viscount Carlisle.

Port Arthur City and port of Ontario, Canada. It is at the head of Lake Superior on Thunder Bay, 990 m. from Montreal. It has extensive docks and a good harbour and handles large quantities of grain. Other industries include lumbering, shipbuilding and smelting. Pop. 10,818.

Port Arthur (or Lushun-Kou) Fortified seaport at the S.W. end of the Liaotung Peninsula, Manchuria. It is a terminus of the Siberian Rly. and has a harbour that may be used throughout the year. It was a Chinese naval station and was captured in 1894 by the Japanese. Later it was leased to Russia, by whom it was fortified. On the outbreak of the Russo-Japanese War, Feb. 6, 1904, Port Arthur was blockaded by the Japanese and fell many months later. Stoessel, the Russian commander, surrendered on Jan. 2, 1905. The port was ceded to Japan by the Treaty of Portsmouth, 1905 and ten years later the Chinese leased it to Japan for a further term of 99 years. Pop. 23,700.

Port-au-Prince (or Port Republicain) Seaport and town of Haiti, W. Indies. It is the capital of the Republic on the Gulf of La Gonave. Here is a good harbour. The principal exports are coffee, cacao, hides and logwood. Pop. 79,800.

Portcullis Stout grating made of the lower projecting points tipped with iron. A portcullis was suspended over the gateway of a castle as a means of defence and made to slide up and down in grooves at the side of the entrance.

Port Elizabeth Seaport of Cape Province, South Africa. On Algoa Bay, it is 664 m. from Cape Town and 712 m. from Johannesburg by Rly., and is traversed by the Barkens River. The harbour is open, though sheltered, and jetties are used for landing goods. Manufactures include footwear and there are exports of wool, ostrich feathers, etc. Pop. (Bur., 1931) 43,835.

Port Erin Village of the Isle of Man. It is on the landlocked Port Llyn Bay, 15 m. by railway from Douglas. There are fisheries, and a marine biological station. Pop. 3,200.

Port Glasgow Seaport and burgh of Renfrewshire, on the Clyde, 20 m. below Glasgow, on the L. M. S. Rly. It is a centre of the shipbuilding industry and possesses iron foundries and manufactures, including rope and sailcloth. Timber is imported. Pop. (1931) 10,580.

Port Harcourt Seaport of Nigeria It is at Iguacha, on a creek which enters the New Calabar and Bonny rivers, about 30 m from their mouth It is the terminus of the railway north which is to connect with the Iddo-Kano Rly

Porthcawl Seaport and urban district of Glamorganshire, Wales It is 6 m WSW from Bridgend and 30 m from Cardiff, on the GWR Rly Pop 6642

Port Hope Port and town of Ontario, Canada It is the principal town of Durham Co, on the north shore of Lake Ontario, 63 m from Toronto There is a good harbour, and the town is served by three railways, besides its connection with the principal lake ports by steamer services In addition to manufacturing industries the town has an extensive distributing trade in local produce Pop 6250

Portishead Urban district and town of Somerset, on the Severn estuary, 9 m WNW of Bristol, on the GWR There is a large dock Pop 3908

Port Jackson Harbour of Sydney, NSW It is on the coast of Cumberland Co, and is 18 m long An arm of the harbour is formed by the Parramatta River On the shore is Sydney

Portland Name of three towns in Australia One is in Victoria, Normandy Co., on the W side of Portland Bay, 200 m SSW of Melbourne Another Portland is in S Australia, Adelaide Co The third is in New South Wales, Roxburgh Co, 12 m NW of Lithgow

Portland Name of two cities of the USA Portland, Maine, is on Casco Bay, 106 m NNE of Boston, in Cumberland Co It is the birthplace of the poet Longfellow There is a good harbour Pop (1930) 70 810 Portland, Oregon, is on the Willamette River, near its junction with the Columbia, 53 m from Salem It has large exports of flour, grain and lumber Pop 01,815

Portland Peninsula of Dorset called the Isle of Portland An urban district, it is about 5 m long and about 1 wide It is divided from the mainland by the Chesil Bank and can be reached by steamer from Weymouth, or by the GW and S Joint Rly that runs along the peninsula from Malcombe Regis Portland Easton, Rodwell Chilswell and Castletown are on the island and at its southern extremity is Portland Bill with a lighthouse The chief buildings are the convict prison, a castle built in the 16th century and a more recent one called Pennsylvania Castle The chief industry is the quarrying of stone Thomas Hardy called the peninsula the Isle of Sluggers Pop (1931) 12 018

Portland Roads is an artificial harbour protected by an enormous breakwater It is used by the British Fleet which has stores and other establishments here

Portland Duke of English title created in 1716 An earldom of Portland, held by the Weston family, 1633-88, became extinct, and was revived by William III for Hans William Bentinck in 1689 His son, Henry became 1st duke William Henry Cavendish Bentinck (1738-1809) assumed the additional surname Cavendish in 1801, having married, in 1766, the daughter of the Duke of Devonshire Lord Lieutenant of Ireland, 1782, and Prime Minister, 1783, he was Home Secretary in Pitt's Government, 1794-1801, and again Prime Minister, 1807-09 William

John, 5th Duke (1800-79) was an eccentric who led the life of a recluse His nephew, William John Arthur (b 1857), the 6th duke, was Master of the Horse 1886-92 and again in 1895-1905 He is Lord-Lieutenant of Nottinghamshire The eldest son is entitled Marquess of Titchfield The chief family seat is Welbeck Abbey, Notts

Portland Cement Cement made by calcining in a kiln a mixture of chalk and finely-divided clay or the river mud of the Thames and Medway Liasse and carboniferous limestones and shales also are used along with local clays Portland cement is employed extensively for making concrete and for external plastering

Port Louis (or Isle of France) Seaport and capital of the Island of Mauritius It is on the NW coast, at the head of a bay The principal exports are sugar and aloe fibre Pop 54,460

Portmadoc Urban district, seaport and market town of Caernarvonshire, on Tremadoc Bay, 16 m from Caernarvon on the GWR Rly It is the port for the slate quarries of Blaenau Ffestiniog Pop (1931) 3986

Port Moresby Seaport and capital of Papua (British New Guinea) It is on Fairfax Harbour Pop 3000

Portobello Watering place of Midlothian, on the S shore of the Firth of Forth, 3 m from Edinburgh, of which city it forms part See EDINBURGH

Port of Spain (or Spanish Town) Seaport on the E coast of Trinidad, British West Indies, capital of the island Pop (1930) 70,641

Porto Rico Island of the Greater Antilles W Indies, ceded to USA by Spain in 1898 It is the most easterly of the group, 25 m E of Haiti, with an area of 3435 sq m Tobacco, bananas, cocoa and coffee are grown here, and sugar and cotton produced The capital of the island is San Juan Here large numbers of cattle are reared The inhabitants are descended from the Spanish and the aborigines The name was changed to Puerto Rico in 1932 Pop 1,544,000

Portpatrick Watering place and seaport of Wigtownshire It is 7 m from Stranraer by the LMS Rly It has a harbour and at one time packet boats went from here to Donaghadee in Ireland, which is only 21 m away

Port Pirie Seaport of S Australia It is on the E of Spencer Gulf, 154 m N from Adelaide Here are the smelting works and refineries for the Broken Hill silver mines Pop 9500

Portree Town of Skye, Scotland, the capital of the island It is situated on the bay of same name, 120 m by sea from Oban, with which there is a steamer service Pop 2120

Portrush Urban district and seaport of N Ireland In Co Antrim, it stands on Ramore Head, 67 m from Belfast. The Giant's Causeway is 7 m distant on an electric line The ruins of Dunluce Castle are in the vicinity Pop 2100

Port Said Seaport of Egypt at the N end of the Suez Canal It is an important coaling station, and has an extensive import and export trade It was founded in 1859 Pop 101,000

Portsea Peninsula of Hampshire, England, between Portsmouth and Langston harbours. Known as "Portsea Island" It is about 6 m long. The district of Portsea forms part of the borough of Portsmouth, and that city itself stands on the peninsula. See PORTSMOUTH

Portslade Urban district of Sussex. It is on Shoreham Harbour, 4 m W from Brighton, on the S Rly. Pop (1931) 9527

Portsmouth Borough, city, seaport and naval station of Hampshire, on the peninsula of Portsea Island. It is 74 m from London by the S Rly. Portsmouth, which was made a city in 1928, includes Landport, Portsea (where are the naval dockyards), Southsea and Cosham. A floating bridge and a ferry connect Southsea with Gosport across the harbour. Steamers go to Ryde and Southampton. In 1924 it was made the seat of a new diocese of Portsmouth and the Isle of Wight, the old church of St Thomas becoming pro-cathedral. There is a modern Roman Catholic cathedral. The 16th century Southsea Castle is now a fort.

The Portsmouth dockyards extend over 500 acres, and there is a gunnery school on Whale Island. Pop (with Southsea, 1931) 249,288

Portsmouth City and seaport of Virginia, U.S.A., at the mouth of the Elizabeth River, on Norfolk Harbour. Here is a U.S. navy yard and shipbuilding and railway works. Pop 45,704

Portsmouth City of New Hampshire, U.S.A. On the Piscataqua River, 58 m by railway from Boston, it is the Co. seat of Rockingham Co. The port for the state, it has a large harbour, and a U.S. navy yard is located on one of the many islands. The peace treaty between Russia and Japan was signed here in 1905. Pop (1930) 14,495

Port Stanley Seaport of the Falkland Islands. It is on the coast of E. Falkland and is the only important settlement there. Exports comprise whale oil, guano, wool hides and sheep skins. Pop (1931) 1213

Port Sudan Seaport of Sudan. On the Red Sea 40 m N of Suakin, it has a large harbour (opened 1909), and railway connections with Athara, Suakin, and Kassala. With Suakin it handles most of the trade of the Sudan. Exports include cotton, ivory, gum and durra. Pop 7000

Port Sunlight Town of Cheshire, head on the L.M.S. Rly. It was founded in 1888 by Lord Leverhulme and houses the workers in the soap factories of Messrs Lever Bros., Ltd. Here are recreation grounds, clubs, a fine art gallery, free library, etc. The town is connected with the River Mersey by Bromborough Pool.

Port Talbot Seaport of Glamorgan shire, on Swansea Bay. It is 11 m. from Swansea, on the G.W. Rly. In 1921 it became a borough, taking in the borough of Aboravon. Port Talbot has extensive docks. Copper is smelted here. At Aboravon there are engineering and tinplate works. Pop (1931) 40,672

Portugal Republic of Europe. On the Iberian Peninsula S.W. Europe, it is bounded S and W by the Atlantic, and on the N and E by the frontiers of Spain, the River Minho dividing it from the Spanish

province of Galicia. In ancient times Portugal was known as Lusitania. Its area is 15,490 sq m including Madeira and the Azores. Its pop in 1939 was 6,698,345. The capital is Lisbon, near the mouth of the Tagus and another important city is Oporto, on the Do Ro whence port wine is shipped.

Besides the Minho, the chief rivers are the Guadiana, Douro and Tagus. Between the two last named rivers is the mountain range, Serra da Estrela (6540 ft.) S of the Tagus, the Serra de Gadelupe reaches the coast N of the Douro the Cantabrian Mts run to the coast near Oporto. The Serra de Monchique, a boundary of the province of Algarve reaches the Atlantic at Cape St. Vincent. The climate is mostly healthy and the soil fertile. Agricultural products include rye, maize, wheat, onions, tomatoes, mts. Wine growing is an important industry which swells the export total. Olives, figs and oranges are grown.

Manufactures include textiles, tiles made of porcelain, and cork in various forms. Among minerals copper, lead, tin, silver, coal and iron are found. The chief colonies of Portugal are Mozambique, Dlu Timor, Goa, Macao, Guinea, Cape Verde Islands, Angola, Principe and St. Thomas Islands, with an area of about 808,301 sq m, and a pop of 10,000,000.

Until Oct. 6, 1910, Portugal was a monarchy, but a revolution in Lisbon thence brought about the establishment of a republic. There are two legislative chambers, the lower elected by direct suffrage, and the upper by local councils. The president is chosen by both chambers, and holds office for four years. After the Great War Portugal received territory which had formed part of German E. Africa.

Port Wine Rich red wine from grapes grown in the Douro Valley Portugal, and shipped from Oporto. Anglo-Portuguese treaties forbid other wines to be called port. Mostly fortified with brandy on fermentation the characteristic tint coming from a spirituous mixture containing elder berries, its alcoholic content is 17.25 p.c. Vintage port is usually shipped two years after its specified year and promptly bottled by the importers. Tawny port usually comprises blends of different years, kept in cask in Oporto until shipped.

Poseidon (or Neptune) Greek god of the sea. He was the son of Chronos (Saturn) and Rhea. His wife was Amphitrite. As a punishment for conspiring against his brother, Zeus (Jupiter), he was obliged to build the walls of Troy. Being cheated of his promised reward for this task by Laomedon King of Troy, he sided with the Greeks against the Trojans and caused a sea monster to devastate the land.

Posen (or Poznan) City of Poland. On the River Wnrtba, 90 m N of Breslau, it is an ancient town and the capital of the province. Its manufactures include sugar, locomotives, agricultural machinery, etc., and it handles a considerable river trade. It has two broadcasting stations (335 M, 1.9 kW and 31.35 M, 1 kW). Pop (1931) 246,574

Post Mortem Medical examination of a corpse to ascertain the cause of death. It may be ordered by a coroner to help the jury in their verdict, or may be undertaken for private reasons. In the former case the relatives cannot forbid examination. Despite its value to medical science it is not popular in U.S.A., nor among Catholics and Jews. See AUTOPSY

Post Office State service for the conveyance of letters, etc. The British Postal Service may be said to have started in 1635, when a system of packet posts was begun, and farmed at an annual rent. In 1657 it became a Government office under a postmaster general. In 1710 a general office for the three kingdoms was set up. Mails were first conveyed by postboys, then by coaches. The railway was first used in 1830 and with its general adoption for mails the volume of business increased enormously.

In 1840 Rowland Hill's penny post (inland) was introduced, and in 1893 imperial penny postage. The rates were modified during and after the War. The parcel post was introduced in 1883 and from time to time other services were incorporated, e.g., telegraph and telephone, registrations, money orders and saving banks.

An extensive airmail now operates, facilitating expedition in the exchange of correspondence with the lands overseas.

The British service is controlled by a Postmaster General, a minister of the Government, sometimes with cabinet rank. The headquarters of the post office is at St Martin's-le-Grand, London EC.

Potash Common name for potassium carbonate and with the prefix "caustic" for potassium hydroxide. Formerly obtained from the ashes of wood, it is manufactured chiefly from the deposits of potash minerals at Stassfurt in Saxony. Potash is a white, deliquescent, alkaline solid used in the manufacture of glass and potassium salts.

Potassium Metallic element having the symbol K, atomic weight 39.1, and melting point 62°C. Potassium is a lustrous, silvery-white metal easily cut with a knife at ordinary temperatures. It floats on water which it decomposes owing to its affinity for oxygen. Potassium is an essential constituent of many minerals and rocks, is present in plant and animal tissues, also as chlorides and sulphates in sea water and mineral springs. Its compounds are of great economic importance.

Potato Tuber of a perennial herb of the nightshade order (*Solanum tuberosum*). Cultivated by the Inca peoples in pre-Columbian America, it reached 16th-century Spain from Peru, and somewhat later Ireland from Virginia, 1585-86. Its cultivation throughout Britain started from 17th-century Lancashire. Now extensively grown in all temperate and sub-tropical regions, it ranks next to cereal grains as a food-plant for man and cattle, besides furnishing farina for textile purposes, dextrine and potato spirit. Besides the destructive potato disease the tuber is also liable to wart disease, the development of varieties immune from which has restored to cultivation much infected land. See SWEET POTATO.

Potential In electricity, a condition of a conductor which may be compared with pressure. When two parts of a conductor are at different potentials, a flow of current takes place from that of greater to that of lesser potential until the potential is equalised. Potential difference (P.D.) therefore, is similar to electromotive force (E.M.F.), and is measured in volts. See ELECTRICITY.

Potentiometer Electrical instrument used for the measurement of the electromotive force of a cell or the difference of potential. It consists of a wire or coil of uniform resistance stretched over a

scale and through which a constant current from a generator is passed. Sliding contacts are provided to enable tapings to be made, and the potential is compared with that of a standard cell of known electromotive force.

Pot-Hole Cavity more or less cylindrical in the bed of a rapid stream, scooped out by detrital matter grating in an eddying current of water sometimes glaciated. When the water reaches a plane of stratification in limestone regions it may produce long shafts or swallow-holes, ultimately forming extensive caverns. See KETTLE HOLE.

Pot-Pourri French translation of the name of a Spanish ragout, *olla podrida*. Hence it denotes any medley, musical or literary, and specifically a mixture of dead rose petals, lavender and spices, kept in sachets or porcelain jars.

Potsdam Town of Prussia, capital of the province of Brandenburg. It is 16 m from Berlin on an island in the lake district of Havel. Here are the former palaces of the German Emperor and others of the Hohenzollern family. The town is picturesque in its situation and planning. Here is the palace of Sans Souci built by Frederick the Great in 1760. The town manufactures chemicals, furniture, surgical and musical instruments, etc. Pop 73,676.

Pot Still Form of distilling apparatus so called from its pot-shape and used in the manufacture of spirits. The still is made of copper and is directly heated over a coal fire or by steam. This form of still is used chiefly in making Scotch whisky.

Potteries The District of N Staffordshire. It is the centre of earthenware and china manufactures, and comprises Hanley, Stoke upon Trent, Burslem, Longton, Tunstall and Fenton. These, with other smaller neighbouring districts were made into the county borough of Stoke upon Trent in 1920. See STROKE UPON-TRENT.

Potter's Bar District of Middlesex. It is 3 m N of Barnet, on the Great North Road, 13 m from London, and on the L.N.E. Rly.

Pottery Art of making vessels and other objects from clays air-dried or fired. In its earlier stage a vessel was built up by hand and fired on an open hearth. Later the potter's wheel and kiln were introduced, followed by the use of glazing and enamelling. Decoration also developed from simple incised lines and colouring to the artistic designs and polychrome ware of later Egypt and Greece.

In mediaeval times the Moors brought enamelled ware into Spain, and in the 12th century a soft coarse ware was introduced from Majorca into Italy whose ceramic products later became famous. In France from the 16th century onwards the making of soft porcelain followed by hard porcelain marked a further advance, and other improvements were made in England under the influence of Josiah Wedgwood.

For fine earthenware and porcelain, kaolin, or china clay, is used, and ballclay, a very strong plastic material, for earthenware, while Cornish stone, felspar, calcined bone and flint form the basis of glazes, etc.

Poulton-le-Fylde Urban district town of Lancashire. On the River Wyre, it is 3 m from Blackpool. Pop (1931) 3366.

Poultry Name used for domestic fowls ducks, geese and turkeys. The fowl is derived from the wild Indian jungle fowl. The many varieties are classed roughly as layers (non setting), utility (general purpose), table and fancy breeds, whose purpose is sufficiently indicated by these names. The principal breeds in the first group are Ancona, Andalusian, Compline, Hamburg, Houdan, Leghorn Minorca, in the second, Langshan, Orpingtons Plymouth Rock, Rhode Island Red, Sussex (red, light and speckled), Wyandotte in the third, Dorking, Game and certain French varieties, the ornamental varieties include bantams, Yokohamas and others.

Ducks are said to derive from the mallard and one of the breeds commonly kept, the Rouen, closely resembles the wild duck in appearance. The leading varieties of duck are Aylesbury, Indian Runner, Khaki-Campbell, Orpingtons, Pekin and Rouen.

Geese are said to come from the wild species known as the grey lag, a winter visitor to Britain. The Toulouse and Embdon are the most popular for culture, the latter being the heavier. It is white the Toulouse being grey.

Turkeys are derived from the wild N. American species, there are three breeds mainly favoured in Britain, the American Bronze, the Cambridge Bronze, and a smaller variety, the Norfolk black turkey.

The interests of poultry breeders and exhibitors are looked after by the Poultry Club, 3 Ludgate Broadway, London E.C. 4.

Pounce Powder formerly sprinkled over newly written matter to prevent the ink spreading or blotting. Composed of sand, cuttle bone, or some resinous substance, it was shaken out from a box with a perforated lid called a pounce-pot. The use of pounce died out after the introduction of blotting paper.

Pound English unit of weight. It is divided into 16 oz avoirdupois or 7000 grains. In troy weight, used for weighing gold, silver, platinum and precious stones, and in dispensing medicines, the pound is equal to 12 oz or 5760 grains.

Pound British monetary unit. The British pound sterling was originally 5760 grains of silver of a standard fineness. In 1816 gold currency replaced the silver pound. The gold sovereign has no relation to any pound weight, and actually weighs 123 274 grains of 22 carat gold.

Pound Public enclosure for lost or straying animals, or for receiving animals or goods taken in distraint for rent. The cost of feeding such animals is recoverable from the owner.

Poussin Nicholas French painter. Born in June 1504, he studied painting under Quentin Varin, and later secured powerful patronage. From 1640-42 he was at Paris as court painter to Louis XIII., returning thereafter to Rome where he worked until his death Nov. 10 1665. His paintings (historical pictures, sacred subjects and classical landscapes) are to be found in most European capitals. In England the National Gallery and Dulwich Gallery have many fine examples of his work.

Poussin's brother in law, Gaspard Dughet, born in 1613 was also a painter. He took the name of Poussin and became famous for his landscapes. He died on May 27, 1675.

Power of Attorney Written authority, usually signed and sealed empowering the person

named to perform acts which otherwise could only be performed by the donor. It may be general, to cover all negotiations, or special. It ceases at the principal's death, and is terminable at his discretion.

Power Transmission Engineering term.

Power generated from natural sources such as coal, natural gas, water, etc., may be transmitted for useful application some distance away by mechanical means—shafting, moving ropes, etc.—or by high pressure air and water mains, or after conversion into electricity, by overhead or underground cables. The term is applied especially to the transmission of electrical power by a network of overhead cables.

Poynter Sir Edward John British painter. Born in Paris on March 30, 1836, he became A.R.A. in 1869 and R.A. in 1876 and succeeded Millais as P.R.A. in 1896. He was Director of the National Gallery, 1884-1905. Knighted in 1896, he was made a baronet in 1902, and died on July 26, 1919. His work includes classical paintings, portraits, and frescoes.

Pozières Village of France near Albert, Somme. During the Great War it was held first by the Germans, to whom its slightly elevated position made it useful for observation over the adjacent battle zone. In July, 1916, it was rushed by British and Anzac divisions. In the spring of 1918 it was recaptured by the Germans, but taken again by the British in August. There is a memorial to the Australians who died in the attack of 1916, and also a British memorial. See ALBERT, SOMME.

Praefect Title of certain officials of ancient Rome. There were naval and military praefects. A *praefectus castrorum*, or camp praefect, was attached to every legion. The *praefectus urbi* (earlier termed *custos urbi*) was warden of the city. During the empire the office of *praefectus praetorio*, or commander of the praetorian guard, became of great importance, and at one time the powers of such praefects were exceeded only by those of the emperor himself. See PRAETOR.

Praetor In ancient Rome, a magistrate next in importance to a consul. The praetor was first elected in 366 B.C., his office being to rule during the absence from Rome of the consuls on military service. In 246 a second was appointed (*praetor peregrinus*), the first being then termed *praetor urbanus*. Later more praetors were appointed, to govern now provinces, or take charge of departments of the state. A *curule* magistrate, the praetor presided at criminal trials, and was attended by lictors.

The Praetorian Guard was a body of troops whose duty was to guard the emperor. Instituted by Augustus, 2 B.C., eventually they wielded such influence as to make and break emperors. The *praetoriani* were disbanded in A.D. 312 by Constantine.

Pragmatism Doctrine of philosophy. William James or Chas. S. Peirce was apparently the first to use the term, which denotes a doctrine according to which the truth of a conception is to be tested by its practical value, or its workableness. It has been described as a revolt against the over-elaborated idealism of the metaphysicians. See JAMES, W.

Prague City of Czechoslovakia capital of the republic. Its German name

is Prag, Czech Praha. In Bohemia, on both banks of the Moldau River, it has extensive suburbs. The Gothic Cathedral dates from 1344. On the left bank of the Moldau is the fortress of Hradsehin. Prague is the seat of a German and Czech university. It has an extensive river traffic, and many important industries, including iron foundries, engineering works, chemical and cement works, textile factories. It has two broadcasting stations (488.6 M., 120 kW and 58 M.) Pop. 850,000.

Prairie Dog (or Prairie Marmot). Genus rodent of the squirrel family (*Cynomys*). Stout, squat, 12 in long with 4 to 5 in tail, reddish grey and paler beneath, prairie dogs live gregariously on the plains, sometimes forming extensive villages, and utter whistling cries. The common *C. ludovicianus* is replaced by a white-tailed form *W. of the Rocky Mts.*, another is Mexican.

Prawn Widely distributed family of shrimp like ten-footed crustaceans. Mostly marine, 2-12 in long, the last three pairs of thoracic limbs never bear pincers, the two front pairs frequently do. The British edible *Palaeon serratus*, 3-4 in long, with toothed rostrum projecting in front of the carapace, is usually taken in hand ring-nets or osler basket-traps. Some tropical species rival lobsters in size, e.g., the W. Indian prawn, *P. jamaicensis*, and the Indian prawn, *P. lar*, highly esteemed with curry.

Praxiteles Greek sculptor. He lived at Athens, where, perhaps, he was born c. 400 B.C. His works are known mostly by copies which exist, such as the Aphrodite of Cnidus, Eros, Satyr, Apollo, and others. During excavations among the ruins of Olympia in 1877 a group of Hermes and Dionysus by Praxiteles was found, which is probably the only original sculpture by him in existence. His work is characterised by its fine modelling, beauty of line, and expression. He died c. 330 B.C.

Prayer Book Order of church services. In its present form the Book of Common Prayer of the Church of England dates substantially from 1559, when, after the accession of Elizabeth, the second prayer book of Edward VI (1552) was revised. The first prayer book of Edward VI (1549), mainly an English version of the Missal, found little favour either with the reformers or those who adhered to the ancient rites, and Edward's second book was intended to placate the former party, who desired a closer conformity with the liturgy of the reformed churches abroad.

Repressed by the Commonwealth, and restored in 1660, the Act of Uniformity of 1662 authorised it as the only legal service book. In 1927 a revised prayer book was submitted to Parliament, after acceptance by both convocations and the Church Assembly, but was rejected. Some alterations were made, and it was presented to Parliament in 1928, but that body again rejected it.

Prebend Term formerly denoting the stipend of a secular priest or a canon regular, or the endowment from which this was provided. It was afterwards applied to the endowment for a canon residentiary of a cathedral, who was known in consequence as a prebendary. In modern times, however, this is generally an honorary office, and the prebendary is then not a member of the cathedral chapter, and receives no stipend.

Pre-Cambrian Name denoting all rocks older than the Cambrian, all, or the oldest at least, also called Archaean. Lying beneath the Cambrian beds containing *Olenellus trilobites*, they comprise igneous and sedimentary rocks, usually highly metamorphosed, exposed over one fifth of the present land surface, including 1,800,000 sq. m. in Canada and large areas in N.W. Scotland. See LAURENTIAN.

Precedence Priority of place to which titled and official persons or officers of the Services are entitled by the rank conferred on them by the crown. There is an official table of precedence in which the order is set out. The sovereign is at the head, followed by the Prince of Wales and other sons, brothers, uncles and nephews of the sovereign, and ambassadors. Next come the Archbishop of Canterbury, Lord Chancellor, Archbishop of York, Prime Minister, Lord President of the Council, Speaker of House of Commons, Lord Privy Seal, Lord Great Chamberlain, Lord High Constable, Earl Marshall, Lord Steward of the Household, and Lord Chamberlain. Then follow dukes, marquesses, earls, viscounts, bishops, secretaries of state (if barons), barons, certain officers of the household, secretaries of state not barons, Knights of Garter, Privy Counsellors, Chancellor of Exchequer, Chancellor of Duchy of Lancaster, Lord Chief Justice, Master of Rolls, Appeal Justices, Lords of Appeal, other Judges, baronets, members of orders of knighthood, County Court judges, companions, members and officers of various orders, gentlemen entitled to bear arms. Sons of peers, baronets, knights, etc., rank in a manner decided by that of the father, a duke's eldest son, for example, taking precedence after a marquess, and the eldest son of a marquess after an earl.

Precentor Leader of singing in church. In most English Old-Foundation cathedrals he ranks after the dean, a vicar-choral being succentor, in others he is a minor canon, and in some important parish churches the senior curate. In Scottish churches he led the psalmody before organs were introduced.

Preceptor Literally this means a teacher. The College of Preceptors, established 1846, incorporated 1849, is a body devoted to education, granting various diplomas to teachers, and issuing a certificate of teaching ability. Examinations for pupils are held. The diplomas are those of Associate, A.C.P., Licentiate, L.C.P., and fellow F.C.P. The address of the college is, Bloomsbury Square, London, W.C.1.

Precession Astronomical term. It is used in relation to the slow backward movement of the equinoctial points along the ecliptic and known as the precession of the equinoxes. This is due to the differential attraction of the sun and moon upon the earth's equatorial protuberance. The equinoctial points take 25,800 years to complete one circuit of the heavens.

Precipitation Term in chemistry for the process by which an insoluble substance is made to fall to the bottom of a liquid. The solutions of two substances are mixed, forming a third substance, which, being insoluble, sinks to the bottom and is termed a precipitate.

Predestination Theological term denoting the Divine predetermining of human destiny. It may

stand for belief in fate, the conception that all that is to be is eternally and obangelessly decreed, or, specifically, that each individual is destined beforehand to overlasting weal or woe. Age-long controversies have attended attempts to reconcile the doctrine of human free will with that of God's omnipotence. See AUGUSTINE, CALVIN.

Prefect One set in authority. In France the préfet is the civil governor of a department, and this title is given also to the head of the Paris police (Seine department). The prefects at English public schools are senior boys charged with keeping order and maintaining discipline. See PREFECT.

Premium Term meaning a prize, reward, or bonus. An apprentice or articulated pupil pays a premium for his instruction in a trade or profession. Shares in a company are sometimes quoted at a premium, i.e., a sum above their par value, £100 worth costing £105, etc. A premium bond is a bond carrying with it the chance of winning a money prize. Such a scheme is of the nature of a lottery, the prizes being given to holders of certain numbers drawn. The term is also used to denote sums payable periodically in respect of policies of insurance.

Pre-Raphaelites Group of English artists who, in 1848, broke away from the conventional art of their day. They formed the Pre-Raphaelite Brotherhood with the idea of returning to the primitive outlook of the early Italian painters. The original founders were Holman Hunt, Rossetti and Millais. The movement brought about the use of purer and truer colours, but was marred by over elaboration of minute detail.

Prerogative Right or privilege attaching to a person or body. The royal prerogative, now exercised through the cabinet or the privy council, entitles the sovereign to declare war, summon, prorogue or dissolve parliament, nominate ministers, create peers pardon offenders etc. Former ecclesiastical courts dealing with the probate of wills of persons dying in the provinces of Canterbury and York were called prerogative courts. See CROWN, PROBATE.

Presbyopia Defect of vision, usually due to the increasing rigidity of the eye lens in old age. The sufferer is unable to focus near objects but can still see distant ones clearly. The condition is corrected by wearing convex lenses.

Presbyter Elder of the early Christian Church; the name is also used for a priest. In the Presbyterian denominations a presbyter is an elder or a member of a presbytery, the latter being an official court of a district, composed of pastors and elders. The district also is termed a presbytery.

Presbyterianism Form of church government by presbyters or elders. Claiming to be a New Testament institution in continuation of Jewish synagogue practice, it developed into the prelatic form of rule of mediaeval Christendom. At the Reformation presbyterianism emerged once more, notably under Calvin's forceful influence, side by side with the independent principle which congregationalism developed. Destined to prevail in Scotland, it acknowledges the government of each church by elders including the preaching elder or minister. Churches are associated in local

presbyteries, which are represented in provincial synods, and in a national or general assembly constituting the final court of appeal, meeting annually, each court is under a presiding moderator. World statistics of Presbyterianism reckon a present strength of about 6,500,000. See CALVINISTIC METHODISTS; SCOTLAND CHURCH OF, etc.

Prescot Urban district and market town of Lancashire, on the L.M.S. Rly., it is 7 m. from Liverpool and a centre of the watchmaking industry, with potteries, electric cable works and coal mines. Knowsley, the seat of the earl of Derby, is in the neighbourhood. Pop. (1931) 9396.

Pressburg German name of the city known as Bratislava. See BRATISLAVA.

Press Gang Men formerly engaged in compulsory recruiting for the army or navy. By an act of 1836 the period of compulsory service for men impressed for the navy was limited to five years.

Pressure Gauge Appliance for measuring the pressure of steam, gas, water etc. The usual type of gauge on boilers for registering steam pressure consists of a flattened bronze tube bent in a curve and having one end open and connected to the steam pipe, the other end being sealed and linked to a pointer on a dial graduated to lbs per sq. inch. Pressure of steam in the tube causes it to tend to straighten and this movement is registered by the pointer.

Prestatyn Market town and urban district of Flintshire. A coast town, it is 20½ m. from London by the L.M.S. Rly. Here is a ruined castle. Pop. 4511.

Presteign Urban district and market town of Radnorshire. On the River Luggie it is 7 m. from New Radnor, on the G.W. Rly. It is the county town. Pop. (1931) 1102.

Prester John Legendary 12th century Christian ruler of a kingdom in the Far East. The name means 'priest'. He is referred to in many mediaeval traveller's tales and attempts have been made to show that Prester John was the ruler of a state in Abyssinia. A kinsman who took the same name is said to have been slain by Jenghiz Khan.

Preston Seaport, county borough, river port and market town of Lancashire. It is 31 m. from Manchester, on the estuary of the Ribble, 12 m. from its mouth. It is 209 m. from London by the L.M.S. Rly. Preston is a centre of the cotton spinning industry and there are also foundries, engineering works and shipbuilding yards. The harbour and extensive docks are owned by the town. It sends two members to Parliament. Pop. (1931) 118,339. Preston was the scene of a battle fought, Aug. 17, 1648, between Parliamentarians and Royalists in which the latter suffered a heavy defeat.

The famous association football club, Preston North End, was one of the clubs comprising the league in 1888 and won the league championship in that year and the F.A. Cup in 1889.

Prestonpans Village of Haddingtonshire. On the Firth of Forth, 9 m. from Edinburgh, it has a station on the L.N.E. Rly. The name is derived from former salt pans here which were worked until the end of the 17th century.

The Battle of Prestonpans, Sept. 21, 1745, was fought between a Jacobite army under Prince Charles Edward and royal forces commanded by Sir John Cope. The latter had landed at Dunbar and was marching on Edinburgh, whence the Jacobites came out to meet him. Cope's army was quickly routed, only a few, including the leader, escaping to Berwick.

Prestwich Urban district of Lancashire. It is 4 m from Manchester, on the LMS Rly. Cotton is manufactured. Pop (1931) 23,876.

Prestwich Burgh of Ayrshire, On the Firth of Clyde, 2 m from Ayr. It is famous for its golf links. It is on the LMS Rly. Pop (1931) 8538.

Pretoria City of the Transvaal. On the Apies river, 45 m from Johannesburg. It was founded by and named in honour of Marthinus Pretorius (1819-1901), first president of the South African Republic. It is the capital of the Transvaal and the seat of government of the Union of South Africa. The city lies at the foot of the Mogaliesburg Mts, and is a railway junction. Pop (1931) 62,096 whites.

Priam In ancient Greek legend, the last King of Troy. Son of Laomedon, and husband of Hecuba, he was the father of Hector and Paris. When Hercules took Troy in revenge for Laomedon's broken promise to reward him for rescuing Hesione from the sea monster, Priam was spared, and Hesione redeemed him from captivity. Priam was slain by Neoptolomus when the Greeks captured Troy.

Prickly Pear See CACTUS.

Priestley John Boynton. British author born at Bradford, 1894. He served in the Great War and then went to Trinity Hall, Cambridge. He had earlier done work for a Socialist weekly, and took up reviewing for the *Daily News*. He wrote lives of George Meredith and T. L. Peacock, 1926-7, and a successful novel, *The Good Companions*, 1929, which was produced as a play in 1931. Two other novels, *Angel Payment* and *Faraway* followed in 1930 and 1932 respectively, and in 1933 *Wonder Hero*. His plays include *Dangerous Corner*, *Eden End*, *Laburnum Grove* and *Cornelius*.

Priestley Joseph. British chemist. Born on March 13, 1733, he was educated for the nonconformist ministry, and while at Warrington as minister published a *History of Electricity* (1767). Going to Leeds, where he remained some years, he began to study gases, discovering oxygen in 1774. From 1780-91 Priestley was a minister at Birmingham, where his political opinions caused him to be mobbed and his house and library burned. He went to London, and in 1794 emigrated to Pennsylvania, where he died Feb. 6, 1804. Among his discoveries were nitric oxide, hydrochloric acid, and sulphur dioxide. He was the first to use carbon dioxide in the preparation of "mineral" waters.

Primate Title of the Archbishops of Canterbury (Primate of all England) and York (Primate of England). An analogous title, primus, is held by the bishop who presides over the Synod of the Episcopal Church of Scotland. In the R.O. Church the title primate is borne by bishops of sees formerly carrying the dignity of Vicar of the Holy See.

Primates Highest mammalian order. It includes mankind, apes, mon-

keys and lemurs, although some authorities rank these separately. Except man (*qu*), who has adapted himself to all climates and developed other distinctive characters, all are essentially tropical and sub-tropical and nearly all arboreal. The fore-limbs are set apart to wait chiefly upon the head, and like the hind-limbs are adapted for grasping, the great toes being flat-nailed and usually opposable. The eyes are brought to the front of the head. See MONKEY.

Prime Minister Chief minister of the British sovereign and people, also known as the premier.

The prime minister must be a member of Parliament and since 1923 has been a member of the House of Commons. He is selected by the sovereign, but must enjoy the support of a majority of the members. He selects the members of the Cabinet, advises the sovereign on all matters of importance, heads the government and is the leader of his own political party.

Prime Ministers of the Past Hundred Years.

1834 — Viscount Melbourne	1860-63 — Marquess of Salisbury
1834-35 — Sir Robert Peel	1863-64 — W. E. Gladstone
1835-41 — Viscount Melbourne	1864-65 — Earl of Rosebery
1841-46 — Sir Robert Peel	1865-1902 — Marquess of Salisbury
1846-52 — Lord John (Earl) Russell	1902-03 — A. J. (Earl of) Balfour
1852 — Earl of Derby	1903-08 — Sir H. Campbell-Bannerman
1853-55 — Earl of Aberdeen	1910-16 — H. H. Asquith (Earl of Oxford)
1855-58 — Viscount Palmerston	1916-22 — D. Lloyd George
1858-69 — Earl of Derby	1922-23 — A. Bonar Law
1869-65 — Viscount Palmerston	1923-24 — Stanley Baldwin
1865-66 — Earl Russell	1924 — J. Ramsay MacDonald
1866-68 — Earl of Derby	1924-29 — Stanley Baldwin
1868 — B. Disraeli (Earl of Beaconsfield)	1929-35 — J. Ramsay MacDonald
1868-74 — W. E. Gladstone	1935 — Stanley Baldwin
1874-80 — Earl of Beaconsfield	
1880-85 — W. E. Gladstone	
1885-86 — Marquess of Salisbury	
1886 — W. E. Gladstone	

Primitive Methodists Evangelical community. It arose from the introduction into English Methodist practice of open air revival meetings. From 1807 onwards such meetings, held under Wesleyan Methodist protection, were especially fostered by Hugh Bourne and William Clewes who, excluded from membership for utilising unauthorised forms of worship, joined forces, 1810, and adopted the Primitive Methodist title, 1812. For 30 years the founders actively guided the rapidly expanding work, and 10 years after that, when both had died, a loose connection of federated districts gradually developed, becoming the Primitive Methodist Church, 1902. Organic union with other Methodist communions was authorised by Parliament for 1933. See METHODISM.

Primo de Rivera See RIVERA.

Primogeniture Right of the first-born. It was applied in England to the practice whereby real estate descended to the eldest son on intestacy. This system was done away with by an act of 1925.

Primrose Herbaceous perennial of the genus *Primula*, of which there are 250 species. The ease with which they may be cross-fertilised makes them a popular English garden flower, the best hybrids being obtained from auricula, Chinese primrose and primrose obconica.

Primrose League Conservative political organisation. Founded in 1883, its name is an allusion to a favourite flower of the Earl of

Beaconsfield. The anniversary of Beaconsfield's death, April 19, known as Primrose Day, is honoured by the wearing of a bunch of primroses. The address of the Primrose League is 64 Victoria St., London, S W 1.

Primula Large genus of perennial herbs of the primrose order. The British species are the common, hild's-ovo and Scottish primroses, cowslip and oxlip (*q v*). Besides the garden polyanthus, derived from one or two of the above, innumerable varieties, double flowered forms and hybrids have come from these and exotic species introduced since the 16th century.

Prince Albert City of Saskatchewan, Canada. It is on the North Saskatchewan River, 247 m N of Regina, and is a junction on the C.N. Rlys. The chief industries are lumbering and the milling of grain. The Prince Albert National Park, opened in 1928, has an area of 1400 sq m. Pop (1931) 9905.

Prince Edward Island Province of Canada. It is in the Gulf of St. Lawrence separated from the mainland by Northumberland Strait. Its area is 2184 sq m, and it is the smallest of the Canadian provinces. The capital, Charlottetown, is on Hillsborough Bay. Agriculture is the principal industry. The island was colonised by the French about 1720, became a British possession in 1763, and was united to the Dominion of Canada in 1873. Pop (1931) 88,040.

Prince of Wales Title borne first by the son of Edward I and since conferred on the eldest son of the sovereign. The badge is a plume of three ostrich feathers enfiled by a coronet, the motto being *Ich dien* (Ger., I serve).

Prince Rupert Port of British Columbia. It is on Kalien Island in the Skeena River, 650 m N from Vancouver, and is a terminus of the C.N. Rlys. There is a large harbour and various fisheries are carried on. Pop 7600.

Princes Risborough Town of Buckinghamshire. It is 7 m from Aylesbury, on the L.N.E. Rlys. Chequers, the official country residence of the Prime Minister, is 3½ m away. Pop 2438.

Princeton Town of New Jersey, United States. It is 10 m from Trenton and is served by railway and canal. The university owes its existence to a college founded at Elizabethtown in 1746, and moved to Princeton in 1756. It was then called the College of New Jersey. There were in 1932 2554 students.

Princetown Town of Devonshire. It is on Dartmoor, 22 m. from Plymouth, on the G.W. Rly. Near is Dartmoor prison. The town which is a tourist centre, is on the estate of the Prince of Wales, as Duke of Cornwall.

Printing Art of printing from movable types. It originated in the mid-15th century in Germany. Gutenberg, and Faust and Schoeffer at Mainz, were doing experimental work before 1450 and the 42 line Bible known as Gutenberg's appeared in 1456. Work was also done at Strassburg, and from Mainz the art spread to Nuremberg, Cologne and Augsburg. Sweynheim and Pannartz established a press first at Subiaco and then at Rome. The Frenchman, Jensen, inventor of Roman type, began printing at

Venice in 1470. In France, Spain and Flanders, Holland, and Switzerland presses were soon at work, and in 1476 the English Caxton, after some preliminary work at Bruges, set up his press at Westminster.

The modern art is divided roughly into letterpress, or relief printing and lithographic, a flat surface being used in the latter (See LITHOGRAPHY). Letterpress printing comprises the composition of type, assembling of type and blocks, etc., and the machining. The introduction of the Monotype Linotype and Intertype (1886-9) abolished hand composition for all but special work. The first casts separate types set up into lines, and is widely used for book work, the others turn out solid slugs each a stereo of a single line, used for news paper work, etc. Monotype set matter can be corrected and manipulated like hand set matter.

Early printing presses were not greatly different in principle from those still used for odd purposes in printing works. The forme of type was carried on a flat bed, and the paper pressed into contact with it by a platen. Koenig (1811) introduced a cylinder press which was the prototype of those used largely to day for book printing. Advances were the addition of another cylinder, permitting both sides of the paper to be printed in a single operation. In modern rotary presses forme cylinders carry curved stereotypes of the type matter and the paper is fed from one or more reels. The output from several units can be combined, folded into a newspaper and delivered automatically at a remarkable speed. See INTAGLIO, LITHOGRAPHY.

Prior Matthew. English poet and diplomat. Born July 21, 1664, he entered the diplomatic service 1691, going to The Hague, Paris, and in 1711 to Utrecht in connection with the peace treaty. He was at the Paris embassy as minister in 1713, on his return in 1715 he was impeached and imprisoned for two years. His chief poems are *Solomon*, or *the Vanity of the World* and *Alma*, or *the Progress of the Mind*. He died Sept 18, 1721.

Pripet River of Russia. It rises in the west of the country and joins the Dniester, north of Kiev. Its length is about 600 m and it is navigable to Pinsk. Canals connect it with the Vistula and other rivers. It flows through a district of marshes which became prominent during the Great War.

Prism Geometrical term for a solid whose two ends are equal similar and parallel plane figures, and its sides parallel. The axis joins the centres of the two ends, and a right prism has its axis perpendicular to its ends. In optics a triangular glass prism is used for refraction and dispersion of light.

Prison Place of detention. The modern system for dealing with criminals dates from the early 19th century. John Howard had published in 1777 his powerful plea for reform. In 1813 Elizabeth Fry began her work for the Newgate prisoners. Jeremy Bentham's "Panopticon" was the model for Millbank penitentiary (1816). Pentonville (1842) was part of the scheme for the separate system which had been recommended by the House of Lords in 1835. Holloway prison was built in 1854. Dartmoor, built for French war prisoners in 1806, was made into a convict prison in 1850, and the prison on Portland Bill was constructed about the same time. Transportation ceased, and a new system became

necessary. Penal servitude was introduced, and the employment of convicts on public works of some magnitude. See BORSTAL, PENAL SERVITUDE, REFORMATORY, TRANSPORTATION.

Privet Genus of shrub or low trees of the olive order (*Ligustrum*). They bear simple entire leaves and clustered white funnel shaped flowers, yielding small globular berries. Of the common privet of Britain and Europe, *L. vulgare*, variegated and weeping varieties are cultivated, besides Chinese and Japanese evergreen species.

Privy Council Council to advise the sovereign on matters of state. Since the adoption of the system of cabinet government this body has lost much of its former powers, and now deals mainly with certain formal matters. Thus on the death of the king it is summoned to proclaim the new sovereign. The council is composed of distinguished persons of the country, including the royal princes, the archbishops of Canterbury and York, officers of State and of the Household, the Speaker of the House of Commons, etc. Its members are styled, "The Right Honourable" and take precedence after Knights of the Garter. The Lord President of the Council ranks next to the Prime Minister. The judicial committee of the council is the supreme appeal court for the Dominions. See CABINET, JUDICIAL COMMITTEE.

Privy Purse In England the allowance from the civil list for the personal use of the sovereign. It is dealt with according to the King's direction by the Privy Purse Office. The amount is £110,000 per annum.

Privy Seal One of the three legally recognised Royal Seals. It first appeared under King John, and was used to validate the Crown's private expenditure. Its use was abolished in 1834, but the title of Lord Keeper for one of the members of the Cabinet was retained.

Prize Court Court to deal with prizes of war, i.e., ships and goods captured at sea. Such courts are set up by the countries concerned upon the outbreak of hostilities. The procedure differs in various countries. During the Great War the proceeds of prizes taken by British ships were paid into a common fund for the whole navy. Formerly the practice was to distribute the prize money among the company of the ship actually taking the prize.

Probate Legal proving of a will. The will, with a copy, is taken to a registry, and also an affidavit stating particulars of the testator's estate and another proving his death, etc. Upon the will being admitted to probate a parchment copy (the probate copy) is issued, which is legal evidence of the will, the original being filed at the registry, where it can be inspected on payment of a fee. See WILL.

Probation Judicial system under which offenders, instead of being committed to prison upon being convicted, are placed under a bond to be of good behavior for a specified period. The method is used with young delinquents, who are then sometimes placed under the supervision of a probation officer. If the offender breaks his bond he may be recalled and sentenced. See BORSTAL, REFORMATORY SCHOOL.

Process Course of legal proceedings. The writ of summons also is called a process and the officer serving it is

termed a process server. In Scots Law the term process means a summary warrant for imprisonment issued against a person who, having borrowed a process from the court, unwarrantably refuses to return it.

Proclamation Public announcement of an executive act. It is made by authority of the king in council, and the proclamation is read aloud in the capitals by heralds. Thus the death of a sovereign and accession of his successor, are proclaimed, and a similar announcement is made of a declaration of war. The prorogation and dissolution of Parliament are also proclaimed.

Proconsul In ancient Rome a magistrate who acted in place of a consul. He was usually a consul who had his *imperium* continued beyond his year of office. It became customary to entrust such an officer with the charge of a province or the command of an army. See CONSUL.

Proctor Form of the word procurator meaning one who performs duties for another. The name is given to two officers of Oxford and Cambridge Universities among whose duties is the maintenance of discipline among undergraduates.

The legal officer known as the king's proctor intervenes in divorce or nullity suits if he suspects collusion or fraud. The term proctor is employed also for certain representatives in convocation (*q v*). See DIVORCE.

Procuracion Procuring of a girl or woman for unlawful intercourse. An Act of 1885 (amended by the Criminal Law Amendment Act, 1912) prescribes heavy penalties for the offence.

Procurator One who acts for another. In Scotland it is used for a law-agent. The faculty of procurators fixes the fees to be charged by its members for conveying or litigation business. The procurator-fiscal is a Scots law officer appointed by the Lord Advocate. He inquires into cases of crime and conducts investigations into cases of sudden death. He also prosecutes in cases indicted before the supreme court.

Profiteering Selling of commodities at an exorbitant profit. During the Great War prices rose generally and some sought to take advantage of a national emergency. In Great Britain an Act was passed in 1919 to stop profiteering. The Board of Trade was given power to investigate complaints and take action against offenders.

Profit Sharing System by which those employed in a business receive besides the ordinary wage, a share of the profits made. It is held that the giving of this bonus, by causing the worker to take a greater interest in the business, helps to effect economies and reduce waste. Difficulties arising are that the profits are governed by other factors than production costs, and trade unions have given the system relatively little support. See CO PARTNERSHIP.

Progression Mathematical term denoting a type of series. Thus a series of numbers may be in arithmetical progression, as 2, 4, 6, 8, 10, where the numbers have a constant difference, or in a geometrical progression, as 1, 16, 64, 256, 1024, where each is a regular multiple of the preceding one.

Prohibition Term especially applied to the prohibition of the manufacture, sale, and transportation of

intoxicating liquors for beverage purposes. The United States of America imposed a prohibition measure in July, 1919, but this was removed in 1933. As a war measure control or prohibition of the liquor traffic was imposed in several other countries. Various provinces of Canada from 1915 to 1917 introduced prohibition until Quebec alone remained out side, and in that territory a great area had adopted prohibition under local option. In the United States an illicit liquor trade quickly developed. Smuggling became rife, and a regular industry grew up of the running of cargoes of intoxicants to points outside American territorial waters, whence the liquor was transmitted to the vessels of the so-called "boot leggers." See LOCAL OPTION.

Projectile Body projected or given a free path through the air, as in the case of a ball, bullet or shell. The path described by a projectile is termed the trajectory and the study of the different factors governing it has become very important.

Proletariat Term used to denote the wage-earning class of a community collectively. By socialists it is used to distinguish this class from the capitalists and the middle classes, often termed *bourgeoisie*. The word is from a Latin one meaning those citizens who had no property, but served the state by producing offspring.

Prometheus In ancient Greek legend one of the Titans. He defied the heavens and stole fire from the sun in order to give life to men. Zeus punished him by causing Vulcan to chain him to a rock on the Caucasus, and here a vulture came by day and fed on his liver which grew afresh each night. Finally, Heracles delivered Prometheus and killed his tormentor.

Promissory Note Written promise to pay on demand or at a specified future time a sum of money to a person specified, or to his order, or to bearer. The note must be signed by the drawer, and the promise must be subject to no conditions. Unlike an I.O.U. which is a mere acknowledgment of a debt, a promissory note is negotiable and if endorsed by the payee (or person to whom the promise is made) to a third party—the endorsee—the latter can sue the drawer whether or not there was valuable consideration in the first place. See BILL OF EXCHANGE.

Proof Spirit Dilute alcohol. It contains 49.24 per cent by weight or 57.06 per cent by volume of absolute alcohol. Its use in pharmacy is now superseded generally by alcohol of a higher strength. Spirit stronger than proof spirit is said to be overproof, if weaker, underproof.

Propagation Continuing a species by processes of reproduction. Most flowering plants effect it naturally by seeds, runners, rooting at the joints, offsets from bulbs or stems above ground, etc. Artificial methods used in horticulture include detaching slips, cuttings, shoots or suckers, dividing the plant into reproductive sections, layering and grafting.

Propeller Revolving mechanism for driving steam or motor vessels, aircraft or machinery. A screw propeller used on vessels takes the form of a shaft with spiral blades and the speed of the propeller is limited largely by centrifugal effect.

In aircraft the term specially refers to the airscrew which propels the machine.

Propertius Sextus Roman poet. Born in Umbria about 49 B.C., he was a friend of Maecenas, Virgil, Ovid, Tibullus and Horace. He is celebrated for his *Elegies* in which he followed the style of the Alexandrine elegiac poets. His poems are mostly concerned with his mistress "Cynthia," a native of Tihar, whose real name was Hostia. The fourth and last book of elegies deals with Roman history. He died about 16 B.C.

Proportional Representation

System of voting. It aims at securing representation of minority bodies according to their numerical proportions. When a constituency returns several representatives the voter records also a second or third choice, according to the number of representatives seeking election. A definite quota of votes is necessary to procure election, the quota being determined after the ballot, according to the number of votes polled and the number of vacancies to be filled. When, on the first count, one or more candidates secure election by polling the requisite number of votes any surplus votes above the quota are apportioned among the other candidates according to the second choice shown on the ballot papers. The candidate with fewest votes is declared defeated, and his votes are transferred to the next preference indicated, this probably enabling a further vacancy to be filled. So the process continues, with transference of votes to next choice, until all the necessary representatives are elected.

Prorogation Discontinuance of a session of Parliament by royal authority without dissolution. Parliament is prorogued at the close of a session by proclamation by the king in person or by His Majesty's commission. See DISSOLUTION.

Prose Form of literature in which ordinary direct language is employed. Prose is distinguished from verse, the other main form of literary expression, by being devoid of metre, but must have rhythm. English prose really began with Alfred the Great, who translated Bede's *Chronicle*. Tyndal's Bible (1525), it has been well said, fixed our standard English. See POETRY.

Proselyte Convert from one religion or opinion to another, originally a Gentile convert to Judaism.

Prospecting Systematic search for minerals. The prospector must be versed in geology and mineralogy. Geology will afford information about underlying strata, lodes, etc., as presaged by exposed sections such as cliff or river bank. Mineralogy will enable him to recognise the surface indications of buried minerals, and to identify them when reached. Apparatus ranges from the primitive divining rod, with which some claim to be able to locate hidden mineral deposits, and the magnetic needle, to delicate and sensitive electrical devices. See MINING.

Prostitution Promiscuous sexual intercourse for gain by a woman known as a prostitute. Regulated prostitution has existed since ancient times, and endures to day in France and elsewhere. In Great Britain it is a punishable offence. See PROCUSSION.

Protection In economics the supporting of home industries.

against foreign competition by a discriminative tariff on imported goods. The opposite of "free trade," in which foreign goods are allowed to enter untaxed. Bound up with the former system is the practice of retaliating against the protective tariffs of another country by a similar measure directed against that country. Thus the tariff can be used as a weapon or a means of bargaining. Another means of fostering and protecting an industry is by granting a bounty or state subsidy on the commodity produced. See BOUNTY, FREE TRADE, TARIFF

Protector Former English title of state. It was borne by one who governed during the minority or absence of the king. In 1216 the Earl of Pembroke was protector, in 1422, Humphrey, Duke of Gloucester, in 1547 the Duke of Somerset, and in 1549 Dudley, Duke of Northumberland. Cromwell (1653) and his son, Richard (1659), held the office of Lord Protector of the Commonwealth. See REGENT

Protectorate Country whose foreign relations are under the control of another state. An example is the former Kenya Protectorate, including territories which belonged to the Sultan of Zanzibar, and were annexed to the British Crown in 1920. Existing British protectorates include those of Nyasaland, Swaziland, Somaliland and Uganda. See MANDATE, PROTECTOR

Protein Group of highly complex organic substances containing carbon, hydrogen, oxygen, nitrogen, sulphur, and sometimes phosphorus. The animal proteins include albumen of the egg, fibrin and globulins of the blood, casein of milk, creatine in muscle, etc. Vegetable proteins include globulins, albumins, glutens and prolamins in various seeds, also nucleo-proteins containing phosphorus in the cells of plants as well as animals.

Protestant Episcopal Church Official title of the Episcopal Church of America in communion with the See of Canterbury, i.e. the Anglican Church in America. Though, as a result of the English colonisation oligarchy were sent out, there were for long no bishops. In 1784 Samuel Seabury was chosen bishop and came to England for consecration, although he had been previously consecrated by a Scottish bishop. The church was organised as a separate denomination in 1789. There are 7299 churches and 1,859,100 members.

Protestantism Faith of those who protest against the Church of Rome. The name Protestants was given to those followers of Luther who protested against the decrees of the second diet of Spire (1529). The effect of the decrees was that certain privileges were withdrawn and the Lutheran or reformed church, henceforth, was not countenanced. The name protestants came soon to be applied to any religious body which had separated from the Roman Church.

The main differences between Protestantism and the older Church are (a) as regards the attitude to the Scriptures, and (b) as to the sacraments and priesthood. To Protestants the Bible is the supreme and ultimate authority. The relation of the soul to God is direct and personal, needing no intermediary, such as a priest, and sacraments, though certain ones are recognised, are not essential to salvation. See ROMAN CATHOLIC CHURCH, REFORMATION

Proteus In ancient Greek legend, a deity of the ocean, the son of Posei-

don. He dwelt in the Island of Pharos and tended the flocks of sea monsters belonging to his father. He was able to assume any shape, and could foretell the future.

Protocol Original draft of a deed or document. The term is applied in diplomacy to the preliminary draft of a treaty, etc. In Scots law a protocol means a record kept by a notary containing a copy of documents executed.

Protoplasm Living substance of all organisms, whether plant or animal. It contains carbon, hydrogen, oxygen, nitrogen, sulphur and phosphorus in very unstable combination, constant changes taking place while it is living. In its physical characters, protoplasm is a colourless, viscid, transparent or often granular substance consisting of a clear viscid portion (hyaloplasm) held in the meshes of a contractile network (spongoplasm), and embedded in it is the cell nucleus, the originating centre of all vital activities.

Protozoa Lowest division of the animal kingdom. Protozoa consist of unicellular organisms which in certain cases are aggregated to form colonies whose constituent cells are independent entities capable of reproducing their kind. Some protozoa are amoeboid, protruding temporary portions of protoplasm for locomotion, others are flagellate, having one or a few protoplasmic threads or flagella, or ciliate, when the threads are more numerous and vibratory. Most protozoa are aquatic, but one group is terrestrial.

Proust Marcel. French author. Born July 10, 1871, he was educated at the Lycée Condorcet, and began early to write stories. From 1902 he was in bad health, during which time he wrote *A la Recherche du Temps Perdu*, a series of 16 vols., the first of which, *Du côté de chez Swann*, was published in 1913. He died Nov. 18, 1922, and the last three volumes were published posthumously. These were *La Prisonnière* (1924), *Albertine Disparue* (1926) and *La Temps Retrouvé* (1928).

Provence Former province of France. Since the Revolution it has been divided up into the departments of Basses-Alpes, Vaucluse, Var, and Bouches du Rhône. An ancient Roman province, it has many relics of that empire, particularly in the neighbourhood of Arles, its old capital. It was the cradle of the mediaeval literature written in the langue d'oc, and produced some famous poets and troubadours. See FRANCE.

Proverbs Book of the Old Testament. A manual of practical life, placed after the devotional manual, the Psalms, it comprises 1-9, a group of wise counsels, 10-22, an anthology of aphorisms in couplet form, 22-24, two collections of quatrains, 25-29, more couplets, 30-31, supplements ascribed to Agur and Lemuel, the latter embodying an acrostic describing the virtuous woman. Finally welded in the post-exilic age, the whole was attributed to Solomon in accordance with the literary usage of the time.

Province Wellesley Part of Penang colony, situated on the mainland. Great Britain annexed it in 1798. It has an area of 262 sq. m., and its principal products are rice, tobacco, sugar and spices. Prai is the capital and principal port. Population (with Penang), (1932) 367,477.

Provost In Scotland, the chief magistrate of a burgh. He is equal in rank to an English mayor. The provosts of Aberdeen, Dundee, Edinburgh, Glasgow and Perth are entitled Lord Provost. Another use of the term provost is for the head of a college.

Provost Marshal Army officer appointed when troops are in the field to be head of the military police. With his assistants he apprehends military offenders and is responsible for executing the decrees of courts martial.

Proxy One who acts for another. The word also denotes the authority by virtue of which the power is delegated. The Companies Acts allow proxies to be used for voting at meetings of shareholders, and on such an occasion the person qualified to vote may thus appoint as his proxy another to act in his absence. A prescribed form must be used for the instrument, which must bear a 1d stamp. Voting by proxy is allowed at bankruptcy proceedings.

Prudhoe Town of Northumberland, on the Tyne, 277 m from London and 11 m from Newcastle on the L N E Rly. It is in a coal mining district. Pop 8921.

Prune Dried fruit of several varieties of the cultivated plum tree. The finest grown in the Loire valley, are called *Frenol* plums. Grown also in Spain and Portugal. Germany, California and elsewhere and eaten as a dessert, they have highly nutritive demulcent and laxative properties.

Pruritus Skin affection, sometimes with out visible eruption, marked by intense itching. It may be set up by diabetes, jaundice, dyspepsia, lice, etc and is aggravated by scratching. When, in advancing years, the skin becomes thin and inelastic, pruritus sensilis, often occasions great suffering and sleeplessness.

Prussia Republic of Germany, the largest and most important state of the Reich. Formerly a kingdom, it grew gradually, its chief components being the Mark of Brandenburg and the State of the Teutonic Order in Prussia. The real founder of the state was the Elector Frederick William (1620-1688), but it was Frederick the Great (1712-1740) who laid the foundations of Prussian greatness by making Prussia a first-class military power. The high water mark of its supremacy as a monarchy was reached under William I and Bismarck (1840-1890), and under William II Prussia remained supreme till the declaration of the republic in 1918. Thereafter it was still considered the key state of the Reich. In the disturbed conditions of 1932 a temporary military dictatorship was set up by the von Papen government. The Nazis seized the government in 1933, and in 1934 most of the powers of the Prussian legislature were transferred to the Reich cabinet.

With an area of 114,108 sq m, Prussia includes part of Schleswig-Holstein, Westphalia, Hanover, districts once part of Saxony-Pomerania and part of Silesia. The chief rivers are the Rhine, Oder, Elbe and Weser.

The republic is rich in minerals, especially coal and iron and has many large manufacturing areas. Berlin is the capital. Westphalia is the chief industrial area and there are wide agricultural districts. Most of the Baltic and North Sea ports are in Prussia. There is much forest land and some trade in timber. Pop 75,989.

EAST PRUSSIA Province of Prussia,

separated from it since 1918 by Polish territory and the free city of Danzig (qv). Only half the province is cultivable, the southern part consisting of forest, moor, sand and bog. Agriculture is the chief occupation. Königsberg is the capital. Area 14,304 sq m. Pop 2,256,350.

Prussic Acid See HYDROCYANIC ACID.

Przemysl Town of Poland. A former Austrian fortress, on the San, it is 60m from Lwów or Lemberg. Besieged by Russian forces early in the Great War, the pressure was relaxed owing to Austrian successes, but with the defeat of Austrian forces on the San in Nov. 1914, the investment was tightened up. Tamassay broke out in Dec but was driven back after four days' fighting. Attempts at relief failed, and the besieged were threatened with famine. An unsuccessful sortie *en masse* was made on March 18, 1915. On March 22 Kusmanek the commander, capitulated and Sellvanoff entered Przemysl. Russia's triumph was shortlived. Austro-German troops stormed the forts on May 30-31, and three days later Przemysl was recaptured to stay in Austrian hands until the end of the war.

Psalms Book of the Old Testament. It comprises 150 "praises" set to music, primarily for Temple use. In the Hebrew Bible it constitutes five books, each terminal psalm being in doxology form. Nearly half—73—were traditionally associated with David and the whole anthology came to be ascribed to him. Mostly of post-exilic date, some clearly reflect the Maccabean age.

Psalter Book containing the Old Testament Psalms, especially when printed separately or paraphrased. The Anglican prayer-book psalter contains the Great Bible version of 1539. The Bible psalter, A.V. or R.V., is in extensive Free Church use. The metrical psalms, employed in Anglican worship for nearly two centuries, still persist in Scotland.

Psittacosis Disease of parrots, communicable by infected birds to man. Outbreaks occurred in England in 1930, which were accompanied by fatal results that year and subsequently.

Psittacus A genus of parrots. The best known is the grey parrot, *P. erythacus*, with ashy-grey plumage and short red tail, ranging from the Guinea coast to Lake Nyasa. Assembling in large flocks by day and feeding on palm nuts and other fruits it makes no nest, 2-4 eggs being laid in the bottom of a hole. Both parents sit alternately. A familiar cage bird in Europe for centuries, often long lived, its remarkable power of repeating words is shared by both sexes.

Psoriasis Skin affection marked by flat dry patches covered with silvery white scales. Its cause is unknown. It may appear in childhood and persist for years or disappear spontaneously, recurrence being common. The elbows and knees are first affected, and it may spread to the scalp and other regions.

Psyche In classical mythology a beautiful maiden the favourite of Cupid. Cupid was sent to cause her to fall in love with the meanest of mortals, since Aphrodite was envious of her beauty. Cupid, however, became enamoured himself. Parted by the jealous wiles of her sisters Psyche set out in search of her lover, finally, after long

travels, finding him again. She was made immortal and the lovers were reunited. See **CUPID**

Psychical Research Systematic investigation into phenomena, regarded as appertaining to the spiritual sphere. In 1882 was founded the Society for Psychical Research, whose object is the investigation of apparitions, hauntings, clairvoyance, spiritualistic manifestations, etc. The society's address is 31 Tavistock Square, Bloomsbury, London, W C 1

Psycho-analysis Method devised by Sigmund Freud for exploring mental processes and investigating basic motives. It utilises dreams as a means of investigation, Freud's theory stating that these are a manifestation of wishes and desires buried in the unconscious, and generally have to do with repressed images, thoughts, etc., which assert themselves—often in an altered form—during sleep. Freud says that if such buried complexes can be brought to conscious ness the mental conflicts between conscious and unconscious which produce neurosis and other troubles, can be resolved and the patient cured. According to the Freudians, the majority of buried complexes are related to suppressed sexual urges. See **DREAM**, **FREUD**, **JUNG**

Psychology Science of mental phenomena. It investigates psychical processes or states and the conditions under which they arise. Its main methods of approach are introspection and inference. The first is "looking within," the second infers from the actions of others the mental processes giving occasion to them. Another line of study is the examination of the mental life of others, e.g., the child from infancy to adult life.

Social psychology deals with the mental phenomena of communities, industrial psychology with the special problems of factory life, etc., comparative psychology deals with the behaviour of animals as compared with humans.

Behaviourism, a development of the latter, sought originally to explain behaviour as a product of reflexes—responses to stimuli— independent of consciousness.

Psychotherapy Treatment of disease by psychological means. Mainly employed for so called functional nervous disorders now regarded as mental in origin, its technique includes suggestion, with or without hypnotic sleep, auto-suggestion as advocated by Coué, persuasion as practised by Dubois, and psychological analysis, including the special form, psycho-analysis, elaborated by Freud (q.v.)

Ptarmigan Game-bird of the grouse family (*Lagopus mutus*). About 15 in. long, it differs from the red grouse (q.v.) in having feathered feet and assuming nearly white winter plumage, with black outer tail feathers. It ranges over Scottish moors above 2500 ft., laying 8-10 buff eggs in rough ground-nests; it becomes tame during the nesting season.

Pterodactyl Any member of the extinct order of flying lizards found fossil in mesozoic rocks from the Lower Liassic to the Upper Cretaceous in England, Europe and N America. Long-tailed or tailless, large headed, wide mouthed, toothed or toothless, with flexible necks, they had smooth bat-like membranes extended by the enormously elongated "little finger" of the

fore-limbs, the other fingers being short claws. They were more or less bird-like, with hollow bones, varying from the size of a sparrow to a 25-ft wing spread.

Ptolemy Name of a dynasty of Egyptian kings (305 B.C. - A.D. 40). The first, named Soter, a general under Alexander, became satrap of Egypt on Alexander's death in 323. In 305 he took the royal title. Notable for his building of the library and museum at Alexandria, he was a patron of literature and science. He abdicated in 285. His son and successor, Philadelphus (305-246 B.C.), also fostered the arts. Ptolemy III (Euergetes), son of the last named, became king in 246. He made great conquests from Seleucus. The legitimate line ended in 80 B.C., when Ptolemy X was assassinated, the crown going to a natural son of Soter II (Ptolemy VIII). He was named Auletes, or the flute player. Auletes' son, Philopator, succeeded in 51 B.C., reigning jointly with his sister, Cleopatra, as Ptolemy XII. On his death by drowning in 47 B.C., his younger brother became Ptolemy XIII and reigned also with Cleopatra. The last two kings of the dynasty were son and grandson of Cleopatra, Ptolemy XV, dying in A.D. 40. See **CLEOPATRA**.

Ptolemy Egyptian astronomer and geographer, Claudius Ptolemaeus. He was at Alexandria, A.D. 127-51, and embodied his learning in a work of 13 volumes which became known by the Arabic name of *Almagest*. His system, the Ptolemaic, represented the earth as the fixed centre of the universe, the sun, moon, other planets and stars revolving about it from E to W in separate zones.

Ptomaine Basic substance formed in a nitrogenous organic tissue during putrefaction. Ptomaines of animal origin, formerly classed with vegetable poisonous alkaloïds, pertain to various classes of chemical compounds, not necessarily noxious. In popular usage cases of poisoning by meat, etc., are loosely attributed to ptomaines, although some at least arise from disease-producing bacteria.

Public Health Term used for the health of the community as a whole. The various councils employ medical men, sanitary inspectors and others, and the Ministry of Health has a large staff. Their duties are concerned with infectious diseases, sanitation, supplies of food and drink, infant mortality and kindred matters. There is in London an Institute of Public Health at 37 Russell Square, W C 1, which carries on educational work including research.

Public Prosecutor Legal official, in full the Director of Public Prosecutions. He takes action on the instructions of the Attorney-General, e.g., in 1929 the prosecution of C. G. Hatry and his associates. Sometimes facts come to light in legal proceedings which make it desirable for the judge to send the papers to the Public Prosecutor, who has an office at 1 Richmond Terrace, Whitehall, London, S W.

Public Trustee Public official appointed in 1900 to act as executor and trustee. Any one can name him as the executor and trustee of a will, thus obtaining the security of the State against fraud. He charges a regular scale of fees. The offices are in Kingsway, London, W C 2, and there is a branch office in Parsonage Gardens, Manchester.

Publishing Business of preparing books for the public. The early publishers were also booksellers and in the 18th century books were published by a number of booksellers jointly, each taking a certain number. In the 19th century the two businesses became separate. Edinburgh became a great publishing centre, but after a time the pre-eminence, as far as Great Britain was concerned, passed to London. Leipzig is another city famous as a publishing centre and books are published in most of the university towns.

Some publishers confine themselves to a particular branch of literature, e.g., medical books, while others are general publishers. With the aid of readers their business is to decide which of the manuscripts submitted shall be published by them. They must then arrange for the printing of the books chosen, for their distribution to the trade and for the necessary publicity.

PUBLISHING AS A CAREER—The staff whose duty it is to select and prepare manuscripts for the press is usually recruited from the universities, the production departments are usually reached after a period of apprenticeship.

The necessary qualifications are a wide general knowledge and some literary and artistic taste with potentialities for developing quickly a full knowledge of the technicalities of the trade and a sound judgment on the commercial value of contemporary literature. On the whole the sales side offers the most promising monetary rewards.

Puccini Giacomo Italian composer. Born Dec. 3, 1858, at Lucca, he studied at Milan and achieved his first success with the opera *Manon Lescaut* (1893) and *La Bohème* (1896) brought him fame. Of his other operas the two best known are *La Tosca* (1900) and *Madame Butterfly* (1904). In 1911 he came to London to superintend the production of his *Girl of the Golden West*. His last opera, *Turandot*, was produced in 1926 at Milan. He died Nov. 29, 1924.

Pudsey Borough of Yorkshire (W.R.), 6 m. from Leeds, and 189 m. from London, by the L.N.E. Ry. Here are metal and textile works. Pop. (1931) 14,762.

Puerperal Fever Notifiable disease of childbirth caused by septic infection of the womb, etc. Formerly responsible for many deaths, it has been largely prevented by modern aseptic methods, and by the employment of trained midwives and maternity nurses. It is still a very serious problem, however, as there has been little decrease in its incidence in recent years. Fever is the warning sign, usually appearing about 3 days after childbirth though it may occur much earlier.

Puff Adder Repulsive venomous viper (*Crotalus arietans*), distributed over nearly all Africa. The large flattened head and thick body, 4-5 ft. long, are covered with longitudinal rows of scales, mottled brown above and greyish white beneath. When irritated its indrawn breath, visibly swelling the body, gradually escapes. Bushmen smear the venom on their arrow tips.

Puffin Genus of sea birds of the auk family (*Fratercula*). The common puffin, *F. arctica*, 12 in. long, has black and white plumage, reddish feet, and brilliantly coloured bill, sea orange and bluish-grey, with horny sheath like plates which moult

after the breeding season. Common on the rocky Atlantic coasts of Europe and the W. coasts of the British Islands and laying one mottled whitish egg, it winters in the Mediterranean region. Horned puffins and tufted puffins inhabit the N. Pacific.

Pug Dog Breed of toy dog. Of the miniature bulldog, mastiff group, suggesting a miniature bulldog, it was introduced from Holland and much esteemed throughout the 18th century. Victorian England produced the modern strains.

Pugin Augustus Wolby Northmore English architect. Born March 1, 1812, he became an architect, helped to prepare a large series of drawings of European Gothic buildings and was enthusiastic for the revival of the Gothic style in England. He helped to design the new Houses of Parliament at Westminster, in 1837-43, and designed for the Roman Catholic Church the cathedral of St. George in Southwark, those at Nottingham, Killarney and elsewhere, as well as Farm Street Church, Berkeley Square, London. He died Sept. 14, 1862.

Pulborough Parish and market town of Sussex. It is on the Arundel road, 46 m. from London, near the confluence of the rivers Arun and Western Rother. Originally a Roman fortress on the road from Regnum to Londinium, it still bears traces of Roman occupation.

Pulham Market Village of Norfolk. It is 17 m. from Beccles and has an aerodrome with a mooring mast for airships. Near is Pulham St. Mary. Both villages are served by the L.N.E. Ry.

Pulley Mechanical device for lifting heavy objects. It consists of a grooved or flat rimmed wheel (sheave) free to rotate upon an axle or pin fixed in a block or frame and over which a cord passes to a weight. By securing one end of the cord to a beam and passing it around a system of pulleys a mechanical advantage is obtained in the decrease of the power required.

Pullman George Mortimer American inventor. He was born in 1831 and entered the building trade. The first Pullman sleeping car was built in 1863, after which he designed the corridor train and the modern restaurant car. He died Oct. 19, 1897. In 1880 he founded a model town on the outskirts of Chicago for his employees, and called it Pullman. This was eventually made part of Chicago.

Pulpit (*l. pulpitum*, a stage). In ancient Rome a section of the stage reserved for the actors. From this followed the raised and enclosed structure used in the Christian church for the delivery of sermons. Pulpits are constructed of wood, usually carved and decorated, or stone or marble. Notable examples of marble are in the cathedral of Siena and the baptistry at Pisa. Of out-door pulpits an example is in the quadrangle of Magdalen College, Oxford.

Pulse Intermittent distention of the walls of an artery. It is caused by changes in blood pressure due to the heart's action. The sudden distention of the aorta when blood is expelled from the heart is conveyed in lessening degree to the arteries, and where an artery is near the surface, for example, the radial artery, the pulse can be easily felt although its frequency varies with age, sex and other factors.

Puma (*Felis concolor*). Large American cat ranging from British Columbia to Patagonia. Called the American lion, panther or painter, catamount and cougar (*q v*). It measures 3½ ft. with 2 ft. tail. The head is relatively small and maneless, with flesh-coloured nostrils, the tail dark-tipped and untufted, and the uniformly tawny fur darker along the back and paler beneath.

Pumice Light spongy form of volcanic glass. It is usually a greyish, froth-like scum formed on molten lava by the abundant escape of vapours and rapidly solidified. Mostly imported from the Lipari Islands, it is a useful polishing and smoothing stone, powdered and mixed with soap. It makes a metal-polish.

Pump Machine used for raising water or for drawing out or forcing in air. The simple suction pump utilises air pressure and consists of a cylinder or barrel in which a piston freely moves by the action of a lever or handle, and is provided with a valve opening upwards in the piston head and another lower down in the barrel to ensure the pump being air tight. This type is used for wells and similar purposes. To overcome various mechanical difficulties a double-acting plunger pump or one having two buckets or piston heads is often employed. Rotary pumps worked by revolving wheels, discs or fans are used extensively, one type being the centrifugal pump, the principle involved being that of a reversed turbine action. In another type the liquid is acted upon by gas, steam or compressed air.

Pumpkin (*Cucurbita pepo*) Trailing annual herb of the gourd order, presumably indigenous to W Asia. Each plant bears male and female flowers separately, the latter developing into the fruit, sometimes weighing 80 lb and more. Cultivated in antiquity, and introduced into Tudor England, its varied forms, including vegetable marrows, are widely grown in continental Europe, N America and elsewhere.

Punch Alcoholic beverage. In theory it should contain five ingredients, the origin of the name being the Hindu word meaning five. The particular brand of punch is decided by the spirit which is the main ingredient. It may be rum, whisky or brandy. To this are added spices, fruit juice, sugar and hot water.

Punch British journal. It was first published on June 17, 1841, and was announced as an illustrated weekly. The editor's chair was occupied by Mark Lemon for many years, and his successors have included Shirley Brooks, Sir Francis Burnand and Sir Owen Seaman. On the artistic side the staff has numbered such well-known names as Tenniel, Leech, Phil May, Claude Shepperson, Sir Bernard Partridge and many others. Its scope is social and political satire, literary and dramatic criticism and general humour. It has been invaluable to historians of the period during which it has been published.

Punchinello Traditional figure of the Commedia dell'Arte. He has something in common with Harlequin. He wears a black mask and a large nose, is a braggart and a rogue, with a rough, country wit. Punch of the Punch and Judy show derives his name from the same source, which probably means short and fat.

Punic Wars See CARTHAGE.

Punjab Province of India. It occupies the NW angle of the Northern plain. The name is derived from two Hindustani words meaning five rivers, the rivers in question being the Sutlej, Chenab, Ravi, Beas and Jhelum. It has an area of 99,222 sq m and a population of 23,580,851. The province is divided into five divisions: Amballa, Jullundur, Lahore, Rawalpindi and Multan. Agriculture is the main industry and the principal crops are wheat and barley.

Pupa Zoological term for the resting stage in the metamorphosis of many insects. At the end of the larval period the insect undergoes changes in external form, followed by moulting, the pupa taking on characters approaching those of the perfect insect. Most pupae are quiescent, but locomotion occurs in some aquatic types such as the gnats.

Pupil Circular opening in the middle of the eye immediately in front of the crystalline lens. It regulates the amount of light entering the eye, contracting in a strong light and enlarging in darkness or in focusing distant objects. These changes are also brought about by the action of drugs such as opium or belladonna, the former contracting and the latter dilating the pupil.

Purbeck Peninsula of Dorset 12 m long, it lies between Poole Harbour and the English Channel with the River Frome on the W. Swanage and Corfe Castle are on the peninsula, which is famous for its marble, really a limestone used for paving. It was once a royal forest. China clay is mined.

Purcell Henry English composer. Born in London about 1658, he was a chorister at Westminster Abbey, and his early writings included overtures, anthems and masques. In 1680 he became organist at the Abbey and devoted himself to the composition of sacred music. His *Te Deum* and *Jubilate*, written in 1694, are outstanding. Other notable works are the masque of *Timon of Athens*, and the opera, *Dido and Aeneas*. Purcell died in London, Nov. 21, 1695, and was buried beneath the organ in Westminster Abbey.

Purchas Samuel. English writer. Born about 1575 at Thaxted, Essex, he was ordained in the Church of England, and from 1614-25 was rector at St Martin's, Ludgate Hill, London. He died in 1626. While in London Purchas obtained some of Hakluyt's manuscripts and from these and other sources compiled *Purchas his Pilgrimes or Hakluytus Posthumus*, described as *A History of the World in Sea Voyages and Land Travels by Englishmen and others*. It was first published in 1626.

Purfleet Seaport of Essex. It stands on the Thames, 16 m. from London, on the L.M.S. Rly. It has a small harbour and facilities for storing oil.

Purgatory Place or state, according to Roman Catholic belief, in which souls after death are purified from venial sins and otherwise rendered fit for heaven. The Roman Catholic doctrine, formulated by Gregory the Great, and confirmed by the Council of Trent, recognises a purging by fire, which may be mitigated by the prayers and alms of the faithful. The Orthodox Eastern Church more vaguely recognises an intermediate state of tribulation. Protestant Reformers as a body rejected the doctrine.

Purification Religious term. It is used to denote the ritual cleansing enjoined by Judaism as well as other religions to secure the moral purification of the worshipper. In Judaism the four main types of ritual uncleanliness demanding purification were connected with food, leprosy, childbirth and death. The Purification of the Virgin Mary (Luke II, 22) is commemorated by the Church on Feb 2.

Purim Jewish festival. Secular rather than religious, it commemorates the national deliverance from the plot of Haman (q.v.). It occurs about a month before the Passover, on 14th and 15th Adar, preceded by the Esther fast. Present giving, formerly the burning of effigies of Haman, and other carnival incidents, contribute to the festivities.

Puritans Name given in Elizabethan England to advanced Protest. ant clergy who advocated stricter manners and simpler worship than generally obtained after the severance from Rome. It came to embrace both tolerationists and men who sought to enforce their opinions and ways of life upon others, even to regulating their pleasures. The Puritan spirit long prevailed in New England.

Purley District of Surrey. It is 13 m from London and has two stations, Purley and Purley Oaks, on the S. Ry. It forms part of the urban district of Coulsdon and Purley. See COULSDON.

Pus Thick yellowish white fluid, abounding in dead white blood-corpuscles and disease germs. Produced by inflammation, it is discharged by abscesses, ulcers, granulated surfaces and open wounds.

Pusey Edward Bouverie. English divine. Born at Pusey, in Berkshire, Aug. 22, 1800, the son of a landowner, he was ordained in the Church of England and later became Professor of Hebrew and canon of Christ Church, Oxford. He died Sept. 16, 1882. Pusey is regarded as the founder or restorer of the High Church movement in the Church of England. Its principles are contained in his sermons and writings including *The Doctrine of the Real Presence* and one of the *Tracts for the Times*.

Pusey House in St. Giles, Oxford, is a centre for students of theology.

Push Ball American game. Invented in 1894, it was originally played by two sides on a field about 150 yds long by 50 yds wide, with a large rubber ball 8 ft. in diameter. The object was to push this ball into a goal 18 ft. high by 20 ft. wide.

Pushkin Alexander Sergeyevich. Russian poet. Born May 26, 1799, of a aristocratic family, he was educated at Tsarskoye Selo. He published poems, but his first notable success came in 1820 with *Ruslan and Lyudmila*. Boris Godunov was published in 1825, *Pollara* in 1826, and in 1832 came his autobiographical poem, *Eugene Onegin*. More than once his opinions caused clashes with the authorities. He died Jan. 29, 1837, from a wound received in a duel.

Putney District of London, in the borough of Wandsworth. It is situated on the Thames, and is largely residential, being served by the District Ry. and a suburban branch of the S. Ry. Putney Heath is a fine open space adjoining Wimbledon Common. Close to Putney Bridge station is the Hurling ham Club. Pop. 28,240.

Putty Plastic mixture of linseed oil and whiting used for glazing windows and filling holes in woodwork. Plasterers' putty is a fine cement of lime and water.

Putumayo River and territory of Colombia, S. America. The river, navigable for 700 m., is a tributary of the Amazon, which it joins near Sao Antonio. The territory belongs partly to Ecuador and partly to Peru. Mocoa is the capital.

Here, in 1909, official enquiries into the treatment of native labourers in the rubber plantations of a British company led to punishment of the offenders by the Peruvian government.

Pwllheli Borough, seaside resort and market town of Caernarvonshire. It is 21 m from Caernarvon, 266 m from London by the G. W. Ry., and is situated on Cardigan Bay. It has a good beach. There is fishing and a little shipping. Pop. (1931) 3599.

Pyæmia Form of septic poisoning. It is caused by the absorption of organisms into the blood stream from an open wound or infected organ. This is followed by the formation of numerous abscesses, accompanied by rigors, high temperature, profuse perspiration and a condition of extreme exhaustion.

Pygmalion In Greek mythology a king of Cyprus who fell in love with an ivory statue he had made. He prayed to Aphrodite to grant life to the statue. His prayer being granted he married the maiden. Another Pygmalion was brother of Dido, and slew her husband.

Pygmy Name for a human being naturally diminutive. It was first used by Homer for an Ethiopian folk apparently known through travellers' tales. The pygmy races nowadays comprise specifically Asiatic Negritos and African Negrillos, measuring 4 ft. 11 in. down to 3 ft. 0 in. and even lower. See DWARF, NEGRO.

Pylon Massive towers flanking the entrance to temples and other buildings in ancient Egypt. These towers, of greater height than the gateway, sloped upwards and their surfaces were covered with carved hieroglyphic inscriptions. They usually had a narrow staircase leading to the top.

To-day the name is given to supports of bracing wires in aeroplanes and to the structures carrying electric cables across country.

Pylorus Greek word, 'gate keeper,' denoting the lower opening of the stomach. The stomach's muscular coats at the pyloric end are strengthened by thick muscular fibrous bands which contract while a meal is being digested, and at varying intervals relax, passing the semi fluid chyme into the small intestine for further digestion. See DIGESTION.

Pym John. English statesman and patriot. Born at Brymore, Somerset, in 1584, he entered Parliament in 1614, assisted in Buckingham's impeachment in 1620, supported the Petition of Right in 1628, led the Short Parliament of 1640 and the impeachment of Strafford in that year, and shared in the Grand Remonstrance in 1641. He was one of the five members who escaped arrest by Charles I., was interested in colonisation and for many years schemed for the settlement of Connecticut. He died Dec. 8, 1643.

Pyorrhæa Discharge of pus, specifically from the gums surrounding the necks of the teeth. It is associated

with inflammation of the gums, softening of the bony socket and loosening of the teeth. The diseased condition is fostered by stagnation of the mouth's natural self-cleansing processes and the deposition of tartar. It may be avoided by systematic care of the teeth, including rubbing, brushing and scaling, the use of a mouth wash, the due consumption of vegetables and fruit, etc.

Pyramids The Anolent Egyptian monumental structures. They are built of stone with polygonal or square base and sloping sides meeting at the apex. Built as royal tombs, with a hollow chamber inside for the sarcophagus, about 70 have been discovered, and 16 identified. They stand in the desert a few miles east of Cairo. Among the most famous are the three great pyramids of Gizeh. A fourth pyramid was discovered here in 1932. The largest of all the pyramids is the pyramid of Cheops, dating from the 4th Dynasty. It measures 755 ft. on each side, is 451 ft. high and covers 13 acres. It is estimated that in its construction 6,000,000 tons of stone were used, and 100,000 men employed for 20 years, with mechanical aids which still remain a mystery.

Pyramids Game similar to billiards. It is played with 15 red balls placed at the top of the table in a triangle. The two players use the same white cue-ball alternately, the winner being the one who pockets the greater number of red balls.

Pyrenees Mountain range dividing France from Spain. It is 270 m. long and the highest point is Ploethen or Maladetta, 11,168 ft. Various minerals are found—silver, lead, copper, lignite, iron, etc.—and have been worked since classical times. The Garonne rises on the N. side, and the Aragon, Noguera, etc., on the S. Popular resorts in the Pyrenees include Pau, Lourdes and St. Jean de Luz, and other places of interest are the famous cirques, or great basins hollowed out by water.

Pyrethrum Gardeners' name for several composite perennial herbs of the chrysanthemum genus when ranked as a sub-genus. The common golden feather of gardens is a yellow-leaved variety of feverfew. An ornamental large-flowered garden species from Asia Minor, sometimes double, is akin to forms grown commercially in Dalmatia and Japan for the insect-killing pyrethrum powder.

Pyrheliometer Instrument for measuring the intensity of solar heat. In Angström's pyrheliometer the solar radiations are received on a blackened platinum strip connected with another similar strip heated by electricity. These are joined to a thermo-couple and the amount of current required to give equality of temperature is proportionate to the solar intensity.

Pyridine Colourless liquid obtained by fractional distillation of coal tar and bone tar. Its strong basic properties form a series of salts with acids and substitution products with halogens. It boils at 115 deg. C. and is unattacked by boiling nitric and chromic acids. It is used in the denaturing of alcohol.

Pyrites Minerals containing sulphido of iron (iron pyrites) or sulphides of copper and other metals. Iron pyrites is a brass yellow hard mineral crystallising in cubic forms and important as a source of sulphuric acid and iron sulphate. Marcasite is a rhombic form of iron pyrites, paler in colour. Pyrrhotine

contains nickel, while mispickel contains arsenic. Copper pyrites, an impure copper ore, occurs in yellow tetragonal crystals or in massive form.

Pyrography Art of producing designs on wood by charring the surface with heated metallic points. In its simplest form it is called "poker-work" (q.v.).

Pyrometer Instrument for measuring high temperatures above those registered by ordinary thermometers especially with regard to the fusion of metals, the firing of bricks and pottery ware. One form, Seger's cones, consists of specially blended clay cones which soften at certain temperatures. Rods of porcelain, iron or platinum also are used for rough estimation of temperature, but electrical devices such as thermo-electric couples of platinum and iridium or palladium cased in porcelain give better results.

Pyrrhol Liquid constituent of coal tar and bone oil. It has the odour of chloroform, and is obtained by fractional distillation. It has secondary basic properties and from one of its derivatives, potassium-pyrrhol, by the action of iodine and an alkali, an antiseptic used in medicine known as eol is obtained.

Pytchley English hunt. It was founded about 1750 in Northamptonshire and the succeeding Earls Spencer have been closely associated with it. The country stretches from Market Harborough to Northampton, and the kennels are at Brigstock. In 1874 the Woodland Pytchley was established to hunt part of the Pytchley country.

Pythagoras Greek philosopher. Born at Samos about 582 B.C. he lived there for a time, but afterwards moved to Crotona. There about 539 he started a school and gathered round him an enthusiastic band of followers. The central idea of his philosophy was that number was the first principle of the universe, and on it depended the harmonies which keep the universe in ordered motion and create music and art. Pythagoras was also a mathematician, and is believed to have first discovered the principle laid down in Euclid's famous 47th proposition.

Pythias See DAMON

Python In Greek mythology a serpent generated from the mud left by the deluge of Deucalion. It inhabited Mount Parnassus, where it was killed by Apollo. The Pythian games of Greece are supposed to have celebrated this victory.

Python Genus of non-venomous snakes of the boa family, inhabiting tropical Asia, Africa and Australia. Both jaws are fully toothed, the prey, up to small goats in size, is crushed by the snake's powerful coils and swallowed from the head downwards. Dwelling in trees near water, pythons include the largest of all snakes except anacondas. Averaging 10 to 20 ft., the netted python of Indo-China and the rock-snake of India and Ceylon sometimes attain 30 ft. The female incubates her eggs.

Pyx In Roman Catholic usage, a vessel employed, since the 8th century, for holding the consecrated bread of the Eucharist, when reserved for administration to the sick or for adoration. The name is also given to a chest holding representative gold and silver coins struck at the Royal Mint, awaiting the annual "trial of the pyx."

-BOAT Term used during the Great War for a ship designed to deceive and destroy hostile submarines. Disguised as merchant or fishing vessels, they were armed with hidden guns, and carried a fighting crew

Quadragesima Latin word meaning "fortieth"

It denotes the 40 days' Lenten fast before Easter. The first Sunday in Lent is called Quadragesima Sunday

Quadrangle In plane geometry a closed figure contained by any four straight lines such as a rectangle, rhombus, etc., and particularly to one in which the sides and angles are equal. The term is also applied to a rectangular court yard surrounded by buildings

Quadrant Nautical instrument formerly used in navigation for determining altitudes by taking angles. It has been superseded by the sextant. It consisted of a graduated brass limit in the form of a quarter of a circle with usually a plumb line to mark the zero during an observation

Quadrature In mathematics, the process by which a square is found, exactly or approximately, having its area equal to that of a given figure. A famous example is that of "squaring the circle". In astronomy the term is applied to the position of a heavenly body in relation to another 90 degrees distant

Quadrilateral Term in military science for a group of fortresses arranged more or less at the corners of a square for strategic purposes. A well-known example was the quadrilateral formed by the fortresses of Mantua and Peschiera on the Mincio and Verona and Legnano on the Adige in N Italy

Quadrille Dance for four couples. The dancers stand in a square, hence the name, which comes from the Italian *squadra*, a square. The dance was introduced into the French ballets of the 18th century.

Quadroon Word of Spanish origin meaning "quarter blooded," denoting the offspring of a mulatto and a white. In early Spanish America, before negro immigration began, it denoted the offspring of an American Indian half-breed and a white. It is sometimes applied to other similar racial crossings also in plants and animals

Quaestor Official in ancient Rome. His early duties were to investigate cases of murder and to carry out sentences on the criminals. In republican times the duties of the office were chiefly financial, the quaestors being the keepers of the public treasury

Quagga Racial variety of the zebra (*qv*). The light red upper parts bore irregular chocolate brown stripes, gradually fading to the hind quarters, with white underparts. Ranging over S African plains S of the Vaal river in immense herds a century ago, it was indiscriminately slaughtered by the Boers for its hide, and for half a century has been extinct

Quail Genus of small Old World game-birds of the pheasant family (*Coturnix*). The migratory quail (*C communis*), 7 1/2 in long, more or less regularly visiting Britain in spring, lays 7-12 blotched, creamy-white eggs in ground hollows, sometimes remaining through the winter. Vast numbers, crossing the Mediterranean in spring and autumn, are noted for feed in S Europe

Quake Grass or Dodder Grass. Genus of perennial or annual grasses (*Brixa*) natives of temperate Europe, Asia and Africa. Slender stalked, many flowered pyramidal clusters bear large compressed fromuleous spikelets. The common quake grass, *B media*, and a smaller one with tufted stems, grow wild in Britain. The tall *B maxima* is much cultivated in gardens for decorative uses

Quaker Colloquial name for a member of the Society of Friends. It was given to them in derision soon after the founding of the sect in the 17th century. See SOCIETY OF FRIENDS

The quaker bird is another name for the sooty albatross

Quamash Genus of perennial herbs of the lily order (*Camassia*), natives of NW America. The best known, *C esculenta* 1-3 ft high, produces stout-stemmed spikes of 10-20 blue 2 in flowers. Pure white and other forms are grown in gardens for house decoration. The buds open after the stems are cut. American-Indians use the bulbs for food

Quantity Surveyor Surveyor who estimates for a builder quantities, measurements and costs from a plan prepared by an architect. He must have sufficient knowledge of architecture and the building trade to interpret plans and estimate the labour required

Quantocks Range of hills in N Somerset, extending for about 8 m to the coast of the British Channel near Watchet. The highest point is 1260 ft high

Quantum Theory Theory in physics. Certain experimental results in the study of radiation could not be explained theoretically according to Newton's dynamical laws. Planck suggested that from such radiating bodies energy was transferred in separate quantities of definite magnitude, which he called "quanta". The development of this theory has led to the modern conception of atomic structure

Quarantine Preventive detention, originally for 40 days of ships persons and goods, arriving from a country where certain infectious diseases prevailed. Of Venetian origin, directed specifically against plague during the Black Death, and later against cholera and yellow fever, the period and regulations varied. It is now mostly superseded by concerted international action, and in England by the British Public Health Act, 1904. Isolating imported dogs for a defined period, usually 6 months, is popularly called quarantine

Quarry Bank Urban district of Staffordshire. A colliery centre, it is a mile from Dudley, and has iron-works. Pop (1931) 8100

Quarrying Excavation of stone from an open pit. The methods adopted vary chiefly according to the position and nature of the stone, but usually the excavation is made on the side of a hill. Where possible the planes of bedding or joint planes are used for removing the blocks but in some rocks where these do not exist, the use of wedges and blasting is employed to loosen the material.

Quart English measure of capacity. It is two pints and is the quarter of a gallon. In music the interval of a fourth is called a quart.

Quarter Measure of weight and capacity. It means a fourth part, and is used for the fourth part of a hundred-weight (28 lb). Quarter is also used as a measure of wheat, a quarter of English wheat being 504 lb. As a measure of capacity it is equal to eight bushels. The fourth part of a year is also a quarter; and the periods of the moon are known as quarters.

Quarter Day Four days in the year on which rent and other liabilities are due. In England and Ireland they are March 25 (Lady Day), June 24, Sept. 29 and Dec. 25. In Scotland the quarter days are Feb. 2, May 15, Aug. 1 and Nov. 11.

Quartering In heraldry, the bearing of two or more coats of arms on a shield. It usually denotes a marriage. The arms are divided by horizontal and perpendicular lines. At one time in Austria and elsewhere, persons were not eligible for certain distinctions unless they could show 16 quarterings.

Quartermaster In the British Army, a quartermaster is an efficient warrant officer or CO under whose care are the stores, rations and equipment.

Naval quartermasters are petty officers who, in harbour, act as night-watchmen, and during the day see that the orders of the ship's company are carried out. At sea the quartermaster either takes the wheel himself, or supervises the seaman who is doing so.

Quarter Sessions In England a court of law held four times a year. Each county has one or more quarter sessions. The judges are the magistrates for the county, and the cases are those that are sent on to them from the courts of petty sessions. Certain cities and towns also have a court of quarter sessions which is presided over by the recorder.

Quarterstaff Weapon for hand-to-hand encounters popular in England down to Commonwealth times. A stout pole, 6½-8½ ft long, sometimes iron-shod, was grasped by the left hand about the middle, and by the right a quarter from the lower end.

Quarto Page of a certain size, also a book of pages of that size. In it the sheets are folded into four, and its sign is 4to. To-day book publishers recognise as quarto foolscap, 8½ in × 6½ in, crown, 10 in × 7½ in, demy, 11½ × 8½ in, royal, 12½ in × 10 in, and imperial, 15 in × 11 in.

Quartz Widely distributed mineral consisting of silica and forming a constituent of sands and many rocks. It occurs in masses or as crystals forming hexagonal prisms and pyramids having a vitreous lustre and great hardness. Quartz is colour-

less (rock crystal) or white, yellow, brown or violet. Many varieties are cut as ornamental stones. Rock crystal is used for spectacle lenses, fused quartz for chemical and physical apparatus.

Quassia Bitter wood employed chiefly in medicine. Originally from a Surinam tree of the simarubaceae order, *Q. amara*. Surinam quassia being still used in France and Germany, the allied W. Indian bitterwood, *Picraena excelsa*, superseded it after 1809, and is known as Jamaica quassia. The infused chips provide a tonic, vermifuge and hop-substitute.

Quaternary In geology the group of strata of most recent age. It is sometimes referred to as Post-Tertiary. The deposits vary much in character, and for the most part are unconsolidated. They include alluvium of present rivers and lakes, marine deposits, also cave deposits and glacial or drift formations.

Quaternions In mathematics a calculus used in solving various geometrical and dynamical problems in physics and engineering. From the point of view of geometry it concerns operations with vectors or quantities possessing magnitude and direction, and the changes of one vector into another. It was invented by Sir W. R. Hamilton about 1853.

Quatrain In poetry a stanza of four lines. The lines usually rhyme alternately as in the hymn by Isaac Watts, "O God, our help in ages past." The stanzas of Tennyson's "In Memoriam" are also called quatrains, although in these the first and the last lines rhyme, as do the two middle ones.

Quatre Bras Village of Belgium 19 m from Brussels. Here, on June 16, 1815, two days before the Battle of Waterloo, the Dutch and Belgian troops, part of Wellington's army, were attacked by the French under Ney. British troops advanced to assist their allies, and after a hard fight succeeded in beating back the French.

Quatrefoil Architectural term for a window or panel formed of four lobes, or segments of a circle projecting at a tangent from the inside of a circle and meeting at points or cusps.

Quaver Musical note equal to half a crotchet or one eighth of a semibreve. As a pulse-note it is symbolised by 8 in the lower half of a time-signature.

Quay Landing-place on the side of a river, harbour or docks, for receiving and discharging cargoes from ships. Usually a quay is provided with cranes and other appliances for handling goods and berthing vessels. Quays are constructed of stone or concrete with generally a facing of wooden piles.

Quebec City and seaport of the province of Quebec, Canada; the capital of the province. It stands on the north shore of the River St. Lawrence, 180 m from Montreal, on a tableland rising to 333 ft. above the river. Founded by Champlain in 1608 on the site of an Indian settlement, Quebec was taken by the English in 1629, restored to the French in 1632, and held by them till its capture by Wolfe (q.v.) in 1759.

The lower town, with steep, winding streets, is the old town and the business quarter of the city. The upper, with wide streets, open spaces and modern buildings, contains dwelling houses, public buildings, parks, etc. Beyond the

adel are the Plains of Abraham (*qv*) where Wolfe defeated Montcalm (*qv*). Notable buildings are the Château Frontenac Hotel, the citadel, the Roman Catholic Cathedral (1647), Laval University, the provincial Parliament House and the Hôtel Dieu, founded in 1639.

The city has a fine harbour, deep enough for the largest ships, with a government grain elevator. New wharves have been constructed at Wolfe's cove. It is served by both C P and C N Ry's, the former crossing the St Lawrence by the great Quebec Bridge, completed in 1917. Pulp and paper manufacture is the chief industry, but machinery, cutlery, ropes, steel, etc., are also made. The city is well supplied with hydro electric power. It sends four members to the federal House of Commons. Pop (1931) 129,103.

Quebec Province of Canada. It covers 594,434 sq. m., on both sides of the River St Lawrence. Part of it is fertile, but much is a vast and almost uninhabited tract of land between Hudson Bay and Labrador. Quebec is the capital but Montreal is the largest city. The inhabitants are largely Roman Catholics of French descent.

Quebec, or Lower Canada, is the oldest settled part of the country. From 1791 to 1841, it was a province under British rule. In 1841 it was united with Upper Canada, and in 1867 it became a province of the Dominion. It is governed by a legislature of two houses with a ministry responsible to it. It sends 65 members to the House of Commons at Ottawa. In 1912 a great district in the N. called Ungava was added to the province, which also includes the island of Anticosti. It produces wheat, barley, milk and butter, as well as fish. The forests supply vast quantities of pulp for paper and its mines furnish the world with asbestos. Pop (1931) 2,874,255.

Queen Official title of the wife of a queen reigning monarch. A queen has unique privileges, and has a household of her own. Her personal expenses are paid from the king's privy purse and she is crowned with solemnities similar to those used for a king. The queen dowager is the widow of the deceased king, and retains most of her privileges. The queen mother is the mother of the reigning king, and a queen regnant is a sovereign princess reigning in her own right with all the powers of a king, whose husband is her subject. The only queen regnant at present in Europe is Queen Wilhelmina of Holland, who succeeded to the throne in 1890.

Queen Anne Style English architectural and artistic convention. In the decorative arts, restraint and simplicity are the dominant notes of the 'Queen Anne Style,' superseding the baroque extravagance which preceded it. Ornament was now deliberately subordinated to design. In furniture this tendency is especially marked, curvilinear principles being sedulously exploited with an unrivalled sense of symmetrical balance. Contemporary silver shows a fine recognition of the value of plain surfaces. Architecture remained predominantly Palladian. (See PALLADIO ANDREA), the Italian villa was the model for the English country house. But a vernacular style of building based on Jacobean tradition is no less characteristic of the period.

Queen Anne's Bounty Property belonging to the Crown of England. At one time every person, on being appointed

to a living, paid a tenth of his first year's income to the pope. After the Reformation these sums were paid to the Crown. In 1704 Queen Anne handed over this income to the Church of England, and since then it has been known as Queen Anne's bounty and used to increase the value of poor livings. In time the income became smaller as first fruits ceased to be paid in many cases, and now the payments have almost ceased a process helped by legislation passed in 1926. The fund however, still possesses considerable capital and has an office at 3 Deans Yard Westminster, London, S.W.

Queenborough Borough and seaport of Kent on the Isle of Sheppey where the River Swale falls into the Medway 2 m. from Sheerness, on the S. Ry. There are chemical and cement industries and oyster fisheries. Pop (1931) 2941.

Queen Charlotte Is. Group of islands off the coast of British Columbia belonging to Canada, 130 m. from Vancouver. Graham Island is the largest. Coal and other minerals are mined and there is some fishing.

Queen Charlotte Sound separates the mainland of British Columbia from Vancouver Island.

Queen Mary Land District of Antarctica. It lies to the E. of Kaiser Wilhelm Land and on it are the Denman and Northcliffe glaciers. It was explored and named by Sir Douglas Mawson in 1911.

Queensberry Marquess of Scottish title held by the family of Douglas. In 1633 William Douglas Lord Drumlanrig was made Earl of Queensberry, and in 1682 his grandson, William, was made a marquess. In 1683 he was made a duke. In 1810, when the 4th Duke of Queensberry died, the dukedom and the estates passed to the Duke of Buccleuch, and the marquessate to Sir Charles Douglas, who became the 6th marquess. The 8th marquess a noted sportsman, was responsible for the Queensberry Rules which govern boxing contests. The oldest son of the marquess is called Viscount Drumlanrig.

Queensbury Urban district of York shire (W.R.) about 4½ m. E. of Bradford and 196 from London, on the L.N.E. Ry. Here are textile mills, collieries and stone quarries. Pop (1931) 5763.

Queen's County Old name of the county in the Irish Free State now known as Leix (*qv*).

Queensferry Burgh and port of W. Lothian on the S. shore of the Firth of Forth, 9 m. from Edinburgh, on the L.N.E. Ry. Here is one end of the Forth Bridge, and near are Dalmeny House and Hopetoun House. Queensferry is so called because the ferry here was used by Queen Margaret. Pop (1931) 1793.

North Queensferry is a small watering place and fishing port on the N. or Fife shire side of the Firth of Forth.

Queensland State of N.E. Australia. Originally part of New South Wales, it became a separate colony in 1859. It has a legislative assembly of 62 members, under a governor, lieutenant governor and executive council of ministers. Tropical in the N., it is cooler in the S., where considerable agricultural development has taken place.

The chief industry is stock raising and the principal exports are wool, sugar, dairy products and meat. Much of its prosperity is due to the boring of artesian wells. Mining and forest produce are important.

Brisbane, the capital, is connected by rail with the chief centres and with New South Wales. Area, 670,500 sq m. Pop 963,711.

Queenstown Urban district, seaport and market town of Co. Cork, Irish Free State. Under the Free State the name has been changed to Cobh. A variant of the older name Cove of Cork. It is on an island in Cork Harbour, 13 m from Cork, and is served by the G.S. Rlys. Queenstown is a yachting centre, and was a naval station. It is best known as a calling place for the Atlantic liners, but has been less used in this capacity since the Great War. Pop 7077.

Queenstown Town of Cape Province, S. Africa, 154 m. from E. London. The town is laid out in the shape of a hexagon with the market place in the centre. Wheat and wool are produced in the neighbourhood. Pop 12,800.

Queenstown Town of Tasmania, about 110 m. N.W. of Hobart. Situated on Queen River, its industries are connected with copper-mining and timber-felling. Pop (1931) 2590.

Quern Simple handmill for grinding grain. The earliest neolithic pattern, an oval grinder rubbed upon a saddle-shaped stone, developed into a pair of flat discs, the lower stone being rimmed, with a central pin passing through a funnel-shaped hole in the peg-rotated upper stone, through which the grain was poured. The water-mill superseded it.

Questionnaire Set of written questions sent out usually to obtain information about the cost of living, housing conditions and other social matters. The census paper may be described as a questionnaire and the method has been used by the B.B.C.

Quetta Capital of British Baluchistan. It came into prominence when Sir Robert Sandeman founded his Presidency here (1876), and grew in 25 years from a dilapidated group of mud buildings into a strong fortress and military centre. The Indian Staff College was opened here in 1907. In 1935 a great earthquake devastated the Baluchistan valley and completely destroyed the city of Quetta. The death-roll numbered more than 40,000.

Quetzal Mexican name, "green-feather" for the resplendent trogon, *Pharomacrus mocino*, a tropical picaresque bird ranging from Guatemala to Panama. About magpie size, the crested male is handsomely plumaged in brilliant metallic green, with deep blood red underparts, the middle two tail coverts, prolonged 3 ft. beyond the tail, were formerly ruthlessly collected for European millinery. Frequently represented in ancient Maya art, the bird appears in the arms of the Guatemala republic, and gives its name to the local dollar.

Quiberon French town on the S. coast of Brittany, 22 m. E. of L'Orient. Two famous battles were fought near here. On Nov. 20, 1759, when the French were preparing an invasion of England, Hawke attacked and defeated the fleet under Comdants. In 1795 French emigrant Royalists

who had been landed here by a British fleet, were defeated here by the republican leader, Hoche.

Quicklime Commercial name for calcium oxide obtained by calcining chalk or limestone, the carbon dioxide being driven off in the process. It is very infusible, but when moistened crumbles to a white powder (slaked lime), giving off considerable heat. It is a valuable dressing for clay soils and is used in making mortar and cements. Slaked or hydrated lime is employed in making lime-water and in tanning and sugar industries. Lime is used also for purifying coal gas and sewage.

Quicksand Bed of loose fine sand particles often mixed with clay or calcium carbonate, and saturated with water. Quicksands occur usually at river mouths or along the seashore, and in some glacial deposits.

Quicksilver Common English name for metallic mercury on account of its extreme mobility and resemblance to the colour of silver. See MERCURY.

Quietism Religious movement of a mystical character. It swept over France, Italy and Spain during the 17th century. Its most famous devotees were Fénelon and Madame Guyon. Quietism stressed the importance in religious experience of a purely passive state of contemplation which had no place for the positive exercise of thought and will.

Quiller-Couch Sir Arthur Thomas, English writer. He was born in Cornwall, Nov. 21, 1863, and educated at Clifton and Trinity College, Oxford, where he became a lecturer in classics. He wrote *Dead Man's Rock* while there. After doing journalistic work in London he settled in Fowey, and wrote a number of *Cornish Tales* and several volumes of critical articles, including *Studies in Literature* in three series. He published several volumes of poetry, and is famous for his anthologies of English verse, among them *The Golden Pomp* and *The Oxford Book of English Verse*, and for his lectures as Professor of English Literature at Cambridge, a post to which he was appointed in 1912. He was knighted in 1910 and is familiar as "Q."

Quillwort Genus of stemless rush-like vascular cryptogams, *Isotles*, chiefly found in N. temperate and warm regions. Merlin's grass *I. lacustris*, inhabiting subalpine lake bottoms in Britain and elsewhere, has a filbert-sized corm producing a tuft of 10-20 rigid awl-shaped tubular leaves whose bases partially sheathe the spore-capsules. A subaquatic species common in S. Europe inhabits Guernsey marshlands.

Quince Genus of shrubs and small trees of the rose order, *Cydonia*, akin to the pear indigenous to Asia. The common quince, *C. vulgaris*, of Persian origin, anciently cultivated in the Levant, and introduced into Tudor England, bears yellow astringent pear-shaped or apple-shaped fruits, used for flavouring other cooked fruits or for table jellies. See JAPONICA.

Quincunx Arrangement of five objects so placed as to occupy each corner of a square or oblong, with one in the middle. It is used commonly for the spacing of trees in an orchard so that the trees in one row are opposite the spaces between those in the next row.

Quinine Chlof alkaleid contained in cinchona bark White, inodorous and bitter tasting crystalline salt, more or less water soluble, especially sulphate, hydrochloride and hydrobromide, are used medicinally as a tonic, sometimes combined with others, for allaying neuralgia, and pre-eminently for treating malaria. The ammoniated tincture is a favourite household remedy for mild febrile attacks. See PERUVIAN BARK

Quinoa Annual herb of the goosefoot order, *Chenopodium quinoa* in the Andes to the Pacific slopes of the Andes. Its clusters of minute green flowers produce small, rounded flattened fruits whose nutritious meal is made locally into porridge and cakes. It is sometimes cultivated in Great Britain for its leaves, a good spinach substitute.

Quinquagesima Latin word meaning "fiftieth". It denotes the Sunday next before Ash Wednesday, once called Shrove Sunday. It occurs 50 days before Low Sunday.

Quinsy Acute tonsillitis or inflammation of the throat with suppuration of the tonsils. Treatment includes gargling with hot antiseptic fluids and applications of hot fomentations. Incision is frequently necessary.

Quintain Upright post surmounted by a crossbeam, used for knightly and popular exercise throughout medieval Europe. It was either a fixed target against which horsemen and footmen broke a lance or pole or rotated on a pivot one end provided with a sandbag or other device for striking the unskilful tilter behind.

Quintal Measure of weight, originally denoting 100 libras, as in pre-revolutionary France, and still surviving in Spain. It also denotes various standards in Portugal, Greece, Egypt and some parts of Spanish America. The metric quintal, weighing 100 kilograms or 220 lb, is the common unit of measurement for grain, etc., in metric using countries.

Quirinal One of the seven hills of Rome. It lies to the N.E. and the name is taken from Cures, once a town of the Sabines. The King of Italy has a palace here and the Quirinal is used as a synonym for his court.

Quito Capital city of Ecuador. Situated about 114 m from the Pacific coast. It occupies a basin in the Andes about 9350 ft above sea level. The buildings, mainly of sun-dried brick, are of a Spanish type, and include the Jesuits' church with a finely carved facade, the cathedral and the government palace. The city has a university and eleven monastic institutions, the convent of San Francisco being among the largest in the world. Exports include hides and forest products. Wood and ivory carving and gold and silver work reach a high standard. The city has two broadcasting stations (52.5 and 47 M). Pop. (1932) 104,000.

Quit Rent Yearly payment formerly made by certain classes of tenants on English manors. It was so-called because it freed the tenant from all

other dues. A perpetual rent charge is called a quit rent in the United States.

Quixote Don Horo of Cervantes' mock heroic romance. *History of the Renowned Don Quixote de la Mancha* (1605-15). He figures in the story as a misguided devotee of chivalry, who imagines himself to be a knight-errant and goes forth on his adventures, clad in a suit of home-made armour, riding his battered steed, Rosinante, and attended by his squire Sancho Panza. He has become a universal figure, representing the type whose lofty idealism fails to achieve success in a world which does not share those ideals.

Quoin Corner stone at the angle of the wall of a building, especially in later Saxon work, where flat slabs or quoins alternate with long vertical blocks. The term is applied also in printing to a blunt wedge used to secure the type in a forme.

Quoits Pastime consisting in throwing flattened iron rings at a distant mark. Patronised by curling clubs in Scotland, Canada and the U.S.A., and by Midland and Lancashire working men's quoiting clubs. It is played on two "ends" 18 yards apart each having a metal pin or hob driven in. Each player throws two 9 lb quoits from end to end, seeking to ring the hob or to pitch nearest. Play is then reversed, as in bowls. Deck quoits are played with rope rings.

Quorn English hunt. The name is taken from the village of Quorn in Leicestershire. The hunt was established in the 18th century, and some of the most famous hunting men, among them Hugo Meynell and the Earl of Lonsdale, have been among its masters. It is regarded as the oldest in England. The kennels are at Barrow on Soar and Melton Mowbray is the chief centre.

Quorndon Urban district of Leicester borough, and is a hunting centre. Pop. (1931) 2603.

Quorum Minimum number of persons necessary to constitute a meeting. In public companies and societies the articles of association or the rules, state the number necessary for a quorum. In the House of Lords it is 30 and in the House of Commons 40. In some legislatures notably the Congress of the United States a quorum is a majority of the members. The word is Latin for "of whom".

Quota Commercial term. In Great Britain it refers to a proportion, at present 15 per cent, of home-grown wheat to be used by millers under the terms of the Wheat Act in making flour. The farmer subsequently receives the difference between the current price for wheat and a standard, at present 45/- per qr, fixed for a year.

In post-war commercial treaties it signifies also quantities of essential commodities for which export and import licenses are issued respectively by the countries concerned. Immigration quotas, based on the acceptability of the nationals of certain races as immigrants, have been established in the U.S.A. and elsewhere. Great Britain has a film quota establishing the proportion of British films which must be shown.

RA Name of the sun god of the Egyptians. He was represented with the head of a hawk, and as crossing the sky in a ship. Splendid temples were erected in his honour. The chief seat of his worship was Heliopolis (On) in the Delta. From the fifth dynasty the name Ra was included in the title of each Egyptian king.

Rabbi Honorary title for the Jewish scribes after Herod's day. Applied to learned persons pronouncing on questions of law and ritual, the New Testament mentions Christ as so addressed by his disciples and the common people. It designates modern Jewish clergy and sometimes by courtesy eminent Jewish scholars. The word is Hebrew for "my master."

Rabbit (*Oryctolagus cuniculus*) Burrowing rodent of the hare family. The wild form is smaller, grayer and less speedy than the hare, and breeds abundantly in collective warrens. Naturalised in England and elsewhere, notably in Australia, it is esteemed for food, its fur being foisted for hats and, disguised as coney, used by furriers for inexpensive clothing. Domestication has wrought remarkable changes in weight, form and colour, e.g., the Angora and lop eared breeds. Game laws regulate rabbit shooting, but impose no close time.

Rabelais François French author. He was born at Chinon about 1483, and was successively a Franciscan, a Benedictine monk, a teacher at Montpellier, a professor of anatomy, and a priest at Meudon. His friendship with the Cardinal, Jean du Bellay, had a great influence on his life, and he went to Rome at different times to visit his friend. He is the author of *Gargantua*, and of *Pantagruel*, books of monumental interest written between 1532-64. They are original and powerful in style, and underneath the crudities and obscenities there is a great love of humanity and a passion for justice and true culture. He died on April 9, 1553.

Rabies Infectious disease due to a micro organism, causing rabid madness in numerous mammals, including dogs, cats, wolves, horses, etc., and communicable in the saliva by a bite. See HYDROPHOBIA.

Raby Castle Residence of Lord Barnard. It is in Durham, 5 m. from Barnard Castle, and dates in the main from the 16th century. A splendid pile. It was the seat of the Duke of Cleveland until that title became extinct in 1891.

Raccoon (*Procyon*) Genus of American carnivorous mammals related to bears. The common greyish N. American tree-dwelling "coon," *P. lotor*, 24 in. long with 10-in. ringed tail feeds by night, habitually dipping its prey into water before eating. Its flesh is edible, and its fur much used for coonskin caps. A larger crab-eating species inhabits S. America.

Race Group of persons animals or plants of common ancestry. The word may denote all mankind, a primary division, e.g., the yellow race, or a smaller

ethnologic group, e.g., Jewish. The word also denotes breeds or strains greater or less than a species, e.g., canine, black-faced.

Raceme Botanical name for the form of flowering in which the blossoms are borne in a cluster with each flower on a short and equal lateral pedicel attached to a central stem, as in the currant.

Rachel Biblical character. A daughter of Laban, she became the wife of Jacob after he had served Laban for her for two periods of seven years, and had married her elder sister, Leah. She had two sons, Joseph and Benjamin, and she died when the latter was born.

Rachmaninoff Sergei Vassilievitch Russian composer and pianist. He was born at Nijni-Novgorod on April 2, 1873. He received his musical education at the St. Petersburg and Moscow Conservatoires, and won a gold medal with his opera *Alexo* in 1892. He made several concert tours, and in 1903 was conductor of the Imperial Opera. He conducted the Moscow Philharmonic Symphony Orchestra, 1912-13.

After the Russian revolution he escaped to Sweden, and eventually settled in America. He has written operas, symphonies, piano concertos, and many smaller piano works, of which the *Prelude in C sharp minor* is most famous. His reminiscences were published in 1934.

Racine Jean French dramatist. He was born at La Ferté-Milon (Aisne), in Dec., 1639 and went to the Solitaires' School at Port Royal. He began to write tragic plays in 1664, with *La Thébaïde* and *Alexandre* in 1665, followed by *Andromaque* in 1667. His best known play is *Phèdre*, which, owing to his enemies, was a commercial failure, and he returned to the influence of Port Royal. In 1689, when Madame de Maintenon asked him to write a play for her girls' school at St. Cyr, he wrote *Esther*, and in 1691, *Athalie*. He died on April 21, 1699.

Racketeering American expression arising out of the development of "gangs," and applied to the practice of gangsters, who, by means of threats of violence which they are able, and quite prepared, to carry out, extort money from those trading legitimately. In return, the traders are allowed to carry on business more or less peacefully, even receiving a measure of protection.

Rackets Ball game played on walled-in courts, very similar to fives courts. The game, played by two or four persons, consists in hitting the ball against the end wall, above a certain line, with the racket, which differs from the tennis racket in being much lighter and having a round head about 8 in. in diameter. The scoring is similar to that in fives, but the game is very much faster.

Rackham Arthur English artist. He was born Sept. 19, 1867, and educated at the City of London School and Lambeth School of Art. He is best known as an illustrator, in which department his delicately fantastic work is familiar to all book-lovers.

Radcliffe Market town and urban district of Lancashire. It is

8 m N.W. of Manchester, and is 194 from London by the LMS Rly. In a coal mining district, the town stands on the Irwell, and has cotton and associated industries and chemical works. Pop (1931), 24,674.

Radcliffe John English physician, Fellow of Lincoln College, Oxford, and M.P. Born at Wakefield, in 1650, he studied medicine at Oxford. He then began to practise and having settled in London, was physician to William III, and the two queens, Mary and Anne. He died at Carshalton Nov. 1 1714.

Radcliffe left his money to Oxford University where his name is perpetuated in several ways. The university has its Radcliffe Library, and the city the Radcliffe Infirmary. There are Radcliffe travelling fellowships for students of medicine. The university observatory is called the Radcliffe Observatory because it was built from money left by Radcliffe. It was erected between 1772 and 1785.

Radiation Term applied to the different forms of energy given off from substances and transmitted through space. These radiations include light, heat, X rays and the various emanations emitted spontaneously from radio active substances.

According to Planck's Quantum Theory, radiation is not a continuous wave process but a discontinuous one in which separate minute units of energy are emitted in pulsations, the amount of energy in each unit or quantum being dependent upon the frequency of the radiation.

Radical Term in chemistry applied to a group of atoms of several elements that enter into the formation of compounds, and pass from one compound to another without disintegration, but do not exist as a separate entity. Examples of radicals are the hydrocarbon radicals, methyl, acetyl and ethyl, also ammonium and cyanogen.

Radical Name of a political party. It came into use late in the 18th or early in the 19th century and was applied to those who believed in radical reforms. The radicals became a wing of the Liberal Party, and as such they remained until the Great War, when their place was taken by the Socialists. A radical may be described as more advanced than a liberal but less so than a socialist. In some matters, however, in divisional liberty for instance, the radical and the socialist ideas are opposed.

Radio-activity Quality of emitting radiations having great penetrating power. Substances such as radium, uranium, thorium, actinium and their compounds emit radiations having the power of penetrating opaque objects, and of acting upon a photographic plate in the dark, also of ionising gases and producing luminosity in certain substances.

Becquerel, in 1896, observed the effect of uranium salts upon a photographic plate, and these investigations were followed by the discovery of radium, actinium and the radio active properties of thorium. Three types of radiations are emitted known as alpha rays or positively charged helium atoms, beta rays or negatively charged particles, and gamma rays or electro magnetic impulses.

Radiograph Term given to an image of an object obtained by means of the X rays which have the power

of penetrating certain substances opaque to light, but are stopped by other dense substances such as the heavy metals. A radiograph of the hand will show the bones and an embedded metal as distinct shadows.

Radiology Study and use of X rays in medicine. In 1895 Röntgen discovered that X rays passing through human tissues could be used photographically to differentiate between easily penetrable tissues and bone. This has proved of exceptional benefit in many branches of medical science, while the action of the rays on certain tissues has formed the basis of radio-therapy.

Radiometer Instrument invented by Sir William Crookes for measuring the radiant energy of light and heat. It consists essentially of four thin glass arms or discs of glass or mica on aluminium arms placed horizontally and pivoted so as to rotate freely in a partially exhausted glass vessel. The rate of movement indicates the strength of the radiation.

Radish (*Raphanus*) Genus of annual natives of Europe and temperate Asia. Cultivated anciently in the Mediterranean region, and introduced into Tudor England the garden radish *R. sativus*, has an agreeably pungent fleshy root long and tapering, olive shaped or turnip shaped, usually whitish or reddish, and is eaten uncooked as salad.

Radium Radio active element having the symbol Ra and atomic weight 225.95. It was discovered in 1898 by Madame Curie. It is silver white in colour, but rapidly decomposes in the air into the hydroxide, and is present in pitchblende, carnotite and other ores associated with uranium from which it is derived by atomic disintegration. Radium compounds are used extensively in surgery in the treatment of certain diseases and commercially in luminous paints for watch dials, etc.

RADIUM THERAPY Methods of healing in which radio active substances are employed. Two main methods are in use: (1) the introduction of such bodies into the blood, and (2) local application of radiation. The curative action of radium emanations may be derived from radium or its product radon. The latter is applied as an inhalation or taken in solution. With the former, a minute quantity of a radium salt enclosed in a platinum tube or needle is used. It is successful with many malignant growths but not all forms of cancer.

Radius Term in geometry for a straight line drawn from the centre of a circle to the circumference and equal to half the diameter. A radius vector is a straight line drawn from any point in the curve of an ellipse to a focus.

In anatomy the radius is the smaller of the two bones in the forearm. Its slightly curved shaft is articulated to the wrist by its larger head and to the elbow by a button shaped head having a rotatory movement.

Radlett Town of Hertfordshire. It is 16 m from London, on the LMS Rly. It is a residential district for Londoners. Some industries have been established here.

Radley Village of Berkshire. It is on the Thames, 4 m from Oxford on the GW Rly. The college, founded in 1847, is a public school with accommodation for about 200 boys. It has a fine chapel and a memorial gateway. Pop 1074.

Radnor Village of Radnorshire It is 7 m from Prestelgne on the little River Somergill There are ruins of a castle and a guildhall, as the place was a chartered town from 1561 to 1883 It is called New Radnor to distinguish it from Old Radnor, a village about 3 m away

The title of Earl of Radnor was borne by the family of Robartes from 1679 to 1757 In 1765 William Bourverie, 2nd Viscount Folkestone, a wealthy Huguenot, was created Earl of Radnor His son, Jacob, took the name of Pleydell-Bouverie and the title is still held by his descendant The estates are now the property of Viscount Clifden, a kinsman The seat of the present earl is Longford Castle, near Salisbury, and his eldest son is called Viscount Folkestone

Radnorshire County of Wales The smallest in the land, it covers 471 sq m. Prestelgne is the county town, other places are Rhavader, Llandrindod Wells and Knighton The rivers are the Wye and its tributaries, including the Eian, the Arrow and the Ithon In the centre is the district called Radnor Forest The chief occupation is farming, and sheep-rearing is an important industry Pop (1931) 21,324

Radstock Urban district and market town of Somerset It is 16 m from Bristol on the G W Rly It is the centre of the Somerset coalfield, and the chief industry is coal mining Pop (1931) 3622

Raeburn Sir Henry Scottish portrait painter He was born at Stockbridge, Edinburgh, on March 4, 1756 He was first apprenticed to a goldsmith, but taught himself to paint, and was helped by David Martin, a leading Edinburgh portrait painter He painted the Countess Leslie, and married her, and together they visited Rome, where he studied for two years Raeburn was the chief of a virile school of painting then growing up in Scotland, and was made R A in 1815, and knighted in 1822 His best-known portraits are those of Lord Newton Dr Alexander Adam, his wife and Mrs Robert Bell He died on July 8, 1823

Raemakers Louis Dutch cartoonist He was born at Roermond, Holland, on April 6, 1869, educated in Amsterdam and Brussels, and at the outset of his career, painted portraits, posters and landscapes He drew his first political cartoon in 1908, but his fame was made by his anti-German cartoons, during and after the Great War

Raffia Work Handicraft comprising articles made with the split leaves of raphia palms and similar bast-like substances Used for manual training, recreation and profit-making in blind institutions, kindergarten schools, military hospitals, etc, the material, generally dyed is fashioned like straw-plait into bags and hats, or worked on frames into baskets, boxes, etc

Raffles Sir Stamford English administrator He was born at sea off Jamaica, July 5, 1781 From a clerkship in the East India Company he rose to the appointment of lieutenant-governor of Java on the conquest of that island by Lord Minto in 1811 He held that post till 1816 and was lieutenant-governor of Sumatra from 1818-23, being responsible for the purchase of Singapore (1819) He died July 5, 1826

Rafter Term in architecture for an inclined beam forming part of the support of the roof of a building In the Middle Ages rafters were of oak, but in the 17th century foreign deal came into common use Open timber roofs with various methods of arranging the rafters were characteristic of mediaeval English architecture

Ragged Robin Perennial crimson flowered wild plant (*Lychnis flos-cuculi*) of the pink family It is a slender herb growing about 1½ ft. high and common in Gt Britain

Ragged Schools Name given to schools formerly existing in Great Britain, as voluntary agencies for the education of destitute children Their originator was John Pounds, a Portsmouth shoemaker, who for 20 years prior to his death in 1839, taught a number of needy children as he sat at his work The work of the Ragged School Union is now carried on by the Shaftesbury Society

Raglan Village of Monmouthshire It is 7 m from Monmouth, on the G W Rly It is famous for its castle, now in ruins During the Civil War it was defended by the Marquess of Worcester on behalf of Charles I

Raglan Fitzroy James Henry Somerset, Lord British soldier He was born on Sept 30 1785 In 1807 he served on Wellington's staff in the Copenhagen expedition and in 1812 he was his military secretary in the Peninsular War He lost his right arm at Waterloo In 1816 he was Secretary to the Embassy at Paris, and sat for Truro in Parliament in 1818 and 1826 being created a baron in 1827 He was Commander-in-Chief in the Crimean War, and was blamed unjustly for the soldiers' privations in 1854-55 He died June 28, 1855

Ragout French dish It consists of meat stewed with herbs and vegetables and seasoned to taste The word comes from the Fr *ragouter*, to restore the appetite

Ragwort Perennial composite herb (*Senecio jacobaea*) The stems 1-4 ft high, with much-divided leaves, bear dense clusters of bright-yellow rayed flower-heads

Raikes Robert. Founder of Sunday schools He was born at Gloucester Sept 14, 1735, the son of the printer and proprietor of the *Gloucester Journal*, and carried on his father's business In 1780 he started a Sunday school, which taught the poor children of the town to read and to learn the catechism The Sunday School movement attracted great attention and spread over England in Raikes' lifetime He died April 5, 1811

Rail Name originally denoting two related shore-birds, land-rail and water-rail now extended to all members of the numerous and cosmopolitan rail family The common European water-rail (*Rallus aquaticus*), 11½ in long, short-tailed and long-legged, is distinguishable from the land rail by its long red bill It haunts British marshlands, sometimes migrating southwards for the winter, and lays 7-10 spotted creamy-white eggs in reed-built nests

Railway Permanent road, or way, on which locomotives and the rolling stock drawn by them can travel A railway or railroad has a line or lines of rails fixed to ties or sleepers, and laid to gauge,

usually on a levelled or graded roadbed. The power employed is either steam or electricity.

The first railways were rough constructions designed only for carrying coal wagons drawn by horses or ponies. The invention of steam made it possible for the steam locomotive to replace the horse, and, this having been introduced in 1804, the next step was to lay lines that could be used for purposes other than the cartage of coal.

The first railway line was opened between Stockton and Darlington in 1825, and during the next 50 years many thousands of miles were laid all over the world. Steadily the lines were improved and greater speeds were attained. The locomotives increased in size and power and the accommodation for the passengers passed from rude open wagons to comfortable carriages, with dining and other accessories that are reminiscent of a good hotel. Increased engineering skill made it possible to drive tracks through mountains and over marshes until Europe was covered with a network of railways the great Continents of Asia and America were crossed by them, lines crossed the Andes, and in Africa reached, with but a single gap, from Cairo to the Cape. To meet the traffic problem of the great cities overhead and underground railways were made, and lines serving the London suburbs and other districts, where short distance traffic was necessary, were electrified.

In Great Britain the large number of railway companies that arose in the 19th century were gradually reduced until there was only a small number, most of them large organisations with headquarters in London, such as the Midland, Great Western, Great Northern, London and North Western and Great Eastern. Scotland had the Caledonian, Glasgow and South Western, North British and other lines. The opening of the Great Central Line was the last important addition to the country's railway mileage.

POST-WAR DEVELOPMENTS. During the Great War the Government took control of the railways, and this was retained until 1923. To effect economies in working expenses it was decided that the lines should be formed into four great groups, and these were duly constituted. The groups are the Southern, Great Western, London, Midland and Scottish and the London and North Eastern. The Southern includes the London and South Western and other lines in the south of England. The Great Western is composed of that line and of the Cambrian and others in Wales. The L.M.S. consists of the Midland, London and North Western, Lancashire and Yorkshire and all the important Scottish lines except the North British. The L.N.E. includes the Great Eastern, North Eastern, Great Central, Great Northern and North British.

The British railway companies are still controlled to some extent by the state and special legislation has been passed for them. The control is exercised by the Ministry of Transport. There is a Railway Rates Tribunal to fix the rates which they may charge for the carriage of goods and there is a national wage board for the fixing of wages.

The mileage of the British railways in 1933 was 19,822 miles and the receipts were over £160,000,000. The United States has 253,465 miles. Some countries, e.g., France, Germany and Canada, have state-owned railways, and proposals for nationalising the British lines have been made. The Irish railways, excluding

those serving Ulster have been amalgamated into one organisation, the Gt. Southern Ry.

Road competition has seriously affected the receipts of the railways, which have fallen very considerably since 1923, leading to reduced dividends and serious declines in the value of railway stocks. A scheme for electrification of the main lines, at a cost of £261,000,000, was put forward in the report of a committee which met in 1929-30.

The chief unions of railway employees are the National Union of Railwaymen, the Associated Society of Locomotive Engineers and Firemen and the Railway Clerks Association. There is in London a railway clearing house for adjusting business between the various companies.

The standard gauge for British railways is 4 ft. 8½ ins., and this has been accepted over a good part of Europe and in the United States. Australia, however, has different gauges, as have India, Ireland, Russia and other countries. The world's fastest long distance steam train runs from Newcastle to London, on the L & N.E. line. This first all stream lined train, completed in 1935 is called the Silver Jubilee and travels the 268½ miles each day at an average speed of 67 m.p.h.

Engineering has made it possible for railways to reach greater heights and there are funicular and rack railways up a number of mountains, these being specially constructed and carrying passengers only. The greatest heights reached are across the Andes in Peru where there are at least four lines that reach 15,000 ft.

Rain. Name given to the fall of condensed atmospheric vapour in drops of water owing to the lowering of the temperature below dewpoint. Condensation first results in the formation of minute drops which float in masses forming clouds and as the process continues these drops coalesce, forming larger drops, whose weight causes them to fall as rain.

Rainbow. Name given to the coloured arch seen in the sky away from the sun when rain is falling during sunshine. It is due to the reflection and refraction of light in the raindrops causing the breaking up of the white light into the seven colours of the spectrum in varying degrees of intensity, according to the size of the drops. Sometimes a second or even third bow in fainter colours may be seen in brilliant sunshine.

Rainfall. Term applied to the general precipitation of rain over an area including also the fall of snow and hail. The study of rainfall forms an important branch of meteorology, observations being carried out as to the amount of precipitation and its seasonal and local variations as well as to the causes determining the rainfall in particular districts. A continual circulation of vapour occurs between the terrestrial waters and the atmosphere and moisture laden winds from the sea blow over the land, the vapour being carried up into the colder upper air, where it condenses in clouds and finally in rain.

Rainford. Urban district of Lancashire. It is 4 m. from St. Helens and is a junction on the L.M.S. Ry. Around are coal mines and stone quarries and the town has some manufactures. Pop. (1931) 3494.

Rain Gauge. Meteorological instrument for measuring the rainfall. A rain gauge usually consists of a cylindrical copper vessel, containing a funnel for catching the rain and a bottle or other form

of receiver The contents are emptied at regular intervals into a measuring glass, graduated in inches of rain

Rain-making Causing rain to fall It forms the object of various rites and ceremonies among primitive peoples, when the rainmaker is often an important individual Attempts have been made to cause precipitation of vapour as rain by the use of gunfire, or by scattering chemicals and other substances from aeroplanes, but with no appreciable success

Raisin Dried ripe fruit of certain white varieties of grape, used for dessert, cooking or wine-making Sun-dried on the vine, spread on the ground or dried by artificial heat, raisins come from S E Spain, and are collectively called Malaga raisins, including muscatels and pudding-raisins, from Smyrna, including olives and seedless sultanas, from Provence, Calahria, Australia and California See CURRANT

Rajah Hindn name for a prince or king It is still used for a ruler in India, e.g. the Rajah of Tripura, but a number of the more important ones are called maharajah, or great prince It is also used in Malaya and Borneo The word *raj* means rule

Rajput Hindn word meaning "the son of a king" It is applied to the ruling race of the State of Rajputana, to which it gives its name

Rajputana District of India It is bounded on the west by Sind, on the north by the Punjab, on the east by the United Provinces The Aravalli Mountains running across the country separate the fertile land to the S E from the sandy and ill-watered region to the N W Politically, the district is a collection of 21 Indian states, under an agent to the Governor-General The population in 1931 was 11,225,712, of whom only 620,000 actually belong to the Rajput race The chief language is Rajasthani.

Raleigh Sir Walter. Elizabethan explorer and writer He was born near Sidmouth about 1552 After fighting in Ireland he became first favourite of Queen Elizabeth In 1584 a fleet sent out by him to America founded the new colony of Virginia, which he failed to establish

Raleigh was supplanted in the Queen's favour by the Earl of Essex in 1587 and went to Ireland, but was restored to favour until Elizabeth discovered his intrigue with Elizabeth Throgmorton, when he was imprisoned In 1596 his advice gained England the triumph of Cadiz Raleigh was condemned to death for treason, but was instead imprisoned in the Tower, where he wrote his *History of the World* and *A Discourse of War* In 1616 he made a disastrous expedition to the Orinoco in search of gold, and on his return was condemned to death, apparently for failure, and beheaded on Oct 29, 1618

Ramadan Ninth month of the Mohammedan year, invested with special sanctity by the Koran and observed by faithful Moslems as a period of fasting During this period strict abstinence is enjoined during the hours of daylight from food, drink and perfume

Ramadi Town of Iraq It stands on the Euphrates, 60 m from Bagdad Here, on Sept 25-29, 1917, a battle was fought between the British and the Turks The British, advancing from Bagdad, attacked the Turkish position on the 28th and on the

29th, after some hard fighting, captured the remains of the army and entered the town In the engagement some Indian regiments did splendid service

Rambouillet Town of France It is 30 m from Paris and is famous for its chateau, the country residence of the President of the Republic, formerly used as a residence by Napoleon It stands in a large park and has beautiful gardens

Rameses Name of three Egyptian kings
Rameses I made a treaty with the Hittites, and expanded Egypt as far as the Wady Halfa

Rameses II, called "the Great," defeated the Hittites, and married their princess He conquered Ethiopia, and established a fleet on the Mediterranean He lived about 1322 B C

Rameses III, made war on the Philistines, and the tribes of the coast of Greece and Asia Minor, and again conquered Ethiopia

Ramie Name of Malay origin for the bast fibre of a stinging nettle, (*Boehneria tenacissima*), called in Assam rhea This is a variety of *B. nivea*, the source of China-grass One or other now grows in the S parts of Africa, France, England and U.S.A. The fibre serves for incandescent gas mantles, nets, etc

Ramillies Village of Belgium It is 13 m from Namur and is famous for the battle fought here, May 23, 1706 An English and Dutch army under Marlborough met a French one under Villeroi The first English attack was indecisive, but the battle was won through the genius of Marlborough, and the French compelled to give up the whole of the Spanish Netherlands

Rampant Heraldic term denoting an attitude of beasts of prey in armorial charges, standing on the left hind-leg, the others being upraised, the right fore-leg above the left, the head sideways, and the tail upwards Should both hind legs be aground, it is saillant Full faced is rampant guardant, looking backwards is rampant regardant See LION

Rampion Name of several perennial herbs of the hellflower order, natives of Europe and W Asia (1) The genus *Phyteuma*, with many garden forms, especially rock-plants, includes the British *P. spicatum*, formerly cultivated for its edible tuberous rootstock (2) *campanula rapunculus*, also British, has a spindle shaped, flesh root, and is grown for the table, especially in France

Ramsay Allan. Scottish poet He was born, Oct 15, 1686 and first came into prominence by writing some additional cantos to an old Scotch poem, *Christ's Kirk on the Green* He was at that time a wigmaker in the Edinburgh High St, and later became a bookseller His most famous work, *The Gentle Shepherd*, was published in 1725 It is a dramatic pastoral poem, on a typically Scotch theme, and was performed at the Edinburgh Theatre He died Jan 7, 1758

Ramsay Sir William. British chemist. He was born, Oct 2, 1852, was Professor at University College, London, from 1887 to 1912, and was for many years the leading exponent of physical chemistry in Britain He was associated (1894) with Lord Rayleigh in the discovery of argon, and in the next year he obtained helium for the first time He died July 23, 1916

Ramsay Sir William Mitchell Scottish archaeologist. He was born at Glasgow, Mar 15, 1851, and was Professor of Humanity at Aberdeen from 1886-1911. For more than 45 years the history and geography of Asia Minor have been his special study. His works include *The Church in the Roman Empire* (1893), *St Paul the Traveller and the Roman Citizen* (1895), *The Letters to the Seven Churches of Asia* (1905). He was knighted in 1906.

Ramsbottom Urban district of Lancashire. It is situated on the Irwell 4 m from Bury, by the L.M.S. Rly. The chief industry is the making of cotton goods with the attendant occupations of bleaching and dyeing. Pop. (1931) 14,926.

Ramsbury Village of Wiltshire. It is 5 m from Hungerford, on the G.W. Rly. In Anglo-Saxon times it was the seat of a bishopric.

Ramsey Island of Pembrokeshire. Situated off St David's Head, it is about 2 m long and covers 600 acres. There is a harbour on the east coast, and on the island are wild duck, snipe and woodcock.

Ramsey Urban district and market town of Huntingdonshire. It is 10 m from Huntingdon, on the L.N.E. Rly. The chief building is the magnificent parish church. There was once a Benedictine abbey of which only a gatehouse remains. The modern abbey is the seat of Lord de Ramsey. Near was the lake called Ramsey Mere, but this has now been drained. Pop. (1931) 5180.

Ramsey Market town and seaport of the Isle of Man. It is in Ramsey Bay, on the north-west side of the island, 14 m from Douglas. Near is Snaefell, which can be ascended by railway. Steamers go regularly to and from Liverpool and other parts. Pop. 5000.

Ramsgate Borough, pleasure resort and seaport of Kent. It is on the Isle of Thanet, 78 m from London and 16 m from Canterbury, on the S. Rly. There is an inner and an outer harbour, and fishing is an important industry. There are fine promenades, large parks and excellent sand. During the summer steamers go regularly to and from London, and also to Calais and Boulogne. Pop. (1931) 33,597.

Rand Short name for the district in the Transvaal known as the Witwatersrand. It is the richest gold-bearing region in the world. See WITWATERSRAND.

Ranelagh Place of amusement in London. It was in Chelsea, where are now the grounds of Chelsea Hospital. There, Richard Jones, Earl of Ranelagh, built a house and laid out gardens which, in the 18th century, were a popular pleasure resort for the fashionable folk of London. In the grounds was an immense retunda, where entertainments of all kinds were held.

The modern Ranelagh Club is at Barn Elms Park, London, S.W. 13. It was opened in 1894 and is a centre for polo. It has also facilities for golf, croquet and other games.

Range Finder Instrument devised for calculating the distance of an object from the observer and used in ascertaining the distance of a target, also in surveying. The usual form of range finder or telemeter is based upon the measurement of the angles of a triangle whose apex is the distant object and the base the instru-

ment, one of the basal angles being made a right angle. The instrument is a modification of the principle of the sextant.

Rangoon Capital and principal seaport of Burma. It is situated on the left bank of the Hlaing or Rangoon River about 20 m from its entrance into the Gulf of Martaban. A town has existed on this site since the 6th century. The principal building is the Shwe Dagon Pagoda, the central shrine of Burmese religion. It is 368 ft high and is covered with gold leaf. During the last 50 years Rangoon has developed from comparative insignificance into the third port of the British Empire. It has a university and many fine public buildings and amenities. Its present importance is largely due to the quantities of rice which are exported from its harbour. Pop. (1931) 400,415.

Ranjitsinhji Kumar Shri. Indian prince and cricketer. He was born Sept. 10, 1872, and finished his education at Trinity College, Cambridge. There he played cricket for the university, and in 1895 he settled in Sussex and began to play regularly for that county. His wonderful batsmanship made an extraordinary impression and he became perhaps the most popular batsman, as he was certainly the most graceful in the land. He played for England against Australia and in other representative matches. In 1906 Ranji, as he was popularly called, became a ruling Indian prince when he succeeded as Maharajah of Nawanagar, and as such he served in France in 1914-15 and took part in Indian politics. In 1897 he published *The Jubilee Book of Cricket*. He died in 1933.

Ranke Leopold von. German historian. He was born Dec. 21, 1795, studied at Halle and Berlin and in 1825 became Professor of History in Berlin. Perhaps the greatest of modern historians, Ranke wrote no less than 47 volumes, including the monumental *History of the Popes of the 16th and 17th centuries*. He also wrote about certain periods in the histories of England, France, Germany, Austria and Venice. When he died, May 23, 1886, he was engaged on a *History of the World*.

Rannoch Loch or lake of Perthshire. In the north-west of the county, it is 9 m long. Its waters are carried by the Tummel into the Tay. The moorland area around the lake is known as Rannoch. There is also Loch Lydoock, 5½ m by half a mile.

Ranters (1) Antinomian and pantheistic sect in Commonwealth England. Rejecting ecclesiastical and scriptural authority they included fanatical elements whose influence was gradually counteracted by the Quaker message. (2) Name applied, about 1823, to street-singers in Belper when returning home from early Primitive Methodist camp meetings, afterwards extensively used as a nickname for the religious community.

Rapallo Watering place of Italy. It is on the Gulf of Rapallo, 16 m from Genoa, and is one of the most popular resorts on the Italian Riviera. The industries are fishing and lace making. Pop. 7180.

At Rapallo on Nov. 12, 1920, Italy and Yugoslavia signed a treaty fixing the boundaries between the two nations. By it Fiume was recognised as an independent state.

Rape Name applied to cultivated varieties of several cruciferous herbs of the cabbage genus, notably *Brassica napus* and *B. campestris*. Introduced into Tudor England.

they are grown extensively in Europe and India for green forage, the seeds, used for feeding poultry, yield an edible, burning and lubricating oil, known commercially as colza

Rape In law, the crime of having carnal knowledge of a woman by force against her will. At one time it was a capital offence, but since 1861 has been punishable in England by penal servitude for life. The offence is not mitigated by unlawful extortion of consent by threats, etc.

Raphael One of the archangels. He is represented in the Book of Tobit as appearing in human form to act as the guide and guardian of Tobias.

Raphael Sanzio Italian painter. He was born at Urbino, April 6, 1483, and received his early training from his father, though the latter died when his boy was but eleven years old. Raphael's work falls into three periods: (1) Perugian (1500-04) during which he first studied under and then worked in co-operation with Perugino, (2) Florentine (1504-08) when he came under the influence of Leonardo da Vinci and Michelangelo, (3) Roman (1508-20) during which he decorated the state apartments in the Vatican at the request of Pope Julius II.

One of the greatest and most versatile of painters, he not only excelled in every branch of the art, but was loved by all who knew him. His last work, "The Transfiguration," was almost completed when he died, April 6, 1520.

Raphia Palm Genus of palm-trees indigenous to tropical Africa and America. Their long stalked, feathery leaves, sometimes exceeding 50 ft., split lengthwise into strips, serve for native mats, clothing, etc. Important species are the Amazon jupati palm and the W African bamboo, or wine-palm, yielding a formidable sap and a bass, one grown in Madagascar and elsewhere supplies raffia. See RAFFIA WORK.

Rapier Slender, highly-tempered, sharp-pointed edgeless weapon about 3 ft long, used solely for thrusting. Superseding the two edged pointed sword used in 16th-17th century duelling, which on occasion served also for cutting, it was long indispensable for gentlemen's wear. It survives ceremonially in court dress, and with the foil is the main modern fencing weapon.

Raspberry Shrub of the rose order (*Rubus Idaeus*). Its perennial stool produces shoots which bear, in the second year, many scarlet or yellow fruits. Cultivated varieties yield finer and larger fruit, used for dessert, jam, sweetmeat-flavouring, wine, etc. The sweetened juice mixed with vinegar is called raspberry vinegar. *R. odoratus*, an ornamental shrub, sometimes white flowered, in British gardens, comes from Canada and the northern U.S.A. See LOGAN-BERRY.

Rasputin Gregory Efimovitch Russian monk. He was born in 1871 in the province of Tobolsk, Siberia, had no education, and lived until 1904 in his native village. Then he left his family, and practised religious exercises, adopting the attitude that it was necessary to sin in order to obtain forgiveness. He had tremendous strength and personality and, despite his orgies, surrounded himself with an air of mysticism. Soon he appeared at court, and exercised a malign influence on Church and State, until he was invited to supper at the Yusupoff

Palace by the Grand Duke Dmitri Pavlovitch and others, and shot dead, Dec 15, 1916.

Rat Name applied to various rodents, specifically to the larger species of the mouse genus. The long-tailed black rat (*mus rattus*) 7 in long with 8-9 in tail, of Asiatic origin, which reached 13th century Europe, and became established in Britain is the progenitor of white and pied domesticated forms. Following its westward migration came the brown or Norway rat, 8-9 in long with shorter tail, which swam the Volga, 1727, reached Britain in East-Indiamen, c. 1730, and ousted its smaller congener from most parts of England and many continental areas. Its parasitic flea, when infected, conveys bubonic plague. See MUSQUASH.

Ratafia Flavouring essence. It is made with essential oil of almonds.

Ratcliff Highway Old name for a street in Stepney. It is now called St George's Street. In the 19th century it had a very evil reputation due, in part, to a series of murders which took place there in 1811.

Ratel Genus of burrowing carnivores of the weasel family (*mellivora*), inhabiting India and Africa, also called honey-badger. Short limbed and short-tailed, the underparts are black, the upper iron grey.

Rates Word used for the money raised by local authorities for their expenses. Rates are thus the local counterpart of taxes, or money raised for national purposes. At one time there were several rates, a sanitary rate, an education rate, a police rate and others, but these have now been amalgamated and most areas raise a consolidated rate. The only exception is the water rate which is quite distinct from the others.

The amount of the rate is fixed by the council at so much in the £ for the year on the rateable value of property in its area. This is then collected from the various owners and occupiers, each paying according to the rateable value of his premises. In the case of small houses the rates are usually paid by the landlord. There is no limit to the amount of the rate which a council can levy. In some areas the rates exceed 25/- in the £. In order to allow for an increase or decrease in the value of property, it is valued periodically, usually every five years.

In 1896 the rates on agricultural land were reduced by one half, and in 1928 there was important legislation in the same direction. By a scheme of derating, land used wholly for agricultural purposes was entirely relieved of rates. Land and buildings used for industrial and transport purposes were relieved of three-quarters of their rates. In order to make up the loss to the local authorities grants were made by the government. In 1944-5 the amount of money raised by the rates in England and Scotland was £171,874,000.

Rath Irish name for a prehistoric hill fort. It was protected by an embankment and sometimes by stakes. There are remains of about 30,000 in the country and the word forms part of many place names.

Rathfarnham District of Dublin, Irish Free State. It is on the River Dodder, 4 m to the south of the city proper. Here is a castle, at one time a seat of the Loftus family.

Rathlin Island of Ireland. It is off the coast of Antrim, 6 m. north

of Ballycastle It is 6 m long and on it are the ruins of a castle

Rating In the British Navy the class to which any member of the crew belongs It is also used for the tonnage class of a racing yacht

Rationalisation Industrial term that came into use after the Great War It describes the process of making productive industries more efficient by eliminating waste, and still more by organising them into larger units for the purpose of meeting competition A good deal was done in this direction notably in the iron and steel and associated industries, among shipbuilders

Rationing Apportioning of a share of supplies, usually of food, to each member of an army, navy or population In the army and navy this is done through quartermasters and petty officers, and each man has a standard daily ration of food, a part of which may be commuted for a cash allowance to be spent on other food

During the War, the entire population of Great Britain was rationed, from June, 1917, particularly with regard to fats, sugar and meat. Each person had a registration card, checked by the retailer with whom he was registered, who received enough food to supply all his registered customers

Rattlesnake Genus of American venomous snakes of the pit viper subfamily (*Crotalidae*) Measuring 4-8 ft., there are several N American species, one extends S of Panama They produce living young and peccaries habitually feed on them. The rattle comprises several loose jointed horny pieces attached to the tail's end bone, one being added every time the skin is sloughed, 23 have been counted The tail's agitation produces a warning noise perceptible at 10-20 yds distance Sluggish and inoffensive, they strike only under provocation

Raunds Urban district of Northamptonshire It is 8 m from Wellingborough on the L.M.S. Ry, and is a centre for the manufacture of boots and shoes Pop (1931) 3683

Ravel Maurice, French composer Born March 7, 1875, at Ciboure (Pyrenees), he was educated in Paris and studied music at the Conservatoire there under Beriot Gédalge and Gabriel Fauré In 1901 he won the 2nd Prix de Rome with his cantata *Myrrha* At first he attracted little notice but his *Schéherazade*, in 1904, was hailed as a "miracle of musical impressionism" His masterpiece is perhaps the ballet, *Daphnis et Chloé* (1912), and he composed the very popular *Bolero* (1928) a dance of Moorish type He has written much for the voice, the piano and the orchestra, including opera In 1928 he received the honorary degree of D Mus., Oxon

Raven Largest bird of the crow family (*Corvus corax*) Normally 25 ins long, strongly billed, strong flying, harsh voiced with ebony black bill legs and plumage, the breast and upper parts acquire a glossy steel blue sheen It breeds in N.W. Scotland and other isolated parts of Britain, 3-5 brown spotted bluish green eggs being laid in hulkly cliff built or tree built nests Easily tamed, it makes an intelligent but thievish pet, and can produce parrot-like imitations

Ravenna City of Italy It is famous for its splendid examples of ecclesiastical architecture, belonging to the period from 5th to 8th centuries It is one of the

most ancient of Italian towns, and was used by Augustus as the headquarters of his Adriatic fleet. Four hundred years later the Emperor Honorius took refuge there with his court from the advancing Alaric Afterwards the city remained the capital of Italy for 350 years Dante is buried there Pop (1931) 78,143

Ravensbury District of Surrey on the River Wandle, in the urban district of Mitcham The manor house was long the residence of the Bidder family, and on the estate are the nests of rare birds, as well as a heronry The old manor house was once the home of the Throckmorton family There is a Saxon cemetery in the district

Ravenscar Watering place of Yorkshire (W.R.) It is 10 m to the north of Scarborough and is served by the L.N.E. Ry

Ravenscourt Park District of London It is in the borough of Hammersmith The park from which it takes its name is now public property, and in it is an 18th century house and an old English garden In 1932 the free masons erected a hospital in the district

Ravenswood Town of Queensland It is 78 m from Townsville Gold is mined in the neighbourhood Pop 2000

Ravensworth Village of Durham It is 3 m from New castle and contains a castle, the seat of Lord Ravensworth This was erected in the 19th century on the site of an earlier one The title of Baron Ravensworth dates from 1821 and is held by the family of Liddell From 1874 to 1904 there was an Earl of Ravensworth

Rawal Pindi Indian town It is situated in the Punjab, about 110 m S.E. of Peshawar, and was the scene of the surrender of the Sikhs in 1849 Its present importance is due to its premier place among Indian military stations, owing to its size and its key position in the North West Frontier system of defence Rawal Pindi gives its name to a district and division of the Punjab

Rawdon Urban district of Yorkshire (W.R.) It is 6 m from Bradford on the L.M.S. Ry The chief occupation is the woollen industry Pop (1931) 4574

Rawlinson Lord British soldier Born Feb 20, 1804, Henry Seymour Rawlinson served with Sir F. Roberts in India and in Burma (1886-87), on the Nile (1898) and in the South African War During the Great War General Rawlinson commanded troops at Antwerp, Ypres and the Battle of the Somme (1918) with conspicuous success His victory with the French at Amiens in 1918 heralded the general advance of the Allies He was rewarded for his services in the Great War by being made Baron Rawlinson of Trent In 1919 he conducted the withdrawal of the Allied troops from Archangel in Northern Russia, and in 1920 went to India as commander-in-chief of the army there He died on March 28, 1925 His biography has been written by Sir F. Maurice

Rawlinson Sir Henry Creswicke English soldier and orientalist Born on April 11, 1810, he went to India in 1817 as a cadet in the East India Company and later helped to reorganise the Shah of Persia's troops He became interested in the hitherto undeciphered cuneiform characters, and completely transcribed the inscription

at Behistun In 1851 he continued the French excavations on Assyria. In 1859 he was minister plenipotentiary to Persia, and returned to England in 1860. He served on the Council of India from 1868, and advocated a forward policy in Afghanistan. He died on March 5th, 1895.

Rawmarsh Urban district of Yorkshire (W.R.) It is on the Don, 2 m. from Rotherham and is reached by the L.M.S. Rly. The main industry is the manufacture of iron and steel goods. Pop. (1931) 18,570.

Rawtenstall Borough of Lancashire. It is 19 m. from Manchester, on the L.M.S. Rly., and manufactures cotton goods. Coal mines are in the district. Pop. (1931) 28,575.

Ray Line at right angles to the wave point of the luminous source in which light is propagated. In this strict sense it is a mathematical conception. Popularly a narrow pencil of light is termed a ray. Besides the visible rays of the solar spectrum-light there are others at each end which are not perceived by the eye, e.g., the actinic or ultra-violet rays, and, at the opposite extreme, the infra-red or heating rays. See HEAT, LIGHT, SPECTRUM, X-RAYS.

Ray Flattened cartilaginous fish with broad and fleshy pectoral fins. Of true rays (*Raja*) British forms include the short-snouted thornback, the spotted, starry and sandy rays, the last being the most frequently eaten, and several long-snouted species, usually called skates. Allied families include the electric ray or torpedo, sting-ray, eagle-ray and ox-ray or devil-fish.

Rayleigh Village of Essex. It is 8 m. from Southend and 35 from London, being served by the L.N.E. Rly. The family of Strutt takes the title of baron from here. Pop. (1931) 6,256.

Rayleigh Baron. English physicist. Born Nov. 12, 1842, John William Strutt Rayleigh succeeded to his father's title as 3rd baron in 1873. After a brilliant career in Cambridge he became Cavendish Professor of Experimental Physics there, and Professor of Natural Philosophy at the Royal Institution. In conjunction with Sir William Ramsay he discovered argon (q.v.). He died June 30, 1919, and was succeeded as 4th baron by his son Robert John, already eminent in the world of science.

Robert John Strutt Rayleigh was born Aug. 28, 1875, and educated at Eton and Trinity College, Cambridge (Fellow, 1900). He is Foreign Secretary of the Royal Society, and Emeritus Professor of Physics at the Imperial College of Science, South Kensington. He has done much work in connection with radium, and has written a number of scientific papers.

Razorbill Sea-bird of the auk family, (*Alca torda*) inhabiting arctic and northern regions. Resident in Britain, 17 in long, it has a glossy blackish plumage which is white underneath. The massive deeply-furrowed bill, flattened laterally, has a hooked tip. The brown-blotched whitish egg, laid on a rocky cliff on both Atlantic coasts, including that of Great Britain, is a delicacy.

Razor Shell (or Razor Fish). Family of sand-burrowing bivalve molluscs having long narrow parallel-sided shells with truncated ends. The common British *Solen siliqua* is used for food and for fishing-bait.

Reade Charles. English novelist and dramatist. Born at Ipsden House on June 8, 1814, and educated at Magdalen College Oxford, he was called to the bar in 1843. He first began writing in 1850, beginning with plays including *Masks and Faces* (1852). It was as a novelist that he achieved fame. Among his more important works are *Peg Woffington* (1852), *It is Never too Late to Mend* (1856), and his masterpiece, *The Cloister and the Hearth* (1861). He died on April 11, 1884.

Reading Borough and market town of Berkshire, also the county town. It is 36 m. from London, standing where the Kennet falls into the Thames. The town proper is on the south side of the river, and is an important railway centre, being served by the G.W.S., and L.N.E. Rlys. It has also canal connections.

Some ruins of the Benedictine monastery in which Henry I was hurried may be seen. The chapel of the Grey Friars is another object of interest. The museum contains Roman remains from Silchester. Since 1926 there has been a university. Reading is famous for its biscuits and its seeds. It is also an agricultural centre and has engineering works. Pop. (1931) 97,153.

Reading Marquess of. English statesman. Rufus Daniel Isaacs was born in London, Oct. 10, 1860, and educated at University College School and abroad, studied law and became a Bencher of the Middle Temple. Entering Parliament, he represented Reading as a Liberal from 1904 to 1913, was Solicitor-General in 1910, Attorney-General, 1910-13, and Lord Chief Justice of England, 1913-21. He was Special Envoy to the United States in 1917, High Commissioner and Special Ambassador to the United States in 1918, and from 1921 to 1926 was Viceroy of India. He was knighted in 1910, created a baron in 1914, viscount in 1916, earl in 1917, and marquess in 1926. A biography by Mr. Derek Walker Smith appeared in 1933. He died in Dec., 1935.

Realism Doctrine in philosophy that things have a real existence apart from their presentation to our consciousness. Something of the kind was taught by Socrates. It is thus the opposite of idealism. In literature and art, realism is also opposed to idealism or romanticism. It claims to present life as it really is, not as it ought to be or is desired to be. It does not, therefore, ignore the unpleasant or sordid aspects of life. In this sense Thomas Hardy and some of the great French and Russian writers are realists.

Real Presence Eucharistic doctrine. It is the belief, held by the Roman and Greek Churches and by High Church Anglicans, that the bread and wine of the Eucharist contain, after their consecration, the body and blood of Jesus Christ. This belief rests upon a literal interpretation of the words of institution, "This is my body" and "This is my blood," and of the sixth chapter of St. John's Gospel. Roman Catholics believe that the sacred elements may be worshipped, but the Greek Orthodox Church does not so believe. See RESERVATION.

Real Property Term used in English law for land and houses. It is distinguished from personal property which covers all other forms of property, including leaseholds. Before 1925 real property and personal property, in the case of a person dying intestate, descended in different ways,

hnt this is no longer so. The two kinds of property are, however, valued separately on the occasion of death, and certain legal differences between them persist.

Rebec Medieval stringed instrument played with a bow, of Asiatic origin, and known in 9th century Europe. A broad based 3 stringed Byzantine type, illustrated on ivory caskets and illuminated MSS, had a body like a pear halved lengthwise, pierced with sound holes. A narrow 2 stringed boat shaped type reached Moorish Spain. Violins ultimately superseded both.

Rebecca Riots Disturbances that broke out in South Wales in 1839 and the following years. They were caused by the charges made at the toll gates for the use of the roads, although there were contributory causes. The rioters, dressed as women and calling their leader "Rebecca", went about the country destroying the toll gates, some of them rode horses. Troops were sent against them and the rising was put down. The name was taken from a passage in Genesis xxiv where Rebecca says "Let thy seed possess the gate of those which hate them".

Rebekah Sister of Lahan, wife of Isaac and mother of Esau and Jacob. By her ruse her younger son deprived Esau of the paternal blessing (Gen. xxvii). He was buried in Abraham's tomb at Hebron. The Jewish and Christian personal name commonly follows the N.T. spelling "Rebecca".

Rebus Riddle that is a representation of a sentence or object by means of pictures or words, or both in combination. They originated in France. An example is "he independent, hnt net too independent," which as a rebus may be represented by the letter B pendant in the letter D, a hntt a knot and the figure 2 pendant in D. In heraldry a rebus is an allusion to the name of the bearer in a coat of arms. Thus a hammer for Hammer is an example.

Récamier Madame, French society leader and beauty. Born Dec 4, 1777, she married, at sixteen, a rich banker of fifty four, and gathered many distinguished people in her brilliant salon. Her husband was ruined in 1806, and Madame visited Madame de Staël at Coppet where she met Prince August of Prussia. He wished to marry her if M. Récamier would consent to a divorce, but although this was granted Madame refused to leave her husband in his adversity. One of her greatest friends in after years was Chateaubriand. She died on May 11, 1849.

Receipt Acknowledgement of a payment made. By English law a receipt for £2 or over must be stamped. This was long a penny stamp but in 1920 it was raised to twopence. A person giving an unstamped receipt is liable to a fine of £10. A receipt can be stamped at the inland revenue offices on payment of 25 within 14 days, or £10 within a month.

Receiver Person appointed to look after the property of a company or person who is unable to meet its or his liabilities. To supervise the affairs of bankrupt estates there are official receivers in the various county courts and in London Debenture holders usually appoint a receiver when the interest on the debentures is not forthcoming after a stated time.

Receiving Order Order made by a court of law in

the case of a bankrupt individual, or a company that cannot meet its liabilities. One or more of the debtors usually make the application, and if it is granted a receiver takes over the assets of the individual or company and distributes them as the law directs.

Rechabites Hebrew religious community. Originated in Jehu's reign by Reehab's son, Jehonadab, who followed his father's practice, they dwelt in tents, and avoided wine, vine planting and grain-growing (2 Kings x). Three centuries afterwards, Jeremiah commended their devotion (Jer. xxxi). The Independent Order of Rechabites, a total abstinence Friendly Society, founded 1835 numbers about 725,000, including overseas members.

Reciprocity Exchange of commercial privileges. It is usually experienced when two nations make tariff concessions to each other. Much was heard of the word in 1911 when there was a proposal for reciprocity between the United States and Canada. The proposal was, however, defeated.

Reclamation Recovering land from the sea. It has occurred in the building of sea walls and embankments and is usually done when the sea is receding. In England much land around the Wash has been reclaimed, and there are other instances, notably on the south coast of Kent, and in the estuary of the Rihble. Another kind of reclamation is to drain off inland water, as when Whittlesea Mere was so drained. It is now a tract of agricultural land, hnt it was once a lake.

Recognizance In England a legal obligation entered into before a magistrate. It is usually a promise, under penalty, to commit or not to commit a particular act. For instance a man summoned for dangerous driving may be asked to give recognizances that he will not drive again for six months.

Recollect Fathers (or Recollects) Franciscan friars of the Strict Observance. Founded in 15th century Spain and approved by Pope Clement VII, 1532, they were among S. America's earliest Christian missionaries. Gaining renown by preaching, they served as army-chaplains in pre-revolutionary France, and operated in India, Canada and Jerusalem, where they have the charge of Latin Christendom's holy places.

Reconstruction Term used in the United States for the work of restoring the country to prosperity after the devastation caused by the Civil War. It was used in a similar sense in Great Britain after the Great War. In 1917 a ministry of reconstruction was established to prepare for the return of soldiers to civil life and for other changes consequent on the return of conditions of peace. It continued until 1920, when it was abolished.

Reconstruction is also used in a legal sense. It describes the reorganisation of a company's finances, usually in consequence of trading losses. A scheme of reconstruction must be approved by the shareholders and by the courts of law. It usually involves a reduction of the nominal amount of the capital in the business.

Recorder In England a judge. Certain cities and towns have the right to hold courts of quarter sessions and to preside over them, a barrister, called a recorder, is appointed. He receives a salary and holds office for life or until promoted.

He ranks next after the mayor. A recorder cannot sit in Parliament for his own city or borough.

Recorder Instrument used in telegraphy for registering signals on submarine cables. The earlier form was a type of mirror galvanometer, but is now generally replaced by the "siphon recorder," which marks the message in ink upon a moving paper ribbon. The name recorder is given also to a soft-toned musical instrument of the flute type.

Record Office Public building in London. It stands between Chancery Lane and Fetter Lane, and in it the state papers and other historical documents are kept. It is controlled by the Master of the Rolls, and students can consult its records. The museum contains Domesday Book and other priceless historical documents.

Rectifier Electrical device for the conversion of an alternating current into a direct one. It is used for motors, arc lamps, and wireless receivers working from an alternating current main. In the mercury vapour type of rectifier an electric arc is maintained between two electrodes through mercury vapour in a vacuum, the current receiving high resistance in one direction. In an electrolytic rectifier the current readily passes only in one direction from a lead electrode to one of aluminium.

Rector Latin word meaning "ruler." In the Church of England a rector is one who holds a living in which all the tithes belong to him. A vicar has only the lesser tithes. It is also used for the heads of certain colleges at Oxford, e.g., Exeter, and for the headmaster of some of the chief of the Scottish schools, e.g., Edinburgh Academy. In the United States the incumbents of the episcopal churches are called rectors—as they are in Scotland. The title is also held by certain ecclesiastics who are engaged in teaching duties in the Roman Catholic Church.

Reculver Village of Kent, 3 m E of Herne Bay. The old church was pulled down in the 19th century, but its two towers have been taken over by Trinity House to serve as a seamark.

Redcar Borough, market town and watering place of Yorkshire (N R). It is 8 m from Middlesbrough on the L N E Rly. The attractions include good bathing and golf links, but more notable is the fine, firm expanse of sand which is used for motor racing. Horse races are held regularly in the town. Pop (1931) 20,159.

Red Cross International agency for the alleviation of human suffering, especially for giving relief to the sick and wounded in time of war. Its origin may be dated from a meeting held at Geneva on Feb. 9, 1863, to discuss the suggestions contained in a booklet by Henri Dunant entitled *Un Souvenir de Solferino*, which contained a moving description of the sufferings endured by the wounded in that battle (1859). As a result of this meeting, an international conference at Geneva accepted the principle of giving protection in war to the personnel of military hospitals and authorised as the symbol of such protection the now familiar red cross on a white background.

Red Deer Large species of deer (*Cervus elaphus*), widely distributed in temperate Europe, W Asia and N Africa. The male, 4 ft high at the withers is called a stag, becoming in the sixth year a

hart, the female is the hind, the young the fawn. It is greyish in winter, reddish-brown in summer, with lighter underparts. It occurs wild in parts of Britain, tame herds are maintained in parks. The male develops finely branched antlers each breeding season, shedding them by Feb-Mar. See DEER.

Red Deer Town of Alberta. It is on the river of the same name, 99 m from Calgary and 93 from Edmonton. It is an important junction on both the trans continental lines, C P R and C W R, and is also served by the Alberta Central Rly. It is the centre of a farming district and possesses grain elevators. Pop 2006.

Reddish District of Lancashire. It is 4 m from Manchester and is reached by the L M S and L N E Rlys. The chief industries are cotton mills and the making of machinery and chemicals.

Redditch Market town and urban district of Worcestershire. It is on the Arrow River, 15 m from Birmingham by the L M S Rly. It is famous for its manufactures of needles and fish hooks. Motor cycles are also made. Pop (1931) 19,280.

Redemptorists Order of missionary priests in the Roman Catholic Church. It was founded by Alfonso Liguori in 1732. The members aim at teaching the belief of the Church and reforming public morals by visiting, preaching and hearing confessions. The order must be distinguished from the Redemptionists, whose work is to ransom negro children from slavery.

Redesdale District of Northumberland. It is the valley of the little River Rede, and extends for 20 m from Reedsmouth on the Tyne to the border of Scotland. Owing to its position it figured much in the wars between England and Scotland, and the men of Redesdale won a great reputation as fighters. Otterburn is in the valley.

The title of Baron Redesdale is borne by the family of Freeman-Mitford. The first baron John Mitford, a landowner in Northumberland, was Solicitor-General, Attorney-General and Lord Chancellor of Ireland between 1793 and 1806. His son, John Thomas Freeman Mitford (1805-86) was created Earl of Redesdale in 1877, but the title became extinct on his death. In 1902 a diplomatist, Algernon Bertram Freeman Mitford, was created Baron Redesdale. He wrote a volume of *Memoirs*, and died Aug. 17, 1916 when his son, David, became the 2nd baron.

Redhill Market town of Surrey. It is 21 m from London, and is a junction on the S Rly. It possesses a picturesque common. Redhill is part of the borough of Reigate.

Redistribution In political language the rearrangement of the constituencies that return members to the House of Commons. It is usually worked in connection with a measure extending the franchise, as was the case in the United Kingdoms in 1832, 1867, 1884 and 1918. There was, however, no redistribution after the extension of the franchise to all women in 1928. It serves to correct inequalities that have grown up in the various areas, some places having increased in population and others decreased. In some countries, Canada for instance, there is a redistribution of seats in the Dominion House of Commons after each census, according to a fixed plan.

Red Letter Days The greater festivals of the Church, which in old manuscripts were written in red to distinguish them from the lesser festivals, written in black. The term now signifies an outstanding or fortunate day.

Redmond John Edward Irish politician. He was born at Hoeyfield, Co Wexford Sept. 1, 1856, educated at Trinity College, Dublin, and called to the bar in 1886. He represented New Ross 1881-85, N Wexford, 1885-91, and Waterford from 1891 until his death. He was one of the leaders of the Home Rule party, becoming chairman of the National party in 1900, and was a strong upholder of Parnell. Redmond's aim was not separation but the attainment by friendly means of a 'free Ireland within the Empire,' and he expressed his abhorrence of the rebellion of April, 1916. He died March 6, 1918.

Redpoll Song bird of the finch family, distinguished by the male's crimson crown and rosy breast. The name applies loosely to the cock linnet in summer plumage and to the mealy redpoll, *Acanthis linaria*, with white marked wings, a winter visitor to Britain. The lesser redpoll, *A. rufescens*, darker and with unmarked wings, is resident.

Red River River of North America. Rising in N Dakota, it flows between that state and Minnesota into Manitoba and discharges into Lake Winnipeg. A settlement formed by the Hudson Bay Company where Winnipeg now stands combined with one composed of French settlers nearby. The latter rebelled in 1869 when the territorial rights were purchased by the Canadian Government, necessitating the intervention of troops.

Another Red River is the southernmost large tributary of the Mississippi, joining in Louisiana.

Redruth Market town and urban district of Cornwall. It is 9 m from Truro, and is served by the G.W. Ry. Redruth is an important centre of the tin and copper mining industries. It has also a trade in cattle. Pop (1931) 9904.

Near the town are Carn Brea a hill with Druidical remains and ruins of a castle and Gwennap Pit, where John Wesley preached, is still a place for meetings of Methodists.

Red Sea Inland sea separating N E Africa from Arabia. It is 1400 m in length from Suez in the north to the Strait of Bab el Mandeb in the south, which connects it with the Indian Ocean. Its greatest breadth is 250 m. Navigation in the Red Sea is difficult owing to the irregularity of the tides. The completion of the Suez Canal in 1869 restored to the sea the position which it had held in ancient times as a great commercial highway.

Redshank British shore bird (*Totanus calidris*) akin to the sandpipers, and ranging over Europe, Asia and N Africa. Measuring 11 in., with greyish brown plumage, whitish beneath, bright red legs and black tipped yellow bill, it lays four blotched yellowish grey eggs in grass lined ground nests. The slightly larger spotted redshank, with more mottled plumage, is a bird of passage in E England.

Redstart Genus of song birds (*Ruticilla*) of the thrush sub family, natives of Europe, Asia and Africa. The com-

mon European *R. phoeniceus* with white forehead and black throat, habitually flirts the tail, the male, 5½ in long, has a bright bay breast. It reaches Britain in March for breeding. The black redstart visits S England autumnally.

Reduction Term used in metallurgy for the process by which a metal is separated from the ore. In the first stage the ore is reduced to a suitable degree of fineness by mechanical means and after washing and sorting is concentrated in a fine powder. The concentrate is then smelted by the aid of various reducing agents, in the case of oxides such as charcoal cyanide of potassium and other substances which remove oxygen.

Redwing Small species of thrush (*Turdus iliacus*). The male, 8½ in long, with reddish orange under wing-coverts and axillaries, is distinguishable from the song thrush by a white streak over the eye. Breeding in N Europe, it is a winter visitor to Britain.

Redwood Name applied to several unrelated trees. The California redwood, *Sequoia sempervirens* a cone-bearing evergreen growing 130 to 340 ft high, with a trunk 8 to 25 ft across clear of branches ½ to 1½ its height, yields light durable timber extensively used in Europe. Baltic redwood is the Scots pine. There are also Andaman, Cape and Indian redwoods.

Reed Name of various tall perennial water loving grasses. The widely distributed common broad leaved reed, *Phragmites communis*, 6 to 10 ft high abounds in Britain. The Provence reed or Spanish cane *Arundo donax*, sometimes 18 ft high is used for bagpipes and other wind instruments. The sea reed or morrain grass *Ammophila arenaria* is extensively planted for hindling sand dunes.

Reed Speaking part (made of coarse cane like grass) in the mouthpiece of wood wind instruments, saxophones and in harmoniums. Organ reeds are made of metal. A "free" reed, when vibrating, passes through the slotted plate to which it is fixed enabling the wind so to push it that the opening closes. The harmonium has a free reed.

A "beating" reed strikes the edges of the slot. Beating reeds can be single or double.

Reedbuck Boer name, *rethbok*, for several allied African antelopes especially *Cervicapra arundinea*. Standing 3 ft high at the shoulders short tailed, pale fawn orange tinted on the head, and dingy white underneath, the male alone bears upright horns 12 to 13 in long and curving slightly forwards. Formerly common it is now rare S of the Vaal, and extinct in Bechuanaland.

Reel Scottish dance. It is danced by couples to the music of the bagpipe or the fiddle. It may be a foursome or sixsome or eightsome according to the number of couples in the dance.

Reeves John Sims English vocalist. He was born at Woolwich on Sept 26, 1818. His first musical performances were given in boyhood on the organ and he made his debut in opera in 1839 as a baritone soloist. It was, however, as a tenor that he achieved fame owing to a voice of surpassing strength and beauty, and at the age of 30 he was recognised as the leading English tenor. He died on Oct. 25, 1900.

Refectory Architectural term for the common dining hall in a monastery. It was usually placed on the ground floor or sometimes raised on vaulted collars or even as a detached building. During the meals one of the brethren read aloud from a lectern supported by corbels on one of the side walls.

Referee Arbitrator or judge. The term is used generally for the man who control games at football, boxing matches and other sporting events. In football the referee is usually chosen from a list of old and experienced players, and has no connection with either of the clubs playing. He is paid a fee.

Referees of another kind are lawyers appointed to discharge certain duties in the law courts. The Supreme Court in London possesses three official referees and those are referees to decide matters that arise under the Finance Acts, 1915-27.

Referendum Method in politics by which the people decide in favour of or against a certain proposal. It has long been used in Switzerland and in the states and cities of the United States, but never as yet in Great Britain. It has been used in Australia on several occasions, and there is provision for it in the constitution of the republic of Austria. Several countries, among them Finland, have decided the question of prohibition by a referendum. Since the Great War the referendum has been used in Germany. In 1926 a referendum decided that the property of the former reigning princes should not be confiscated, and in Aug., 1931, another supported the Government in the measures taken against the followers of Adolf Hitler, but the referendum of Nov., 1933, approved the policy of the Nazi government, and that of Aug., 1934, confirmed Hitler's unifying in his own person the offices of President and Chancellor of the Reich after Hindenburg's death. The Saar plebiscite or referendum, Jan., 1935, showed a 90.38 per cent. vote in favour of return to Germany, and in Nov., 1935, the Greeks expressed by plebiscite their desire to return to monarchy.

Refinery Name given to a place where the process of refining or purifying such things as metals, oils, sugar, etc. is carried on. The refining process naturally varies with the character of the product, in a petroleum refinery the process involves fractional distillation by which hydrocarbons such as motor spirits, lubricating and lighting oils, etc., are obtained. In metal refineries the crude metal is purified by furnace methods or electrolysis and in sugar refining the colour is removed by animal charcoal or other methods.

Reflation Term used during the economic crisis of 1931-32 as an alternative to inflation, or an increase in the amount of currency in existence. It is defined by Sir Arthur Salter as the "raising of the general level of wholesale prices by concerted monetary action, to a selected level, not higher than that of the beginning of the world depression in 1929 and its maintenance at this level hereafter."

Reflection Term applied in optics to the change of direction when a ray of light strikes a surface and is thrown back or reflected in a new path. The degree of reflection varies with the nature of the surface. A smooth, polished surface, as in a mirror, reflects nearly all the light, a perfectly reflecting surface being invisible.

Reform Improvement, literally reforming, used chiefly in political life. More especially it is applied to the alteration in the United Kingdom of the method of sending members to the House of Commons. The act of 1832, which abolished the rotten boroughs and gave votes to householders on a uniform plan, is known as the great Reform Act. In 1932 its centenary was celebrated. Other measures on the same lines were passed in 1867, 1884, 1918 and 1928, when all men and women over 21 received the right to vote. Reform is also used for the proposals to alter the constitution of the House of Lords.

Reformation The Religious and political movement in Europe in the 16th century, which ended in the establishment of the Protestant Churches. Its causes are to be found in the abuses prevalent in the Roman Catholic Church during the previous centuries, the new critical spirit, fostered by the Renaissance, and the growing force of nationalistic feeling. In 1517 Martin Luther nailed to the church door at Wittenberg his famous ninety-five theses, in which he attacked the sale of indulgences. He followed this by a stout resistance to the attempts made by the Pope to suppress him, and was excommunicated in 1520. His followers received the name of "Protestant" from their protest made at the Diet of Speire against a decree which enacted that no change should be made in Church practice and doctrine.

Not all the early Protestants, however, were Lutherans. In Switzerland, Zwingli and Calvin were the leaders of an independent movement, which spread rapidly in France, the Netherlands and (through the influence of John Knox) in Scotland. The name Reformed Churches was given to the bodies established as a result of the Calvinistic teaching, including the Huguenots in France and the Presbyterian Church in Scotland.

The Counter-Reformation was the attempt of the Roman Catholic Church to reform itself in the 16th century and to stem the flow of Protestantism, for which purpose the Pope summoned the famous Council of Trent.

Reformatory Schools Schools in Great Britain "for the industrial training of youthful offenders" (Children's Act, 1908). These institutions are subject to periodical inspection by the Children's Branch of the Home Office, and are supported mainly, but not entirely, from public funds. Only boys and girls between the ages of 12 and 16 may be received in such schools, and that after a recorded conviction, and for a period of detention lasting from 3 to 5 years.

Reformed Episcopal Church Religious denomination. It originated in New York in 1873 when Bishop Cummins seceded from the Episcopal Church of America and consecrated other bishops to act with him. This body has a small following in England (generally known as the *Free Church of England*) and preserves the principle of episcopacy without some of the doctrines and practices which have generally been associated with it in church tradition.

Refraction Term in optics applied to the change in direction when a ray of light passes from one medium to another, becoming bent or refracted out of its rectilinear path into a new one.

Refrigeration Process of applying cold for the preservation of foods. The simplest method is the use of a freezing mixture of ice and salt, but on a larger scale several types of refrigerating machines are used. In one type refrigeration is obtained by alternately expanding and compressing air, in another a medium such as ammonia is subjected to a cycle of expansion and compression, heat being absorbed from surrounding objects. In still another type a liquid such as carbonic acid or sulphurous acid is vaporised and then mechanically compressed again into liquid form. Refrigerating plant is used extensively for perishable products.

Regalia Emblems of sovereignty. They consist of the crown, sceptre, orb and other articles used at a coronation. The British regalia in which are some priceless jewels, is kept in the Tower of London.

Regatta Name for a meeting where races are held for yachts, rowing boats and other craft. Regattas are held at many watering places. In England the chief meetings are the regatta at Henley, the great event of the rowing season, and the yachting week at Cowes. See HENLEY ON THAMES.

Regeneration Power of renewing lost limbs or organs. It is possessed by animals of the lower orders. Thus the Hydra can regrow lost tentacles, etc., and a whole animal may even grow from a morsel of tissue. The annelids (earthworms), crustaceans (crab), fish, and lizards are able to recreate lost parts in a varying degree. In the higher animals the power is manifested only as that process which replaces lost tissue when a wound heals.

Regeneration Theological term denoting the spiritual change which all experience in becoming Christians. The necessity for it, declared by our Lord to Nicodemus (John III) is universally admitted by the Christian Church. Protestant evangelical theologians hold that it is a conscious experience independent of any act or ceremony, attending the incident of conversion. The Roman Catholic position regards baptism as the real point of transition from the natural to the spiritual life, conferring the grace of baptismal regeneration.

Regent One who rules on behalf of a sovereign. When a sovereign is a minor, or is insane or in any other way incapable of ruling it is usual to appoint a regent to act for him. This was the case in England during the latter part of the reign of George III, when his eldest son, afterwards George IV, was made regent. His powers were defined by Act of Parliament.

In Spain there was a regent, the Queen Mother, during the long minority of the ex-King Alfonso XIII, and in Bavaria there was a regent when King Louis was insane. Prince Paul of Yugoslavia has acted as First Regent on behalf of the young King Peter II, whose father, King Alexander I, was assassinated at Versailles in Oct. 1934.

Regent's Park Park in London also the name of the district around it. It is to the north west of the city in the borough of Marylebone and contains the zoological and botanic gardens. It was laid out in 1812 and named after the Prince Regent (George IV). The garden was opened to the public in 1838. It covers 473 acres.

Regent Street London thoroughfare. It reaches from Waterloo Place to Langham Place, crossing

other important thoroughfares at Piccadilly Circus and Oxford Circus. It was built between 1813 and 1829 and was named after George IV, then Prince Regent. The Quadrant and most of the buildings were designed by John Nash, and it became a great shopping centre. In 1919 the leases which were crown property began to fall in and the shops were rebuilt during the next few years. In June, 1927, the street was formally opened by King George V.

Regillus Small lake in Italy, now drained. It lay to the east of Rome. It is famous because near here, in 496 B.C., the Latins were defeated in battle by the Romans. The story of the battle, used by Macaulay in one of his *Lays of Ancient Rome*, tells how Castor and Pollux, riding on white horses came to the aid of the Romans and turned the fight in their favour.

Regiment Body of soldiers. Every army is divided into regiments but the nature of these differ. In the British army the regiment of infantry is not a fighting unit. It is an organisation consisting of several battalions with a colonel and a depot for them all. Before the reforms of 1871 the regiment of infantry was a fighting unit, the regiments were numbered according to the order in which they were raised and were called regiments of the line. In the cavalry the regiment is still the fighting unit. The artillery is organised into one regiment the Royal Regiment of Artillery. Each regiment has its colours, but these are no longer carried into action.

Regina City of Canada and the capital of the province of Saskatchewan. It is 460 m. from Winnipeg and is served by both the trans-continental lines, C.P.R. and C.N.R. The city has an enormous trade in wheat and the manufactures include agricultural implements. In 1932 a world's grain exhibition was held here. Before 1910 Regina was the capital of the North West Provinces and the headquarters of the North-West Mounted Police. Pop. (1931) 53,200.

Registrar Any one who keeps a record. In Great Britain there is in every locality a registrar to whom particulars of births, marriages and deaths must be given, and by whom marriages can be celebrated. This work is supervised by the registrar general at Somerset House, London, who is responsible for the census. There is a registrar general for Scotland in Edinburgh. There are registrars in the law courts and other registrars are responsible for keeping the names and addresses of the shareholders in public companies.

Registration Act of registering or entering in a register. It is used for the official entries in books kept by a registrar of births, marriages and deaths and also for recording a great variety of other information for the public use. It is also used for the act of insuring, by paying an extra fee, the safe delivery of letters, articles and luggage. Letters and postal packages can be registered at any post office.

Registration is used also in printing where it means the exact adjustment or correspondence of two pages of printed matter, or in colour photography the correct impression and combination of the various tones. It is used in music for the act of combining the stops of an organ and in photography for making the focusing screen correspond with the plate or film.

Regulator Device for regulating the working of various industries.

trial processes or machinery, either in relation to proper conditions of temperature, humidity, speed, pressure, etc., or voltage, density of current, etc., in electrical apparatus, timing of operations, or of steam pressure in engines. Many different types of regulators are used, some being self-operated, others worked by air, steam or electricity. Examples are the timing devices used in dyeing and vulcanising, rheostats and tachometers, and flow-meters.

Regulus Marcus Atilius Roman general. Victorious over the Carthaginians several times, he was defeated by them in 255 B.C. and held in captivity five years. In 250 B.C., according to tradition, the Carthaginians sent Regulus, under parole to sue for peace. He strongly advised the Senate to reject their proposals, and resisting all efforts to make him break his promise to return, went back to Carthage, where he was put to death.

Rehoboam King of Judah, 10th century, B.C. Son of Solomon, his accession occasioned a revolt of the N. tribes and their separation as the kingdom of Israel under Jeroboam (qv). Reigning 17 years, he fortified 15 towns in Judah against the Egyptian King Shishak, who destroyed them and despoiled Jerusalem.

Reichstag Name used for one of the houses of the legislature of the federal republic of Germany. It means "the day of the empire," and was used for the assemblies or diets called together by the rulers of the empire that lasted until 1806. In 1870 the name was given to the elected assembly established in Berlin for the new German Empire, and it was retained in 1918 by the republic. In 1933 its members numbered 647, they are elected by all men and women for four years. Early in 1933 the building was burned, and later in the year the supposed incendiaries were tried in Berlin.

Reigate Borough of Surrey. It is 23 m. from London, on the S. Ry. From 1295 to 1867 Reigate was separately represented in Parliament. It has an agricultural trade and is a residential district for Londoners. Redhill is part of the borough. Pop. (1931) 30,830.

Reign of Terror Phrase used for the period of the French Revolution that culminated in 1793, when the Jacobins formed the committee of public safety. Hundreds of persons, including Marie Antoinette and many aristocrats, were sent to the guillotine. The leaders then turned upon one another, and Danton and Robespierre were put to death. The latter event took place on July 28, 1794, which may be regarded as the end of the Reign of Terror. It was replaced by the Directory.

Reincarnation Belief that the soul returns to human life after death. This theory had been held in many parts of the world and is a cardinal tenet of modern theosophy. Pythagoras enjoined abstinence from flesh diet, on the ground that all living things were akin. Plato taught that birth was not the creation of a soul, only its transgression from one body to another.

Reindeer Sole species of deer antlered in both sexes (*Cervus* or *Rangifer tarandus*). Standing 4 ft. high at the shoulders, swift-footed, it is brownish grey, with whitish face and neck, the antlers are more or less palmated. The European form, which reached to the Pyrennes in the early stone age, has long

been domesticated, especially by the Lapps, large herds being maintained for their milk, flesh and hides. The untamed form inhabiting Canada is called the caribou (qv).

Reindeer Moss (*Cladonia rangiferina*) Widespread species of lichen, native of Britain and especially abundant in high latitudes. Comprising an intermingled mass of much-branched tubular structures, 2 to 12 in. high, it covers barren plains in Lapland and elsewhere, being the reindeer's winter food.

Reinhardt Max. Famous Austrian theatrical producer. He was born near Vienna Sept. 9, 1873, making his first stage appearance in Salzburg in 1893. The next year he was appointed to the Berlin *Deutsches Theater*. During his connection with this and other theatres he has practically revolutionised stage presentation, making it essentially dramatic rather than literary. He has produced many plays in different European cities, and some striking ones in New York. In London he produced *Sumurun* and *The Miracle*. Offenbach's *Helm of Troy* and *King Oedipus* and in 1933 at Oxford, *A Midsummer Night's Dream* (out-of-doors). In 1920 he started the famous Salzburg Festivals and every year produced *Everyman* there. But in April, 1933, a ban was placed upon him in Germany, and the Schauspielhaus which he had constructed was closed.

Relapsing Fever Acute infectious fever due to a specific micro organism. Also called seven-day fever, it has prevailed at intervals since the mid-18th century in Britain, Central Europe, Russia and the Levant, destitution and overcrowding being predisposing causes. It manifests varying symptoms in India, China, Africa—sometimes called the tick fever—and the Panama-Colombia region of tropical America. After developing for several days it subsides spontaneously with profound perspiration, but tends to recur.

Relativity Mathematical theory of the universe first put forward by Einstein in 1905. In it he postulated first that absolute motion has no observable effect upon physical phenomena, or in other words that all physical phenomena are so constituted that it is not possible to observe by their means absolute motion; and second, that the rate of travel of light is the same in all directions at a given place, and its value is constant for all places in the universe, no matter what may be the relative movements of the earth or other system of reference involved. The experimental research of Michelson, and the speculations of Fitzgerald and Lorentz paved the way for Einstein's investigations. In the theory of relativity the ideas of force and the action of one body upon another are rejected and inertia and gravitation are shown to be equivalents of one another.

Relievo Term in art derived from the Italian and used for a modelled surface as distinct from sculpture in the round, for decorating walls and other flat surfaces in buildings. When the object is in low relief or less than half its natural projection, the term *basso relievo* is used, in middle relief it is termed *mezzo relievo*, and when more than half its natural projection, *alto relievo*. An example of relievo work is seen in the Baptistery gates at Florence.

Religion No completely satisfactory definition of religion has yet been offered. Lueba, in his *Psychological Study*

of Religion, discusses no less than forty-eight different definitions. The term, however, may be said to indicate an attitude of reverence to the Supreme Being, together with the resulting system of behaviour (including worship).

It seems probable that man's religion began in nature worship. To primitive man the world contained many objects which, because they appeared to possess mysterious powers, be believed to be inhabited by spirits. Hence he came to think of his world as full of deities needing to be propitiated by worship and sacrifice. Thus polytheism arose, particular tribes choosing deities regarded as specially favourable to them. In the higher forms of polytheism (e.g., Brahmanism) the many gods came to be regarded as so many impersonations of the attributes belonging to the one God, but polytheism was not finally transcended until Judaism, followed by Islam and Christianity, arrived at a faith in which monotheism was absolutely fundamental.

Remainder Legal term for a bequest of land or other real property to a person after the death of another. It was very usual before 1925, but since the legislation of that year land can only be bequeathed like other forms of property. The same end can be secured, but by different means.

Rembrandt Rembrandt Harmensz van Rijn, Dutch painter. He was born at Leyden on July 15, 1606, studied painting from an early age, and began as an etcher. In 1631 he settled in Amsterdam and devoted himself to his work with great diligence. His output was enormous, and there remain still about 600 paintings, 2000 drawings, and 300 etchings. These include landscape work and portrait studies, of which his studies of old age are particularly noteworthy.

He was the leader of the reaction against Italian influence in the Dutch school and strove to replace artificial classicism with colourful paintings from nature. He combines in his work a noticeable power with a peculiarly delicate skill. He died on Oct 4, 1669.

Remembrancer Public official in England the King's Remembrancer is a high official in the law courts, the office being held by the senior Master of the Supreme Court. In Scotland he is a high official of the Court of Session. The City of London has also a Remembrancer, who is one of the chief officials of the corporation.

Remington Philo, American inventor. Born in Litchfield, New York, Oct 31, 1816, he achieved fame as the inventor of the first typewriter and also of a breech loading rifle. He died on April 4, 1889.

Remus Brother of Romulus (qv) with whom he is fabled to have founded Rome and by whom he was slain.

Renaissance The Revival of art and letters in Europe during the 15th and 16th centuries. In 1453 Constantinople was captured by the Ottoman Turks. Their advance accelerated the migration to Italy of Greek scholars who brought with them their knowledge of the Greek language and gave a strong impetus to the new learning. The literature of ancient Greece and Rome was studied with great ardour and the search for old manuscripts was pursued by prince as well as scholar. The movement was aided by the invention of printing by John Gutenberg of Mainz in 1438. In England

the Renaissance was associated especially with the names of Sir Thomas More, John Collet, and Erasmus.

Renan Ernest, French historian and philologist. He was born in Brittany on Feb 27, 1823. Educated originally entirely under clerical influence, with a view to entering the church, he was forced to abandon traditional Christianity as the result of his study of Hebrew and of German criticism. His *Vie de Jesus*, the first of a series of studies on the origins of Christianity made him famous throughout Europe. Among his other numerous works are studies of St Paul and Marcus Aurelius, and a history of the people of Israel. He died on Oct 2, 1892.

Renfrew Burgh and seaport of Renfrewshire. It is on the Clyde, 5 m from Glasgow, and is served by the LMS Rly. Renfrew is a shipbuilding centre and has docks. There are also engineering works and other industries. There is an aerodrome at Moorpark. Pop (1931) 14,986.

Renfrewshire County of Scotland. In the south-west of the country, it is quite small, being only 240 sq m in extent. The Clyde cuts it into two unequal parts. Renfrew is the county town but much of the county business is done at Paisley. The southern and western parts are agricultural districts but in the north are Paisley, Greenock, Port Glasgow and parts of Glasgow. There are hills in the south, the rivers are tributaries of the Clyde. Pop (1931) 288,575.

Reni Guido, Italian painter. Born at Calvenzano, near Bologna, on Nov 5, 1575, after studying with Ludovico Carracci, he went to Rome in 1599 and again in 1605. He painted there his famous *Aurora and the Hours*. He returned to Bologna after a quarrel with the papal authorities and died there on August 8, 1642. He was famous also as an etcher, and is noted particularly for his colour and expression, and the accuracy of his drawing.

Rennes City of France. It is the capital of the department of Ille-et-Vilaine and the ancient capital of the Duchy of Brittany. The town was burnt down in 1720 and rebuilt in the style of the period in grey granite. The most distinguished building is the Palais de Justice which was completed in 1654 as the seat of the parliament of Brittany. It has a broadcasting station (272 M, 1.3 kW). Pop (1931) 88,659.

Rennet Substance contained in the membranous lining of an unweaned calf's fourth stomach. It is used for curdling milk, especially in cheesemaking. It comprises gastric juices including a ferment, rennin, which affects the coagulation. It is used by softening the salted lining or roll and adding portions to the milk, or in the form of an extract.

Rennie John, Scottish engineer. Born June 7, 1761, he achieved fame as a bridge builder, designing among others the Southwark, Waterloo and London Bridges, and also docks at London, Liverpool, Dublin, Greenock and Hull. As a harbour designer he did notable work in the ports of the south coast, including the breakwater at Plymouth. He died Oct 4, 1821.

Rent Payment made for the use of land or buildings, made by the tenant to the landlord, weekly, monthly, quarterly or as arranged. Arrears of rent are recoverable by process of law, but the landlord cannot now, as he could before 1914, distrain without

applying to the court for permission to do so. A payor of rent is entitled to deduct the income, or property, tax paid by him from the amount handed over to the landlord.

In theory rent is fixed by an economic law. It is the amount which one will pay for land that is of greater value than no rent land as it is called. The net value of the crop produced on such land over the value of that produced on no rent land will be paid by the tenant for its use because the land is worth that much and no more to him. The same principle is true of site values. A man will pay for a site in Regent Street, London, the amount by which that site exceeds, in productive value to him, a site in the country.

This theory, however, needs qualification. As regards agricultural land, capital has been put into it in buildings, drainage, etc., so that rent is for the most part interest on capital. The rent paid for sites of great value because they are in populous centres is another question and there is some justification for treating these in an exceptional way in matters of taxation.

RENT RESTRICTION In 1915, to deal with the changed conditions due to the Great War, it became desirable to restrict the power of landlords to raise rent, as the serious shortage of houses would have enabled them to do this to a very considerable extent. At first only temporary, the restriction has been continued by a series of Acts of Parliament, culminating in the Act of 1920.

The Acts apply to dwelling houses built on or before April 21, 1919 where the standard rent does not exceed £105 in London, £90 in Scotland, and £78 elsewhere. House in this sense does not include any part of a dwelling house let off separately, or furnished houses or rooms. The standard rent is that which was paid in August, 1914.

Where a house comes under the Act, the landlord can increase the standard rent by 40 per cent. If he does all the repairs. He can also increase it to recover any amount which he has paid in increased rates. If the tenancy of a house comes to an end the landlord can have the house decontrolled, and can then charge for it any rent he can get, as can the landlords of houses built since 1919.

In 1931 a committee reported upon the subject of rent restriction, advising that it should be discontinued for the larger houses, but continued for the smaller ones. The Rent Restrictions Regulations, 1933, simplified the form scheduled to the 1920 Act, making clear conditions of possession and decontrol.

Rentes Name given in France and Italy to part of the public debt. *Rentes* are the equivalent of consols in Great Britain, being issued to investors and then bought and sold on the stock exchanges.

Rentier One who receives a fixed income on investments in government and other securities. In 1930-32 much was heard of the *rentier* who was said to be in a very favoured position, because while prices and many incomes had fallen, his own income had remained stationary and was, therefore, in terms of commodities, larger than before.

Renton Town of Dumbartonshire. It is 2 m N of Dumbarton, and 10 m from Glasgow by the L.M.S. Rly. Situated on the Loven, the town has cotton industries. Here Smollett, the novelist, was born.

Repairs In connection with property, making good damage due to wear and tear. The duty of keeping a house

in repair falls, by English law, on the landlord in the case of small houses, which are defined as those worth not more than £10 a year in London, £26 a year in larger boroughs and urban districts, and £16 elsewhere. In other cases repairs are a matter of contract. To take a house on a repairing lease is to undertake to keep it in good repair and to leave it, at the end of the tenancy, in as good condition as it was when taken.

Reparations Term used especially for the payments made in money and kind by Germany as compensation for the damage done by her troops during the Great War. The principle that reparations must be paid was laid down in the Treaty of Versailles, and a commission appointed to fix the amount. Various sums were suggested, and in 1921, at a conference held in London, the amount was fixed at £6,600,000,000 to be paid over a period of years. A payment was made, but the scheme soon proved impossible, and a moratorium was granted to Germany.

In 1923 a committee was appointed to inquire into the subject and a plan, called the Dawes Plan, was agreed upon. This provided for the payment by Germany of certain sums to France, Great Britain, Italy and Belgium, but the total amount was not fixed. Under this plan payments were regularly made until 1928, when it broke down. Another committee then inquired into the matter and the Young Plan was evolved. By this the total sum payable was fixed and Germany was to pay it in annuities ending in 1988. The economic and financial paralysis of 1930-32 made this plan inoperative, and in June, 1931, a moratorium of one year was granted to Germany. Before the end of this period Germany stated that she was unable to meet her liabilities in connection with reparations, and in June, 1932, a European conference met at Lausanne to effect, if possible, a permanent settlement. This decided to abolish reparations, provided a settlement about war debts was reached. In return, Germany undertook to contribute £150,000,000 towards European reconstruction.

REPARATIONS PAYMENTS The following figures are extracted from a return published in June, 1932.

RECEIPTS OF REPARATIONS.			
	Paid by Germany	Paid by Other Countries	War Debt Received
United States	£16,700 000	—	£434 400 000
Great Britain	121 000 000	£200 000	71 300 000
France	273 000 000	300 000	500 000
Italy	63 700 000	1,400 000	100 000
Belgium	126 200 000	100 000	—
Yugoslavia	34 200 000	2,500 000	—
Rumania	5 600 000	300 000	—
Portugal	4 000 000	10 000	—
Greece	2 100 000	1 000 000	—
Japan	4 000 000	10 000	—

PAYMENTS OF WAR DEBTS			
Great Britain	£226 200 000	Yugoslavia	£1 500 000
France	108 400 000	Rumania	1 800 000
Italy	31,500 000	Portugal	1 800 000
Belgium	7 200 000	Greece	1,700,000

Repertory Theatre Theatre in which a semi permanent company gives a repertoire of plays. The term is more widely used in England to denote a theatre in which a resident company gives a new play at frequent intervals. The most famous repertory theatre was Miss Horniman's Company at the Manchester Gaiety Theatre, from 1907-16. The oldest existing one is at Liverpool, which has produced many new plays by English and Continental authors.

There is also a famous one at Birmingham, under Sir Barry Jackson, and others on a non-commercial basis in different parts of the country. Among the most famous is the Abbey Theatre, Dublin.

Reporter Journalist who makes reports of meetings, etc., for newspapers. Every paper has its staff of reporters, who work under the news editor, and attend meetings of all kinds to report speeches. A knowledge of shorthand is essential. Cases in the law court are also taken down by reporters or shorthand writers. There is an official staff for reporting the debates in the House of Commons. Formerly it was done by the firm of Hansard. See JOURNALISM.

Repoussé Form of metalwork. It consists of a raised pattern produced by hammering on the reverse side. Many brass articles are ornamented in this way. It is also used for silver.

Representation In politics to take the place of other persons. The word also means to reproduce, describe or bring to the mind. To-day all civilized countries possess representative institutions as they are called. Under this system the people, unable owing to their numbers to rule themselves directly, elect certain persons to do this for them. These representatives are responsible to those who elect them because the latter can refuse to re-elect them at the end of their term of office.

The system arose in England in the Middle Ages when districts were asked to send men to the county courts for a particular purpose, e.g. to state who owned certain land, or who had committed a certain crime. These men were chosen by their fellows and were therefore representatives. From this local representation developed the central representative assembly of Parliament (q.v.). In time other countries followed the example of England until representative government has become the rule. Since the Great War, however, there has been a movement away from it and neither the Fascism of Italy, nor the Soviet system of Russia can properly be called representative.

Representatives House of Name of the lower house of Congress of the United States and of the Parliament of the Commonwealth of Australia. The former consists of 435 members elected for four years and paid salaries, as well as two delegates and three commissioners from territories outside the United States. Its president is the Speaker. All legislation needs its assent, but it differs from the House of Commons in that no minister can sit and vote therein. They can attend and speak.

The Australian House consists of (1932) 76 members who are paid salaries and elected for three years or less. It is under a Speaker and resembles the British House of Commons. In both the United States and Australia there are arrangements for increasing or decreasing the number of members from the several states according to changes in population.

Repression Term used in psychoanalysis to describe instinctive tendencies and memories which are repressed into the unconscious mind. Though repressed they remain active and may express themselves indirectly in conduct as neurotic symptoms. See INHIBITION, UNCONSCIOUS SUBCONSCIOUS.

Reprieve Release or respite, but more strictly the suspension of a

sentence of death. In Great Britain a person sentenced to death can be reprieved by the king acting on the advice of the Home Secretary, and this is sometimes done.

Reprisals Retaliation, especially in time of war. There were cases of reprisals during the Great War especially in connection with the bombing of towns from the air and the treatment of prisoners of war.

Reproduction Process of propagation. It may be asexual or sexual. In protozoa new individuals arise by fission of the adult cell or by budding. In the lower metazoa (multicelled animals) these asexual processes serve also, but in the great majority of the metazoa the sexual form is the rule. The gametes (sperm cell and ova) conjugate and a new cell is formed which becomes the embryo, undergoing in turn segmentation, gastrulation, and thereafter the gradual growth of differentiated tissues and organs within the egg envelope, or safely enclosed within the body of the female parent. Some organisms are hermaphrodite and in others parthenogenesis—development from egg cells without fertilisation by the male—may occur. In yet other creatures sexual and parthenogenetic generations may alternate. See EGG, EMBRYOLOGY.

Reptile Class of vertebrate animals ranking above amphibia and fishes but below birds and mammals. All have epidermal layers of scales, often shed and replaced. They are cold blooded with three chambered hearts breathe by lungs never by gills, and bear eggs, sometimes hatched within the mother's body. Except some herb-eating tortoises, all are flesh-eating. Five orders exist, lizards, snakes, crocodiles, tortoises and one, formerly important now represented solely by the Iguana like tuatara of New Zealand. Five other orders, which flourished in the Mesozoic age, containing the giants of the class, are extinct. Known only from their fossil remains, they include dinosaurs, Ichthyosaurs, plesiosaurs and pterodactyls.

Repton Village of Derbyshire. It is 5 m. from Burton-on-Trent, on the L.M.S. Rly., and was once the chief town of the kingdom of Mercia. The church is partly Saxon. Repton School dates from 1557, its founder being Sir John Port. It has accommodation for about 600 boys.

Republic State in which there is no hereditary sovereign and the opposite of a monarchy. Most of the Greek states were republics and Rome before the time of Augustus was a great republic. Republics were rare from that date until the revolt of the American colonies and the French Revolution, Venice and the United Provinces of the Netherlands being the exceptions. France was a republic for a short time after the deposition of Louis XVI and again in 1848. The present republic dates from 1871.

In the 19th century several republics came into being, especially in Europe and S. America and there were a number of new ones after the Great War, including Germany, Austria, Turkey and in a sense Russia. Spain was added to the number in 1931. The method of government in a modern republic is very like that in a monarchy except that a president is elected for a certain period, usually four or seven years.

Republican One who believes in a republic, but more exactly a member of one of the two great political

parties in the United States, the other being the Democrats. The party is descended from the anti-federalists of Washington's time, and since the Civil War has been dominant except for a few years. Nearly all the presidents since Lincoln have belonged to the Republican party, Woodrow Wilson and Franklin D. Roosevelt being exceptions. Harding, Coolidge and Hoover have all been Republicans. The party is strong among the business men and in the north, it stands for big protection and an extension of the power of the National Government.

Requiem In the Roman Catholic Church a mass sung for the repose of the soul of a dead person. It is also the name of a musical composition in honour of the dead which is played at funerals and similar services.

Reredos Screen at the back of an altar in a cathedral or church. Some are of stone adorned with statues and carving, others are of wood with paintings thereon. There are some magnificent examples in English cathedrals, e.g., at Winchester.

Research Industrial Scientific study of manufacturing and raw material problems in industry. Processes used for ages in industries became the subject of special study only within recent times. Research is now carried out by manufacturers and associations and by governments. In Great Britain the Department of Industrial Research controls the geological survey and the National Physical Laboratory, and conducts investigations in building, chemistry, food, forest products, fuel, radio and water pollution.

Reservation In ecclesiastical usage the practice of keeping the elements that have been consecrated at the Mass or Eucharist for future use. In the Roman Catholic Church these elements, having become the body and blood of Christ, called the Host, are kept where worship can be paid to them.

The prayer book of the Church of England allows the reservation of the elements in order that the sacrament can be administered without delay to the sick and dying, but forbids their worship or adoration. Nevertheless, the custom of reserving the elements where they can be worshipped is practised by many of the High Church clergy. The difficulty of reconciling the conflicting ideas on reservation was one of the chief reasons why the revised Prayer Book was rejected by the House of Commons in 1928-29. The compromise suggested by the bishops allowed reservation but forbade adoration.

Reservoir Structure or enclosure for storing water in large quantities for supplying towns, etc. In some cases a natural lake or an artificial one made by damming a stream is used to store the surface waters over a large area. Another type of storage reservoir is constructed by damming a valley, or it may be entirely artificial, the water being conveyed by an aqueduct or pumped in from a river.

Resident In a special sense the representative of a country in a foreign land. The term is confined to men sent to represent their country in a state that is under its protection. Thus the Government of India has residents in the capitals of the native states.

Resin Substance which occurs as an exudation from some plants. It appears in globules, which become hard when

exposed to air. Resins are insoluble in water but soluble in alcohol, and some oils, and are very inflammable. The soft resins are malleable and are used in medicine as an ointment ingredient, while the hard resins are used chiefly as varnishes, such as mastic, copal and sandarac.

Resistance Term in electricity for the measure of the opposition of a conductor to the passage of an electric current, the practical unit being the ohm (Ω). All substances offer some resistance to a current, but the amount varies with the nature of the material, its length and cross section. Metals offer little resistance and copper the least, hence its use as a conductor. With an increase of temperature there is an increased resistance.

Resolution Formal proposal put before a meeting of any kind. It is usual for a resolution to be proposed and seconded, and then discussed and voted upon. Any alteration in it must be begun by proposing and seconding an amendment. If this is accepted the resolution may be altered to include the amendment, and then either accepted or rejected. The House of Commons does some of its business by resolutions. Taxes and duties are put before the House as resolutions before they are included in the Finance Act.

Resonance Sympathetic vibrations of two or more objects, due to the coincidence of their vibratory periods. A common example is the greatly increased vibration of some swing bridges, due to the tramp of marching troops. The order is usually given to 'break step'.

Respiration Process in both plants and animals by which oxygen is absorbed into the body and some of the products of combustion, viz., carbonic acid and water, are removed. In unicellular organisms oxygen is absorbed over the general surface but in the more complex animal types special respiratory organs appear. In aquatic forms such as fishes respiration takes place through the gills, but in the land animals by means of lungs and the air passages from the mouth.

Rest Harrow Low growing perennial shrub (*Ononis spinosa*) of the leguminous order. Sometimes of creeping growth, sometimes more erect, the taller growth is spiky, the lower covered with viscid hairs. The toughness of the rootstock, both on and beneath the ground, is so great that it is said to arrest the harrow when clearing the ground, so giving rise to its popular name.

Restigouche River of New Brunswick. It rises in the W. of the province and flows mainly E. until it falls into Chaleur Bay. It is 225 m. long and during part of its course forms the boundary between Quebec and New Brunswick. It is famous for its salmon fishing.

Restoration Act of restoring. It is used specially for the restoration of a sovereign, or his successor, to a throne. The most notable instance in English history was the return of Charles II. in 1660 which is called **The Restoration**. Other famous restorations were those of the Bourbons in 1814 and again in 1815.

Resurrection Rising again of the body and its reunion with the soul. Very few traces of this Christian belief are to be found in the Old Testament.

It appears to have developed during the period "between the testaments," probably owing to the Persian influences of the Exile. By New Testament times the doctrine had been accepted by the Pharisees in opposition to the Sadducees. The Christian belief in the Resurrection is based on the rising of Jesus from the tomb, and His appearances to the disciples. See IMMORTALITY.

Resurrection Men Popular term in England between 1760 and 1835, used to denote a class of men who drove a flourishing trade by exhuming newly buried corpses and selling them to the medical schools for dissection. The practice is referred to by Dickens in his *Tale of Two Cities*.

Reszke Jean de Polish singer. Born in Warsaw, Jan 14, 1850. He was educated at the university there. He studied in Italy and soon made his first appearance in opera. He appeared in London in 1875 and regularly from 1888 to 1900. Beginning as a baritone he became a tenor and was regarded as one of the finest tenor singers in the world until his retirement in 1914. He died on April 3, 1925.

His brother Edouard de Reszke, was born at Warsaw, 1855. He became a famous bass and appeared at Covent Garden with his brother from 1888 to 1900. In later life he taught singing. He died May 29, 1917.

Retaining Wall Term in civil engineering applied to a wall which supports a bank or terrace preventing horizontal movement of the material. Retaining walls are employed for supporting embankments, quays, canal banks, reservoirs, weirs, mountain roads, etc., their form and construction varying greatly with the character of the forces brought to bear upon them.

Retford East Borough and market town of Nottinghamshire on the Idle 138 m. from London by the L N E Ry. There are corn mills, engineering works and other industries, and also a trade in agricultural produce. Pop (1931) 14,228.

Retina Innermost layer and lining membrane of the cavity of the eye ball. The retina is an expansion of the optic nerve and forms the receiving nervous surface upon which images are formed by light rays entering the eye. It consists of twelve layers, the most important being the layer of rods and cones which transmit visual impulses to the optic nerve and brain.

Retort Vessel or chamber used for distilling or volatilizing substances by the aid of heat or chemical action, the volatile products being conveyed to a receiver for condensation. In the chemical laboratory retorts of glass, earthenware etc. are used, but for manufacture of coal gas on a large scale the retort takes the form of a large iron or fire clay chamber, and in the extraction of zinc, mercury, etc. from their ores, special iron or fireclay vessels are used.

Retriever Sporting dog. There are four varieties. The flat haired is evolved from the mating of a setter and a Welsh collie sheep dog. The curly haired has a poodle strain and is good either in water or in the field. The golden haired is highly ornamental and has all retriever qualities. The Labrador, besides being an excellent gun dog, is popular as house dog and pet. It has a smooth black coat.

Returning Officer Official responsible for the proper conduct of an election. In Great Britain the returning officer is the mayor or provost of the boroughs, and the high sheriff in the counties. To him the writ is addressed and he is responsible for the arrangements for the election, and for the counting of all votes and the declaration of the result. The bulk of the work is done by the clerk to the county council and his staff.

Réunion French island. It is in the Indian Ocean, 420 m. E. of Madagascar. It was discovered by the Portuguese early in the 16th century, annexed by France in 1649, and occupied by Britain between 1810 and 1814. The capital is St. Denis, the chief port Point des Galets and the island is 970 sq. m. in area. Pop (1931) 197,933.

Reuss German district. It was formerly ruled by the elder line and Reuss Schleiz Gera, by the younger line. At the close of the World War, they became part of the republic of Thuringia. The district, which covers an area of 450 sq. m., is situated N. of Bavaria and W. of Saxony. More than a third of this is forest land. Pop 226,000. Before 1918 the principalities were ruled by a family who all bore the Christian name Heinrich.

Reuters International agency for the collection of news for the Press, founded by a German, Paul Julius de Reuter, in 1840. He began with a pigeon post between Brussels and Aix la Chapelle and in 1851 he became a British subject, and started a news agency in London. He controlled the business, which became a limited company in 1865 until his death, Feb 25, 1899. In 1916 Reuters was bought by a syndicate. The headquarters are on the Thames Embankment London. E.C.

Reval Capital and seaport of Estonia, on the S. coast of the Gulf of Finland 250 m. from Leningrad. It is also called Tallinn. At the beginning of the Great War, the province, of which it was the capital, was a part of the Russian Empire. After the war, it was established as an independent republic, with its own National Council meeting at Reval. Reval has extensive shipyards and exports textiles, timber, paper, etc., of local manufacture. An International Industrial Fair is held each year in June. Pop (1932) 134,000.

Revelation Book of Last book of the Bible. It is the only example contained in the New Testament of an extensive Jewish apocalyptic literature (of Book of Daniel in O.T.). The book is typical of apocalyptic writings in that (1) it arose out of conditions of terrible trouble (the persecution of the Church by Domitian) (2) its message is expressed in a mysterious form of dream and vision, (3) it seeks to comfort those who are sorely tried in the present, by bidding them look forward to a great divine triumph in the future.

Revelstoke Baron. English financier. Born in 1863. John Baring succeeded to the barony on the death of his father, the first Lord Revelstoke, in 1897. He was a partner in the banking firm of Baring Bros., a director of the Bank of England and a privy councillor. He died in 1929.

Revenue Term applied to the income of a government or state. It is largely derived from taxation, direct and indirect. See TAXATION, CUSTOMS, EXCISE.

Reversion Term in biology applied to the fact that species tend to reproduce in some of their characteristics some ancestral type. In domesticated animals where different breeds have been crossed there is a tendency to an occasional reversion to an ancestral form, and this may occur also in pure breeds. In some cases the reversion appears to be the result of some irregularity in development of the germ cell. In the case of atavism a feature is reproduced in the individual that was present in a former generation.

In law reversion means the right which remains to the grantor of property when the agreement made by him with the grantee expires, e.g., the owner of land who grants a lease of it for a term of years is said to have the reversion of it on the termination of the lease.

Revival Renewal of interest, chiefly used for periods when great interest is taken in religious matters. Protestant evangelicals believe in revivals, which are also popular in some parts of the United States. One of the greatest religious revivals was associated with the name of John Wesley. A revival of another kind was the revival of learning in the 16th century, usually called the Renaissance (q.v.).

Revolver Type of pistol having a revolving cylinder containing a number of chambers for cartridges, which are fired in turn by a one lock mechanism. The modern revolver is self-ejecting and in the automatic type the force of the recoil is utilised to eject the empty cartridge, cock the revolver and reload it.

Revue Theatrical production. It is a medley, partly musical, and containing topical allusions in its songs and speeches. It was introduced into Britain from France in the 20th century and became very popular after the Great War. When it originated in France, it was a satirical and humorous review of the events of the year and was produced in December. It was called in full *La revue de fin d'année*.

Reykjavik Town and capital of Iceland. It is on the coast at the S.W. corner of the island. It has a cathedral and a university and is the seat of the Althing, or parliament. Its broadcasting station operates at 1200 M., 21 kW. It exports fish, skins, and butter. Pop. (1931) 28,847.

Reynolds Sir Joshua, English painter. Born at Plympton in Devonshire, July 16, 1723, he studied art under Hudson, himself a leading portrait painter, and soon surpassed his teacher, becoming the first president of the Royal Academy in 1768. The following year he was knighted, and in 1784 received the appointment of painter-in-ordinary to George III. His friends included such distinguished men as Burke, Johnson and Goldsmith, whose portraits are among his finest works, which include the famous "Mrs Siddons as the Tragic Muse." He wrote the *Discourses*, a series of addresses on art. He died Feb. 23, 1792.

Rhadamanthus In Greek legend one of the judges of the dead in Hades. A son of Zeus and Europa he was made a judge because of his reputation for justice.

Rhayader Market town of Radnorshire, on the Wye, 212 m. from London by the G.W. Rly. It is a centre for the sale of sheep and farm produce generally.

About 4 m. from the town, among the hills, are the huge reservoirs that supply Birmingham with water.

Rhea American ostrich, represented by three species, all found in the pampas of S. America. It has three toes on the feet, unlike the African ostrich, which has two, and is smaller than the African bird. The eggs are laid in a shallow excavation on the ground, and the male is said to hatch them.

Rhea In Greek legend a daughter of Uranus and Gaia (the earth). She was the mother of Zeus, Hera, Poseidon and Pluto, and was worshipped as the goddess of fertility. She is represented in art as wearing a crown and attended by lions.

Rheims City of France, 98 m. E.N.E. of Paris. Founded in pre-Roman times, it became Christian in the 3rd century. Hore Clovis (q.v.) was baptised in 486, and later kings were consecrated here, including Charles VII. in 1429, at the instance of Joan of Arc, who won the city back from the English. Rheims is famous for the cathedral of Notre Dame, begun in 1212, one of the finest examples of Gothic architecture, its façade having been one of the greatest medieval masterpieces. Another notable monument is the Mars Gate, a triumphal arch, probably of the 3rd or 4th century. During the Great War the city suffered severely, even the cathedral being extensively damaged by the German bombardment. Restoration was carried out after the War.

Rheims is an important centre of the woollen industry, and the manufacture of champagne is important. Pop. (1931) 112,820.

Rheostat Electrical instrument devised for varying an electrical resistance in a circuit and used in diverse forms for controlling direct current motors, as motor starters, and in wireless apparatus. In one type, the circuit is connected with a movable arm whose free end is moved over a series of brass studs, each connected with a resistance coil and the end one with the circuit.

Rheumatic Fever or Acute Rheumatism. Disease characterised by inflammation and pain in the joints, with fever. In young persons the heart is very likely to become affected. The attack, which continues for a period varying from two to six weeks, may sometimes be marked by little pain and slight increase of temperature. In fact, "growing pains" of children are often a manifestation of such an attack. Any indication of acute rheumatism demands immediate attention by the physician. See RHEUMATISM.

Rheumatism Popular name for various painful diseases of joints or muscles, including lumbago, fibrositis, or inflammation of the fibrous tissue of muscles, rheumatoid arthritis, or inflamed membranes and fibrous tissue of joints, and acute rheumatism, or rheumatic fever (q.v.). Inflammation and stiffness with great pain are associated with all these conditions. The so-called "growing pains" of children are due to acute rheumatism. Rheumatoid arthritis is brought about by bacterial infection originating perhaps at some distant focus such as teeth or tonsils. Chronic rheumatism is often caused by a septic focus in teeth, tonsils, nose or digestive tract, etc.

Treatment should aim at removing the infective cause and raising the general health. Spa treatment, massage and the use of electrical

appliances offer the best hope of relief. Five drops of tincture of iodine in a wineglassful of water once or twice daily is usually beneficial, and intestinal poisoning may be remedied by a course of bacillus acidophilus emulsion or a lactic acid preparation. Attention should be paid to the diet, omitting salt and sugar as much as possible, and replacing meat, with dairy products and vegetables.

Children with a tendency to rheumatism should have plenty of good food, fresh air, warm clothing and rest, with a limited meat diet. Damp garments, exposure to a damp atmosphere, fatigue and heart strain must be specially guarded against.

Rhine European river. It rises near the St. Gotthard Tunnel and flows for the first 250 m. of its course through Switzerland, the next 450 through Germany, and the last 100 through Holland, where it divides into North and South, the south branch joining the Meuse, while the north empties itself into the Zuider Zee. It is connected with central and southern France by the Rhine-Rhone and Rhine-Marne canals, and with the Danube by the Ludwigskanal. From the earliest times it has been one of the chief waterways of Europe and formed a natural defence for the Roman Empire against the barbarians. Its total length is 800 m. and the area of its basin 75,700 sq. m.

Rhineland German province, on the W. of Prussia, bordering on Belgium and Luxembourg, and drained by the Rhine and its tributaries. It has a population of 7,250,078 and an area of 1478 sq. m., nearly a third of which is forest land. The Rhineland contains the important wine-growing district of the Moselle, the famous Ruhr coal fields and a number of great industrial centres, including Essen, Düsseldorf and Cologne.

Rhinitis Affection of the nose arising from inflammation of the mucous membrane. Cold, dust, acrid fumes, or pollen from grass or flowers may induce an attack. It takes the form of acute catarrh, accompanied by thick mucous discharge.

Rhinoceros Ungulate mammal of the order *Perissodactyla*. A clumsy, heavily built animal 5 to 6 ft. high at the shoulders. It is timid and nocturnal, frequenting swampy regions, where it feeds on herbage, young shoots, etc. There are one or two horns on snout or forehead. In the Indian species the thick warty skin is disposed in folds which give the appearance of a coat of armour, and there is one horn. The white rhinoceros, 6 ft. high, is the largest and, with the black species, is native to Africa. Smaller species are met with in Sumatra and Java.

Rhode Island State of the United States. The smallest in the union, it covers only 1300 sq. m., of which 246.9 sq. m. are water. It has a coastline on the Atlantic and includes several islands. Providence is the capital, other places are Pawtucket, Woonsocket, Newport and Warrenton. It is governed by a legislature of two houses and sends two representatives and two senators to Congress. The chief industries are manufactures, there is only a little agriculture. Rhode Island was settled by people from Massachusetts and became a separate English Colony in 1603. It is one of the 13 original states of the union. Pop. 887,500.

Rhodes Island of the Aegean Sea, 12 m. from the coast of Asia Minor and 12 sq. m. in area. Vines and fruit are grown

and kaolin is mined. It was a great centre of Greek culture, equally famous for its artists and its rhetoricians, and its code of maritime law has influenced modern European law. It was part of the Roman and Byzantine empires. From 1300 to 1523 it was the headquarters of the Knights Hospitallers, from 1523 to 1918 it was a Turkish possession and after the Great War it was assigned to Italy.

The capital and chief seaport is also called Rhodes. On the N.W. coast of the island, its hospital, now a museum, was built by the Knights Hospitallers when they ruled here. In the street of the knights some of their houses still stand. Pop. 12,000.

Rhodes Cecil John, English statesman. Born July 5, 1853, at Bishops Cleeve, Hereford, he was sent to St. Africa for his health. He amassed a fortune at Kimberley, returned to England, fired with the ideal of extending British possessions in Africa, and entered Oriel College, Oxford. Returning to S. Africa, he entered politics in 1881. In 1884 he was deputy commissioner in Bechuanaland, which he made a British protectorate in 1885, and in 1889 he formed the British South Africa Company to penetrate northwards. He was Prime Minister of Cape Colony from 1890 to 1896, his ministry ending owing to his connection with the Jameson Raid (q.v.). He now turned his attention to the development of Rhodesia, to which he devoted the rest of his life. He died March 26, 1902. In his will he bequeathed some six million pounds for the founding of Rhodes Scholarships at Oxford. Thirty-four scholars come each year from the British Empire, thirty-two from the United States and two from Germany. Imperial and American students hold their scholarships for three years, the Germans for two.

Rhodesia British S. African territory stretching from the Transvaal northward to Tanganyika Territory and the Belgian Congo. Bounded on the east by Portuguese East Africa, Nyasaland and Tanganyika Territory, and on the west by Belgian Congo, Portuguese West Africa and Bechuanaland. It is divided into two regions, Northern Rhodesia, a British territory, and Southern Rhodesia, a self-governing British colony.

Historically, both areas must be treated as one, the modern history of Rhodesia beginning in 1888 when the British, through Cecil Rhodes, made a treaty with the Matabele king, Lobengula, giving the right to seek and work minerals in the country. The British S. Africa Company, formed by Rhodes, then began the penetration of the country, and settlement preceded, interrupted by the Matabele War, the Jameson Raid and the S. African War. Rhodesia did not enter the Union in 1910, and in 1914 the Company's charter was renewed for ten years, but the mineral rights in S. Rhodesia were purchased by the government in 1933 for £2,000,000. Southern Rhodesia was annexed as a crown colony in 1923, while Northern Rhodesia was separately administered from 1911, being taken over by the British Government in 1924. Much has been done by offering loans and improving social services to attract settlers to the land.

Northern Rhodesia is a high plateau, the watershed of the Congo and the Zambezi, and is mainly agricultural, maize, tobacco, cotton and fibre being grown, some cattle ranching is carried on. It is administered by a governor, with an executive council and a legislative council of 16 members. Copper, zinc, lead and

gold have been discovered, copper in large quantities LIVINGSTONE, near the Victoria Falls, is the administrative centre. Area, 290,320 sq. m. Pop. (est., 1933) European, 11,278, native, 1,371,213.

Southern Rhodesia is part of the great South African plateau, lying in part between the basins of the Zambezi and the Limpopo. Silver, copper, coal, diamonds and other minerals are produced. Cattle are raised, and maize, cotton and citrus fruits are exported. Administration is by a governor, with a legislative council and a legislative assembly of 30 members. Salisbury is the capital, but Bulawayo is larger. Area, 150,344 sq. m. Pop. (est., 1933) 1,212,000, of whom 52,950 are whites.

At a joint meeting of the Legislative Council of N. Rhodesia and delegates from all political parties of S. Rhodesia a resolution was passed on Jan. 24, 1936, proposing amalgamation of the Rhodesias as a self-governing colony.

Rhododendron Genus of ornamental flowering shrubs and trees of the order *Ericaceae*. First introduced into England in the 17th century, they are now commonly grown. They will thrive in ordinary soil that does not contain lime or chalk. A little peat is an advantage, and protection from cold winds is desirable.

Rhondda Urban district of Glamorgan-shire, 16 m. from Cardiff, on the G. W. Rly. It consists of a number of mining centres in the valleys of the rivers Rhondda Fawr and Rhondda Fach, united in 1897 into an urban district, one of the largest in the country. Among the villages included are Tylorstown, Ferndale, Treherbert, Tonypandd and Pentre. The staple industry is coal mining. Pop. (1931) 141,344.

Rhondda David Alfred Thomas, first Viscount. British coal-owner and statesman. Born in Aberdare, March 26, 1856, the son of a coal merchant, on leaving Cambridge he entered his father's business. He represented Merthyr Tydfil, and later Cardiff in Parliament, and was president of the Local Government Board, 1916-17. He rendered great services to the country during the war, first at the Ministry of Munitions and later as Food Controller (1917) as such he introduced rationing, controlled prices, and prevented speculation. He died July 3, 1918.

Rhône River of Switzerland and France. It rises on the W. slopes of Mt. St. Gothard in Switzerland in the famous Rhône glacier at a height of 8000 ft. During the greater part of its upper course it is little more than a mountain stream. After flowing through the whole length of Lake Geneva, it follows a winding course to Lyons, where it becomes navigable. Thence it flows in a southerly direction into the Gulf of Lyons. Its length is 500 m. and the area of its basin 38,170 sq. m.

Rhubarb Herbaceous plant of the genus *Rheum* and order *Polygonaceae*. A native of Siberia, it is widely cultivated in other countries for its edible stalks, which are stewed or made into tarts, and used also as preserves. Medicinal preparations are made from root and stalks. The leaves are poisonous.

Rhyl Watering place and urban district of Flintshire, on the coast, 30 m. from Chester by the L.M.S. Rly. Here the River Clwyd falls into the sea. The sands are good, and the attractions include a marine lake and winter gardens. Pop. (1931) 13,489.

Rhythm Measure of music. It governs not only the periodic pulsation of the constituent bars, but also the symmetrical planning of melody into sentences, phrases and smaller sub-divisions. It is the third essential element of music.

Rib In anatomy the name given to one of the series of twelve pairs of arched bones forming the wall of the thorax. The ribs articulate with the backbone behind, but in front the first seven join the breast bone, and of the remaining five three have the extremities united and two remain free.

The term rib also refers to the timbers strengthening the sides of a ship, and in architecture to a narrow moulding on a wood ceiling.

Ribble River of England. It rises on the Wharfedale in Yorkshire and flows into Lancashire to the Irish Sea beyond Preston, a length of 75 m., ending in a large estuary. The sea is receding in the estuary. The picturesque district through which the river flows is called Ribblesdale.

The title of Baron Ribblesdale was borne by the family of Lister from 1797 to 1925. Thomas Lister, M.P., a Lancashire manufacturer, was the first holder. Thomas Lister, the 4th baron, was a prominent social figure. He died Oct. 21, 1925, and his only son, Charles, having been killed in the Great War, his title then became extinct. The family seat was Gisborne Park, near Clitheroe.

Ribbon Fish Deep sea fish (*Regalecus*) native to the North Sea, Atlantic and Mediterranean. It has a thin, narrow, elongated body along the length of which is borne the dorsal fin. At the head the fin has lengthened rays which form a kind of crest, and the ventral fins are long and thin, with an expansion at the tips. It reaches a length of 18 ft., and is also known as the oar fish.

Ribbon Grass (*Phalaris arundinacea variegata*) Cultivated variety of tall grass with broad, striped leaves of green and white. The wild weed grass of the same genus grows in damp and marshy places, but ribbon grass grows easily in any soil. It is also known as gardeners' garters.

Ribchester Village of Lancashire, on the Ribble, 5 m. from Blackburn. Here the Romans had an important station called *Brenntonacum*. Excavations have revealed many Roman remains for which a museum has been opened.

Rice Dressed grain of the annual grass, *Oryza sativa*. Grown in vast quantities in the east as the principal food, it is also cultivated in the U.S.A., Africa, S. Europe and elsewhere. Though grown chiefly in wet land, the young plants being set out actually under water which subsequently dries, some varieties require drier conditions. For Europe, rice is specially dressed, somewhat reducing its value as food. Rice possesses less fat and protein than other cereals, but the small starch grains are easily digested.

Rice Paper Smooth white paper made from the pith of *Falsia papyrifera*, a small tree of the Ivy family growing in Formosa. The pith is removed and cut into thin sheets which are pressed firmly together. Rice paper is used in China and Japan for painting on, and also for making artificial flowers.

Richard I. King of England. The third son of Henry II, he was born Sept. 8, 1157, and made Duke of Aquitaine

in 1170. He passed his time in fighting against his father and with his brothers until 1189, when he succeeded Henry as king. He reigned for ten years, but passed only a few months in England. He took a leading part in the Crusades and won a great reputation as a warrior. In 1192 he was taken prisoner in Germany and remained a captive until 1194, when a large sum was paid for his release. He was killed in battle at Chalus, April 6, 1199. He married Berengaria, daughter of the King of Navarre, but left no legitimate children. His successor was his brother John.

Richard II King of England. Son of the Black Prince, he was born April 13, 1366, succeeding his grandfather, Edward III, in 1377. With the exception of eight years 1389 to 1397, his reign was full of trouble. Taxation was heavy, and risings took place in many parts of the country, the most serious being that of Wat Tyler (1381). The preaching of the Lollards (*q.v.*) helped to increase the discontent. Henry of Lancaster forced Richard to abdicate in Sept., 1399, and Parliament condemned him to perpetual imprisonment. He was almost certainly murdered, not long after his abdication.

Richard III King of England. He was born Oct. 2, 1452. Throughout the reign of his brother, Edward IV, he gave him loyal assistance, and was duly rewarded with many high offices, but on his death he usurped the crown from his nephew, Edward V, whom, together with Edward's younger brother, the Duke of York, he is believed to have had murdered in the Tower. He met his death Aug. 22, 1485, fighting against Henry of Richmond at Bosworth. The chronicles of this reign are wholly Lancastrian in origin and the traditional character of Richard is not borne out by modern historical research.

Richardson Samuel English novelist. Born in Derbyshire in 1689, he became a successful London printer. At the age of 50, he was persuaded to write *Pamela* (1740), a description in the form of letters of the trials of a virtuous country girl. This was followed by *Clarissa* (1748), and *Sir Charles Grandison* (1753). He may be regarded as one of the originators of the modern novel. His writings reveal a special understanding of women. He died July 4, 1761.

Richardson Thomas English cricketer. Born at Byfleet in Aug. 1870, he played for Surrey in 1892 and for the next few years was the chief bowler in the team. He also played for England against Australia in his own country in 1893 and 1896, and also in Australia. He died July 3, 1912. Many judges consider Richardson the finest fast bowler who has ever lived.

Richborough Seaport of Kent, on the estuary of the Stour, just outside Ramsgate. There are some ruins of a fortress built by the Romans who had an important station here. In 1916 a port was established here for sending men and material to France. A harbour was made in the estuary and a train ferry begun. After the war the works were sold in order to make the port suitable for shipping coal.

Richelieu River of Canada. It rises in Lake Champlain and falls into the St. Lawrence at Sorel. It is 80 m. long, and forms part of the water route from the Hudson to the Great Lakes.

Richelieu Armand Jean du Plessis, duc de. French cardinal and

minister of Louis XIII. He was born in Paris, Sept. 5, 1585. Consecrated Bishop of Lucon in 1607, he was made cardinal in 1622, and chief minister in 1624. His policy had three great aims: the suppression of the political power of the Huguenots, the vindication of the royal authority, and the security of France against the threatened domination of the Habsburgs. He was successful in his aims, largely owing to the consistent support of the king. He died Dec. 4, 1642.

Richmond Borough of Surrey, on the Thames, 9 m. from London, by the S. and District Rlys. It includes Kew and Putney and is famous for its heathy spots, especially the hill overlooking the Thames near where the Star and Garter Hotel once stood, and where are now the terrace gardens. A bridge crosses the Thames here. There is a meteorological observatory. Pop. (1931) 37,791.

Richmond Park, where there was once a royal residence, is still Crown property. It covers 2260 acres and stretches from Sheen to Kingston and in the other direction as far as Wimbledon. It contains deer and some fine old trees and in it are White Lodge, Sheen Lodge and other residences.

Richmond Borough and market town of Yorkshire (N.R.), on the Swale, 50 m. from York, on the L.N.E. Ry. The church of Holy Trinity in the market place and the tower of a monastery are of interest. On the hill are the keep and other remains of a large and magnificent castle, while below an old bridge crosses the river. The town has an agricultural trade and races are held here. Richmond was, in the Middle Ages, the chief town of an honour, i.e. a great feudal estate. Pop. (1931) 4769.

Richmond City and seaport of Virginia, capital of the state. It stands at the mouth of the James river, 115 m. from Washington. Its fine buildings include the State Capitol, a replica of the Maison Carrée at Nîmes, and the Valentine Museum. The house in which the President of the Confederate States lived during the Civil War is now a museum and there are monuments to Washington and Lee. The industries include shipping, especially of tobacco, and manufactures of machinery, motor vehicles and fancy goods. Pop. (1930) 182,929.

Richmond Sir William Blake English painter and decorator. Born in London, Nov. 20, 1842, his first Academy picture, in 1861, showed the influence of Italy, where he studied for some years. On his return in 1869 he exhibited *A Procession in Honour of Bacchus* at the Academy. He became Slade Professor at Oxford, and was elected A.R.A. (1888) and R.A. (1895). In 1896 he became Professor of Painting to the Royal Academy. He did decorative work in St. Paul's Cathedral. He died Feb. 11, 1921.

Richmond and Gordon, Duke of British title. An earldom of Richmond appears in the 11th century, when William I. conferred the title on Alan Rufus, son of the Count of Brittany. Henry VIII. created his natural son Henry Fitzroy, Duke of Richmond. Charles II. a natural son, Charles Lennox, created by him Duke of Richmond, was the ancestor of the present Duke of Richmond and Gordon. The third duke (1734-1806) was noted for his advocacy of manhood suffrage, annual parliaments, and other electoral changes. The fifth (1791-1860), on inheriting

the estates of his maternal unelo, the last Duke of Gordon, assumed the name of Gordon. The present holder of the title, Frederick Charles Gordon-Lennox, the ninth Duke, was born in 1901 and succeeded his father in May, 1935

Richthofen Baron Freiherr von German military airman. During the Great War he was the leader of the famous "Circus" on the western front, and probably responsible for the defeat of more British and French airmen than any other enemy aviator. The German higher command claimed for him 80 victories in single combat. He was brought down and killed on the Somme on April 23, 1918

Rickets (or Rachitis) Disease of defective nutrition. It is a so-called deficiency disease, due to absence or insufficiency of the antirachitic vitamin D in the food. It shows itself in the early months of infancy, by soreness of body, restlessness, poor appetite and bad digestion. Later there are changes in the bones, the leg bones becoming bowed, the chest flattened, and the back humped

Treatment—Improve the general bygiene and do not allow the child to stand or walk. Give a diet rich in vitamins and fats (fresh milk, cream, orange juice, raw turnip juice, cod-liver oil). Ultra-violet light treatment and exposure to air and sunlight will greatly improve the condition. Natural feeding from birth prevents the occurrence of rickets

Ricketts Charles English painter. He was born in Genova Oct. 2, 1866, and educated in France. He founded the Vale Press, and was publisher of the Vale books. His pictures are found in the National Gallery and in the Luxembourg, Paris. He gained fame as a stage decorator, providing designs for *King Lear*, *St Joan*, *King Henry VIII*, *Macbeth*, *The Midado*, *The Gondoliers*. He was elected R.A. in 1928 and died Oct. 7, 1931

Rickmansworth Urban district of Hertfordshire 18 m from London, where the rivers Chess and Colne unite. It is on the L.M.S. and Metropolitan Rlys. Brewing and printing are industries. The Grand Union Canal passes by the town. Pop. (1931) 10,810

Rickshaw Shortened form of *rīkshā*, an Indian vehicle. It is a small carriage on two wheels covered with a hood, and is drawn by one or two men

Rideau River of Canada. A tributary of the Ottawa, it rises in Lake Rideau about 40 m from the city of Ottawa. There is also a canal called the Rideau, which goes from Ottawa to Kingston on Lake Ontario and is 125 m long. Rideau Hall, at Ottawa, is the residence of the Governor-General

Riding Word meaning a third, used for the divisions of the county of York, which is divided into three ridings: West, East and North. The three meet at York. The Irish county of Cork is also divided into three ridings. See YORKSHIRE

Ridley Nicholas English bishop and martyr. Born about 1500, he was a devoted leader of the reformed faith and one of the compilers of the English Prayer Book (1548). In 1550 he succeeded Bonner as Bishop of London, when the latter was deprived of his see. On the death of Edward VI, he supported Lady Jane Grey in opposition to Mary, and when Mary became queen, he was arrested and tried for heresy. He was burned at the stake in Oxford Oct. 6, 1555

Rienzi Cola di Roman tribune. Born c. 1313, his aim was to restore the former glory of Rome by putting an end to the disorders which prevailed in and around the city. In 1347 he led a successful rising against the nobles, and took the title of Tribune with dictatorial power. Encouraged by this triumph, he essayed to unite all Italy in a great republic, with Rome as capital, but he soon began to show the most incredible vanity, which caused the people to withdraw their support. He was killed in a popular rising, Oct. 8, 1354

Rievaulx Village of Yorkshire (N.R.), 3 m from Helmsby, on the L.N.E. Rly. Ruins of a Cistercian abbey, very extensive and beautifully situated, now belong to the nation and a certain amount of restoration work has been done. The word means "the valley of the Rye," this being a small river that flows past the ruins

Rif District of Spanish Morocco. It is a mountainous region near the coast, chiefly known because its inhabitants, of Berber stock, are constantly at war with Spain

Rifle Firearm of the musket class characterised by having its barrel spirally grooved to give greater accuracy in firing owing to the rotary motion given to the bullet. Progressive improvements have been made since the early 19th century by the adoption of a breech-loading mechanism, the use of smokeless powder, and the magazine. There are many types of rifles, both military and sporting, the former ranging from 256 to 315 inch bore, and the latter 360 to 600 inch

In 1859 the National Rifle Association was formed for the promotion of rifle shooting and holds its meetings at Bisley

In 1800, a regiment known as the Rifle Brigade was raised and served with distinction in various wars up to the Great War, when its death roll was 11,245. Another distinguished regiment, the King's Royal Rifle Corps, was formerly the 60th Foot, dating from 1755. Both regiments have their depots at Winchester

Riga Seaport and capital of Latvia. It stands on the river Dvina, 7 m from its mouth in the Gulf of Riga. It exports flax and wood, and as a rail outlet for the interior of Russia is now (1932) beginning to recover from the set-back it received through the economic collapse of that country. It has a broadcasting station (525 M., 15 kW.). Riga was founded in 1158, and was for a time a member of the Hanseatic League. It fell to Poland in 1561, was taken by Sweden in 1621, and finally by Russia in 1710. Occupied by the Germans from 1917-19, it became capital of Latvia on the creation of the republic. S. Peter's church and the castle both date from the 15th century. Pop. 338,000

Rigging Term used in the narrower sense for the cordage or tackle of a sailing ship, but more usually in the wider meaning which includes also the masts, yards, sails, etc. Sailing ships fall into two groups, the fore-and-aft rigged as in a schooner, and the square-rigged as in a full-rigged vessel. In steamships rigging is reduced to the masts and tackle used in lifting cargo or as wireless aerials

Right In politics any party holding moderate views, the opposite of the Left. Its use in this sense is due to the fact that in 1789 when the National Assembly met at Versailles the moderate members sat, at first by accident, on the right side of the room.

Right of Way Phrase meaning the right of the public to pass over land in private ownership. It is a question of custom. If a way over land has existed without interruption for 20 years, it is for ever a right of way. Many landlords close the footpaths on their estates for one day in seven years, or some other period, in order to prevent a right of way being established. This is done in the district of London that belongs to the Inner and Middle Temples. In 1931 an act of parliament was passed, assuring right of way to the public.

Rigi Swiss mountain. It rises, an isolated mass, between the lakes of Lucerne and Zug. Two mountain railways from Vitznau on the S. and Arth on the E. run to its summit. Rigi Kulm which is 5906 ft. high and commands one of the world's most famous views of glorious Alpine scenery.

Rigidity Term in physics applied to that property of matter of resistance to change of form, that distinguishes solids from fluids. In the ideal state of rigidity the component particles of a body retain their relative position to one another although the whole body may move, but such a condition does not exist in nature as all substances under go some degree of deformation.

Rig Veda Hindn sacred literature. The Rig Veda is the most important and the oldest of the four extant collections of Hindn Scriptures. It consists of 1028 praises or hymns in the Sanskrit language arranged in 10 books. The date at which the collection was made is believed to be about 1000 B.C. It is an important source for the study of Hinduism.

Rimmon Assyrian thunder god. The name is mentioned in 2 Kings xlvii, in a passage where Naaman after he has been healed by Elisha, seeks pardon from the prophet if in the course of his official duties as a captain of the host of the King of Syria, he worships in the Temple of Rimmon at Damascus.

Rimsky-Korsakov Nicholas Andreievich Russian composer. He was born at Nijni Novgorod on March 18 1844. After service in the navy he became (1873) a professor at the St. Petersburg conservatoire and conductor of the Russian symphony concerts. From 1878 1907 he composed a succession of operas characterised by light and colour and dealing with Russian subjects. He died June 2, 1908.

Rinderpest Cattle plague. In the form of an eruptive and contagious fever, it is the most serious disease to which cattle are liable, proving fatal after 6 to 10 days. A serious outbreak in 1865 is estimated to have caused the death of 250,000 cattle in Britain. The plague of 1877 was less deadly and there has been no recurrence of the disease in Britain since.

Ringbone Disease of the horse. It shows itself in an osseous growth on the pastern bones and may be due either to injury or to rheumatic tendencies. In the latter case it is hereditary. Complete rest is an essential part of the treatment, and a cold water compress may be found useful in giving relief.

Ring Dove (*Columba palumbus*) Largest species of the common wood pigeon. It derives its name from the light feathers that give the effect of a ring on its neck. Common in the British

Isles and Europe, it frequents open spaces in cities, as well as the countryside, assembling together in flocks. A voracious feeder, it causes much damage to crops in its quest for food.

Ring Ousel Species of mountain song bird (*Turdus torquatus*) of the family of thrushes. Common in Scandinavia and other parts of Europe, it is a summer visitor to the British Isles from April to October. It breeds in the mountainous districts of the N., in the Peak district and the wilder parts of Devon and Cornwall. Somewhat larger than the common blackbird the plumage is black with greyish margins and a crescent of white on the breast. It nests usually in heather or grass sometimes on a low ledge of rock. It feeds on snails, slugs and insects.

Ringwood Market town of Hampshire, on the Avon, on the edge of the New Forest. Brewing and glass making are industries. Pop. 1600.

Ringworm Contagious skin disease caused by species of fungus. Most common among children of school age, it usually appears in the form of a small irritating round patch among the hair on the scalp. As it is highly contagious, medical treatment should at once be obtained and precautions taken to prevent spreading the infection. Ringworm of the beard, *trinea barbi*, is a form very difficult and tedious to treat. Cats, dogs and other animals are subject to ringworm, which can be communicated by them to human beings. Its medical name is *trinea*.

Rio de Janeiro Seaport and capital of Brazil. It stands on the W. side of the Bay of Rio de Janeiro, backed by mountains. At the entrance to the bay is the famous Sugar Loaf rock, and the harbour is one of the finest natural harbours in the world. The city has some fine streets, numerous parks and gardens, a great thoroughfare, the Avenida Rio Branco, and a marine boulevard, constructed on reclaimed land. The buildings, apart from the government buildings and the National Library, are not very notable. The city has extensive manufactures, including textiles, clothing, furniture, cigars and cigarettes, chocolate, etc., and its exports include coffee, sugar, fine woods, gold, diamonds, etc. It is the centre of a federal district administered by a prefect representing the government and a council representing the people. Pop. (1930) 1,468,621.

Rio de Oro Spanish possession, on the NW coast of Africa. S. of Morocco. In soil and climate it belongs to the Sahara Desert. The population consists for the most part of nomad Arabs and Berbers, and the area is about 70,000 sq. m. It is under the control of the Captain General of the Canary Islands.

Rio Grande River of N. America. It rises in the Rocky Mountains near Colorado, flows across New Mexico, forms the boundary line between the United States and Mexico and falls into the Gulf of Mexico. It is 1800 m. long.

Riot Word meaning any disorder caused by a number of people, not fewer than three according to English law. They must be gathered for an unlawful purpose, or calculated to terrorise ordinary citizens.

By the common law of England any citizen may be called upon to help to suppress a riot. By the Riot Act of 1714, if 12 or more persons,

having gathered together, refuse to go away after a magistrate has read a proclamation ordering them to do so, they can be dispersed by soldiers. A law passed in 1886 makes the police responsible for damages done in a riot, thus the cost of such damage falls upon the county or borough concerned.

Rio Tinto Town of Spain. In the S W of the country, it is not far from Seville, and stands near the source of the river Tinto. The town is celebrated for its copper mines, among the oldest and richest in the world. They were worked by the Romans and are now managed by an English company.

Ripley Market town and urban district of Derbyshire, about 13 m N W of Nottingham and 134 from London by the L M S Rly. Here are collieries and textile mills. Pop (1931) 13,415.

Ripley Village of Surrey, 5 m from Woking and a stopping place on the road to Portsmouth.

Ripley Village of Yorkshire (W R.), on the Nidd, 3 m from Harrogate on the L N E Rly. Ripley Castle dates from the 16th century, but has been modernised.

Ripon City and market town of Yorkshire (W R.), on the Ure, 24 m from Leeds and 214 from London, by the L N E Rly. The cathedral, restored in the 19th century, is notable for its west front, crypt and chapter house. Ripon became the seat of a bishopric in 1836. Its chief official was called the wakeman, and the wakeman's house still stands. It was famed for its cloth in the Middle Ages. To-day it is an agricultural centre and has baths and a pump room for its waters which have healing properties. Races are held here. Pop (1931) 8576.

Ripon Marquis of English statesman George Frederick Samuel Robinson, a son of the Earl of Ripon, was born Oct. 24, 1827. In 1880 he was appointed viceroy of India, the first Roman Catholic to hold the post. He held various ministerial posts as a Liberal, including Secretary for War (1863), for India (1866), Lord President of the Council (1868), First Lord of the Admiralty (1886), Colonial Secretary (1892), and Lord Privy Seal (1905-1908). He was also a prominent free mason until his conversion to Catholicism in 1874. Created Marquess of Ripon in 1871, he died July 9, 1909.

Risaldar Title of native officer in the Indian army. He commands a troop of cavalry.

Risca Urban district of Monmouthshire, 6 m E of Newport, 147 m from London by the G W Rly, and situated on the Ebbw. A colliery centre, it has manufactures of tinplate and chemicals. Pop (1931) 16,605.

Rishton Urban district of Lancashire, 3 m N E of Blackburn and 211 from London by the L M S Rly. In a colliery district, it has cotton and paper mills. Pop (1931) 6631.

Ritchie Baron English politician. Born in Dundee, Nov. 19, 1828, and educated at the City of London School, Charles Thomson Ritchie had a long political career, beginning in 1874 as Conservative member for Tower Hamlets. He held many ministerial appointments—at the Admiralty, the Local Government Board, the Board of Trade, the Home Office—and was responsible for the creation of the County Councils, and legislation

dealing with many social problems. He was raised to the peerage in 1905, and died Jan. 9, 1906.

Ritual Prescribed order in the performance of religious worship. Strictly speaking ritual should be distinguished from ceremony, the former being the order, the latter the acts of worship, but the distinction is not generally maintained.

Ritual figures to a greater or less degree in all religious observances. In primitive religions it often reaches a high degree of complexity. In ancient religions it was of the utmost importance, since the smallest mistake in word or action would result in failure to obtain the favour desired of the god. Ritual observance was important in the Jewish religion, being stressed especially by the Pharisees. The ritual of primitive Christianity was simple, but it became more complex as the theology and the organisation of the Church was developed.

There is a ritual for every service of the Christian Church, e.g., the ritual of the Mass, the ritual of the baptismal service. The ritual of the Catholic Church is more elaborate than that of the Protestant churches, within which there are also degrees of ritual observance.

River Stream of water flowing in a natural channel to the sea, a lake or other river. The water percolates slowly through the soil and may be supplemented in wet weather by the actual run off from the land, sometimes causing floods. The river bed tends to become wider by erosion of the banks leading to alterations in the course, and deeper, by scouring of the channel. River water carries much material in suspension which accentuates erosion. The material is deposited when the current ceases, as in floods whereby the fertility of the land is increased, or when the river enters a lake or the sea, resulting in the well known delta formation.

Rivera Primo de Spanish dictator. He was born on Jan. 8, 1870. Entering the army from the Madrid Military Academy, he saw active service in Morocco and the Philippines, and attained the rank of lieutenant general. He organised the military revolution of 1923 and was appointed by the king president of the military directorate. On the dissolution of the directorate in 1925 he became premier. He died in Paris on March 16, 1930, two months after the king had compelled him to resign.

River Hog Ungulate mammal (*Potamochoerus*) native to W Africa, where it ranges in herds among swampy forest regions. Its natural food is roots and herbage, but the herds raid plantations and cause great damage to crops. The hristies are red.

Riverina District of Australia. It is situated in New South Wales between the Murray and Darling rivers. Owing to its fine grazing-grounds, it is famous as a sheep-rearing area.

River Plate Estuary of S America, formed by the two rivers Parana and Uruguay. The Plate attracts much shipping, which engages in the export of grain and animal products from the ports on its shores, the chief of which is Buenos Aires.

Riveting Process by which rivets are driven into metal plates, performed by hand, machines or hydraulic appliances. The iron rivets are heated first in a portable furnace or rivet hearth and after

being forced into the holes in the plates are finished off by forming conical heads by hammering, or rounded heads by use of a hollow punch or hydraulic tools, or counter sunk heads where the surface must be plain

Riviera Name given to a strip of land in France and Italy on the Ligurian Sea, a branch of the Mediterranean. It extends for about 140 m and is noted for its wonderful climate, its beautiful scenery and its rich vegetation. In the French Riviera are some popular places as Cannes, Nice, Monte Carlo, Mentone and Antibes. In the Italian are Rapallo, Bordighera and other places

Rivière du Loup River of Quebec. It rises in the N of the province and falls into Lake St. Peter near Fraserville, the lake being really part of the St. Lawrence. Fraserville is sometimes called Rivière du Loup

Rizzio David Secretary to Mary, Queen of Scots. Born in Italy, about 1533, he first entered Mary's service as a musician, afterwards becoming her valet and in 1564 her private secretary. After his marriage to the queen, Lord Darnley became suspicious of Rizzio's dealings with his wife. On March 9, 1566, helped by other nobles, he dragged the Italian from her presence at Holyrood Castle and stabbed him to death.

Roach Freshwater fish. Of a deep and silvery colour and from 10 to 15 in long, it is common in N. Europe and of gregarious habits

Road Highway for traffic. The great road makers were the Romans, who made roads of great durability, some of which may be seen to day. They were driven in straight lines across the country and consisted of several layers of different kinds of earth.

For a long time after the fall of the Roman Empire most of the roads were in a very bad condition, being mere tracks for horses, but a new era began in the 18th century. Good roads on the Roman model were made in France, England, Italy and elsewhere, and these made possible the period of travel by coach which lasted until the building of railway lines. The great English road builder of this time was J. L. Macadam (qv). In the 19th century the existing roads were maintained in a fair state of repair by the highway authorities, but no great attention was paid to them until the advent of the motor car.

In the 20th century many new roads have been constructed and some improvements introduced are important, one being the use of surface materials which do not raise dust. The main roads are of hard stone with a covering of granite chippings, tar products and slag thoroughly rolled in concrete are also used, and in the United States there are many miles of concrete road. In city streets asphalt or wood blocks are laid on a foundation of concrete. Rubber has also been tried, but without success as a road surface. In Great Britain there are 178,500 m of road. Of these 26,400 have been classed as class I and 15,000 as class II. The rest are inferior roads. They cost over £60,000,000 a year in improvement and maintenance. In the United States there are over 3,000,000 m of road.

In 1929 an important measure affecting the roads of Great Britain became law. It made the county councils the highway authorities, and they receive grants for making and improving roads from the road fund. This fund

is obtained from the taxation of motor vehicles and amounts to something like £30,000,000 a year. Since Mr. Hore Belisha became Minister of Transport in 1934 he has taken strong measures to reduce road accidents and meet the needs of modern traffic. The Road Traffic Act 1934, imposed a speed limit of 30 m.p.h. in 'built up areas' and a five year plan of new road construction promises vast improvement. There is a Road Improvement Association at 180 Clapham Road, London S.W.9.

Road Board Former department of the British Government. It was established in 1909 and consisted of five members. Its duties were to provide new roads and improve the existing ones. In 1919 its duties were taken over by the Ministry of Transport which has a road department. *See TRANSPORT, MINISTRY OF*

Roaring Forties Area of the southern oceans lying between 40° and 50° S. The name was given by sailors in the days of sailing ships because in this part of the world strong westerly gales usually prevail.

Robert Name of three kings of Scotland. The first is more generally known as Robert Bruce (qv). Robert II was a son of Walter the Steward and a grandson of Robert Bruce. He was born March 2, 1316, and for some time was regent for his nephew David II. In 1371 he became king in succession to David and reigned until his death May 13, 1390. He is important as being the first of the Stuart kings. Robert III was a son of Robert II. Born about 1340 he reigned from 1390 until his death on April 4, 1406. His successor was his son, James I.

Robert Name of two dukes of Normandy. Robert I, called the Devil, succeeded his brother, Richard, as duke in 1028. He died in 1035 and was succeeded by his son, William the Conqueror.

Robert II, the oldest son of William, was born about 1055. In 1087 he succeeded him as Duke of Normandy, but not as King of England. In 1096 he obtained money by handing over Normandy to his brother William II, and went to Palestine on crusade. On his return he quarrelled with Henry and a battle was fought between them at Tinchebrai. Robert was taken prisoner and was still a captive when he died at Cardiff in Feb., 1135.

Roberts Earl. English soldier. Born at Cannepore, Sept. 30, 1832, Frederick Sleigh Roberts entered the Indian army in 1851 and served throughout the Mutiny, winning the VC in 1858. He then saw service in Abyssinia and Afghanistan and was made a KCB in 1879.

In 1880, Roberts, now a general, made his famous march through Afghanistan to the relief of Kandahar. 1881 saw him appointed Commander in Chief in Madras and made a baronet. From 1885 to 1893 he was Commander in Chief in India and became Lord Roberts of Kandahar and Waterford in 1892. He was then promoted Field Marshal.

He was sent to South Africa to retrieve the situation after the early defeats of the Boer War. In 1901 he was created Earl, and became Commander in Chief of the British Army. He retired in 1904, but during the Great War visited the troops in France, and died November 14, 1914.

Robertson Frederick William. English preacher. Born in London, Feb. 3, 1816, the son of an officer in the army,

he was educated in Edinburgh and abroad, and articled to a solicitor at Bury St. Edmunds, but later he graduated at Oxford and was ordained in the Church of England in 1840. He was a curate at Winchester and Cheltenham before 1847, when he was made incumbent of Trinity Chapel, Brighton. During his six years here, Robertson won his place as one of the greatest preachers of the 19th century. His *Life and Letters* was edited by S. A. Brooke. He died Aug. 15, 1853.

Robertson Sir William Robert British soldier. Born at Wothhourn, Lincolnshire, Sept. 14, 1800, he enlisted as a private in 1817, and served in the ranks until 1838, when he won a commission in the Dragoon Guards. He was the first officer risen from the ranks to pass through the Staff College, 1897-8. He accompanied Lord Roberts in South Africa, and was at the War Office from 1901-07. From 1910-13 he was at the Staff College and the War Office.

In 1915 Robertson was chief of the general staff to Sir John French. He was recalled to the War Office, and made immediate improvements in the office, and in the disposal of forces in the different theatres of war. After the war he received a baronetcy, succeeded French as Commander-in-Chief of Great Britain, and commanded the British troops on the Rhine. He was made field marshal in 1920.

Robertson Thomas William English actor and dramatist. Born at Newark-on-Trent, Jan. 9, 1829, he came to London in 1848, where, after a long and varied experience of every department of stagecraft, he produced his first successful play, *David Garrick*, in 1864. His fame was definitely established by *Ours* (1866). Other successful plays followed, including *Caste* (1867), *School* (1869), *Home* (1869) and *Dreams* (1869). Nearly all his works were performed by the Bancrofts at the Prince of Wales's Theatre. He died Feb. 3, 1871.

Robeson Paul Negro actor and vocalist. He was born on April 9, 1898, at Princetown, N.J., the son of a Presbyterian minister. Having graduated with honours at Rutgers College, and later, in law, at Columbia University, he started his career on the stage and concert platform as a singer of negro spirituals. He came to London in 1928 and played the title rôle in *Emperor Jones* and *Othello*. Since then he has given many vocal recitals and has made films, including *Sanders of the River* (1935).

Robespierre Maximilien François Isidore de French lawyer, statesman and revolutionary leader. Born at Arras, May 6, 1758, he became a deputy to the States General of 1789, and rose rapidly to power. After defeating his rivals, Hébert and Danton, he established the Committee of Public Safety. As leader of this committee he was responsible for the Reign of Terror in Paris in 1793. Among the thousands guillotined were his former rivals. With the support of the Paris commune he inaugurated the cult of the Supreme Being. He achieved dictatorial power, but was overthrown by his opponents, and was guillotined when dying from a gun wound on July 28, 1794.

Robey George British comedian. Born Sept. 20, 1869, he was educated at London and Dresden. He made his first appearance on a music-hall stage at the Oxford in June, 1891, and since then has played in London, the provinces, and the colonies, in

variety, revue, and pantomime. During the war he served with the Motor Transport, and organised performances for war charities for which he was created a C.B.E. in 1919. In 1932 he won a success in *Helen*, and he has also acted in a film version of *Don Quixote* and in a musical play, *The Jolly Roger*. He is a clever artist and has exhibited at the Royal Academy. His autobiography appeared in 1933.

Robin British bird. It is bold in approaching houses and a cheerful songster, especially in winter. It is very prolific, often nesting two or three times in the year, with five to seven eggs in each brood. The familiar red breast is not so brightly coloured on the females as the males.

Robin Hood English legendary hero. He is represented in a series of old English ballads as a chivalrous outlaw living a care-free life with his companions, Little John and Friar Tuck, in the Sherwood Forest, helping the poor with his plunder from the rich. It is very doubtful if there is any historical basis for this legend, which certainly dates from the 14th century, for the "rymes of Robin Hood" are mentioned in *Piers Plowman* (1377).

Robin Hood's Bay Watering place of York shire (N.R.). The town stands at the N. end of the bay, 6 m. from Whitby, on the L.N.E. Ry. The fishing village is on the coast and the modern town a little way inland.

Robinson Lennox Irish dramatist born at Douglas, County Cork, Oct. 1, 1886. His first play was *The Clancy Name*, produced at the Abbey Theatre, Dublin, in 1908. From 1910-14 he was manager of the Abbey Theatre, and in 1915 he was appointed organising librarian to the Carnegie Trust, which position he held until 1925. He again managed the Abbey Theatre from 1919-23, when he became its director. His best-known plays are *The Lost Leader* (1918), *The Whitehead Boy* (1916), *The Far off Hills* (1931), *All's Over, Then?* (1932), and *Church Street* (1934). He has written a novel, *The Young Man from the South*, and several volumes of short stories, and has edited several volumes of verse.

Robinson Mary English actress known as Perdita. Born in Bristol, Nov. 27, 1758, she first appeared on the London stage in 1776 as Juliet. Her beauty attracted much attention and as Perdita in *The Winter's Tale* she made a great reputation. In 1779 she became mistress of the Prince of Wales and later she lived with Charles James Fox. She died in poverty on Dec. 26, 1800.

Robinson William Heath English artist. He was born May 31, 1872. His humorous drawings are a popular feature of many English periodicals. He has also done successful work as an illustrator of books, and has designed comic scenery for stage productions and decorations for the Knickerbocker Bar and Children's Room on the *Empress of Britain*.

Robot Mechanical man. The term was first used by Karel Capek in his play, *R.U.R.*, 1920, where it described a piece of mechanism, extraordinarily efficient, but wholly without heart or soul. Robots of varying degrees of efficiency have been invented.

Rob Roy Scottish outlaw. Born in 1671, his real name was Robert Macgregor, but in 1693 he adopted Campbell as a surname. In 1712 he gathered together a band

of followers and carried out raids on the estate of the Duke of Montrose, who, he alleged, was unfairly pressing him for debt. After a long career as a free booter which included many amazing escapades he was arrested and imprisoned, but afterwards pardoned. He died at Balquhadder in Perthshire on Dec 28, 1734.

Robsart Amy English heroine A daughter of Sir John Robsart she was born about 1532. In 1550 she married Robert Dudley, who later became Earl of Leicester. She was found dead at Cumnor Place, near Oxford, Sept 8, 1560, and it is believed that she was killed by Dudley but there is no definite proof. Sir Walter Scott made her the heroine of his novel *Kennilworth*.

Roc Legendary bird. The roc appears in many Eastern tales, e.g. the *Arabian Nights*. It is represented as possessing gigantic size and strength, sufficient in the story of *Sinbad the Sailor*, to lift an elephant.

Roch French saint. He was born at Montpeller about 1295 and won renown by looking after the sick while a plague was raging. He died in prison Aug 16, 1327. S. Roch was regarded as the patron saint of those suffering from the plague and many Italian and other artists have portrayed scenes from his life.

Rochdale Borough and market town of Lancashire, on the Roch, 11 m. from Manchester and 196 m. from London, by the L.M.S. Rly. It is a centre of the cotton and woollen industries, but has also engineering and asbestos works. Cattle markets are held here. Rochdale is famous as the starting place of the co-operative movement. Pop (1931) 90,278.

Roche Sir Boyle Irish politician. Born in 1743, he became a soldier. In 1777 he was elected to the Irish House of Commons and in 1782 he was made a baronet. Owing to his wit and humour, which included some of the most celebrated "bulls" on record, he won a great reputation. He remained in Parliament until 1800 and died June 5, 1807.

Rochefoucauld La. See LA ROCHE FOUCAULD.

Rochelle La. French town on the V coast, opposite the Ile de Ré. It possesses the distinguished Hôtel de Ville, built in the Renaissance style. In 1891 the harbour at La Pallice, 3 m. away, was opened for the use of larger vessels. As a shipping centre, La Rochelle has important connections with the Newfoundland fishing industry. It was a Huguenot centre in the 16th and 17th centuries. Pop (1931) 45,043.

Rochester City and market town of Kent, on the Medway, 33 m. from London, by the S. Rly. It is famous for its cathedral and its castle. The cathedral with a Norman front, has many other features of interest, including the crypt. The keep of the Norman castle overlooking the Medway is the most complete of its kind in England. Eastgate House is now a museum with a wing added in 1924. Restoration House is associated with Charles II. The city has several memories of Dickens, including the Bull Inn of the *Pickwick Papers* and Watts' Charity, where six poor men are fed and lodged every night, is described in *Edwin Drood*. The manufactures include cement and there is a trade along the river. Pop (1931) 31,196.

Rochester City of New York state, U.S.A., on the river Gene.

see 7 m. from its mouth, on the S coast of Lake Ontario. It is a university town and also a manufacturing centre for clothing, boots, shoes, furniture, flour milling etc. The most noteworthy structure is an aqueduct of seven arches by which the Erie Canal formerly crossed the river. Pop 928,132.

Rochester Earl of English title now extinct. The first earl was Henry Wilmot, who fought for Charles I in the Civil War and was made an earl in 1652. His son, John Wilmot, the 2nd earl was born April 10, 1647, and educated at Oxford. He is known as the author of satires and plays, and as one of the most licentious figures in a licentious age. Some of his plays cannot be published owing to their indecencies. He died July 26, 1680, and when his son, Charles Wilmot, the 3rd earl, died on Nov 12, 1681, the title became extinct. It was then granted to Lawrence Hyde, but it became extinct again on his son's death in 1758.

Rochet Ecclesiastical vestment worn by bishops. Resembling a surplice with long tight sleeves. It was originally worn by bishops and abbots for religious ceremonies. In the Anglican Church loose sleeves of lawn are now attached to the black chimero under which the garment is worn.

Rock Term in geology for the constituent masses of the earth's crust, consisting of aggregates of minerals either of one kind as in pure sandstone or of several as in granite. From their origin, rocks are classified as sedimentary, metamorphic, and igneous. Sedimentary rocks have been deposited by the action of water and may be mechanically formed as in sands and clays, organically formed as in limestones and coals, or chemically formed as in certain limestones, gypsum and rock salt. Metamorphic rocks have undergone alteration through pressure or heat as in slates and schists, while igneous rocks have solidified from a molten state and include granites, basalts, dolerites, etc.

Rockefeller John Davison Oil magnate and philanthropist. Born at Richford, N.Y., July 8, 1839, he became, at the age of 50, the richest man in the world. By gradually absorbing smaller oil-producing companies, he ultimately controlled, through the Standard Oil Company, about 90 per cent. of the American refineries. He has distributed some \$600,000,000 of his wealth, most of it for the establishment of—

1. The Rockefeller Institute for Medical Research, 'to conduct, assist and encourage investigations in medicine, surgery and allied subjects.'
 2. The Rockefeller Foundation, 'to promote the well being of mankind throughout the world.'
 3. The General Education Board.
 4. The Laura Spelman Rockefeller Memorial.
- His son, John D. Rockefeller, Jr., born Jan 29, 1874, has collaborated with his father in all his interests. In 1932 he made a public declaration against the failure of prohibition in the U.S.A. He is also largely responsible for the very costly new Rockefeller Center in the heart of New York City. When the site of the former Botanic Garden became available he saw its advantages as a retail business centre with headquarters for foreign interests and a complete radio city.

Rocket (*Hesperis*) Genus of plants of the order *Cruciferae*, including annual and perennial varieties. The single

flowered white or mauve rocket can be grown from seed sown in March or April. The double perennial variety is more successfully increased by cuttings. Another name is Dame's Violet.

Rocket Type of firework used in pyrotechnic displays and for signalling and life saving. It consists of a cardboard cylinder closed at one end and fastened to a stick. The cylinder contains a gunpowder charge and fuse at the lower end, and a smaller charge with colours and stars in its head. When ignited at its base the rocket is propelled into the air where finally the head charge explodes, setting free the stars.

An engine in which a series of rockets are exploded in succession has been devised recently for propelling a car, boat or aeroplane and although some success has been obtained many initial difficulties have yet to be overcome.

The Rocket is the name of the first locomotive, invented by George Stephenson, which ran on the Manchester and Liverpool Railway in 1830. It can now be seen in the Science Museum at Kensington.

Rock Ferry Watering place of Cheshire, on the estuary of the Mersey, adjoining Birkenhead. It is connected by a ferry with Liverpool.

Rockhampton Town of Queensland, 35 m up the Fitzroy river. It has excellent modern buildings, wide streets planted with trees. It is the port for the important pastoral and mining neighbourhood and is connected by rail with the Northern and Central Districts and with Brisbane. Pop. 30,000.

Rockingham Village of Northamptonshire, 8 m from Kettering and famous for the ruins of its castle. Rockingham Forest once covered a large district near the village, but only a little of it remains.

Rockingham Marquess of English title. In 1714 Thomas Watson, Baron Rockingham, was made an earl, but the title became extinct in 1746 when he died. His barony passed to Thomas Watson-Wentworth, a descendant of the great Earl of Strafford. He inherited the Northamptonshire estates of the Watsons and the Yorkshire estates of the Wentworths and in 1746 was made a marquess.

Charles Watson-Wentworth, his son, was born May 13, 1730, and succeeded to the title in 1750. He soon became prominent as a leader of the Whigs, and he was Prime Minister in 1765-66. In 1782 he was again Prime Minister, but three months later he died July 1, 1782. His titles then became extinct.

Rockingham Ware was made at Swinton, near Sheffield, in the 18th century. It is chocolate in colour and includes vases on which landscapes were painted.

Rocky Mountains American mountain range, or system of ranges. It is the watershed of the American continent reaching from the Yukon river in Alaska to New Mexico in the S., a distance of 2200 m. In Colorado there are more than 40 peaks over 14,000 ft high, the highest being Mt. Elbert. From this district northward the Rocky Mountains decrease in altitude as they contract in breadth. In the United States the northern group of mountains is divided from the southern by a broad depression in Central Wyoming, through which runs the Union Pacific railroad.

Rococo Architectural term for a peculiar style of ornamentation prevailing in France during the reigns of Louis XIV and Louis XV. It was characterised by an excess of ornament in imitation of rocks and shell work associated with an irregular arrangement of doors and windows and an excessive use of curves.

Rod Measure of length and area, also called a pole or perch. In long measure it is 5½ yards and 40 rods make a furlong. A square rod, called a rood, is 40½ square yards. In brickwork a cubic rod consists of 272 square feet of a standard thickness of 1½ bricks, or 306 cubic feet. It contains about 4500 bricks.

Rodent (Lat. *rodere*, to gnaw) Member of an order of gnawing mammals called *rodentia*. The beaver, rat, squirrel, mouse and rabbit are rodents.

Rodeo Spanish word used for the act of gathering together cattle for the purpose of branding them. It is done by the cowboys on the ranches of S. America and needs a good deal of skill. The word has come to be used for an exhibition at which cowboys show their skill in pursuing and catching the animals by means of ropes. Such exhibitions are held in both N. and S. America and have been seen in London.

Rodin Auguste French sculptor. Born at Paris in 1840, from 1864 to 1870 he worked with Carrier-Belleuse, and then spent six years in Brussels, where he worked on the decoration of the Bourse. His first exhibition in the Salon was the "Bronze Age" of 1877, now in the Luxembourg. This was followed by several busts and the beginning of his twenty years' work on the "Portal of Hell". His famous "Burgesses of Calais" was exhibited in 1889, and the "Kiss" in 1898. His best known work in England is "Le Penseur," which was purchased in 1904 for the British nation. He died Nov. 17, 1917.

Rodney Baron British admiral. Born at Walton-on-Thames, Feb. 13, 1719, and appointed admiral in 1778, George Brydges Rodney stands next to Nelson and Blake among the greatest of English seamen. One of his most brilliant victories was at Cape St. Vincent in 1780, when he defeated the Spanish fleet, allowing only 4 out of 11 ships to escape. In 1782 he drove the French fleet from the Atlantic by his crushing victory over Do Grasso. He died May 21, 1792.

Roe-Deer Small deer (*Capreolus*) widely distributed in Europe, including Britain. About 2 ft high at the shoulders, it has a reddish coat (brown in winter) and a white rump. The antlers are short, nearly vertical, with two or three tines. See DEER.

Roehampton District of Surrey. To the S.W. of Putney, it was once a park around a residence built by the 2nd Earl of Portland. Here is Queen's hospital for providing maimed soldiers with artificial limbs.

Rogation Days Three fast days in the Roman Catholic and Anglican churches. They are the Monday, Tuesday and Wednesday before Ascension Day, the preceding Sunday being Ascension Sunday. They are days on which special intercessions are made.

Rogers Samuel English poet. Born at Stoke-Newington on July 30, 1763, he entered his father's bank and became

its head in 1793 In 1781 he contributed essays to the *Gentleman's Magazine* and wrote a comic opera the following year In 1792 appeared his chief poetical work *The Pleasures of Memory* In 1803 he retired and lived a life of gentle luxury in St James's Place, touring abroad, giving celebrated breakfasts, and collecting art He was also very generous in a quiet way, despite his bitter wit, for which he is most often remembered He died Dec 15, 1855

Rokeby Village of Yorkshire (NR), 3 m from Barnard Castle, at the junction of the Greta and the Tees Here the family of Rokeby had a castle In the Middle Ages The village was the scene of Scott's poem *Rokeby*

Roland Frankish hero A soldier in Charlemagne's army, he was killed at Roncesvalles in 778, when the Franks, returning from a campaign in Spain were suddenly attacked in the pass Legend made him a great hero, one of the paladins He appears in Italian poetry as Orlando

The Song of Roland was written between 1066 and 1099 It is the oldest and best of the *chansons de geste* and deals with the conquest of Spain by Charlemagne

Roland de la Platière, Manon Philpon Madame Wife of Jean Marie Roland do la Platière She was born in Paris March 18, 1754, and was a woman of great intelligence and warmest sympathies Devoted to literature and the arts, she held a famous salon, frequented mostly by Girondins, the political influence of which was considerable The machinations of the Montagnards sent her to the guillotine, Nov 8, 1793 Gazing at the statue of liberty, she exclaimed, "O Liberty, what crimes are committed in thy name!" Her *Mémoires* are widely read

Rolland Romain French writer Born at Clamecy, Nièvre, Jan 29 1866, he became a professor at the Sorbonne, where he introduced the study of music and history He has written many critical and historical works, including *Millais* (1902) *Beethoven* (1906) and *Jean Christophe* (1904-1912), the biography of a German musician In 1924 he wrote *Mahatma Gandhi* in defence of the Indian leader and since then he has written *L'Amé Enchantée* (1927), *Goethe et Beethoven* (1931), etc Some of his works have been translated into English, including *The Death of a World*, in 1933

Roller Genus of birds, found in Europe and Asia and remarkable for their brilliant plumage The hile roller *coracias garrula*, with plumage brown and blue, visits Great Britain The male bird has the curious habit during the breeding season of rolling over when in flight, hence the name

Rollleston Village of Staffordshire, on the Dove 4 m from Burton-on-Trent, on the LMS Ry The hall, which stands in a large park, was long the seat of the Mosley family

Rolling Mill Name given to a department of a steel works where ingots of metal are reduced to a convenient size and rolled into bars or sheets The preliminary reduction in size of heavy ingots is done in a cogging mill where the metal is passed first between angular grooved rollers and then between flat-grooved rollers For making plates or sheets plain cylindrical rollers are used and the machines are furnished with a reversing gear

Rollright Name of two villages in Oxfordshire, Great and Little Rollright, 3 m from Chipping Norton The Rollright Stones, near Little Rollright, are important remains of early man, and number about 60 in a circle Apart from these is the King's Stone, 8 ft high, and a dolmen of five stones called the whispering knights

Rolls Charles Stewart English engineer and alrman A son of Lord Lian gattock, he was born in London, Aug 28, 1877, and was educated at Eton and Trinity College, Cambridge He studied engineering, both on the theoretical and the practical sides, and won a reputation by racing in motor cars He founded the works which became the Rolls-Royce Co He next devoted his time to aviation and made flights which at that time were remarkable He was killed at Bourne month during a flight, July 12 1910

Roman Catholic Church

Numerically the largest body in Christendom According to its own definition it is not a church among churches but the Church It claims (a) "One" in doctrine, sacraments and government (b) "Holy" with a sanctity of life and character arising especially out of the sacramental system (c) Catholic because its members are found in every part of the world (d) "Apostolic" through an unbroken succession going back to the Apostle Peter Among the distinctive doctrines of the Roman Church are the authority of ecclesiastical tradition, the seven sacraments, transubstantiation, the sacrificial aspect of the Mass, purgatory, the infallibility of the Pope and the immaculate conception of the Virgin Mary The principal act of worship is the celebration of the Mass, said or sung in Latin, which, except in certain Eastern districts, is the official language of the Roman Church The supreme council of the Church is the College of (70) Cardinals, who act as advisers to the Pope and at his death elect a successor In 1935 the total Roman Catholic population of England and Wales was estimated at 2 321 117, Scotland, 608 000, Ireland (census 1926), 3 171,697

Romanes George John British biologist Born in Canada, May 20, 1848, and educated at Cambridge, he published various works describing his research and supporting the Darwinian theory of evolution His works include *Scientific Evidence of Organic Evolution* (1881) and *Mental Evolution in Man* (1888) He also lectured extensively He was elected F.R.S in 1870 and in 1890 settled in Oxford where he founded the annual Romanes lectureship He died May 23, 1894 His work, *Darwin and after Darwin* was published partly in his lifetime and partly posthumously

Romanesque Architecture

Style of architecture prevailing in Europe from the 9th to the middle of the 12th century and representing a development of the Roman tradition The Roman basilica became the type for the church and from this developed the complex cruciform building The use of the round arch and vaulting the slenderness of the columns the basket form of capitals arched cornices and an increase in size number and tracery of the windows are among the characteristics of this style

Romani Town of Egypt 20 m. E. of the Suez Canal Here on Aug 3 1916, the Turks attacked a British force of Australian and New Zealand troops defending

the canal. The Turks won an initial success, but their advantages were soon lost and on the 8th they retreated with heavy losses.

Romania Term used by historians for the Latin kingdom that was founded at Constantinople in 1204. It was set up by Baldwin, Count of Flanders, and other crusaders, who took Constantinople and made Baldwin its king. The kingdom had a troubled career and in 1261 came to an end when the Byzantine emperor, Michael Palaeologus, retook Constantinople.

Romanoff Family name of the Tsars of Russia. It means "son of Roman," a Russian noble of the 16th century. His descendant, Michael, became Tsar in 1613, but the male line died out in 1730. The later Romanoffs are descended from Anna, daughter of Peter the Great, and her husband, Duke of Holstein-Gottorp. They ruled until the abdication of the Tsar Nicholas II in 1917. Since his murder the Romanoffs have been represented by several grand dukes, uncles or cousins of the last Tsar. See NICHOLAS II.

Romans Epistle to the First of the Pauline epistles in the New Testament Canon. It was probably written at Corinth at the close of Paul's third missionary journey to the Christians at Rome, whom he hoped to visit later. It is the most systematic and theological of all the apostle's writings, setting forth his doctrine of the revelation of God's righteousness for man's salvation. It also contains much ethical teaching.

Romanticism Name used for a free and imaginative style in literature and art. It tends to idealise the experiences and facts of nature and life, and is thus the opposite of realism. The Romantic movement developed late in the 18th century and with it the names of Scott, Burns and others of that period are associated. In the 20th century there has been a movement from romanticism to realism, both in literature and art.

Rome Capital city of the kingdom of Italy, the headquarters of the Roman Church, and formerly the capital of the Roman Empire. It stands on both banks of the Tiber, 17 m. from its mouth, and is an important railway centre. In it is the Vatican city, an independent state under the sovereignty of the Pope. The seven hills are the Capitoline and the Palatine, the centres of ancient and Imperial Rome, the Quirinal, the royal and official quarter, the Esquiline and the Viminal, which are industrial districts, and the Aventine and Coelian, which are partly open country.

One of the world's most wonderful cities, Rome is full of objects of interest. Chief among these are the Forum, where in recent years excavations have discovered remains of many temples and other buildings, the forum of Trajan, the cathedral of St. Peter, and the Vatican with its artistic and other treasures and the Sistine chapel. Of the many churches that of St. John Lateran may be mentioned; near it is the Lateran palace. Other buildings are the ruined Colosseum, the castle of St. Angelo and the Pantheon, there are a number of palaces where the great Roman families lived. Modern buildings include those erected since 1871 for government purposes. The walls and some of the gates of the old medieval city still stand. Other features are the Catacombs (q.v.), the triumphal arches and the fountains.

The Corso is the chief street. Rome has a university and for it new buildings, forming a university city, were begun in 1932.

The foundation of Rome is usually dated 753 B.C. The emperor Augustus and his successors added building to building and made it the most magnificent city in the world. These buildings were chiefly temples and palaces, the latter on the Palatine hill, including the Golden House built by Nero, and the residence erected by Domitian. Other emperors were responsible for baths, aqueducts and other features of the city's life. These buildings began to decay after the fall of the empire, but a new era opened with the popes of the Renaissance, especially Sixtus V. To them we owe St. Peter's and most of the older buildings of the modern city. After 1871 a period of expansion began. It has three broadcasting stations, of which the most important operates at 441 M., 50 kW. Pop. (1931) 999,964. See VATICAN.

Rome Empire of the ancient world. It grew up around the city of Rome which remained its capital for the thousand years of its existence. Traditionally the city was founded in 753 B.C. and the first inhabitants were people of a Latin race. A few years later they united themselves with the Sabines and a series of wars made them famous in the region in which they lived. Ostia, at the mouth of the Tiber, was built, and the authority of the state was extended in other directions. In 529 Tarquin, the last of the seven kings, was expelled, and the city became a republic.

Kings having been removed, the chief officials were the consuls who served for a year. Under them many conquests were made, with the result that in some 200 years after Tarquin's expulsion the whole of Italy, with some slight exceptions, was ruled by Rome, which was soon strong enough to take full advantage of the decline of Greek civilisation. In 264 B.C. the first of Rome's wars with Carthage began. These lasted for over a century and in the end Carthage was not only beaten but destroyed.

During this struggle, Rome, now a strong naval power, made her first acquisition of territory outside the mainland. Sicily and then Corsica and Sardinia were acquired and a little later Greece was invaded. The Macedonian kingdom was destroyed and the Roman armies were also victorious in Asia Minor, Spain and then Gaul were brought within the Roman sphere of influence and the Roman possessions in Africa were extended. Meanwhile the constitution of the city was being slowly altered so as to meet the new conditions. The conquest of Gaul was largely the work of Julius Caesar, in whose time the realm was torn by civil war, not however for the first time. In 46 B.C. Caesar made himself dictator, but in 44 he was murdered. His heir was his nephew, Octavian, who as Augustus, became the first of the Roman emperors, a position he reached after crushing Antony and his other rivals, his crowning victory being at Actium in 31 B.C.

Soon after the death of Augustus the Romans conquered England and invaded Scotland, but this was almost the last of their conquests. The age of expansion was over. The Empire centred around the Mediterranean and included the south and north-west of Europe, Asia Minor and a fringe of Africa. It was divided into provinces, and under Augustus and his immediate successors was governed with wisdom and moderation. There were many wars with the barbarians who lived beyond its frontiers, but in the empire itself peace and

security prevailed, at least during the Augustan age, one also of great literary activity.

Augustus was followed in 11 B.C. by Tiberius and the succeeding emperors included Caligula, Nero and Domitian. Vespasian a usurper was a better ruler, but the best of all were Trajan, Hadrian and the Antonines, and the period during which they governed the empire is regarded by Gibbon as the most fortunate in the world's history. But with the death of Marcus Aurelius the decline began. His son Commodus, a worthless ruler was assassinated by the soldiers who nominated emperors in quick succession, while the barbarians became more and more menacing. The decline was arrested by the efforts of Claudian, Aurelian and above all Diocletian but the old system of government had been destroyed and the new one, with the realm under two, three or four caesars, was unequal to its tremendous task. In A.D. 323 Constantine the Great became emperor and soon made himself sole ruler, and in 330 he moved his capital from Rome to Byzantium. After his term there was one ruler in the east and another in the west, and most of them were fully occupied in resisting the barbarians who were bursting into the empire on all sides. Italy was overrun and Rome itself was sacked by Alaric. In 455 the last emperor of the west, Romulus Augustus, resigned his barren honour and the Roman empire ceased to exist, the mediaeval and Holy Roman Empires arising from its ashes. See EMPIRE.

Romford Urban district and market town of Essex, on the Rom 16 m from London, by the L.N.E. and L.M.S. Rlys. The industries include breweries and engineering works and important cattle markets are held here. An arterial road connects it with Wanstead. Pop. (1931) 35,918.

Romilly Sir Samuel English lawyer. He was born in London on March 1, 1757, and entered Gray's Inn, specialising in chancery practice. He was appointed Solicitor General and knighted in 1806, and sat in Parliament until 1818. Despite heavy opposition, he persevered in introducing bills to mitigate the severity of the criminal laws. He took part in the anti-slavery agitation, and opposed the suspension of the Habeas Corpus Act. He committed suicide on Nov. 2, 1818.

Romney New Borough of Kent, 75 m from London, on the S. Ry. It was one of the Cinque Ports and was governed by jurats, but in the course of time the sea receded and the harbour was left useless. About 2 m to the W. is the village of Old Romney. Pop. (1931) 1786.

Behind the town is the district called Romney Marsh, covering about 200 sq m, and noted as a grazing ground for sheep.

The title of Earl of Romney has been borne since 1801 by the Kentish family of Marsham.

Romney George English painter. He was born at Dalton in Furness Dec. 15, 1734, and after a period as a cabinet maker, studied painting, became a portrait painter and came to London in 1762. For 35 years he devoted himself to his art, living mainly in London, and was very successful. His best known portraits are those of Lady Hamilton. He died Nov. 15, 1802.

Romsey Borough and market town of Hampshire, on the Test 10 m from Southampton and 80 m from London, by the S. Ry. The magnificent Norman church was once the church of a religious house

for women. There is a trade in agricultural produce and some manufactures. Near the town is Broadlands, once the residence of Lord Palmerston. Pop. (1931) 4863.

Romulus Founder of Rome and its first king. Legend says that he was the son of Mars and Rhea, the daughter of a king and a vestal virgin. In infancy Romulus and his twin brother, Remus, were thrown into the Tiber by their uncle, but the trough in which they were placed went aground. The children were suckled by a wolf and brought up by a shepherd. While Romulus and Remus were building walls around the city they founded a quarrel arose and Remus was killed. Romulus became king of Rome and united the Romans and the Sabines. Taken to heaven in a chariot he was deified and worshipped by the Romans as Quirinus.

Ronald Sir Landon English musician. Born June 7, 1873, he studied music at the Royal College of Music, and in 1894 he conducted opera at Covent Garden. The same year he accompanied Melba on an American tour. He has been principal of the Guildhall School of Music since 1910 and conductor of the New Symphony Orchestra since 1908. He is the author of some 300 songs and a great deal of music for the orchestra. In 1931 he published a volume of reminiscences.

Ronaldshay Two islands of the Orkneys, called North and South, 3 m and 8 m long respectively. South Ronaldshay is the more fertile of the two, with some interesting remains, and 2000 inhabitants. North Ronaldshay has only 400.

The title of Earl of Ronaldshay is borne by the eldest son of the Marquess of Zetland. Lawrence John Dundas, who succeeded to the marquessate in 1929 was prominent in public life when Earl of Ronaldshay. He travelled much and wrote on his travels, was M.P. for Hornsey 1907-16, and Governor of Bengal, 1917-22. He wrote the *Life of Lord Curzon of Kedleston*.

Roncesvalles Village of Spain, in the Pyrenees, 21 m from Pampeluna. The pass through the mountains here is regarded as the place where the army of Charlemagne was defeated by the Basques in 778, the paladin Roland being killed.

Rondeau Form of poem. It consists of close rhymes and a refrain and was popular in France in the 17th century when it contained 13 lines. These were divided into three unequal strophes. The 2 or 3 first words of the first line served as the burden and recurred after the 8th and 13th lines. There are English examples in the works of Swinburne.

Rondebosch Suburb of Capetown, South Africa. It lies 5 m to the south of the city and comprises Groote Schuur (qv). There is a town hall in Rondebosch which is a favourite place of residence for workers in Capetown.

Ronsard Pierre de French poet. He was born at the Chateau de la Poissonniere in Vendôme, Sept. 11, 1524. After spending his youth as page and courtier, he became deaf and turned to study and poetry. He formed a group with du Bellay and other poets which aimed at reviving French verse and adopted the name of *La Pléiade*. This group of writers was responsible for the increase of classical influence in French poetry. He died at Tours, Dec. 27, 1585.

Röntgen Wilhelm Konrad von German physicist. He was born in

Prussia, March 27, 1845, and after studying at Zurich, he was professor at Strassburg, Giessen, Wurzburg and Munich. His original discoveries in science were numerous but his most famous work was the discovery of the X-rays (1895), called now the Röntgen rays. Following on research by Hertz, Röntgen first showed that these rays would pass through the body and print a shadow picture of the bones on a sensitive photographic plate. He died Feb. 10, 1923.

Rood Measure of land. It is 40 perches or a quarter of an acre and therefore consists of 1210 sq yards. It is sometimes known as a square pole.

Rood Term applied to a cross and especially to the large crucifix in churches representing the scene of the Passion with the figures of angels or St. John and the Virgin on either side. It was placed usually upon the rood screen separating the nave from the chancel, and was probably coloured. The rood was common in English churches up to the time of the Reformation.

Rook Gregarious bird of the crow family (*Corvus frugilegus*). In Gt. Britain it remains through the year, in more northern climes it is a migrant. Its colonies are usually in high elms. The plumage is black with a bare patch at the base of the bill, said to be caused by digging for the insects and grists which mainly form its food.

Rooke Sir George. English sailor. He was born near Canterbury in 1650, son of Sir William Rooke. Entering the navy, by 1689 he had risen to the rank of Rear-Admiral. In 1692 he was knighted for his services at Cape La Hogue. He commanded the successful Cadiz expedition of 1702, and with Sir Clondesley Shovel he captured Gibraltar in 1704. He died Jan. 24, 1709.

Roosevelt Franklin Delano. American president. Born in New York, Jan. 30, 1882, and educated at Harvard and Columbia, he was admitted to the New York Bar in 1907 and was a member of the New York Senate, 1910-13. From 1913-20 he was Assistant-Secretary of the navy and was made Governor of New York, 1929-31. In 1932 he was elected as President of the United States, defeating Mr. Hoover. A member, like Woodrow Wilson, of the Democratic party, he threw himself at once into the task of economic reconstruction, and handled with skill and vigour the various international problems in which his country was involved. Though insisting on the payment of war debts, he invariably showed willingness to discuss terms with the debtor countries. He is the author of *Whither Bound?* (1926), *The Happy Warrior* (1928), *Looking Forward* (1933) and *On Our Way* (1934).

Roosevelt Theodore. 26th President of the U.S.A. He was born in New York, Oct. 27, 1858, his father being of Dutch descent, and his mother, Scotch-Irish-Huguenot. He was educated at Harvard University. Entering public life early, he was President of the New York Police Board, 1895-97, where he made strenuous efforts to stem corruption. At the outbreak of the Spanish War he raised the famous "Rough Riders" commanding the regiment himself. In 1898 he became Governor of New York State, and in 1900 Vice-President of the U.S.A., automatically becoming President on the assassination of McKinley, Sept. 14, 1901. During his term of office he had many conflicts with "Big Business," directing all his efforts to prevent the gradual strangulation of the free develop-

ment of industry in the interests of the people. The result was that in 1904 he was re-elected for a second term by an overwhelming majority. In 1905 he was largely instrumental in bringing about peace between Japan and Russia, and was awarded the Nobel Peace Prize. In 1912 he split the Republican vote between himself and Taft, thus causing the election of Woodrow Wilson, Democrat. His great interest, apart from politics, was big game hunting. He made expeditions to Brazil and Africa, and wrote several books on the subject, also on historical and general matters. He died Jan. 6, 1919.

Root Elihu. American lawyer and politician. He was born at Clinton, New York, Feb. 15, 1845. After serving with the Republican Party as Secretary for War (1899-1904) and Secretary of State (1905-09) he devoted himself to the cause of international peace and was awarded the Nobel Peace Prize in 1912. He headed the U.S. Diplomatic Mission to Russia in 1917 and represented his country at the Washington Disarmament Conference in 1921. His writings include *The Citizen's Part in Government*, 1907, and *Men and Policies*, 1924.

Rorke's Drift Historic place on Buffalo River, Zululand. On Jan. 22, 1879, shortly after the disaster to a British force under Lord Chelmsford at Isandhlwana, Rorke's Drift was successfully held against a Zulu onslaught by a handful of the 24th Regiment under Lieutenants Chard and Bromhead.

Rorqual Animal belonging to one of the two divisions of the whalebone whales. They include the largest living animal, the blue whale, but are less valuable than right whales as their whalebone is coarse and short and there is less blubber. They live in northern waters.

Rosa Carl August Nicolas. German musician. He was born at Hamburg Mar. 22, 1842. The opera company which bears his name was formed in 1875 with the object of encouraging English composers and producing their works. His first wife was the famous operatic soprano Madame Parepa. He died in Paris April 30, 1889.

Rosa Salvatore. Italian artist. The son of an architect and law surveyor, he was born at Renella, near Naples, July 21, 1815. He studied under Ribera and afterwards under Falcone, the battle-painter. His picture, "Titius tortured by the Vulture," brought him fame in 1838. His reputation rests mainly upon his landscapes, which are characterised by a wild and rugged freedom. He died in Rome, March 15, 1873.

Rosario Second largest city in Argentina. On the River Parana 190 m. from Buenos Aires, it is an important railway centre and possesses an excellent harbour, and the largest sugar refinery in Argentina is found here. The town is laid out with mathematical regularity. It was founded in 1730, but was still no more than a small village in 1850. Pop. (1931) 485,351.

Rosary String of beads used by Roman Catholics for counting their prayers. The devotions themselves are sometimes called rosaries. The festival of the Rosary, kept on the first Sunday in Oct. commemorates the victory of the Christians over the Turks at Lepanto in 1571.

Roscoe Sir Henry Enfield. British chemist. Born in London, Jan. 7, 1833, he studied chemistry at University

College, London, and later at Heidelberg (under Bunsen). For thirty years he held the Chair of Chemistry at Manchester University and was M.P. for South Manchester from 1885-95. He served as Vice-Chancellor of London University from 1898-1902, became an F.R.S. in 1863, and a knight in 1884. He died at Leatherhead, Dec. 18, 1915.

Roscommon Market town of Co. Roscommon, Irish Free State, also the county town. Founded about 700, it is an agricultural centre, 85 m. from Dublin, on the G.S. Rlys. There are ruins of a 13th century castle. Pop. (1931) 1830.

Roscommon County of Ireland. It is in the Province of Connaught and wholly inland. It covers 990 sq. m. and is bounded by the Shannon and the Suir. There are hills in the north and east and the country has many lakes, Ree and Allen among them. Cattle, sheep and pigs are reared, especially on the plain of Boyle. Oats and potatoes are grown and a little coal is mined. Roscommon is the county town. Other places are Elphin, Boyle and Castle-Reagh. Pop. (1926) 83,556.

Roscrea Market town of Co. Tipperary, Irish Free State. It is on the Little Brosna River, 77 m. from Dublin, on the G.S. Rlys. The town has a round tower and was the seat of a bishop. It is a centre for the sale of cattle and agricultural produce. Pop. (1926) 2770.

Rose Flowering tree or shrub of the order *Rosaceae*. From the wild rose, *Rosa canina*, have been developed numerous strains, added to each year, with widely different characteristics. The main groups are ramblers, climbing roses, bush and standards, in each of which are a profusion of varieties. As a result of hybridization and careful selection types have been evolved which are free flowering and yield blooms for 5 or 6 months of the year. Autumn is the best time to plant.

Rosebery Earl of English statesman. Archibald Philip Primrose was born in London, May 7, 1817, the son of Archibald, Lord Dalmeny, his paternal grandfather being the 4th Earl of Rosebery. He went to Eton and Christ Church, Oxford, and in 1868 succeeded his grandfather in the earldom.

In 1878 he married the heiress, Hannah Rothschild, and in 1881 he joined the Liberal Ministry as Under Secretary to the Home Office. In 1883 he was made first Commissioner of Works and in 1885 Lord Privy Seal. He followed Gladstone when the Liberal Party was divided on home rule and in 1886 was Foreign Secretary. He was again Foreign Secretary, 1892-94 and in 1894 succeeded Gladstone as prime minister.

The Radicals disliked his idea of a continuous foreign policy and the Nonconformists his association with the turf. In 1895 he resigned and he never took office again, using his influence in the House of Lords till his retirement from politics in 1905. In 1910 he denounced the budget introduced by Lloyd George. He died at Epsom, May 31, 1929. In 1911 he was made Earl of Midlothian. Three times his horses won the Derby—1894, 1895 and 1905.

Rosebery's fame rests upon his literary gifts, rather than his political career. A graceful speaker, he coined phrases that have become historic while he was equally attrac-

tive with his pen. His books include studies of Pitt, Peel, Napoleon and Chatham and a short life of his friend, Lord Randolph Churchill.

Lord Rosebery had four children. His elder son, Lord Dalmeny, a cricketer and hunting man, succeeded him as 6th earl. The younger son, Neil Primrose, was killed in Palestine, Nov. 18, 1917.

Rose Mallow (*Hibiscus*) Genus of tropical and subtropical plants and shrubs of the order *Malvaceae*. The beautiful flowers are striking and richly coloured. Largely cultivated under glass, some varieties can be grown in the open air under suitable conditions. There are many species, the two shrubs *H. syriacus* and *H. rosa-sinensis*, together with *H. roseus*, being the true rose mallows. The name is also given to a specially large and beautiful species of hollyhock.

Rosemary (*Rosmarinus officinalis*) perennial shrub. Two or three feet in height, it has fragrant green leaves from which an aromatic oil is extracted. The small violet flowers are borne in early summer.

Roseneath Watering place of Dumbartonshire. It is on the Gareloch, near Helensburgh and is a calling place for steamers. Roseneath Castle, a modern building near the site of an older one, is a seat of the Duke of Argyll.

Rose of Jericho (*Anastatica hieracantha*) Cruciferous plant of S. Europe with small, white flowers. After flowering the plant withers and the stems curve inward, forming a dry, shrivelled ball. Being light, these balls are carried by the wind in all directions.

Roses Wars of the Civil War that took place in England between 1455 and 1485. It arose when Henry VI was king. He became insane, and Richard, Duke of York, like Henry a descendant of Edward III, claimed the throne. Henry's supporters, the Lancastrians, took a red rose as their symbol, and the Yorkists a white one.

There were a number of battles, beginning with St. Albans in 1455, with periods of truce between them. At the Battle of Northampton, in 1460, Henry was made prisoner and in 1461 York was killed at the Battle of Wakefield. The Lancastrians were defeated at Towton and their cause was hopeless until the Earl of Warwick changed sides in 1470. Henry was then released from prison and restored to the throne. However, at Barnet and Tewkesbury in 1471, the Lancastrian armies were crushed and the war was virtually over, although it is usually regarded as ending with the Battle of Bosworth, where Henry VII defeated his enemies in 1485.

Rosetta Stone Inscribed slab of black basalt found at Rosetta in the western delta of the Nile by a French artillery officer in 1799. It came into the possession of the British Government later and is now in the British Museum. It bears fourteen lines of hieroglyphic writing, thirty-two of demotic, and fifty-four of Greek, and records a decree made by Ptolemy V. Epiphanes about 196 B.C. It furnished a key to the decipherment of Egyptian writing.

Rosewater Solution of a small quantity of otto of roses in water prepared usually by distillation. Considerable quantities are made in and exported from the South of France and other rose-growing countries.

Rose Window Large, circular window in Romanesque and especially Gothic cathedrals. It is divided by elaborate tracery into a central compartment with others radiating from it, the divisions being filled with stained glass.

Rosicrucians Supposed secret society. It is represented in a book called *Fama Fraternitatis des Iohlichen Ordnungs des Rosenkreuzes*, which appeared at Cassel in 1614, as having been formed about 150 years earlier to (among other things) relieve sickness and poverty with gold manufactured by use of the philosopher's stone. Though the literature on the subject is extensive it is doubtful whether such a society existed. The word is used as the title of an order in Freemasonry.

Roslin Village of Midlothian. It is 6 m. south of Edinburgh, on the L.N.E. Rly. It is famous for its chapel and ruined castle. The chapel is the choir of an unfinished church and is remarkable for the beauty of its carvings, especially its prentice pillar. It dates from 1446. The castle, of which a considerable portion remains, was a seat of the St. Clair family. At one time Roslin was a burgh, to day it is a mining centre. From it the family of St. Clair Erskine takes the title of earl.

Ross Urban district and market town of Herefordshire. It is an agricultural centre, on the Wye, 12 m. from Hereford, on the G.W. Rly. Pop. (1931) 4738.

Ross Sir John. Arctic explorer. Born in Wiltshire, June 24, 1777, he entered the navy at the age of nine. After good service in the wars against France, he began Arctic exploration in 1818, when he attempted to find a North-West Passage, and explored Baffin's Bay. He was knighted in 1833, and in 1850 attempted without success to find Sir John Franklin. He died on Aug. 30, 1856.

Ross Sir Ronald. British physician and bacteriologist. Born at Almora, India, May 13, 1857, he studied medicine in London, and in 1881 entered the Indian Medical Service. Until 1899 he made researches into the disease-carrying insects, and later became Professor of Tropical Medicine at Liverpool University. After being at King's College London, in 1913, he became Director in Chief of the Ross Institute and Hospital for Tropical Diseases. During the Great War and after he was the chief consultant on malaria. He received a Nobel prize for medicine in 1902, and knighted in 1911. Died Sept., 1932.

Rossall Village of Lancashire. It is on the coast, three m. from Fleetwood. Here is a school for boys opened in 1844, and one of the great public schools.

Rosse Earl of Irish title borne by the family of Parsons. It dates from 1806 and the family seat is Birr Castle, Parsonstown. Its most famous holder was William Parsons, the 3rd earl. He was born, June 17, 1800, and sat in Parliament from 1823 to 1834. He won a great reputation as an astronomer. At Birr Castle he built a great telescope and did much valuable work. He was president of the Royal Society, 1849-54 and died Oct. 31, 1867.

Rossetti Christina Georgina. English poetess. She was born in London, Dec. 5, 1830, and except for very short absences, her life was spent in the metropolis. Her first published book of poems

was *Goblin Market* (1862). This was followed by a steady output of verse characterised by deep religious feeling and delicate grace. Miss Rossetti was the sister of Dante Gabriel Rossetti. She died Dec. 29, 1894.

Rossetti Dante Gabriel. English poet and painter. He was born in London, May 12, 1828, the son of Gabriele Rossetti, an Italian poet and critic. His poem *The Blessed Damozel* was written before he was twenty, but his early fame was that of a painter. In art he was influenced by Ford Madox Brown and became one of the founders of the Pre-Raphaelite Brotherhood (q.v.) in 1848. A collection of poems, after being buried with his wife (Elizabeth Siddall, d. 1862) was disinterred and published in 1870. A great passion for beauty is the principle which unifies his art and poetry. He died at Birchington, April 9, 1882.

Rossetti William Michael. English literary critic. Brother of Dante Gabriel Rossetti, he was born in London, Sept. 15, 1829, and was a civil servant until his retirement in 1894. He translated Dante's *Inferno* (1865) and wrote a memoir of his brother (1895). He also edited the *Germ*, the magazine of the Pre-Raphaelite Brotherhood. He died Feb. 5, 1919.

Rossi Giovanni Battista de. Italian painter and sculptor. He was born at Florence in 1494. At the invitation of Francis I he undertook the decoration of Fontainebleau Castle. His work consists of frescoes, representing mythological scenes and incidents from the life of St. Francis. One of his pictures, "Lamentation for Christ," hangs in the Louvre. He committed suicide in 1541.

Rossini Gioacchino Antonio. Italian composer. He was born at Pesaro, Feb. 29, 1792. The son of a strolling player, he studied music at Bologna, and began his musical career as a singer and later as accompanist. His most famous compositions are *Il Barbiere di Seta* (1816), *Guillaume Tell* (1829) and *Stabat Mater* (1832-39). Though he composed no work of importance after the age of thirty-seven, his place among the greatest writers of opera is unquestioned. He died Nov. 13, 1868.

Rosslare Seaport and holiday resort of Wexford, Irish Free State. It is 6 m. from Wexford and 97 from Dublin, on the G.S. Rlys. Its harbour was enlarged for the G.W. Rly. steamer service between Fishguard and Ireland, started in 1906.

Rosslyn Earl of Title borne by the family of Erskine. The 1st earl was Alexander Wedderburn. Born Feb. 13, 1733, the son of a Scottish lawyer, he became a barrister in London, and an M.P. In 1771 he was made Solicitor-General, and in 1778 Attorney-General. In 1780 he became Chief Justice of the Common Pleas, and from 1793 to 1800 he was Lord Chancellor. In 1780 he was created Baron Loughborough, and in 1801 Earl of Rosslyn. He died Jan. 2, 1805.

Leaving no sons, Rosslyn's title passed to a nephew, James St. Clair-Erskine, who, since 1782, had sat in the House of Commons. He was Lord Privy Seal, 1820-30, and Lord President of the Council, 1834-35. He died in 1837. James Francis St. Clair-Erskine (b. 1869), became the 5th earl in 1890. His eldest son is called Lord Loughborough.

Ross Sea Antarctic Sea. It was discovered by, and named after

Capt J O Ross, R N., in 1839. In 1841, after penetrating a wall of pack ice, he found the sea to be ice free.

Ross-shire County of Scotland, in full Ross and Cromarty. In the N of the country, it stretches from the E to the W coast. It includes part of Lewis and some other islands of the Hebrides. Dingwall is the county town, other places are Stornoway, Cromarty, Tain, Strathpeffer and Invergordon. The soil is unfertile and largely devoted to deer forests. Of the many mountains, some are nearly 4000 ft. high. The Ainess, Oykel and Conon are the chief rivers. Maree and Fannich are the chief of many lochs. The area is 3089 sq. m. One member is returned to Parliament. Ross and Cromarty were separate counties until 1889, when they were united, as Cromarty consisted of small pieces of land scattered throughout Ross. Pop (1931) 62,802.

Rostand Edmond French dramatist. He was born at Marseilles April 1, 1808, and educated at the Lycée there. He is the author of numerous plays, including *Les Romanesques* the brilliant *Cyrano de Bergerac*, *L'Anglais et Chanteclair*, a farmyard fantasy. He died Dec 2, 1918.

Rostock Town in the German republic of Mecklenburg. It is 8 m from the coast, on the River Warnow, which is navigable up to the town for sea-going ships of 19 ft. draught. It is one of the most important commercial centres on the Baltic. Pop 72,200.

Rostrum Platform from which a speaker addresses an audience. In ancient Rome the rostra (plural) was the platform between the forum and comitium used by public speakers. It was so-called from the rostra or beaks of captured galleys which decorated it.

Rosyth Seaport of Scotland. It is on the N side of the Firth of Forth. The dockyards and other works were begun in 1909 and greatly enlarged during the World War, when Rosyth became one of the chief naval stations. It had wet and dry docks capable of taking the largest warships. Land was recovered from the sea and protected by a sea wall. The great basin was nearly a mile long, and near it was a submarine basin. In 1925 the dockyard was closed.

Rotary Club Organisation for business men. The first club was established in 1905 by Paul Harris, a Chicago lawyer. Each member represented a different trade or profession and its motto was service not self. Other clubs were established in the United States, and the idea spread to Britain. The members meet at stated times for luncheon, and afterwards discuss some social or other topic. The clubs are federated into an international association which holds an annual convention. The international headquarters are in Chicago.

Rotation Form of motion in a circular path of a line plane or solid. In a line having one end fixed, the other or free end may describe a circle round it in the same plane or parallel planes. Similarly, a plane may rotate around any point or line in it, and a rotating solid revolves round a row of fixed points forming a straight line and termed the axis of rotation. The rate of rotation may be measured by the number of revolutions in a given time, or may be expressed in terms of angular velocity.

Rothamsted Village of Hertfordshire. It is near Harpenden. Its manor house and the estate were the property of Sir John Bounet Lawes (1814-1900), who here carried out valuable agricultural experiments. In 1889 he endowed the station and since then the work has been carried on by the Lawes Agricultural Trust. The experimental station covers 40 acres and receives assistance from public funds.

Rothbury Market town and urban district of Northumberland. Much frequented by tourists, it is situated on the Coquet, 11 m from Alnwick, on the L N E Rly. Pop (1931) 1255.

Rothenburg Town of Bavaria. It stands on the Tanber, 36 m from Nuremberg. One of the most perfect medieval towns existing, it is still surrounded by its walls and gates, and its narrow streets remain unobscured. The town's capture during the Thirty Years' War is annually celebrated by a play. Pop 9000.

Rothenstein Sir William English artist. He was born Jan 29 1872, in Bradford, and studied at the Slade School of Art. He became famous through his lithographed portraits of distinguished authors, and during the Great War was made one of the official painters to the British armies. In 1920 he was appointed Principal of the Royal College of Art, South Kensington. He published his *Reminiscences* in 1932.

Rother River of Sussex. It rises S of Rotherfield and enters the sea at Rye. Its length is 30 m, and for part of its course it forms the boundary between Kent and Sussex.

Rotherfield Village of Sussex. It is 8 m from Tunbridge Wells and 39 from London, by the S Rly.

Rotherham County borough and market town of Yorkshire (W R.). It is 6 m N E of Sheffield and 163 from London, by the L M S Rly. The rivers Don and Rother meet near the town, which has glass and pottery manufactures and metal and chemical works. Pop (1931), 69,689.

Rotherhithe District of London. Part of the borough of Rotherhithe. A tunnel connects it with Stepney across the river, and in the district are the Surrey Commercial Docks.

Rothermere Viscount. English newspaper proprietor. Harold Sidney Harmsworth was born at Hampstead April 26, 1868, being a younger brother of Viscount Northcliffe. He left the civil service to join his brother in the publishing business, and the two soon made of this a gigantic concern. In 1896 the two started *The Daily Mail* side by side with that of the Amalgamated Press, which was confined to weekly and monthly publications. In 1910 he was made a baronet. In 1914 a baron and in 1919 a viscount. In 1916 he was made Director General of the army clothing department, and in 1917 he was Minister for Air.

In 1922 on his brother's death, he returned to *The Daily Mail* as chief proprietor, and became a leading figure in the newspaper world. Lord Rothermere is one of the most generous private benefactors of his time. He has endowed professorships at both the older universities. He bought the site of Bethlem Hospital for a public pleasure ground, and

has made the acquisition of the site of the Foundling Hospital possible

Roths Burgh of Meray It is on the Spey, 10 m from Elgin, on the L N E Rly Pop (1931) 1260

The title of Earl of Rothes has been borne by the family of Leslie since 1457 or earlier. In 1680-81, its holder, who was Lord Chancellor of Scotland, was a duke. The title has several times been held by a woman. The earl lives at Leslie House, Fife, and his oldest son is called Lord Leslie

Rothsay Burgh and watering place of Bute also the county town of Bute. On Rothsay Bay, and 40 m from Glasgow, the town has a good harbour and some fishing and shipping, and is a popular pleasure resort and yachting centre. Pop (1931) 9346

The Prince of Wales bore the title of Duke of Rothsay. The first duke was David, son of King Robert III, and it was borne by other heirs to the Scottish throne

Rothley Village of Leicestershire. It is 108 m from London and 5 from Leicester, on the L N E Rly. Here is Rothley Temple, the house in which Lord Macaulay was born. In the Middle Ages the knights templars had a preceptory here

Rothschild Name of a world-famous banking family. The founder was Meyer Amsehel, who was born in Frankfurt in 1743, and who laid the foundations of their great fortune by gaining the confidence of the Landgrave of Hesse, by commissions on moneys sent by the British Government to Wellington in Spain during the Peninsular War, by raising large loans for Denmark, 1804-12, and by skilful management of the Landgrave's fortune. He died Sept 13, 1812, leaving five sons who established themselves respectively in Frankfurt, Vienna, London, Naples and Paris. The grandson of the third (1840-1915), was the first Jew to be made a peer (1885) and the present holder of the title, Lionel Walter (b Feb 8, 1868), succeeded his father in 1915

Rothwell Urban district of Yorkshire. It is 4 m from Leeds and is a centre of the coal-mining and cloth-manufacturing industries. Pop (1931) 15,639

Rothwell Urban district of Northamptonshire. It is 4 m from Kettering, on the L M S Rly. The town has a Jesus hospital dating from 1590. The chief industry is the manufacture of hoots and shoes. Pop (1931) 4516

Rotorua Town and lake in New Zealand. The lake is 7 m long by 5 m broad, with the volcano island of Mokoia in the centre. The town, on the S W shore of the lake, is famous as a healthy spot and health resort, and also has a scientific interest as the centre of the remarkable volcanic hot spring district. It is surrounded by luxuriant forests, with the curative baths at Whakarewarewa close at hand

Rotten Row Thoroughfare in Hyde Park, London. It extends from Hyde Park corner to Coalbrookdale Gate, and is reserved for horse riding. See HYDE PARK.

Rotterdam City and seaport of Holland. It is on the New Maas, 20 m from the sea, is accessible to the largest ships and has 16 m of quays. Long a famous city, Rotterdam was the birthplace of Erasmus (q v) whose statue is in the great

market-place. The 15th century Groota Kerk contains a famous organ with nearly 500 pipes, and there are a number of museums and an old and a new town hall. Apart from ship building, Rotterdam manufactures tobacco cigars, margarine, rope, leather, etc., but is more important as a commercial centre, having an extensive overseas trade. The city has many canals. Pop (1932) 587,310

Rotunda Circular building usually with a dome. The most famous example is the Pantheon at Rome built by Hadrian in the 2nd century and now used as a church

Roubaix Town of France. It is 6 m from Lille, and is served by railway and canal. Before the war the town shared with Turcoing pre-eminence as one of the busiest industrial centres in France, especially in the production of woolen, cotton and other textiles. It was occupied by the Germans, 1914-18. After the war it was adopted by Bradford and was rebuilt. Pop (1931) 117,190

Rouble Russian coin. Before 1917 it was coined in silver and to some extent in gold. It was worth 2s 1½d, and was divided into 100 kopecks. Paper roubles were issued in immense quantities during the war period and soon became valueless. Under the Soviet rule the rouble has been restored to its former value

Rouen City and river port of France. It is on the Seine, 87 m from Paris and 54 from the coast at Havre. As the capital of the old duchy of Normandy, the old part of the city is full of interest. Chief among its buildings is the Gothic cathedral. It dates mainly from the 13th century and is notable for its west front, its towers, its monuments and its stained glass. The Church of St. Ouen is regarded as a wonderful work of art. Those of St. Maclou and St. Vincent are famous for their stained glass. The palais de justice is a fine Gothic building and there is a gateway containing a large clock, the celebrated *grande horloge*. There are suburbs across the river which is crossed by three bridges, one a transporter bridge

Rouen is a prosperous river port. Other industries are the manufacture of cotton chemicals, machinery, soap, boots and other articles, the refining of oil and railway shops. Pop (1931) 122,957

Rouge-et-Noir Gambling card game also known as Trente et Quarante (q v)

Roughrider Trainer of unbroken horses. In its plural form the name is also given to irregular mounted troops, such as T. Roosevelt raised for service in Cuba during the war between the United States and Spain

Roulers Town of Belgium. It is 19 m from Bruges, and is an important railway junction. It is a centre of textile manufactures, and at one time was famous for its cloth. From 1914 to 1918 it was in German occupation. Pop (1931) 27,060

Roulette French game of chance. It is a feature of the gambling rooms of Monte Carlo. The roulette table, covered with a green cloth, is made up of two similar halves with a space in the middle for the wheel, the spaces at the side being marked "passo," "pair," "manquo," "impair," and with black and red diamonds. The wheel is divided into 37 compartments, alternately

black and red, the 37th being zero. The croupier throws the ball as the wheel is spinning, and the number upon which it comes to rest wins

Roundel Name used for a tune. The poem was sung to the tune, the first strain being repeated at intervals and so giving the idea of a circle, or small round. In the dance the dancers stood in a circle and joined hands. In heraldry roundels are circular charges, and are given different names according to their tinctures, gold or yellow being called *hezant* and silver or white a *plate*

Rounders Outdoor game. The implements are a stick and a ball. The members of one side strike the ball in turn, when it is tossed to them, each as he does so running to a base, of which there are several in the field. If possible he runs round to the striking post, passing all the bases. If a member of the fielding side hits him with the ball before he reaches a base, he is out. He is also out if the ball is caught in the field or if he fails three times in succession to hit the ball.

In 1889 an association was founded, and rules for the game were drawn up. These provide for sides of 10 players each, and a stick or bat not more than 35 inches in length. There are five bases 15 or 20 yards from each other, and the field is shaped like a pentagon. A hard ball is used, and to be out the striker must be touched with it instead of having it hurled at him. Baseball certainly, and cricket probably, owe something to rounders. See **BASEBALL**, **CRICKET**

Roundhead Epithet of derision applied by the king's men to a supporter of the Parliament during its struggle with Charles I. It was an allusion to the puritan habit of wearing the hair cropped close to the head.

Round Robin Name for a petition signed by several persons. It was given a round shape so that those addressed could not tell who first wrote his signature, and so possibly penalise him as a ring-leader. The name is also used popularly for certain small fishes.

Round Table Table which King Arthur and his knights used for their feasts. It was made round so that there should be no jealousies about precedence. According to legends an order of the round table was founded by Uther, the father of Arthur. It had 150 members. There are references to it in Malory's *Morte d'Arthur* and Tennyson's *Idylls of the King*.

Round Tower Tall, slender, circular and somewhat tapering edifice surmounted by a conical cap. Round towers are found mostly scattered over Ireland, but three occur in Scotland and they are supposed to have been used as watch-towers or refuges. The older towers probably date from the 9th century but many were built in the 12th and 13th centuries. The door of the tower was 6 to 20 ft above ground, and communicated by ladders with the several storeys.

Roup Disease of poultry. It is some thing like catarrh and may arise from keeping the birds in restricted surroundings. It is marked by discharges from nose and mouth and is very contagious. The birds attacked should therefore be isolated and treated by a veterinary surgeon.

In Scotland a roup is the usual name for an auction.

Rousseau Jean Jacques French writer and philosopher. He was born at Geneva, Jan 28, 1712. After a more or less vagabond career, he found his way to Paris, and achieved fame in 1750 with his *Discours sur les Sciences et les Arts*. *La Nouvelle Héloïse*, with its genuine sentiment and love of nature, was the forerunner of Romantic literature in France. *Emile* did much to promote modern theories of education and the upbringing of children and *La Confession de Foi d'un Vicaire Savoyard* helped to purify and simplify the religion of his contemporaries. In the political sphere, *Du Contrat Social* was to a large extent responsible for the ideas and policy of the revolutionary leaders in 1789. He died July 2 1778.

Rousseau Pierre Etienne Theodore French artist. Born in Paris, April 15, 1812 he studied art there. Soon he attracted attention by his landscapes, although it was not until 1849 that they were admitted to the Salon. In 1848 he settled at Barbizon, and was a leading member of the group there until his death Dec. 22, 1867. Rousseau was much influenced by the Dutch painters, and in his turn influenced those who followed him.

Rowfant Railway station of Sussex. It is 4 m. from E Grinstead on the S Rly. Near is a Tudor house, famous for the collection of books made here by Frederick Locker Lampson (1821-95).

Rowing Art of propelling a boat by means of oars. It forms part of every seaman's calling, whether in the fighting or the merchant service, and is also a sport. As a sport it has been brought to a wonderful state of perfection by improvements in the build of the boats and the style of oarsmanship. The most famous rowing race is that held annually between the universities of Oxford and Cambridge. It has been held since 1829, each crew numbering eight. In other races the crews number four or two, an even number being essential as each man pulls a single oar.

In sculling a man uses two sculls, and, therefore, sculling races can be held between two competitors. A rowing crew usually carries a cox for steering the boat, but races between coxswainless fours are held. A great event of the rowing year in England is the regatta, founded in 1839, at Henley-on-Thames to which crews come from many parts of the world and of which there is an offshoot in Australia. Practically all rowing races are strictly confined to amateurs. To control the sport there is an amateur rowing association, and the chief rowing club is the Leander, with headquarters at Henley.

Rowlandson Thomas English artist. Born in London in 1766, he studied art here and in Paris. His landscapes and portraits made him popular in his day, but his more enduring fame rests upon his caricatures. These dealt with current political events and occupied him from 1784 until his death. They were remarkably powerful, both in conception and in design, and expressed the idea of the populace. Rowlandson died in London, April 22, 1827. In another vein were his drawings entitled "The Three Tours of Dr Syntax."

Rowley Regis Market town and urban district of Staffordshire. It is 5 m. from Birmingham.

on the G W Rly The industries include the manufacture of hardware and coal-mining Pop (1931) 41,238

Roxana Wife of Alexander the Great. She was the daughter of a prince of the Bactrians The king met her when on a campaign in Asia and married her a short time before his death After that event she bore him a son, Alexander, the heir to the vast empire She took him to Macedonia, but soon the pair were imprisoned, and in 311 B C were murdered by order of Cassander

Roxburgh Burgh of Scotland, now represented by a village Near Kelso on the Tweed, it is on the L N E Rly, and is sometimes called New Roxburgh The burgh stood where the Tweed and the Teviot unite, and was an important border fortress in the Middle Ages

Roxburghe Duke of Scottish title borne by the family of Innes-Ker In 1616 Robert Ker was made Earl of Roxburghe, and in 1707 John Ker, the 5th earl, was made a duke He was a Secretary of State at that time, and this title was a reward for helping to unite the two parliaments John, the 3rd duke, is known as the curator of a famous library which was sold in 1812 He died in 1804 without sons and the dukedom was claimed by Sir James Innes, a descendant of the 1st earl His claim was admitted, and his descendants, the family of Innes-Ker, have since held the title The duke's seat is Floors Castle, near Kelso, and his eldest son is called the Marquess of Bowmont

Roxburghshire County of Scotland It is in the S, touching the English border, and covers 666 sq m It contains peaks of the Cheviot and the Eldon Hills, and is famous for its scenery The chief river is the Teviot others are the Tweed, Liddel, Alc and Jed Jedburgh is the county town, other places are Hawick, Melrose, Kelso and St Boswells The county contains the ruined abbeys of Melrose and Jedburgh, and such famous border strongholds as Hermitage, Branxholm and Harden Roxburghshire is famous for its sheep With Selkirkshire it sends one member to Parliament Pop (1931) 45,787

Royal Academy of Arts, see ACADEMY, of Music, see MUSIC

Royal College of Music, see MUSIC, of Organists, London college It has commodious quarters in Kensington, which include a fine organ and well appointed library, and offers Associateship and Fellowship by a combined practical and theoretical examination The college, whose president is elected annually, was founded in 1864

Royal Family Term including the sovereign and all the members of his family In Great Britain, the members of the royal family are confined to the descendants of Queen Victoria, the other descendants of George III and earlier sovereigns, having, for one reason or other, passed out of the circle Some of the descendants of Victoria have also passed out of it by having married into foreign royal or imperial families Members of the royal family are addressed as royal highness, and enjoy precedence on state occasions

The British royal family traces its descent back to Alfred the Great and the Anglo-Saxon kings of England Matilda, the wife

of Henry I was a descendant of these kings From this pair the line continued to Richard III, and then came Henry VII who was descended from Edward III After the death of Elizabeth, James VI of Scotland, a descendant of Henry VII succeeded, and his granddaughter, Sophia, was the mother of George I Since then descent has been in the direct line The line of succession is now (1936) the Duke of York, the Princess Elizabeth, the Princess Margaret, the Duke of Gloucester, the Duke of Kent, his young son and the Princess Mary and her children

Royal Household Inclusive term denoting the attendants of the sovereign In England it consists of the Lord Steward's department, the Lord Chamberlain's department, and the department of the Master of the Horse The Lord Steward and the Lord Chamberlain are always peers and members of the government The Lord Steward's department includes the Treasurer, Comptroller, Master of the Household, Almoner and Paymaster of the Household, and the Lord Chamberlain's consists of the Vice-Chamberlain, Master of the Ceremonies, the Gentleman Usher of the Black Rod (qv), Lords- and Grooms-in-waiting, and others, including the Dean of the Chapels Royal and other attendants, religious, medical and for the arts The Master of the Horse, who has charge of the horses and hounds of the sovereign, has under him equerries and pages-of-honour There is also a Privy Purse department, consisting of the king's personal staff

Other members of the royal family have their own households, that of the queen consort being under a lord chamberlain and including, among others, a mistress of the robes, ladies of the bedchamber and maids-of-honour

Royal Society English learned society, the chief of its kind It was founded in 1645, and received a charter from Charles II in 1660 It has had its headquarters in various places, including Wadham College, Oxford, but since 1857 has been at Burlington House, London, WC The society holds meetings, gives medals and in other ways encourages scientific research Its membership (F R S) is a coveted distinction and its president is usually one of the great scientists of the day

The Royal Society of Edinburgh fulfils a like purpose in Scotland It was founded in 1739 Its headquarters are at 22 George Street, Edinburgh, and its members are known as F R S E or F R S (Edin)

Royat Inland watering place of France It is near Clermont-Ferrand in the Puy-de-Dôme district, and stands high amid the mountains Its waters, known to the Romans, are arsenical, chalybeate and alkaline

Royston Urban district and market town of Hertfordshire It is 12 m from Hitchin, on the L N E Rly Its church belonged to an Augustinian priory James I had a palace here, and near the town a hermit's cave was found in 1742 Pop (1931) 3831

Royston Urban district of Yorkshire It is 4 m from Barnsley, on the L M S Rly The main industries are coal and steel Pop (1931) 7156

Royton Market town and urban district of Lancashire It is 3 m from Oldham, on the L M S Rly, and is a centre of the cotton manufacture Pop. (1931) 16,687

Ruabon Town of Denbighshire It is 5 m from Wrexham, on the G W Rly There are some manufactures and around are coal mines Pop 3386

Ruanda District of Africa It lies between Tanganyika and Ugan-da, and is governed by Belgium under mandate from the League of Nations Before 1919 it was part of German E Africa Nianza and Kigali are the chief places With Urundi its area is about 15,000 sq m, and the population is about 3,000,000

Rubber Elastic substance also known as caoutchouc It is derived from the milky latex of various tropical trees, the chief commercial kind, Para rubber, being from a species of *Hevea*, a euphorbiaceous genus Ceara rubber is derived from another genus, *Mamhoi*, while Assam rubber is chiefly the latex of *Ficus elastica* belonging to the *Moraceae*. Rubber chemically consists of a mixture of resins, hydrocarbons, water and other substances

Formerly S America was the chief source of rubber, but *Hevea* trees are cultivated now in immense plantations in Malaya, the E Indies, Ceylon and other countries The trees are tapped when about five years old by making incisions in the bark, the latex being collected in cups The crude rubber is formed into sheets or crepe for export, and its strength and elasticity are improved by vulcanisation Rubber enters in some form into most industries and, as ebonite, or vulcanite, has many uses in electrical, chemical and similar trades

Rubble Small undressed blocks of stone of various shapes and sizes used in masonry In rubble work for walls the stones in some cases are slightly dressed with the hammer and laid unevenly In many ancient walls the outer surfaces were of ashlar or dressed stone in proper courses, with the middle space filled with rubble

Rubefacients Group of medicinal substances When applied to the skin they cause a slight temporary congestion or dilatation of the superficial capillaries, producing a reddening effect They are used as a counter-irritant in inflammation of the deeper structures Among rubefacients in common use are mustard, turpentine, chloroform, pepper, hot fomentations and friction

Rubens Peter Paul Flemish artist. He was born at Siegen in Westphalia, June 29, 1577 His father was a citizen of Antwerp, and in that city the son settled when only ten years old His father being then dead, he lived with a family called Lalalng, and there began to study art He worked under several great painters, and spent some years in Venice, Rome, Milan and other Italian cities In 1608 he returned to Antwerp where he lived until his death May 30, 1640 Though primarily occupied in painting he found time to go on missions for the Dutch Government to Madrid, London and elsewhere

Rubens was the greatest painter of his day, and one of the greatest of all time He painted about 1250 pictures of which over 30 are in the National Gallery London The works in Antwerp, notably those in the cathedral, are perhaps his masterpieces

Rubicon Small river of Italy At one time it formed the boundary between Italy and Gaul In 49 B.C., Caesar

crossed it and so gave the signal for civil war, and to day the phrase "crossing the Rubicon" is used as a synonym for any decisive step

Rubinstein Anton Gregorovitch Russian musician Born Nov 28, 1829 in Bessarabia he studied music in Moscow Paris and Berlin As a boy he attracted the attention of Chopin and Liszt In 1858 the tsar appointed him court pianist, and in 1862 he founded a conservatoire of music in St. Petersburg This he conducted for some years, but he also found time for tours in England and the United States, where he became very popular He was in Russia when he died, Nov 20, 1894 Rubinstein wrote much music for the piano, as well as many operas He left some *Memoirs*

Rubric Order to the clergy about the conduct of services Originally rubrics were written or printed in the old service books in red, hence the name (Lat., *rubor*, red) In the English Book of Common Prayer the rubrics are usually printed in italics

Ruby Transparent variety of corundum coloured red by ferric oxide When pure in colour and flawless, the ruby comes next in value to the diamond, and is of greater value when of large size and of a bright carmine shade known as "pigeon's blood" The best rubies are found in crystalline limestone in Burma, also in gem gravels in Ceylon and Siam Many so-called rubies are garnets, spinels or tourmaline

Rudd (*Leuciscus chryrophthalmus*) Small freshwater fish It has red fins and eyes, and is known also as the red eye Like a roach in appearance, it is common in British rivers and usually weighs about 1 lb, but is seldom used for the table

Rudyard Lake of Staffordshire It is near Leek and is 2 m long, being the largest sheet of water in the Midlands It serves as a reservoir for the Trent and Mersey Canal The village of Rudyard is on the edge of the lake

Rue (*Ruta graveolens*) Perennial plant Of shrub like growth, it has small bluish-green leaves and clusters of yellowish flowers The leaves are bitter and contain an oil used for medicinal purposes Rue is also known as herb of grace

Ruff Small bird found in Europe and Asia At one time it was common in the marshy districts of England It is migratory, moving southwards to the Mediterranean region in the cold weather The ruff is about 12 in long and its plumage is mottled brown, grey and black In the breeding season the male grows tufts of feathers on both sides of the head and a broad ruff of feathers on the throat The female, called the reeve, lays its eggs in a nest of coarse grass placed among rushes

Ruffe (*Acerina cernua*) Small fresh water fish Allied to the perch, it is about 6 in in length, and has only one dorsal fin, its food consists of worms and insects It is also known as the pope

Rufford Abbey Seat of Lord Savile It is 2 m from Ollerton, Nottinghamshire, and occupies the site of a Cistercian abbey founded in 1118 When the monasteries were dissolved, the estate passed to the Talhots and then to the Savilles The first house was built about 1648, the present one is modern in the

Jacobean style The earlier one was the home of the Marquess of Halifax, who passed here the days of his retirement. In 1781 it came to the Earl of Scarborough, and in 1856 was bequeathed to John Savile, a natural son of the 8th Earl of Scarborough. He was made Baron Savile, and the abbey remained the residence of his successors in the title until 1932, when it was closed.

Rufiji River of Africa. It rises in Nyasaland and flows through Tanganyika to the sea opposite the island of Mafia. Its course is mainly N.E. and E., and parts of it are navigable. In July, 1915, the German cruiser *Königsberg* was destroyed in the river.

Rugby Borough and market town of Warwickshire. It stands on the Avon, 82 m from London and 30 from Birmingham, and is an important junction on the L.M.S. and L.N.E. Ry's. The chief buildings are the churches of Holy Trinity and St. Andrews and the hospital of St. Cross. The principal industry is engineering. Cattle and sheep fairs are held. Rugby was made a borough in 1932. At Hillmorton, nearby, the Post Office has a radio transmitting station with a world wide range.

Rugby School is one of the great English public schools. It was founded in 1567 by Lawrence Sheriff, and until the 19th century was a small grammar school. Its present site was bought in 1740, and in 1809 the existing buildings were begun. In 1827 Thomas Arnold became head master, and under his direction the school took a prominent place. The buildings now include a chapel, observatory, museum, library and laboratories. There is accommodation for about 600 boys. The school is governed by trustees and is divided into three blocks. There is a war memorial, part of which consists of scholarships for the sons of old boys who were killed. Rugby gives its name to a form of football and a form of fives, and the school has been immortalised in Thomas Hughes' story, *Tom Brown's School-days*.

Rugby Union Association controlling football as played according to Rugby rules. There is an association in each of the four countries, England, Scotland, Ireland and Wales, all of which are represented on an international board responsible for the rules. The English union was founded in 1871, and the others at later dates. The union, which is confined to amateurs, owns the ground at Twickenham, where its headquarters are.

Rugeley Urban district of Staffordshire. It is 124 m from London, on the L.M.S. Ry. The industries are agricultural, and near are coal mines. Pop (1931) 5263.

Rugen Island of the Baltic Sea. It belongs to Germany, and covers 373 sq m. Divided from Pomerania by the narrow strait of Strelasund, it is a summer holiday resort. The inhabitants are chiefly engaged in fishing and rearing cattle. Bergen is the capital. From 1648 to 1815, when it was ceded to Prussia, the island was a Swedish possession. Pop 49,000.

Ruhr River of Germany. A tributary of the Rhine, it flows through Rhenish Prussia to fall into the larger river at Ruhrort. It is 145 m long and the last 45 m of its course are canalised. It flows through a great industrial district in which are Essen and other iron and steel manufacturing centres.

In Jan 1923, as the Germans failed to pay the money agreed upon as reparations, the French occupied the Ruhr district. This led to trouble, as the German inhabitants refused to work. Though this difficulty was overcome, the French remained in the region until 1925. The British took no part in the occupation.

Ruislip District of Middlesex. It is 13 m to the N.W. of London, on the Metropolitan Ry. A residential area. Its population has greatly increased in recent years.

Rule Controlling principle or regulation. The term is found in the rules of a game or of a society. It is also used for the regulations (rules of court) that govern the procedure in a court of law. The regulation of a monastic order is known as its rule, *c.g.* the rule of St. Benedict.

The rule of the road consists of regulations laid down by convention or sometimes by law, to facilitate the movement of traffic. In Great Britain the rule for vehicles is to keep to the left and to pass a vehicle in front on the right. In France, Germany and other parts of Europe also in the United States, the rule is to keep to the right. Pedestrians in crowded streets should keep to the left.

At sea the rule of the road is for ships to pass port to port, port being the left-hand side. A red light shows the port side and a green the starboard. The jingo used by sailors is, "Green to green, or red to red, perfect safety, go ahead." Steamers give way to sailing ships. There is also a rule of the road for aircraft.

Rum Spirit distilled from diluted cane sugar molasses which have been fermented by the action of a yeast. Inferior grades are distilled from the skimmings of the pans, fresh cane juice, etc., and in France from beet molasses. It is coloured with caramel or by storing in sherry casks, and its aroma is increased by age. Jamaica, Demerara and Martinique are the chief centres of rum manufacture. A liqueur known as rum shrub is made from rum, sugar and lime juice.

Rum Island of Scotland. It is one of the Hebrides, and belongs to the county of Inverness. It covers 42 sq m. The soil is poor and the only inhabitants are a few crofters and fishermen. The mainland is 15 m away.

Rumania Kingdom of Europe. It occupies a piece of land between Ukraine, Poland, Hungary, Yugoslavia and Bulgaria, with a coastline on the Black Sea. It consists of Moldavia and Wallachia, the original Rumania to which, in 1918-19, were added Bessarabia, Bukovina and Transylvania. The surface is hilly in parts but mainly a plain. The rivers include the Sireth, Pruth, Jiu, Arges and Aluta, while the mouth of the Danube is here. The Danester forms the N. boundary. The area is 122,282 sq m. Pop (1930) 18,025,037.

The capital of Rumania is Bucharest, other places are Chishinau, Cernavita, Iasi and Galatz. Galatz, Braila and Constantza, are the chief ports. Agriculture is the main industry. Maize, wheat and barley are grown and there are large forest areas. Much oil is produced. Salt is a state monopoly, and there are coal mines. The country has a national bank, and uses the metric system of weights and measures. There is an army raised by compulsory service and a small

navy on the Black Sea. The people belong to the Greek Church, there being a national orthodox church of Rumania under two metropolitans.

Rumania is governed by a legislature of two houses. One is the chamber of deputies, the members being elected by all adults. The second chamber is the senate which consists of elected and life members, bishops and others. The executive is in the hands of a council of ministers under a premier.

In 1859 Moldavia and Wallachia, then part of Turkey, were united under a hospodar or lord. In 1861 he became Prince of Rumania and ruled as a vassal of Turkey until 1866, when Carol, a Hohenzollern prince, was chosen as ruler.

In 1878 Rumania became independent of Turkey, and in 1881 Carol took the title of king. He died in 1914 and was succeeded by his son, Ferdinand, during whose reign Rumania entered the Great War on the side of the Allies. In 1927 Ferdinand died, and his son Carol having renounced the succession a grandson Michael, became king. In 1930, however, Carol returned from his retirement and the legislature accepted him as king in place of his son Michael.

Rumelia Eastern District of Bulgaria. It lies along the valley of the Maritza. Philippopolis is the chief town and Burgas on the Black Sea the chief port. Long part of the Turkish Empire, it was united with Bulgaria in Sept. 1885. See BULGARIA.

Rumford Kennerley English singer. Born in London, Sept. 2 1870, he was educated at King's School, Canterbury. He studied singing in Paris and London and in 1897 first appeared in London. Possessing a beautiful bass voice, he was for the next 30 years one of the most popular singers in the country. In 1900 he married Clara Butt (q.v.).

Ruminant Type of ungulate mammals. They chew the cud and have the stomach divided into three portions. The unchewed food is passed into the paunch where it becomes macerated, it is then returned to the mouth for thorough mastication, and again swallowed for digestion in the second and third stomach chambers. Cattle, sheep, goats and deer are ruminants.

Runciman Walter English politician. He was born at St. Shields, Nov. 19 1870, the son of a wealthy shipowner, Sir Walter Runciman. After passing through Trinity College, Cambridge, he joined his father in business and between 1924 and 1929 held some of the chief positions in the shipping industry. In 1899 1900 he was Liberal M.P. for Oldham, and from 1902 18 for Dewsbury. In 1924 he was elected for Swansea West, and in 1929 and 1931 for the St. Ives division. In 1898 he married Miss Hilda Stevenson who was Liberal M.P. for St. Ives 1928 29.

In 1905 Runciman was made Parliamentary Secretary to the Board of Trade, and in 1907 Financial Secretary to the Treasury. From 1908 11 he was President of the Board of Education, from 1911 14 of the Board of Agriculture, and from 1914 16 of the Board of Trade. Although a free trader he expressed himself in favour of some kind of tariff reform during the economic crisis of 1929 31, and was one of the Liberals who broke away from the leadership of Lloyd George. In 1931 he took

office as President of the Board of Trade in the National Ministry, continuing in this office in June and Nov., 1935. He was largely responsible for the import duties imposed in 1932, and represented Great Britain at the Ottawa conference.

Runcorn Market town, urban district and river port of Cheshire. It is on the Mersey and the Manchester Ship Canal 16 m. from Liverpool and 28 from Manchester, on the L.M.S. Ry. Chemicals and soap are made, and for the shipping there are ample docks. A transporter bridge across the Mersey connects the town with Widnes. Pop. (1931) 18 158.

Rune Character in the old Scandinavian alphabet. This had at first 24 characters but was later reduced to 16. Having no curves they were well adapted for carving on stone and stone inscriptions. In Runic characters are still found one or two being on crosses in Great Britain. Runes were inscribed on bone and metal and on coins.

Runge Island in the Bay of Riga. It belongs to Estonia, and on it about 200 people are occupied in fishing and farming. For about 1000 years they and their ancestors have lived on communistic principles, there being no private property except clothing and personal belongings. Each farm consists of narrow strips scattered over the island. The community elects its own officials to see that the island customs are safeguarded.

Running Form of sport and exercise since very early times. The Greeks were perhaps the first to popularise it, when they included it among the contests at the Olympic Games. To day running is divided into the following classes:

- The sprint, or short distance, where the start is of paramount importance.
- Middle distances which require more endurance and running skill.
- Long distances, which may be anything from 3 m. and upwards, and where a high level of training and a sound knowledge of timing are essential.

Steeplechasing and cross-country relay and team racing are all popular varieties.

Runnymede Field near Egham Surrey. It is on the S. side of the Thames, 20 m. from London. Here in 1215 King John is believed to have signed Magna Carta, although the event may have taken place on Charter Island in the river. Magna Carta house has been built on the supposed site. The field or mead, is the property of the National Trust.

Rupee Monetary unit of India. It is a silver coin worth normally 1s. 6d. in English money. It is divided into 16 annas. It also circulates in Ceylon, British E. Africa and Mauritius.

Rupert German prince and English soldier. A son of the elector palatine Frederick V. and Elizabeth, daughter of James I., he was a nephew of Charles I. He was born at Prague, Dec. 17, 1619, and when little more than a boy became a soldier. In 1642 he came to England to assist Charles, and made a reputation as a cavalry leader, the impetuous charges of his men being very successful until Cromwell organised his force.

In 1648 Rupert went to sea in command of the fleet, and did good service in this capacity until defeated by Blake off Málaga in 1650. He returned to England in 1660 and, a man

of considerable gifts, left his mark in two spheres of activity. He had something to do with the colonisation of the great area named after him, Rupertsland, and he introduced into England the mezzotint process of engraving. He died Nov. 29, 1682.

Rupert's Land Old name for the part of Canada that lies around Hudson Bay, and is now known as part of the N.W. Territories. It was long the property of the Hudson Bay Company, but was sold in 1867, and is now divided between the N.W. Territories and the provinces of Ontario, Manitoba and Quebec. The Anglican Church in Canada calls one of its heads the Archbishop of Rupert's Land.

Rupprecht Prince Until 1918, crown prince of Bavaria. Owing to his descent from Charles I, he is regarded by legitimists (*qv*) as the rightful king of England. In the Great War he commanded an army on the western front.

Rupture Term used in two senses by medical men. In one it is another name for hernia, or the protrusion of a part of the body through an abnormal opening. See HERNIA.

The other rupture is a breaking or a bursting, as the rupture of a blood vessel.

Rural Dean Clerical official in the Church of England. Rural deans existed in the Christian church in early times, but disappeared during the Middle Ages. Their duties were to assist the bishops. In the Church of England they were revived in the 19th century. Each diocese is now divided into rural deaneries. Rural deans assist the bishops in pastoral matters, leaving business affairs to the archdeacons.

Rush Genus of plants, mainly porenials. The botanical name is *Juncus*. Rushes grow in temperate and cold climates and in wet and sandy soil, and are distinguished by their long, straight, smooth stems. They bear small flowers in clusters, and the stems are either hollow or filled with a white pith. Rushes were long used for lighting purposes. To-day they are gathered chiefly for plaiting into mats and similar articles.

Rushden Urban district of Northamptonshire. It is 66 m. from London and 4 from Wellingborough, on the L.M.S. Rly. The main industry is the manufacture of boots and shoes. Pop. (1931) 14,247.

Ruskin John English art critic and author. He was born in London, Feb. 8, 1819, and educated at Oxford, winning the Newdigate Prize in 1839. His autobiography, *Præterita*, tells the story of his early days. From 1869-79 he was Slade Professor of Art in Oxford. *Modern Painters*, begun in 1840, is an elaborate treatise on the principles of art which excited much controversy, but Ruskin's opinions ultimately prevailed. In the region of political economy and social reform he was equally a force, and there is no doubt that his ideas (set forth in *Unto This Last* (1862), *Munera Pulveris* (1872) and *Fors Clavigera* (1871-84), a series of letters to the working men and labourers of Great Britain) helped to mould the changing political doctrines of his time. His collected works fill 39 volumes and treat not only of art and political economy, but also of Greek myths, home industries, wayside flowers, and

so on. Among his outstanding books are *Seren Lamps of Architecture*, *Sesame and Lilies* and *The Stones of Venice*. He died Jan. 20, 1900. Ruskin College was founded in Oxford in 1899 to provide working class students with opportunities for the study of social science.

Russell Famous English family. It is descended from Henry Russell, who was MP for Weymouth in the 15th century. A descendant, John Russell, became a courtier. In 1539 he was made a baron, and about this time obtained much of the land taken from the monasteries, notably Covent Garden in London, and estates in Devon and Bedfordshire. Other estates including Chelms, came to him by marriage. In 1550 John was made Earl of Bedford and in 1694 a later earl was made a duke. This title is still held by the Russells, and branches of the family hold the titles of Earl Russell and Baron Amphil. See BEDFORD, DUKE OF.

Russell Earl English statesman John Russell, a son of the Duke of Bedford, was born Aug. 18, 1792, and entered Parliament at the age of 21, identifying himself with the parliamentary reform movement. The first Reform Bill of 1832 was the work of "Lord John" and four other members of the Liberal Government. He served in Lord Grey's ministry in 1830, and later was Home Secretary under Melbourne.

In 1836, after being converted to the support of the repeal of the Corn Laws, he succeeded Peel as Prime Minister of a Whig government. He was then Foreign Secretary in the coalition under Lord Aberdeen (1851). His had management of the Crimean War made him unpopular and he resigned, returning as Foreign Secretary under Palmerston in 1859. He was created Earl Russell in 1861, and was again Prime Minister in 1865. After his defeat in the same year, he lived in retirement at Richmond. His written works include recollections and studies of the members of the Russell family. He died May 28, 1878.

Russell Earl English scientist. Born at Monmouth, May 18, 1872, Bertrand Arthur William Russell was the younger son of Viscount Amberley and a grandson of the 1st Earl Russell. He went to Trinity College, Cambridge, where he became a Fellow and lecturer, but later he settled in London and devoted himself to social and political work. He married Dora, daughter of Sir F. W. Black, and in 1930 succeeded his brother in the title.

As a philosopher and mathematician Russell is in the first rank, though he is a destructive rather than a constructive thinker. In the sphere of mathematical philosophy, he is without a rival in Great Britain. He has written much on philosophy and also on social questions, his books including *Principles of Social Reconstruction*, *Mysticism and Logic*, *The Analysis of Matter*, *Roads to Freedom* and *Freedom and Organisation* 1914-1914 (1935). His shorter works include *The ABC of Relativity*, *Why I am not a Christian*, *Marriage and Morals*, and *The Conquest of Happiness*. Not unfairly, his ideas in all these fields may be described as revolutionary, while his fearlessness and honesty are unquestioned. A member of the Labour Party, he stood for Parliament, but failed to secure election.

Russell Lord William English politician. A younger son of the 1st Duke of Bedford, he was born Sept. 29,

1039 and studied at Cambridge. He entered the House of Commons in 1660, and later made himself conspicuous by his opposition to a proposal to exclude James II from the throne. In 1683 he was arrested for his share in the Rye House Plot (*q v*), and on July 21, 1683 he was beheaded for treason.

Russell of Killowen *Baron Irish lawyer* Born at Nowry, Nov. 10, 1832, Charles Russell was educated for the law and became a solicitor. In 1869 he became a barrister in England. He practised in Liverpool before settling in London. In 1880 he was elected M.P. for Dundalk, and in 1885 for St. Hackney. In 1886 he was appointed Attorney General in the Liberal Ministry and was knighted. He was again Attorney General in 1892-04 and had much to do with drafting the home rule bills. In 1894 he was made a Lord of Appeal and a life peer but almost immediately became Lord Chief Justice and received an hereditary peerage. He died Aug. 10, 1900 leaving five sons. The eldest, the 2nd baron, became a judge and later a Lord of Appeal. Russell was an ardent Roman Catholic and a great patron of the turf.

The greatest advocate of his day, Russell's great cases include his defence of Parnell before the commission and his defence of Mrs. Mavbrick. He was concerned in the arbitration about the Bering Sea fisheries and the Vancouver boundary and he presided at the trial of Dr. Jameson and his associates in 1896.

Russell *William Clark English novelist.* Born in New York Feb. 24, 1844, he wrote much for the papers, but is best known by his novels. *The Wreck of the Grosvenor* and *Lies the Landmen* may be mentioned. Russell died Nov. 8, 1911.

Russell *Sir William Howard English war correspondent* Born, Mar. 28, 1821, in Ireland, he was educated at Trinity College, Dublin. He joined the staff of *The Times* and in 1854 was sent out to the Crimea. There he made his reputation by his despatches, went next to India to describe the Mutiny and then to America for the Civil War. He represented his paper during the Austro-Prussian War of 1866 and the Franco-Prussian War of 1870-71. In 1879 he was in South Africa describing the campaign against the Zulus. Knighted in 1895, Russell died Feb. 10, 1907.

Russia *Country in Europe and Asia, the successor of the empire of Russia and now controlled by the Union of Socialist Soviet Republics.* Its area is 8,241,921 sq. m. It is divided into Russia proper or the Russian Socialist Federal Soviet Republic, and six other republics, namely: White Russia, Ukraine, Transcaucasia, Turkmenistan, Uzbekistan, and Tadjikistan. European Russia extends from the Arctic Ocean to the Caucasus and from Poland to the Urals. Asiatic Russia includes Siberia from the Urals to the Pacific, a vast district in central Asia, stretching eastward from the Caspian and some parts of Asia Minor. The population (1931) is estimated at 161,000,000.

Of this immense area Russia proper covers 7,620,717 sq. m. and contains 11 autonomous republics and 15 autonomous regions. In Ukraine is one autonomous republic, Moldavia. Moscow is the capital of the union and the largest city. The next largest are Leningrad, Harkoff, Baku, Kiev, Odessa, and Rostov.

The republic is governed by Soviets at the head of which is the all-Russian Congress of Soviets which consists of representatives of the

provincial congresses of Soviets and of the town Soviets. The executive authority is in the hands of a council of people's commissaries, each member being responsible for one of the departments of state. They are elected by the congress. The right of voting for the Soviets is granted to all over 18 years of age except employers, those who live on unearned incomes, priests, and certain others. These may, however, vote under special conditions. The church has been disestablished, but the exercise of their religion is permitted to all. Education is compulsory. There is an army called the Red Army, raised by universal service, a small navy and an air force.

Russia is an agricultural country and most of the people work on the land. The majority of the farms are under collective control, though a proportion still retain their peasant owners. Manufacturing industries have been started in some places and are worked on a very large scale in accordance with the five-year and other plans prepared by the rulers. They are controlled by trusts including the rubber trust, silk trust and others. The chief minerals produced are coal and oil. Foreign trade is a monopoly of the state and all imports and exports are strictly controlled.

The standard coin is called the chervonetz. It is valued at 7/30 to the £ sterling. The metric system of weights and measures is in force. The country has its own calendar: five days make a week, six weeks a month and twelve months a year. The extra days are kept as festivals to celebrate the revolution.

The Russian empire began as a collection of principalities with Moscow as its capital. The first to take the title of tsar was Ivan in 1547. Of his successors the greatest were Peter, who founded St. Petersburg which became the capital and introduced modern ideas into the country, and Catherine II. Catherine and her successors greatly extended the area of Russia, first in Europe and then by acquiring Siberia and other districts of Asia. In the Napoleonic age and later the country ranked as one of the Great Powers.

In spite of much unrest the empire of the tsars lasted until 1917. Disaffection with the sufferings caused by the Great War brought an end to a head, and in March, 1917, a socialist republic was established. This was replaced later in the year by the Bolshevik or Soviet régime in which Lenin (*q v*) and Trotsky were the dominant figures. Peace was made with Germany, and later certain parts of Russia became independent states, as Finland, Poland, Estonia, Latvia and Lithuania. The last tsar, Nicholas II, and his family, were murdered at Ekaterinburg, July 10, 1918, a few days after the adoption of the Soviet constitution. In Dec. 1922, a Union of Socialist Soviet Republics was set up comprising four republics—Russia, Ukraine, White Russia, and the Transcaucasian Federation—to which the Uzbek, Turkoman, and Tadjikistan republics were afterwards added. The constitution of the Union was ratified in 1924 and since then Russia had continued under the Soviet régime. When Lenin died in 1924 Stalin became leader of the Russian Communist Party and expelled his rival, Trotsky. Then in 1928 the Five-year Plan for industrial and social reconstruction was inaugurated and continued in 1933. In Sept. 1934, Russia entered the League of Nations and was given a permanent seat on the Council. Recently it has been suggested that parliaments be introduced within the Soviet Union.

Russo-Japanese War

War caused by the threat to Japan involved in Russia's ambition to become a naval power in the Pacific. It was begun by Japan, Feb. 8, 1904, with a successful attack on the Russian fleets at Chemulpo and Port Arthur. On April 1 an engagement on the Yalu River ended in a complete rout of the Russian force. In August the Russian fleet at Port Arthur and the Vladivostok squadron both suffered reverses. By October the Russian army under Kurovskii had been driven back on Mukden after four days continuous fighting. Jannary witnessed the handing over of Port Arthur to the Japanese and in March a decisive battle between the rival armies at Mukden resulted in the capture of that town, with heavy losses on both sides.

The Russian resistance was finally broken on May 27, when the remnant of her fleet under Rozhdestvensky was routed. Peace was signed, Sept. 5, 1905 at Portsmouth, U.S.A., when Russia secured surprisingly favourable terms. Russian casualties were estimated at 385,000 and Japanese at 167,000.

Russo-Turkish Wars

The war of 1827-9 was due to Sultan Mahmoud II's cruel treatment of insurgent Greeks, which united Britain, France and Russia against him. The fleets of the three powers destroyed the Turkish navy in the harbour of Navarino, 1827, and the victorious Russian army advanced as far as Adrianople, where the Sultan was forced to acknowledge by Treaty, 1829, the independence of the Greeks.

Another war arose in 1853 owing to the rejection by the Sultan of the claim made by Czar Nicholas I to be recognised as protector of the "Greek" Christians in Turkey. The Turks won a surprising victory at Olenitz, but their fleet was destroyed at Sinope. Turkey's Eastern allies were successful in the Crimea and by the Peace of Paris (1856) Russia was temporarily crippled.

Again in 1877 she declared war on the Porte, captured Plevna after a brilliant defence, and within sight of Constantinople dictated the terms of the Treaty of San Stefano (1878), which ended Turkish rule in Europe.

Rust Reddish-brown, hydrated oxide formed on iron in water or by exposure to moist air. The presence of carbonic acid in water or the atmosphere will promote the formation of rust, the carbonic acid possibly acting as a catalyst, or the action of rusting may be electrolytic in character. Experiments show that pure iron does not rust in pure water, even when oxygen is present. When rusting has once started the process continues as the oxide is hygroscopic.

Rustenburg Town of the Transvaal. It is 60 m. by river from Pretoria and the centre of an orange and tobacco-growing district. Behind the town are the Magaliesberg Mts. Pop. 1700 (whites).

Ruth Character in the Old Testament. She was a Moabitess and married a certain Mahlon, who, with his father and mother Elimelech and Naomi had come to Moab from Bethlehem. The two men died and Naomi and Ruth were left widows. Naomi went back to her own country and Ruth went with her. There she married a kinsman Boaz, and from the pair Jesse and David were descended.

The Book of Ruth is one of the shortest

but most moving in the Bible. It dates from the time of the Judges, but the author is unknown.

Ruthenes Word used for the Ukrainians found in Poland, Czechoslovakia and other parts of that region, especially Galicia and Bukovina. Before the Great War they were under Russian and Austro-Hungarian rule. They numbered about 4,000,000. The district in Czechoslovakia in which many of them live is called Ruthenia. It has a certain amount of self-government. The Ruthenes belong to a Uniate church in connection with Rome and are under an archbishop at Lemberg.

Rutherford Ernest Rutherford, Lord Nelson, New Zealand. Aug. 30, 1871, he studied at the University of New Zealand. He became Professor of Physics at McGill University, Montreal, in 1898, at Manchester, 1907, and Cambridge, 1919. His researches established the existence of radio-active transformations, the nuclear nature of the atom, and the electrical structure of matter. He was awarded the Nobel Prize for Chemistry in 1908, was knighted in 1914, awarded the O.M. in 1925 and created Baron Rutherford in 1931.

Rutherglen Burgh of Lanarkshire. It stands on the Clyde, 2 m. from Glasgow, on the L.M.S. Ry. The industries include the making of chemicals. It is the oldest royal burgh in Scotland, founded in 1126. Pop. (1931) 25,157.

Ruthin Borough and market town of Denbighshire. It is situated on the Clwyd, 215 m. from London and 8 from Denbigh on the L.M.S. Ry. The chief building is St. Peter's church, which has cloisters. The castle occupies the site of the one built by the English in the 13th century. Pop. (1931) 2912.

Ruthven Baron. Scottish title borne by the family of Hore-Ruthven. In 1488 Sir William Ruthven was made a Lord of Parliament. William, the 4th lord, who, in 1581 was made Earl of Gowrie, was responsible for the seizure of James VI., which is called the Raid of Ruthven. With some associates he took the young king to his castle at Ruthven and for a short time ruled the land in his name. Soon however, James was released and in 1584 Ruthven was executed for high treason. The title then became extinct, but in 1651 it was given to Sir Thomas Ruthven, from whom the present holder is descended.

Ruthwell Village of Dumfriesshire. At one time a burgh, it is 5 m. from Annan on the L.M.S. Ry. It is famous for its 7th-century cross, restored in 1802, on which are carvings of the crucifixion and, in runic letters, some verses of one of Caedmon's poems.

Rutland Smallest county of England. It covers only 152 sq. m., and is wholly inland. It is an agricultural area, fairly level, and famous as a hunting shire. Oakham is the county town. Uppingham is the only other place of importance. With the Stamford division of Lincolnshire it sends a member to Parliament. It is in the diocese of Peterborough. Pop. (1931) 17,397.

Rutland Duke of. English title borne by the family of Manners. Richard Plantagenet, the Duke of York, who was killed in 1461 was Earl of Rutland and through his daughter he was the ancestor of Thomas

Manners, who was made Earl of Rutland 1525. He received lands in Leicestershire and a later earl married Dorothy Vornen and obtained lands in Derbyshire. John, the 6th earl, was made Duke of Rutland in 1703.

Charles, the 4th duke, was Lord Lieutenant of Ireland under Pitt. John James Robert, the 7th duke (1818-1906) when Lord John Manners sat in the House of Commons for many years and was a member of the various Tory governments between 1851 and 1892. He died Aug. 4, 1906, and his son and then his grandson succeeded to the title. The duke's eldest son is called the Marquess of Granby. His seats are Bolvoir Castle in Leicestershire and Haddon Hall in Derbyshire.

Ruwenzori Range of mountains in East Africa. They are in Uganda, between Lakes Edward and Albert, and extend for about 70 m. The highest peaks rise about 16,000 ft. The range was discovered by H. M. Stanley and may be the Mountains of the Moon, mentioned in ancient fables.

Ruysdael Jakob van Dutch painter. He was born in Haarlem about 1628, and passed his life there except for a few years in Amsterdam. He died Mar. 14, 1682. Ruysdael's pictures are chiefly of rural scenes around his home. There are examples in the National Gallery, London.

Ruyter Michael Adriaanszoon, the Dutch seaman. Born at Flushing, Mar. 24, 1607, he became an officer in the Dutch service. In 1666 he was in command of the fleet that defeated the English ships off the North Foreland and sailed up the Thames and the Medway. In a fight off St. Elmy, against the French, he was wounded so seriously that he died at Syracuse, April 29, 1670.

Rydal Water Lake of Westmorland. It is only about half a mile long, but is very beautiful and can be reached from Windermere. At the east end is the little village of Rydal where are Rydal Hall and Rydal Falls. Rydal Mount, the home of Wordsworth from 1813 to 1850, is near the lake.

Ryde Borough and watering place of the Isle of Wight. A yachting centre. It is 10 m. from Newport, on the S. Rly., and is the chief port for visitors, having regular steamer services with Portsmouth, 4 m. away. Pop. (1931) 10,519.

Rye One of the five cereals. It will flourish on a poorer soil than any other cereal and is much grown as a food for cattle. The ears are also ground into flour and a bread called black bread is made from it. There are two kinds, summer rye and winter rye. The straw is suitable for thatching and for bedding. The world's production in 1931 was 185 million quarters, or about a third of the amount of wheat. This was chiefly produced in North America, although a good deal was grown in Russia, Germany and Poland. In Great Britain and Ireland only 27,000 acres were under rye in 1931. Rye grass is grown for permanent pasture. There are several species, but the best are the Italian kinds.

Rye Borough of Sussex. It stands on a hill above the Rother, about 2 m. from the coast and 72 from London, on the S. Rly. Formerly one of the Cinque Ports, Rye is a place of unusual interest. The Land Gate dates from the 14th century and St. Mary's church, a fine building, is older. The Ypres Tower, like the gate, is part of the old fortifications. The town has the remains of two monasteries. The Mermald Inn is notable. The sea has receded and consequently Rye is now of little consequence as a seaport, although in the Middle Ages it was one of the busiest in England. To-day an agricultural trade is done here and a new harbour has been built at the mouth of the Rother. Pop. (1931) 3,047.

Rye House House near Hoddesdon in Hertfordshire. Here, some discontented persons planned to murder Charles II. and his brother James as they were returning from Newmarket to London, in 1683. The plot failed, as warning was given. Some of the conspirators were taken and hanged. Lord William Russell and Algernon Sydney were also arrested, tried and beheaded, though their guilt was by no means proved.

Ryhope Watering place and market town of Durham. It stands on the coast, 3 m. from Sunderland, on the L.N.E. Rly. Pop. 11,600.

Rylands John English merchant. Born at St. Helens, Feb. 7, 1801, he joined his father and brother in a cotton manufacturing business at Wigan. The firm, Rylands & Sons, opened other departments and soon became one of the largest concerns in the textile trade. In 1847 John Rylands became head of the firm, which in 1873 was made a limited company. He died at Stretford Dec. 11, 1888, leaving no children, and his widow inherited a fortune of over £2,000,000.

In 1888 Mrs. Rylands bought for £250,000 the magnificent library of Earl Spencer at Althorp. To house it she erected in Deansgate, Manchester, a Gothic building. An endowment was also provided and the collection has been enriched by other books and manuscripts, making it one of the most valuable in the country. It is called the John Rylands Library.

Ryswick Village of the Netherlands. It is 2 m. from the Hague. Here, in 1697, was signed the treaty which ended the war between Great Britain, Austria, Spain and their allies on the one side and France on the other. France surrendered all the lands taken since 1679, except the city of Strasbourg and received back Nova Scotia and her possessions in India. William III. was recognised as King of England and James II. compelled to leave France. England, Spain and the Netherlands signed the treaty with France on Sept. 20, 1697, but the representatives of Austria did not sign until Oct. 30.

Ryton Urban district of Durham. It is on the Tyne, 6 m. from Newcastle on Tyne, on the L.N.E. Rly. The industries are coal mining and the making of iron and steel. Pop. (1931) 14,204.

SAAR River of Germany. It rises in Bavaria and flows past Halle to join the Elbe, after a course of 225 miles. About half of its course has been canalised. **Saar** River of Europe. It rises in the Vosges in Alsace and flows into Germany where, near Trèves, it joins the Moselle. It is 152 m long. Saarbrücken is on its banks. Much of it is navigable and the Saar Canal connects it with the Rhine-Marne canal.

The Saar basin is the name given to a district along the river's course in which are coal mines. Saarbrücken is the chief town therein and it covers 750 sq m. In 1919 the district, previously part of Germany, was placed under the League of Nations, and governed by a commission of five persons, but in 1934, according to the terms of the Treaty of Versailles, a plebiscite vote was taken, when a large majority voted for return to Germany.

Sabbath The seventh day of the Jewish week. Its observance as a day set apart for rest and sacred purposes became increasingly stringent in exilic and post-exilic times, till, by the time of Jesus, rigorous Sabbath-keeping, chiefly of a negative kind, was regarded as the supreme form of righteousness. See SUNDAY.

Sable Term used in heraldry for a black armorial colour or tincture on the surface or field of the escutcheon or shield, on which the various heraldic animals or objects are portrayed. It is represented in engraving or incised work by fine horizontal and vertical lines crossing one another.

Sable Island in the Atlantic Ocean. It lies off the coast of Nova Scotia, being 100 m from Cape Canso, and is 20 m long. It is, as the name suggests, little more than a sandbank and is very dangerous to navigators. In the island is a great lagoon. It has been planted with trees to make it more pronouncedly visible, and to blind the sand.

Sabre Form of heavy sword with one cutting edge and usually slightly curved towards the point, although the cavalry sabre of the British Army has a straight blade. The sabre is employed in fencing and duelling, also as a weapon for mounted troops.

Saccharin Extremely sweet synthetic compound prepared from toluene. A coal tar derivative, saccharin is a light crystalline powder slightly soluble in water. Chemically it is a benzoic sulphonimide and is 300 to 500 times sweeter than sugar. It is used as a sweetening agent in foods and instead of sugar in diabetic complaints.

Sacheverell Henry. English divine. Born in 1674 at Marlborough, he was educated at the grammar school there, and at Oxford. In 1709 he delivered two sermons which made him famous, railing against the Low Church attitude of the Government, for which act he was impeached. He became a popular hero, but was suspended from preaching for three years. In 1713, after a change of ministry, he was allowed to preach before the House of Commons at St. Margaret's, Westminster, and was given the rich living of St. Andrew's, Holborn. He died on June 5, 1724.

Sack Old name for a white wine used in the 16th century. Not unlike sherry, sack was often sweetened, flavoured with spices and mulled, this being probably the drink of Sir John Falstaff in *Henry V*. The word comes from the French, *sec*, dry.

Sackbut Musical instrument used in the Middle Ages. It was a wind instrument, not unlike a trumpet, and was made in sets. It was very popular, and later it was used by wandering singers and on the stage. It developed into the modern trombone. The sackbut of the Bible (Daniel III) was a stringed instrument, the Roman *sambuca*.

Sackville Famous English family. Richard Sackville was a Kentish landowner in the time of Henry VIII. He was made a knight, and his son, Thomas, was made Earl of Dorset in 1604 (see DORSET, EARL OF). In 1720 his successor was created a duke, but the title became extinct in 1843, when the Sackville estates, which included Knole, Sevenoaks, passed to a daughter of the 3rd duke. She married Earl de la Warr and their son, Mortimer Sackville-West, was created Baron Sackville in 1876. In 1928 Sir Charles John Sackville-West, a soldier, became the 4th baron.

Victoria Sackville-West, daughter of Lionel Edward, the 3rd baron (1867-1928) has made a name in literature. In 1927 she won the Hawthornden Prize with a poem, *The Land Shoo* is married to the Hon. Harold Nicolson. Lady Margaret Sackville, a daughter of the 7th Earl de la Warr, has also published several volumes of poems, including *Songs of Aphrodite*.

Sacrament (Latin *sacramentum*, an oath). In religion, and especially in Christianity, a sacred ceremony. There are, broadly speaking, two views of the sacrament. One, held by the Roman Catholic Church, the Greek Church, and the official Anglican Church, is that without the reception of certain sacraments the believer cannot attain salvation. They are the channels by which God, through the priest, confers His grace or authority upon men. The other view is that they are symbolic only, beneficial to the believer because of his belief in the realities of which they are the sign, but not essential to salvation. A sacrament is "the outward and visible sign of an inward and spiritual grace."

The Greek and Roman Churches recognise seven sacraments: baptism, confirmation, marriage, penance, ordination, the eucharist and extreme unction. The Anglican Church insists that only two of these are necessary for salvation, baptism and the holy communion.

Sacramento City of California, the capital of the state. It is on the Sacramento River, 88 m inland from San Francisco. The city has some manufactures and its other industries include railway shops and works for packing meat.

The Sacramento River rises in the north of the state and enters the Pacific Ocean about 50 m N of San Francisco. It is 600 m long and is navigable for nearly half of that course. Its first 200 m are known as the Pitt.

Sacrifice Offering to God, or to a god. Sacrifices form part of almost every religion and take the most varied forms. The offering must be that of a living thing,

and animal sacrifices were common among the Jews, Greeks and Romans, as well as among less cultured peoples. In many religions human beings were sacrificed and there are traces of this practice among the Jews, for instance in the thwarted slaying of Isaac by Abraham. Gradually it died out on any large scale, although there have been individual cases in recent years, and animal sacrifices persist among primitive peoples to day. The idea of human sacrifice passed from Jowish into Christian thought, and the voluntary death of Jesus Christ is regarded as the supreme sacrifice, by it the human race is redeemed from the consequences of sin. See ATONEMENT.

The Sacrifice of the Mass is a term used by Roman Catholics who believe that every Mass is, in a sense, a repetition of Christ's sacrifice on Calvary, a doctrine which has been repudiated in its exact form, by the Anglican Church, and has never been held by the Greek Church.

Sacrilege In English law theft from a church. The term is also used for the act of alienating property left for church purposes. In the former sense it is a felony to break into a church or other place of divine worship, and can be punished as such.

Saddleback Mountain of Cumberland. It is 4 m from Keswick and reaches a height of 2850 ft. It is sometimes called Blencathra.

Saddleworth Market town and urban district of Yorkshire (W.R.). It stands on the Tame, 12 m from Manchester, by the L.M.S. Ry. A canal passes the town. The chief industry is the manufacture of woollen goods. Pop. (1931) 12,577.

Sadducees Jewish sect. The name is taken from that of the high priest Zadok, and the sect appeared about 200 B.C. They were originally priests who regarded themselves as superior to other priests but after a time they became known by their religious opinions which differed from those of the Jews in general. As stated in the gospels they did not believe in the resurrection of the dead or in the existence of spirits. They opposed the teaching of the Pharisees, believing that the law did not require explanation and interpretation. Little was heard of them after the destruction of Jerusalem.

Sadler's Wells Name of a London theatre. It is in Rosebery Avenue, Islington near a well that in the 18th century was a fashionable spa. It was discovered by a man named Sadler who built a music hall here. When this was pulled down a theatre was built on the site. Dating from 1765, this became very famous in the 19th century, especially when Samuel Phillips presented Shakespearean plays here. After his time it became a music hall and then a cinema. In 1922 it was decided to rebuild Sadler's Wells and to make it a centre of drama. Money was subscribed and in 1931 it was opened under the same management as the Old Vic near Waterloo Station. In 1932 the Carnegie Trust made a grant to help its finances.

Sadowa Village of Czechoslovakia. It is near the Elbo 74 m from Prague. Here on July 3, 1866, the Prussian army gained a great victory over the Austrians and so ended the war between the two countries. The victory was partly due to the use of the needle gun by the Prussians. The Austrians lost about 10,000 men, about 200,000 were on

gaged on each side. The Germans call the battle Königgrätz, after a town 4 m away.

Safe Special form of chest or chamber against fire and burglary. A safe is made of sheet iron or steel, and in the modern types, of which there are many, the space between the cast steel walls may be filled with insulating material in which steel rods are embedded. The doors, especially in safe deposits and banks, are massive, and time or combination locks control the bolts.

Safeguarding Word used for the protection of industry against foreign competition, especially competition that is regarded as unfair. In Great Britain the first duties of this kind were introduced in 1921, a duty of 33½ per cent. being placed on gloves, optical and other glass, and on articles made in Germany. In 1925 the principle was extended. An import duty of 33½ per cent was placed on lace, gloves, cutlery and other articles. It was decided that any industry injured by unfair foreign competition could apply to the Board of Trade for safeguarding, and if on enquiry the case was proved, a duty would be imposed. This held good for several classes of articles. The duties were imposed for 5 years, so some of them expired in 1930 and were never renewed. In 1932 on the adoption of a general scheme of protection, safeguarding duties were no longer necessary.

Safety First Movement for reduction of the number of accidents on the roads and in industrial life. It is directed by the National Safety First Association, 52 Grosvenor Gardens, London, S.W.1, which was founded in 1924. This seeks in various ways to instruct people in methods by which accidents may be avoided, for instance by issuing literature and holding competitions. It has a Safety First Institute for children, and carries on propaganda in factories and schools.

Safety Lamp Special form of lamp used in mines for safety against the inflammable fire damp or methane gas which tends to accumulate in the workings. Both George Stephenson and Sir Humphrey Davy invented safety lamps, and the Davy lamp in improved form is used in modern mines. The lamp has a hollow cylinder of glass below and gauze above surrounding the flame thus allowing the fire damp to pass through and burn without exploding.

Safety Valve Form of valve fitted to a steam boiler or vessel holding gases or liquids under pressure to relieve the pressure when too great for safety. Suitable for low pressure in its simplest form, the valve consists of a circular hinged metal plate with a rim of leather which is pressed down over the opening by a weight. Where pressure is greater, as in marine boilers and locomotives, the valve may be regulated by a spring acting sometimes through a lever.

Safflower Herb, the flowers of which are much used as a dye. It belongs to the order *Compositae* and is found in Europe, Asia and Africa. It bears oval leaves and groups of orange coloured flowers. The dye, obtained from the flowers, is much used in the East for dyeing silk, the shades produced ranging from pink to scarlet.

Saffron Perennial herb. Its botanical name is *Crocus sativus*, and it grows in Europe and Asia. The leaves are narrow somewhat like grass and the flowers

are purple. The root is a corm rather larger than that of the garden crocus. From the herb a substance is obtained which is used in medicine and cooking. It is aromatic, but bitter, and is suitable for flavourings.

Saffron Walden Borough and market town of Essex. It is 44 m from London by the L N E Ry. The name comes from the saffron crocus which formerly grew around the town. Pop (1931) 5930.

Saga Icelandic word meaning "to say," and used for a story in prose. Sagas may be either historical or mythical, but many contain both elements. The best were written between 1000 and 1300. Some deal with the deeds of the heroes of Iceland, including their adventures at sea, and give a good picture of the life in the island as it was at that time. It is from these sagas that we obtain our information about the earliest voyages to America. Other sagas deal with the deeds of the gods and heroes and are purely legendary, e.g., the story of the *Volsungs*.

Sage Herb much used in cookery. It grows to a height of about a foot, and bears purple flowers and oblong leaves. Dried or crushed and packed in air-tight bottles, it is much used as a flavouring in cookery.

Sago Farinaceous foodstuff prepared from the starch of the pith of several species of palms of the genus *Metroxylon* growing in Malaya and the Dutch East Indies. The soft fibrous pith is removed and beaten in water to separate the starch, which settles and is dried and granulated to form pearl sago.

Saguenay River of Quebec. It rises in Lake St John and falls into the St Lawrence at Tadoussac. It passes by Chlococtim and is navigable from Ha Ha Bay, a pleasure resort on its banks. The river proper is 120 m long but with its head stream, the Poribonka, is 400 m long.

Sahara Desert of Africa, the largest in the world. It stretches from the Atlantic Ocean to the Red Sea and southwards from Morocco, Tunisia and Algeria into the heart of Africa. It covers 3,500,000 sq m, and is mainly French territory. There are a number of oases in the desert, which is crossed by caravan routes. It takes a caravan of camels three months to make the journey by the most direct route. The least known part is the district that is in the east called the Libyan desert, where, during the 20th century, a good deal of exploration work has been done.

It is believed that the desert in the past was far less waterless and sterile than it is to-day. It contains lofty mountain ranges and deep valleys through which at one time rivers ran. Plans for crossing it by a railway line have been prepared and another proposal is to irrigate great portions.

Sainfoin Leguminous plant. It has long leaves and pink flowers. The seeds are borne singly in pods. It is grown in the warmer parts of England and in France for grazing purposes and also for hay.

Saint Holy person, one who has been consecrated to the divine service. More exactly it refers to persons who have been canonised by the Christian Church and are recorded as saints in its calendar. The Church of Rome has some thousands of saints, and from time to time fresh names, e.g., Joan of Arc in 1920 and Albertus Magnus in 1932, are added. The Church of England has re-

tained only some of these. 73 have days given to them in the Prayer Book. The Roman Church permits the invocation of saints. In the Church of England certain saint days are observed by special reference in the service to the saint, and by the provision of a special collect, epistle and gospel.

Churches are frequently dedicated to a particular saint or group of saints. Christian countries and societies, as well as professions and charities, have each their patron saint. S. George, S. Andrew, S. Patrick, and S. David, are respectively the patron saints of England, Scotland, Ireland, and Wales, and their days are respectively, April 23, November 30, March 17, and March 1. S. Luke is the patron saint of the medical profession, S. Dunstan the patron saint of the blind.

The greatest book of reference concerning saints is the *Acta Sanctorum* of the Bollandists.

St. Abb's Head Headland of Berwickshire. It is 4 m from Eyemouth, and is 300 ft. high, upon it stands a lighthouse. The village of St. Abbs, a small watering place, is 2½ m to the south-east.

St. Agnes Seaport and town of Cornwall. It is 9 m from Truro, on the G W Ry. Near the town are St. Agnes Head and St. Agnes Beacon.

One of the Scilly Islands is called St. Agnes.

St. Albans City and market town of Hertfordshire. It stands on the little River Ver, 21 m from London, and is reached by the L M S and L N E Rlys. The cathedral is a fine cruciform church restored in 1856 and once an abbey. Notable features are the Norman tower, the Gothic nave, the longest in England, and the shrine of S. Alban. In St. Michael's is the tomb of Francis Bacon. The industries include brewing and printing.

St. Albans occupies the site of the Roman city of Verulamium, and excavations have revealed extensive Roman remains, including the forum and a theatre and a system of central heating. The abbey was founded in memory of S. Alban in 793, and in 1875 its church became the cathedral of a new diocese. Pop (1931) 28,625.

During the Wars of the Roses, two battles were fought at St. Albans. On May 22, 1455, the Yorkists defeated the Lancastrians, and made Henry VI prisoner, and on February 17, 1461, the Yorkists were beaten here.

The title of Duke of St. Albans has been borne by the family of Beaulieu since 1684. The first duke was a son of Charles II and Nell Gwynn. The duke's eldest son is the Earl of Burford.

St. Aldwyn Earl. English statesman. Michael Edward Hicks-Beach was born Oct. 23, 1837, and educated at Eton and Christ Church, Oxford. In 1854 he became a baronet, succeeding his father. In 1864 he was elected M.P. for East Gloucestershire and he remained in the House of Commons until made a viscount in 1906.

A Conservative, he held office in 1868, from 1874-78 he was Chief Secretary for Ireland and from 1878 to 1880 Colonial Secretary. In 1885 he was Chancellor of the Exchequer, and in 1886-87 Chief Secretary for Ireland. In 1888, after a short retirement, he was made President of the Board of Trade. He left office in 1892, returning in 1895, and was Chancellor of the Exchequer until 1902, when he resigned on account of his free trade views. In 1915 he was made an earl, and died April 30, 1916. A

grandson succeeded to the earldom. Lord St Aldwyn's *Life* was published in 1932.

St Andrews Burgh and watering place of Fifeshire. It stands on a bay, an opening of the North Sea, and is one of the most picturesque places in Scotland. It is 12 m from Dundee and is reached by the L N Rly. There are ruins of the castle and the cathedral, both closely associated with the history of Scotland and the names of Knox, Beaton and others. The Martyrs' Memorial, to the honour of the Protestant martyrs of the Reformation period, stands on a cliff over looking the sea.

The University of St Andrews dates from 1411. University College, Dundee, is part of the university.

St Andrews is the headquarters of the Royal and Ancient Golf Club, the controlling body of the game. It was founded in 1754 and has four links. The burgh is named after St Andrew whose bones are said to have been brought here in the 7th century. In the 9th century it was made a bishopric and until 1683 its archbishop was Primate of Scotland. Pop (1931) 8269.

St Anne's-on-Sea Watering place of Lancashire. It stands on the estuary of the Ribbles, 4 m from Blackpool, and is part of the urban district of Lytham (qv). St Anne's is on the L M S Rly and possesses golf links and other attractions for visitors.

St Asaph City and market town of Flintshire, 5 m from Denbigh, on the L M S Rly. The cathedral dates from the 15th century and was restored in the 19th. The city has an agricultural trade. Near here the rivers Clwyd and Elwy unite, the latter is crossed by an old bridge. The Welsh name of the city is Llanelwyr. Pop 1833.

St Austell Urban district and market town of Cornwall. It is 14 m from Truro on the G W Rly. St Austell is a centre for the mining of china clay, tin is also worked. Pop (1931) 8295.

St Bartholomew's Day Festival of St Bartholomew, Aug 24. On it in 1572 a number of Huguenots were massacred in France. The occasion was the marriage of Henry, King of Navarre, with Marguerite, sister of King Charles IX. Feeling between the adherents of the two faiths, Roman Catholic and Protestant, was very bitter, and it did not need much to create a riot. This began on the wedding day and continued until October. It is believed that it was an organised attempt, favoured by the queen mother, Catherine de Medici, to crush the Huguenots, of whom perhaps 30,000 were killed. Pope Gregory XIII celebrated the event by issuing a medal.

St Bees Seaside resort of Cumberland, 4 m from Whitehaven, on the L M S Rly. Near is the promontory called St Bees Head. Pop (1931) 950.

St Bernard Name of two passes over the Alps. The Great St Bernard goes from Valais in Switzerland into Italy. It is over 8000 ft. high, and was used by the Romans. The pass is known for its monastery, or hospice, founded in the 10th century and famed for sheltering travellers and for succouring by aid of its dogs, those lost in the snow. Here is a museum.

The Little St Bernard crosses the Graian Alps. It is 7000 ft high and was also used by the Romans. On it is a hospice and an observatory.

St. Bernard Breed of dog. It is a kind of mastiff, but possesses individual points, especially an exceptional intelligence. The dogs are distinguished for their great size, hanging lips and large ears. They are kept at the St Bernard hospice for finding lost travellers and also by private persons as pets.

St. Boniface City of Manitoba. It stands on the east side of the Red River at its junction with the Assiniboine. Winnipeg is on the other side. The city is served by the C P and C N Rlys, and its industries are the same as those of Winnipeg. Pop (1931) 16,305.

St Brelade Village of Jersey. On St Brelade's Bay, on the west side of the island, it is a small watering place.

St Christopher Name for the island of the West Indies, also known as St. Kitt's (qv).

St. Cloud Town of France. It is on the Seine, just outside Paris, and can be reached by steamer, as well as by rail. It is noted chiefly for its palace and its porcelain. The palace was built about 1600 and at one time Napoleon lived there, as did several of the kings. It was damaged by the Germans in 1871 and later was pulled down. The park is a popular pleasure resort. The porcelain, known as St Cloud, was made here from 1697 to 1773 in a factory belonging to the kings.

The Ordinances of St. Cloud, issued by Charles X in July, 1830, abolished many of the liberties of the people and so were responsible for the Revolution and the king's abdication.

St Cyr Village of France. It is 13 m from Paris and is famous because here is the college for training officers for the French army, the equivalent to Sandhurst. Originally it was a school founded by Madame de Maintenon for girls of good birth who had fallen on evil times. Napoleon converted the building in 1806 to its present purpose.

St. Davids City of Pembrokeshire. It is 15 m from Haverfordwest and is reached by motor coach. About a mile from the coast and near St David's Head, it is the most westerly point of Wales and is famous for its cathedral, restored in the 19th century. There has been a bishop of St. Davids since about 600. Near the cathedral are the ruins of the bishop's palace and of a college.

St Denis Town of France. It stands on the Seine 4 m from Paris, and is famous for its church. St Denis, the patron saint of France, was buried here and near his tomb a monastery and a church were built. In the church some of the early Frankish kings were buried. A large and magnificent building, it was restored in the 19th century. The town has a number of manufactures and a considerable trade along the river. Pop (1931) 82,412.

St Dunstons Institution or hostel for the blind. It was founded by Sir Arthur Pearson for soldiers blinded in the war and its home is a fine house in Regent's Park called St Dunstan's Lodge. In addition to the teaching of Braille, trades of all kinds are taught and various social and other activities organised. The hostel has a holiday home at North Berwick.

Sainte-Beuve Charles Augustin. French writer. He was born at Boulogne, Dec. 23, 1804, studied

medicino in Paris, after an early education at Boulogne, and soon began to write. In 1840 he was made librarian of the Mazarin Library in Paris, and in 1845 was elected to the Academy. From 1848 to 1851 he was an exile in Liège, after which he was professor at the Collège de France and the École Normale in Paris. In 1866 he was elected to the senate, and he died Oct. 13, 1869.

Sainte-Benve is best known for his literary criticisms. They have been collected into several volumes, *Causeries du Lundi*, *Nouveaux Lundis*, *Premiers Lundis*, etc., the names being due to the fact that they were first contributed to periodicals that appeared on Monday. He also wrote a valuable *Histoire de Port Royal*, a novel, *Volupté*, as well as *Critiques et Portraits Littéraires*, and many other volumes.

St. Elias Mountain of Alaska. It is near the frontier of Canada and is one of the loftiest peaks in North America, its height being 13,000 ft. On it is a glacier covering 1200 sq. m.

St. Elmo's Fire Silent electrical discharge between the atmosphere and such structures as masts of ships, flagstaves and trees. It is accompanied by a pale brush-shaped light, and is seen sometimes at night during thunder or stormy weather. This phenomenon is known also as *corposant*, or fire of St. Elias.

St. Eloi Village of Belgium. It is 2 m. from Ypres and was the scene of constant fighting during the Great War. An attack was delivered here by the Germans on March 14, 1915, at the close of the battle of Neuve Chapelle. They took some ground, but most of this was recovered by the British. In March, 1916, the British attacked here, and there was some determined fighting. The British, however, kept the village until the end of the war.

St. Etienne Town of France. It is 36 m. from Lyons by railway. Of modern growth, it is a great manufacturing centre, making not only textile goods, but also iron and steel products. During the Great War its output of munitions was immense. Pop. (1931) 191,088.

St. Gall City of Switzerland. It is 52 m. from Zurich and 9 m. from the Lake Constance. It is famous for its Benedictine monastery founded by St. Gall, which was a great centre of learning in the 8th and 9th centuries. Its church was restored in the 18th century and is now a cathedral. The abbey library possesses some of the most valuable manuscripts in the world. The city has some manufactures and is the capital of the canton of St. Gall. Pop. (1931) 63,947.

St. Gaudens Augustus Amoriön sculptor. Born in Dublin March 1, 1848, of French and Irish parentage, he was brought up in New York. There and in Paris he studied art and soon made a name by his works. These include a bust of R. L. Stevenson and a statue of Lincoln, a copy of which is near the Houses of Parliament at Westminster. He died Aug. 3, 1907.

St. George's Channel Opening of the Atlantic Ocean. It extends for about 100 m. between Ireland and Wales and is connected to the north with the Irish Sea. It varies in breadth from 50 to 90 m.

St. Germain Treaty of Treaty which concluded the war between the Allied Powers and Austria. It was

signed at St. Germain-en-Laye, Sept. 10, 1919, and ratifications were exchanged July 16, 1920. It established the frontiers of Austria, including German Tyrol, South of the Brenner in Italy, and of German Bohemia in Czechoslovakia. Allowances were made for the protection of minorities, but Austria had to renounce all claims in Egypt, China, Morocco, and Spain. All armed forces were limited, and reparations were imposed.

St. Germans Market town of Cornwall. Nine miles from Plymouth, on the G.W. Rly. It stands on the opening of Plymouth Sound called Lynher Creek or the St. Germans River. The parish church is a beautiful old building, partly Norman.

The title of Earl of St. Germans has been borne by the family of Eliot since 1815. Port Eliot, near St. Germans, is the family seat, and the earl's eldest son is named Lord Eliot.

St. Gotthard Pass over the Alps. It leads from Switzerland into Italy and beneath it is one of the most famous tunnels in the world. The pass itself is just under 7,000 ft. in height and was used in the 6th century or earlier. In the 19th century it was made a carriage road, and later (1872-82) a railway was built across it from Lucerne to Milan. It reaches a height of nearly 4,000 ft. and has 80 tunnels. The chief tunnel is over 9 m. long. There is a hospice at the summit of the pass which has been at least twice rebuilt. It existed in 1330 or earlier.

St. Gregory the Great

Order of Papal order. It dates from 1831 and is given for services to the church, both in a civil and military capacity. The badge is a Maltese cross bearing in the centre a golden bust of St. Gregory on a blue field. The ribbon is red with a yellow border.

St. Helena Island in the Atlantic Ocean. It is a British possession and is 1140 m. from the coast of Africa and 4477 m. from Southampton. The nearest land is Ascension Island, 760 m. to the north-west. The island is 10 m. long, covers 47 sq. m. and is partly mountainous. Cedar and other trees grow freely and New Zealand flax is cultivated here. Jamestown on St. James Bay is the capital, and the island is under a governor. It is a coaling station and a cable station.

In 1502 the island was discovered by a Portuguese sailor on St. Helena's day, and some Portuguese were its first inhabitants. For a time a Dutch possession, in 1651 it was taken by the English East India Company, which introduced slaves and cultivated the soil. The company handed it over to the British Government in 1834. From 1815 to 1821 it was Napoleon's prison, Longwood being his residence. In 1900-02 Boer prisoners were kept here and there was a garrison on the island until 1906. Before the opening of the Suez Canal it was an important place of call for ships. Pop. (1930) 3905.

St. Helens County borough and market town of Lancashire. It is situated on a tributary of the Mersey, 14 m. from Liverpool, on the L.N.E. and L.M.S. Rlys. It is also connected with other centres by a canal. The town's chief industry is the manufacture of glass, but there are also chemical works, pottery works and iron foundries. In the neighbourhood are collieries. Pop. (1931) 106,793.

St Helen's Urban district and watering place of the Isle of Wight. It is on the north-east coast of the island, 4 m from Ryde, on the S Ry. Pop (1931) 5478.

St Helier Seaport, market town and capital of Jersey. It is on a bay on the south side of the island and is a railway terminus. There is a good harbour improved since the Great War, and regular communication with Southampton (air and steamer), Weymouth, Cherbourg and other places. There is some fishing. Pop 26,314.

St Hyacinthe City of Quebec. It stands on the Yamaska River, 36 m from Montreal, and is served by both the C.P. and C.N. Ry's. There are some manufactures. Pop (1931) 13,446.

St. Ives Seaport, borough and market town of Cornwall. It stands on St Ives Bay, on the west side of the county 8 m from Ponzance, and is on the G.W. Ry. There is a harbour and the industries include fishing and some shipping. It is a famous resort for artists in the summer. Pop 6687.

St Ives Borough and market town of Huntingdonshire. It stands on the Ouse 3 m from Huntingdon, on the L.N.E. and L.M.S. Ry's. An object of interest is the picturesque chapel on the old bridge across the river. There is an agricultural trade and large cattle markets. Pop (1931) 2664.

St James's Palace Royal palace in London. It occupies the site of a leper hospital dedicated to St James the Less and became royal property in the time of Henry VIII who built a palace here. In the 17th century it became the chief London residence of the sovereign and so it remained until the time of George III when it was replaced by Buckingham Palace. It is now used for levees and in it certain officials of the royal household live. Part of it forms York House the residence of King Edward VIII when Prince of Wales. The chapel royal the gateway and the presence chamber date from the time of Henry VIII the rest is more recent.

St James's Park, once the park of the palace, extends from Whitehall to Buckingham Palace and is flanked by the Mall and Birdcage Walk. It covers 63 acres and in it is an ornamental lake. It was laid out by Charles II and is now open to the public.

St John Seaport and capital of county in New Brunswick, Canada, at the mouth of the St John River on the Bay of Fundy. A terminus of the C.P. and C.N. Ry's, it shares with Halifax the Atlantic trade during the winter, and is an important distributing centre. Pop (1931) 69,093.

The St John River has a branch rising in Maine, U.S.A., and another in Quebec province. It is navigable for large steamers for 80 m and for small ones for 220 m.

St John of Jerusalem, Order of Charitable religious order. It was founded in Jerusalem about 1048, for the relief of Christian pilgrims to the Holy Land, and now helps to carry on the work of the St John Ambulance Association. Its distinctions are conferred in recognition of services in the cause of humanity throughout the British Empire.

St Johns Capital and chief seaport of Newfoundland. It stands on the east coast of the island, 560 m from Halifax, and is the terminus of a railway line. There is a good harbour and from here ships go

regularly to Liverpool and elsewhere. Another industry is fishing and the city is the financial and administrative centre of the island. It was founded in 1682. Pop (1931) 42,646.

St John's Town of Quebec. It stands on the Richelieu River, 30 m from Montreal, and is served by the C.P.R. and C.N.R. and two American railways, as it is near the frontier of the U.S.A. It has a trade in agricultural produce and some manufactures. The name was formerly Dorchester. The French call it St Jean. Pop 7734.

St John's Wood District of London, once the property of St John's priory at Clerkenwell. It is to the north-west of the city in the borough of Marylebone on the Metropolitan Ry. Here is Lord's cricket ground.

St John's Wort Perennial evergreen plant (*Hypericum Perforatum*) one or two feet in height with branching stems and clusters of large yellow flowers. It thrives in shady places and is easily propagated by planting rooted pieces in late summer.

St Just Market town and urban district of Cornwall. It is 7 m from Ponzance and is a centre of the mining industry. It is reached by the G.W. Ry and by motor omnibus from Ponzance. The town possesses a round, or theatre, in which morality plays were produced. Pop (1931) 4356.

St Kilda Island of the Hebrides. It is part of Inverness shire, holding 40 m to the west of North Uist, and the most westerly of all the islands. It is now uninhabited as in 1030, at their own request, the inhabitants were removed to the mainland. It covers about a square mile and is a great haunt of sea fowl.

St Kitts Island of the Leeward group, West Indies, also called St Christopher. It is 46 m from Antigua and covers 68 sq m. Basseterre is the capital and the chief seaport. Sugar is the staple product of the island. For purposes of government St Kitts ranks as part of the Leeward Islands. It was discovered by Columbus in 1493 and became British in 1713. Pop 17,978.

St Lawrence River and gulf of North America. The river issues from Lake Ontario where it contains the Thousand Islands, and flows past Montreal, Quebec and many other places to the Atlantic Ocean. During a large part of its course it is over a mile wide, near Anticosti it is 100 m wide. Its tributaries include the Rhinellen, Saguenay, Ottawa and Ontario. Its total length is nearly 2300 m.

The St Lawrence is one of the world's greatest waterways as canals have been cut to make it navigable by large vessels up to the head of Lake Superior. Ocean steamers can get as far as Montreal, but ice closes it in the winter months. In 1932 a treaty was signed between Canada and the U.S.A. to improve the channel between Kingston and Montreal so as to allow ocean vessels to reach the head of the Great Lakes. Development to involve the generation of some 5,000,000 h.p. of electric energy. In 1934 U.S.A. refused to proceed with the scheme.

The Gulf of St. Lawrence is 500 m across and covers 80,000 sq m. It is formed by the St Lawrence and begins at the strait of Belle Isle between Canada and Newfoundland. That strait, the Gut of Canso and Cabot Strait, connect it with the Atlantic.

St. Leger English horse race It was started in 1776 by Col St Leger of Parkhill, Doncaster, and is one of the great races It is run at Doncaster in September The course is just under two miles and the race is for three year old horses

St. Leonard's Forest District of Sussex It is a woodland area lying to the east of Horsham

St. Leonards-on-Sea Watering place of Sussex Part of the borough of Hastings, lying to the west of that town, it has a fine promenade and a pier See HASTINGS

Saint Louis City of Missouri On the Mississippi River, it is the fourth largest city in the States, and one of the finest Since 1790, when it was settled as a trading post, its growth has been steady, and it now boasts of fine federal buildings, wide open streets, a magnificent bridge and a university It has a large German population Its chief trades are meat packing, leather, tobacco and white lead Pop (1930) 821,960

St Louis is also the name of the capital of the French colony of Senegal, West Africa It is situated on an island 11 m above the mouth of the Senegal River It has an active trade with the countries around, but a barge trade is rendered difficult owing to a sandbar at the mouth of the river

St. Lucia One of the Windward Islands The largest of the group, it is 24 m south of Martinique and belongs to Great Britain Its area is 233 sq m, and its length 27 m Castries is the capital and the chief seaport The interior is mountainous, but there are fertile valleys in which sugar, coffee and spices are produced There are many forests and much timber is cut It is governed by an administrator who has the assistance of two small councils The island was discovered by Columbus in 1502 and having been alternately French and English, finally became a British possession in 1803 Pop (1931) 59,676

St. Malo Seaport and watering place of Brittany, France It stands on a peninsula opposite Dinard at the mouth of the Rance and is reached by steamer from Southampton and elsewhere The town walls, with their eight gates, still stand There is a casino and good sands, a good harbour and a considerable export trade Many of the inhabitants are fishermen A seawall, called the Sillon, connects St Malo with the mainland, and boats go regularly to Dinard and elsewhere Pop 13,000

St. Martin Island of the West Indies It is one of the Lesser Antilles and covers 37 sq m It is owned in part by France and in part by the Netherlands The northern portion, which is French, is governed from Guadeloupe, the Dutch portion from Curacao

St. Mary's Largest of the Solly Isles It lies about 27 m from Land's End and is reached by steamer from Penzance On it is Hugh Town, the capital of the island The objects of interest include Star Castle and remains of early man, including a prehistoric village There is a good harbour and the main industry is the growing of flowers and vegetables for the English market.

St. Mary's River of Canada. It flows from Lake Superior to Lake Huron and is 40 m long It is known for

its *sault* or rapids, about 1 m long To avoid these, two ship canals, the Sault Sainte Marie canals, have been cut See SAULT SAINTE MARIE

St. Mawes Seaport and watering place of Cornwall It stands on an opening of Falmouth Bay, 3 m from Falmouth The chief object of interest is the castle Fishing and catering for visitors in the summer are the principal industries It is reached by ferry from Falmouth

St. Michael and St George English order of knighthood It was founded in 1818 for persons from the Ionian Islands and other British possessions of the Mediterranean Later it became an order for those who have served the crown in the overseas parts of the British Empire Members are of three grades GCMG, or knight grand cross, KCMG or knight commander, CMG, or companion The badge is a white cross, with the figure of St Michael trampling on Satan in the centre On the other side is St George The motto is *aspiciam melioris aevi* (augury of a better age) The ribbon is blue with a crimson centre

St. Michael's Mount Islet in Mount's Bay, Cornwall It is 3 m from Penzance, and at low tide can be reached by a causeway. On the isle is a castle, a seat of Lord St Levan. Earlier there was a hermitage and then a Benedictine abbey here The castle stands on a rock 230 ft high and the isle is about a mile round.

St. Mihiel Town of France It stands on the Meuse 20 m from Verdun It was famous for its Benedictine abbey founded in the 8th century

The town was taken by the Germans in Sept 1914, and there was a good deal of fighting around it during the Great War

St. Moritz Pleasure resort of Switzerland It is in the Engadine, 27 m from Coire, and stands at a height of 6000 ft Its mineral springs attract invalids, but it is perhaps more famous for its winter sports, as here is the Cresta run

St. Nazaire Seaport of France It stands near the mouth of the Loire, is the port of Nantes and has an old and a new harbour, the latter being able to take the largest vessels There are dry docks and other accommodation for the shipping, which is chiefly with S America Pop 39,711.

St. Neots Urban district and market town of Huntingdonshire It is situated on the Great Ouse, 8 m from Huntingdon, on the L N E Rly Paper is made and there is an agricultural trade Pop (1931) 4314

St. Omer Town and river port of France. It is 42 m from Lille on the little River Aa and is also served by a canal that connects it with the sea The Church of Notre Dame was once a cathedral Haut Pont is a suburb inhabited by Flemings The town has some manufactures and there is a harbour for the shipping on the canal From Oct, 1914, to March, 1916, St Omer was the British headquarters in France Pop 18,858

St. Pancras Borough of the county of London It lies to the north-west of the city and includes the populous districts of Camden Town, Kentish Town and Somers Town, as well as part of Highgate In it are the great railway termini of Euston, St Pancras and King's Cross. University College is in the borough Pop. (1931) 198,113

St. Pancras Station, opened in 1871, was, until the amalgamation, the headquarters and London terminus of the Midland Rly. It now fulfils the same function for the LMS Rly.

St. Patrick Order of Irish order of knighthood. It was founded in 1788 and its rules were altered in 1905. It consists of 22 knights, who are distinguished as K P. The ribbon is sky blue and the motto, *quis separabit*, is surrounded by a wreath of shamrock.

St Paul City of Minnesota and the capital of the state. On the Mississippi and served by several lines of railway, it is an important railway junction and great distributing centre especially for cattle. Other industries are the manufacture of clothing and hardware, printing, meat packing etc. On the other side of the Mississippi is Minneapolis. Pop (1930) 271,006.

St. Paul's Cathedral Cathedral church of the diocese of London. It stands at the top of Ludgate Hill in the heart of the city, and is surrounded by streets with ecclesiastical associations, such as Amen Corner, Creed Lane and Paternoster Row. The present building is the third to occupy the site. The first was burned down in 1086 and the second in 1666 during the Great Fire. The third and present one was built between 1675 and 1710 from designs by Sir Christopher Wren. It is a Renaissance building, unlike any other English cathedral. Features of the building are the dome, the crypt in which many famous men are buried and the whispering gallery. It contains many naval, military and other memorials. The choir has stalls carved by Grinling Gibbons and is decorated with mosaics by Sir W. B. Richmond. The churchyard has been reduced in size, the existing part is a public garden and in it are the remains of an open air pulpit on the site formerly known as "Paul's Cross".

In 1913 grave anxiety was felt about the foundations of St Paul's, and a good deal of work was done to strengthen them. This proved inadequate, and in 1925 much of the building was closed for more extensive operations, which included the placing of a chain around the dome. The cathedral was reopened in 1930. The height to the top of the cross on the dome is 365 ft.

St Peter Port Town and watering place of Guernsey also the capital of the island. It is on the east coast and has a large harbour. There is a regular service from here to Southampton Weymouth, Cherbourg and elsewhere. Here are the royal court house and Hantoville House, once the residence of Victor Hugo and now a museum. Objects of interest include Castle Cornet on an islet in the harbour, and two old forts.

St. Peter's Church in Rome. It is the largest in the world and the chief shrine of Roman Catholicism. It was begun in the 15th century, on the site of a basilica erected by Constantine over the tomb of St. Peter. It was added to and decorated by Michelangelo and was finished in 1667. The interior is in the form of a cross, and a huge dome resting on four massive piers rises above the centre. Under the dome is the High Altar, where Mass is celebrated by the Pope.

St Quentin City of France. It stands on the Somme, 95 m from Paris by railway. The church, once a cathedral,

was almost destroyed during the Great War, but was afterwards restored. The town hall was also badly damaged. The industries are the manufacture of cotton goods and other textiles. It has a broadcasting station (175 M.) Pop (1931) 49,448.

Owing to its frontier position St. Quentin has been the scene of a good deal of fighting. Here, in 1557, the Spaniards defeated the French and in 1871 the French defeated the Germans. In Aug., 1914, the Germans entered the city, which they retained until Oct., 1918. The great German attack of Mar. 21, 1918, in which the British fifth army was overwhelmed, is sometimes called the Battle of St. Quentin.

Saint-Saens Charles Camille French composer. Born in Paris Oct. 9, 1835, he studied music at the Conservatoire there. In 1853 he was appointed organist of the Church of St. Merri in Paris, and in 1858 of the Madeleine. He retired from that position in 1877, and gave recitals in Europe and America. He composed several operas, notably *Samson and Delilah*, and some pieces for the orchestra, in addition to church music. He died Dec. 17, 1921.

St Sampson Town of Guernsey. It is on the east coast, 2 m from St. Peter Port with which it is connected by tramway. There is a small harbour from which a kind of blue granite, quarried in the neighbourhood, is exported.

Saintsbury George Edward Bateman. English scholar. Born at Southampton, Oct. 23, 1845, he was educated at King's College School, London and at Morton College, Oxford. He was a schoolmaster in the Channel Islands for 8 years, after which he turned to journalism. In 1895 he was made Professor of Rhetoric at Edinburgh, and there he remained until 1915, when he retired to Bath. He died in 1933.

Saintsbury has won for himself a unique place as a writer and critic. He has read enormously in both French and English, more perhaps than any of his contemporaries and the fruits of this are in the long list of books that stand to his credit. These include *A History of Criticism*, *The English Novel*, *A Short History of English Literature*, *A Short History of French Literature*, *A History of the French Novel*, *Elizabethan Literature*, *A Consideration of Thackeray*, and others, each showing an unrivalled knowledge of the subject.

Saint-Simon Duc de French writer. Simon was born at Versailles Jan. 10, 1759, and in 1793 became a duke. He joined the army and fought in the war against England. In 1714 he became a member of the council of regency for Louis XV., and he took part in public affairs until 1723, chiefly as the friend and supporter of the Duke of Orleans. The rest of his life, which ended in Paris, March 2, 1755, was passed in retirement.

His *Memoirs* are one of the most valuable sources for the history of the time.

St Thomas City of Ontario. It is 157 m from Toronto and stands on an opening of Lake Erie. It is served by the C.P.R., C.N.R., and other lines. There are some manufactures and a trade in agricultural produce. Pop. 10,026.

St Thomas One of the Virgin Islands, West Indies. It is 38 m from Porto Rico and covers 32 sq m. Charlotte Amalie is the capital. There is a fine harbour used by ships for obtaining coal and oil, and

the climate makes the island a popular winter resort St Thomas belonged to Denmark from 1671 until it was bought by the U S A in 1916 The people are mainly negroes Pop 9334

St. Thomas Island of Africa On the west coast, it is 170 m from the mouth of the Gabun River and is in the Bight of Biafra It covers 360 sq m, and San Thomé is the capital Cocoa and rubber are grown and exported, as the soil is very fertile The island belongs to Portugal and is governed from Principe Pop 68,000

St. Vincent One of the Windward Islands, West Indies It is 21 m to the south of St Lucia and 95 m from Barbados In it is an active volcano, Soufrière, which erupted and did great damage in 1902 The soil is generally fertile and produces cotton, sugar, coffee and spices Kingstown is the capital The island covers 150 sq m and is 18 m long It has been British since 1783 It is governed by an administrator assisted by a small council Pop (1931) 47,961

St. Vincent Cape of Portugal Near it, on June 16, 1693, a French fleet defeated the British under Sir George Rooke, and on Jan 16, 1780, a British fleet under Admiral Rodney defeated the Spaniards Near here, too, on Feb 14, 1797, a British fleet of 15 ships under Sir John Jervis attacked 27 Spanish vessels After a hard fight the Spaniards were beaten, four of their ships being taken, and England was saved from attack by the combined Franco-Spanish fleet The victory was largely due to the genius of Nelson, who disobeyed the orders of Jervis at a critical moment

St. Vincent Earl of English title borne by the family of Jervis John Jervis was born Jan 9, 1735, and joined the navy when a boy He served in the Seven Years' War (1756-63) and again when France went to the assistance of the American colonists His exploits included the capture of the islands of Martinique and Guadeloupe after war broke out with France in 1793, but he is best known for his victory over a Spanish fleet off Cape St. Vincent in Feb, 1797, which made it impossible for the French, the allies of Spain, to invade England He was then created an earl St Vincent commanded a fleet from 1799-1801 and 1806-07, and was first Lord of the Admiralty, 1801-04 He died March 14, 1823, and the title is now extinct

St. Vitus's Dance Popular name for the nervous affection properly called chorea (q r)

Sakaria River of Asia Minor It flows in the country until it enters the Black Sea On its banks a battle was fought between the Greeks and the Turks in 1921 Fighting began on Aug 23, when the Greeks reached the defences erected by the Turks and continued until Sept 12, when they withdrew

Saké Drink made in Japan It is made from rice and is strongly alcoholic In colour it resembles a light beer, but it is much more potent, its strength being due to elaborate fermentation

Sakhalin Island of Asia It lies near the east coast of Siberia and covers about 56,000 sq m It is 670 m long The northern part is Russian territory, but the southern belongs to Japan, to whom it was ceded in 1905

Until about 1800 the island was a Chinese

possession, after which it became Russian and was used as a station for convicts The people are Gilyaks in the north and Amurs in the south. The chief industry is fishing, salmon and herring especially, coal is mined and there are oil wells Railway lines have been built The climate is cold and there are extensive forests The Japanese call their portion of the island Karafuto

Saki Genus of monkey Found only in South America, especially in the forests of the Amazon, they have white and yellow faces and the body is covered with thick hair A feature is the long tail The best known species is the black saki.

Salaam Arabic word meaning peace It is part of a general salutation used by Mohammedans on meeting and parting It is also a general term for a salutation, as when an Indian bows low with the hand upon the forehead as a sign of respect.

Saladin Sultan of Egypt Born in 1137, he won renown when fighting in Egypt for the Caliph against the Christians, and in 1170 he became vizier of the country He extended his authority and was soon Sultan of Egypt and Syria and had conquered Mesopotamia and most of Asia Minor

Saladin is best known for his campaigns against the Latin kingdom of Jerusalem in the third crusade, which began in 1187 In spite of the efforts of the Crusaders, he captured Jerusalem and other places, and continued his victorious career until he was checked by Richard I, who arrived with a fresh army A truce was made in 1192, and on Mar 4, 1193, Saladin died.

A tax levied in England in 1188 to raise money for the third crusade was called the Saladin tithe

Salamanca Town of eastern Spain, on the River Tormes, 172 m by rail N W of Madrid Ruled in turn by Carthaginians, Romans Goths and Moors, it was famous in the middle ages for its university It has two cathedrals possessing relics of great historical interest, while the university buildings include fine examples of 15th century Gothic work There are some beautiful old houses, and a bridge of twenty-six arches, fifteen of which are Roman The colonnaded Plaza Mayor is one of the finest squares in Europe To day it is an important railway centre and has a broadcasting station (453 2 M., 1 kW) Pop (1931) 48 235

Salamanca Battle of Engagement in the Peninsular War, fought July 22 1812 It was the most important victory that Wellington gained in the Peninsular War He used the fortresses of Ciudad Rodrigo and Badajoz as the bases of his operations, and then marched into Spain, against Marmont, whom he completely routed Both opposing forces were about 42,000, but the French lost about 8000 men, and 7000 prisoners, and the way was then clear for Wellington to march on into Madrid

Salamander Members of an amphibian family Salamanders are found in Europe and West Asia, and have four fingers and five toes *Salamandra maculosa*, the fire or spotted salamander, is about 6 in long, and when afraid, ejects a white poisonous fluid through the skin. Its young are born as larvae in spring, and it eats flesh *Salamandra atra* bears two well-developed young at once, and the male Caucasian salamander is distinguished by having a projection at the root of the tail

Salamis Island of Greece It is in the Bay of Eleusis near Athens, and covers 35 sq m Salamis, on the west coast is the chief town and seaport The island was an independent state until about 620 B.C. Later it was ruled by Athens

The famous Battle of Salamis was fought between the Greeks and the Persians in 480 B.C. Themistocles, by giving the enemy wrong information persuaded the Persians to attack, and for some hours the battle raged the Persians in the end, being utterly defeated The destruction of the Persian fleet saved Athens, as the Persian army withdrew into Thessaly

Sal Ammoniac Common name for ammonium chloride obtained by absorbing ammonia from gas liquor in hydrochloric acid and afterwards purifying the product by sublimation It is a white fibrous substance when sublimed, and is used as a charge for electric batteries, also in galvanising iron, as a flux in soldering, and in medicine

Salcombe Urban district, seaport and shire It is 11 m from Dartmouth Standing on Salcombe Haven, it was once a port of some importance, and its vessels, Salcombe clippers were famous There is a coasting trade The climate is very mild and there are great attractions for visitors Pop (1931) 2383

Sale Transfer of property for money or other equivalent English law distinguishes between the sale of goods and the sale of land As regards the former the law is contained in an Act passed in 1893 The property in the goods passes to the buyer as soon as the contract is made, he need not wait for their actual delivery as is the case in some countries Thus, if a man buys a suit and asks for it to be sent home, it is his property from that moment, not from the moment it reaches his home In some legal systems ownership only comes with actual possession In the case of a sale of goods for over £10, there must be a memorandum in writing, or a part payment, or acceptance of the goods, or something to show that a contract has been made, otherwise no action can be brought in the courts The sale of land is done by conveyance of the title, quite a different process See CONVEYANCING, LAND

Sale Urban district of Cheshire It is 5 m from Manchester, of which it is practically a residential suburb, and about a mile from the Mersey It is reached by the Cheshire Lines Ryse Pop (1931) 28,063

Salem City of Palestine It was a city in the Bible (Gen. xiv.), its king being Melchizedek It was identified with Jerusalem, which is called Salem, or the city of peace, in the Psalms and in other poetic literature

Salem City and seaport of Massachusetts It stands on Massachusetts Bay, 16 m from Boston and is served by several lines of railway It has some manufactures, but as a seaport is less prosperous than formerly

As one of the oldest places in the United States, Salem has some interesting relics of the past It was dominated by the Puritans and was noted for its aversion to witchcraft Many supposed witches were put to death here, and the house in which they were examined still stands Salem is also associated with Nathaniel Hawthorne, and the house in which he was born, also the house of the Seven Gables, may be seen Pop (1930) 43,363

Salerno City and seaport of Italy It is situated on the gulf of the same name 34 m from Naples The 11th century cathedral contains some magnificent carvings For some time in the Middle Ages the city was a stronghold of the Normans In 1150 they founded a university here and this became famous as a centre for the teaching of medicine It ceased to exist in 1817 Pop (1931) 62,308

Salesmanship Art or practice of selling goods Since the Great War a good deal of attention has been paid to this branch of commerce and schools have been opened where it is taught This is especially the case in the United States where the teaching of salesmanship is carried out in great detail There are in Great Britain associations for arousing interest in the necessity of an improved technique of salesmanship See ADVERTISING

Salford Connty borough of Lancashire It is on the south side of the River Irwell, which divides it from Manchester, and is 199 m from London It is reached by the L.M.S. Riv. The industries include engineering works, cotton mills and chemical factories The borough includes Broughton, Pendleton and other districts and in it are Korsal Moor, Peel Park, Albert Park and other open spaces Its water supply is provided by Manchester and other services are common to the two places, but Salford retains its own mayor and corporation Pop (1931) 223,442

Salicin Crystalline glucoside occurring in willow and poplar bark, and forming colourless tabular crystals having a bitter taste It is used in medicine for rheumatism and influenza.

Salic Law Law made by the tribe called the Salian Franks It came to be applied to a law that no woman may succeed to a throne and it is still used in this sense to day The Salic Law was in force in Hanover, but not in Great Britain, in 1837

Salicylic Acid Complex organic acid occurring in nature in oil of wintergreen (*Gaultheria procumbens*) It may be prepared from salicin and synthetically by the action of carbon dioxide upon phenol It is a white crystalline substance having strong antiseptic properties Its salts are used in medicine for febrile conditions, and as a food preservative

Salient Name for part of a line of trenches or other defensive works that bulges out towards the enemy, and so requires a greater force to guard it There were several salients in the Great War, the most famous being that in front of Ypres

Saline Term used for preparations containing various salts having an aperient or other medicinal action upon the digestive organs The principal salt of this character is sulphate of magnesium or Epsom salts The waters of many mineral springs or spas are used as natural salines the salts varying with the character of the spring

Salisbury City, market and county town of Wiltshire It is 84 m from London on both the G.W. and S. Ryse Here the Avon is joined by three small rivers, Nadder, Bourne and Wilke The industries include brewing, but the old manufactures of entery and woollen goods have disappeared

The city is famous for its cathedral, built in the 13th century, and one of the finest Gothic buildings in existence It is beautifully

placed with the close around it, and the spire is the loftiest in the country. The close is entered by its old gates and in it are several colleges and some beautiful houses. Other buildings are three old churches, St Thomas, St Martin and St Edmund. St Nicholas Hospital, with its beautiful chapel, and the old George Inn are relics of the city's past, and there are several others including the hall of John Halle, once a guildhall. The council house is more modern (1795), but the poultry cross dates from the 15th century. There is a spacious market place, and the city is laid out in squares called chequers.

Salisbury has a large agricultural trade, and is important as a military centre. Sometimes called New Sarum, it was built to replace Old Sarum, 2 m away. Pop (1931) 26,456.

Salisbury City of Rhodesia, the capital of Southern Rhodesia. It is 1660 m by railway from Capetown, and is also reached from Beira, 370 m away. The industries are chiefly connected with the produce of the country and the management of its affairs. Pop 28,800.

Salisbury Earl of English statesman. Robert Cecil was born about 1566, the youngest son of the 1st Lord Burghley, and was educated at Cambridge. He entered Parliament in 1584, was knighted in 1591, and, after a diplomatic mission to France, succeeded his father in 1598 as secretary and chief adviser to Queen Elizabeth. Cecil now began a secret correspondence with James VI of Scotland, assuring him of the English succession, and when James came to the throne he was created a baron. Created Earl of Salisbury in 1605, in 1608 he was made Lord Treasurer and became solely responsible for the conduct of the realm. In foreign affairs he favoured peace, and at home endeavoured to check and counteract the extravagance of the court, by instituting the granting of an annual subsidy from Parliament to the crown. Though he did nothing to solve the great national problems, England was secure under his guidance. He died May 24, 1612.

Salisbury Marquess of English statesman. Robert Arthur Talbot Gascoyne-Cecil was born at Hatfield House, Feb. 3, 1830, being a younger son of the 2nd marquess. He was educated at Eton and Christ Church, Oxford, and became a fellow of All Souls College. In 1853, being known as Lord Robert Cecil, he was elected M.P. for Stamford, and in 1857 he married a daughter of Sir Edward Alderson. He first became known by his writings in *The Saturday Review* and other periodicals, and by his attacks on the Liberal Government led by Earl Russell. In 1865 his older brother died and he became Viscount Cranborne and heir to the title, to which he succeeded in 1868.

In 1866 Salisbury became Secretary for India under Disraeli, but he resigned in 1867. He took the same office, however, in 1874, and in 1878 became Foreign Secretary, in which capacity he attended the Congress of Berlin. In 1881 he succeeded Beaconsfield as leader of the Conservative Party, and in 1885 he was Prime Minister for six months. In 1886 he entered upon his second term of office as Premier, which lasted until 1892, his third term was from 1895 until his retirement in July, 1902. He was also Foreign Secretary during these periods, except during the last years, 1900-02. He died Aug. 22, 1903.

Although not a popular figure, Lord Salis-

bury was a great statesman and a successful Prime Minister.

He left five sons and two daughters. The sons were the 4th marquess, Viscount Cecil of Chelwood, Lord William Cecil, appointed Bishop of Exeter in 1916, Lord Edward Cecil, Financial Adviser to the Government of Egypt until his death in 1916, and Lord Hugh Cecil, member for Oxford University. The daughters were the Countess of Selborne and Lady Gwendolen Cecil, who wrote her father's biography.

Salisbury Plain District of Wiltshire. It is in the south-east of the county and is best reached from Salisbury which lies to the south. It is about 20 m across from north to south and covers 200 sq m. The Aven crosses it as does the S. Rly. It is a chalk plain, but on it are hills, the highest being 770 ft high. The plain contains Stonehenge and Amesbury with their prehistoric monuments. Most of it is used for military purposes, and both the army and the air force have camps thereon. The centres are Bulford, Larkhall, Netheravon, Upavon, Tidworth and others.

Saliva Secretion from the salivary glands poured into the mouth, the flow being stimulated by the nerves of taste, smell, and sight, and by the act of mastication. Saliva is a slightly alkaline fluid containing mucin and the ferment, ptyalin, which acts upon starch, changing it into more digestible substances, dextrin and maltose.

Sallust Roman historian. Gaius Sallustius Crispus was born in 86 B.C. in the Sabine country, and was made tribune in 52 B.C. After service in Africa, he became Governor of Numidia, where he extorted great wealth by scandalous oppression. He then lived in magnificent retirement and wrote his histories, the most famous being his history of the Catiline conspiracy, and his study of Jugurtha, King of Numidia. He died in 34 B.C.

Salmon Feed fish (*Salmo*) of the family *Salmonidae*. It attains a length of 5 ft and a weight of 40 lb, the average being about half these. Its pink flesh is esteemed for its delicate flavour and nutritive value. The adult fish ascends the rivers where, in the shallow head waters, the ova are deposited and fertilised. In the second year the young fish journey to the sea, staying there two, three or more years till, in ~~year~~ mature, the majority migrate to the riverino spawning ground to breed. The fish is widely distributed in northern waters.

Salmond Sir John Maitland English airman. Born July 17, 1881, in 1901 he entered the army. He served in South Africa, 1899-1902, and was one of the first to join the Royal Flying Corps. He became an instructor at the flying school and served with the air force in the Great War. In 1917 he was made Director General of Military Aeronautics, and in 1918 head of the air force on the western front. In 1919 he was knighted and made an air vice-marshal. Sir John went to Mesopotamia in 1922 as head of the air force there. From 1924-29 he was in command of the air defences of Great Britain, in 1929-30 he was a member of the Air Council, and in 1930 he was appointed Chief of the Air Staff. He retired in 1932.

His elder brother, Sir William Geoffrey Hanson Salmond, had a similar career, passing from the army into the air force. In 1927 he was made commander of the British air force

in India, and in 1932 he succeeded his brother as Chief of the Air Staff. He died in 1933.

Salome Daughter of Herodias, the wife of Herod Antipas, by a former husband. Urged on by her mother, she asked Herod, after having charmed him with her dancing, for the head of John the Baptist, who was in prison. John was accordingly beheaded and the head given to her. Oscar Wilde wrote in French a play on Salome which was first produced in London in 1905. A sister of Herod the Great was also named Salome. She plotted against her sons and was murdered.

Salon French word for a large room, especially a reception room. It came to be used for a gathering held in such a room usually one of literary or political persons. Many of these were held in Paris in the homes of famous women, such as Madame Necker, Madame Roland and Madame de Staël. In London, Holland House was such a salon.

To day the Salon is the name given to the exhibition of pictures and other works of art held every year in Paris. It corresponds to the Academy in London and is held in the Palais de l'Industrie.

Salonika City and seaport of Greece. It is in Macedonia at the head of the Gulf of Salonika and is well served by railways. The city has a good harbour and does a considerable trade and since 1925 part of it has had a free fiscal zone. It is the Thessalonica to which St Paul wrote two of his epistles. Pop. (1928) 236,900.

In Oct., 1916, a French and British army landed at Salonika and retained it as a base during the rest of the war. From it expeditions were organised to help Serbia. In 1916 it was the centre of a movement of the Greeks against the policy of King Constantine, and a provisional government was set up here.

Salop Alternative name for the county of Shropshire (*q.v.*).

Salsify Biennial plant (*Tragopogon porri folius*), also known as the oyster plant. Found wild in European countries, it is cultivated for its edible root.

Salt Common name for sodium chloride. Salt occurs in nature as a mineral deposit, rock salt, also in brine springs and as an ingredient of sea water. Rock salt occurs in large deposits in Germany, Poland and Galicia, also in the Triassic beds of Cheshire and neighbouring counties. Commercial salt is obtained either from rock salt or by evaporation of natural brines or artificial brine formed by running water into mines to dissolve the salt. Salt is used as a preservative for meat, fish, butter etc., and in the manufacture of caustic soda, soda ash and other sodium and chlorine compounds.

Salt Sir Titus English manufacturer. Born at Morley, Sept. 20, 1803, he was apprenticed to the woolen trade in Bradford. In 1824 he started in business with his father as a wool stapler. He realised the value of alpaca and was the first to use it in the manufacture of cloth. The business became very large and new mills were built near Bradford at a place which he named Saltaire. In 1859 Salt was elected M.P. for Bradford, and in 1869 he was made a baronet. He died Sept. 20, 1876.

Saltaire Town of Yorkshire (W.R.) It is 4 m. from Bradford, on the River Aire and is served by the L.M.S. Rly. and a canal. It owes its origin to Sir Titus Salt (*q.v.*) Pop. 13,500.

Saltash Borough, market town and seaport of Cornwall. It is on the Tamar, just opposite Devonport, on the G.W. Rly. It is a fishing and agricultural centre. The Tamar is here crossed by a lofty railway bridge, the work of Isambard Brunel. It is 2240 ft. long. Pop. (1931) 3603.

Saltburn Urban district and watering place of Yorkshire (N.R.) It is 16 m. from Middlesbrough and is reached by the L.N.E. Rly. There are excellent sands, good bathing and golf links. The town has brine baths. Pop. (1931) 3911.

Saltcoats Burgh and seaside resort of Ayrshire. It is on the shores of the Firth of Clyde adjoining Ardrossan, and 30 m. from Glasgow. It has become a popular watering place and has the usual attractions for visitors. At one time the collection of salt was the chief industry, later it was shipbuilding. Pop. (1931) 10,173.

Salter Sir James Arthur English administrator. Born in Oxford, Mar. 15, 1881, the son of an owner of pleasure steamers, he was educated at the high school there. He won a scholarship at Brasenose College, and in 1904 entered the civil service by open competition. He took a post in the Admiralty, and during the war period was one of the chief officials who dealt with shipping problems. In 1919-20 he was made head of the economic and financial section of the League of Nations, and he returned to that position in 1922, having in the interval been secretary to the Reparations Commission. In 1922 he was knighted. In 1930 he published a most valuable survey of the world's economic difficulties entitled *Recovery*. In 1933 he was appointed Gladstone Professor of Political Theory and Institutions at Oxford.

Saltire Term used in heraldry for an armorial charge or ordinary on a shield in the form of a St. Andrew's cross.

Salt Lake City Capital of the State of Utah, U.S.A. the home of the Mormons (*q.v.*). It contains many churches of these "Latter Day Saints" and the Great Mormon Temple begun in 1853. Salt Lake City is one of the main centres in the West for agricultural produce, sheep, coal, precious metals, books and mail. The Mormons, under Brigham Young, first settled here in 1847, but since the Civil War, the proportion of Mormons in the city has sensibly decreased. Pop. (1930) 140,267.

Saltney Town and river port of Flintshire. It is on the Dee 2 m. from Chester on the G.W. Rly. The industries include railway shops and coastal shipping for which there are wharves.

Saltoun Two villages of Haddingtonshire also called Salton. Known as East and West Saltoun they are 16 m. from Edinburgh. Andrew Fletcher was laird of Saltoun and his estate was famed for its barley. The title of Baron Saltoun has been held by the family of Fraser since 1445.

Saltpetre Common name for nitro or potassium nitrate, a white saline substance found in nature as an incrustation of the soil in India, or mixed with the porous soil in many parts of the world. It is used in the manufacture of gunpowder, nitric acid, fertilisers and for salting meat.

Salts Compounds formed by the chemical union of acids with bases such as hydroxides. The oxyacids form with a base oxy-salts, thus nitric acid and potassium oxide.

form potassium nitrate. A normal salt is one where all the available hydrogen in the acid is replaced by the base, while in an acid salt only a part of the hydrogen is displaced. Haloid salts are formed from the halogen acids such as hydrochloric acid.

Saltwood Village of Kent. It is on the coast near Hythe and is famous for the ruins of its castle. It has also an old oburgh. The castle was a residence of the Archbishop of Canterbury, and from here the four knights started for Canterbury to murder Thomas à Becket.

Saltwort Species of herb (*Salsola kali*). Known as the prickly saltwort, it is common on the seashore in Great Britain. It is a source of barilla, crude carbonate of soda, obtained by burning the plant, and used in soap and glass-making.

Salute Sign of respect or recognition paid by members of the naval, military and air forces to one another, and on ceremonial occasions. On meeting one of superior rank the officer or man, if unarmed, raises the right hand smartly to the forehead. The salute should be returned. When stationary, troops salute by presenting arms, i.e., raising the rifle. When marching past the king, a member of the royal family, or an officer who is reviewing them (who is said to take the salute), at the command, the men turn the head towards him in salute.

There are other forms of salute. A boy scout raises his hand, but does not touch the forehead. The Fascists raise the band above the head.

Salvador Republic of Central America. Bounded on the N and E by Honduras, on the S by the Pacific Ocean, and on the W and NW by Guatemala, it is mountainous with many volcanoes, and is subject to earthquakes. The smallest and most populous of the Central American republics, it is intensively cultivated, and produces coffee, sugar, maize, indigo, rice, balsam, etc., these products forming the principal exports. There are small exports of minerals, principally gold. Salvador is governed by a president, elected for four years, a cabinet of four, and a legislative chamber of 42 members. San Salvador is the capital, and La Unión the principal seaport. Area (est.) 13,176 sq. m., pop. (1931, est.) 1,437,157.

Conquered in 1526 by Pedro de Alvarado, Salvador was a Spanish possession till 1821, when it joined the Central American federation. It became independent in 1840.

Salvage Saving property from loss or destruction. It is chiefly used in connection with loss caused by fire or shipwreck. In 1917, to deal with the vast amount of waste material resulting from the operations of war, an army salvage corps was formed. Factories were opened at Dagenham, Newport and elsewhere for dealing with the material collected.

To deal with material damaged by fire there exists the London Salvage Corps, in close association with the Metropolitan Fire Brigade. Its headquarters are at 24 Watling Street, London, E.C.4.

Salvarsan Organic compound containing arsenic and known also as "606," or arsenobenzol. Salvarsan was discovered by Dr Ehrlich in 1909 and found to have a destructive action upon the syphilis germ and protozoan parasites causing sleeping sickness and other diseases. A modification,

neo salvarsan, is less toxic and more convenient for use.

Salvation Army Religious organisation. It was founded in 1877 by William Booth for the revival of religion among the masses. His book, *Darkest England and the Way Out* (1890), outlined the scheme of rescue work which soon became a prominent feature of the Army's activities. The movement was organised on a military model and at first met with much criticism and opposition. But in 1904 King Edward sent for General Booth to express his admiration for the work. The Salvation Army is now active in 88 countries and uses 71 different languages. Its social services include maternal homes, children's homes, industrial homes, prison gate homes, shelters and cheap food depots for the homeless, labour bureaux, farms, industrial schools and slum posts. The total amount raised in the British Isles during its "Self Denial Week" in 1934 was £148,236.

Salvia Genus of the *Labiatae*, widely spread in temperate and warmer areas. Many species are garden plants popular for their showy flowers, usually brilliant scarlet. They are easily grown and propagated in good soil.

Salvini Tommaso. Italian actor. He was born in Milan, Jan. 1, 1829, and soon became known as an actor. In 1857 he made his reputation as Othello. For the next 50 years he was one of the world's leading actors, distinguishing himself in Shakespearean parts, as well as in pieces by the great Italian dramatists. He died Dec. 31, 1915.

Salween River of Asia. It arises in Tibet, but most of its course of 1800 m. is in Burma. It falls into the sea near Moulmein in the Gulf of Martaban.

Salzburg Capital of the province of Salzburg, Austria, lying in the beautiful valley of the River Salzach. Salzburg, formerly rich in salt deposits, contains an ancient citadel of the 9th century, a university and a cathedral of Renaissance style. It was the birthplace of Mozart (1756) and musical festivals are sometimes held there, the last being in 1931. It has a broadcasting station (218 M., 0.7 kW).

Samaria Ancient district of Palestine. In the centre of the country, it was inhabited by a people who were partly of Jewish blood and therefore distinct from their neighbours. Its capital was Samaria, founded about 920 B.C., but later destroyed by the Assyrians. Herod the Great rebuilt it and called it Sebaste.

Samarkand City of Asiatic Russia. It is the capital of the Uzbek republic. An ancient place, it was conquered by Alexander the Great, became important during the Arab Samanid dynasty, and was later the capital of the Mongol prince, Tamerlane. Later it came under the domination of China, then of Bokhara, and was taken by the Russians in 1868. Connected with the Caspian and Russia by railway, it is an important trading centre. Pop. (1933) 151,600.

Sambar Variety of deer. It lives in the forests of India and Ceylon. Its average height is 4½ ft. and the horns of the male are sometimes 3 ft. long. A distinguishing feature is the mane of long hair.

Sambre River of Franco and Belgium. It rises in France and flows north-east, passing into Belgium where at

Namur It joins the Mouse. It is navigable by barges, and canals connect it with the Scheldt and other rivers. Its length is 112 m.

The Battle of the Sambre was the last engagement of the Great War. It began on Nov. 1 and was carried out by three British armies. In ten days they advanced 25 m., taking Valenciennes, Landreies, Maubouge and finally Mons, and 18 000 prisoners. The battle ended with the armistice on Nov. 11 1918.

Samoa Group of 14 islands in the Pacific, 450 m N.E. of Fiji. Discovered by Roggeveen, a Dutchman, in 1722. Nine of the group formed a German possession, now administered under a mandate by New Zealand; the others belong to the U.S.A. They are mountainous with an active volcano, are surrounded by coral reefs and are very fertile, producing copra and cocoa. The natives are Polynesians who have embraced Christianity. R. L. Stevenson is buried on Upolu. Area—U.S.A. portion 78 sq. m., pop. 19 055, N.Z. portion, 1133 sq. m., pop. (1932) 46,271.

Samos Island of the Aegean Sea. It is 1 m. from the coast of Asia Minor and belongs to Greece. Its area is 189 m. and it is mountainous, but has fertile valleys, where fruit and vines are grown. Vathy, on the north coast, is the capital. Pop. 70 500.

In classical times Samos was a notable centre of culture, its sculptors being famous. Its capital was a town of the same name.

Samovar Tea urn used in Russia, and generally made of copper. The water is heated by burning charcoal contained in an inner tube.

Samoyede Breed of dog. Primarily a sledge dog, it is much in favour as house dog and pet. In appearance the Samoyede is like a large Pomeranian with a long thick silky coat. The true sledge dog is white, black or black and white but the type bred for show in Great Britain is pure white. They should be between 18 and 22 in. in height and weigh between 40 and 55 lb.

Sampshire Perennial herb (*Crithmum maritimum*) of the natural order *Umbelliferae*. It is found in many parts of Europe including Great Britain, usually on rocks near the sea. It has a stout stem and leaves which are blue green in shade and bears white flowers. The leaves of the sampshire, which have a salty flavour, are gathered in some places and made into a pickle.

Samson Biblical character. The Book of Judges (chaps. xiii to xvi) represents him as an Israelite hero of vast strength, who, by a number of single handed exploits, inflicts great injury on the Philistines. His hair, left unshorn from birth as the token of his consecration to God as a Nazirite, is, according to the narrative, the source of his strength—a secret disclosed to his enemies by his lover, Delilah.

Samuel Prophet of the Israelites. He was born at Ramah, his mother being Hannah, who vowed him to the service of God. As a child he became an attendant to Eli, the high priest, and later the judge, or ruler, of the Israelites.

The Books of Samuel are two historical books of the Old Testament. The period of history covered extends roughly over a hundred years, during which Israel emerged from the state of anarchy described in the Book of Judges and became a nation. The establishment of the monarchy was an important

instrument in the consolidation of the kingdom. Hence the central figures in these books are Samuel, who took a prominent part in the foundation of the kingdom, and Saul and David, the two earliest kings.

Samuel Sir Herbert Louis English politician. Born in Liverpool Nov. 6 1870, a son of E. L. Samuel, he adopted a political career. He was elected to Parliament in 1902 and in 1905 joined the Liberal Ministry as Under Secretary for Home Affairs. In 1909 he entered the Cabinet as Chancellor of the Duchy of Lancaster. From 1919 to 14 he was Postmaster-General. In 1914-15 President of the Local Government Board. In 1915-16 again Chancellor of the Duchy and for a short time Home Secretary.

In 1920 Samuel was knighted and went to Palestine as High Commissioner. On his return in 1925 he was Chairman of the Royal Commission on the Coal Industry, its report being known as the Samuel Report. In 1929 Sir Herbert was elected Liberal M.P. for the Darwen division and in 1931 he took a leading part in the formation of the National Government. In this he became Home Secretary, resigning in Sept. 1932. In 1934 he was again in Palestine. His writings include *Liberalism Its Principles and Proposals* *Practical Ethics* (1935).

San River of Poland. It rises in the Carpathians and flows mainly north-west until it joins the Vistula near Sandomierz. Przemysl is on its bank and its length is 260 m.

There was a good deal of fighting along the San during the earlier part of the Great War. Two battles of the San are recognised. The first was fought between the Austrians and the Russians. It began on Oct. 13 1914 and lasted until Nov. 6, the Russians being victorious. In the second battle the Germans came to the assistance of the Austrians and the Russians were defeated and driven back. The fighting began about May 14, 1915, and lasted two weeks.

Sanatorium Building set aside, in a school or elsewhere for sick persons. It is also used for buildings erected for the treatment of consumption, such as the King Edward VII. Sanatorium at Midhurst. In Great Britain treatment in sanatoria was one of the benefits given to persons insured under the National Health Scheme from 1911 to 1921 when it was withdrawn. It is still given, however, in Northern Ireland.

Sancroft William English prelate. Born at Fressingfield, Suffolk, Jan. 30, 1617, he was educated at Emmanuel College, Cambridge. He became a Fellow of his college but in 1651 was deprived of the position owing to his opinions. After the restoration he was made Chaplain to the King. In 1678 he was appointed Archbishop of Canterbury and in 1688 he was the leader of the seven bishops who refused to read the Declaration of Indulgence and were imprisoned and tried for treason. He declined to recognise William III as the rightful king and in 1690 his office was taken from him. He died at Fressingfield, Nov. 24, 1693.

Sanction Term used in international law. It has been much used since the Great War for a penalty suggested in case an agreement is violated. Such were the sanctions imposed by the Treaty of Versailles in 1919.

Sanctuary Holy place, particularly one where fugitives and criminals

could take refuge without fear of arrest. The Jews had three centres of refuge for this purpose. In the Christian era churches, especially cathedrals, were sanctuaries. Westminster Abbey was a noted sanctuary, as were the abbey at Holyrood and the cathedral at Durham. The word is also used for the part of a cathedral where the sacred vessels are kept. In the Jewish temple the Holy of Holies was the sanctuary.

Sanctus Hymn said or sung in the Roman Catholic Church during the prayer of consecration at the celebration of the mass. It also finds a place in the communion service in the Prayer Book of the Church of England and in other liturgies. The words, adapted from passages in the Bible are "Holy, Holy, Holy, Glory be to Thee, O Lord most high."

Sand Natural fine grained material resulting from the disintegration of granite and other highly siliceous rocks. While essentially of quartz grains, other minerals according to the nature of the parent rock may be present with various impurities. White quartz sands from granites are known as silver or glass sands, but more commonly sands are yellow, brown or red, due to the presence of iron. Sands are used in making mortar and cements, bricks, glass and pottery, also as an abrasive and filtering material.

Sand River of the Orange Free State, South Africa. A tributary of the Vet, it gave its name to a convention by which, in 1852, the British Government recognised the independence of the settlers across the Vaal, the present Transvaal.

Sand George Pen-name of Amandine Lucile Aurore Dndevant, French novelist. Born July 1, 1804, in Paris, she read widely as a child, married unhappily and parted from her husband in 1831, becoming a journalist in Paris. Her first novel, *Indiana* (1832), was an immediate success and won her the friendship of the great critic Sainte-Beuve among others. She formed a liaison with the poet, Alfred de Musset, and later with Chopin (q.v.). The latter half of her life was spent mostly in the country at Nohant. She died June 8, 1876. Her earlier books, including *Léila* and *Jacques*, show a spirit of revolt, but her best work is in the later pastoral novels such as *Jeanne* and *La Mare au Diable*.

Sandal Village of Yorkshire (W.R.) It is 3 m. from Wakefield, on the L.N.E. Rly. The castle, now in ruins, was a stronghold of the Yorkists during the Wars of the Roses. Near it the Battle of Wakefield was fought in 1460. Pop. 2900.

Sandalwood Fragrant wood from a small evergreen tree, (*Santalum album*), growing in India and the East Indies. Sandalwood is used for carving and turnery, and the raspings are used in incense or distilled for an aromatic oil. Australian sandalwood from *Fusana spicatus* is an inferior substitute.

Sandbach Urban district of Cheshire. It is 4 m. from Crewe, on the L.M.S. Rly. There are some manufactures. There are two crosses dating from the 7th century in the market place. Pop. (1931) 6411.

Sanderling Small bird, *Caharis arenaria*, allied to the plover, which it resembles. It is a winter visitor to the shores of seas and lakes in Great Britain and other parts of Europe. About

8 in. in length, its plumage is brown and grey above and white below.

Sandgate Urban district and seaside resort of Kent. It is 2 m. from Folkestone, on the S. Rly. The chief building is the castle, erected in the 16th century to defend the coast. It is now a museum. Pop. (1931) 2506.

Sand Grouse Small game bird. It is unlike the real grouse but is related to the pigeon which it resembles in appearance. The birds have beautiful plumage, long and pointed wings and very short legs and toes. They are found in Asia and Africa and sometimes in Europe. One species, Pallas's, has been seen in Great Britain. Like pigeons, they move in droves and feed on insects and vegetables.

Sand Hopper Small, shrimp-like crustacean, occurring in large numbers on the seashore between tide marks. It is of a pale yellowish colour and has a hopping movement produced by flexing the tail under the body. They act as scavengers, feeding upon decaying animal matter.

Sandhurst Village of Berkshire. It is 33 m. from London and 4 m. from Wokingham, its station on the S. Rly. Here is the Royal Military College, erected in 1812, and usually known as Sandhurst, where officers for the cavalry and infantry receive their training. It has accommodation for 700 cadets. Officers for the Royal Army Service Corps and for the Indian army are also trained at Sandhurst, but in 1932 arrangements were made to open a college of this kind in India. Another Sandhurst is a village in Kent.

Sand Lizard Small lizard (*Lacerta agilis*) found in Britain frequenting sandy districts. The sexes differ in colour, the male being a bright green while the female is brownish and grey. The female is larger than the male, which is about seven inches in length.

San Domingo Capital and seaport of the Dominican Republic. It stands on the south coast of the island, at the mouth of the River Ozama. There is a cathedral dating from the 16th century. The town was founded by the Spaniards in 1496 and the fort erected by them still stands. The city has a trade in sugar and coffee, but there is no harbour. The remains of Columbus were in the cathedral here from 1536 until 1795. Pop. 30,957.

Sandow Eugen German athlete. Born at Königsherg, April 2, 1867, he was educated at Göttingen and made a name as a wrestler. Possessed of enormous strength, he engaged in public wrestling contests, and performed feats of weight lifting which won for him the championship of the world. Later he devoted himself to teaching physical culture. He wrote *Strength and How to Obtain It*. Sandow died Oct. 14, 1925.

Sandown Watering place and urban district of the Isle of Wight. It is 6 m. from Ryde, on the S. Rly. Pop. (1931) 6167.

Sandown Park Racecourse in Surrey. It is 15 m. from London, its station being at Esher, on the S. Rly. The chief meeting is held in July, when the Eclipse stakes are run.

Sandpiper Small bird allied to the snipe, curlew and plover. The common sandpiper (*Totanus hypoleucis*),

equalling the skylark in size, is very common in Britain and departs in winter for India and Australia. Among other sandpipers may be mentioned the red sandpiper, greenshank and the purple sandpiper, a visitant from Greenland. America is inhabited by so called spotted sandpipers.

Sandringham Estate in Norfolk, the property of the King. It is 6 m from King's Lynn and 2 m from Wolferton, on the L N E Rly. The estate was bought by the Prince of Wales, afterwards Edward VII, and the house was built in 1869-71. It stands in a park of 200 acres. On the estate is a smaller royal residence, York Cottage.

Sandstone Sedimentary rock, consisting of sand grains cemented together. A pure sandstone is formed of quartz grains with silica as the cementing material, but many sandstones contain fragments of felspar, mica and other minerals with a calcareous, clayey or ferruginous cement. Sandstones are used as building and paving material, also as road metal.

Sandstorm Hot whirlwind which sweeps over desert areas in Africa and Arabia carrying with it great quantities of sand. The sudden heating of the lower atmospheric layers causes ascending eddies of hot air which raise the sand in whirling clouds. The dreaded simoom of the Sahara is of this character.

Sandwich Borough, market town and holiday resort of Kent. It is 5 m south west of Ramsgate and 87 from London, by the S Rly. It stands on the Stour and was one of the chief of the Cinque Ports, but the sea has receded, and the town is now two miles inland. There are many interesting old buildings, including the Guild hall, and two hospitals dating from the 13th and 14th centuries. Of the old fortifications two gates are left. Pop (1931) 3287.

Sandwich Earl of English title borne by the family of Montagu. Edward Montagu (1625-72) born July 27 1625, is chiefly known as a seaman, first under the Commonwealth and then under Charles II. In 1660 he was made Earl of Sandwich. He fought in several battles against the Dutch and went as ambassador to Spain. He was killed in a sea fight in Southwold Bay, May 28, 1672. The title in 1729 came to a descendant, John Montagu, who became the 4th earl. A prominent politician, twice First Lord of the Admiralty and Secretary of State, he took part in the prosecution of John Wilkes, and died April 30 1792. From him the present earl is descended. The earl's oldest son is called Viscount Hinchingbrooke and his estates are in Huntingdonshire.

Sandwort Genus (*Arenaria*) of Alpine plants of the order *Caryophyllaceae*. The leaves grow in pairs on slender jointed stems and the flowers are small and dainty. *A. montana* and *A. balearica* are popular for rock gardens, the latter is a creeping variety with delicate leaves and minute white blossoms.

Sandy Urban district of Bedfordshire. It is on the Ivel, 7 m from Bedford on the L N E Rly. It is an agricultural centre. In the neighbourhood are Roman remains. Pop (1931) 3140.

Sandy Hook Peninsula of New Jersey. It is 0 m long and partly forms one side of New York Bay. On it is a fort and a lighthouse, familiar to those approaching New York. Around it is the course for the America Cup.

San Francisco City and seaport of California, U.S.A. It stands on the Bay of San Francisco, one of the world's finest natural harbours, entered from the Pacific by a channel the Golden Gate. A suspension bridge over the Golden Gate, to be completed in 1937, is one of the world's great feats of engineering. The city, which is built on a hilly site and has a fine climate, is the chief seaport on the Pacific coast of the U.S.A. and a great industrial centre. The chief manufactures include coffee, meat-packing, automobiles, clothing, machinery, canning and furniture, and the principal exports, mineral oil, barley, preserved fruits, cotton, tobacco etc. The harbour has over 15 m of docks. Important buildings are the domed city hall, the public library and the State building, and the city has 46 parks and fine thoroughfares. A cosmopolitan city, it has a large Chinese quarter. Pop (1930) 634,394.

Founded in 1776 by Spaniards, San Francisco was seized by the U.S.A. in 1848, from which year the gold rush brought a great increase of population. The city has suffered greatly from fires especially in 1906, following a disastrous earthquake.

Sanger George English showman. A son of John Sanger, a sailor who had become the owner of a circus, he was born at Newbury, Dec 23, 1827, and about 1850 took control of his father's business. He called himself Lord George Sanger and made the circus very profitable. In 1871 he bought Astley's circus and for some years leased the Agricultural Hall, Islington. He also had circuses in Liverpool, Glasgow, Birmingham, Dundee, Bristol and other cities. In 1905 he sold the undertaking, and on Nov 28, 1911, he was shot by a former employee.

Sanhedrin Council of the Jews. It had only a brief existence, but it was powerful in the time of Jesus Christ. Consisting of 71 members, persons of importance, with the high priest as president, it was a court of justice for all Jews and for some time had over them power of life and death. It disappeared at the time of the destruction of Jerusalem.

Sanitary Authority In English local government the body that is responsible for looking after public health. It may be a borough, urban district or rural district council. In London the borough councils are the sanitary authorities. In seaports a special body—the port sanitary authority—deals with shipping.

Sanitation Department of public health. It comprises the arrangements for disposal of sewage and refuse, water supply, etc. The relative laws are administered by the local authorities. These maintain sanitary inspectors to see that building by laws as regards internal sanitation, drains, etc., are observed, and that no nuisance is allowed to arise in respect of the disposal of filth or domestic refuse. A sewer drainage system is tested by the sanitary authority before completion, and thereafter no alteration is allowed to be made without the authority's sanction. Defective drains may be condemned, whereupon the owner of the property must provide new ones.

San Juan Capital and seaport of Puerto Rico. It stands on a small island off the west coast and is linked with the main island by bridges and a causeway. It was founded by the Spaniards in 1511 and its old castle and some of its fortifications still stand. There is a good harbour and shipping is one of the principal industries. The city has been modernised since it became an American possession in 1898. Pop (1930) 114,716.

Sankey Viscount. English lawyer and politician. John Sankey was born Oct. 26, 1866, and educated at Lancing and Jesus College, Oxford. He became a barrister in 1892 and in 1909 a K.C. and was prominent as an ecclesiastical lawyer. In 1914 he was made a judge and in 1919 he was selected to preside over the Royal Commission on the Coal Mining Industry. In 1928 he was made a Lord Justice of Appeal and in 1929 he joined the Labour Ministry as Lord Chancellor, an office he retained until June, 1935, when Mr. Baldwin formed a new cabinet. He was made a baron in 1929, and a viscount in 1932. Lord Sankey took a leading part in the conferences on India in 1930 and 1931.

Sankey Ira David. American singer. Born in Pennsylvania, Aug. 28, 1840, he became an evangelist. In 1870 he joined D. L. Moody in his evangelistic work and the two met with extraordinary success in the United States and Great Britain. They travelled about holding revival services, the share of Sankey, who had a fine voice, being to sing solo hymns. He was responsible for the popular volume *Sacred Songs and Solos*. In 1903 he became blind, and he died Aug. 14, 1908.

San Marino Republic of Europe. It is in the Apennines 12 m. from Rimini and is entirely surrounded by Italian territory. Its area is 38 sq. m. The capital is the little town of the same name which stands on a hill, 2656 ft. high. The republic is governed by an elected council of 60 members, two of whom act as regents for six months at a time. San Marino has been independent since 1631. Pop (1932) 13,948.

Sanquhar Burgh of Dumfriesshire. It is situated on the Nith, 26 m. from Dumfries, on the L.N.S. Rly. There are ruins of a castle. The town has cattle and sheep fairs and its interests are agricultural. Pop (1931) 1753.

San Remo City and health resort of Italy. It is on the Riviera, 26 m. from Nice. The old city stands on a hill a little away from the sea. Here, in 1920, the Allies held one of their conferences. Pop 24,740.

San Salvador City and capital of the Republic of Salvador. It is connected by railway with the coast, which is 25 m. away. There is a considerable trade and some manufactures. The city is named from the extinct volcano of San Salvador near the town. Pop (1930) 85,692.

Sansculottes Insulting nickname given by the French aristocrats, at the beginning of the French Revolution, to the proletarian members of the Revolutionary army, who wore long trousers, instead of the fashionable knee-breeches. At first very popular, the name fell into disrepute after the atrocities.

San Sebastian Town, watering place and seaport of Spain.

It is on the Bay of Biscay, only a few m. from the border of France. There is a fine bay and casino. Its popularity dates from 1886 when the Queen of Spain made it her residence and until 1931 the royal family retained here their palace called Miramar.

At one time San Sebastian was a strong fortress, but its walls have been pulled down. In 1813 it was stormed by the British under Wellington, who was advancing into Spain. Its castle was then taken and destroyed. The town has some manufactures and there is a little shipping. It has a broadcasting station (453.2 M., 0.6 kW). Pop (1931) 80,119.

Sanskrit "with," and *kṛita*, "perfected," the compound signifying "to perfect," indicating the superiority of Sanskrit, the ancient Indian language, over Prakrit, the dialect tongue. Sanskrit represents the Eastern branch of the Aryan tongues and dates from about 1500 B.C. It is the elder sister of Persian, Greek, Latin, Tenthonic, Slavonic and Celtic languages. Its literature falls into two periods, vedic and classical, to the latter period, being the two great epic poems, *Mahabharata* (by Vyasa), and the *Ramayana* (poem of Rama, by Valmiki), together with romances, dramas, philosophical, scientific and technical literature.

Sansovino Andrea. Italian artist. Born in 1460, he studied art in Florence and became known as a sculptor and an architect. He assisted in decorating the baptistry at Florence and was responsible for the Sforza monument in the church of S. Maria del Popolo in Rome. He died Nov. 27, 1570.

San Stefano Town of Turkey. It is on the Sea of Marmara, 7 m. to the west of Istanbul. The Cape of San Stefano is a landmark. By a treaty between Russia and Turkey, signed here on Mar. 3, 1878, Bulgaria, Rumania, Serbia and Montenegro became independent of Turkey, and Russia obtained several concessions.

Santa Barbara City of California, 100 m. from Los Angeles. The Southern Pacific Rly. serves the city. It is a picturesque place of Spanish origin. Pop (1930) 33,613.

Santa Cruz Capital and seaport of the Canary Islands. It stands on the north-east coast of Tenerife and has a good harbour protected by a mole. The city is pleasantly situated and has a delightful climate. Much produce is exported and it is an air station. Pop (1931) 63,052.

Another Santa Cruz is the capital of Palma, a smaller island of the Canary group. It also is a seaport.

Santa Cruz Island of the West Indies. It is one of the Lesser Antilles, 60 m. from Porto Rico, and belongs to the United States. Its area is 84 sq. m. and it is 21 m. in length. The chief towns are Christiansted, the capital, and Frederiksted. The chief product is sugar. Santa Cruz was a Spanish possession and later a French one. In 1733 it was sold to Denmark by its owners, the French West India Company, and in 1916 Denmark sold it to the United States. In 1801 and from 1807-14 it was occupied by the British. Pop 15,500.

Santa Cruz Group of islands in the Pacific Ocean. They are 100 m. from the New Hebrides. The largest is Ntendi or Santa Cruz. A British possession, the group is part of the Solomon Islands. See SOLOMON ISLANDS.

Santa Fé City and capital of New Mexico, United States. It is on the Santa Fé River and is served by railway. The cathedral is said to be the oldest Christian edifice in the United States. Santa Fé was made the state capital in 1851. Pop (1930) 11,176.

Another Santa Fé is a city of Argentina. It is 95 m. from Rosario and near the Paraná river. It has some manufactures and a provincial university and is the capital of the province of Santa Fé. Pop (1930) 59,574.

Santander City, seaport and watering place of Spain. It stands on the opening of the Bay of Biscay, 315 m. by rail from Madrid. There is a cathedral dating from the 13th century in the old town, where are other buildings of interest, notably the keep of the castle. Shipping is an important industry, for which there is a large and excellent harbour. Iron ore and fish are the principal exports. Pop (1931) 26,381.

Santarem City and river port of Portugal. It stands on the Tagus, 51 m. from Lisbon. Its interest is mainly historical, although it does a little trade in wine. At one time it was a Roman settlement and later was a residence of the kings. There are ruins of a castle and some remains of the town walls. Pop 10,000.

Santiago City of Spain in full Santiago de Compostela. It is in the north-west of the country, only 33 m. from Corunna on the coast. In the Romanesque Cathedral is the shrine of S. James visited by pilgrims. The cathedral cloisters are especially fine. There is a university founded in 1504, which has a large and valuable library. Under the monarchy, the city, which has lost much of its glory, was the headquarters of the Knights of Santiago. It had a pantheon which was burned down in 1921. Pop 26,000.

Santiago City and capital of Chile. It is finely situated on a plain, 1860 ft. above sea level, below the Andes, on the river Mapocho. An up to date city. It has some fine buildings including the cathedral (rebuilt 1748) in the handsome Plaza de la Independencia, the Capitol and the University of Chile founded in 1842. The principal industries include breweries, flour and knitting mills, foundries, machine shops and soap and clothing factories. It is connected with Valparaiso (q.v.) by rail.

Founded in 1541 by Pedro de Valdivia, the conqueror of Chile, the city has suffered from floods, earthquakes and political upheavals, but has never been actually besieged. An international conference of American states was held here in 1923. Pop (1932) 702,431.

Santiago City and seaport of Cuba. It stands on the Bay of the same name, 540 m. by rail from Havana. There is a large harbour and a good deal of shipping. Other industries are connected with the minerals found in the neighbourhood and with tobacco. From 1515 to 1556 Santiago was the capital of Cuba. It was taken by the Americans in July, 1898. Pop (1930) 44,975.

Santo Domingo (Dominican Republic) Republic of the West Indies. It occupies the western part of the island of Santo Domingo and covers 19,332 sq. m. Santo Domingo is the capital and Puerto Plata is the chief port. The republic produces sugar, tobacco, coffee, etc., as well as much useful timber. Cattle are reared

and it is rich in minerals. The republic has a railway system.

Santo Domingo is governed by a president and ministry responsible to a legislature of two houses. The republic was founded in 1844. From 1916 to 1924 it was occupied by American troops. The existing constitution dates from 1929 (modified 1934). The language spoken is Spanish, but racially the inhabitants are very mixed. Pop (1932) 1,200,000.

Santos City and seaport of Brazil. It stands on an island off the Atlantic coast, 40 m. by rail from São Paulo and 230 m. W.S.W. from Rio de Janeiro (q.v.) and is low lying, but has a good harbour with accommodation for 50 vessels. The world's greatest coffee port. It also exports sugar, rice, rum, hides and manufactured goods. Bananas are grown nearby. Pop (1930) 160,000.

Saône River of France. It rises in the Vosges Mts. and flows mainly south until it joins the Rhône at Lyons. Canals connect it with the Rhine on the one side and the Loire on the other. Its length is 282 m.

Sao Paulo City of Brazil. It stands on the River Tietê, 49 m. by rail from Santos and 308 m. from Rio de Janeiro. The city is well built and progressive, with excellent public buildings, schools, hospitals and a fine theatre. It manufactures textiles, clothing, food products, furniture, etc. Electric power is supplied for industry from the falls of the Tietê. On the Plain of Ypiranga, near the city, Brazilian independence was declared, Sept. 7, 1822. Pop (1930) 879,788.

Sap The fluid contents of the plant cells and tissues, the sap contains a number of substances in solution or suspension in water which is derived from the soil by root absorption. Nitrates and other inorganic salts, amides, sugars, pigments, and organic acids may be present. The sap diffuses from cell to cell, thus carrying food materials to the tissues.

Saponification Chemical term meaning the decomposition of fats which are glycerolesters of the fatty acids (stearic, palmitic, butyric, etc.), by the action of alkalis resulting in the formation of soap. It is now usually referred to as hydrolysis, which covers the decomposition of other esters involving the addition of the elements of water.

Sapper Name given unofficially to a private in the Royal Engineers. Originally a sapper was a soldier employed in digging saps, or ditches below the surface, in order to facilitate the attack on a fortress. From 1813 to 1856 the British Army had its corps of sappers and miners, and the Indian army still has a similar force.

Sapphire Precious stone. The sapphire is a blue variety of corundum, the colour varying from different shades of blue to lilac, the most valuable stones being of a bright cornflower blue. It is found in Siam, Burma, the river gravels of Ceylon and in granites in Kashmir.

Sappho Greek poetess. She lived in Mytilene in the 6th century B.C. There are several traditions about her, one being that she was banished and passed her last days in Sicily. She was regarded as one of the great poets of antiquity, her extant work, although very scanty, bears out this high estimate. It includes two poems and several fragments, one poem being an ode to Adonis.

dite, they are sensuous, but possess exquisite felicity of language

Saracen Word used at one time for an Arab and later for a Mohammedan. It referred especially to a Mohammedan of high birth who fought against the Crusaders

Saragossa City of Spain. It is on the Ebro, 212 m. N.E. of Madrid. There are two cathedrals, one old and the other new, and a university, also a citadel built by the Moors, and some ancient houses. The bridge across the river is notable. Before the union of Spain, Saragossa was the capital of the kingdom of Aragon. It has now become a prosperous manufacturing centre. It was unsuccessfully besieged by the French, 1808-9. Pop (1931) 177,250

Sarasate Pablo Martin Meliton. Spanish violinist. Born at Pamplona, March 10, 1844, he became one of the great masters of the violin, and played in many parts of the world. In 1861 he first played in London. He died at Biarritz, Sept 21, 1908

Sarawak State of Borneo. It is in the N.W. of the island and covers 50,000 sq. m., with a coastline of about 500 m. on the China Sea. There are several rivers, one being called the Sarawak. In the E. are mountains rising to 10,000 ft. The soil is fertile and coffee, rubber, pepper, sago and other tropical plants flourish. Gold and coal are mined, and the state possesses valuable oil fields and great reserves of timber. Kuching is the capital.

The state is ruled by a rajah assisted by two councils. The people are chiefly Malays, Dyaks and Chinese. Sir James Brooke, an Englishman, became rajah in 1842, and the office has since been held by his descendants. Sir James obtained the territory from the Sultan of Brunel, and his land came under British protection in 1888. Pop 475,000

Sarcoma Medical name for a malignant form of tumour developed in connective tissue and differing from carcinoma (cancer) in having more fibrous tissue. Sarcomata may occur in the skin and underlying tissues, the breast, perosteum or wherever there is connective tissue. As the disease spreads into neighbouring parts, it may cause death by pressure upon some vital organ.

Sarcophagus Stone coffin used especially in ancient Egypt as a receptacle for the mummified body. A sarcophagus was made of granite, basalt, quartzite, limestone or alabaster, and in many cases bears inscriptions and tableaux. At first stone sarcophagi were reserved for kings, but later came into more general use.

Sard Variety of chalcedony of a brownish-red colour and somewhat horny lustre, thus differing from carnelian which has a waxy lustre. It is cut and engraved for use in signet rings.

Sardanapalus King of Assyria. He reigned probably about 900 B.C., and may have been Ashurbanipal who reigned about 650 B.C.

Sardine Small fish preserved in oil. In England the word is used only for a pilchard when it is preserved and tinned. These sardines are a popular article of food. At one time the word referred to a kind of herring caught off the coast of Sardinia, hence the name.

A species of herring, found off the E. coast of the United States is called the American sardine.

Sardinia Island in the Mediterranean Sea. An Italian possession, it lies 7½ m. S. of Corsica and has an area of 9,299 sq. m. The island is mountainous and the climate variable. Agriculture is the principal occupation and stock is raised. Of minerals, lead, zinc and salt are the most important. There is a large tunny fishery. There are universities at Cagliari, the capital, and Sassari. La Maddalena, Terranova, Cagliari and Porto Torres have good natural harbours. Pop (1931) 973,125.

Sardinia has a long and interesting history. Occupied by Carthage about 500 B.C., it was ceded to Rome in 238 B.C. In the 8th century of our era it was invaded by the Saracens, was taken by Pisa in 1050 and by the King of Aragon in 1326. From 1478 it was governed as a Spanish vice-royalty until 1708, when it became an Austrian possession. In 1720 it passed to the dukes of Savoy who took the title of king of the island. In 1848 the island was united politically with Piedmont (q.v.) and in 1861 Victor Emmanuel II (q.v.) became king of united Italy.

Sardis Capital of the ancient kingdom of Lydia. The site is 50 m. N.E. of Smyrna in Asia Minor, and is represented by a village called Sart. Having been the capital of Lydia, the city was taken by the Persians in 546 B.C. and by Alexander the Great in 334 B.C. Under the Greeks it was a flourishing city. In Roman times it had a bishop and was one of the seven churches mentioned in the Book of the Revelation. It was destroyed by Timur in the 15th century.

Sardonix Variety of red banded onyx, consisting of alternate layers of carnelian or sard and chalcedony, the sardonix is used as a gem stone for rings, etc.

Sardou Victorien. French dramatist. Born in Paris, Sept. 5, 1831, he married the actress Brécourt, and through her met Dujazet, for whom he wrote *Monsieur Garat*, and *Les Près Saint-Gervais* (1860). He wrote several plays including *Les Intimes* and *Les Vieux Garçons*, and later, in 1883, began to write for Sara Bernhardt, with *Tédora*, followed by *La Tosca* and with Moreau, *Madame Sans Gêne*. He wrote *Robespierre* (1899), and *Dante* (1903), for Irving. He had a good sense of the theatre, and his dialogue was full of movement, quick, easy and witty. He died Nov. 8, 1908.

Sargasso Sea Section of the Atlantic Ocean. It lies S. of Bermuda and extends eastwards. It is distinguished by the masses of brown seaweed that float therein, especially the weed called *Sargassum bacciferum* washed from the coast in great masses. The Sargasso Sea was discovered by Columbus, and for long had an evil reputation with sailors who feared destruction if they sailed their ships among its masses of seaweed.

Sargent John Singer. English artist. He was born in Florence in 1856, his parents being Americans, and studied art there and in Paris. His work, exhibited in Paris and London, soon made him known. In early life he made his home in England, and exchanged his American nationality for a British one. In 1894 he was elected A.R.A., and in 1897 R.A. He died April 14, 1925.

Sargent painted landscapes, but his fame rests more upon his portraits, notably his

paintings of Ellen Terry as Lady Macbeth, and of the members of the Wertheimer family. The Tate Gallery contains these and other examples of his work including the beautiful "Carnation, Lily, Lily, Rose."

Sargon King of Assyria. The name is properly spelt Sarrukīn. He made himself king in 722 B.C., and reigned for 17 years. A great conqueror, he brought many cities under his power. He died in 705 and was succeeded by his son Sennacherib.

Another Sargon was a king of Akkad. He lived about 3000 B.C., and founded a powerful dynasty.

Sari Bair Hill in Gallopoff. It is nearly 1000 ft. high, and came into prominence in April, 1915, when it was attacked by Australian and New Zealand troops who had landed near Gaha Tepe. They gained some successes, but a sustained advance proved impossible.

Sark One of the Channel Islands. It is 6 m. from Guernsey and consists of two parts, divided by a causeway called the Conqée. It is 3 m. long and covers about 2 sq. m. The only harbour is Creux on the E. coast. The island is famed for its caves and its cliffs which are unrivalled for their magnificence. It is governed from Guernsey, and the inhabitants are engaged in fishing and farming. Pop. 900.

Sarnia City and river port of Ontario. It is on the St. Clair River, 170 m. from Toronto, on the C.N. Ry. Sarnia is a calling place for steamers between the Great Lakes and the St. Lawrence, and its industries include lumber mills. Pop. (1931) 18,191.

Sarpi Fra Paolo, Italian writer. Born in Venice in 1552, he joined an order of friars and passed his early years in studying science in Venice, and soon made a reputation by his researches. Defending the cause of Venice against the pope in 1606, he was excommunicated, and more than once was almost murdered. He died Jan. 15, 1623. Sarpi, although a Roman Catholic, denounced the doctrine of papal infallibility. His chief work has been translated into English as *The History of the Council of Trent*.

Sarraïl Maurice Paul Emmanuel, French soldier. Born at Carcassonne April 6, 1856, he entered the army as an officer in 1877, and later became an officer in the Foreign Legion. He was given command of an infantry school in 1891, and in 1905 of a regiment. In 1914, when the Great War began, he was in command of an army corps. Soon he was transferred to the head of the third army, and in Aug., 1915, was sent to Salonika as commander of the forces. In 1923-25 he was High Commissioner in Syria.

Sarsaparilla Dried rhizome and roots of various species of *Smilax*, especially *S. officinalis*, climbing plants native to C. America. Sarsaparilla is credited with diuretic and alterative properties and is used in the form of an extract and decoction. It contains a volatile oil, a bitter principle known as parillin, and starch.

Sarthe River of France. It rises in the N. of the country and flows mainly S. until it joins the Mayenne, the two forming the Maine, a tributary of the Loire. It is 175 m. long and on it are Alençon and Le Mans. The department of Sarthe covers 2409 sq. m. in the N.W. of the country. The capital is Le Mans.

Sarum Latin name for Salisbury. Old Sarum is 2 m. away from the modern city. It was vacated in the 13th century when the present city was built, but until 1832 it sent two members to Parliament. The site is now national property and has been excavated.

The Use of Sarum is a service book drawn up for the use of the diocese of Salisbury in the 11th century. Much of it was incorporated in the Prayer Book of the Church of England.

Saskatchewan Province of Canada. It lies between Manitoba on the E. and Alberta on the W., and stretches from the N.W. Territories to the border of the United States. It covers 251,700 sq. m. Regina is the capital and the largest city. Others are Saskatoon, Moose Jaw and Prince Albert. It is the chief wheat growing province of Canada and its live stock industries are of great importance. Other branches of agriculture flourish, and there are some manufactures. The province is governed by an executive council of 10 members under a premier, responsible to an elected legislature of 63 members. It was made a province in 1905. Pop. (1931) 826,738.

Saskatoon City of Saskatchewan. It is 480 m. W.N.W. of Winnipeg, on the S. Saskatchewan River. The industries include the manufacture of agricultural machinery, bricks and clothing, and the place is the centre for a large agricultural district. It is served by both transcontinental railways, the C.P.R. and C.N.R. There is a university and an agricultural college. Pop. (1931) 43,201.

Sassafras *Deodendrus* tree (*S. officinale*) of the order *Lauraceae*. The wood is soft and yellow and the racemes of yellow flowers are succeeded by dark purple berries. The bark has aromatic and tonic properties. Sassafras tea is made from the leaves and the berries yield an oil used for flavouring, and in perfume, and for medical purposes.

Sassanid Name of a family that ruled in Persia from 226 to 651. It was founded by a chieftain called Ardashir, who conquered the Parthian rulers of the land, which his successors retained until 651.

Sassoon Jewish family of bankers and merchants. David Sassoon moved from Bagdad to Bombay early in the 18th century, and there his son, also David Sassoon, founded a trading business. This came under the control of the younger David's son Jacob Elias Sassoon who made it one of the greatest concerns of its kind in India. In 1009 Jacob Sassoon was made a baronet, and when he died, Oct. 24, 1916, this title passed to his brother Edward Elias.

Edward Albert Sassoon, a member of another branch of the family, settled in England where he was one of the intimates of King Edward VII. In 1896 he succeeded to his father's baronetcy, and from 1899 to 1912—when he died—he was M.P. for the Hythe division of Kent. His son, Sir Philip A. G. D. Sassoon, has represented the same division since 1912. He was Under-Secretary for Air from 1924 to 1929, and returned to that post in 1931, and after the General Election of 1935.

Siegfried Sassoon is a modern poet and writer. His *Memoirs of a Fox Hunting Man*, published in 1928, followed by *Memoirs of an Infantry Officer* form an autobiography of

his war service He was awarded the Hawthornden Prize in 1929

Satellite In astronomy a term applied to a companion body to a planet round which it revolves. A satellite is regarded as having been thrown off from the planet when in a semi-molten state. All the planets with the exception of Venus and Mercury, have satellites—the earth having one, the moon, Mars, two, Jupiter and Saturn nine each, Uranus, four, and Neptune one. The satellites of Uranus and Neptune, also one each of Jupiter and Saturn, are retrograde in motion.

Satinwood Close-grained, hard, yellow wood used for veneers and cabinet work, derived from an Indian tree, *Chloroxylon swietenia*. W. Indian satinwood is the product of another genus, *Zanthoxylum*.

Satire (Lat., *satura*, a medley). Destructive and censorious form of literary criticism, which operates by ridiculing its object. It may be prose or poetry, a long treatise or a terse sentence. There were satiric poets among the Greeks, notably Aristophanes (*q.v.*). Among the Romans satire flourished as the works of Martial, Lucian, Juvenal and other poets prove. The revival of learning brought about the revival of satire, Erasmus and Rabelais being in a sense satirists, but in England its greatest exponents came later.

In verse Pope and Dryden were remarkably clever as satirists, and in prose their equal was Jonathan Swift. France has produced many notable satirists, Voltaire being perhaps the greatest. The *Don Quixote* of Cervantes is a great satire.

Satsuma Ware Variety of Japanese pottery originally made at Satsuma by a colony of Korean potters in the 16th century. It was made of a soft paste with a creamy yellow body and clear cracked glaze of various colours. Later forms of Satsuma ware were made of harder paste with richly coloured enamels.

Saturn Planet next beyond Jupiter and the most remote known to the ancients. Saturn's equatorial diameter is 73,713 m., and its mean distance from the sun is 886,779,000 m., its year being equal to 29.46 of our years. It has nine satellites, and is remarkable for its meteoric ring system.

Satyr To the Greeks a mythological woodland deity. He was half-man and half-goat, with horned head, pointed ears and a tail. Persons representing satyrs attended the god Bacchus at the feasts held in his honour.

Sauerkraut Popular German dish. It consists of cabbage finely shredded and placed in a cask with alternate layers of salt, juniper berries, caraway seeds and other condiments. When full the contents are heavily weighted and left till fermented, when the sauerkraut is ready for use.

Saul First King of Israel. A member of the tribe of Benjamin, he was a son of Kish, and at first fought with great success against the Philistines. Later, after consulting the witch of Endor, he met the Philistines in a last battle at Mount Gilboa, where his sons were killed and he himself committed suicide. The chief interest of his reign lies in his relations with David, his successor and the close friend of his son Jonathan.

Sault Sainte Marie Name of a rapid in St

Mary's River, between Lakes Superior and Huron. It gives its name to two ship canals and two towns. The canals were cut, one in Canada and the other in the United States, to avoid the rapids. Each is about a mile long, and has 20½ ft. of navigable water. The American Canal was opened in 1855 and the Canadian in 1895, the latter has one lock 900 ft long and 60 ft wide. The towns face each other across the river and are connected by railway, forming an important link between the railways of the U.S.A. and Canada. The Canadian town has some manufactures, while trade comes from the shipping on the canal. Pop (1931) 23,682. The American town is in the State of Michigan. Pop (1930) 13,755.

Sauterne District of France. It is S. of Bordeaux and gives its name to a famous white wine made from vines grown in the region.

Savanna Land covered with natural grass. It is found in tropical countries and on it the vegetation grows very rapidly in the rainy season. The lands are called llanos in Venezuela, downs in Australia and campos in Brazil.

Savannah City and seaport of Georgia, United States. It is on the Savannah River, 18 m. from its mouth, and is served by several railway lines. It is a prosperous seaport from which much cotton is exported and has a good harbour with large docks. Other industries are railway shops and manufactures of various kinds. It is also a station of the United States navy. Pop (1930) 85,024.

The Savannah River rises on the borders of Georgia and S. Carolina, and falls into the Atlantic below the city which is named after it. It is 450 m. long and small vessels can navigate most of its course.

Savernake Forest in Wiltshire. It is just outside Marlborough and covers about 20 sq. m. It is beautifully wooded, the trees being chiefly oaks and beeches. Part of it belongs to the Marquess of Ailesbury, who has a residence here. The village of Savernake is on the G.W. Ry.

Savings Bank Bank where money can be deposited, but which does not undertake other banking business. The Post Office Savings Bank, run by the Government, takes any sum up to £500, and allows interest at the rate of 2½ per cent per annum. Trustee savings banks are conducted by private persons, but their accounts are inspected by state officials. There are municipal savings banks in Birmingham and other places, and some of the great joint stock banks have savings bank departments, from which they issue home safes.

In 1934 there were 9,400,000 deposit accounts in the Post Office Savings Bank. The amount due to depositors on Jan. 1, 1935, was £354,831,000. In the trustee savings banks, which have 494 offices in Great Britain and Ireland, nearly £227,000,000 was deposited. There is a Trustee Savings Bank Association at 10 Gray's Inn Square, London, W.C.1.

Savings Certificate Document signifying the investment of money in funds guaranteed by the state. War Savings Certificates were introduced during the Great War and sold for 15s 6d., 21 being repayable at the end of five years, or a proportionate amount earlier.

At present a Savings Certificate costs 15s and £1 is repaid for it at the end of ten years. The interest is not liable to income tax, but no person can acquire more than 500 certificates. The certificates can be redeemed at any time before the end of the ten years, with proportionate interest.

To encourage the sale of these certificates, a National Savings Committee was set up at Sanctuary House, Westminster, S W 1, and a similar organisation for Scotland, at 122 George Street, Edinburgh. Altogether from 1916 to Aug. 1935, 1 235,589,002 certificates were sold. In 1935 the amount invested in this way was about £500,000,000.

Savonarola Girolamo Italian roll former Born at Ferrara on Sept. 21, 1452, he became a Dominican monk and preached on the sinfulness and vanity of his generation. After the death of Lorenzo the Magnificent in 1492, he led his party in the new republic and ruled Florence as a Christian commonwealth sternly putting down all luxury and frivolity. An attempt to reform the Roman court and put an end to the irregularities of the clergy brought him into conflict with the Church. He was accused of heresy by Rome, and excommunicated. The new system in Florence failed, and the Medici party returned to power. Florence turned against him completely, and he was burned on May 23 1498.

Savory Genus of herbs. There are two main kinds: summer savory (*Satureia hortensis*) and winter savory (*Satureia montana*). Both grow in the warmer parts of Europe and bear lilac and purple flowers. With a pleasing aromatic flavour, they are used as potherbs.

Savoy Name of the family of which the King of Italy is the head. In 1034 a certain Humbert became Count of Savoy, and his descendants added from time to time to their inheritance. In 1418 one of them called Amadeus was made a duke. Later dukes were prominent in the affairs of Europe, and in 1720 one of them, Victor Amadeus, became King of Sardinia. Savoy itself was ceded to France in 1860, but the king was more than compensated when, in 1870, he became King of Italy.

Savoy District of France. It lies between the Alps, the Rhône and the Lake of Geneva, and is divided into two departments of Savoie and Haute Savoie. In 1034 it became a county and then a duchy, and it was ruled by its counts and dukes until 1860, by which time they had become kings of Sardinia. Chambéry was its capital. It was French from 1792 to 1816. In 1860, in return for the assistance given by Napoleon III to Italy, Savoy was ceded to France, but Italian influences are still strong therein.

Savoy District of London. It lies between the Strand and the Thames, and is named after Peter of Savoy, who was given the land by Henry III. A royal palace built here was destroyed by the rebels about 1381, and later a hospital was built on the site. The chapel in Savoy Street still stands. The place was a sanctuary for criminals. It was made a chapel royal by George III, restored in 1864, and closed on account of structural defects in 1932. It has some fine stained glass, and in it some notable persons are buried.

The name is also borne by an hotel which was opened in 1889 and afterwards enlarged, and a theatre. The theatre, opened in 1881,

was made famous because the Gilbert and Sullivan operas were produced here.

Savoy Cabbage Hardy variety of cabbage with a dark green wrinkled leaf. It is ready to eat in autumn and winter when other greens are scarce. Both dwarf and large varieties are to be had.

Sawbridgeworth Urban district of Hertfordshire. A market gardening centre, it is 27 m. from London by the L N E Rly. Pop. (1931) 2804.

Saw Fly Insect of the order Hymenoptera. The female is provided with a short serrated ovipositor with which eggs are made in leaves for the reception of the eggs. Many of them are very destructive to plants, especially the rose pine and turnip saw flies.

Saxhorn Brass wind instrument. Of winding tubular form, it is used for orchestras and military bands. Like the cornet it has a bell shaped opening and the pitch can be lowered by the use of pistons.

Saxifrage Genus of herbs of the natural order saxifragaceae. There are over 150 recognised species. Many of the Alpine varieties are cultivated for use in rock gardens. They are of low compact habit, the rosettes of tiny leaves forming a cushion like growth, bearing delicate white or rosy flowers on slender stems. Yellow and purple varieties are also obtainable. London Pride (*S. umbrosa*) a British variety, is very popular for edgings in the flower garden.

Saxmundham Urban district and market town of Suffolk. It is 20 m. from Ipswich and is a junction on the L N E Rly. There is an agricultural trade. Pop. (1931) 1259.

Saxons Teutonic race or group of races. They lived in the modern Slesvig-Holstein, and about A.D. 300 appeared as pirates. Later they spread into what are now France and Germany, and crossed to England, where many of them settled. The extent of their influence on the development of England was undoubtedly considerable, both in race and language. The Saxons also spread over a good part of Germany and gave their name to the various districts called Saxony. They made themselves into a great federation, and carried on a long war with Charlemagne. In the end they were beaten and forced to become Christians.

Saxony Republic of Germany. It is in the centre of the country, bounded by Czechoslovakia, Prussia and Bavaria, and covers 5787 sq. m. Much of it is a busy industrial area, but it contains districts of great beauty especially in the S.W. where is the Saxon Switzerland, as it is called. Dresden is the capital, but Leipzig is somewhat larger. Chemnitz and Plauen are manufacturing towns. Freiberg is a mining centre. The chief river is the Elbe, others are the Mulde, the Elster and the Spree. Wheat and other cereals are grown and mining is an important industry. The people are chiefly Protestants. The government is in the hands of a premier and a council of ministers responsible to an elected diet. The Germans call Saxony Sachsen and the French call it Saxe. Pop. (1933) 5,196,652.

The original Saxony was a district in the N. of Germany inhabited by the Saxons. It was one of the great German Duchies and in

1919 Duke Henry was chosen German King. In 1180 the duchy was broken up, but its name was kept by a small district on the Elbe, around Wittenberg. The ruler of this became an elector, and several of his successors were important persons in German history. This was seen at the time of the Reformation, which took its rise in Saxony, and in the Thirty Years' War. With other German States Saxony was divided more than once, the most important partition being that of 1485.

During the war of Napoleon's time the Saxons were usually on the side of France. The elector was made a king for these services, but in 1814 when peace was arranged, a good deal of his land was given to Prussia. He kept, however, his kingly title. In 1866 Saxony took the side of Austria against Prussia, but in 1871 it joined the new German Empire. In Nov. 1918, it was declared a republic, and a constitution was given to it. In 1920. From 1934, however, the rights of the Federal States, including Saxony, were greatly restricted.

Saxophone Musical wind instrument. It is of brass, with 20 finger keys, and rather resembles the clarinet. It is fitted with a single-reed, and is made in various sizes and keys. The instrument is named after its inventor, Adolphe Sax.

Sayers Tom, English pugilist. He was born in Pimlico on May 25 1826, and was at first a bricklayer. He had his first fight in 1849, and was only beaten once in his professional career. His last fight was in 1860, against Heenan, in which neither won, and Sayers was given a purse of £3000. He died on Nov. 8, 1865.

Scabious Annual and perennial herb of the genus *Scabiosa* known also as pin-cushion flower from the shape of the flower-heads. The colours range from blue, through shades of red, to white. The garden scabious has been developed from 8 European varieties. Wild English examples are the devil's bit and the field scabious.

Scafell Mountain of Cumberland, at the E. end of Westwater. Scafell Pike, 3210 ft., is the highest peak in England. The summit was presented to the National Trust by Lord Leconfield in 1919.

Scaffold Platform or stage erected for display of a spectacle, e.g., in former times, a public execution. The term now refers to a temporary framework for supporting a building during its erection or alteration and forming as well platforms for the use of the workmen. Ordinary scaffolding consists of a framework of poles or steel tubing lashed together with strong tarred hemp cord or with galvanised flexible steel wire. Putlogs or cross-pieces with their inner ends fitting into holes in a wall, are also used, also platforms of planks.

Scalby Urban district and seaside resort of Yorkshire (N.R.). Standing on the North Sea, it is picturesquely placed 1 m. to the N. of Scarborough. It is 232 m. from London, on the L.N.E. Rly. Pop. (1931) 2771.

Scale Graduated measure, the divisions of which are related to a given unit, and used for reducing or enlarging maps, plans or drawings in proportion to their natural dimensions. Thus a scale of one inch to the mile may be used. Boxwood and Ivory

rules are made with various scales in common use marked upon them.

Scale Name given in music to the series of sounds, of varying pitch, which goes to make up the octave. It is thus the key to all harmonic music. The Greeks recognised three kinds of scale, which they called diatonic, chromatic and enharmonic, of these the enharmonic is believed to be the oldest.

Scale Flat, hard, bony or bony structures present on the skin of various animals. In most fishes bony scales are developed from the dermis, in reptiles and birds horny epidermal scales occur and among mammals on the armadillo and pangolin also on the tails of rats, mice, beavers and some marsupials.

Scaliger Joseph Justus, 1540-1609. The greatest scholar of the Middle Ages. Born at Agen in 1540 the tenth child of Julius Caesar Scaliger, he was sent to the College of Guienne at Bordeaux, and afterwards became his father's amanuensis, attaining a knowledge of Latin unequalled by any of his contemporaries.

He spent four years from 1558 at the University of Paris, where he became a Protestant, and later travelled in Italy, England and Scotland with Louis Chastaigner de la Roche Pozay.

Settling in France in 1574, he founded a new school of classical criticism and revolutionised the study of ancient chronology. In 1593 he was appointed professor at Leyden, where he remained, the literary dictator of Europe, till his death, Jan. 21, 1609.

Scaliger Julius Caesar, French physician, soldier, scholar and writer. Born about 1484 at La Rocca on the Lake of Garda, about 1525, he became physician to the Bishop of Agen, remaining in that city till his death. A past master of Latin verse, he wrote many commentaries on scientific subjects, and gained notoriety by an unusually venomous attack on Erasmus. His fame is overshadowed by that of his son, Joseph Justus. He died Oct. 21, 1558.

Scalp Outer covering of the cranium. The scalp is formed of several layers, the outermost being the skin bearing sweat and sebaceous glands and hair follicles, next the superficial fascia, a fibrous layer connecting the skin to the underlying occipitofrontal muscle and its aponeurosis, which covers in turn a layer of loose areolar tissue.

Scalping Custom of removing the skin of the skull with hair attached, as proof of a warrior's prowess. Practised from very early times, e.g. among the Scythians and the early Celts and Teutons, it is chiefly associated with the N. American Indians, among whom it was attended with elaborate ritual.

Scandinavia Collective name for the peninsula of N. Europe consisting of Norway and Sweden, and Denmark. The term comes from Scandia, which was an old name for S. Sweden. Scandinavia is very rich in antiquities, especially of the Viking period, including bronze, gold and silver work of high artistic excellence. For the first 400 years of the Christian era Scandinavian art was strongly influenced by that of Rome. The later silver filigree work shows Irish influence.

Scapa Flow Harbour of the Orkney Islands. Almost entirely landlocked, and studded with numerous

islets, it is about 15 m. long and from 8 to 12 m wide. For some time during the Great War it was the chief base of the British Grand Fleet. It was in Scapa Flow that the German Fleet was interned after its surrender in Nov., 1918. Many of the German ships were scuttled on June 21, 1919, but later several were salvaged.

Scapegoat Term used among the early Hebrews for one of the two goats brought to the Temple on the Day of Atonement (Lev. xvi). One of these was sacrificed, the other was the scapegoat. Over its head the high priest confessed the sins of the people, and then it was driven into the wilderness to carry its burden to the evil spirit, Azazel.

Scapula Anatomical name for the shoulder blade, a triangular bone placed at the upper part and back of the shoulder. It is held in position by powerful muscles to the arm, thorax and back.

Scarab General name for an Egyptian amulet representing the sacred beetle, *Scarabaeus sacer*, the symbol of Khepri, a creative form of the sun god. Scarabs were made in many materials such as various stones, glazed faience and, rarely, of metal or ivory. There are many varieties of scarabs, some perforated for signet rings or for stringing on a necklace, others with names, designs or inscriptions engraved on the base. Funereal scarabs, often of large size, were inscribed with portions of the Book of the Dead.

Scarborough Borough and watering place of Yorkshire (N.R.), 42 m. from York, on a bay divided into North and South Bays by a peninsula, the Scaur. There is a tidal harbour, used by coasting and fishing vessels. St. Mary's church dates from the 13th century, and there are ruins of a Norman castle. The town has two mineral springs. A Roman station, Scarborough was early important. It was burnt by Harold Hardrada (c. 1066), and by the Scots in 1318 and was twice besieged in the Civil War. During the Great War it was shelled by the Germans. Pop. (1931) 41,791.

The title Earl of Scarborough, has been held by the family of Lumley since 1690.

Scarlatti Alessandro Italian composer. Born in Sicily in 1659, he was only twenty years of age when his opera *L'Errore Innocente*, was produced in Rome. Five years later he was made master of the court music at Naples, and henceforth he divided his time between Naples and Rome. His works include over 100 operas and upwards of 500 chamber cantatas. His most important work in church music is the St. Cecilia Mass. He died Oct. 24, 1725.

Scarlet Bright red colour obtained from various pigments and dyestuffs. The scarlet dye formerly used for dyeing cloth or for preparing a scarlet pigment for painting was made from the cochineal insect, but now more permanent dyestuffs are made from coal tar derivatives.

Scarlet Fever Infectious disease characterized by high fever, sore throat, and a red rash. After infection the symptoms take from one to seven days to appear. The rash, which often starts on the second day, spreads very quickly, and at its height covers the whole body. The fever dies down as the rash disappears, and the upper surface of the skin flakes off. The patient should be isolated.

Scaup Kind of wild duck. It visits Great Britain in winter. It is common on estuaries and seashores where mussels abound. The head of the male is glossy black and green, neck and back black, wings and tail brown, with underparts white. The female has a white face, and is less brilliantly coloured than the male.

Scent Odour or perfume produced by essential or volatile oils in plants and by certain secretions in animals. In plants oil glands may occur in leaves, glandular hairs or the petals of flowers, the scent serving as a protection against insects or in flowers for the attraction of insects in pollination. Scent glands occur in many animals and serve as a defence against enemies, a means of recognition of their own species, or for sex attraction. See PERFUME.

Scepticism Term used to describe the philosophical theory of those who deny (1) current or customary beliefs, or (2) the possibility of knowing reality. Pyrrho of Elis (c. 300 B.C.) was a notable sceptic among ancient philosophers. In modern times Pascal is a representative of a scepticism which depreciates the value of scientific knowledge, while on the other hand Hume's scepticism is based on a thoroughgoing sensualism which takes its stand on physical science.

Sceptre Staff or rod borne by kings as an emblem of authority and royal power. It is usually adorned with some symbolic emblem. Both in Egypt and Greece gods as well as kings had sceptres, and among the Romans the sceptre was originally a spear. In the English regalia three forms of sceptre are used in the coronation ceremony.

Scheldt Important waterway of western Europe. Rising in France it flows through Belgium and the Netherlands, and near Doel, divides into the W. Scheldt, or Hond, which flows into the North Sea at Flushing, and the E. Scheldt, which reaches the sea farther north. The passage of Sloop joins these two streams. Cambrai, Valenciennes, Tournai, Ghent and Antwerp are among the towns on its banks. The river, which is highly canalised and easily navigable is 250 m. long. Its navigation has long been a fruitful source of dispute between Belgium and Holland. Its Flemish name is Schelde, French, Escaut.

Schenectady City of New York State U.S.A. It is the county seat of Schenectady County, about 18 m. N.W. of Albany. Finely situated on the Mohawk River and the New York State Barge Canal, it is the seat of Union University and an important manufacturing centre, the products including electrical apparatus and motor cars. It has two broadcasting stations (31.48 M., 40 kW and 19.56 M., 20 kW). Pop. (1930) 95,692.

Scherzo Name given to a piece of music of a humorous or sprightly nature. Usually a scherzo forms part of a symphony, sonata, or kindred work. Beethoven's wild and breathless scherzos form a striking contrast to the quiet, almost prim minuets of the earlier symphonies, and to the delicate examples of Mendelssohn.

Scheveningen Town and watering place of the Netherlands, on the North Sea, 3 m. N.W. of The Hague. It is the chief bathing resort of the country and has an important herring fishery.

Here De Ruyter defeated the combined English and French fleets in 1673 Pop 27,000

Schiehallion Mountain of Perthshire, 11 m W.N.W. of Aberfeldy It is 3547 ft high Here Nevil Maskelyne carried out his famous experiment for determining the earth's density in 1774

Schiller Johann Christoph Friedrich German poet Born in Marbach Württemberg, Nov 10, 1759, he received a good classical education and was trained, first, for the law, then for medicine, and was appointed military surgeon His first play, *Die Räuber*, appeared in 1782 and created a tremendous sensation by its revolutionary sentiments After a year's work at the theatre at Mannheim, he left for Weimar, later for Leipzig and Dresden *Don Carlos*, his first mature play, appeared 1787 In 1788 he was made Professor of History at Jena, where he married His chief plays were *Wallenstein*, *Die Jungfrau von Orléans*, *Maria Stuart* and *Wilhelm Tell*, and he wrote many beautiful poems He was a great friend of Goethe, next to whom he ranks among Germany's greatest poets He died May 9, 1805

Schipperke Small dog Bred originally in Flanders, it is black with short hair, which at the neck forms a bristling frill It has brown eyes, small sharp ears, but only a rudimentary tail It makes a good watch dog and excellent companion The average weight is about 12 lb

Schism Term meaning a rift, used chiefly for the breaking away of a part of a church or for the separation of one church into two The Great Schism between the East and the West, which divided the Roman Catholic Church and the Orthodox Eastern Church, dates from 1054 The Great Schism of the West, during which the leadership of the Catholic Church was in dispute, lasted from 1378 to 1417

Schist Geological term for a fine grained foliated rock of metamorphic origin occurring in areas where great earth movements have taken place Schists are named after the chief constituent minerals, as in mica schist, consisting of quartz layers alternating with thin plates of mica, or hornblende schist, an aggregate of hornblende and feldspar

Schliemann Heinrich German archaeologist Born Jan 6, 1822, in Buckow, Mecklenburg-Schwerin, he spent his youth in struggle, serving as grocer's apprentice, cabin-boy and book-keeper He had a passion for the Homeric story, and learnt ancient and modern Greek He made a fortune in St Petersburg during the Crimean War and travelled widely, visiting in 1868 the Homeric sites He excavated the Mycenaean Troy at Hissarlik, mistaking it for the Homeric one, and unearthed five shaft graves at Mycenae He wrote several monographs, including *Troy and its Remains* (1875) He died in Naples, Dec 25, 1890

Schnitzler Arthur Austrian dramatist and novelist Born May 15, 1862, the son of a Viennese physician, he at first studied and practised medicine, but later turned to writing, his first work, *Anatol*, being published in 1893 He wrote many brilliant plays and novels, exposing the gay and frivolous Vienna of that day The plays include *Licbele* and *Freuwild*, and the novels *Casanova's Homecoming* and *Fräulein Else* Several of his works have been translated into English He died Oct 21, 1931

Scholasticism Term used for the teaching of the scholastics or schoolmen, the teachers of the Middle Ages, who examined the doctrines of the Church in the light of philosophic ideas The name is derived from the schools established by Charlemagne Scholasticism took on a new form when the writings of Aristotle came to be studied Shaken by the dissensions of the Scotists and the Thomists and, still more, by the increasing interest in science, scholasticism gradually fell into decay

School Primarily a place of instruction, also used for persons holding the same opinions, e.g., the Manchester school Every civilised nation has had its schools for the education of the young, although the idea that all should be taught therein only dates from the 19th century

The schools of Europe in the middle ages were controlled by the priests and were adjuncts to the monasteries Then in England came the grammar schools, a product of the Reformation and similar schools in Scotland, Germany and other protestant countries The public schools grew out of the grammar schools and in the 19th century public schools for girls were founded on the same lines For elementary education schools were provided by the Church of England and Roman Catholics, and in 1871, when education was made compulsory, schools were built out of public funds and conducted on undenominational lines Further developments are the secondary schools and the continuation schools

School Board Committee of men and women in Gt. Britain; elected by the ratepayers, to provide and control elementary education Instituted under the Elementary Education Act of 1870, these bodies were superseded in 1902 by the county and borough councils In Scotland the school boards came to an end in 1918

School of Art Institution where pupils receive training in drawing, painting, and other fine arts In the early days of the Renaissance Italy had schools of art, but it was not until 1711, when Sir Godfrey Kneller opened his school of design, that a similar institution appeared in England Nowadays both the fine arts and the industrial arts are fostered in this way

Schooner Name applied to a particular type of sailing vessel It usually has two masts fore-and-aft rigged or with square topsails on the foremast Some schooners have three or four masts fore-and-aft rigged or the mainmast may have square topsails Some types of yachts also are schooner rigged

Schopenhauer Arthur German philosopher and exponent of systematic pessimism Born at Danzig, Feb 22, 1788, he received a thorough classical education in schools at Gotha and Weimar, and the universities of Göttingen and Jena His principal work, *The World as Will and Idea*, published in 1819, teaches a pantheism of the will Other works are *Will in Nature* and *Freedom of the Will* His whole life was one of internal discord, the subjective and objective—feeling and reason—being continually at war. He died Sept 21, 1860

Schreckhorn Peak of the Bernese Oberland It is S.E. of the Grindelwald, and has an altitude of 13,386 ft. The Klein Schreckhorn, to the N.W., is 11,474 ft. high

Schreiner Olive South African novelist. Born in Basutoland in 1862, she was the daughter of a German missionary. Under the pen name of Ralph Iron she published her first novel, *The Story of an African Farm*, which had an immediate and enormous success. Later writings include *Dreams, Woman and Labour* and *An English South African's View of the Situation* (1899). She died Dec 12, 1920.

Schubert Franz Peter Austrian composer. Born in Vienna, Jan 31 1797, one of the most precocious musicians of all time, at the age of 18 he wrote a symphony, at 18 a mass and *The Erl King*. He was unsurpassed in his facility for putting words to music. He would read a poem and even while he was reading it, he had the music for it in his brain. He left behind him no fewer than 500 songs, as well as 10 symphonies (among them the matchless *Unfinished Symphony*), 8 masses, many sonatas and other works for the piano, string quartets, operas, cantatas, and overtures. He died Nov 19, 1828.

Schumann Robert. German composer. Born in Saxony June 8, 1810, he studied law first, and after much travelling in foreign countries, studied music in Leipzig under Weyck his future father in law. He was a most prolific composer of works for the piano, symphonies, concertos, quartets, songs, and much chamber music. His last years were clouded by insanity. His wife, Clara Weyck, was a splendid exponent of his piano works. He died July 29, 1856.

Sciatica Form of neuralgia of the sciatic nerve. Though not dangerous, it is often very painful. Gout and rheumatism, as well as exposure to damp and cold, are predisposing causes, and the affection occurs chiefly in adult males. Sometimes the pain spreads from the back of the thigh, where it is usually localised, right down to the foot.

Science Term denoting organised and systematised knowledge of the known facts of Nature. In the first place this consists of noticing the resemblances and differences between things seen, and the arrangement of the knowledge thus gained under general truths and principles.

The term is also applied to all forms of systematised knowledge. Science is concerned with the methods of classification, correlation and sequence of facts and phenomena, and the discovery of laws governing these. The different departments of science have been divided into abstract and concrete, the former represented by mathematics and logic, the latter by astronomy, biology, chemistry and physics. The abstract sciences are linked to the concrete by applied mathematics, and similar links occur between the chemical, biological and physical sciences.

Scilly Isles Group of islands off the S coast of Cornwall, about 25 m from Lundy's End. There are included in the county of Cornwall but have their own county council. Identified by some with the Cassiterides and associated with the Lyonesse of legend they comprise 6 large and some 30 small islands, with many islets. The climate is very mild and the vegetation semi-tropical. Flowers and vegetables are raised for the English market. The capital is Hugh Town on St Mary's. Pop 2097.

Scimitar Name given to a short curved sword used in the East, especially by the Turks and Persians. The

blade is broader at the end and has one cutting edge which comes to a point, the back being thicker and shorter. In some types of Turkish scimitars the blade, though curved, does not widen out at the end.

Scintillation Term in astronomy applied to the twinkling appearance of the stars, an optical effect due to variations in the atmosphere through which they are viewed. It is most apparent when a star is near the horizon at its rising or setting. The planet Mercury shares with the fixed stars the phenomenon of scintillation.

Scipio Publius Cornelius, surnamed *Africanus Major*. Born in 237 B.C. after suffering three disastrous defeats by Hannibal (at the Ticinus and Trebia in 218 and at Cannae in 216) he overcame Hasdrubal and his brother, Mago, at Baecula, thus gaining the whole of Spain. His decisive victory over Hannibal at Zama 202 ended the second Punic war. He died 183 B.C.

Scipio Aemilianus Publius Cornelius, surnamed *Africanus Minor*. Born in 185 B.C. he took part in the third Punic war, and was in supreme command at the siege of Carthage. In 147 he took it by storm and by order of the Senate, levelled it to the ground. Like many others, he was the victim of the fickleness of the people, and was killed in his bed, 129 B.C.

Sclerosis Term used in pathology for the hardening of a tissue especially in the central nervous system. In organs such a condition is called fibrosis or cirrhosis.

Scone Burgh of Perthshire, Scotland, on the Tay 2 m north of Perth. It consists of the original town of Old Scone and the modern village of New Scone. In the 8th century Scone became the capital of Pictavia, and here, down to 1488, the Scottish kings were crowned on the Stone of Destiny which is now beneath the Coronation Chair in Westminster Abbey. The old abbey was burned down in 1559. Pop (1931) 2936.

Score Name given to the copy of a piece of music, in which all the parts for instruments and voices, are so arranged that it is possible to appreciate the whole piece at a glance.

Scorpion Arachnid animal of warm countries with claws resembling a lobster's and a jointed flexible abdomen terminating in a sting. The usual length is from one to three inches but species as long as ten inches are found. In the act of stinging the tail is usually bent quickly over the back. The poison of the smaller species is generally more virulent than that of the larger kinds. Though often causing intense pain, the sting is seldom fatal to man.

Scorpion Fly Insect of the family *Panorpidae* so named from the fact that the last few segments of the body can be bent over the back like a scorpion's tail. The head has a conspicuous beak.

Scot and Lot Old term for a sort of parish rate for local expenditure. The word scot comes from an Anglo-Saxon word meaning a payment, and lot means a portion or share. Before the Reform Act of 1832 anybody subject to scot and lot was entitled to vote for members of Parliament.

Scoter Genus of duck (*Oedemia*). Often called black duck, it is a great lover of the sea. It rarely visits land except

for breeding The three British species comprise the common scoter (*O. Americana*), the velvet scoter (*O. fusca*), and the surf scoter (*O. perspicillata*)

Scotch Terrier Small rough-haired terrier It is very hardy, highly intelligent, a first-rate companion, and a splendid ratter For its size the teeth are remarkably large Formerly it was in request for fox-hunting in the wilder parts of the Scottish Highlands, where its gameness made it more useful than the ordinary fox-hound

Scotland Country of Great Britain It occupies the northern part of the island, being divided from England by the Tweed and other streams Covering 29,796 sq m, it is divided into 33 counties It has a very irregular coastline, especially on the west, where are a number of islands The chief groups are the Orkneys, Shetlands and Hebrides, 186 islands are enumerated

Edinburgh is the capital, but Glasgow is much the largest city Dundee, Aberdeen, Paisley and Greenock come next Inverness is the capital of the Highlands The population in 1931 was 4,842,534, a decrease of 40,000 since 1921 Nearly half live in the Glasgow area which includes a considerable Irish element The people are mainly Presbyterians but there are many Roman Catholics The country has four universities, Edinburgh, Glasgow, St Andrews and Aberdeen, and an excellent system of local schools

Scotland is a mountainous country and much of its soil is very poor In the south, however, there are valleys that are extremely fertile It is divided traditionally by the Grampians into the Highlands and the Lowlands, and there are still distinct social and other differences between the inhabitants of the two The scenery is remarkably beautiful, the combination of mountain, loch and river making some exquisite landscapes, and the land is much visited by tourists

In some respects Scotland remains apart from England Its laws are different and it has its own judicial system, which consists of a High Court of Justiciary for criminal cases and a Court of Sessions for civil ones The sheriff in Scotland is a paid judicial officer, not as in England, an honorary one The local government system has been made very like that of England, but the towns are burghs, not boroughs, and the chairman of the county council is the convener (or) Scottish affairs are controlled by a Secretary of State and for certain purposes there are special government departments of Scotland The king has his own household in Scotland

In early days Scotland was divided into two distinct parts The Highlands were inhabited by Gaelic tribes living in clans under their own chiefs and the Lowlands were populated by people not unlike those living in the north of England About 900 a king of the Scots arose Governing at first only a small district in the south, and at times a vassal of the king of England, he gradually extended his power until there was a kingdom of Scotland covering the whole of the country Edward I conquered Scotland and made its king subject to him, but, after the Battle of Bannockburn, it regained its independence, which it retained under its own kings, who were often at war with England, until 1603, when James VI became James I of Great Britain In 1707 the parliaments of the two countries were

united and gradually the union became closer Of late there has been a Home Rule or National movement in Scotland, but it has never attained serious proportions

Scotland Church of Established church of Scotland It is Presbyterian in doctrine and government, and has, with intervals in the 17th century, been the established church since 1560 Since 1929 it has included the United Free Church of Scotland, itself an amalgamation of two unestablished Presbyterian churches The church has 1,280,000 members in 2720 congregations The controlling body is the general assembly which meets in Edinburgh every May, the king being represented by a high commissioner

Scotland Secretary of State for Official responsible to Parliament for the public business of Scotland The office was created in 1885 and carries with it a salary of £2000 a year The offices are at Dover House, Whitehall, London, SW 1 with another at 9 Parliament Square, Edinburgh

Scotland Yard Headquarters of the Metropolitan Police It occupies the site of a palace which belonged to the kings of Scotland between Whitehall and the Thames In the 19th century the police made their headquarters in a building here, and later New Scotland Yard on the Thames Embankment was built for their administrative work Here are the offices of the commissioner and detective staff, and a museum

The Lost Property Office formerly at New Scotland Yard has been removed to a new building in Lambeth

Scots Greys Cavalry regiment, known officially as the 2nd Dragoons It traces its origin to certain mounted troops added to the Scottish Establishment in 1678, which, after serving under Graham of Claverhouse, were regimented as the Royal Scots Dragoons Its battle honours include, in addition to Marlborough's four great victories, Dettingen, Waterloo, Balaklava and Sevastopol Napoleon made a famous allusion to them as "*ces terribles chevauz gris*," and their eagle badge represents an "eagle" and colours of a gallant French regiment captured by a sergeant of the Greys in a charge on June 18, 1815

Scots Guards Regiment of foot guards Originally formed in Scotland under the Earl of Linlithgow in Nov., 1660, they became the 3rd Foot Guards in 1713, and the Scots Fusillier Guards under William IV The ancient title of Scots Guards was restored to the regiment by Queen Victoria in 1877 Battle honours include, among other campaigns, Dettingen, the Peninsular War, Waterloo, the Crimea, and Tel-el-Kehir The Scots Guards also served with splendid distinction in the Great War

Scott Charles Prestwich English journalist Born at Bath, Oct 26, 1846, he was a son of Russell Scott He went to Corpus Christi College, Oxford, and on taking his degree joined the staff of the *Manchester Guardian* In 1872 he was made editor of that paper He retired from the editorship in 1929, but remained governing director until his death, Dec 31, 1931

Scott was one of the greatest editors of his day and under his direction the *Manchester Guardian* became one of the world's great newspapers From 1895 to 1906 Scott was Liberal M.P. for the Leigh division of Lancashire

Scott Michael Scottish wizard or magician He was born about 1200,

and drew much of his wisdom from the Arabs. He entered the service of the Emperor Frederick II. Tradition credits him with miraculous powers. A later Michael Scott, born in 1789, was a Scottish novelist who wrote *Tom Cringle's Log*, still a classic of sea going life. The only other work of his which survives is *The Cruise of the Alfridge*. He wrote anonymously, and his identity was not revealed until after his death, which took place in 1836.

Scott George Gilbert English architect. Born at Gawcott, Bucks, in 1811, he had a great love for drawing and for medieval churches, and was consequently attracted to a London architect. After 1840 he threw himself into the Gothic revival, and built or restored 26 cathedrals, over 500 churches, numerous monuments, public and private buildings, such as new government offices in London, the Albert Memorial and the Midland Railway terminus in London. He was elected R.A. in 1861 and knighted 1872. He died March 27, 1878.

Scott Sir Giles Gilbert. British architect. Born Nov. 9 1880, grandson of Sir George Gilbert Scott architect, his design for the new Liverpool Cathedral, embodying his dream of a Gothic revival, was accepted in 1903, one year after he began to practise. His work is chiefly ecclesiastical, including St. Maughold's Ramsey, I.O.M., and the new buildings at Clare College, Cambridge. He was made an R.A. in 1922, and was knighted after the consecration of Liverpool Cathedral in 1924. In 1933 he became President of the R.I.B.A.

Scott Robert Falcon English explorer. Born at Devonport June 6, 1868, he entered I.M.S. *Briantia* in 1880. From 1900 to 1904 he was in command of the *Discovery*, exploring the Antarctic regions. Assisted by both British and Dominion Governments, he sailed for the South Pole in June, 1910, reaching it with four companions in Jan., 1912.

The return journey ended in tragedy, owing to cold, blizzards and insufficient food. Evans succumbed in Feb., and in March Capt. Oates deliberately sacrificed himself by walking out into the blizzard. The weather made it impossible for the others to proceed, and the bodies of Scott, Wilson and Bowers as well as Scott's records and diaries, were found by a search party in Nov., 1912. The diaries showed that they survived Oates by only a few days.

Scott Sir Walter Scottish poet and novelist. Born at Edinburgh, Aug. 15 1771, of gentle blood, his early education was interrupted by delicate health coupled with lameness but he attended the High School and University. At about 15 he entered the office of his father, who was a Writer to the Signet, and later held several public offices such as Sheriff of Selkirkshire.

In 1802 he began the first of his long poems *The Lay of the Last Minstrel*, it was published in 1805, and attracted immediate and wide spread attention. *Marmion*, *The Lady of the Lake* and *Rokeby* followed in rapid succession. *Waverley* appeared anonymously in 1811 taking the world by storm. The complete list of his novels is too long to give in full, but we may mention *Guy Mannering*, *Rob Roy*, *The Heart of Midlothian*, *The Bride of Lammermoor*, *Ivanhoe*, *The Monastery* as well as *Lives of Dryden*, *Swift* and *Napoleon*.

Scott's unfortunate secret partnership in the publishing house of Ballantynes led to his

financial undoing and early death. After the crash, he toiled incessantly to pay his debts; they were cleared but not until after he died.

As a man, Scott has been called one of the most generous, one of the most friendly, one of the most honourable. As a writer he occupies the highest rank and his influence on literature was immense. His works have been translated into many languages.

He married in 1797 Charlotte Margaret Carpenter, and died Sept. 21 1832. His biography was written by his son-in-law, J. G. Lockhart.

Scouting Primarily a military term denoting observation of an enemy's movements actual or intended, by individuals or parties, pushed out in advance of the main fighting force. Such service comes under the general heading of reconnaissance and demands great intelligence and wariness on the part of those engaged in it. Ordinarily on land scouting duties are carried out by cavalry, a familiar example of good military scouting being the work of the Uhlans in the Franco-Prussian War. Nowadays scouting is chiefly done, wherever possible, from the air. See Box Scouts.

Screen Apparatus used in printing. It consists of two pieces of glass fastened together, and placed in the camera between the plate and the lens. Each piece is ruled with fine lines. It is used in photographing pictures for reproduction as half-tone blocks and its work is to give the effects of light and shade which it does by breaking up the photograph into a series of dots of various sizes which place the ink on the printing surface. The number of ruled lines varies from 60 to 400 to the inch, larger numbers being used for the better class of work.

Screen In church architecture, a partition dividing part of a church from the remainder especially the chancel from the nave. Wood, stone and iron figure among the materials used. The rood screen, so called from the rood, or crucifix, on a great wooden beam over it, was often very richly ornamented. There are fine examples of decorated screens in several of the English cathedrals such as those at Canterbury, Durham and Lincoln, and in many parish churches.

Screw Propeller In ships a propulsive device consisting of two or more (usually three) blades set obliquely on a shaft turned by steam, or other motive power. In effect the propeller represents a section cut from a long screw. The blades each constitute a portion of the thread, the pitch being the distance the screw moves forward in a revolution. When turned in a forward direction the blades press against the water and the ship goes ahead. Since the water yields to some degree, there is a loss termed slip which reduces the actual forward motion to something less than the pitch of the screw.

Scriabin Alexander Nikolaevich Russian composer. Born at Moscow, Dec. 25, 1871, after studying and teaching at the Moscow Conservatoire of Music, he toured for six years, settled in Brussels and returned to Moscow in 1910. He visited England in 1914, gave two piano recitals, and played the piano in his *Prometheus*. He developed an individual harmonic basis, which was symbolic in a musical way, with a definite spiritual foundation. His chief works were *Prometheus* (Poem of Fire), *Vers la Flamme* and *Divine Poem*. He died April 14, 1915.

Scriptorium Place where manuscripts were written or more often copied. The scriptorium was also the studio of the great monasteries, and here much beautiful illuminating and binding was done.

Scrivener One who draws up contracts. The Scriveners' Company is one of the livery companies of the city of London, with a charter dating back to 1617, though the records are of much earlier date.

Scrofula Form of tuberculosis also known as struma, in which the glands of the neck enlarge. In earlier days it was called the king's evil and the reigning sovereign used to "touch" for it.

Scrooby Village of Nottinghamshire, about 2 m from Bawtry, on the L N E Rly. There are remains of a palace of the Archbishop of York. The manor house was the home of William Brewster (died 1644), one of the most prominent of the Pilgrim Fathers.

Scrub Term used for tracts of undergrowth, brushwood, or stunted trees, known in the Mediterranean area as *maquis*. In Australia characteristic forms are mallee scrub, in which a species of *oncalyptus* predominates, and the brigalow scrub, composed largely of a kind of *acacia*. Cacti are a feature of the scrub of E Africa.

Scruple Unit of weight. It is found in apothecaries' measure where one scruple is composed of 20 grains or minims. 20 scruples make an ounce.

Scudo Old Italian silver coin worth about 4 shillings. The value varied in the different states. The word means "shield".

Scullin James Henry Australian politician. Born Sept 18, 1876, at Ballarat, he became a journalist, and was elected to the federal Parliament as a Labour member in 1910. Defeated in 1913, he remained out of parliament till 1922. He became leader of the federal Labour Party in 1928 and Premier in Oct, 1929. In the financial crisis of 1930-31 his party was defeated and he resigned, being succeeded by J. A. Lyons (q.v.). In 1935 he announced his retirement.

Sculling Art of propelling a boat with a pair of sculls shorter and lighter than rowing oars, and without a cox. For the world's professional sculling championship the Thames course is from Putney to Mortlake, a distance of 4½ m., over which the Wingfield Sculls, the amateur Thames championship, also takes place. Another famous sculling event is the Diamond Sculls at Henley. Many world championships have been decided in New South Wales, on the Parramatta River.

Sculpture One of the oldest and most universal arts, it represents an object, real or imaginary, in material and three dimensional form. The symmetry and rhythm of sculpture have appealed to man through the ages, satisfying both his desire to imitate, in the reproduction of natural objects, and his will to create, offering as it does a medium of expression for his imaginary figures. The golden age of sculpture coincides with the period of Greek history, the Greeks having found in it the ideal expression of their love of nature and the beautiful. The commonest materials used are stone, clay, bronze, ivory, gold and silver.

Scunthorpe Urban district and market town of Lincolnshire. It is 12 m south-east of Goole, and 180

from London by the L N E Rly. An industrial centre, it has iron and steel works. It is officially known as Scunthorpe and Frodingham. Pop (1931) 33,761.

Scurvy Disease marked by swelling of the gums and dry, rough skin. It is caused by the lack of vitamin C in the food. Formerly it was distressingly common among sailors and soldiers, who in the course of their duties were forced to live for long periods at a stretch on salt meat and without fresh vegetables. Since the cause has been known the disease has been rare. The drinking of lemon juice is an important feature of the cure and prevention.

Scutage Term used under the feudal system to denote the pecuniary commutation of the military services of a knight. Though generally held to date from the time of Henry II, the practice is found as early as the reign of Henry I. The name comes from the knight's shield (Latin *scutum*).

Scutari (or Skodra) Town of Albania. It lies S E of Lake Scutari some 12 m from the Adriatic coast. After having undergone a siege in the first Balkan War, it figured in the Great War, being occupied by the Austrians until Nov., 1918. There are woollen manufactures. Pop (1930) 29,209.

Scutari (or Uskudar) Town of Asia Minor, opposite Istanbul (Constantinople). A hospital used during the Crimean War was the scene of Florence Nightingale's ministrations. A fire in 1921 caused serious damage. There are manufactures of silks and cottons. At Haidar Pasha is a terminus of the Anatolian Railway. The ancient name of the town was Chrysopolis. Pop 124,555.

Scylla Rock in the Straits of Messina, opposite the whirlpool Charybdis. To the ancient Greeks Scylla was a six-headed sea monster which preyed upon sailors.

Scyros Small rocky island in the Aegean Sea, 24 m N E of Euboea, belonging to Greece. In ancient Greek legend it was associated with Theseus. Pop 4200.

Scythia Name used by the ancients for a region around the Black Sea, varying in extent at different periods. It received its name from the Scythians, a people from npper Asia who occupied it in the 7th century B.C. Originally of nomadic habits, the Scythians in course of time came under Greek influence, and became agriculturists.

Sea Anemone Popular name of certain marine animals of the order *Anthozoa*, related to the corals. Sea anemones commonly occur in rock-pools and in form have a general flower-like appearance. The body consists of a soft fleshy contractile column attached at the base to a rock, and having at the free end a mouth surrounded by a ring of contractile tentacles and communicating with a simple sac-like stomach. The food consists of small crustaceans and other organisms.

Sea Bass Food fish (*Morone labrax*) related to the perch. It is found chiefly around S and S W Europe, and occasionally off British shores. It weighs up to 15 lb. It has a blue grey back, grey sides, and white under parts, and the first dorsal fin carries eight spines. About May the bass leaves the deep water for spawning, and the young fish prey upon smaller fish about the mouths of rivers. The flesh is somewhat coarse.

Seaford Watering place of Sussex, about 3 m from Newhaven. It enjoys

a sheltered situation and has excellent golf and bathing facilities. Seaford was a "limb" of the Cinque Ports, and had considerable trade as a port, being at one time at the mouth of the Ouse. At various periods it has suffered much from encroachments of the sea. Seaford Head became public property in 1928. Pop. 6891.

Seaforth Sea loch of Scotland 14 m. long, on the east side of the Island of Lewis.

The title of Earl of Seaforth was borne by the family of Maclean from 1623 to 1781. The last earl gave his name to the Seaforth Highlanders, a regiment which he raised on his estates in Ross-shire. The two battalions are the 12nd and 78th Foot and both have a fine record of service, including several theatres of the Great War. The depot is at Fort George.

Seaforth District of Lancashire. It is on the Mersey, 4 m. from Liverpool and is a popular seaside resort. It is reached by an overhead electric railway, and by the L.M.S. line, and is part of the urban district of Waterloo and Seaforth. See WATERLOO WITH SEAFORTH.

Seaham Harbour Seaport and urban district of Durham 5 m. from Sunderland, on the L.N.E. Ry. From a small village the place grew into a populous and thriving industrial district after the coal mines were opened. The harbour is a fine modern structure. Industrial activities include iron founding, chemical works, and blast furnaces. Pop. (1931) 19,394.

Sea Heath Perennial herb (*Frankenia laevis*). It grows on land that is impregnated with salt, and has a wide range, being found not only in Western Europe but also in Asia and Africa. The flowers are small and rose-coloured, the leaves are oblong, and the stems are covered with down.

Sea Holly Perennial herb (*Eryngium maritimum*). It is found on sandy sea coasts. The leaves are rounded in shape, tough and of a leathery consistency, and are furnished with sharp spines. The flowers are bluish white, and are grouped in a dense head.

Sea Horse Small fish (*Hippocampus*) allied to the pipe fishes. Sea horses range from two inches to a foot in length. They are found mostly in tropical seas but one species *H. antiquorum*, is common in the Mediterranean, and occasionally visits the southern shores of Britain. The exterior is bony, and the name is due to the shape of the fore part of the body and the way in which the head is set on the trunk.

Sea Kale Perennial herb (*Crambe maritima*) of the natural order *Rutiferae*. It is common in the wild state on the coasts of Europe and is widely cultivated in Britain as a vegetable.

Seal One of a group of carnivorous sea mammals having long tapering bodies and short limbs equipped with paddles. The true seals, *Phocidae*, constitute with the walrus the suborder *Pinnipedia*. Seals are found chiefly in Arctic and Antarctic waters, but many species are visitors to and residents on British coasts. They are hunted for their skins and their blubber.

Seal Piece of some plastic substance impressed with a device and used to authenticate a document, or furnish proof of the integrity of a package, etc. Sealing wax, a mixture of shellac turpentine etc. or lead forms the matrix and the die (also termed the

seal) is made of hard stone or of metal. Seals are used by corporate bodies and companies. Writs, and copies of documents to be used as evidence, must be sealed with the appropriate official seal. See GREAT SEAL.

Secret instructions contained in a sealed cover and hence called sealed orders, are sometimes issued to a naval commander the envelope etc., to be opened only after sailing.

Sea Lavender Genus of plant (*Limonium*) of the natural order *Plumbaginaceae*. The sea lavenders are common shore plants in temperate regions, and have bluish purple flowers. The calyx is tough, and keeps its shape for a considerable time after the seeds have dispersed, and the plants are often dried and used for winter decoration.

Sea Lion Another name for the fur seal. Sea lions differ from the true seals in having a more pointed muzzle, and the hind limbs separate from the tail and in other respects. They spend more time out of the water than the true seals. The Labrador sea lion is the principal source of the seal skin of commerce. The kind usually seen in circuses is the black Californian sea lion.

Seaman Sir Owen. Born in 1861 he was educated at Shrewsbury and Cambridge and became assistant master at Rassel 1884. Professor of Literature, Durham College of Science, Newcastle 1890 and lecturer of the Inner Temple, 1897. He joined the staff of *Punch*, 1897, and was made editor in 1906. He was knighted 1914, and made a baronet in 1933. He was a skilful versifier and brilliant parodist, and was the author of a number of topical articles and books, notable among them being *Made in England* (1916), and *From the Home Front* (1918), stirring verses written during the Great War. *Interludes of an Editor* appeared in 1929. He resigned the editorship of *Punch* in 1933, and died on Feb. 2, 1936.

Sea Mouse Name commonly applied to a worm (*Aphrodite aculeata*) of the order *Polychaeta*. It is often found cast up by the sea along the coasts of Britain. It rarely exceeds 5 inches in length, and has a fat oval segmented body set with bristles.

Sea Otter Carnivorous mammal (*Lutra*) allied to but larger and more massive than the true otter. The skin is remarkably loose and the beautiful brown fur is very valuable. Unlike the true otter, the sea otter feeds on molluscs, crustaceans, and sea urchins, not on fish. The chief habitats are the Aleutian Islands and Alaska.

Sea Perch Fish (*Serranus cabrilla*) allied to the sea bass also known as the comb. About 10 in. long, it is sometimes found off the southern coasts of England, a visitor from the Atlantic. It also occurs in the Mediterranean and the Red Sea. The body is red with wavy blue or white lines on the sides. The lower jaw is underhung.

Seaplane Type of heavier than air craft so constructed as to be able to land on or arise from the water. Seaplanes may be divided into three classes: (a) Amphibians, those able to alight or take off from land or water. (b) Float Planes, fitted with floats. (c) Flying boats whose landing gear consists of boats. Of these three types the float planes have accomplished the world's speed records, the flying boats being most suited to ocean travel.

Sea Power Term used for naval strength. Some historians consider that command of the sea has been

the decisive factor in the world's great wars. Superior sea power made possible the defeat of the Persians by the Greeks and of the Carthaginians by the Romans. It was the dominance of Great Britain at sea that made possible her victories of the 18th and early 19th centuries and the creation of her overseas empire. Finally, the strength of the British Navy made certain the victory of the Allies over Germany in the Great War. The great work on the subject is A. T. Mahan's book, *The Influence of Sea Power upon History*.

Sea power thus depends upon the strength of a navy. Before the Great War Britain had much the strongest navy in the world, and for long it was a cardinal principle of her policy that her navy should be as strong as those of the next two strongest powers combined. The Great War changed the position entirely. The United States claimed naval parity with Great Britain and in the opinion of some the development of aircraft has seriously affected naval action and importance. See NAVY.

Searchlight A powerful lamp usually behind some form of louver shutter, the light from which is reflected from a parabolic mirror, this ensuring the emission of a beam of parallel light.

Searchlights are used in naval and military warfare for signalling and for finding a desired target, and for the illuminating at night of dangerous channels for merchant ships. In favourable weather ships can signal with searchlights for more than 50 m., that is for more than horizon distance, and their speed of transmission is limited only by the defects of the human eye.

Sea Serpent Snake-like marine monster claimed to have been seen in various seas. Legend is rich in tales of sea serpents, and many circumstantial accounts exist of their appearance in modern times. Although it is just within the bounds of possibility that such animals exist, such appearances can usually be explained in other ways. Thus a school of porpoises, or even a flight of sea birds, in certain conditions may present an appearance not unlike that of a single snake-like creature.

Sea-sickness Indisposition caused by the pitching and rolling of a boat at sea, characterised by loss of appetite, giddiness, nausea, and often actual sickness.

Treatment—The remedies prescribed vary with the severity of the trouble and the idiosyncrasy of the patient. Milk and soda water, and iced champagne are among effervescent beverages that may have a beneficial effect, but very moderate amounts of alcohol should be used. Except in very serious cases drugs are not advisable.

Sea Snake Family of tropical aquatic reptiles (*Hydrophinae*) of the Indian and Pacific Oceans. Ranging from three to eight feet in length, they are marked with bands of contrasting and usually bright colours. They move with difficulty on land, but are very active in the water, in which they can remain for long periods. Their bite is very poisonous. One species in the Philippines lives in fresh water. All the sea snakes are viviparous.

Sea Squirt Name used for the ascidians, marine animals of the order *Tunicata*. They have the form of a two-necked bottle, and are found clinging to rocks along the coast.

Seaton Pleasure resort and urban district of Devonshire. It is on the Axo,

7 m from Axminster and 148 from London, on the S. Rly. There is a golf course and good bathing. Pop. (1931) 2351.

Seaton Delaval Urban district of Northumberland. It is 6 m from North Shields, on the L. N. E. Rly. It is a coal mining centre. Near is Seaton Delaval Hall, the seat of Lord Hastings. Pop. (1931) 7377.

Sea Trout Another name for the salmon trout. It was long regarded as a separate specimen, but in accordance with the modern tendency it is now treated simply as a migratory form. Like the salmon, it feeds in the sea, but ascends the rivers for spawning.

Seattle City and seaport of the state of Washington, U.S.A., between Lake Washington and Elliot Bay. It is a very important Pacific seaport, trading largely with Alaska. Lumbering and shipbuilding are among the most prominent industries, and there are manufactures of furniture, lumber products, leather goods, and flour. In 1889 almost the entire business quarter was destroyed by fire. The city is the seat of Washington University. Pop. (1930) 365,583.

Sea Urchin (*Echinus*) Sea animal with tough, leathery, prickly skin, belonging to the order *Echinoidea*. The common sea urchin (*E. esculentus*), valued as food in the Mediterranean, is not uncommon off Britain. The stony case enclosing its body is studded with long spines in which are embedded organs with which this animal snaps at its prey.

Seaweed General name for a large number of the spore bearing plants known as algae, which grow on the sea bottom at distances ranging from high-water mark to a depth of some 600 ft. There are no roots, every part of the plant body having the power of taking in nutriment.

Sebastian Saint and martyr. He was an officer in the Praetorian Guard and became an ardent Christian. In 288 Diocletian ordered him to be put to death, though pierced with arrows, he managed to recover, but was then clinked to death. His martyrdom is the subject of numerous paintings.

Second Advent Term for the expected second coming of Christ on earth. Among the early Christians, as among certain modern sects known as Adventists, the Second Advent was regarded as being close at hand.

Secondary Official of the corporation of the city of London. His duty is to prepare the list of the liverymen entitled to vote at elections for members of Parliament.

Second Ballot Plan used at certain elections. It is used when it is necessary for a candidate to receive an absolute majority of the votes cast, in order to secure election. If no candidate secures this majority at the first ballot, a second one is taken, with the candidates lowest on the list left out. In elections for the President of the German Republic, a second ballot is taken a month after the first if no candidate receives the votes of half the electors, this being necessary to secure election. On the second ballot a bare majority is sufficient for election.

Second Chamber Term used for one of the houses of a legislature, the members of which are not as a rule elected directly by the people. It is

usually called the upper house. In the British second chamber, the House of Lords, the basis of membership is heredity. In the United States, Canada, and other federal countries, its members are chosen by the separate states. In the United States each state sends the same number (two) whether it is densely or sparsely populated. In some second chambers, the members, or a proportion of them, are nominated by the king or president, or by the government.

A second chamber is regarded as necessary in order to act as a check on the first, or elected house, but there is a tendency to limit its powers, as with the House of Lords, and in one or two cases the second chamber has been abolished.

Second Empire Name applied to a period in the history of France extending from Dec. 2, 1852, when Louis Napoleon, after overthrowing the Second Republic, became emperor as Napoleon III, to Sept. 4, 1870, three days after the Battle of Sedan, when the Third Republic was set up.

Second Lieutenant Officer in the British army. This is the lowest rank of commissioned officer, and cadets enter the service as second lieutenants. One star is worn as a sign of the rank.

Secretary Term used for a person who attends to the correspondence records, and general business of a company or other business concern, society or individual, and also for a minister in charge of a government department. The interests of secretaries are looked after by the Chartered Institute of Secretaries, which was established in 1891 and incorporated by Royal charter in 1902. This body not only holds examinations in secretarial duties, but also provides instruction by means of lectures.

SECRETARIAL WORK AS A CAREER. The term 'secretarial work' is generally used to designate the higher paid and more confidential branches of the profession, but we may consider here under that general heading all kinds of office and clerical work.

In this class of work women are gradually gaining an almost complete monopoly. Some of the earliest openings for women occurred in office work. Commencing as clerks, typists and book keepers women have worked their way up and through all grades and kinds of office work, and except in some old-fashioned firms and 'close' occupations, they appear to be practically ousting men from this particular field.

Training for the lower paid grades of office work is supplied by the numerous business and commercial colleges throughout the country and to a growing extent by commercial courses in secondary schools. The subjects required are good elementary English and arithmetic, shorthand, typing, book keeping, filing and indexing. A foreign language other than French or Spanish, is an advantage.

The number of young shorthand typists, clerks, and book keepers seeking employment is greatly in excess of the vacancies for them, and special qualifications are necessary. If remunerative work is to be easily found. But of no other profession can it be so truly said that 'there is plenty of room at the top of the ladder,' for there is undoubtedly a large unsatisfied demand for just the right kind of capable woman office assistant.

A Private Secretary, in addition to being an expert shorthand typist must be able to

conduct correspondence on her own initiative. She is usually required to keep books, as she often has control of her employer's private business. Successful fulfilment of the post is largely a matter of character, for every well qualified woman will not make a good secretary. The essential characteristics of a good private secretary are adaptability, willingness, tact, discretion and initiative.

Secretary Bird (*Serpentarius secretearius*) Long legged, long tailed African bird allied to the vultures. In appearance resembling the horned, it feeds chiefly on snakes. The plumage is grey, black, and white. It takes its name from the tufts at the back of its head which look not unlike quill pens stuck behind the ear.

Secretary of State Title given to the officials in charge of various important British government departments. The name was first used in the reign of Elizabeth for two officials who assisted the sovereign. After the accession of William III one secretary of state was put in charge of northern affairs and the other of southern. About a century later one looked after home affairs and the other after foreign.

Nowadays the secretaries of state comprise the Home Secretary, and the secretaries for foreign affairs, for colonial affairs, for war, for air, for Scotland, for India, and for the Dominions. They are all in the Cabinet.

Secret Service Intelligence department of a State which procures information about military, naval, political, and other matters. In connection therewith is usually a system of secret agents in other lands, who furnish intelligence as required by their employer. In war time this work becomes of enhanced importance, and the domiciled agents are supplemented by men and women detailed for espionage and secret service in enemy or neutral countries. During the Great War aeroplanes were used to convey agents into enemy terrain.

Secret Society Association of people whose common object and activities are known only to initiates. The aims of such societies are very various, some are political, others religious, others are formed for mutual help. In antiquity they take such form as the famous mysteries of Greece. Among secret societies of modern times may be mentioned such diverse associations as the Freemasons, the Italian Camorra, the Ku Klux Klan of America, and the Boxers in China.

Secularism System that rejects all belief in God, religion, and a future life. It was founded in England by G. J. Holyoake, and took up an attitude of opposition to all religion. Its foremost advocate was Charles Bradlaugh, and to forward the ideas the National Secular Society was founded. By this society a good deal of literature has been issued.

Secunderabad British military station in the state of Hyderabad 6 m. from the capital and 390 ft. above sea level. It is the headquarters of a brigade of infantry, and near by is the headquarters of a cavalry brigade.

Security Freedom from fear, protection or certainty. The word was much used in the years following the Great War, when one of the cardinal points of French policy was the demand that her eastern

frontier should be secured to her from invasion. The proposal that Great Britain and the United States should give a joint guarantee of security broke down, but some measure of security was given by the Pact of Locarno signed in Oct., 1925. See LOCARNO

Sedan Town of France. In the dept. of Ardennes, on the Meuse, 164 m N E from Paris. It is a centre for textile manufacture. Here, on Sept. 1, 1870, Napoleon III. surrendered to the Germans, with 86,000 of the French Army. During the Great War the town was in German hands, and was taken by French and American forces late in 1918. Pop. 18,235.

Sedan Chair Covered chair used largely in the 18th century. It was carried by bearers by means of poles, and was the usual means of transport in towns for ladies of quality.

Sedbergh Market town of Yorkshire (W R), 28 m S S E of Penrith, on the L M S Rly. Sedbergh School was founded in 1528 by Roger Lupton, Provost of Eton, suppressed by Henry VIII., and re-founded in 1551. Formerly a grammar school, it was opened as a public school in 1874. Pop. (1931) 3570.

Sedd-el-Bahr Village on the peninsula of Gallipoli. Situated on the N side of the entrances to the Dardanelles, its position possesses great strategic significance. Its fortifications, which date from the 17th century, were reconditioned by the Allies in the Great War, in which the place figured conspicuously.

Seddon Richard John New Zealand statesman. Born at Eccleston, Lancs. in 1845, at the age of 18 he went to Australia, and in 1866 joined his brother in a mining venture in New Zealand. He entered the legislature there in 1879, becoming Minister for Public Works, Defence, and Mines in 1891. He was Premier from 1893 till his death, June 10, 1906.

Sedge Plant of the genus *Carex* occurring in many temperate, Alpine and Arctic areas. The common bullrush is an example. Some can exist in dry places, e.g., *C. arenaria*, useful as a sand-binding plant, but they are mostly swamp plants, dying out when the land is drained.

Sedgefield Town of Durham. It is 9 m from Stockton-on-Tees, on the L N E Rly. Cattle markets are held here.

Sedgeley Urban district of Staffordshire. It is 3 m from Wolverhampton, on the L M S Rly. The chief industry is the manufacture of hardware, while around it are coal mines. Pop. (1931) 19,261.

Sedgemoor Battle of. Conflict between the forces of James II. and the Duke of Monmouth, fought July 6, 1685, on the marshy tract of that name in Somerset, 5 m from Bridgwater. In number the opposing forces were about equal, each side having about 4000 or 5000 soldiers. But James's men were well trained and armed, while the forces of Monmouth consisted chiefly of clumsy and ill-equipped peasants, and the battle resulted in the rout of Monmouth's army.

Sedition Any words or acts directed against authority, which may have the effect of bringing the sovereign or the government into contempt or hatred, or, generally, which may disturb the tranquillity of the State.

Sedley Sir Charles English wit and dramatist. Born in 1639, the son of Sir John Sedley, Aylesford, Kent, he was educated at Oxford. A great patron of literature during the Restoration period, his best known song is "Phyllis is My Only Joy," his best known comedies, *The Mulberry Garden* and *Bellamira*, and tragedies *Anthony* and *Cleopatra*, and *The Tyrant of Crete*. For some time he was M.P. for New Romney, Kent. He died Aug. 20, 1701.

Seduction Literally enticing from virtue, but used especially of the act of depriving an unmarried woman of her chastity. The English law on the subject is that this is a wrong, not so much against the woman herself, as against her parent or employer, who can sue the seducer for damages because he has deprived him of the woman's services. In Scotland the woman herself can bring an action for damages against her seducer.

Seed Term for the part of higher plants from which a new individual arises. It consists of an embryo and a supply of food, developed during the life of the parent plant and subsequently becoming detached, when it is capable of germinating to form a new plant. The seed is provided with a protective covering and means whereby its dispersal from the neighbourhood of the parent plant is assured.

Seeley Sir John Robert English historian. Born Sept. 10, 1834, he became Professor of Latin at University College, London, in 1863, and Regius Professor of Modern History at Cambridge in 1869. His *Eccle Homo*, issued anonymously in 1865, caused immense controversy in religious circles. For his famous essay, *The Expansion of England* (1883), he gained the R.C.M.G. He died Jan. 13, 1895.

Seely John Edward Bernard. British politician. Born May 31, 1868, he was educated at Harrow and Cambridge, and was called to the Bar in 1897. He served with distinction in the S. African War. Entering politics he was M.P. for the Isle of Wight, 1900-06 and 1923-24, for the Abercromby division of Liverpool, 1906-10, and for the Ilkeston division of Derby, 1910-22. He was appointed Under-Secretary for the Colonies, 1908-10, Under-Secretary for War, 1911, Secretary of State for War, 1912-14, Under-Secretary for Air, 1919. In 1933 he was made a baron, and took the title of Lord Mottistone of Mottistone. He is Chairman of the National Savings Committee.

Sefton Earl of. Irish title borne by the family of Molyneux. In 1628 Sir Richard Molyneux was made a viscount, and in 1771 the 9th viscount was made an Irish earl. The earl's seat is Croxted Hall, near Liverpool, and his eldest son is called Viscount Molyneux. A residential district in Liverpool, of which the land is the property of the earl, is called Sefton Park.

Seine River of France. It rises near Dijon, and flows in a north-westerly direction, entering the English Channel by an estuary at Havre. Commercially the most important river of France, it flows past Paris, Rouen and Troyes, among other places. Its tributaries include the Marne, the Oise, the Aube, and the Yonne. It is connected by canals with the cities of Belgium, the Loire, and the Rhine. Its total length is 480 m.

Seine Net Type of net used for catching large numbers of fish such as mackerel, herring, pilchards, bass, etc. The

extended net is kept vortical by means of cork floats secured at the top and leads attached to the bottom, the two ends finally being drawn together, either on a beach or into a boat.

Seipel Ignaz Austrian priest and statesman Born in Vienna, July 19, 1876, he was a professor at Salzburg and Vienna Universities The Austro-Hungarian monarchy fell in October, 1918, and Seipel became leader of the Conservative element He became Chancellor, May 31, 1922, reconstructing the notion, mainly by sound financial measures He resigned in 1924, but took office in 1926, at the head of a Christian-Socialist Pan-German coalition, which favoured co-operation with Germany, with maintenance of all treaties He died Aug 2, 1932

Seismometer Instrument also known as a seismograph used for detecting and registering vibrations of the earth's crust, and especially those of earthquakes The apparatus is very delicate and elaborate, and consists essentially of a revolving drum with a smoked surface upon which pens connected with suspended weights mark in zigzag lines both horizontal and vertical earth tremors In some seismometers the direction of the horizontal movements whether east and west or north and south, also are recorded.

Selangor State of the Federated Malay States It is between Perak and Negri Sembilan and has a coastline on the Strait of Malacca Kuala Lumpur is the capital, and the chief river is the Klang The state is governed by a sultan who is under British protection and who lives at Klang The area is 3150 sq m Pop (1931) 533,197

Selborne Village of Hampshire, 5 m from Alton and 52 from London, on the S Rly There was an abbey here and the place was once a market town It is chiefly known as the home of Gilbert White, the author of *The Natural History of Selborne* His house still stands In 1932 the grove here, known as the Selborne Beeches, was presented to the nation by Magdalen College, Oxford

The Selborne Society exists to preserve bird and plant life from destruction It was founded in 1885

Selby Urban district and market town of Yorkshire (W R) It is on the Ouse, 14 m from York, and is served by the L N E Rly and a canal It is an agricultural centre, and has one or two industries as well as a little shipping, as from here the Ouse is navigable Selby is chiefly famous for its abbey church a cathedral in size and magnificence, which though damaged by fire in 1900, has since been repaired the central tower having been rebuilt in 1912 The abbey to which it belonged, was a Benedictine house founded in 1009 Pop (1931) 10,064

Selden John English jurist Born in 1584 of 22 he brought out his first work, dealing with Britain's civil government before the Conquest, and followed it with a long line of treatises on legal and other topics He was a member of Parliament for several years and took an active part in public affairs till his death He suffered imprisonment twice once for his share in the drafting of the Petition of Right He died Nov 30, 1654

Selection Term used by biologists, chiefly in connection with the evolution of man and the lower animals. Natural selection is the process by which nature

provides that the better males shall mate with the best females, the weaker being killed. Combat plays a large part in this process, and so the qualities of strength and courage are perpetuated at the expense of weakness and cowardice Artificial selection is adopted in the breeding of animals, for instance, racehorses, where only the best of each sex are used for breeding purposes See EVOLUTION

Selene In Greek legend the goddess of the moon She was a daughter of Hyporion, the sister of Helios and Eos, Sun and Dawn She loved Endymion The goddess travelled across the sky in a chariot drawn by two white horses In later days she was identified with Artemis

Selenium Chemical element having the symbol Se and atomic weight 79.2 Selenium was discovered by Berzelius in 1817 in the waste from the manufacture of sulphuric acid It resembles sulphur in its chemical relations, and in having several allotropic forms Selenium increases its electrical conductivity by exposure to light and therefore is used in such instruments as the optophone, and in types of talking film projection

Seleucia Two cities of the ancient world One was on the Tigris and was important at the opening of the Christian era. The other was the port of Antioch Both were built in 300 B C by Seleucus I, King of Syria, a general of Alexander the Great, who was the founder of a dynasty that ruled over Syria and adjacent parts of Asia Minor from 312 to 65 B C, when Syria was conquered by the Romans.

Self-Determination Term meaning the right of a nation to decide on its own form of government It was much used during the rearrangement of territory in Europe that took place after the Great War

Selfridge Henry Gordon American business man Born in Wisconsin, Jan 11, 1864, from 1890 to 1903 he was a partner in the great firm of Marshall, Field & Co., in Chicago, and in 1909 settled in London, where he founded a store in Oxford Street. This became one of the largest concerns of its kind, and acquired branches in many parts of London He wrote *The Romance of Commerce*

Seljuk Founder of a Turkish dynasty in Asia about A D 1000, and his descendants became powerful in Asia but after ruling over a great empire which was at the height of its power in the 12th century the Seljuks gradually lost their lands, and disappeared about 1300

Selkirk Burgh and county town of Selkirkshire, 40 m from Edinburgh, by the L N E Rly The manufacture of woollen goods is the chief industry, and the burgh has a racecourse Pop (1931) 5067

Selkirk Range of mountains in British Columbia in the S E of the state Dawson (11,000 ft) is the highest peak, and there are others over 10,000 ft. high Roger's Pass in the mountains is crossed by the C P Rly

Selkirk Alexander Scottish sailor He was born at Largo in 1676 and went to sea as a boy In 1703 he went to the South Seas under William Dampier, but for insubordination was put ashore at Juan Fernandez He was there for over four years and from his stay Defoe obtained the idea for

Robinson Crusoe After he had been taken off the island Selkirk returned to the sea, and he died at sea Dec 12, 1721

Selkirkshire County of S E Scotland It covers 267 sq m Selkirk is the county town, but Galashiels is larger It is a hilly district famed for its beauty, and was once covered by the forest of Ettrick The rivers are the Tweed and the Yarrow, and among the lochs is the picturesque St Mary's It has many historic buildings and was the scene of much border warfare, some of it immortalised by Scott Sheep rearing is the chief industry Pop (1931) 22,608

Selle River of France which rises near Le Catcan and flows N into the Schelde The Battle of the Selle was fought in the Great War, Oct 17 to 25, 1918, between the British-American forces and the Germans, and resulted in a victory for the Allies, remarkable for the number of guns captured

Selous Frederick Courtney British explorer and big-game hunter Born in London, Dec 31, 1851, he was educated at Rugby and in Germany He began his explorations in 1871 hunting over large tracts of practically unknown territory in Southern Africa In 1890 he acted as guide to a British South Africa Company's expedition to Mashonaland, his travels being described in *Twenty Years in Zambesia*, and he took part in and wrote an account of the first Matabele War (1893) He was killed in the East African campaign, Jan 4, 1917 His extensive collection of trophies is in the National History Museum, London

Selsey Watery place of Sussex It is 8 m from Chichester and 77 from London, and is reached by railway or motor coach from there It is now a popular centre for holiday makers Selsey Bill is at the end of the peninsula The older Selsey, now under the sea, was the seat of the Bishop of the South Saxons until 1075

Selston Town of Nottinghamshire. It is 9 m from Mansfield and has stations on the L N E and L M S Rlys The staple industry is coal mining

Semaphore Signaling apparatus used chiefly on warships and consisting of an upright post with two arms turned on pivots by means of levers or cords The different positions of the arms indicate different letters of the alphabet The signals on railways are also a form of semaphore adapted to railway signalling

Semiramis Legendary founder, with her husband Ninus, of the Assyrian Empire of Nineveh She is sometimes regarded as another manifestation of the goddess Astarte, deity of fertility, and the whole story has an Eastern flavour Her reign lasted forty-two years, and eventually she abdicated in favour of her son, herself flying up to heaven as a dove

Semite Name given originally to any descendant of Shem Noah's son The anthropological classification is made more by language than by race, and includes Arabs and Jews of modern races, and Phoenicians and Sabaeans of ancient races The Jewish nose, generally regarded as typically Semitic is not really so, since the Jews are of mixed race The true Semitic nose is straight or aquiline

Semolina Cereal food made from the coarse particles of wheat produced during grinding It has considerable

nutritive value, and is used in the manufacture of pasta foods such as macaroni

Sen Japanese coin It is the 100th part of a yen, and is worth about a farthing It is coined in 10, 20, and 50 sen pieces

Senate Governing body of Rome, which originally comprised one hundred members all patricians As time passed this number grew until it reached 900, and was then fixed by Augustus at 600 Members who were considered unfit for their office could be deprived of it by the Censor

In the modern world the name Senate has been adopted by various states for the upper houses of their legislatures In the United States the Senate is the second chamber, and has existed since the foundation of the republic The French Senate also the second chamber dates from 1799 South Africa and Australia have Senates formed by a given number of representatives from each state

The word is also used to designate the governing body of a university or other learned institution

Seneca Lucius Annaeus Statesman and philosopher He was born in Cordova c 4 B C and studied philosophy and rhetoric in Rome Entrusted with the education of Nero by Agrippina, his mother, he exercised for five years an excellent influence over his pupil, but unfortunately this did not last and as emperor Nero tried to poison him Later, found guilty of conspiracy, he was condemned to death A D 65 Seneca was one of the noblest characters of his times He was the author of several tragedies, *Oedipus*, *Medea*, etc, and many philosophical dissertations

Senegal French colony in W Africa It covers 74,112 sq m The capital is St Louis and Dakar and Rufisque are important towns Agriculture is the principal source of wealth The main export is ground nuts, with hides and rubber secondary The colony is administered by a lieutenant governor, and sends a deputy to the Chamber of Deputies in Paris Pop (1931) 1,534,273

Senegambia Name no longer in use region in West Africa lying between the Senegal and Gambia rivers The area is now divided into French Guinea, Senegal and Upper Senegal and Niger

Senna Medicinal shrubs and herbs of the natural order *Leguminosae*. The drug, useful as a purgative is made from the dried leaves The plants grow mainly in tropical climates and of the several different varieties *Cassia acutifolia* or Alexandrian senna, provides the best quality The seed pods are used as a laxative

Sennacherib King of Assyria He reigned about 702-681 B C Events during his reign are somewhat obscure but we know that he conquered Phoenicia ravaged Judaea and unsuccessfully besieged Jerusalem He was responsible for great public works, such as an embankment along the Tigris the building of many canals and the erection of an enormous palace at Nineveh He was murdered by his two sons

Sennar District of Sudan, lying N W of Abessinia, below Khartoum The capital is Singa Sennar is another important town Here there is a great dam opened in 1926 to control the irrigation of that part of the country over an area of some 3,000,000 miles 9925 ft. long it is known also as the Makwar dam

Sensitive Plant Tropical American herbaceous perennial (*Mimosa*) of the order *Leguminosae*. It is sensitive to contact, and the leaflets into which the leaves are divided fold together at the slightest touch, the stalk drooping. *Mimosa* is cultivated as a hot house plant.

Senussi Moslem sect, whose original headquarters were at Alexandria. It was founded in 1835 by Sidi Mahomed ben Ali es Senussi, who died in 1859. Its tenets are an attempt to return to the simple doctrines of the Koran. The sect has been in collision with the French authorities from 1902 onwards. During the Great War there was a rising which was finally put down in 1916 by British and Italian troops.

Sepal Botanical term for the individual leaves of the calyx or outer whorl of a flower. Usually the sepals are green and serve to protect the young flower in the bud. In some cases the calyx may be coloured like the petals, or may persist as a silky pappus of hairs for seed dispersal.

Separation In law a separation of husband and wife. They may agree to live apart from each other, a deed of separation thereupon being drawn up. A judicial separation is a decree of the high court granted on proof of cruelty or adultery or of desertion for two years or more, or upon failure to obey a decree of the court for restitution of conjugal rights. A magistrate's separation order may be granted to a married woman if her husband is convicted of assault upon her, or is guilty of persistent cruelty or wilful neglect to provide for her or her children or if he has deserted her. An order may be made for the payment of a weekly sum for maintenance. Habitual drunkenness on the part of either husband or wife is a ground for a separation order against the offending partner. A separation allowance is money paid to the wife or other dependents of a soldier or sailor on active service.

Sepia Generic name of the cuttle fishes, a group of cephalopodous molluscs allied to the octopus. The calcareous internal shell or "bone" has various economic uses, and the ink bag was the original source of the transparent brown pigment known as sepia. This pigment, however, is now made usually from the juice of walnuts.

Sepoy Indian soldiers in regiments commanded by British officers. The word comes from the Persian *sipahi* (army), and is allied to the French *sipahi*. Sepoy regiments were first employed in Europe during the Great War in 1914. Among the best known are the Gurkhas, the Sikhs, and the Pathans.

Sepsis Infection of a wound or other bodily surface by pus forming organisms, a condition ranging from a gathering to general septicaemia.

Septic Adjective applied to a condition where sepsis (*q.v.*) is present. Antiseptics are remedies against already existent sepsis. As sepsis is the elimination of all possible bacteria before an operation, *i.e.*, surgical cleanliness.

Septuagesima Word derived from a Latin word meaning seventieth. Septuagesima Sunday is the third Sunday before Ash Wednesday.

Septuagint Greek translation of the Old Testament (known by the symbol LXX). It is traditionally ascribed

to 70 or 72 scholars working under the patronage of Ptolemy Philadelphus at Alexandria in the first half of the third century B.C. There is no reason to doubt this tradition so far as it applies to the Pentateuch. The remaining books were translated at various unknown periods during the next 150 years.

Sequestration Depriving a person of property by legal means. It is used in Scots law for taking possession of the property of a bankrupt. In the ecclesiastical law of England, if the incumbent of a living owes money a writ of sequestration can be obtained—this enables the bishop to take possession of the income of the living and to pay the debts.

Sequoia Genus of the *Coniferae*, found on the west coast of N. America comprising the red wood of California (*S. sempervirens*) and the "big trees" of the Sierra Nevada (*S. gigantea*). They grow to 300 ft. or over, the latter having an enormous trunk. Some trees are estimated to have been over 3000 years old when felled.

Serajevo Now more usually spelt Sarajevo or Saryjevo, a city of Yugoslavia. It is situated on the Miljacka and is connected by rail with Belgrade 122 m. away. The principal industries are silk-weaving, dyeing, and pottery. Here the Archduke Francis Ferdinand of Austria and his wife were assassinated in 1914, an event which precipitated the Great War. Pop. (1931) 78,182.

Seraphim Angelic beings, in constant attendance upon Jehovah. Isaiah in the vision told of in chapter vi of his book describes them as having three pairs of wings each. The same word in the Hebrew is sometimes translated as serpent. It is therefore possible that the original conception of seraphim may have been connected with serpent worship.

Serapis Graeco-Egyptian deity. The centre of worship was at Alexandria. He seems to have been the Greek manifestation of the Egyptian god Apis assimilated to Osiris and to have symbolised fertility. He was generally represented as a bearded figure with a basket on his head.

Serbia Name formerly given to a kingdom which now forms the eastern part of Yugoslavia. It is 36,937 sq. m. in area. An empire of considerable extent in the Middle Ages. Serbia fell under Turkish domination after the battle of Kosovo (1389). Nineteenth century nationalism led to a movement for independence, ultimately successful in 1878, and the kingdom was considerably enlarged after the Balkan Wars of 1912-13. Serbia took part in the Great War on the Allied side, was defeated and overrun. On the conclusion of peace in 1918 the reconstituted kingdom was united with Montenegro and became the principal part of Yugoslavia (*q.v.*).

Sergeant Non-commissioned officer of the British Army. The sergeant-major is the senior regimental non-commissioned officer. In the police force sergeant is the rank between constable and inspector.

Serjeant-at-Arms Officer of the Houses of Parliament. He is usually the mace bearer and his duty is to precede certain dignitaries. Thus a serjeant-at-arms precedes the Lord Chancellor, bearing the mace and another precedes the Speaker. He is also charged with the enforcement of order and discipline.

Serjeant-at-Law Until 1880 the highest class of barrister Serjeants' Inn in Fleet St., London, was the property of the Serjeants-at-Law until 1877. They had the monopoly in the court of common pleas until 1845 and wore a kind of skull cap as distinctive badge

Serjeanty Form of land-holding under the feudal system Service was rendered to the overlord in return for tenure This was not knight-service, but consisted of some kind of household service Such tenure was midway between the tenure by knight-service and that of socage It was divided into grand and petty serjeanty according to the type of duty performed

Serjeants' Inn Two former Inns of Court in London Old Serjeants' Inn stood at the corner of Chancery Lane, near Clifford's Inn The other, whose name still remains, though since 1877 no longer an inn, is a court off Fleet Street, now occupied by insurance companies and other offices

Serpent Name applied to the reptiles of the order *Ophidia*, comprising the snakes Popularly, it denotes the larger species

The serpent cult is found in many countries, and is very ancient It was prominent among Semitic peoples and the Greeks had the cult of Aesculapius, the deity of healing, in whose temples was a living serpent The brazen serpent of Moses was a healing medium, and the symbolic association of the serpent with healing has persisted to modern times, the badge of the R.A.M.C., for example, being Aesculapius' symbol, the staff entwined by a serpent

Serpentine Name of a mineral consisting of magnesium silicate, and regarded as a decomposition product of igneous rocks rich in ferro-magnesian silicates Serpentine occurs in massive form, often as rock-masses, and varies in colour from green to black, usually with veins or spots of red, blue, green, etc. It is soft, easily worked, and from early times has been used for ornamental purposes, a well-known example being the serpentine from the Lizard, Cornwall

Serpentine The Artificial stretch of water in Hyde Park and Kensington Gardens It was made by the order of Queen Caroline in 1730, the Westbourne river, or stream, forming a series of ponds here, which were connected to form the Serpentine In 1834 the Westbourne having greatly decreased in volume, the supply of water had to be supplemented from the Thames, as it is to this day

Serum Term given to the plasma or watery fluid portion of the blood that separates out as the result of coagulation The plasma holds, in solution, mineral salts, albumins, globulins, and extractives, as well as fibrinogen upon which depends coagulation of the blood Various anti-toxic serums are prepared for use in the treatment of diseases

Servant Person who works for another for payment, often called an employee The relations between master and servant, or employer and employed, are regulated partly by law and partly by custom A servant must be insured against ill-health and, in some cases, against unemployment

Sesame Annual herbaceous plant of the genus *Sesamum*, being the most important species (*S. indicum*) It is cultivated

in India and in eastern countries generally, on a very large scale The oil expressed from the seeds is not so liable as some oils to become rancid, and is therefore popular for cooking purposes It is also used for soap-making, lubrication, and illumination

Session Literally, a sitting It is applied to the sittings of the Parliament of Great Britain, and to those of other legislatures A parliament consists of a number of sessions, each opened by the King or his representative and terminated by a prorogation It is finally ended by a dissolution

The kirk session is the term used in the Church of Scotland and other Presbyterian churches for the meetings of the minister and elders of an individual church

Session Court of In Scotland, the supreme court of law It deals with civil cases only and sits in Parliament Square, Edinburgh Its judges are senators of the college of justice, and are given the title of lord. They sit in two houses, inner and outer, the inner being a court of appeal from the outer The inner house sits in two divisions, presided over by the lord president and the lord justice clerk respectively, there being four judges in each The remaining five judges form the outer house

Sessions In England, sittings of the lower courts of law The judges are the magistrates, except that the recorder presides over quarter sessions in the towns Petty sessions are held by two or more magistrates for dealing with minor offences, quarter sessions are held in the counties and in certain cities and towns for hearing more serious cases There are also special sessions for licensing and other matters

Sesterce Ancient Roman coin Worth about 2½d It was used as the unit for stating sums of money The name means "two and a half"

Setter Largo type of dog, used as a gun dog There were originally two species, the pure white English setter and the chestnut brown Irish setter From these was evolved a black and tan setter, first known as the Gordon setter, from the Duke of Gordon who bred it, but now officially designated the Black-and-Tan setter Two other breeds are recognised, though uncommon—the Russian setter, with a thick, woolly coat, and the Welsh setter, with a curly coat

Settle Market town of Yorkshire (W R.) It is situated on the Ribbles and served by the LMS Rly It is a good centre for people wanting to tour the neighbouring hill and caves, and has some small industries Pop 2389

Settle Piece of furniture consisting of a long wooden bench with a high back, seen commonly in old inns and country houses It was usually made of oak, and in some early examples was carved elaborately

Settlement Disposal of property in trust by deed or will so that different persons are entitled to enjoy it in succession An example is a marriage settlement, which creates a trust for the benefit (a) of the husband and wife during their joint lives, and the life of the survivor, (b) gives the income then to the issue of the marriage, and (c) directs the further disposal of the property thereafter Property must not be tied up for an unlimited series of successions, and the law provides that the settlement must give possession absolutely to someone

within a period comprising a life in being and a further period of 21 years

Settlement Act of Measure enacted by Parliament in 1701. It settled the crown on Sophia, wife of the Elector of Hanover, and the heirs of her body, being Protestants. She was a grand daughter of James I., and her son George, Elector of Hanover, became George I. of Gr. Britain in 1714. Other clauses declared judges irremovable as long as they did their duty and made the consent of Parliament necessary for the declaration of war in defence of territories not belonging to the crown of England.

Sevastopol (or Sebastopol) Seaport of Russia. It is built on the ruins of the old Sevastopol, destroyed during the siege (1854-55), which formed one of the chief episodes of the Crimean War (qv). To-day it is a popular watering place and also a grain port. It has a good harbour, and the principal industries are shipbuilding and wine making. There is a broadcasting station (476 M. 12 kW) Pop 74,703

Seven Dials District of London, so called because seven streets meet here. It lies between St Martin's Lane and New Oxford Street, and had at one time an unpleasant reputation. Modern improvements street widening, etc., have altered the character of the region, which now contains theatres, restaurants and picture houses.

Seven Kings District of Essex, 8½ m from Liverpool Street station, by the L.N.E. Ry. It is mainly a residential neighbourhood and forms part of Great Ilford. The population is 10,000

Sevenoaks Urban district and market town of Kent. A residential centre, 22 m from London, by the S. Ry. It has a grammar school, founded in 1432, and a fine church with some interesting monuments. There is a famous cricket ground, the Vines, believed to be the oldest in England. Pop (1931) 10,482

Seven Weeks' War War fought between Prussia (in alliance with Italy) against Austria. It resulted in the foundation under Prussian leadership of a new Germany, from which Austria was excluded, and the cession of Venetia to Italy. Prior to the war the diplomacy of Bismarck had isolated Austria while Moltke and Roon had perfected the Prussian army. The decisive defeat of the Austrians under Bonedek took place at Sadova (or Königgrätz) on July 2

Seven Wonders of the World. In ancient world seven works of man held to be supremely marvellous. They were the Colossus of Rhodes, the hanging gardens of Babylon, the Pharos at Alexandria, the Pyramids of Egypt, the *Phidias* statue of Jupiter at Olympus, the temple of Diana at Ephesus, and the mausoleum at Halicarnassus

Seven Years' War War fought from 1756 to 1763 by an alliance of Austria, France and Russia against England and Prussia (under Frederick the Great). It had two aspects: (1) colonial arising out of Anglo-French rivalry for colonies and trade areas in America and India; (2) continental, due to the struggle between Austria and Prussia for Silesia. Both Britain and Austria suffered reverses at first, but under the energetic leadership of Pitt, the former soon began to gain the upper hand, and

1759 was a year of many victories, including the capture of Quebec by Wolfe. The war resulted in the ceding of Silesia to Prussia and of Canada to Britain, the foundation of the British Indian Empire and the establishment of her naval supremacy

Severn River of Britain. Rising on the slopes of Phyllimon, Montgomeryshire, it flows into the Bristol Channel with a course of 210 m. A tidal bore prevents navigation for some miles from the mouth. Cities on its banks are Gloucester and Worcester, and its principal tributaries are the Wye, the Avon, and the Teme, on the second of which Bristol is situated. Fine salmon are caught in the river the Roman name for which was Sabrina. The Severn tunnel, between Bristol and Cardiff is over 4 m long

Severus Alexander Roman emperor. Born A.D. 205, he was cousin of the infamous Heliogabalus, whom he succeeded in 222. Brought up by a wise mother, he was virtuous in an age when vice reigned almost supreme, and although a pagan he respected the doctrines of Christianity. He was successful in an expedition against the Persians, but when he marched to Germany to defend the Roman frontier against the incursions of the Germans, both he and his mother were murdered during an insurrection among his troops in A.D. 235

Severus Lucius Septimius Roman emperor. Born in Africa A.D. 146, he was made Roman praetor in 178, and after the murder of Pertinax (193) was proclaimed emperor, ruthlessly crushing opposition. He conducted a long and successful campaign in the east, which included the 3 years' siege and capture of Byzantium; he then overcame the Parthians, plundering their capital, Ctesiphon. Going to Britain in 208 to crush a rebellion, he repaired and added to Hadrian's wall, and died at Eboracum (York) in 211

Sévigné Marie de Rabutin Chantal Marquise de French letter writer. Born in Paris, Feb. 5, 1626, she was one of the most distinguished characters of her century, best known for her wonderful *Letters* to her daughter, the Countess of Grignon. She married in 1644 the Marquis Henri de Sévigné, a typical reprobate of his age, and was widowed after seven years. Beautiful in appearance, fascinating in manner, she was a central figure in society, and it is said of her that she remained pure in an age when purity was rare. She died April 17, 1696

Seville City and province of Spain. The city stands on the Gnadalkivir, and is one of the most important and interesting in Spain. Much of the original Moorish city remains, and it has wonderful buildings and monuments. The cathedral with its famous Giralda tower is Gothic and stands on the site of a Moorish mosque. Here also is the old Moorish palace, the Alcázar, and a notable university. The history of Seville dates back to Phoenician times, and the place is still prosperous, though Cadiz has now superseded it as a port. Manufactures include oboleate, soap, perfumes, and silks, while wine and oil are largely exported. There is a broadcasting station (368.1 M., 1.5 kW) Pop 231,049

Sèvres Town of France, situated on the Seine in the department of Seine-et-Oise. It is mainly noted for its famous porcelain factory established in 1756. Pop 72,400

Sewage House refuse carried by sewers. In urban areas sewage is carried by drains to the sewer system, and thence to a disposal works, where it is treated and purified and the effluent rendered fit for discharge into a river or the sea, or for use as a fertiliser. Methods of achieving this include chemical or bacterial treatment, by which the solids are precipitated or the sewage decomposed, and a system in which the more heavy portions settle by gravitation. In the absence of a sewer system the sewage is treated in septic (bacterial) tanks, or collected in cesspools. A process of decomposition goes on in the latter, so that the solids are gradually liquefied.

Sewing Machine Machine devised for sewing and stitching cloth, leather and other materials by mechanical power. In 1846, Elias Howe invented the lock stitch sewing machine, and further improvements upon this type were introduced later by Wilson and Singer. In the ordinary sewing machine the material placed upon a steel plate moves forward automatically as each stitch is made by an eye-pointed needle, the latter forming a loop as it passes through the material. Special types of machines are used for stitching leather and other tough material. Sewing machines can now be worked by electricity.

Sex Term expressing the male and female qualities exhibited in most organisms, both plant and animal. The germ cells of the two sexes differ in character. In the male they are spermatozoa in animals, antherozoids in the lower plants, and in the female ova or egg-cells. In most animals there are further differences in the form and size of the body, functional and mental qualities, and in the minute structure of the germ cells themselves. In many of the lower animals, both male and female germ cells are present in the same individual (hermaphrodite). In others, as in the aphids, parthenogenesis, or development of an individual from an unfertilised egg, occurs.

Sexagesima Church festival. The name is derived from the Latin for sixty. Sexagesima Sunday is the second before Lent, i.e., about sixty days before Easter.

Sextant Optical instrument used in navigation for measuring angular distances between objects at a distance, particularly the altitude of the sun at noon for calculating the ship's latitude. It consists of a graduated arc representing a sixth of a circle, a telescope for sighting a distant object, a mirror at the centre of the circle and attached to a movable arm bearing at its end an index which moves over the graduated scale, and also a fixed half-silvered mirror.

Seychelles Group of islands in the Indian Ocean, belonging to Great Britain since 1794. Having a total area estimated at 156 sq. m. there are 101 islands and islets, Mahé being the principal. The main product is coconuts, while cinnamon and certain essential oils are also important. Victoria, the capital, has a good harbour. Some of the islands have phosphates deposits. In 1931 the population was estimated at 27,786.

Seymour English family, whose present representatives are the Duke of Somerset and the Marquess of Hertford. The name was originally St. Maur, and continued so until the time of the father of Lord Protector Somerset, the first Duke of Somerset

of the new creation, whose sister was the third wife of Henry VIII., and the mother of Edward VI. He himself was Earl of Hertford before he became Duke of Somerset, and a descendant received the title Marquess of Hertford in 1793.

Sgraffito Term applied to a form of mural decoration in which a coat of coloured plaster is covered by one of white, the design being made by cutting or scratching through the top layer, showing the coloured coat underneath. A similar process is followed in certain forms of pottery with clays of different colour.

Shackleton Sir Ernest Henry, English explorer. Born in Kilkee, Ireland, Feb. 15, 1874, and educated at Dulwich College, he entered the mercantile marine. He accompanied Scott in his Antarctic expedition of 1901-04. In 1908 he sailed from New Zealand in the *Nimrod*, in command of an expedition which reached within 100 m. of the South Pole, being knighted on his return. In 1914-16 he made an unsuccessful attempt to cross the Antarctic continent, and in 1921 he again set out in the *Quest*, but died of heart disease in South Georgia, Jan. 5, 1922. He wrote *The Heart of the Antarctic* and *South*.

Shad Name of three food fishes, all belonging to the genus *Clupea*. The American shad is found in the seas and some of the rivers of N. America. The herring and the traite shad are found in the waters of Great Britain and other parts of Europe, also in the Nile.

Shaddock Large, thick-skinned fruit, more usually known as grape fruit (*gr*). The botanical name is *Citrus decumana*.

Shadow Dark area on a surface formed by a shadow cone when an opaque body is placed so as to intercept the light from a luminous point. When the body is spherical and the source of light is a luminous body, then a cone of total shadow or umbra is formed, surrounded by another cone of partial shadow or penumbra, as seen in the partial and complete shadows cast by the earth upon the moon.

Shadwell District of East London of the borough of Stepney. There is a tunnel under the Thames from here to Rotherhithe, opened in 1908. The East London Hospital for Children is in Shadwell.

Shaft In mechanics a means of transmitting power. It consists usually of a cylindrical bar of steel or wrought iron, provided with wheels, pulleys, levers, etc. In architecture the term is applied to the part of a column between the capital and base. In mining a shaft is the well-like excavation communicating with the underground workings of a mine. In prospecting one or more trial shafts are sunk to obtain the direction of the lode, followed by a permanent shaft which is vertical except where the lode is much inclined. From the main shaft cross-cuts or levels are cut to intersect the lode.

Shaftesbury Market town of Dorset, 19 m. W.S.W. of Salisbury, and 28 from Dorchester. The station is Semley, on the S. Ry., but coaches for Plymouth call here. Said to have been founded by King Alfred, it is an agricultural centre. Pop. (1931) 2366.

Shaftesbury Earl of, English statesman. Anthony Ashley Cooper was born at Wimborne, St. Giles, Dorset, July 22, 1621, son of Sir John Cooper.

He entered the Short Parliament in 1640, and was appointed a member of Cromwell's Council of State, 1654. Later he rejoined the Royalists, and was appointed Chancellor of the Exchequer in 1661, and Lord Chancellor in 1672, when he was also created Earl of Shaftesbury. He died on Jan. 21, 1683.

Anthony Ashley Cooper, the 3rd earl, was born in London, Feb. 26, 1671. He was educated under the philosopher Locke (qv) and at Winchester, and travelled abroad from 1686-89. From 1695-98 he sat in parliament and in 1699 succeeded his father as earl. Poor health keeping him out of politics, he devoted himself to philosophy. As a moral philosopher he stressed the value of beauty and harmony in both private and social life. *The Moralists* is his most important work. He died Feb. 4, 1713.

Anthony Ashley Cooper, the 7th earl, was born April 28, 1801, and educated at Harrow and Oxford. Entering parliament in 1826, he devoted himself to improving the conditions of the working classes, and was largely responsible for much factory legislation, including the Ten Hours' Act of 1847. Legislation on coal mines also occupied him, and he investigated alum conditions in London, and helped to establish the ragged schools, of whose union he was president for 40 years. He helped to found reformatory and refuge unions, young men's Christian associations and workmen's institutes, and was interested in foreign missions. He died Oct. 1, 1885.

Shagreen Name given to a kind of untanned leather having a granular surface, which in the case of horse and ass skins is produced by the pressure of seeds on the moist skin. When made from shark or ray skins, the nodules are natural. Shagreen is used for covering small articles, and particularly sword hilts.

Shakers Religious sect. Founded by Ann Lee, they migrated to America in 1772 and settled at New Lebanon, New York. They were derived from the Quakers, their full style being the Millennial Church, or the United Society of Believers. They exalt celibacy, practise auricular confession, and use dancing as a form of worship, the contortions they use in this exercise having given rise to the name of Shakers.

Shakespeare William The world's greatest poet and dramatist. He was born at Stratford on Avon on or about April 23, 1564, and at the age of 18 married Anne Hathaway some eight years his senior. There were three children of the marriage: the son Hamnet, died in childhood, while Susanne and Judith, the two daughters, survived their parents.

Shakespeare went to London about 1587, leaving his wife and family in Stratford and was attracted to the theatre. From holding the heads of playgoers' horses, he graduated through the posts of actor and patcher of old scripts to the position of playwright, poet and part owner of the Globe Theatre at Bankside, Southwark.

He was a contemporary and friend of Ben Jonson, and also met Greene, Marlowe, Drayton and other literary men of the time. In skill and power of writing he excelled not only his contemporaries, but all previous poets and dramatists of this or any other nation. His vocabulary was wider than that of any other writer, and his power of language, his theatrical technique and his knowledge of essential human

nature have made him, in Ben Jonson's words, "not of an age, but for all time." Emerson describes him as "master of the revels to mankind."

His collected works, as published to day, contain 37 plays, 2 long poems, and 154 sonnets, as well as other items of verse. The plays are divided into 17 comedies, 10 histories and 10 tragedies. The long poems are *Venus and Adonis* (1593) and *The Rape of Lucrece* (1594), while of the sonnets, the first 126 are indited to a beautiful young man—some say, the Earl of Pembroke,—and the rest to a certain "dark lady," identified by many as Mary Fitton, Maid of Honour to Queen Elizabeth.

As Shakespeare's plays did not appear complete in print until the folio edition of 1623, it is not possible to fix, without question the dates of the individual plays. The following list—though not accepted by all—shows the order in which the plays probably appeared.

Love's Labour's Lost	1590
King Henry VI. Part I.	1590-92
Do. do. II.	
Do. do. III.	
The Comedy of Errors	1591
Romeo and Juliet	1592
Two Gentlemen of Verona	1593
A Midsummer Night's Dream	1594
King Richard II.	1593-94
Do. III.	
King John	1594-95
The Taming of the Shrew	1595-96
The Merchant of Venice	1596
King Henry IV. Part I.	1596-98
Do. do. II.	
King Henry V.	1598-99
The Merry Wives of Windsor	1598
Much Ado About Nothing	1598-99
As You Like It	1599
Twelfth Night	1600
Julius Caesar	1600-01
All's Well That Ends Well	1601-02
Hamlet	1602
Troilus and Cressida	1603
Othello	1604
Measure for Measure	1604
King Lear	1605-06
Macbeth	1605-06
Pericles	1607-08
Timon of Athens	1607-08
Antony and Cleopatra	1608
Coriolanus	1609
Cymbeline	1609-10
A Winter's Tale	1610-11
King Henry VIII.	1611-12
The Tempest	1611

Titus Andronicus was written either in collaboration with others or entirely by some other hand.

Shakespeare's histories give a clear picture of three hundred years of our island story, his comedies range from broad farce through fairy reveals to delicate and subtle comedies of manners, while his tragedies culminate in the most powerful dramatic works of the world's literature, in *Hamlet*, *Othello*, *Macbeth* and *King Lear*.

Shakespeare's knowledge was all-embracing, his sympathy profound and his understanding of human nature in all its moods uncanny in its accuracy. He basked in the favour of Queen Elizabeth and her successor, King James I., and after 1611 or 1612 ceased to write, retiring to his house, New Place, Stratford, where he lived the life of a country gentleman until St. George's Day, April 23, 1616, when he passed away. He is buried in Stratford-on-Avon church.

The new Shakespeare Memorial Theatre at Stratford on Avon, built with funds subscribed by English speaking people all over the world, was opened by H. R. H. the Prince of Wales, on April 23, 1932.

Shale Laminated rock. Shales vary greatly in character, some approximating to clays, others to sandstones, limestones or

slates Bituminous shales are worked for oil, alum shales for alum and coppers, and clay shales for firebricks

Shallot Plant of the onion family, *Allium ascalonicum*. The small edible bulbs are rather lighter in colour and less strongly flavoured than ordinary onions. They are largely used for pickling

Shangani River of Rhodesia, a tributary of the Gwal, which is itself a tributary of the Zambezi. It was the scene of a British defeat on Dec 3, 1893, when a small force under Major Allen Wilson was destroyed by a Matabele force

Shanghai Seaport of China, on the Wu sung River in the province of Kiang Su, the most important of the Treaty ports. It has an immense export trade, principally in silk and tea, followed in order by cotton, sugar, hides, and wool. There are also shipyards and docks in Pootung, a suburb across the river. The native city was captured by the Red army in 1927. The European quarter covers more than 9 sq. m. and is the commercial centre, with a fine harbour. Pop 3,259,114

Shanklin Urban district and watering place of the Isle of Wight. Beautifully situated on the S.E. coast, on a hillside, and with the downs at the back, Shanklin has been a popular resort since the middle of the 19th century. On the S. Ry., the crossing is made from Portsmouth to Ryde. There is a famous chine here, and also medicinal springs and baths. Pop (1931) 5071

Shannon River of Ireland, dividing Connaught from Leinster and Munster. It is 234 m. long and flows into the Atlantic at Loophead, and is navigable for fair sized vessels up to Limerick, while smaller craft can go as far as Athlone. The waters have been harnessed to work a powerful hydro-electric plant which supplies nearly the whole of the Irish Free State

Shannon Sir James Jebusa Anglo-American painter. Born at Auburn, N.Y., in 1862, he came to England in 1878, studying in the South Kensington Art School. He made his name with the portrait of Hon. Horatia Stopford in 1881, and became A.R.A. in 1907 and R.A. in 1909. He painted some 400 portraits before he died, March 6, 1923

Shap Urban district and market town of Westmorland, 270 m. from London, and 12 from Penrith, on the L.N.E. Ry. There are granite quarries in the neighbourhood. Shap Wells, 4 m. away, has saline springs. Pop (1931) 1227

Shark Large carnivorous sea-water fish allied to the dog-fish. The larger sharks inhabit warm seas, where they are common and generally lie near the surface. The lower jaw is exceedingly powerful, the mouth being large and provided with rows of sharp teeth which are replaced as they wear out. Being powerful swimmers and voracious feeders, they are a serious danger to bathers, or to shipwrecked persons. The man-eater approaches 40 ft. in length, while the blue and the white sharks span up to 18 ft. Shagreen (*gr*) is the prepared skin, and oil is obtained from the liver

Sharon City of Pennsylvania, U.S.A., on the Shenango River, in Mercer Co. It was settled in 1795, and incorporated in

1841. It has iron and steel industries and a considerable trade in coal. Pop 25,908

Sharp In music, a natural note raised by a semitone. The sign to indicate the change is #

Shaw Market town of Lancashire, on the Beal, 3 m. from Oldham. It is a cotton manufacturing town. Pop 5000

Shaw George Bernard Irish dramatist. Born in Dublin, July 26, 1856, he worked for a time with a Dublin land agent and came in 1876 to London, where he struggled with little success as a journalist for nine years. Between 1879 and 1883 he wrote five novels, including *Love Among the Artists*, *Cashel Byron's Profession* and *An Unsocial Socialist*, none of which were accepted for publication. He had become a socialist in 1882 and he now began work as a musical, literary and art critic for the *Star*, *Pall Mall Gazette* and *The World*, and later as dramatic critic of the *Saturday Review*. Meanwhile he acted as a propagandist for socialism, having joined, in 1884, the Fabian Society, for whom he wrote tracts, and he became known as a brilliant debater, but not as an author, though he had already written *The Perfect Wagnerite*, *The Quintessence of Ibsenism* and four plays

Shaw now began to publish his plays, with their famous prefaces on social, religious and biological topics. Of his early plays *Mrs Warren's Profession* (1893) was banned until 1902, while *Candida* (1894) won success in Germany. His first stage success was with *Man and Superman* (1903), followed by *John Bull's Other Island*, *The Doctor's Dilemma*, *Getting Married*, *Androcles and the Lion*, *Pygmalion*, *Fanny's First Play* and others. His three greatest plays *Heartbreak House*, *Back to Methuselah* and *Saint Joan*, were all written after he was sixty. *The Apple Cart* was produced in 1929 and *Too True to be Good* in 1932. In 1936 *The Millionairess* was produced in Vienna. Shaw also wrote *The Intelligent Woman's Guide to Socialism and Capitalism*.

The plays, which are brilliant in dialogue, have qualities of wit, epigram and hyperbole which have come to be known as "Shavian". They expose social wrongs and discuss philosophical and religious problems. The greatest pamphleteer and propagandist of his age, Shaw is a critical and stimulating rather than a constructive thinker. He was awarded a Nobel Prize for literature in 1926.

Shaw Thomas British politician. He was born at Colne, Lancashire, April 9, 1872, and received an elementary school education. He entered Parliament in Dec, 1918, as member for Preston, became Minister of Labour in 1924, and was Secretary for War from 1929-1931, when he resigned with his colleagues in the national crisis. He was joint secretary of the Labour and Socialist International, 1923-1925, and became a Privy Councillor in 1927.

Shawm Obsolete wind instrument. It was something akin to the oboe, having a double reed, and was popular in England from the 12th century onwards. It was made in different sizes, each with a compass of an octave and a half. The familiar use of the word in the Psalms is a mistranslation for shofar, the ritual trumpet of the Hebrews.

Shear Term in engineering for the strain or stress where compression of a piece of material is met by elongation at right angles. A shearing stress occurs when

forces acting upon a material tend to cause one portion to slide past the other and another form of the stress occurs when a similar sliding action is caused by twisting or torsion

Sheathbill *Bird, Chionis alba*, found in South America. It is about the size of a pigeon, the plumage is white and the bill yellow or pink in colour. The legs are bluish grey. A horny sheath encloses the bill. A smaller species, *C. minor*, has a black bill and dark legs.

Sheba Ancient kingdom of Arabia, believed by some authorities to be the modern Yemen. The story of the Queen of Sheba's visit to Solomon's court is told in 1 Kings x., and the original Menekel, King of Abyssinia, is said to have been her son by Solomon. Sheba produced the finest spices, and was famous for its gold and gems.

Shechem Town of Ephraim, now called Nablus. A battle was fought here in Sept., 1018, in which the British, under Lord Allenby, defeated the Turks and as a result completed the conquest of Palestine.

Shee Sir Martin Archer, Irish painter. Born in Dublin Dec., 1769, at 16 he became famous as a portrait painter. Settling in London in 1788, he became A.R.A. in 1798, R.A. in 1800, and succeeded Lawrence as President of the Royal Academy in 1830, in which year he was knighted. He died Aug. 13, 1850.

Sheen East. Village of Surrey, near Richmond. It is in a residential district, surrounded by the open country of Richmond Park, Palewell Common, and Sheen Common. Its proximity to the Thames forms an added attraction.

Sheep Ungulate mammal of the genus *Ovis*, family *Bovidae*, a ruminant. Wild sheep are found in Europe, Asia, Africa, and North America, but one species only in each of the last two continents. The domesticated breeds are grouped according to the type of wool yielded. Long wool breeds include Cotswold, Devon, Kentish, Leicester, Lincoln, Rosecommon, and Wensleydale; short wool the Clun Forest, Dorset, Hampshire, Oxford, Ryeland, Shropshire, Southdown, and Suffolk breeds. Mountain breeds include Black face Cheviot, Exmoor, Herdwick, Lime stone Lonk, and Welsh. They are horned, as are also the Desert short wool sheep, but the others mentioned are ordinarily devoid of horns. Ewes bear the first lambs at 2 years old, in Britain during winter, from October to April, according to the variety. See **MOUFFLON**.

Sheep-dog Breed of dog. It refers to the bob-tailed Old English sheep dog. It is also a useful breed for gun work, and good in the water, while as a pet it is affectionate, docile disposition is to be commended though its long, thick coat needs a great deal of attention. The bearded Scotch sheep dog is equally satisfactory. For the actual work of rounding up sheep many other breeds are suitable, the Scotch collie in particular.

Sheepshead Marine food fish (*Sargus*) of the family, *Sparidae*. Caught in Atlantic waters off the coast of N. America it attains a weight of 7 to 15 lbs., and is esteemed for the table.

Sheerness Urban district and seaport of Kent in the Isle of Sheppey at the mouth of the Medway, on the S. Illy. It is an important naval station with a dockyard. Sheerness-on-Sea is the modern

part of the town, where visitors are catered for. There is a steamer service to London, Southend, and other places. Pop (1931) 16,721.

Sheet Term applied to any thin piece of material, but having many special applications, such as sheet glass, made from a cylinder of glass which is cut and spread out into a thin plate, or sheet metal, copper, lead, tin, iron etc. rolled into thin sheets. Sheetting is a special linen or cotton material made in wide sheets for bed linen. As applied to paper, a quire consists of twenty-four sheets, which vary in size and weight.

Sheffield City of Yorkshire (W.R.). It is at the junction of the Don and the Sheaf, and is served by the L.M.S. and L.N.E. Ryhs. Iron was smelted here in early times and steel manufacture is the chief industry to day. Other industries are tanning, glass, bicycle, paper and instrument manufactures, chemicals, gramophones etc. The city has a university with special facilities for technical research. Since 1915 Sheffield has been the seat of a bishopric, with the fine cruciform church of St. Peter and St. Paul as pro-cathedral. Pop (1931) 511,742.

Sheffield has two famous association football clubs. *Wednesday* won the F.A. cup in 1896, 1907 and 1935, and was champion of the league in 1903, 1964, 1929 and 1930. *United* won the cup in 1899, 1902, 1915 and 1925, and in 1898 the championship of the league.

Sheffield Plate Name applied to plated articles made of copper plated with silver either by fusion or soldering. The manufacture of Sheffield plate was begun about 1743 by Thomas Boulsover, who first introduced the method of fusing silver to copper. At the present time silver is deposited on a base metal such as copper or Britannia metal by an electro-chemical process.

Shefford Great. Village of Berkshire 61 m. from London on the G.W. Ry. Another Shefford is a market town of Bedfordshire, with a station (Arlesey and Shofford Road) on the L.N.E. Ry. It is on the Ivel, 37 m. from London and 9 from Bedford. Pop 849.

Sheikh Arab chief. The word means "old man" and may be used as a title of respect to elders, headmen, and religious leaders.

Shekel Jewish coin. In silver, worth about 2s. 8d., and in gold about 22. It was also a weight, equivalent to about 10 dwts. Troy. The word is Hebrew for a weight.

Shelburne William Petty Fitzmaurice, Earl of. English politician. Born in 1737, he was made President of the Board of Trade in 1763 and three years later became one of Chatham's Secretaries of State. In 1782 George III. invited him to form a ministry, but he did not accept until 1783, when he made William Pitt then only 23, his Chancellor of the Exchequer. He resigned a few months later, on the question of the independence of the American colonies, and was made Marquis of Lansdowne (q.v.) in 1784. He died May 7, 1805.

Sheldon Gilbert. Archbishop of Canterbury. Born at Stanton, Staffordshire, on July 19, 1508, he was educated in Oxford. In 1644 he was elected warden of All Souls College, Oxford, but four years later his royalist activities lost him his position. He was consecrated Bishop of London in 1660 and Archbishop of Canterbury in 1663. He built and endowed the Sheldonian Theatre,

Oxford in 1669. He was made Chancellor of the University in 1677, the year of his death.

Sheldrake (or Sheldrake) Sea duck (*Tadorna cornuta*). It is found on sandy shores of Britain in winter, and often nests in a rabbit burrow on the dunes. About 25 in. long, its head and neck are a glossy green, the wings and body black and white, a chestnut band on breast and back, and a brown or black line on the white under part. The bill is crimson and the feet pink.

Shell In zoology the name given to the exoskeleton of certain animals such as the molluscs, crustaceans, etc., also to the hard outer covering of eggs, and the carapace of the turtle and tortoise. Shells of certain molluscs and the horny covering of tortoiseshell are of economic value.

The term Shell is also applied to a hollow projectile used in military and naval warfare and discharged from guns, howitzers, or mortars. A shell contains some form of explosive or chemical compound according to the use of the projectile, for, apart from their general destructive purpose, some are used for illuminating an area. At first spherical and charged with gunpowder, the modern common shell is cylindrical and pointed and provided with a percussion cap or time fuse, gunpowder being replaced by high explosives.

Shellac Refined resin obtained by melting and purifying crude lac, an exudation from the branches of *Ficus religiosa* and other trees of the same genus in India.

Shelley Mary Wollstonecraft English author. A daughter of William Godwin and Mary Wollstonecraft, she was born Aug. 30, 1797, and married the poet Shelley, as his second wife, in Dec. 1816. Byron, at his villa on Lake Geneva, suggested that four of the company—she, Shelley, Mary, and Dr. Polidori—should each write a ghost story. Mary's creation was *Frankenstein*, which was published in 1818. Her later writings included romances, books of travel, biographies, etc. She died Feb. 21, 1851.

Shelley Percy Bysshe English poet. Born Aug. 4, 1792, at Field Place, Sussex, he went to Eton and later to Oxford whence, together with his friend and fellow-student Hogg, he was expelled for being the author of a pamphlet entitled *The Necessity of Atheism*. In August, 1811, he married Harriet Westbrook, but was separated from her in July, 1814. She drowned herself in the Serpentine in December, 1816, and three weeks later he married Mary Godwin. In company with a friend, Captain Williams, Shelley was accidentally drowned off Leghorn, July 8, 1822. The elegy, *Adonais*, inspired by Keats's death, *Epipsychidion*, and *Prometheus Unbound*, have been considered Shelley's finest pieces of writing. He also wrote *The Cenci*, a tragedy, *The Revolt of Islam*, *To a Skylark*, *Ode to the West Wind*, *Oedipus Tyrannus*, *A Defence of Poetry*, numerous other poems, and some pamphlets.

Shell-fish Generic name used for various types of bivalves and other molluscs good for food. These include oysters, cockles, and the like as well as lobsters, crabs, shrimps, etc.

Shell Shock Name given to the symptoms resulting from exposure to bombardment or other violent concussion. These may be purely physical, but are more often nervous, and so varied

that the name has been applied to almost any psycho effect due to active service. They include sleeplessness, claustrophobia, loss of memory or of speech, and so on. The treatment is psychotherapy in some form.

Shenstone William. English poet. Born at Leasowes, Shropshire, in 1714, he was educated in Oxford. In 1742 appeared *The Schoolmistress*, one of the few works by which he is remembered as a poet. His skill in landscape gardening brought him more fame. When his father died in 1743 he devoted his life so successfully to beautifying the estate at Leasowes that he attracted visitors from far and near. He died Feb. 11, 1763.

Shepherd's Bush District of W. London, in the borough of Hammersmith. It is largely residential, but the White City, built here in 1808, used for various important exhibitions, and during the Great War, as a centre for the Royal Naval Division, has brought certain industries to the neighbourhood. The stadium is now used for dog-racing.

Sheppard Jack. English robber and highwayman. Born in Dec. 1702, he started life as a carpenter, and worked steadily for six years, then fell among evil company, and committed many robberies. He was caught and imprisoned four times, but repeatedly managed to escape. The fifth time his luck failed him, and he was hanged Nov. 16, 1721, in the presence of 200,000 spectators.

Shepperton Village of Middlesex. It is 19 m. from London with a station on the S. Ry. It lies on the north bank of the Thames, and is a good place for fishing.

Sheppey Island off the coast of Kent. It lies at the mouth of the Thames, separated from the coast by the Swale, and is 9 m. long and 5 wide. Its most important towns are Sheerness and Queenborough. There is some agriculture, but the chief industry apart from the dockyard business of Sheerness, is sheep rearing. There is a light railway across the island.

Shepshed Urban district of Leicestershire, 4 m. W. of Loughborough and 120 m. from London by the L.M.S. Ry. Here are quarries and glove and hosiery manufactures. Pop. (1931) 5759.

Shepton Mallet Urban district and market town of Somerset, on the Shepper, 115 m. from London and 22 from Bath, by the G.W. Ry. It has a 16th century market cross, and the market dates from the 14th century. Industries include the manufacture of silk and velvet, pottery and brewing. Pop. (1931) 4108.

Sheraton Thomas. English furniture designer. He was born at Stockton-on-Tees in 1751 and came to London as a young man. He excelled as a draughtsman and designer and left a number of works containing furniture designs. His style may be described as one in which ornamentation was generally subordinated to utility, although many of his published designs are ruined by too much ornament. His chief work was *The Cabinetmaker and Upholsterer's Drawing Book*. He died Oct. 22, 1806.

Sherbet Beverage consisting of fruit juices sweetened and diluted with water. It is freely used in Moslem countries where alcohol is forbidden. The word is derived from the Arabic *sharbat*, a drink.

Sherborne Urban district and market town of Dorset, 118 m from London, and 13 from Dorchester on the S Rly. It is famous for its abbey, which once belonged to a Benedictine monastery. The town is an agricultural centre and has some small industries. Pop (1931) 6442.

Sherborne School dates from the time of the monastery and received its charter as a grammar school in 1550. It has accommodation for rather more than 400 boys. There is also a girls' school founded in 1908, with about 250 pupils.

Sherbrooke City of Quebec, Canada. It lies at the confluence of the St. Francis and Magog rivers and has woollen and cotton manufactures. Mining is carried on in the neighbourhood. It is the seat of a Roman Catholic bishop. Pop 28,943.

Sherburn Market town of Yorkshire (W R), 182 m from London and 13 from York, by the L N E Rly. In former years the Archbishop of York had a palace here. Pop 1735.

Sherburn Colliery, in Durham, is 251 m from London on the L N E Rly. It is a mining district, and has some interesting ruins of a 13th century hospital. Pop 2977.

Sheridan Richard Brinsley Butler, Irish dramatist and politician. Born in Dublin, Oct. 30, 1751, of literary parents, he was educated at Harrow. The family settled in Bath in 1771, where Sheridan married Elizabeth Lincol, the daughter of the composer. In 1773, coming to London, he produced *The Rivals* in Covent Garden, which, after a short delay, proved a wonderful success. Acquiring Drury Lane, he produced *The School for Scandal*, and this also met with instant and enthusiastic approval. Sheridan then turned to politics. Elected for Stafford in 1780, he became Foreign Secretary in 1782, and his part in the impeachment of Warren Hastings made his parliamentary reputation. Theatrical affairs met with disaster, and he died in poverty, July 7, 1816. He was buried in Westminster Abbey.

Sheriff Public official, the descendant of the reeve or governor of the shire, an office which existed in England before the Conquest. In modern times the county official is known as the high sheriff and is nominated on Nov. 12 every year. His duties are mainly social, and it is his function to receive the judges when they are on circuit. He is chosen by the Crown. There are also sheriffs in London and in some ancient cities and boroughs such as Norwich, Bristol, Oxford, Canterbury and York.

In Scotland the sheriff has legal duties and is himself a lawyer.

Sheriffmuir Battlefield on the slopes of the Ochils, Perthshire. It was the scene of an indecisive battle between the Jacobites under the Earl of Mar and the Hanoverians under the Duke of Argyll, in 1715. Both sides claimed the victory, the casualties being equal.

Sheringham Urban district and watering place of Norfolk, 142 m from London and 4 from Cromer, by the L N E Rly. With good air and beautiful country its main industry is catering for visitors, though there is also some fishing. Pop (1931) 4141.

Sherry Name of certain Spanish white wines made in the neighbourhood of Xeres near Cadiz. Various types of sherry are made, the pale dry wines being represented

by the Manzanilla sherries, and the browner sweet kinds by the Amontillado. Other varieties are the Vino Fino, Olorosa, and Montilla. The best wines are used largely in Cadiz for improving the quality of inferior wines, and the exported sherries are usually strengthened by the addition of alcohol.

Sherwood Forest Woodland district of Nottinghamshire. Very little of it remains to day, but some of the large estates in the Dukeries (q.v.) have vestiges of it. It was primarily associated with Robin Hood and his merry men, and the name lingers as one of the suburbs of Nottingham city. Originally it covered more than 200 sq. m., and was Crown property.

Shetland Islands Group of islands off the N coast of Scotland, 50 m N E of the Orkneys, with an area of 551 sq. m. There are about 100 in the group, but only 30 are inhabited, including Mainland, Unst, and Yell. Lerwick is the capital. Sheep rearing is the main industry, with the production of the famous Shetland wool and the articles knitted from it. There is some agriculture and fishing. Pop 21,410. They form a county of Scotland and unite with the Orkneys to send a member to Parliament.

Shetland Pony Small breed of pony from the Shetland Isles. Also known as the shoby, it is the smallest breed of British horse, with a thick shaggy coat, mane, and forelock, and great strength and endurance.

Shibboleth Test word. The term has come into general use from the Bible story told in Judges xii. 6. Jephthah used the word to sort out his own followers from the Ephraimites as they passed Jordan. The latter pronounced it Sibboleth, without the h, thus betraying their origin.

Shiel Scottish lake. It lies between Invernesshire and Argyllshire, of which counties it forms part boundary and is 17 m long and 1 m wide. Glenfinnan stands at the head of the loch. Here Charles Edward Stuart raised his standard in 1746.

Shield In heraldry the escutcheon or field on which coats of arms are placed or blazoned. It was really the shield used by knights in warfare, painted in order to distinguish one from another.

In engineering a shield is a mechanical device used in tunnelling operations in loose or soft materials. Brunel in building the Thames Tunnel between 1825 and 1843 was the first to use a shield which, lowered down the shaft, was moved forward as the tunnel was dug out by the men. Various improvements were made and the modern type consists of a steel cylinder with a cutting edge, the shield being forced forward slowly by means of hydraulic rams.

Shields North Market town and seaport of Northumberland, at the mouth of the Tyne, part of the borough of Tynemouth, 275 m from London and 8 m from Newcastle on the L N E Rly. It has docks and shipbuilding industries, and coal is exported.

Shields South County borough and seaport of Durham, on the S bank of the Tyne, 270 m. from London and 8 m from Newcastle, by the L N E Rly. It is a centre of the coal export trade, and has a fine harbour, with good docks and shipbuilding yards, also manufactures of chemicals, glass,

etc. There is a steam ferry connecting it with N Shields. Pop (1931) 113,452.

Shifnal Market town of Shropshire, 136 m from London and 17 from Shrewsbury, by the G W Rly. It is an old and picturesque place, situated in a mining district, with iron foundries and blast furnaces as its principal industries. Pop 3303.

Shiites Mohammedan sect. Their special tenet is additional reverence for Ali, cousin of Mahomet, and the solemn observance of the anniversary of his assassination.

Shildon Urban district and market town of Durham, 241 m from London and 9 from Darlington, by the L N E Rly. There are railway works here, while iron-founding and coal mining are important, and there are stone quarries in the neighbourhood. Pop (1931) 12,600.

Shilling British silver coin, with a nominal value of 12 pence. It is the 20th of a pound sterling, and in its present style dates from the reign of Henry VII. There was a coin of the name in Saxon times, which was raised to the value of 12 pence after the Conquest. The milled edge was added in the reign of Charles II in order to prevent debasement by paring the edge of the coin.

Shingle Shore deposit consisting of pebbles formed by wave action upon the base of a cliff. Shingle, at first coarse, gradually passes into finer material, and finally into sand.

The term shingle is applied also to thin pieces of wood, either sawn or split, and used for roofing houses instead of tiles.

The word also means to cut the hair closely to the head, a fashion adopted by women in Great Britain after the Great War.

Shingles (*Herpes*) Acute skin inflammation characterised by a rash occurring over areas of the face and body, usually preceded by stinging, neuralgic pains. At first the spots are full of clear fluid, later they become turbid, and in a few days dry and clear up.

Treatment A soft, sterilised gauze dressing should be applied to the spots, and the area kept dry by the use of dusting powder. If the pain is severe, a sedative such as aspirin should be given. Ultra-violet ray treatment is helpful in clearing up the condition.

Shintoism State religion of Japan. The name is derived from the Chinese, meaning "the way of the gods," and in practice it is a form of animism, the divinities consisting of natural powers, abstract qualities, and deified men. The goddess of the sun is called Amaterasu, and is the chief deity. The book of Shintoism is the *Kojiki* (A.D. 712).

Buddhism and Confucianism have influenced the teaching, and some of its practices are derived from them. There are pilgrimages, purification ceremonies, and a form of ancestor worship. The after world is known as Yomi.

Shinty Form of hockey, played in Ireland and the Highlands of Scotland. Each side has twelve players, and the stick, called the caman or club, has a triangular head. The ball is made of cork covered with leather. The goals are 12 ft wide and 10 ft. high, and are called hails. There are resemblances between shinty and hurling.

Ship Large vessel used for navigation, on the sea, and very varied in type. In ancient times the Egyptians were great shipbuilders, their vessels, propelled by oars and sails, navigating both the Mediterranean

and the Red Sea. The Chinese and Hindus also used ships for their widespread commerce with other countries. Ship design underwent many changes from the 16th century onward, and with the introduction of steam in the 19th century wooden sailing ships were replaced largely by iron and steel steam vessels. These, at first, were of the paddle wheel type, but later the screw-propeller was found to be a more efficient device.

Shipbuilding Business of designing and building ships. The work is done from drawings and plans made usually by members of the Society of Naval Architects. It comprises a great variety of operations, many being done in the shipbuilding yards where the hull of the vessel is laid, but others, such as the building of the engines, usually elsewhere.

Shipbuilding may be divided into two classes: the building of warships and the building of cargo and passenger vessels. Much of the former is done in the government yards, but some is given out to private firms who have yards in the great ports. For long Great Britain had almost a monopoly of the world's shipbuilding, but after the Great War this supremacy was to some extent lost. Apart from naval shipbuilding at Portsmouth and Plymouth, the great centres are the ports on the Clyde, Tyne, and Tees.

In 1929 and subsequently the prospects were so unsatisfactory that an association of 'shipbuilders called the National Shipbuilders' Security was formed to buy up redundant yards, and a number were closed down. In 1931 it was reported that of 200,400 insured workers in the industry, more than half were unemployed. The employers have their organisations, and the men a powerful trade union called the Federation of Engineering and Shipbuilding Trades.

Ship Canal Waterway for sea going ships. Among the most famous are the Suez Canal and the Panama Canal, but there are others on a smaller scale, which have made inland places into seaports. Of these the Manchester Ship Canal, completed in 1893, is a good example.

Shipley Market town in Yorkshire (W.R.) It is virtually a suburb of Bradford, and is 206 m from London, by the L.M.S. Rly. It is one of the woollen towns. Pop (1931) 30,243.

Ship Money Tax for the upkeep of the navy and coastal defences. It developed from the prerogative of the Crown to require maritime towns and counties to furnish ships in time of war, a liability which was often commuted for a money payment. The writs issued by Charles I in 1634 and 1635 levying ship money in time of peace and on inland as well as maritime counties and towns aroused the opposition of John Hampden. It became one of the chief issues between King and Parliament, and was expressly declared illegal in 1641.

Shipping Business of conveying goods and passengers across the sea. There are special laws for the regulation of shipping, and a department of the Board of Trade exists to see that they are enforced.

In Great Britain these laws, chiefly contained in measures passed in 1894 and 1906, deal with the engagement, wages, and conditions of work of seamen, the sale and purchase of ships and the loads allowed. They forbid the employment of unseaworthy ships and deal with the relations of shipowners, brokers and others concerned.

The greatest shipping nations of the world are, according to the figures of July, 1935, as follows

	Tons		Tons
British Empire	20,510,021	Germany	3,703,682
United States	12,850,230	France	3,025,136
Japan	4,043,650	Italy	2,834,408
Norway	3,907,972	Netherlands	2,558,383

There are many organisations in connection with the industry. The employers who include such great companies as the Peninsular and Oriental (P & O), Cunard Royal Mail, Furness and others, are organised in the Chamber of Shipping. The employees have a National Union of Seamen. Shipbrokers, men who arrange for the conveyance of goods, have their Chartered Institute of Shipbrokers at 57 St. Mary Axe London E.C.3. During the Great War shipping was placed under government control and a Ministry of Shipping was established. This lasted from 1917 to 1921. See MERCANTILE MARINE.

Shipton Mother English prophetess, probably mythical. According to tradition she lived in the 16th century, and is said to have prophesied the death of certain eminent persons. One anonymous writer relates that she was born at Knaresborough, and that her maiden name was Ursula Southill. Another, Richard Head announced her to be the Devil's daughter. Her prophecies have been quoted until quite recent times including the famous statement that carriages would go without horses, i.e., trains and motors.

Shiraz City of Persia (Iran), 130 m from Bushire. Here the poets Sa'di and Hafiz were born. It was a stronghold of the Zoroastrians and was founded in 697. Besides the wine industry there is trade in cotton, spices, and perfumes, especially attar of roses. Pop. 50,000.

Shire Territorial division of England, the equivalent of county. At one time these were under the jurisdiction of an earl who in his turn delegated the administration to a reeve, hence the term shire, i.e. shire reeve. See COUNTY.

Shirebrook Town of Derbyshire, 143 m from London and 5 m from Mansfield on the L.M.S. Rly. A small stream the Shirebrook separates Derbyshire from Nottinghamshire at this point. It is in a coal mining district.

Shirehampton District of Gloucestershire. It is situated 125 m from London on the River Avon, being virtually a suburb of Bristol on the G.W. Rly. See BRISTOL.

Shire Horse Heaviest breed of horse used for farm and traction work. It is probably the lineal descendant of the old English war horse.

Shittim Variety of acacia (*A. seyal*). It grows in Palestine particularly in the neighbourhood of the Dead Sea and its wood was used by the Jews for building and decorative work. The Ark of the Covenant was made of it and much of the timber of the Tabernacle was shittim. It is hard and close grained, and lends itself to difficult workmanship.

Shoal Shallow area in a river, lake or sea. A shoal often occurs where there is a sandbank, river bar or reef, and is therefore a danger to navigation. Oceanic shoals formed by submarine ridges rising to within a short distance from the surface occur in many parts of the world.

The term shoal also means a large number of fishes together, as herring shoals, mackerel shoals, etc.

Shock Depressed condition due to injury to the physical organism. Treatment for shock, from whatever cause, is fresh air and loosened clothing. The patient may collapse and become cold and hinc, in which case he must be wrapped up warmly in blankets, with his head lower than his feet and have hot water bottles at the feet and sides. If he can swallow, a teaspoonful of sal volatile is the best restorative and hot tea or coffee containing sugar will restore heat and energy.

If breathing ceases artificial respiration (q.v.) must be resorted to. (See DROWNING.) In cases of unconsciousness resulting from concussion injury, or fits beyond doing everything to keep the patient warm, attempt no treatment until the doctor arrives.

Shoddy Textile material of inferior quality made from waste wool obtained from old woollen fabrics and cloth clippings. These are cleansed, unpicked, sorted into various grades and teased into fibres, which, after oiling are re-spun into cloths, rugs, etc. The chief centres of the shoddy trade are Batley, Dewsbury and Leeds.

Shoeburyness Urban district of Essex, on the N side of the Thames estuary, 39 m from London and 3 from Southend, by the L.N.E. Rly. Here is a gunnery school. Pop. (1931) 6717.

Shooter's Hill District of London part of the borough of Woolwich 10½ m from Charing Cross, with a station (Eltham Park) on the S Rly. It is a residential district, and there are some woods that are now public property.

Shooting Star Common term used for the meteors which travel rapidly across the sky, often leaving a trail of light behind them, and seen at certain periods of the year.

Shop Steward Trade union official. The office may be held by any member of the union who has worked with a particular firm for a given time, and who is appointed by his fellows. He is responsible for the collection and forwarding of subscriptions, and the general organisation of the union in his own firm.

Shore Jane Mistress of Edward IV of England. The date of her birth is unknown but her association with the king dates from about 1470. After his death she was charged with sorcery by Richard III and made to do public penance. She died about 1527, completely destitute. Tradition derives the name of Shoreditch from the place of her death, but this is very doubtful.

Shoreditch Metropolitan borough of the county of London. To the N.E. of London, it includes Moorfields, Hoxton, Haggerston and Kingsland. It is the centre of the furniture and cabinet making trade of London. The first London theatre was built here by James Burbage and the parish church is known as the actors' church because both the Burbages and Richard Tarleton are buried there. Pop. (1931) 97,038.

Shoreham Watling place of Sussex, 6 m W of Brighton and 55 m from London at the mouth of the Adur, on the S Rly. Old Shoreham lies a little way up the river, and has a fine old church. New Shoreham caters for visitors. In mediaeval times Shoreham was a flourishing port. In the

harbour silted up and its prosperity decayed. From here Charles II escaped after the Battle of Worcester in 1651. Pop (1931) 8757.

Shoring In building and engineering, the act of supporting a building or other structure by means of wooden props, usually as a temporary measure. In docks, a vessel while being built or repaired is kept steady by shoring with timbers. In mines, the entrance, walls, and roof of an adit or a working level are supported by pit-props and baulks of timber, or in many cases a more permanent support is secured by masonry.

Shorncliffe District of Kent, 70 m from London and 2 from Folkestone, by the S Ry. An important military camp here dates from 1855.

Shorter Catechism Presbyterian confession of faith. It was drawn up in 1647 for the use of the churches of Scotland, the larger catechism being considered too profound and difficult for instructing simple people.

Shorthand System of abridged or condensed handwriting which can be set down as rapidly as words are spoken. There are two main schemes upon which all systems are based, the phonetic or sound scheme, and the orthographic or writing scheme. In addition to these there is a geometric type.

Pitman's Shorthand is phonetic, while the lightness or heaviness of the signs show whether the sound indicated is light or heavy, as P or B. Further effects are obtained by the position of the signs above, below, or on the line, and there are innumerable grammalogues or condensed signs which represent a whole word or a whole phrase. The more modern systems tend to become simplified and less arbitrary, making less demand on the memory. Gregg and Sloan-Duployan are such systems. Speedwriting is one system which is based entirely on words as they are spelt in English, condensed until great speed in writing can be acquired.

Shorthorn Breed of cattle. It is a utility type, noted both for its beef producing quality and high milk yield. White, red, or roan in colour, the body is symmetrical and bulky, though small in bony framework. The horns are short and curved. See CATTLE.

Shorthouse Joseph Henry, English novelist. He was born in Birmingham of Quaker parentage on Sept 9, 1834, and educated privately. In 1880 he printed for private circulation 100 copies of *John Inglesant*. One of these fell into the hands of W. E. Gladstone, and was so highly praised by him that, when the book was published the following year, it became the most widely read and the most discussed book of the day. He subsequently wrote other books, but none of these had any outstanding success. He died March 4, 1903.

Shotley Village of Suffolk. It stands on a point where the Orwell and the Stour flow into the sea, 10 m from Ipswich and 2 from Harwich. There are naval barracks here and a school for naval cadets.

Shottery Village of Warwickshire. Its chief claim to fame is Anne Hathaway's cottage, where Shakespeare's wife lived when he was courting her. Stratford-on-Avon is 1 m away. The cottage was acquired by the Shakespeare Birthday Trust in 1892.

Shotts Town of Lanarkshire, Scotland. It lies 394 m from London and 6 from Glasgow, on the L.N.E. Ry. It is a mining

centre, and bricks and tiles are manufactured. Pop 20,582.

Shoulder Ball and socket joint by which the arm is joined to the body. The head of the humerus fits into a socket in the shoulder blade, and is surrounded by ligaments and muscles all of which allow free movement. The most common injury to the shoulder is a dislocation, but the shoulder blade may be fractured by direct violence.

Shovel Sir Cloudesley, English sailor. Born in Norfolk, Nov., 1650, of poor parents, he went to sea, and commanded a ship at the battle in Bantry Bay, 1689, being knighted for his services. In 1690 he was rear-admiral of the blue, serving at the battle of Beachy Head. As rear-admiral he assisted in the capture of Barcelona, but attacked Toulon unsuccessfully. On October 22, 1707, his ship, the *Association*, foundered in a fog off the Scilly Islands with a loss of all on board.

Shoveller Species of duck (*Spatula clypeata*). It is a native of Europe, Asia, N. Africa, and N. America, and a winter visitant to Britain, breeding in our Eastern counties, in Ireland, and in parts of Scotland. The bill is broad and spatulate. The male plumage is head and neck, green, back, brown, wings, white and brown, breast, chestnut, shoulders, light blue, underparts, chestnut. The bill is black and the legs orange.

Shrapnel Type of ammunition. It was invented by Col. Henry Shrapnel (1781-1842) and consists of a shell enclosing many bullets. When the shell bursts these are propelled forward at great speed. Shrapnel was taken into use by the British Army in 1803.

Shrew Small, mouselike, insectivorous mammal. The family (*Soricidae*) is widely distributed. A long snout, small, rounded ears, and the specialised teeth appropriate to their diet are characteristics. The common British shrew is nearly 3 ins. long with a shorter tail, the fur being brownish to reddish-grey above and lighter beneath. Besides insects, it eats worms and snails. Another British species, the pigmy shrew, is just over 2 ins. long, the fur being a reddish brown.

Shrewsbury Municipal borough and county town of Shropshire. It is situated on the Severn, 153 m from London and 43 m from Birmingham, on the G.W. and L.M.S. Rlys. It was important from early times as a border town, and grew rapidly under the Tudors, many fine 16th century buildings surviving. The principal buildings are the castle, St. Mary's and the Abbey church, and the old market house. There are steam-wagon works and other industries. Pop (1931) 32,370.

Shrewsbury School, founded by Edward VI in 1552, has some 500 boys, and includes as one time scholars Sir Philip Sidney and Judge Jeffreys.

The Battle of Shrewsbury was fought on July 21, 1403. Here Henry IV defeated an allied force consisting of the Percy family, the Welsh under Owen Glendower, and other malcontents.

Shrewsbury Duke of. Born July 24, 1660, and succeeding to the Earldom of Shrewsbury while still a child, Charles Talbot was created duke in 1694. One of the seven who in 1688 invited William, Prince of Orange, to come to England to replace James II, he was Secretary of State under William and Mary from 1688-1690, and again

1691-1760 During this latter period he was accused of treason, there being a strong suspicion that he was corresponding with the exiled James William allowed him to resign, and he retired to the Continent till 1767, when he returned to England and became Lord High Treasurer, Lord Chamberlain, and Lord Lieutenant of Ireland. He died Feb 1, 1718

Shrewsbury Earl of English title One of the oldest earldoms in the peerage, it was first granted to Roger de Montgomery in 1071 His son, Robert, was deprived of his titles in 1102 The earldom was revived in 1442 for John, 5th baron Talbot, whose descendants bear the title to day Talbot, who fought in the French wars, was one of the foremost English leaders defeating the Burgundians at Crecy in 1437 and taking Harfleur in 1440 He also served in Ireland and died fighting in France in July, 1453 See TALBOT

Shrike Bird of the family *Laniidae* Four of the shrikes, including the woodhoop (*L. rufus*), visit Britain in winter, but only one species, the red backed shrike (*L. collurio*), or butcher bird, breeds there

Shrimp Name applied generally to small salt water crustaceans of the order *Macrura*, and in particular to the so-called edible brown shrimp (*Crangon vulgaris*) When alive the brown shrimp is greyish green spotted with brown It turns pinky brown when cooked The shrimps are near allies of the prawns, which are larger and have nippons on the walking feet The common shrimp is abundant in shallow water off the British Isles, and shrimp fishing is a considerable industry

Shropshire (or Salop) County of England The western part of the county is hilly and the greater part south of the Severn upland In the north is the Wrekin (1835 ft.), and the county also contains the famous Clive Hills, Wenlock Edge and Clun Forest Mainly agricultural, Shropshire produces barley, oats, beets, etc., and is noted for its sheep and cattle From its clays, bricks tiles pottery and earthenware are made and there are important coal fields and iron founding industries Shrewsbury is the county town, other important towns are Bishop's Castle, Bridgnorth, Ludlow, Oswestry and Wenlock Area, 861,800 acres Pop (1931) 244,162

Shropshire is rich in ancient remains, including the Roman Uriconium (Wroxeter), Offa's Dyke (q.v.) and 32 Norman castles Till the 16th century the county suffered much from incursions by the Welsh, but after the union of England and Wales, Welsh immigrants settled in large numbers Great prosperity was brought by the cloth and wool trade, and fine houses a feature of the county, were built of half timber and brick The fisheries and the trade of the Severn were another source of wealth

Shrove Tuesday Name for the day before Ash Wednesday It was so called from the fact that in former times it was customary for people to be shroven that is, to make their confessions, on that day, in preparation for Lent The eating of pancakes is a feature of the old Shrove Tuesday feasting that has survived

Shrub General term for a perennial woody plant with branches growing either from the roots or from the level of the ground The word has no scientific significance, but is used in order to distinguish between a shrub

and a tree The latter is understood as having a single trunk with the boughs beginning a considerable height from the ground A feature of modern horticulture is the cultivation of flowering shrubs

Shrubb is also the name of an alcoholic drink made from various ingredients

Shuttle In weaving, the term for the instrument used for carrying the thread of the weft between the threads of the warp It consists of a wooden block pointed at the ends and hollowed out in the middle to hold the yarn, the thread passing out from an eye in the side

Siam Kingdom of SE Asia extending southwards into the Malay Peninsula, bounded on W and N by Burma, and on NE and E by French Indo-China Its area is 200,234 sq m The capital is Bangkok at the mouth of the Menam River It is chiefly lowland with the valley of the Menam on the west, and the valleys of the Mekong and its tributaries on the east Upper Siam is mountainous

In 1932 a Constitution Act greatly reduced the King's power, which hitherto was almost absolute but in 1933 there was serious trouble between the liberal party and the reactionaries In 1935 King Prajadhipok abdicated and Amdanda Mahidol was proclaimed King. Rice and teak are the principal products and among minerals tin, rubies and sapphires are important Bangkok, the capital, has a university, and there is a good educational system Pop (1936) 11,684,600

Siamang Gibbon ape of Sumatra and the Malay archipelago It is the largest species of the genus, standing about 3 ft high with very long arms and hind limbs It is classified as *Syndactyla hylabates*, from the fact that its distinguishing characteristic is the skin which unites the middle and index toes for half their length

Siamese Twins Two children born in Siam in 1811, having their bodies united by a band of flesh stretching from one breast to the other They were exhibited in America and Europe about 1829, and again in 1869 after a period of retirement, during which they married two sisters and had offspring They died in 1874 The name is applied to other freaks of the same kind

Sibelius Johan Julius Finnish composer He was born at Tavastehus, Dec 8, 1865 and studied music at Helsingfors, Berlin and Vienna Since 1893 he has been professor at Helsingfors His best known works are *Finlandia* (a symphonic poem) and *Palm Tree* His work is characterised by great technical power as well as imaginative quality His compositions include eight symphonies ten symphonic poems and several works for both choir and orchestra

Siberia Asiatic territory of the Soviet Union of Russia, comprising 12 provinces with an area of 4,863,100 sq m The chief towns are Irkutsk in the south and Tomsk in the west Siberia is traversed by great rivers of which the Yenisei and Amur are the most important, nearly all are ice bound for many months in the year The country comprises alternations of great mountain ranges with zones of steppes or level table land and belts of virgin forest There are immense mineral resources at present only partially developed, the mines being chiefly worked by convicts, while the population consists largely of descendants of former

convicts and exiles. A feature of Siberia is its immense lakes, Lake Balkal being one of the largest freshwater lakes in the world. The Trans-Siberian Railway, running from Moscow to Vladivostok and skirting Lake Balkal, is the main artery of communication, with a total length of 6431 m. Pop (1931) 11,335,600.

Sibyl Name given by the Romans to prophetesses, generally reckoned to be ten in number and supposed to be inspired by Apollo. The most famous was the Cumaean Sibyl, said by Livy to have offered Tarquinius Superbus nine books of oracles concerning the religion of Rome. He refused to give her her price, whereupon she burnt three books and offered the remaining six without abating her demand. After a second refusal, she burnt three more, and Tarquin, struck by her pertinacity, bought the remainder at the price of the original nine. Housed for reference in the temple of Jupiter on the Capitol, the Sibylline Books were destroyed by fire in 83 B.C.

Sicily Largest island in the Mediterranean. Separated from Italy by the Strait of Messina, it has an area of 9935 sq. m. The capital is Palermo (q.v.). Other important towns are Catania and Messina. The island is largely a plateau from 500 to 1000 ft. above sea-level, traversed through the northern half by a continuation of the Apennines. Mount Etna (q.v.) rises out of the Plain of Catania. The climate is usually warm and equable, but subject in spring and early autumn to visitations of the sirocco. The soil is fertile, and fruit and cereals are freely grown. The island has a considerable mining industry, and is the world's chief source of sulphur.

Sicily has had a very chequered history. The Phoenicians and Greeks planted it with colonies; it was then dominated successively by Romans, Goths, Saracens and Normans. In later times it was ruled by Angevin, Hapsburg, and Bourbon dynasties until it was freed by Garibaldi, when it became, in 1861, a part of united Italy. Pop (1931) 3,972,379.

Sickert Walter English painter and etcher. Born May 31, 1860, at Munich, he studied under Whistler at Chelsea, was made A.R.A. in 1924, and in 1928 was President of the Royal Society of British Artists. His pictures include "The Camden Town Murder" (1906), "Supper at the Casino" (1920), "Raising of Lazarus" (1932), and his architectural paintings, "Hotel Royal" (1900), and "Pulteney Bridge" (1918).

Sidcup Urban district of Kent, 12 m. from London, on the S. Ry. It is a popular residential district. Pop (1931) 12,360.

Siddons Sarah. English actress. Born at Brecon on July 5, 1755, daughter of Roger Kemble, she was considered by many to be England's greatest tragic actress. She married the actor, William Siddons, and made her London debut in Drury Lane, as Portia, but was a failure. She then toured England for six years, her reputation growing daily, and returned to Drury Lane to make an immediate success. From this time her career was one long triumph. Joining her brother, John Kemble, at Covent Garden in 1803, she acted there until her formal farewell, as Lady Macbeth, in 1812. She is now best remembered by Gainsborough's portrait of her. She died on June 8, 1831.

Siderite Alternative name for the mineral chalybite, the native carbonate of iron. It varies in colour from pale yellow to brownish black, and occurs either massive

and granular, or as rhombohedral crystals. In its impure form as clay ironstone it forms one of the most valuable ores of iron in England.

Sidgwick Henry English philosopher. Born May 31, 1838, he took an active part in the provision of higher education for women, Newnham College being the outcome of his efforts. Though not orthodox in his beliefs, he regarded Christianity as "indispensable and irreplaceable, looking at it from a sociological point of view." His principal writings are *The Principles of Political Economy* (1883), *Outlines of the History of Ethics* (1886), and *The Elements of Politics* (1891). He was one of the founders of the Society for Psychological Research. He died on Aug. 23, 1900.

Sidlaw Hills Low mountain range in Perthshire and Angus, Scotland. The chief summits are Craigowl (1493 ft.), Auchterhouse Hill (1399 ft.), and Dunsinane (1012 ft.), which has remains of an ancient fort known as Macbeth's Castle.

Sidmouth Urban district and watering place of Devon. It is 14 m. by road E.S.E. of Exeter and lies in a narrow valley between the red sandstone cliffs of High Peak on the west and Salcombe Hill on the east. The observatory built here by Sir Norman Lockyer (q.v.) has recently been enlarged. Formerly a prosperous port, in the time of Edward III. it sent two ships to the Siege of Calais, but lost its importance owing to the silting up of the harbour. Pop (1931) 6126.

Sidney (or Sydney) Algernon English politician. Born in 1622, grandson of the second Earl of Leicester, he fought at Marston Moor against the Royalists. At the Restoration he went to the Continent, but returned under a pardon in 1677. He drew up a constitution for Pennsylvania for his friend, William Penn. Accused of high treason at the time of the Rye House Plot, he was attainted and sentenced to death by the notorious Judge Jeffreys, and executed on Dec. 7, 1683. The attainder was cancelled 1689.

Sidney Sir Philip English statesman and author. Born at Penshurst, Kent, on Nov. 30, 1554, of noble descent, he was educated at Shrewsbury and Oxford. By turns in and out of favour with Queen Elizabeth, he was sent, in 1577, as ambassador to the Emperor Rudolf II., and later to William, Prince of Orange. He was knighted in 1583. In 1585 he had arranged to accompany Drake on one of his buccaneering expeditions to America, but was prevented from sailing by Drake's machinations. Instead, he was ordered to go under Leicester to the support of the Netherlanders in their struggle against Spain, and he was killed at Zutphen on October 17, 1586.

His contemporary and friend, Edmund Spenser, said that he was "the president of noblesse and chivalry." His poetry, all published after his death, bears close relationship to the romance of his life, and his sonnets have been said to offer the most complete and powerful pictures of passionate love in the English language. His chief works are, *Arcadia*, a romance, the *Astrophel and Stella* sonnets, and the *Apologie for Poetrie*.

Sidon Ancient name of the modern Syrian seaport, Saida, situated on the east coast of the Mediterranean, halfway between Tyre and Beirut. An important Phoenician city, colonies were sent out from it to nearly all parts of the ancient world, and it was famous for its manufactures of glass and linen, purple dye and perfumes.

It passed from Phœnician to Assyrian, Babylonian and Persian domination, and submitted without resistance to Alexander the Great. It fell later into Syrian, Egyptian, and Roman hands. It had a chequered history during the Crusades, being held sometimes by the Saracens and sometimes by the Christians. It was stormed by the Allies under Napier in 1840, and occupied by British troops in 1918.

Siegfried Hero of Teutonic legend, and principal character of the *Nibelungenlied*. The legend of the Nibelungs took root in Germany after its birth among the Franks on the Rhine and from Germany found its way in a slightly altered form to Scandinavia. In the *Nibelungenlied* Siegfried slays the dragon, Fafnir, and wins the hoard of the Nibelungs. Making himself invulnerable by bathing in the dragon's blood, he helped Gunther to win Brunhild in Iceland, but Gunther's sister, Kriemhild, brings about his death. For the Norse variations, see **SIGURD**.

Siemens Sir William. German scientist and inventor. Born in Hanover, April, 1823, he settled in England in 1844, being naturalised in 1850, and knighted in 1883. He was President of the British Association in 1882. He and his brother, Werner, founded the firm of Siemens Bros., building overland telegraphs, and laying cables, designing the steamship *Paradise* for this purpose. Siemens's regenerative furnace, which produced steel directly from the ore, practically revolutionised the methods of steel production; he was also a pioneer in electric tramways. He died on Nov. 19, 1883.

Siena Province and town of central Italy. The province has an area of 1471 sq. m., and produces wheat, olive oil, silk and Chianti wine. The town is situated on three hills, and is surrounded by ancient walls. It has a Gothic cathedral dating from 1243 and containing Donatello's statue of John the Baptist. There are also many fine palaces and a university founded in 1203. It was annexed to Florence in 1557. Pop. (1931) province, 260,891; town 17,688.

Sierra Name applied in Spain and America to ranges of mountains with jagged peaks. It is usually derived from the Latin *serra* a saw, but is believed by some to have the same origin as Sahara, namely, the Arabic *shrah*, a desert place. There is a Sierra Nevada in both Spain and California, and a Sierra Madre in Mexico.

Sierra Leone British Crown Colony on the W coast of Africa ceded to Great Britain in 1787. A Protectorate over the Hinterland was declared in 1896. The estimated area of the colony is 4000 sq. m. The capital is Freetown with (1931) 55,359 inhabitants and the principal exports are palm kernels, kola nuts and palm oil. Freetown has the best harbour in West Africa, and from here there is a railway inland for 227 m., with a branch line 104 m. in length. The colony is administered by a Governor advised by an Executive Council. Pop. 85,163, including 1161 resident Europeans.

Sight Name given to the visual sense, having as its special organ the eye. Under sight is included the perception of light form, and colour. External impressions are received on the retina of the eye, the impulses being conveyed by the optic nerve to the nerve centres of sight in the brain.

Sight In gunnery a mechanism on the gun for enabling one to direct accurately. Formerly a line of metal scored along the top, the sight has now become complex owing to constant improvement. Its efficiency depends on its being graduated to allow for forces acting on a projectile during flight which cause it to drop with accelerating velocity. On naval guns the director sight, invented by Sir P. Scott, is used.

Sigismund Holy Roman Emperor. Born on Feb. 15, 1368, he inherited Brandenburg from his father, the Emperor Charles IV., and succeeded to the Kingdom of Hungary through his wife, Mary. In 1410 he was elected Emperor. He is chiefly remembered in connection with the Council of Constance, called in 1414 by the Pope for the purpose of combating the schisms in the church. John Huss, one of the early reformers was cited to appear. He was convicted of heresy and burned at the stake in spite of the safe-conduct given him by Sigismund. The Emperor died on Dec. 9, 1437.

Signalling Term applied to the system of transmitting signals to a greater or less distance. The signals may be of the nature of flags, lamps, heliographs, smoke, sound signals such as bells and sirens, semaphores, as on railways and warships, and also telegraphy and telephony. Signalling is used for military and naval purposes, and on ships generally as a means of intercommunications, also on coasts as a warning of danger to shipping. The Morse code and its modifications are commonly used in signalling. On railways semaphores are supplemented by night signals of red and green lights. Coloured lights are also used for road traffic signals.

Signet Personal seal of the sovereign formerly used to authenticate documents of a private character, e.g., a royal letter, or as a warrant in the case of public documents, e.g., commissions and letters patent, for the Chancery officials to affix the Privy Seal or the Great Seal. It was also used to authenticate the sign manual (q.v.). Since the Great Seal Act of 1884 there has been no use for the signet.

Signet Writer to the Member of the principal class of solicitors in Scotland. They are so called because they were originally clerks in the office of the king's secretary, their duty being to prepare all warrants or charters for sealing with the king's signet. Writers to the Signet now form a society presided over by the Keeper of the Signet, who is appointed by the Crown.

Sign Manual Antograph signature of the Sovereign which, countersigned by one of the principal Secretaries of State or by the Lords of the Treasury, must be affixed to all writs or warrants which have to pass the Great Seal. In certain cases of executive documents it may take the place of the latter.

Sigurd Hero of the *Völsunga Saga*, and Norse equivalent of the Siegfried (q.v.) of Teutonic legend. In the *Saga*, Sigurd is the son of Sigmund the Völsung, and, like Siegfried, he slays the dragon, Fafnir. He then plunges his troth to the Valkyrie Brunhild, but abandons her for Gudrun, the sister of Gunnar, whom he marries. Brunhild incites Gunnar's brother, Guthorm, to kill Sigurd, and then kills herself on the latter's funeral pyre.

Sikh Member of a great Indian community. The hulk are distributed throughout

the Punjab province and the Punjab states of Patiala, Nabha and Jind Sikhism was founded in the 15th century by a Guru or teacher named Nanak, on the basis of a religious brotherhood to embrace both Hindus and Mohammedans. Under Govind Singh in the 17th century the Sikh community became the Khalsa or "property of God," and began to cherish military ambitions which were fostered later by Ranjit Singh (1780-1839), and led to the formation of a formidable army. The death of Ranjit Singh was followed by two Sikh wars with Great Britain and the annexation of the Punjab. In the Mutiny the Sikhs remained loyal, and many fine Sikh units are included in the present Indian Army.

Silchester Village of Hampshire, famous for the remains of the Romano-British town of Calleva Atrabatum, called by the West Saxons, Silcestre. Excavations, begun in 1890, have revealed the existence of walls, 2760 yards in length, enclosing the foundations of a basilica, a forum, a temple, baths, shops and private residences. The remains of an amphitheatre capable of seating 10,000 spectators, and of a church, probably 4th century, said to be the first undisputed Christian edifice in Great Britain have also been found. Numerous objects of interest excavated at Silchester are preserved in the Reading Museum.

Silenus Woodland deity of Greek mythology, the son, according to some stories, of Hermes, according to others of Pan. He was companion of Dionysus and is represented as a little, corpulent old man, always drunk and carrying a skin of wine. Chief of the Sileni or older Satyrs he is sometimes shown propped up by them owing to his own inability to stand upright.

Silesia District of eastern Europe. A province of Prussia from 1742, Silesia was partitioned after the Great War between Prussia, Poland and Czechoslovakia. The greater part, which remains within the German Republic, is divided into Upper and Lower Silesia, which have a combined area of about 14,000 sq m. Upper Silesia is rich in coal and also produces iron and zinc. Agriculture is the staple industry of Lower Silesia. Pop. 4,686,769. Breslau (*q.v.*) is the capital.

Polish Silesia, also a great coal-mining centre, has an area of 1632 sq m and population 1,298,352.

Coal-mining is also the staple industry of the Czechoslovakian province of Silesia, which produces, in addition, lead, iron ore, marble and steel. There are extensive engineering and metallurgical industries. Area 1,708 sq m, population 735,532.

Silhouette Profile or shadow-outline filled in with black or other dark colour. The simplest method of producing it is to cut a profile out of black paper and paste it on a white background. Before the invention of photography silhouette portraits were popular, and some very skilful ones of famous people have been preserved. Silhouettes are now sometimes produced by photographic means. The name is derived from a French Minister of Finance, Etienne de Silhouette (1709-67), who, according to Littré, amused himself in retirement by making shadow pictures.

Silicon Non-metallic element, the symbol of which is Si and the atomic weight 28.3. Amorphous silicon is never found in nature except in combination

with oxygen, but may be separated as a dull brown powder. It was first isolated by Berzelius in 1823. Graphitoid and crystallised silicon are obtained from the amorphous form. Graphitoid silicon unlike the amorphous, resists the action of hydrofluoric acid. The chief compound of silicon is the oxide silica, the purest form of which, occurring naturally, is rock crystal. Silica, which derives its name from the Latin *silex* (flint), and is largely employed in the manufacture of glass, china, and porcelain.

Silk Fabric originally manufactured solely from the filament spun into cocoons by silkworms (*q.v.*). Silk is known to have been made in China many centuries before the Christian era. The first silk weaving factory in Europe was established in the middle of the 6th century, A.D., at Constantinople, whence the manufacture spread to the West. Nearly half the commercial supply of raw silk now comes from Japan, the chief European centres of manufacture being Lyons, Milan, Turin, Zürich, Basel and Crefeld. Since 1863 the manufacture of artificial silk from nitro-cellulose has progressed steadily, and has now become a very important industry.

Silkworm Name given to silk-spinning caterpillars. The most common form is *Bombyx mori*, a native of N. China, about 3 in. long, and of a yellowish-grey colour. It spins a yellow or white cocoon round itself, then turns into a chrysalis, which again turns into an egg-laying moth. From the eggs tiny silkworms emerge which, if fed on mulberry or lettuce leaves, rapidly attain maturity and start spinning in due course.

Silloth Seaport and watering place of Cumberland. It is on the Solway Firth, 22 m. from Carlisle, on the L.N.E. Ry. It is the port for Carlisle, and there are docks for the shipping. Good bathing and golf attract summer visitors.

Silo Pit in which green fodder is stored under pressure to prevent putrefactive fermentation. The process of storing is termed ensilage (*q.v.*).

Siloam Rock-cut pool on the S.E. of Jerusalem. It has a second or lower reservoir connected with it by an aqueduct, and is evidently the pool mentioned in 2 Kings xx, 20 as having been made by Hezekiah (700 B.C.) together with a conduit by which water was brought into the city. See also Nehemiah iii, 15. The conduit was explored by Conder and found to be 1706 ft. long and 2 ft. wide, with a height varying from 1½ to 1½ ft. An interesting Hebrew inscription discovered in 1880 mentions that when the tunnelling parties, working from either end, were 3 cubits apart voices guided them in completing the work.

Silures People inhabiting the area now covered by the Welsh and English counties of Glamorgan, Brecknock, Monmouth, Radnor and Hereford. They were a dark and curly-haired race, probably of non-Aryan origin, and they offered a fierce resistance to the Romans until finally subdued about A.D. 80. Their principal town was the Roman Venta Silurum, now Caerwent, near Chepstow.

Silurian System Geological formation consisting of the rocks lying between the Ordovician system below and the Devonian above. The system is represented in many parts of the world including America, Europe and Australia. In Britain it occurs in North Wales and the

adjoining English counties, in the Lake District and in Scotland. The strata are usually highly folded and consist largely of shales.

Silvanus A god of woods and gardens in Roman mythology. The name is derived from the Latin *silva*, a wood. As pointed out by Frazer in *The Golden Bough*, he was also the god of cattle and was often associated with Diana in dedications.

Silver Metallic element, chemical symbol Ag, atomic weight 107.88, specific gravity 10.57, melting point 1761° F. It is the best known conductor of heat and electricity. The chief sources of supply are U.S.A., Mexico, Ontario and Canada. Extracted from the ores by either amalgamation, solution or smelting methods, silver is the principal basis of coinage in many countries and is very largely used in the manufacture of plate, ornaments and utensils of various kinds (see BIREFRACTILLISM). Compounds of silver are numerous and important. Nitrate of silver when fused forms a caustic used in medicine, and with chloride, bromide and iodide of silver is freely employed in photography, the three being sensitive to light and constituting, chloride and bromide of silver more particularly, the basis of most photographic plates and papers.

Silver Fir Tall evergreen tree (*Abies pectinata*) Growing to a height of 150 ft. or more with a diameter of over 6 ft., it is a native of Central and Southern Europe. It derives its name from patches of white wax on the lower sides of its needles. The cones, which are about 6 in. long and erect and cylindrical the timber strong, but too soft to stand exposure. The tree is the source of Strasbourg turpentine.

Silversmith Worker in silver. The trade was practised in the very earliest times, and there are many references to the silversmith's trade in the Bible and in Homer. The Renaissance period in Western Europe produced many skilful silversmiths, among them the great artist Benvenuto Cellini. In England the quality of silver plate has been guaranteed by assay since 1300, and about 1425 marking with the silversmith's initials was enforced by law. Old silver, with recognisable marks, now fetches very high prices.

Simcoe Lake and town in Ontario, Canada. The lake is situated between Georgian Bay and Lake Ontario and is 30 m long and 18 m broad. In the vicinity war was waged between the Iroquois and Huron Indians, the former nearly exterminating the latter. The town is the capital of Norfolk County and has a population of (1931) 5,226.

Simeon Charles. English divine. Born at Reading, Sept. 24 1759, he was ordained in 1782 and appointed Perpetual Curate of Trinity Church, Cambridge, a position he held until his death. One of the founders of the Church Missionary Society, his preaching was characterised by an impassioned evangelism, and his influence was felt all over England. His conversation circles at Cambridge were famous. He died Nov. 13, 1836.

Simla Town, in the district of the same name, of the Punjab, India. A popular hill station and summer residence of the Viceroy Governor of the Punjab and other high officials. It is situated on a spur of the Himalayas at an average altitude of 7000 ft., and is dominated by Jalko, a peak of 8048 ft. At a lower elevation is a race course. There is a railway connection through Kalka with

Amballa. The distance from Delhi is 170 m. The permanent population is about 15,000, but is nearly doubled in the summer.

Simnel Lambert. English impostor. An Oxford youth, he was the Earl of Lincoln's tool in a Yorkist rebellion against Henry VII. He was born about 1475. Following false rumours that the Earl of Warwick had escaped from the Tower, Simnel was taken to Ireland and persuaded to impersonate Warwick. He gained a large following, and was crowned as Edward VI. Landing in England at Furness in 1487, he marched to Stoke, where Henry defeated him and appointed him a scullion in the royal kitchen. He died in 1535.

Simnel Cake Rich cake, surmounted by almond paste and usually decorated. It is associated with the observance of "Mothering" or "Refreshment" Sunday, the 4th Sunday in Lent.

Simon Sir John Allsebrook. English lawyer and statesman. Born Feb. 28, 1873, in Bath, and educated in Edinburgh and Oxford, he was called to the Bar in 1899 and rose rapidly in the profession. Elected Liberal M.P. for Walthamstow in 1906, he became Solicitor General in 1910, being knighted the same year. He became Attorney-General in 1913, and Home Secretary in 1915, but resigned through his opposition to conscription. He lost his seat in 1918, but was returned for Spen Valley in 1922, which constituency he continues to represent. He was appointed Foreign Secretary in the National Government formed in Nov. 1931. At the reconstruction of the Cabinet in June 1935, he became Home Secretary, a post he retained after the General Election of Nov. 1935.

Sir John Simon has been chairman of several Royal Commissions, the most important being the Indian Statutory Commission, 1927-1930, which issued the comprehensive "Simon Report" embodying recommendations for the future government of India.

Simonides Greek poet. Born in the Island of Ceos in 556 B.C., he went to Athens on the invitation of Hipparchus. When the Persians invaded Greece he wrote elegies, epigrams and dirges to celebrate the battles fought in that struggle. In a competition for an elegy commemorating the heroes of Marathon he defeated Aeschylus. In poetical contests he won no fewer than fifty-six times. His last ten years were spent at the court of Hiero of Syracuse, where he died in 468 B.C.

Simonstown Naval port of South Africa. On the west coast of the Cape of Good Hope, it is 22 m. by rail from Cape Town and situated in Simon's Bay on the eastern side of the Cape Peninsula. The Admiralty docks, opened in 1900, were extended in 1910, and can now accommodate the largest warships. Here are a Government arsenal and important harbour works. European population (1931) 2171.

Simony Crime of buying or selling a presentation to a benefice. Derived from Simon Magus, who thought to purchase the gift of the Holy Spirit with money, it has been contrary to English law since the time of Elizabeth. A clergyman presented to a living by a patron may undertake to resign it at a specified period.

Simoom Name given to the hot desert sandstorms of North Africa and Arabia. The word is derived from the Arabic *samm*, "poisoning." Essentially the same as a

cyclone, a central tract of calm surrounded by swirls of hot air, the entire system moves slowly forward, generally from south to north or from east to west, and often carries with it whirling columns of sand

Simplon Mountain in Switzerland. It is 11,695 ft., and the pass is 6582 ft. from Dromo d'Ossola, in Italy, to Brieg, in Switzerland. It is a military road formed by Napoleon in 1800-05, 42 m long, 25-30 ft. broad. The Simplon railway tunnel leads from Visp on the Swiss side to Isella in the valley of the Po. It was first opened in 1906 and in 1921 the second tunnel was completed.

Simpson Sir James Young Scottish doctor. Born at Bathgate, Linlithgowshire, June 7, 1811, and educated at Edinburgh University, where he graduated in medicine in 1832, he was president of the Royal Medical Society, 1835. He specialised in obstetrics and in 1847 introduced the benefits of chloroform to the world. He published books and papers on obstetrics, anaesthesia, homoeopathy, leprosy, cholera, etc. He was made a baronet in 1866 and died May 6, 1870.

Sims George Robert. English journalist and dramatist. Born in London, Sept. 2, 1847, he entered journalism in 1874 as one of the staff of *Fun* (now defunct). He wrote for *The Referee*, from its birth in 1877, a long series of articles entitled *Mustard and Cress*, using the pseudonym Dagonet. Among his plays are *The Lights of London*, *Harbour Lights*, *Faust Up to Date*, and among his books, *How the Poor Live*, *The Dagonet Ballads* and *My Life* (1917). He died Sept. 4, 1922.

Sin Guilt before God or the gods. Some doctrine of sin and of escaping its penalties forms part of most religions, ancient and modern. It is not defined in the Scriptures, but appears as the element in man which puts him at enmity with God and requires the work of a Redeemer for its atonement.

The Christian Church has always held that sins may be divided into "mortal" and "venial" sins. The seven "mortal" or "deadly" sins are anger, lust, gluttony, sloth, pride, envy and avarice. "Original sin" is the Christian doctrine that all mankind fell with Adam's first sin, but that the whole world was redeemed by the sacrifice of Jesus Christ. Most Christian Churches, notably Roman, Greek and Anglican, believe that the taint is washed away from the individual in baptism.

Sinai Peninsula of Egypt. At the head of the Red Sea, lying between the Gulfs of Suoz and Akaba, it possesses an area of 11,055 sq m, mainly desert. The Mount Sinai of the Bible is generally identified with Jebel Catherine in the south of the Peninsula (8550 ft.), which has two peaks, Mount Horeh and Jebel Musa, or the Mountain of Moses, the latter supposed to be that on which Moses was given the tables of the Law. The Peninsula, which belongs politically to Egypt, is inhabited by Bedawin nomads. In the Great War it was occupied by the Turks against whom Sir A. Murray advanced in 1916 after the construction of pipe and railway lines across the desert. Defeating them in the battles of Romani and Magdhaba, he finally cleared them out of the Peninsula by his victory at Rafa on Jan. 9, 1917.

Sinclair Sir Archibald Henry MacDonald British politician. Born Oct. 22, 1890, he was educated at Eton and Sandhurst

and entered the army in 1910. In 1912 he became a baronet, and he served in the Great War with the Life Guards. M.P. for Caithness and Sutherland since 1922, he is a prominent member of the small group of Liberals in the House of Commons. For a time he acted as chief Whip of the party and in 1931 he joined the National Government as Secretary of State for Scotland, resigning in Sept., 1932.

Sind Province of India in the north of the Bombay presidency. Formerly part of the Mogul empire, it was ruled by local dynasties at the coming of the British. The E. India Company established a factory at Tatta in 1758, but it was not till the 1830's that the British secured a real foothold, annexing the province in 1842.

Primarily agricultural, Sind produces rice, cotton and wheat, and exports, besides these, wool, flour and hides. There are cotton mills, mainly at Hyderabad and famous pottery, leather and carpet industries. Karachi (q.v.) is the capital. The area under cultivation has been vastly increased by the construction of the Lloyd Barrage at Sukkur (q.v.) with its vast irrigation scheme. Area 46,988 sq m. Pop. (1931) 3,885,308.

Singapore Island and seaport of the Straits Settlements. A British possession, with an area of 225 sq m and a population of (1932) 588,172, it is a coal-ling station and one of the chief ports of the east. There are fine docks and some industries, including the world's largest tin-smelting works. The city is modern and up-to-date. The island was formally included in the British Empire in 1824, the city having been founded five years previously by Sir Stamford Raffles (q.v.). Raffles College and Raffles Museum are among its important buildings. In 1923 it was decided to make Singapore a naval base. A floating dock was sent out in 1928. There is a broadcasting station (417 m).

Singer Isaac Merritt. American inventor. Born at Oseygo, N.Y., Oct. 27, 1811, after many years' experimenting, he evolved, in 1851, the first practical single-thread chainstitch sewing machine, much superior to Elias Howe's crude model produced in 1846. He established a factory in Elizabethtown, N.J. and now the Singer Company owns 9 factories in different countries. He retired wealthy, and died in Torquay, July 23, 1875.

Singlestick Method of fencing, being the successor of the old time cudgel play. The weapons used are ash sticks with hilts of basket work which protect the hand, and the exercise is used to aid the practice of light sabre play. The movements are simple, consisting of six cuts only.

Single Tax Economic system by which all revenue is raised by a tax on land. It implies universal free trade, and is based on the assumption that all men are entitled to equal use of the land. As this is impossible in practice, the single tax would be collected by appropriating the economic rent of land and leaving to landowners the value of their own improvements. The theory was developed by Henry George.

Sing Sing State prison of the U.S.A. It was built in 1825 and is situated 30 m from New York, the name is derived from the Sin Sinck Indians. The village of Ossining in Co. Winohester was formerly known as Sing Sing.

Sinking Fund Term meaning a sum of money devoted to

repaying a loan. In Great Britain the first was established in 1786, when a sum of £1,000,000 a year was set aside to reduce the National Debt. Loans raised by local authorities and other bodies are also repaid by means of a sinking fund.

As regards the national debt of Great Britain the principle is now to devote an annual sum for the service of the debt. Part of this goes in interest and the balance is devoted to repayment. Thus the amount devoted to repayment increases as the amount required for interest decreases. The Sinking Fund is used for the purchase of stock in the open market.

Sinn Fein Gaelic words meaning "Our selves alone" adopted by the Irish Nationalist movement at the beginning of the 20th century. Originally it confined itself to the revival of the Irish language and literature, but later it grew into a determination to throw off the British yoke. This culminated in the Easter rebellion of 1916 after which some prominent Sinn Feiners were shot and many others imprisoned. At the election of Dec., 1918, the party was returned with a large majority, and a period of guerrilla warfare and terrorism ensued. See IRISH FREE STATE.

Sinope Turkish town of Asia Minor situated on the Black Sea. It was the most important of all the Greek colonies and after 632 B.C. became the greatest commercial city on the Euxine. It was captured by the Turks in 1470 and was bombarded by the Russians in 1915. It is a large port with considerable trade. Pop. 9260.

Sinus Medical term for any cavity filled with blood or air, in surgery especially a cavity containing pus. The cavities of the nose are liable to infection giving rise to discharges and other disorders often referred to as "sinus trouble." Medical treatment is essential.

Sioux American Indian tribe of the North. Calling themselves Dakotas, they included the Assiniboins and several other tribes.

Sirdar Official title for the commander-in-chief of the Egyptian army. The name is derived from the Hindu Lord Kitchener (q.v.) was a notable holder of the title.

Siren Sea nymphs of classical mythology whose sweet singing lured listeners to their doom. Odysseus circumvented their magic by filling his sailors' ears with wax as they approached the island and binding himself to the mast. Their end was due to Orpheus, whose singing surpassed their own, so that they threw themselves into the sea and were turned into rocks.

Sirhowy District of Monmouthshire. Situated in the coal-mining area, its main industry is ironworking. It is served by the L.M.S. Rly. The river of the same name on which the town stands, is a tributary of the Ebbw.

Sirius Star known as the dog star. The brightest star in the sky its light is more than 30 times as powerful as that of the sun. Its distance from us is nearly nine light years.

Sirocco Hot dry wind from the south. The term is used chiefly on the northern shores of the Mediterranean. It has a disastrous effect on vegetation and can ruin fruit trees when they are in bloom.

Sisterhood Name given to a community of women living under a rule, to be distinguished from enclosed nuns. Their aims are usually charitable and include nursing the sick, teaching, and ministering to the poor. The first sisterhood, known as the Daughters of Charity, was established by S. Vincent de Paul in 1633. Among the most familiar in existence to day are the Sisters of S. John the Baptist, generally known as the Clewer Sisters, and the Wantage Sisterhood in Berkshire.

Sistine Chapel Pope's private chapel in the Vatican. One of the artistic gems of the world it was built by Sixtus IV in 1480, and is decorated with frescoes by Michelangelo and other famous artists. Raphael designed the tapestries, some of which are now in the Victoria and Albert Museum, London. The Sistine Choir—which sings in the Sistine Chapel—is one of the most famous choirs in the world.

Sisyphus In Greek legend, son of Aeolus, and King of Corinth. His life was so wicked that in the lower world he was given the endless task of rolling a great marble block up a hill. As soon as he reached the top it rolled down again and he had to begin once more.

Sittingbourne Urban district and market town of Kent. Situated on Milton Creek, it is 45 m. from London on the S. Ry. and not far from Canterbury. It has brick works and manufactures paper. There is also some shipping, for the Swale, of which Milton Creek is an arm, connects it with the Medway and the Thames. The urban district is Sittingbourne and Milton. Pop. (1931) 20,175.

Siva (or Shiva) One of the chief triad of gods in Hindu mythology. He is symbolical both of death and of reproduction and his worship is a type of phallicism. His representations show him with four hands and three eyes, garlanded with skulls and armed with weapons of destruction. Sometimes he is shown dancing on a prostrate body, but more often in contemplation. Kall is his wife.

Sixth In music, an interval of six notes of the scale. It may be a major sixth, a minor sixth, or an augmented sixth.

Sixtus Name of five popes. The two best known are Sixtus IV and Sixtus V. Sixtus IV, originally Francesco della Rovere, was born in 1414. The son of a fisherman, he entered the Franciscan order, rose to be its general, and gained wide fame as a preacher. He was elected pope in 1471. A warm patron of art, he furthered education and did much for the beautifying of Rome. He built the bridge over the Tiber and a chapel in the Vatican, both called Sistine after him. He died in 1484.

Sixtus V was one of the ablest and most vigorous of all the popes. Born in 1621 his original name was Felice Peretti. Entering the Franciscan order early, he became its Vicar General. He was elected cardinal in 1570 and pope in 1585. His first care was the suppression of lawlessness in the Papal States and in Rome itself. He made many improvements in the city and used every means to extend the power of the Roman Catholic Church over the world. He published new editions of the Septuagint and the Vulgate. He died in 1590.

Sizar Student either of Cambridge or Dublin Universities whose fees are reduced because he holds a sizarship, i.e. is

entitled to certain allowances. In old days this meant an allowance of food and drink, and was called "size," in return for which he performed certain services. The equivalent at Oxford is a servitor.

Size Glininous materials. Many of them are preparations of glue or flour used for glazing the surfaces of paper, plaster, etc. The size used by painters is a glue which contains too much water to become hard. Size is also used to strengthen the threads of textile fabrics, such as linen. To make this, starch, with oil or tallow added, is used, an antiseptic being introduced to prevent mildew. Starches made from sago, tapioca, etc., are sometimes used.

Skagway Seaport of Alaska, the terminus of the railway to the Yukon. A small place, it yet has some importance as the centre for the distribution of supplies to the Klondike. It owed its settlement in 1898 to the discovery of gold there in 1896. Pop. 1000.

Skald Scandinavian or Icelandic musician and poet, the equivalent of the Scottish harp. His rôle was to sing the exploits of national heroes at feasts or assemblies, usually accompanying himself upon the harp.

Skate Food fish (*Raja*) of the class *Elasmobranchii*. One of the cartilaginous fishes, its body is flattened in the dorso-ventral plane, and there is a long tail. The snout is triangular, the mouth and nostrils being on the ventral side. There are several British species, the commonest being *Raja batis*, up to 4 ft. long.

Skating Form of locomotion on ice. Skating may be traced back to the times of the early Norsemen, who used bone-runners on their shoes for crossing ice. Nowadays, skating has become a popular, world-wide sport, both with metal-runners on the shoe, or rollers. Speed-skating and figure-skating championships are held, and these have usually been won by fensmen, who live where ice is plentiful. A great vogue for skating has recently spread over England, popularising such sports as dancing upon ice, and ice-hockey. Figure-skating has become popular among women, the woman world-champion is Miss Sonja Henie, of Norway.

Skeleton Biological term for the hard part of plants and animals supporting the soft tissues. In the lower animals, it is mainly an outer covering, as in insects. In higher animals the bones are covered by the soft tissues, and are formed largely of deposits of calcium phosphate.

Skegby Town of Nottinghamshire, on the L N E Rly., 18 m. from Nottingham and 142 m. from London. It is in the middle of a coal mining district.

Skegness Urban district and watering place on the coast of Lincolnshire. It is served by the L N E Rly. and is 24 m. from Boston. In the Middle Ages there was a flourishing port here, but it was engulfed by the sea in the fifteenth century. There are fine sands. Pop. (1931) 9121.

Skelmersdale Urban district of Lancashire, near Ormskirk and 200 m. from London, on the L M S Rly. It is an industrial centre with coal mining and brick making industries. Pop. (1931) 6177.

Skelton District of Yorkshire, forming part of an urban district known as Skelton and Brotton, served by the L N E

Rly. It is the centre of an ironstone mining district. Pop. (1931) 13,654.

Skerries Seaport of Ireland, in Co. Dublin, 18 m. from Dublin City. Stone is quarried in the neighbourhood, and there is good fishing. Pop. 1800.

The name is also given to a group of small islands off the coast of Dublin.

Skewen District of Glamorganshire. It is situated on Swansea Bay, 193 m. from London, on the G W Rly. There are coal mines in the neighbourhood. The chief industries are the refining of oil and the smelting of copper.

Skiagraph X-ray photograph. The word is derived from two Greek words meaning shadow and write. The modern term for it is radiograph.

Skibbereen Market and seaport town of Co. Cork, Irish Free State. It has some small shipping trade, also fishing and trades in corn and livestock. It is served by the Gt S Rlys. Pop. 3640.

Skiddaw Mountain of Cumberland. It is just outside Keswick and reaches a height of 3054 ft.

Ski-ing Popular winter sport. The word is derived from the Norwegian snow shoes or "ski." This method of travelling is a necessity in snow covered countries, as in polar expeditions. The ski are long strips of wood curved in front and strapped to the foot. Poles with a circular piece of metal at the end to prevent them from sinking into the snow are carried for steering and braking. Racing and jumping competitions are held in Norway, Switzerland and other countries.

Skin Tissue covering the flesh of the body. This has two layers, the top one being the epidermis, known as the cuticle or scarf skin, and the dermis, or true skin. The latter is richly supplied with blood vessels. Besides its protective work, the skin acts as an organ of excretion by means of the sweat glands, and thus helps to regulate the temperature of the body. See PERSPIRATION.

Skin Disease There are various kinds of skin disease to which children, particularly, are subject. Skin trouble is difficult to cure, and a doctor should always be consulted. The sores should be cleansed with olive oil and not washed with ordinary soap, and children must be prevented from scratching them.

Skin Soreness The tender skin of a baby is liable to become sore from the napkin unless very soft muslin is used. Sore places should be smeared with white vaseline or olive oil and not washed. Some babies get rashes and spots from too much acid in the blood caused by excess of sugar in the diet. Treat as for soreness and remedy the cause.

Skinner Dealer or worker in skins. As distinct from a tanner who is concerned only with the hide, a skinner deals with furred skins. The Skinners Company was incorporated in 1327, and has done much in the cause of education. Tonbridge School is one of their foundations.

Skipton Urban district and market town of Yorkshire (W R.). It stands on the Aire, and is served by the L M S Rly. It has cotton and woollen mills, and some trade in corn. There is a 16th century grammar school and the ruins of a Norman castle, partly restored. Pop. (1931) 12,434.

Skittles Game resembling ninepins. It consists in flinging a bowl at

four skittles, set up in a diamond pattern, with the object of knocking them all over. The bowl weighs about 10 lb and is shaped like a cheese. The skittles are also large and heavy. The throw is made from a distance of 21 ft.

Skua Genus of birds (*Stercorarius*) allied to the gulls. Some species follow gulls or other birds and cause them to disgorge food they have swallowed, which the skua then consumes. Two species breed in N Britain: the great skua (rarely) and Richardson's skua. The former is 22 in long, with mottled dark brown plumage, the latter, slightly smaller, is a dusky brown.

Skull The skeleton of the head of the higher animals. In man it consists of the 8 bones of the cranium enclosing the brain, and the 14 bones of the face. The cranial bones are specially developed to protect the brain.

Skunk (*Mephitis*) Genus of small carnivorous animals. They project a malodorous secretion from two glands situated near the tail when attacked or angered. *M. mephitis*, common in Central and N America, is about the size of a domestic cat. The fur is thick and soft and handsomely marked in black and white, the tail being thick and bushy. The pelts are commercially valuable.

Skye Largest island of the Inner Hebrides. It is part of the county of Inverness. Possessing an area of 643 sq m and a population of 14 780, it has only one town, Portree (97). The inhabitants are occupied in farming and fishing. The island is wild and beautiful, the Coillins rising to over 3300 ft. There is steamer communication from Portree with Glasgow, Oban and other ports.

Skye Terrier Sporting dog. In favour as a house dog and pet, it was originally bred in the island of Skye where it was used for hunting. It has a long, silky coat of a silvery blue-grey, and is built with short legs and a long, low body. There are two types: the lop-eared and the prick-eared. The former has straight hair. The prick-eared should have a thicker, rougher coat.

Skylark Passerine bird (*Alauda arvensis*), native of Europe and Asia. It makes its nest of dry grass in a shallow depression on grass land. The plumage is warm brown above with black streakings, yellowish white beneath the chin and breast being buff with darker streaks. The length is 7 in. The lark is noted for its pleasing song uttered on the wing as it bovers high in the air.

Skyscraper Type of building designed with many storeys in order to save ground space in large cities. The idea originated in America and has been adopted with modifications, by other countries. The world's greatest skyscrapers are in New York and Chicago where there are several that are 800 and 900 ft high. The Empire State building in New York is 1248 feet high.

Slade Felix English collector. Born in London in 1790, he was very successful in business and retired with a large fortune. This he devoted to purchasing works of art, and in time his collection of glass pottery manuscripts and engravings became one of the finest in the country. He died March 29 1865.

Slade left money to found professorships of fine arts at the Universities of Oxford, Cambridge and London. The Slade School, a branch of University College, London, also owes its

existence to him. It was opened in 1871 and is one of the chief centres for the teaching of art, having courses in all branches of drawing, painting and sculpture.

Slaithwaite Market town and urban district of Yorkshire. It is 4 m from Huddersfield, on the L M S Rly. A canal also serves the town, which is on the River Colne. The making of woollens is the main industry. Here are baths, the waters of which are suitable for skin complaints. The regional broadcasting station for the North of England is on Slaithwaite Moor. Pop (1931) 5081.

Slander Malignous and untrue statements. It differs from libel in being spoken and not written. A person who is slandered can bring an action for damages, but slander is usually very difficult to prove. The words must have been spoken in the presence of a third party and must have injured the slandered person financially, or in some other way, by sowing his personal reputation, or his reputation as a public official. A woman can bring an action for slander if any one makes a reflection on her chastity.

Slaney River of the Irish Free State. Rising in the mountains of Wicklow, it flows through counties Carlow, and Wexford into the harbour at Wexford, which stands at its mouth. Its tributaries include the Derry, Bann and others. Salmon are found in the river. It is 60 m in length.

Slang Colloquial language. It probably originated in the thieves' jargon of the 14th-15th centuries. Its vitality and expressiveness have brought it into use even among educated people and slang expressions often become standard English through literary use. The first known use of the word is in a work of 1756.

Slate Hard kind of shale rock. Split into thin sheets, it is used mostly for roofing purposes. A piece of slate enclosed in a wooden frame also forms a tablet for writing.

A slate club is one whose members pay weekly contributions into a common fund as an insurance against sickness or unemployment, or to provide a lump sum. The name is derived from the fact that originally these payments were chalked up on a slate. Slate clubs are conducted by tradesmen, clubs and charitable organisations.

Slaughter House Place where cattle are slaughtered for food. Owing to the insanitary nature of many of them, laws have been passed regulating them and, especially in the towns, numbers of them have been closed. Their place has been taken by abattoirs. See ABATTOIR.

Slav Peoples of Eastern Europe. The classification of the group is by language rather than by racial characteristics. It includes such peoples as Russians, Poles, Czechs, Slovaks, Yugoslavs, all of whom speak dialects of the Slavonic sub-family of Indo-European languages. In the pre-Christian era they were mostly nomadic peoples, existing by fishing and hunting, and using primitive weapons in war. They came originally from the country N of the Carpathians. In addition to the Slavs of Europe, America has some 8 000 000 in her population.

Slave River of Canada, connecting Lake Athabaska and the Great Slave Lake. Its length is 306 m., of which 190 are navigable.

The Slave Coast is a portion of the Guinea

Coast in W Africa, bordering the Bight of Benin Its name is derived from the fact that this region was the haunt of the slave traders until the trade was abolished It is divided between Great Britain and France

Slavery Condition of bondage In this condition human creatures are bought and sold and forced to work without payment It has existed from the very earliest times, and still exists in some countries, though most civilised states have abolished it It was abolished in the British Empire in 1833, and in the U S A in 1865

Slaves were frequently prisoners of war Other sources of supply were debtors and felons, or children sold by their parents The negro slaves of the U S A were originally kidnapped from their native country by slavers and sold at a high price In Greece and Rome the slave class was very large and was, on the whole, treated with humanity Slaves could purchase their freedom by a certain term of work or by some special service to their owners, as well as by payment

Sleaford Market town and urban district of Lincolnshire It stands on the little River Sleas, 112 m from London and 21 from Lincoln, and is a junction on the L N E Rly It is the chief town of the division of Kesteven Sleaford is an agricultural centre, with brewing and malting industries There was a castle at one time Pop (1931) 7024

Sledmere Village of Yorkshire (E R) It is 8 m from Driffield, and has a station (Sledmere and Fimber), on the L N E Rly Sledmere Park, long the seat of the Sykes family, is famous for its stud of horses established by Sir Tatton Sykes (1772-1863)

Sleep Period of unconsciousness During this period the body rests and the brain ceases working except in dreams A certain minimum of sleep is essential for the maintenance of life and health, in order that the body tissues may be renewed The amount required varies in individual cases

SLEEPLESSNESS Treatment—A hot bath, or even a hot foot bath, will often induce sleep, and the bed should be warm and comfortable and the room airy Cold feet are a frequent cause of sleeplessness, so a hot bottle should be used Stimulating drinks such as tea, coffee or alcohol should, of course, be avoided, but hot milk, sipped after retiring, has a sedative effect Drugs should never be taken except by the doctor's orders See INSOMNIA

Sleeping Sickness Disease prevalent in tropical Africa Especially frequent in Uganda and the Congo, it is now known to be due to a blood parasite called the trypanosome, and to be carried by the tsetse fly It is characterised by great wasting and weakness, culminating in the lethargy and somnolence which have given the disease its name Recent research has discovered one drug, Bayer 205, which produces good results and a fair percentage of cures, but the disease is at all times a grave one Much depends upon early treatment

Sleepy Sickness Disease of the brain (*Encephalitis lethargica*) accompanied by marked physical and mental inactivity The causative virus is unknown It occurred on the continent of Europe in 1916-1917, and in England in 1918, and at times since, with fatal results in many cases In the early stages mild attacks may

bear some resemblance to influenza. Lethargy and coma are subsequent developments, while dementia may be exhibited in acute attacks Attacks may recur after a considerable time At present no specific remedy is known

Slesvig District of S Denmark, called Schleswig by the Germans With the neighbouring Duchy of Holstein it was taken by Prussia and Austria after a short war in 1864, with the King of Denmark, Frederick VII Two years later, in 1866, there was a war between Austria and Prussia and the duchies were made a province of Prussia as Schleswig-Holstein The province covered 5800 sq m, and remained in the German Empire until 1919, when, after a plebiscite, the northern part was returned to Denmark This area covers 1500 sq m The little town of Schleswig, which was the capital of the province, is in the small part of Schleswig which remained German

Slieve Bloom Range of hills between the counties of Offaly and Leitrim, Irish Free State The highest point is 1733 ft

Slieve Donard Mountain of County Down, Northern Ireland It has an altitude of 2796 ft., and is the highest point in the Mourne Range

Sligo Seaport and market town of Co. Sligo, Irish Free State, it is also the county town It stands where the River Garraigue falls into Sligo Bay, 134 m from Dublin, on the Gt S Rlys It has a good harbour, from which a large supply of produce is exported to Liverpool, Glasgow and elsewhere Other industries are flour milling and fishing Pop (1926) 11,437

Sligo County of the Irish Free State In the west of the country, it has a coastline on the Atlantic Ocean where are Sligo and other bays The interior is hilly and the soil poor It contains the rivers Moy, Owenmore, Esky and others In the county are Loughs Arrow and Gill Sligo is the county town, other places of importance being Tobercurry, Ballymote and Collooney Its area is 707 sq m and it includes Coney, Inchmurray and other islands The chief industries are cattle rearing, potato growing and fishing. The county is served by the G S Rlys Pop. 71,388

The title of Marquess of Sligo has been held by the family of Browne since 1800 The marquess is also Earl of Clanricarde and Earl of Altamount, a title given to John Browne in 1771 His eldest son is called the Earl of Altamount.

Sloane Sir Hans Irish physician, naturalist, collector He was born in Ireland on April 16, 1660, and studied medicine in London, subsequently travelling and collecting plants, books, and miscellaneous curiosities He occupied the position of physician to Christ's Hospital, President of the Royal College of Physicians, President of the Royal Society and other important posts, and was made a baronet in 1716 His memory is kept alive by his marvellous collection which, bought by the nation after his death for £20,000, proved the beginning of the British Museum. His name is perpetuated in Sloane Square and Sloane Street. He died on Jan 11, 1753

Sloe Another name of the blackthorn, *Prunus spinosa*, and its fruit. The fruit resembles a miniature plum and when ripe is a rich black with a silvery bloom giving it a purplish appearance It is harsh and acid to the palate, and unsuitable for culinary uses.

It is still used, however, in the preparation of sloe gin

Sloop Fore-and aft rigged, one-masted vessel Carrying a jib, fore staysail, mainsail and gaff topsail, in the navy a sloop is a small, light vessel used for special duty, e.g., surveying

Sloth Arboreal mammals of S America, of the family *Felidae*. There are two species, *Bradypus* and *Choloepus*, the former with three toes and the latter with two both found in the forest regions, where they feed on leaves fruit and young shoots. The limbs have hook like toes with long curved claws, adapted to the animal's habit of hanging inverted from branches. The coarse long hair is covered with algae which impart to it a greenish hue

Slough Urban district and market town of Buckinghamshire Situated 2 m from Windsor, and 18½ from London on the G W Ry., it is a residential district, but has numerous industries the principal one being engineering Pop (1931) 33,530

Slovak People of Slav race found chiefly in Czechoslovakia. Their number about 2,500,000 One of the provinces of Czechoslovakia is called Slovakia. Before the foundation of the new republic in 1919 the Slovaks were under Hungarian rule See CZECHOSLOVAKIA

Slovene People of Slav origin found in Yugoslavia. Their number something over 1,000,000 and are chiefly Roman Catholics After having been in the empire of Austria Hungary they united with others and formed Yugoslavia, which is properly the kingdom of the Serbs, Croats and Slovenes See YUGOSLAVIA

Slow-worm (*Anguis fragilis*) Small legless lizard, also known, from its tiny eyes, as the blind worm It is brownish black in colour and is common in Britain

Slug Snail like land mollusc Usually without a visible shell in some slugs there is a small internal shell, and in one carnivorous species the tall carries a tiny shell Many slugs feed on lichens and fungi During the winter they rest under stones or in the ground

Sluys Battle of Naval battle It was fought between England and France on June 24, 1340, at the mouth of the river Sluys in the Netherlands, after the French had done serious damage in S E England Edward III., with a fleet of some 250 sail attacked the French fleet, numbered about 190 sail The fight resulted in a crushing defeat for the French fleet, of which only 24 ships were able to escape

Small Arms Term used to denote such weapons of war as can be used and transported by a single man. It is applied nowadays to rifles, revolvers, and other light portable firearms as distinct from heavy artillery, and also to swords, lances, bayonets, and other thrusting, cutting or stabbing weapons and even to machine guns as using small arm ammunition

Small Holding Piece of land used for agricultural purposes By English law a small holding is defined as a plot not more than 50 acres in extent and rented and cultivated by an agricultural worker It is thus midway in size between a farm and an allotment. County councils have power to acquire land for small holdings In 1932 there were 390,469 small holdings in England and in

1931 there were 75,850 in Scotland See ALLOTMENT

Smallpox Highly contagious disease It is characterised by fever and the appearance of small spots leaving scars in the form of pits Native races are far more susceptible to it than are Europeans The symptoms include chill, headache, and back ache The spots appear about the fourth day There are several varieties of the disease, such as confluent smallpox, in which the symptoms are very severe, the spots appearing in continuous patches, and haemorrhagic smallpox, in which bleeding into the pustules occurs

Smartweed (*Polygonum hydropiper*) Annual herb Belonging to the order *Polygonaceae*, also known as water pepper, the plant contains highly acid juices and is employed in medicine as a diuretic It is found in the north temperate hemisphere The flower sprays are a rosy green in colour

Smell Quality possessed by many substances that affects the olfactory nerves of animals The sense organs of smell are located in the mucous membrane of the nose, over part of the nasal septum and upper turbinal bone and consist of special nerve cells, which by means of the olfactory nerves, convey the stimulus to the olfactory lobe of the brain In the lower animals and man in a savage state the sense of smell is more acute than in civilised mankind

Smelt (*Osmerus*) Genus of small sea fish Belonging to the salmon family, the best known species, and the only one found in European waters, is the common smelt (*O. eperlanus*), which is abundant in the seas and brackish waters of Britain Silvery grey in colour, with a greenish back, it has a delicate flavour

Smelting Process by which metals are extracted from their ore This is done by fusion in special furnaces Smelting is carried out by the aid of some reducing agent such as carbon or carbon monoxide, but the process varies in character according to the metal and the nature of the ore

Smethwick County borough of Staffordshire It is in the Birmingham area and is 115 m from London on the LMS and G W Ry's There are engine works, and other industries Pop (1931) 84,354

Smiles Samuel Scottish author and biographer Born on Dec 23, 1812, he graduated in medicine at Edinburgh University at the age of twenty Practising first in his native town, Haddington, and then in Leeds, he later abandoned medicine for literature his first post being the editorship of the *Leeds Times* He wrote biographies of George Stephenson and many others but was best known as a writer of a series of books on character building, the first of which, *Self Help* had an enormous circulation It was followed by *Character and Thrift* He died on April 16, 1904

Smilie Robert Labour leader Born on March 17 1859, in Belfast of Scottish parentage, he began working at eleven in a factory, later in a Clydesdale shipyard and subsequently in Lanarkshire coal mines President of the Scottish Miners' Federation from 1921, M P for Morpeth 1923 1929, he has since retired from public life He was the leader in the great coal strike of 1912. He is the author of *My Life for Labour*

Smirke Sir Robert. English architect Born in London in 1780, he be

came an R.A. in 1811, and was knighted in 1831. Many important buildings in London are of his creation, such as the British Museum, the Royal Mint, the Royal College of Physicians, the Carlton Club, and Covent Garden Theatre. He restored York Minster after the fire in 1829. He died at Cheltenham, April 18, 1867.

Smith Adam British economist. Born at Kirkcaldy, June 5, 1723, he was educated at Glasgow and Balliol College, Oxford. A friend of David Hume, he became Professor of Moral Philosophy at Glasgow in 1751 and published his *Theory of the Moral Sentiments* in 1759. Turning to economics, he published in 1776 *The Wealth of Nations*, which, as the first scientific exposition of the principles of political economy, had a far-reaching influence, and has been translated into many languages. Running counter to the prevailing economic theory, it postulated freedom of trade and circulation of gold as the bases of national prosperity, and influenced Pitt and subsequent English statesmen in their policy of modifying tariffs and making commercial treaties between England and other nations. He died July 17, 1790.

Smith Alfred Emanuel American politician. Born in New York, Dec. 30, 1873, of Irish parentage, he entered politics in 1895. Elected to the N.Y. State Assembly, as a Democrat, in 1903, he became Speaker in 1913, Sheriff of New York in 1915, and in 1918 he was elected Governor of N.Y. State, an office he held four times. In 1928 he secured the Democratic nomination for the Presidency, but was defeated by the largest majority ever recorded in a Presidential election.

Smith Sir George Adam Scottish theologian and divine. Born in Calcutta, Oct. 19, 1856, he was educated in Edinburgh, Tübingen and Leipzig, and became a minister of the Free Church of Scotland in 1880. He travelled widely in the Near East and in America, and lectured at the universities of Johns Hopkins, Yale, Chicago, and Berkeley. He was elected Moderator of the General Assembly of the United Free Church of Scotland for 1916-17. From 1909 to 1935 he was Principal and Vice-Chancellor of Aberdeen University, receiving the honorary degree of D.D. in 1931. He has written many books on Old Testament exegesis and other religious subjects.

Smith John British settler. Born in Lincolnshire, 1579, of good parentage, he led a most adventurous life as one of the early settlers of Virginia. He co-operated with a number of leading Englishmen, incorporated as the London Company, in the establishment of a settlement in Jamestown. His most famous adventure was his rescue from death by Pocahontas, a girl of about 13, and his subsequent adoption by the tribe. He died in June, 1631.

Smith Sydney English journalist and divine. Born on June 3, 1771, he was educated at Winchester and Oxford, and ordained in 1794. He was engaged in clerical work in Edinburgh, 1798-1803. In 1802, in conjunction with three others he founded the *Edinburgh Review*, which continued until 1930. For 20 years he was Vicar of Foston, Yorks., and in 1831 he was appointed Canon of St. Paul's Cathedral. In addition to his contributions to the *Edinburgh Review* he wrote many articles, both serious and humorous. He was famous for his wit and reforming zeal. He died on Feb. 22, 1845.

Smith William Henry English politician and newsgent. Born in London on June 24, 1825, he was the son of W. H. Smith, founder of the well-known distributing firm, in which he became a partner, and which, under his guidance, became the largest British agency for the distribution of newspapers and magazines. He was M.P. for Westminster 1868, Secretary to the Treasury 1874, First Lord of the Admiralty 1877, and under Lord Salisbury in 1886, First Lord of the Treasury. He died on Oct. 6, 1891. A peerage in her own right was conferred on his widow, with the title of Viscountess Hambledon.

Smith Sir William Sidney British sailor. He was born July 21, 1764. Entering the navy at eleven he was captain at 18. He was knighted for his services to Sweden in her war against Russia, 1790-92. In 1799, after capturing the French ships, he compelled Napoleon Bonaparte to raise the siege of Acre (Northern Palestine), and subsequently served in Egypt, Sicily, Naples, etc. He was made an admiral in 1821. He died May 26, 1840.

Smith-Dorrien Sir Horace Lockwood British general. Born May 26, 1858, he entered the army in 1876, and served in Egypt, the Sudan, S. Africa and India. In Aug., 1914, he was in charge of the 2nd Army Corps, bearing the brunt of the enemy's attack at Mons. Later he commanded his corps on the Marne and on the Aisne, and in Flanders. In April, 1915, he was in charge of the Home Defence armies. From 1918-23 he was commander-in-chief at Gibraltar. He died Aug. 12, 1930.

Smithfield District in London. South of Farringdon Street Station. It is famous for its meat and other markets. The site has a varied history. Originally it was used for tournaments and fairs, and later for executions and as a place for burning heretics. The Smithfield Club dates from 1798. The famous Smithfield fat stock show was held at Smithfield from 1799 until 1862, when the venue was changed to the Agricultural Hall, Islington.

Smithsonian Institution American scientific institution. Founded in Washington, D.C., under the will of James Macie Smithson (1765-1829), it was established by Act of Congress in 1846. The Smithsonian has an increasingly wide range of scientific activities to its credit. These include the buildings and research work of the Weather Bureau, the National Museum, the Bureau of Ethnology, the National Zoological Park, the Langley Aerodynamical Laboratory, and the Aerophysical Laboratory. Funds have been added to the original bequest.

Smoke Volatile matter formed by the imperfect combustion of wood, coal or other fuels, and consisting largely of particles of carbon and hydrocarbons along with various gaseous products. Bituminous coals, having a high percentage of volatile matter, are productive of considerable smoke when burnt in ordinary fire grates, but the use of proper stoves and furnaces, especially with steam coals and anthracite as fuel, practically eliminates smoke. The need for the abatement of smoke has brought about legislation in the form of regulations under the Public Health Act, 1875, and a special Act relating to London in particular.

Smollett George Tobias British author. Born in 1721, he was educated as a doctor, but being unsuccessful in practice,

he embarked upon a literary career by which he made himself famous. His writings were many and varied, the most important being *Roderick Random* (in which he describes some of his adventures as a ship's surgeon), *The Adventures of Peregrine Pickle*, *The Expedition of Humphrey Clinker*, and *Matthew Bramble*. He died on Sept. 17, 1771.

Smuggling Breach of the revenue laws. Whether by importing or exporting prohibited goods, or by evading customs duties, the practice flourishes chiefly where high duties make it worth while to run risks. Among the commodities smuggled, brandy, wines, tobacco, and tea have figured prominently. In former times the coasts round the coasts of Devon and Cornwall were infested by smugglers. The Smugglers' Act of 1736 made smuggling a felony, and the practice was further dealt with under the Customs Consolidation Act of 1876, and subsequent Acts. The reduction of duties and the improvement of communications have been powerful contributory causes to the diminution of smuggling.

Smut Disease of corn. It affects other cereals and various herbs and grasses. It is also the name of the fungi that cause it. The fungi which produces this condition comprise the genus *Ustilago*. The disease appears in the form of myriads of minute brown spores which have the appearance of soot. Smut is highly infectious, and calls for drastic remedies such as steeping in chemical solutions.

Smuts Jan Christiaan S. African statesman. Born May 24, 1870, in Cape Colony, after a brilliant career at Cambridge he practised at the bar in Cape Town and Johannesburg and during the Boer War had supreme command of the Boer forces in Cape Colony. He took a prominent part in promoting the union of the S. African colonies, which was culminated in 1910. He commanded in E. Africa in the Great War and visited London in March, 1917, being given a seat in the War Cabinet. His memorandum on the League of Nations, drawn up after the Armistice, became in substance the Covenant of the League. He was Prime Minister of the Union of S. Africa, 1919-1924, Rhodes Memorial Lecturer at Oxford, 1929-30 and president of the British Association in 1931. In 1933 he became Deputy Prime Minister and Minister of Justice in a Coalition Government. A keen nationalist and a profound philosopher, he is the author of an important philosophical work, *Holism and Evolution*.

Smyrna (or Izmir) City of Turkey. Situated on the Gulf of Smyrna, on the W coast of Asia Minor. It is a very important commercial centre. Figs, tobacco and raisins are exported. Smyrna was one of the Seven Churches of Asia. It was captured by the Turks in 1424. As a result of the Great War the city was administered by Greece for some time but in 1922 the Turks drove the Greeks out. Pop. 153,845.

Smyth Dame Ethel Mary. Foremost English woman composer. Born April 23, 1858, she received her musical education chiefly in Berlin and Leipzig and is a Mus. Doc. of Durham and Oxford. She has written many orchestral works and operas, which have been heard both in England and abroad. Her chief compositions are the *Mass in D*, *The Wreckers*, *The Boatman's Mate*, *Entente Cordiale*. She was a militant suffragette. She was made D.B.E. in 1922.

Snaefell Mountain in the Isle of Man. It is 5 m. S.W. of Ramsay, and

is 2034 ft. above sea level, being the highest point in the island. It commands extensive views.

Snail Various gastropods. They have an external shell. Some live in fresh or salt water, others on land. One of the best known sea snails is the periwinkle. The land snail is known specifically as the edible snail (*Helix pomatia*), and is widely eaten on the Continent. Although some of the land snails cause damage in gardens, most of them feed on fungi and mosses. Like slugs, snails are most active at and after dusk.

Snake Limbless reptile. With a long cylindrical body furnished with overlapping scales, it belongs to the order *Squamata*. Sea snakes are clad entirely with scales, whereas land snakes have broad plates on the ribs. Snakes slough their skins from time to time, the transparent fixed eye covers being shed with the skin. The poison is secreted in a modified saliva gland. Snakes are very widely distributed. The only poisonous kind in Britain is the adder. A snake bite, though very painful, and accompanied by distressing symptoms, is rarely fatal to man. Snakes charming, still common in India and Egypt, does not depend on occult powers, but on skill in handling the reptiles.

Snake-root Plants used as an antidote for snake bite. The term is specially applied to the mongoose plant (*Ophiorthiza mungos*) of the E. Indies. Others include Virginia snake root (*Aristolochia serpentaria*), butter snake root (*Liatris spicata*) and *Eryngium aquaticum*, and white snake-root (*Eupatorium altissimum*).

Snake Wood Ornamental wood. Obtained from the W. Indies, it consists of the heart wood of the bread nut tree in Jamaica, and of an allied plant in Trinidad. The wood is figured and deep brown in colour, and is valuable for panelling, inlaying and veneering.

Snapsdragon (*Antirrhinum majus*). Of the natural order *Scrophulariaceae*, the bag shaped flower can be made to open by squeezing side ways. Snapsdragons are increasingly popular garden plants, and can be obtained in a variety of striking colours. They range from large plants to dwarf kinds. One species, *A. crinum*, is found wild in Britain.

Snaresbrook District of Essex. On the edge of Epping Forest, it was once a separate hamlet but is now part of the urban district of Wanstead. It is served by a station (Snaresbrook and Wanstead) on the L.N.E. and L.M.S. Ryds.

Sneezewort Perennial herb (*Achillea ptarmica*). Belonging to the natural order *Compositae*, it is found in Europe and Asia Minor and also in Siberia. The plant has a strong pungent smell. The root stock is long and creeping and when dried and powdered it may be used as a substitute for snuff.

Snell Hannah. Known as the "female soldier" she was born at Worcester, April 23, 1723, the daughter of a hosier. She married a wastrel who deserted her, and in order to find him she disguised herself and enlisted in the Duke of Gulse's army. She deserted and being shipped on board the *Scallier*, she took part in the siege of Pondicherry, and served before the mast in other vessels. Her adventures published in 1750 were widely read. She died Feb. 8, 1792.

Snipe Wading bird (*Capella gallinago*) Allied to the plover, it is a marsh frequenting, long-beaked bird. The best known as the British snipe, the common snipe (*G. coelestis*), is about ten inches long, and is mottled brown and black. The other British species are the jack snipe (*G. gallinula*), which is slightly smaller than the common snipe, and the solitary or great snipe (*G. major*), which reaches one foot in length. Owing to its darting flight the snipe is a very difficult bird to shoot, but affords a very popular sport for the expert.

Snooker Pool Form of billiards. It is played by two or more players, and each plays in the following order, with a different coloured ball: white, red, yellow, green, brown, blue, pink, spot-white, spot-red, spot-yellow, spot green, and spot-brown. Each player in the pool tries to pocket his opponent's ball, and the one who is so "potted" loses a life, which has sometimes a monetary value.

Snow Frozen water-vapour. It is precipitated in soft white flakes. The snow-line is the height above which snow always lies. It varies with latitude and elevation. In the Himalayas the limit of perpetual snow is about 16,000 ft., in Norway it is about 3000 ft., and in Greenland it occurs at sea-level.

For clearing snow from railway lines and roads a snow plough is used. In its simplest form this is a wedge-shaped arrangement of planks. Where the snowfall is very heavy a rotary snow plough is used. For travelling on foot over snow, snowshoes of various forms are used. See SKI-ING.

Snowberry N. American shrub (*Symphoricarpos racemosus*) bearing spikes of delicate rosepink flowers. These are succeeded by large white berries of a smooth waxy appearance.

Snow Bunting Song bird (*Plectrophenax nivalis*) of Northern Europe and Siberia. It visits the North of Britain in the winter. It is believed to breed occasionally in Scotland at very high altitudes. The wings are noticeably pointed, and the hind claws are very long. The bird has black and white plumage, which becomes tinged with a brownish-red in the winter.

Snowden Viscount. British statesman. Philip Snowden was born at Cowling, Yorkshire July 18, 1864, and entered the Civil Service in 1886, retiring in 1893. He joined the Independent Labour Party in 1893, becoming chairman in 1903. He was Labour Member for Blackburn, 1906-18, and for Colne Valley 1922-32. An authority on financial matters, he became Chancellor of the Exchequer in the Labour Ministry of 1924, and again in 1929, winning great popularity for his sturdy defence of British interests at the Hague conference on reparations in that year. In the critical days of the autumn of 1931 he incurred much abuse from the majority of the Labour Party by putting the national interest before that of his party and joining the National Government, in which he was Chancellor of the Exchequer and responsible for the abandonment of the gold standard. Soon after the reconstruction of the Cabinet, Nov. 5, 1931, he was transferred to the House of Lords as Viscount Snowden, becoming Lord Privy Seal. He resigned from the Cabinet in 1932. Most of his life has been spent in the furtherance of Socialism, and he is the author of several works on social subjects. An *Autobiography* appeared in 1934. Lord Snowden

is an effective speaker, an able administrator, and a man of inflexible will.

Snowdon Mountain of Wales. In Caernarvonshire, 10 m. S.E. of the town of Caernarvon. It is divided into five peaks, of which Y Wyddfa, the highest, is 3560 ft. above sea level. Snowdonia, as the surrounding district is called, was a royal forest under Edward I. It contains many lakes, and the passes which mark it off from the encircling hills are famous for their grand scenery. The summit is reached by a railway from Llanberis.

Snowdrop (*Galanthus nivalis*) Perennial herb. Belonging to the natural order *Amaryllidaceae*, it grows wild in Europe and Asia, and, though sometimes found in the wild state in Britain, is probably not native to it. The plant grows from a bulb, has two tapering leaves, and one pendent white flower on a tall stem. It is often seen in the snow, and flourishes in Britain during the early spring.

Snuff Powder prepared from tobacco. Used for inhaling up the nose, it is sometimes made from the residues of ordinary tobacco, but the best snuff is obtained from the central stem of the leaf. It is variously scented and flavoured. The practice of taking snuff, which was very common in England in the 17th and 18th centuries, is far less common now. Artistic skill was lavished on the making and decoration of snuff boxes.

Soane Sir John. English architect. Born at Reading on Sept. 10, 1753, of humble parentage, after early training in an architect's office he gained a Royal Academy travelling scholarship, and spent three years in Italy. On his return home he secured appointments as architect to the Bank of England and St. James's Palace, designed other important buildings, and in 1806 was elected Professor of Architecture at the Royal Academy. He died on Jan. 20, 1837, and bequeathed his house in Lincoln's Inn Fields, containing numerous art treasures, to the nation.

Soap Cleansing compound. Composed of oils and fats with an alkali, it is regarded as the alkali salt of the acids present in animal and vegetable fats. The hard soaps are composed of sodium salts, and soft soaps of potassium compounds. From the spent lyes of soap-boiling, glycerine is obtained, although in the cold process the glycerine is retained in the soap. Soft soap, made with potash, is usually very alkaline, but for toilet purposes hard soaps require to be neutral.

Soapstone Mineral steatite in its massive structureless form. It consists of magnesium silicate and is soft, white or greenish coloured.

Soapwort (*Saponaria officinalis*) Perennial herb. Belonging to the natural order *Caryophyllaceae*, it is also known as fuller's herb. The rootstock is white and creeping, the leaves are lance shaped, and the flowers, which are either lilac or white, grow in fragrant clusters. The name is derived from the fact that the leaves make a lather in water.

Soar River of England. A tributary of the Trent, it rises on the Warwickshire border, and is navigable as far as Leicester. It is 40 m. long.

Sobieski John. King of Poland, known as John III. Born in 1624, he became a soldier, and in 1668 was made commander-in-chief. Utterly unscrupulous, however, he conspired against the king, who was

consequently forced in 1672 to cede the Ukraine to the Turks. Sobieski, however, himself defeated the Turks in five battles and, the king having died in 1673, secured his own election as king in 1674. By 1676 he had recovered two thirds of the Ukraine, and now attempted to establish an absolute monarchy in Poland. He signed a treaty with the Emperor Leopold against the Turks in 1683, in which year he relieved Vienna and freed Hungary from the Turks. His last twelve years were troubled by internal dissension and the ingratitude of his allies. His last campaign in 1690 was a failure. He died June 17, 1696.

Social Contract Idea that society originated in a voluntary association for mutual benefit and protection. Denying a divine or inherent right in kings or governments it implies that rulers rule and laws are made and observed solely by the sanction of the community. Though held by Hobbes, Locke and Rousseau (*Du Contrat Social*) the theory is not supported by history or anthropology.

Socialism Political and economic theory of social reorganization. It aims at the state control of economic activities so that competition shall be replaced by co operation and the opportunities of life and the rewards of labour be apportioned equitably.

Within this general definition of its aims the most varied interpretations are given to the term, these ranging from a somewhat advanced form of liberalism to something very like communism. Its antithesis is individualism which was a powerful force in Victorian liberalism, but to many it stands for an opposition to capitalism. It has had many advocates and exponents among whom Karl Marx, Robert Owen and George Bernard Shaw may be mentioned.

Whatever definition of socialism is accepted, it is certain that in the 19th and 20th centuries it made great advances almost all over the world. This took the form of greater state control over conditions of labour, state provision for old age and sickness, state ownership of public utilities and state interference with unrestricted competition in scores of ways. In Great Britain the movement was inspired by the Fabian Society which preached the inevitability of gradualness. A more academic but hardly less powerful influence was the philosophy of T. H. Green.

In the political sphere socialism became very strong in the 20th century. In Great Britain and Australia, calling itself the Labour Party, it became responsible for the government of the country. It was less powerful in the United States and Canada but attained enormous strength in Germany and France. After the Great War some of the republics that arose were definitely named socialist and in almost all socialist ideas were dominant. Spain in 1931 became a socialist republic and in 1932 Chile adopted a socialist constitution. Of other countries the Irish Free State and Finland have gone far in putting socialist principles into operation. The system in force in Russia is in theory an extreme form of socialism. Political socialism has brought out active opposition which has found its fullest expression in the Fascist movement in Italy and the Nazi organisation of Germany, although on the economic side these are as socialist as their opponents.

Society Islands Archipelago in the South Seas. Belong

ing to France about 600 sq. m. in area, the islands are for the most part of volcanic origin. Vegetation is luxuriant, copra, vanilla, bananas and sugar being grown. Phosphates are plentiful. The principal island is Tahiti. The group was annexed by France in 1880. Pop. 9,720.

Society of Friends Small Christian body. Also known as the Quakers, it was formed in the middle of the 17th century under the leadership of George Fox. It possesses no professional ministry, and, save in America, no set services. At their meetings any one who is moved by the Spirit leads the prayer or preaches.

The Friends do not take the oath in courts of law and they are averse to military service. They are noted for their philanthropy.

In Britain the Society of Friends numbers about 30,000. Its headquarters are Euston Road. Their early meeting place, Jordans, in Buckinghamshire, is still preserved.

Socinus Name of heresiarchs of Italian origin. Lellius Socinus (1525-82), and Faustus Socinus (1539-1604) were uncle and nephew respectively. Their Italian names were Lelio Sozzini and Fausto Sozzini. Lellius had been destined for the law, but was early attracted by theology. His legal mind was unwilling to concede anything unreasonable, or anything incapable of proof, and his teachings approximated closely to modern Unitarianism. Persecuted, he fled to France, England, Holland, Germany and Poland, dying in Zurich. After his death his nephew, after an interval of some years, vigorously resumed the work, undaunted by persecution. A new sect, the Socinians, was the outcome of their combined teachings.

Sociology Science of the development, nature and laws of human society. In the 19th century it became a subject of study, its increased importance being due to the fact that men were living more closely together and their activities were more dependent one upon the other than ever before. Sociology aims at studying the causes and effects of social relations and at drawing from this study some conclusions for the guidance of the legislator. Birth, marriage and death rates, hours of labour, and the use of leisure are a few of the many that fall within its scope. Oxford, London, Birmingham, Bristol, Leeds, Liverpool, St. Andrews, Edinburgh, Glasgow and other universities give courses in social study.

Socrates Greek philosopher. Regarded as one of the wisest men of history, he was born c. 469 B.C. and in early life took part in three military campaigns where he showed entire indifference to every hardship. He devoted his later life to the pursuit of philosophy and gathered around him a number of pupils, the two most famous being Xenophon and Plato. He taught that self-knowledge is more important than speculation about the universe, that truth (or knowledge) and virtue are inextricably connected, and that vice arises from ignorance. Accused, chiefly by the Sophists of corrupting the youth of Athens, he was condemned to death by drinking hemlock in 399 B.C. He forms the central figure of the Dialogues of Plato. Tradition says his wife, Xantippe, was a typical shrew.

Soda Sodium carbonate. This is known also as soda ash, washing soda, or soda crystal. It occurs naturally as deposits

and as brine in certain lakes in California, British Columbia and Kenya Colony, but is manufactured on a large scale from common salt. Baking soda is sodium bicarbonate obtained by the action of carbon dioxide upon the carbonate and is used for baking powders, and as an antacid in medicine

Soda Water Aerated water Prepared by charging ordinary water with carbon dioxide gas under pressure, the liquid, which usually contains little or no soda, is either bottled by special machinery and corked or enclosed in the more convenient form of siphons for use as an effervescent drink

Sodium Metallic alkaline element. Having the symbol Na and atomic weight 23, it is not found in the metallic state, but its compounds are widely distributed in nature, occurring as common salt or sodium chloride in sea water brines and rock salt, as a carbonate in soda lakes as a nitrate in surface incrustations and as a borate in borax deposits

Sodium when isolated from its oxide is a soft silvery white metal lighter than water and with a strong affinity for oxygen. It decomposes water forming the hydroxide or caustic soda and setting free hydrogen which bursts into flame

Sodom Former city of Palestine in the vicinity of the Dead Sea. Sodom and Gomorrah were known, together with Admah, Zebolim and Zoar, as the "cities of the plain". They were proverbial for their wickedness, for which they paid the penalty by being destroyed by "fire and brimstone" (Gen xix). The site of the cities has not been determined, and the exact nature of the catastrophe they suffered is still a matter of speculation

Sodor and Man Name of the Anglian diocese of the Isle of Man. The diocese of Sodor (Norse *Sudr-eyjar*, southern Isles), formed in 1154, was included in the province of Trondhjem, in Norway. It comprised, besides the Isle of Man, several islands W of Scotland. This Norwegian connection came to an end in 1266, but the name Sodor remained. The diocese has its own special convocation, but for most purposes is included in the province of York.

Sofia Capital of Bulgaria. The city lies at the base of the Rhodopa Mts, some 400 m NW of Istanbul (Constantinople), on the trans-European Orient Express route to the Bosphorus. It is the seat of a university and the see of a Greek metropolitan, the cathedral of St. Alexander being a notable building. Sofia is an important trade centre and has a broadcasting station (319 M, 1 kW). It was in the hands of the Turks from 1382 until 1878, when it passed to Russia. Pop (1926) 213,000

Soft Wood Class of woods. Mainly derived from coniferous trees such as the pines, firs, spruce and larch, these woods are lighter in weight and looser in texture than the hard woods such as oak, teak and mahogany, and they are used for building, box making, pit props and wood pulp

Soham Urban district and town of Cambridgeshire, 5 m. S.E. of Ely. It is served by a station on the L.N.E. Ry. The name Soham Mere marks the site of a great sheet of water now drained. St Andrew's church has many interesting features and the grammar school dates from the 17th century

Fruit growing and market gardening are carried on in the district. Pop (1931) 4737.

Soho District in the west end of London. It is bounded by Regent Street, Shaftesbury Avenue, Charing Cross Road and Oxford Street, and includes also part of the Tottenham Court Road area. There are many foreign restaurants and a large foreign colony, and the district is a stronghold of the moving picture industry. St Anne's church is noted for its music

Soho is also a district name in Birmingham. James Watt and Matthew Boulton had their foundry in Soho

Soil Surface layer of mould or earth. Supplying nourishment for the growth of plants, a soil is formed by the weathering of rocks or may result from transport of disintegrated material by rivers or glaciers. The character of the soil depends upon the nature of the rock basis, the agencies of transport, and the character of disintegration. The mineral constituent may be either sand, clay or calcium carbonate, with various carbonates, sulphates, phosphates and nitrates. In addition to these humus or decayed organic matter is present in large or small quantities. Loam is a sandy or clayey soil rich in humus while marl is one that is calcareous

Soissons City of NW France. It is identified with the Noviodunum of the Romans. Seized by the Franks, it was incorporated in the kingdom of Paris in the 7th century. Thomas à Becket spent some time here, and the city was a great monastic centre. Beyond the cathedral there is now little of note in the city which suffered badly in the War. There are iron and copper foundries and manufactures of agricultural implements, rubber goods and glass. Pop (1931) 18,705. In the Great War, Soissons, with Rheims, was the centre of the great German advance of 1918. The Germans took many prisoners and guns and would have stretched their lines further had it not been for the successful intervention of American troops

Sokotra (or Socotra) Island in the Arabian Sea. Situated at the entrance to the Gulf of Aden, it is about 130 m ENE of Cape Guardafui. It consists of high plateau land and low plains, with the Haghier Mts rising to over 4500 ft in the centre. Myrrh and frankincense are grown in the valleys that channel the plateau, and incense is a considerable export. The island is a British protectorate. It has an area of 1382 sq m. Pop 12,000

Solar Cycle Chronological term. It is used to denote a recurrent period of twenty-eight years. During this period the days of the week recur on the same days of the month in any corresponding year

Solarium Establishment for sun bathing. Equipment may also be provided for treatment by artificial sunlight in the winter season. One was opened at Poole in 1932

Solar System Group of planetary bodies which move around the sun. They include the planets and their moons, the asteroids, meteoric swarms and the periodic comets. The planets all circulate around the sun in the same direction in oval orbits and at varying distances, while a comet moves in either direction and has the sun at one focus of an elongated elliptical orbit. All these bodies derive their light and heat-

from the sun except the comets whose light is largely their own

Soldo Obsolete Italian coin. Of the nominal value of a halfpenny, equivalent to the French sou, the name comes from the Latin *solidus*, a Roman coin

Sole (*Solea*) Genus of flat-fish Much valued for food, there are several species The common or Dover sole (*S. vulgaris*) sometimes exceeds 2 ft. in length, but about one foot is the average length. Young soles are known as slips The so-called lemon sole is a kind of dab

Solent Strait in the English Channel Between Hampshire and the Isle of Wight, it forms the W entrance to Southampton Water It stretches from the Needles as far as West Cowes, a distance of about 16 m, with an average width of about 3 m It is the venue of many yacht races

Solicitor In England a name used by a member of the lower branch of the legal profession They are members of the supreme court of justice and their business is to conduct legal business on behalf of their clients They can appear in person in the lower courts, such as those held by magistrates and the county courts, but not in the higher ones, where they must brief or engage, a barrister The fees charged by a solicitor are according to a scale and a solicitor's bill can be taxed in order to see that the charges are not excessive In 1932 an act was passed, dealing with the status of solicitors See TAXATION

Apart from litigation solicitors do a great deal of business for their clients Some of them specialise in a certain branch of the law, ecclesiastical law or conveyancing, for example

To become a solicitor one must serve articles to a solicitor for three or five years pass certain examinations, and pay certain stamp duties and other fees The controlling society is the Law Society in Chancery Lane, London, W.C., which deals with cases of discipline For serious offences the punishment is to be struck off the rolls, which means that the solicitor cannot practise again Most solicitors are in business for themselves, but a number are in the employment of town, county and other councils, and a few are engaged by private firms

Solicitor-General In England and elsewhere a law officer He is usually a member of the House of Commons and of the Government of the day and assists in the conduct of all legal business His superior is the attorney general He receives a salary of £2000 a year and fees and is knighted on appointment. Scotland, Canada and other parts of the Empire possess solicitors general with similar duties

Solid Three-dimensional substance projected in space. One of the three states of matter in which the atoms are aggregated closely together so as to prevent individual free movement, solids also have a definite shape and size, but by the action of heat or other agency may pass over into the liquid state the force of cohesion being partially overcome Solids when deposited from solution or state of fusion may assume the form of crystals having a definite geometrical character, or may be amorphous possessing no definite form

Solihull Market town of Warwickshire It is 6 m. S.E. of Birmingham and 104 m. from London by the G.W. Ry

There is an old grammar school Pop (1931) 11,562

Sollum Port and gulf in the N.W. corner of Egypt. It is about 80 m from the coast town of Mersa Matruh, which is connected by railway with Alexandria Of little value commercially, Sollum is important as a base for controlling the Mohammedan Senusil

Solomon King of Israel A son of David and Bathsheba, he succeeded his father about 974 B.C. and reigned for nearly 40 years His reign was peaceful, due to alliances with Egypt and Tyre, and the most prosperous of any king of Israel, with an extensive foreign commerce An able ruler and a sincere follower of Yahweh, Solomon built the first temple at Jerusalem, though he departed from orthodoxy in establishing heathen shrines for his foreign wives His reputation for wisdom is probably exaggerated by tradition He died about 937 B.C.

The Old Testament book known as the Song of Solomon is now considered a secular poem, falsely attributed to him

Solomon Solomon Joseph British painter Born in London Sept 16, 1860, he studied art in R.A. schools, in Munich and in Paris He was the originator of camouflage during the Great War, when he was Lt Col in the Royal Engineers His chief paintings are "Cassandra," "The Judgment of Paris," "Echo and Narcissus," "The Birth of Love" and portraits of Mrs. Patrick Campbell and Ismet Zangwill He did mural paintings in the Royal Exchange and Houses of Parliament. He died July 27, 1927

Solomon Islands Group of British Islands in the Western Pacific, E. of the Bismarck Archipelago Bougainville, Choiseul, New Georgia and Ysabel are the principal islands Ebony, sandalwood, pearl shell and copra are exported. Earthquakes are frequent, and there are hot springs Formerly shared between Britain and Germany, the whole of the islands became British in 1914 Part are administered by Australia under mandate The area of the archipelago is about 14,800 sq m. Pop 200,000

Solomon's Seal Perennial herb (*Polygonatum multiflorum*) belonging to the natural order Liliaceae. The plant has arching stems and drooping greenish white flowers. It gets its name from the seal-like scars which are left on the rhizomes of last year's stems

Solon Athenian lawgiver Born about 639, he was of ancient royal lineage In 594, at a time of acute economic distress, Solon was made first archon (chief magistrate), and entrusted with the writing of a new constitution and the compilation of a legal code He divided the population into four classes, according to their means, each class having definite duties Tradition says he then left Athens for ten years, to see how the constitution would work travelling in Egypt and Asia Minor He died in 559 B.C. and ranks as one of the "Seven Sages"

Solstice Astronomical term for that point in the ecliptic at which the sun is at its greatest distance from the equator and consequently at the turning point in its apparent path The summer solstice occurs about June 21, when the Tropic of Cancer is reached, and the winter solstice about Dec 21, on reaching the Tropic of Capricorn

Solution In chemistry a form of homogeneous mixture of two or more substances. It may be solid, liquid or gaseous. Liquid solutions are the best known, and the degree of solubility of liquids in other liquids is either limited or unlimited, thus alcohol and water form a solution in any proportion, but ether has only a limited solubility in water. Gases also dissolve in liquids following definite laws, and solid solutions are formed by the solution of solids or gases in other solids.

Solway Firth Inlet of the Irish Sea, between England and Scotland. The Scottish counties bordering on the Firth are Kirkcudbrightshire and Dumfriesshire, and the English coast is in Cumberland. The Firth is about 40 m in length, and has a greatest width of 22 m. Scottish rivers flowing into it include the Annan, Nith and Dee, and on the English shore it receives the waters of the Esk, Derwent, Eden and Ellen. There is a tidal bore.

Solyman (or Suleiman) Turkish sultan, known as "the Magnificent." Born in 1496 he began his reign by making extensive reforms which earned him in Turkey the name of "the Lawgiver." Invading Hungary, he took Belgrade in 1521. In 1523 he took Rhodes from the Knights of St. John, and in 1526 crushingly defeated the Hungarians at Mohacs. Armenia and the cities of Tabriz and Bagdad were taken from Persia in 1534, in 1537 he conquered Croatia and in 1541 he imposed an annual tribute on Austria. In 1560 he defeated a combined Christian navy at Djerbeh, but was himself repulsed from Malta in 1565. Perhaps the greatest of the sultans, he died Sept 5, 1566.

Somaliland Region of E Africa. It consists of three adjoining districts, British Somaliland, French Somaliland and Italian Somaliland, of which the last stretches along the Indian Ocean from the horn of Africa down to Kenya. The area of British Somaliland is 68,000 sq m and the population, 344,000. French Somaliland covers 8880 sq m, with a population of (1931) 18,965, and Italian Somaliland is some 15,754 sq m in area, and its population is 121,776. British Somaliland is administered by the Colonial Office. Hides, skins, cattle, salt, coffee, gum, resins and ivory are exported.

Somersby Village of Lincolnshire. It is 7 m from Horncastle and is chiefly known as the birthplace of Alfred Tennyson. There is a memorial to him in the parish church. The churchyard has an old cross.

Somerset S W county of England. It lies to the N of Devon and Dorset, with a coastline along the Bristol Channel and the Severn Estuary. It consists broadly of a wide plain, bordered by two hilly areas, including the Mendips and the Quantocks. Dunkery Beacon on Exmoor rises to 707 ft.

The Vale of Taunton is very fertile. Crops include wheat, barley and cider apples, and cattle and sheep are raised. Cheddar cheese is extensively produced. The county is served by the G W and the S Rlys. Besides Bath (city and parliamentary), there are six parliamentary divisions. The county town is Taunton. The area is 1621 sq m. Pop (1931) 106,319.

Somerset Duke of English title borne by the family of

Sevmour and earlier by that of Beaufort. In 1387 John Beaufort was made Duke of Somerset. Edmund Beaufort, the 2nd duke, was killed in 1455, and a little later, Henry, the 3rd duke, lost the title.

In 1547 the title was given to Edward Seymour, known as the Protector Somerset, but it ceased to exist when he was executed in 1552. The next duke was his descendant, William Seymour, to whom it was given in 1680. Since then it has been held by the Seymours and ranks as the second oldest dukedom in the peerage of England, as precedence counts from 1547. The duke has estates in Somerset and Devon, and his eldest son is called Lord Seymour.

Somerset Duke of Protector of England. Born about 1506. Edward Seymour served in France as soldier and diplomat. In 1536 Henry VIII married Jane, his sister and Seymour became Viscount Beauchamp, being created Earl of Hertford on the birth of Edward VI. On the death of Henry in 1547 Hertford, now Duke of Somerset, was chosen as protector. Failing in his efforts to conciliate the Scots, he defeated them at the Battle of Pinkie (q v) in 1547. In 1549 by the Act of Uniformity he sought to enforce the use of the first Book of Common Prayer. Too mild and tolerant in his methods, however, he disagreed with the council and was sent to the Tower in 1549. Released in 1550, he was again imprisoned in 1551 on an unproven charge of treason, but was condemned on a technical charge and executed, Jan 22, 1552.

Somerset House British Government building between the Victoria Embankment and the Strand. It takes its name from the Protector Somerset, on the site of whose palace it was built. The architect of the main building, dating from 1776, was Sir William Chambers, that of the east wing (housing King's College), Sir Robert Smirke, while the west wing was from the designs of Sir James Penninothorne.

Among the Government offices in Somerset House are those of the commissioners of inland revenue, the registrars of wills and probate, and that of the Registrar-General of births, marriages and deaths for England and Wales.

Somers Town District of London. In the borough of St Pancras, it lies to the N W of the city. The land was owned by the Somers family, one of whom was among the counsel for the Seven Bishops (1688), and ultimately became Lord Chancellor to William III.

Somerville College College for women at Oxford University. It was founded in memory of the scientific writer, Mrs Mary Somerville (1780-1872), who made her name by her *Mechanism of the Heavens*, a translation of Laplace's *Mécanique Céleste*. The building was opened in 1879 as Somerville Hall and after various additions the name was altered to Somerville College.

Somme River of France. It rises near St Quentin, and is 150 m. long. It is used for navigation and is connected with other waterways by canals. Amiens is the largest place on its banks, and it falls into the English Channel near St Valéry. There was much fighting about here in the Great War.

Somme Battles of the Series of engagements on the W front during

the Great War The first battle began with an Allied offensive on July 1st, 1916, on a 25 m front, N and S of the Somme River The British forces in the N part of the line were only able to make a little headway after intense fighting, but the French in the S were more successful, taking 6000 prisoners On July 14 the attack was renewed followed by more severe fighting, which resulted in small advances by the Allies, but it took two months to secure points planned to be captured during the first days of the battle The third stage of the campaign began on Sept 14 (when tanks were used for the first time with devastating effect on the Germans), and it continued with heavy cost to both sides to the end of November when the fighting subsided into trench warfare

In the great German offensive of Spring, 1918 (March 21-28) nearly all the ground gained by the Allies during these battles was lost again, and the Germans reached positions which they had not held since 1911, but they failed to obtain their objective of breaking through the Allied line The final allied advance over the Somme area was carried out during the month of August, 1918

Somnus In Roman mythology, the personification of sleep He was regarded as the son of Night and the twin brother of Death, with whom he dwelt in the darkness of Hades

Sonata Originally signified a piece of a cantata, which was sung The sonata is for one or two instruments only, and consists of a group of movements (often four), separate one from the other but related in key and style Early sonatas were written by Scarlatti and Paradisi, and Bach Haydn, Beethoven, Mozart, Beethoven and Brahms have continued the tradition The idea of sonatas has been reproduced in the modern "symphonic poem"

Song Vocal melody Until the 16th century, the only considerable form of song was the folk-song (*q v*) from which mediaeval minstrels gained their inspiration Madrigals (*q v*) written by trained musicians were widespread in the 16th century solo singing developed when all the parts except one were taken by instruments and the popularity of the lute brought about the invention of songs for a single voice accompanied by a single instrument William Byrd was one of the leading English writers of madrigals, Dowland of songs for the lute

Song writing has occupied the attention of musicians in all countries. Among the great German song writers are Schubert, Mendelssohn, Schumann and Brahms and Gounod is one of the best known among French musicians. In England Purcell in the 17th century and Handel in the 18th century are pre-eminent Among modern English song writers the names of Parry, Stanford, Elgar, Vaughan Williams, Holst, Quilter, Delius and Bax are familiar Cecil Sharpe's work in reviving old folk songs has brought about a renewal of their popularity, and Sir Richard Terry's collection of sea shanties has given these a place in modern singing

Song of Songs Another name for the Old Testament book, Canticles, also known as the Song of Solomon The Hebrew title of the book is "The Song of Songs" which is Solomon's.

Song Thrush British bird, (*Turdus musicus*) also known as the mavis This thrush is familiar to all by its spotted breast of an olive brown colour, and is one of the most melodious of European song birds The nest, in the form of a deep cup, is plastered quite smooth inside Though doing much damage to fruit, the mavis is a great destroyer of snails

Sonnet Form of poem It consists of 14 lines, divided into two parts, eight lines and six lines The first is again divided into two quatrains (four lines), and the second into two tercets (three lines) The rhymes are *abba abba cde cde*

The sonnet originated in the 13th century in Italy, and Petrarch was a great writer of sonnets In the 16th century it was taken up in England but its form was changed somewhat to suit the new language Shakespeare wrote sonnets which consisted of three quatrains and a final couplet The rhymes were *abab cdcd efef gg* Milton wrote sonnets on the Italian model Of later writers the finest writers of sonnets in English are Wordsworth, Keats and Mrs Browning

Soot Finely divided deposit of carbon formed as the result of the incomplete combustion of coal, wood and other carbonaceous substances In addition to carbon particles there are present various hydrocarbons derived from the volatile matter in the fuel Lamp black is a form of soot from the combustion of resins, tars, oils, etc

Sophia Electress of Hanover Born Oct. 14, 1630, Sophia was the youngest child of Elizabeth, the daughter of James I who married Frederick V, Elector Palatine for a time King of Bohemia In 1658 Sophia married Duke Ernest Augustus of Brunswick, who later became Elector of Hanover Their son, George Lewis (George I), succeeded to the throne of England in 1714, soon after the death of his mother She died June 8, 1714

Sophist Name used in Greece for a wise man As a class the sophists became prominent in the 5th century B.C. when they set out to teach wisdom They claimed to prepare their pupils for civil life

Sophister Term applied in some universities to certain senior undergraduates It is often abbreviated to *soph* At Trinity College, Cambridge, an undergraduate in his third year is called a senior soph, and one in his second year a junior soph The word is also used at Trinity College, Dublin

Sophocles Athenian dramatist. He was born about 495 B.C., and showed his talent early in direct competition with Aeschylus who though many years his senior, was later influenced by the younger man He was employed as ambassador, and, in the Samian War of 440, as general in conjunction with Pericles This choice was reputedly owing to the success of the *Antigone*, one of his earliest plays We have only seven (out of over 100)—*Ajax*, *Antigone*, *Electra*, *Oedipus Tyrannus*, *Trachiniae*, *Oedipus Colonus*, *Philoctetes*—the subjects being all drawn from Hellenic legends. The last named was written when he was 87 Three years later in 405 B.C., he died

Soprano or Treble the highest range of the human voice, ranging from the G below the treble staff to A, sometimes even to the F A mezzo soprano is about a

third lower—from A to F. As well as female voices, boy sopranos are very popular for church work while men sopranos, as in the "castiati" of papal choirs, are known.

Sopwith Thomas Octave Murdoch. Born in 1888, he was educated at Cottesmore and the Saeftel Engineering College. In 1910 he won the Baron de Forest Prize of £4000 for a flight from Eastchurch, Kent, to Beaumont, Belgium, covering the 190 m. in 3½ hours, a record for that time. He thereupon founded the Sopwith Aviation Co., Ltd., Kingston-on-Thames. During the World War he designed and built a number of aeroplanes and seaplanes for the British Government. He was made CBE in 1918. In 1934 his yacht *Endeavour* competed unsuccessfully in the race for the America's Cup.

Sorbonne Educational centre in Paris, now part of the university. It was founded in 1252 by Robert de Sorbonne as a house for poor students. It became famed as a centre of learning, especially in theology; the decrees of its professors were taken as final, and by their orders many persons were persecuted for heresy. Early in the 17th century Richelieu erected new buildings for the society, but these have been replaced by a fine group built since 1885. In 1896 the Sorbonne was included in the university of Paris. Its buildings are in the Latin quarter.

Sorel City and river port of Quebec. It stands where the River Richelieu falls into the St. Lawrence, 51 m. from Montreal, and is reached by the C.P. Rly., while another line and also steamers connect it with Montreal and Quebec. There is some shipping and a trade in lumber, for which there are sawmills. Pop. (1931) 10,320.

Sorghum Important genus of grasses. The species, *S. vulgare*, with its many varieties is cultivated as a cereal and forage plant in many parts of the world under the names of Kafir corn, dhurra, Guinea corn and Indian millet.

Sorites In logic a series of syllogisms. In it the predicate of each proposition is the subject of the following one.

Sorrel Name of a genus of plants of the natural order *Polygonaceae*. Several of them will grow in Great Britain, especially the sheep's sorrel and the common sorrel (*Rumex acetosa*). The latter bears greenish red flowers. It is sometimes grown in the garden as its leaves make a pleasant addition to a salad. It is also used for making a soup and a purée.

Sotheby's Short name for the firm of Sotheby, Wilkinson and Hodge, the principal auctioneers of books in England. The firm was founded in 1744, by Samuel Baker in York St., Covent Garden, London, and later passed to his nephew, John Sotheby. Most of the important sales of books are held in its premises in New Bond Street, London, where coins and other objects of art are also sold.

Sou French coin now used for the five centime piece. Anything of little value is called a sou.

Souchez Village of France. It is about 4 m. from Lens and was the scene of fierce fighting during the Great War, especially in May, June and July, 1915, and again during the battle of Loos later in that year. It was destroyed, but has been rebuilt assistance being given by Kensington, which adopted the village.

Soufflé Very light dish made of eggs or other materials such as cheese or chocolate. The essential thing about a soufflé is that it is pulled up, usually by the whites of eggs which are whipped to the other ingredients. If adding and mixing are properly done the dish will rise as soon as the heat penetrates it. Soufflés may be baked or steamed. They can be made of oysters and also of chicken, fish and game. A soufflé must be served immediately.

Soul Immaterial part of man. Pre-Socratic thought made no clear distinction between mind (or soul) and matter. Heraclitus, for instance, conceived of the soul as composed of fire, the element by which he sought to explain all phenomena. It was Plato who first established an immaterial principle as distinct from the sensible world. Christian doctrine emphasises the moral character of personality and its survival after death.

Soult Nicolas Jean De Dieu. French soldier. Born March 29, 1769, he entered the army in 1785, serving first in the ranks. He soon became an officer, and his abilities were so marked that in 1804 he was made a marshal. He held a command at Austerlitz, and took part in other of Napoleon's victories. In 1808 he was sent to Spain where, except for a short period, he remained in command of the French forces until 1813. He won some successes, but in the end he was beaten by Wellington. He was exiled after the defeat of Napoleon at Waterloo, but was allowed to return to France in 1819.

Under Louis Philippe, Soult, who had been Duke of Dalmatia since 1807, was a prominent politician. He was Prime Minister, 1832-34, and again 1839-47, was Minister for War, 1830-34, and 1840-44, and Minister for Foreign Affairs, 1839-40. He attended the coronation of Queen Victoria. He was made Marshal-General of France in 1847, and died Nov. 26, 1851, leaving his *Mémoires*.

Sound Term applied to the sensation upon the organ of hearing caused by the vibrations due to the alternate compression and rarefaction of the air. The vibrations of sound can pass through many solid, liquid and gaseous substances, but not through a vacuum, the speed at which they travel is about 1100 ft. per sec. in air at ordinary temperatures, and considerably greater in liquids and solids.

Upon the wave length of the vibration depends the pitch of the sound, and upon the amplitude or height of the wave whether the sound is soft or loud. Rapidly vibrating waves of short length and slowly vibrating ones of great length do not affect the ear, although the range of hearing varies greatly in different persons.

Sound The Strait between Sweden and Denmark. It leads from the Baltic Sea to the Kattegat and is 30 m. long. Its breadth varies, being in one place only 3 m. Copenhagen stands on the Sound.

Sousa John Philip. American conductor and composer. Born at Washington, D.C., Nov. 6, 1854, he became in 1880 bandmaster of the U.S. Marine Corps band afterwards organising his own concert band and travelling widely. His works consist of military marches, some universally played, light operas, waltzes, songs and symphonies. He died March 6, 1932.

South Africa Self governing dominion of the British Empire. It was created in 1910 and consists of four provinces—Cape of Good Hope, Natal, Transvaal and Orange Free State. It covers 471,917 sq. m. and had in 1931 a European population of 1,827,166. The native population in 1932 was estimated at 8,250,000, chiefly Bantus. The capitals are Capetown and Pretoria. The legislature meets at Capetown, but the executive works from Pretoria.

The union is under a Governor-General representing the king, and a legislature of two houses, senate and house of assembly. The senate consists of 40 members, eight from each of the provinces and eight nominated by the Governor-General. The house of assembly consists of 148 members elected by the votes of all white men and women. There is a ministry responsible to the legislature. The chief political parties in the legislature were the Nationalists and the S. African party. Before 1924 the latter, under J. C. Smuts, held office, but in 1924 they were replaced by the Nationalists under J. B. M. Hertzog. This represented the Dutch element in the population, and laid more stress on complete independence than did the followers of General Smuts. In May, 1933, the Nationalists were again victorious, and in Dec. 1934, the two parties joined forces as the United Party of South Africa.

The Union is a member of the League of Nations. Its law is Roman Dutch, but English law prevails in business matters. There is a permanent defence force, with a citizen force and other auxiliaries. Every male citizen must be trained either with the active citizen force, or in a rifle association. There is a small air force and a small naval force. The coinage is the same as that of Great Britain. The count of 100 lb. is the measure of weight, but both the British and the metric systems are in use. The chief products of the Union are gold and diamonds. Maize and oats are grown and sheep are reared for their wool. The warm climate enables fruit, tobacco, cane sugar and cotton to be raised.

The University of S. Africa was founded in 1918, to replace the University of the Cape of Good Hope. It has constituent colleges at Bloemfontein, Wellington, Grahamstown, Pietermaritzburg and Potchefstroom.

Southall Urban district of Middlesex. It is 12 m. to the W. of London on the G.W. Rly. It includes Norwood. Being on the main line to the W. and also on the Grand Union Canal, Southall has become a great industrial centre. Margarine, jam, gramophones and other articles are made here. At Southall is a bridge built by Brunel, which carries the canal over the railway line, and the road over the canal. Pop. (1931) 38,932.

South America One of the world's great continents. It stretches for about 4500 m. from Cape Gallinas in Colombia to Cape Horn. Its greatest breadth is about 3200 m., and it covers about 7,000,000 sq. m. Its borders are the Atlantic and the Pacific Oceans, its only land frontier being the few miles that connect it with C. America. The equator passes through it, and much of it is in the tropics. The continent is very fertile but much of it is still covered with forests and is unexplored. It has a great mountain range, the Andes and in it are the Amazon and other great rivers.

Great Britain, France and the Netherlands have possessions in S. America where Guiana

is divided between them, but the rest of the continent is covered with republics once under Spanish or Portuguese rule. The largest is Brazil and the next Argentina. The others are Bolivia, Chile, Peru, Colombia, Venezuela, Ecuador, Uruguay and Paraguay.

Southampton County borough and seaport of Hampshire. Situated on Southampton Water, it occupies a tongue of land lying between the estuaries of the Test and the Itchen, and is 80 m. distant from London, on the S. railway. It is the third most important port in the kingdom. The harbour is large and well-equipped, affording ample accommodation for shipping, the docks covering nearly 300 acres. The Norman Bargate is a striking relic of the ancient fortifications, and the old guildhall is interesting. The Hospital of God's House dates from the 12th century. St. Michael's church and Tudor House are of interest. The borough is the seat of a bishop, who is suffragan to the bishop of Winchester. Pop. (1931) 176,025.

Southampton Earl of English title now extinct. The 1st earldom was created in 1537 for Sir William Fitzwilliam, but five years later he died and it became extinct. In 1547 Thomas Wrothesley was made earl, and the title was held by his descendants until the death of the 4th earl in 1697. Henry, the 3rd earl, born Oct. 6, 1573, is the nobleman to whom Shakespeare dedicated *Venus and Adonis* and *Lucrece*. He died when on active service, Nov. 10, 1624. The earls had property around what is now Southampton Row, W.C. The title of Baron Southampton, held by the Fitzroy family, exists. It dates from 1780.

Southampton Water Arm of the English Channel. It is 10 m. long and about 2 m. across, and makes a very fine harbour with the Isle of Wight to protect it from the open sea. The Itchen Test and Hamble flow into it, and at its head is the port of Southampton.

South Australia State of the Commonwealth of Australia, occupying the S. coast between Victoria and W. Australia. Settlement began in 1836. Administration is by a governor, a legislative council of 18 members and an assembly of 46. The climate is excellent and the country principally agricultural and pastoral. Wheat and wool are the chief products, but wine production and fruit, fresh and dried, for which large areas are well suited, sometimes under irrigation, are important and expanding industries. Railways are well developed, connecting with the systems of Victoria and W. Australia and extending into New South Wales. Steamers use the Murray River and there are thousands of miles of roads. Adelaide the capital, is one of several modern towns and there are fine harbours. Area, 380,070 sq. m. Pop. (1931) 582,928.

South Bend City of Indiana, U.S.A. It stands on the St. Joseph River, 86 m. from Chicago and is well served by railways. There are a number of manufacturing and other industries. The buildings include the University of Notre Dame. Pop. (1930) 104,193.

Southborough Urban district of Kent. It is 33 m. from London and 2 from Tunbridge Wells, on the S. Rly. There is a large common. Pop. (1931) 7352.

The title of Baron Southborough was taken in 1917 by Sir Francis John Stephens Hopwood. Born Dec 2, 1860, he held several important posts in the civil service, which he entered in 1885. From 1901-07 he was Permanent Secretary to the Board of Trade, and from 1907 Permanent Under Secretary for the Colonies. From 1912-17 he was an additional Civil Lord of the Admiralty, and in 1917-18 Secretary of the Irish Convention.

Southcott Joanna English religious fanatic. Born at Gittisham in Devonshire in April, 1750, she became a domestic servant. An ardent Methodist, she began to prophesy, and in 1802 she moved to London where she began to seal the elect. 144,000 in number, as stated in the book of *Revelation*. She also stated that she was to become the mother of the second Jesus Christ. She died of brain fever on Dec 27, 1814.

Many of Joanna's prophecies were published, and others were enclosed in a sealed box. Nothing very sensational was found when it was opened in 1927.

Southend-on-Sea County borough and pleasure resort of Essex. It stands on the estuary of the Thames, 36 m from London, and has stations on the LMS and LNE Rlys. It is also reached by steamship services in the summer and by motor coaches. An arterial road connects it with London. The borough includes Prittlewell, Southend proper, Thorpe Bay, Westcliff and Leigh, giving it a sea front of about 5 m. The air is bracing and there are attractions for visitors. The church at Prittlewell is an old building, and near it are the ruins of the priory. A yachting week is held in July. The pier is perhaps the longest in England. Pop (1931) 120,093.

Southernwood (*Artemisia abrotanum*) Perennial garden plant. Of a shrubby nature, it is grown principally for the fragrance of its delicate feathery leaves. Old country names for it are lad's love and old man. It is of a hardy nature and will thrive in any soil.

Southey Robert. English writer. Born at Bristol, Aug 12, 1774, he passed much of his childhood with an aunt, with whom he saw many plays, read much poetry and wrote many verses. Educated at Westminster, Bedford and Oxford, he tried medicine first, but was disgusted with it. Married in 1795, he immediately went to Lisbon, where began his love of Peninsular history and literature. He settled, after many vicissitudes, at Keswick, devoting himself to literature. His *Life of Nelson* is his best-known work. He was made poet laureate in 1813. He died March 21, 1843.

Southgate Borough of Middlesex. It is 7 m from London, its station being New Southgate on the LNE Rly. The name is due to the fact that here was the south gate of Enfield Chase. A Royal Charter was granted to the borough in 1933. Pop (1931) 55,570.

South Georgia Island in the S Atlantic Ocean. It is 800 m to the S E of the Falkland Islands, and belongs, like them, to Great Britain. It covers 1000 sq m, is mountainous and on it is a whaling settlement. It was discovered in 1675, in 1775 Capt James Cook took possession of it. Here Sir Ernest Shackleton was buried in 1922. Pop 1895.

South Island One of the two principal islands of New Zealand. It covers 58,100 sq m., and its chief cities are Christchurch and Dunedin. It contains the Canterbury plains that are famous for their wheat. In it is a mountain range called the Alps.

Southminster Town of Essex. It is 45 m from London, on the LNE Rly. The church of S Leonard is a large building with some curious features.

South Orkney Group of islands in the S Atlantic Ocean. They are 780 m to the S E of the Falkland Islands and like them are a British possession. They cover 800 sq m, the largest being Coronation Island. On Laurie Island the government of Argentina has a meteorological station. The islands are otherwise uninhabited.

Southport County borough, watering place and market town of Lancashire. It stands on the estuary of the Ribble, 18 m from Liverpool, and has stations on the LMS and Cheshire Lines Rlys. The sea has receded a good deal and a marine park with a large lake has been made on the front. Open spaces are Heslith Park and Kew gardens, there is a zoological park and botanical gardens. Southport developed greatly during the 19th century until it became one of the most popular watering places in the country. The borough, created in 1867, was extended in 1912. Pop (1931) 78,927.

Southsea Watering place of Hampshire and part of Portsmouth. It is 73 m from London, and is reached by the S Rly. It has a fine front facing the sea on Spithead. There is some yachting and a lake for model yachts. The castle dates from the 16th century and there is a large common. Southsea lies to the S E of the city proper.

South Sea Bubble Popular name of a speculative scheme which resulted in one of the greatest financial disasters in English history. The South Sea Company was incorporated by Act of Parliament in 1710 and given a monopoly of trade in the Pacific Ocean. Parliament, despite the warnings of Sir Robert Walpole, allowed it to take over the national debt in 1720. The stock of the company appreciated from 128 at the beginning of the year to 1000 in July. Its success led to the flotation of other companies, some of a bogus nature, and a wild orgy of speculation seized the country, followed by the inevitable crash. National credit was to some extent restored by Walpole.

South Shetlands Group of islands in the Antarctic Ocean. They are 500 m to the S of Cape Horn. The chief islands are Deception, Clarence, Elephant and Smith, and they cover 830 sq m. All are mountainous. They are a centre of the seal fisheries, but are otherwise uninhabited except by sea-fowl. The islands, declared a British possession in 1908, are governed from the Falkland Islands.

Southwark Metropolitan borough of London. It is on the south side of the river, just opposite the city, and is known as the Borough of Bermondsey and Lambeth are to the east and west respectively and the borough includes Walworth and the district around the Elephant and Castle. It is reached by London, Southwark and Blackfriars Bridges. The chief building is

the cathedral of S Saviour, the mother church of the diocese of Southwark. It has many interesting features, one being the Harvard Chapel. In the borough are Gny's Hospital and London Bridge Station. Plans for a new town hall have been passed. The grounds of Bethlem Hospital are a public recreation ground.

The industries include printing works and associated industries, and manufactures of various kinds. There is a market for fruit and vegetables and the Hop Exchange is here. The area along the river is the Bankside of Shakespeare's day. Pop (1931) 171,657.

Southwell City of Nottinghamshire. It is 16 m from Nottingham, on the L M S Rly. The cathedral, or minster, is a magnificent building dating from the 12th century. Its nave and chapter house are particularly fine. In 1884 Southwell was made the seat of a bishop whose diocese was the counties of Nottingham and Derby. In 1827 it was divided, and Derby was made the centre of a new see. Bishop's Manor, near the ruins of the palace of the Archbishops of York, is the residence of the Bishop.

South West Africa Mandated territory under the League of Nations. It is bounded on the N by Angola, on the S by the Cape of Good Hope, on the E by Bechuanaland, and on the W by the Atlantic. Cattle, sheep and goats are raised, wheat and tobacco are among the crops grown, and copper and diamonds are mined. The capital is Windhoek. Originally belonging to Germany, it was annexed by South Africa in 1915, and four years later was placed under the mandate of the Union. It was granted a constitution in 1925. It has an area of 322,304 sq m. Pop (1930) 269,233.

Southwick Watering place and urban district of Sussex. It is 4 m from Brighton on the S Rly. The church has a Norman tower. The main industry is catering for visitors. Pop (1931) 6138.

Southwold Borough and seaport of Suffolk. It is at the mouth of the little River Blythe and has a station on the L N E Rly. It is 41 m from Ipswich and 110 from London. St Edmund's Church is a fine old edifice. There is a large common and a good harbour, but as a seaport it is less prosperous than it was in the Middle Ages. The chief industry to day is catering for the visitors but there is some fishing. On May 23, 1672, the Dutch and the English fleets fought a battle in its bay, but without decisive results. Pop (1931) 2753.

Sovereign Word used for a ruler (See SOVEREIGNTY). The British gold coin called a sovereign is the standard unit of currency, though since the Great War it has not been much used. It dates from the time of Henry VIII, but was only made the standard coin in 1817. It is divided into 20 shillings. It weighs 123.27447 grains and is of 22 carat gold with an alloy of copper. In 1933, owing to the high price of gold because the country had gone off the gold standard, sovereigns were sold for 31s 3d each. Half sovereigns were also in general use and coins of two and five sovereigns have been issued on special occasions. See STERLING.

Sovereignty Supreme power or dominion. It is used chiefly in connection with states which are sometimes classified as sovereign and non-sovereign. The

most famous definition of sovereignty is by John Austin in his *Lectures on Jurisprudence*. It is said to exist when "the bulk of the given society are in a habit of obedience or submission to a determinate and common superior," and that superior "is not in a habit of obedience to a determinate human superior." This definition has, however, been criticised by Sir Henry Maine and others who do not think sovereignty can be so precisely defined. The modern view on sovereignty is divided. Theoretically, in western countries at least, it rests with the people, but it is by them delegated to kings, ministers and legislatures, who share it between them in varying proportions. Sovereign states are those which are subject to no external control. The League of Nations cannot be said to exercise sufficient control to impair state sovereignty, but its action and existence are not without a bearing on the conceptions of sovereignty.

Soviet System of government obtaining in Russia. The word is Russian and means "council". The Soviet system of government is based fundamentally on the small soviet in workshop, factory village or town. These basal units themselves elect delegates to similar congresses covering larger areas, the system culminating in the All-Russian Congress of Soviets which delegates its powers to a Central Executive Committee. The supreme executive is the Council of People's Commissaries, drawn from this committee, and its chairman is the titular head of the state.

On this theory government is from below, while executive decrees are transmitted from the central authority downwards, until they reach the executive or chairman of the village Soviet, by whom they are carried out. See RUSSIA.

Sowerby Urban district of Yorkshire (W R). It stands on the Calder, 3 m. from Halifax and at Sowerby Bridge there is a station on the L M S Rly. Woollen and worsted goods are manufactured, and there are engineering and chemical works. Pop (1931) 14,667.

Soya Bean Herb grown for its food value. It belongs to the order *leguminosae*, and is native to Asia. The leaves which grow on erect hairy stems, are divided into three leaflets. It bears small flowers, violet or purple in colour. The beans are in pods.

The bean is grown on a vast scale in Manchuria, from where it is exported. From it an oil is obtained which is much used in the making of margarine and other substances. The seeds are used to prepare a feeding stuff given to cattle especially to dairy cows.

Soyer Alexis Benoit. French cook. He was born in 1809 at Meaux, and worked for a time in Paris, where his cooking soon made him famous. In 1830 he escaped to England, and settled in London where, from 1837 to 1850 he was head cook at the Reform Club. In 1848 he was sent to Dublin to manage the food kitchens and in 1855 to the Crimea to look after the food supplies. He died in London Aug 8, 1858. Soyer wrote books on cookery and some of his dishes are still famous.

Soyland Urban district of Yorkshire. A centre of the woollen industry, it is 4 m. from Halifax. It has also cotton and silk manufactures. Pop (1931) 3057.

Spa Town and health resort of Belgium. It is 21 m from Liège, with which it is connected by railway. It is visited by persons who wish to drink its medicinal waters, which are also bottled for table use. The town has a kursaal and other attraction for visitors, one being the racecourse. In July, 1920, the Supreme Council of the Allies met at Spa.

Spa Word used for a place where there are mineral springs, the waters of which are suitable for various complaints. There are spas all over Europe, and some of them have a very high reputation. England has a number of spas, Bath, Buxton, Harrogate and others, and there is a federation for making known the virtues of their particular waters. The French and German spas, such as Aix-les-Bains, Contrexéville, Homburg and Wiesbaden, are also famous.

Space Concept in physics and philosophy of the property in virtue of which rigid bodies can occupy different positions. Attempts have been made to give it physical reality, as by the assumption of an all-pervading ether, and for local measurements and experiences. Euclid's geometry in three directions at right angles to one another has been sufficient to decide position from any fixed point.

Einstein has shown, however, that this three-dimensional geometry ignores the independent velocity of light and its effect upon measurement when the observers are in relative motion. Time must be added as a fourth dimension, and the resulting space-time continuum involves the idea of a finite yet unbounded universe—a straight line ultimately returning to its starting point.

Spaghetti Cord-like form of Italian wheat-paste, intermediate in size between vermicelli and macaroni, and prepared from the hard wheats which are rich in gluten. Spaghetti along with other kinds of paste is manufactured around Genoa, Italy, and in France with Marseilles as a centre, also in the United States and Canada.

Spahi Word used for soldiers from North Africa in the French army. They are natives of Algeria and Tunis and are cavalry soldiers. Earlier the Spahis were in the service of the sultans of the district. The Spahi regiments have French officers.

Spain Republic of Europe. In the south-west of the continent, it covers 190,500 sq m, and forms the greater part of the Iberian Peninsula. It has a long coastline on the Mediterranean Sea, and one only a little shorter on the bay of Biscay and the Atlantic. Its land frontiers are the Pyrenees, which divide it from France, and an artificial line separating it from Portugal. The republic includes the Canary and Balearic Islands and colonies in Africa, covering 800,000 sq m, the chief of these are Morocco and Guinea. Pop. (1930) 23,560,975.

The country has the Pyrenees in the north and the Sierra Nevada and other ranges in the south. Most of the interior is a great plateau in the midst of which stands the capital, Madrid. It is watered by six great rivers and their tributaries, Guadiana, Tagus, Druro, Minho, Ebro and Guadalquivir. After Madrid the largest cities are Barcelona (the greatest seaport), Valencia, Seville, Malaga, Saragossa, Murcia, Bilbao (the second port), Granada and Cartagena.

Spain is an agricultural rather than an industrial country, although there are valuable

iron, copper, coal and lead mines, the export of which amounts to a considerable sum. Wheat, barley, oats and rye are extensively grown and large areas are covered with vineyards. Oranges, lemons, olives, almonds and other fruits are cultivated. Fishing is an important industry.

Since 1931 Spain has been a democratic republic. The parliament, or cortes, consists of a single chamber, the chamber of deputies, elected by all adults, for four years. The president of the state is elected by the cortes and an equal number of other persons and he holds office for six years. He selects the prime minister and approves the appointment of the other ministers. The people are mainly Roman Catholics, but the church has been disestablished. There is an army raised by compulsory service and a small navy. The country has a system of old age pensions. The unit of currency is the peseta. The metric system of weights and measures is in use. The flag of the republic is red, yellow and purple.

HISTORY There are considerable remains of early man in Spain, but its recorded history only begins with the settlements of the Phoenicians along its coasts. Later the Greeks and the Carthaginians arrived and, having crushed the latter people, the Romans made it part of their empire. For about 200 years, 530 to 730, the Visigoths had a kingdom in Spain, but much more important was the Moorish one that followed it. With its capital at Cordova this covered the south of Spain. In the north, somewhere about 1000, little Christian kingdoms emerged, the chief of them being Castile, Aragon, Leon and Navarre. Now and again two or more were united under the same ruler and the process of union culminated in 1479 when Ferdinand of Aragon married Isabella of Castile. Two great events marked this joint reign. Columbus discovered America and founded there a great Spanish empire, and the kingdom of the Moors was destroyed.

During the 16th century Spain, fed by the wealth of South America, was the greatest country in Europe. Its ruler from 1516 to 1565 was the Emperor Charles V, then came his son, Philip II, under whom it began to decline, although for a time this was hardly evident. In 1580 the king united Portugal with Spain, which meant adding the rich American colonies of that country to his own. In 1700 the last Hapsburg king died and in 1714 after the War of the Spanish Succession, a Bourbon, Philip V, was recognised as king. Although less powerful than formerly, Spain played a considerable part in European politics in the 18th century until dominated by Napoleon, who made his brother Joseph its king.

Early in the 19th century the countries in South America made themselves independent of Spain, and at the end of the century the Cuban and the Philippine Islands were lost after a war with the United States. In 1833 and again in 1868 there was civil war between those who wanted a queen and those who wanted a king. Finally the queen, Isabella, a daughter of Ferdinand VII, secured the throne and her opponents, called Carlists, were defeated. In 1886 Alfonso XIII became king and he reigned until 1931. His reign, especially after the Great War, was marked by considerable unrest, especially in Catalonia where Barcelona was the storm centre. In 1923 a dictatorship was established and this lasted until 1930. An attempt to restore the old order

failed, and in April, 1931, the desire for a republic was so clearly expressed that the king left the country. In June a general election was held to choose a cortes which drew up a constitution and elected a president. Spain in 1934 was the scene of serious strikes and riots, and in 1935 and 1936 attempts were made to set up an independent Republic of Catalonia. The elections of Feb., 1936, were again attended by serious rioting and resulted in a victory for the Left party.

Spalding Urban district and market town of Lincolnshire. It is on the Welland, 14 m. from Boston and 93 from London, on the L.N.E. Rly., and a joint line of the L.M.S. and L.N.E. Spalding is an agricultural centre and has breweries and flour mills. Around is the fenland famed for its bulbs and its potatoes. There is a trade along the river. Pop. (1931) 12,592.

Spandril Term in architecture for the three sided space between the curve or extrados of an arch and the right angle formed by the horizontal line from the springing and the vertical line from the crown of the arch. The space is often filled with various forms of decoration carved in relief.

Spaniel Group of dogs used for retrieving game. There are also diminutive (toy) varieties. Spaniels are characterised by the broad skull with high forehead and large pendulous lobe shaped ears. The long hair is silky, curled in some varieties. The gun dogs include field spaniel, clumber cocker, springers, Sussex and water spaniels. Toy spaniels which have not much in common with working spaniels, include King Charles, Blenheim and Japanese.

Spark Small ignited particle emitted from a burning substance, or in the case of an electric spark the luminous form of a discharge of electricity.

A sparking plug is an electrical device in an internal combustion engine used to ignite the explosive mixture of gases. It consists essentially of a brass plug enclosing electrodes between whose points is a minute air gap. A current passing through the electrodes causes a spark to pass across the air gap so igniting the gases.

Sparrow Common bird (*Passer domesticus*). Really a finch, it is found in most settled parts of the world. About 7 in. long it has the short strong beak of the finch tribe. The male has a black throat and more dusky brown plumage than his mate. There is a tree living species (*Passer montanus*) smaller, more shy and rarer. The head and upper parts are chestnut, wings banded with white, white cheeks with a black spot, greyish white under parts. It is to some extent a migrant.

Sparrow Hawk Bird of prey (*Accipiter*). Of its 20 species the common sparrow hawk (*A. nisus*) is found in Europe and Asia. In England it lives in the woods and is very destructive to game. It varies in size and colour, the female being larger than the male. The plumage of the upper parts is bluish grey in the male and brown in the female. The third toe is much elongated and the wings are short.

Sparta City of ancient Greece also known as Lacedaemon. It stood on the banks of the Eurotas in the Peloponnese and was traditionally, the home of Menelaus (q.v.). The Spartans of history were Dorians

invaders. Under them Sparta became supreme in the Peloponnese, the original inhabitants of the district being enslaved. Sparta was ruled nominally by two kings, but in reality by officials known as ephors and a council of elders. The training of citizens was strictly military, all other considerations being subordinated to the ideal of service to the state.

Sparta played a leading part in the Graeco-Persian Wars but her greatest struggle took place against Athens in the Peloponnesian war (q.v.) in which she was finally victorious. Sparta was now supreme in Greece, but her repressive hegemony gave rise to reprisals, ending in her defeat by Thebes (q.v.), and her gradual decline as a power.

The modern town built on the ancient site, is the capital of the prefecture of Lacedaemon. Pop. (1928) 5,799.

Spartacus Roman soldier. He was born, in Thrace and became a shepherd. Later he was taken by the Romans and trained as a gladiator, but he escaped from Capua and joined a band of discontented and desperate men, chiefly slaves. He soon became their leader and under his direction they started on a career of plunder, in which much of Italy was devastated, and armies sent against them were beaten. In 71 B.C., however, Crassus succeeded in crushing them and their leader was among the killed.

After the Great War the name of Spartacus was taken by the German leader, Karl Liebknecht, and his followers were known as Spartacists. They became very strong and in 1919 set up a workers' republic, but after some fierce fighting they were beaten and the movement collapsed.

Sparteine Colourless oily liquid with a bitter taste. It is an alkaloid and is obtained by extracting the tops of the brown plant with acidulated water and distilling the extract with caustic alkali. Its salts are used to alleviate heart disease.

Speaker President of the British House of Commons and of similar legislative bodies in other parts of the Empire, i.e. the Dominion House of Commons at Ottawa, the House of Representatives in Belfast for Northern Ireland. The President of the House of Representatives at Washington is also called the Speaker. The first Speaker was Sir Thomas Hungerford in 1377 and the name is due to the fact that he and his successors spoke to the king on behalf of the members. The Speaker is elected by the members from among their number at the beginning of each Parliament and is paid a salary of £5000 a year. He is guardian of the privileges of the House and the judge of its rules and orders. He is generally addressed as 'Mr Speaker'. He takes precedence of all other commoners on ceremonial occasions. He is usually made a viscount, and pensioned when he retires.

The tradition has grown up that the Speaker must not vote or express any opinion on controversial questions. Formerly this was not so. The Lord Chancellor, who is the Speaker of the House of Lords, remains a party politician.

Spear One of the oldest weapons used by man. It consists of a shaft and a head which in early times was of flint or other stone or bone. Later it was made of iron and then of steel. The spear was much used by the Greeks in the time of Homer and in the Middle Ages the spearmen were an

important branch of many armies. The Swiss spearmen were famous and there were spearmen at Flodden and other battles.

The weapon was very much used for hunting in England, France and elsewhere. To-day it is used by some primitive peoples for warfare and in certain sports, such as pig sticking and salmon fishing. The Red Indians use it for killing fish. From the spear several weapons have developed. Some, like the lance and spike, are used for fighting at close quarters; others, like the javelin, are thrown. Flint spearheads are very common remains of the palaeolithic age.

Spearmint (*Mentha viridis*) Pore-nial herb of the order *labiales*. It is the common mint widely cultivated in kitchen gardens. The creeping root throws off numerous underground runners. The stems are square and erect, with opposite deep green aromatic leaves. The minute purple flowers are borne in numerous close whorls, forming a spike of bloom. It is extensively used as a flavouring for chewing gum.

Special Constable Man sworn in to assist the police in times of emergency. By law every able-bodied man is bound to serve as a special constable if required. In England special constables were enrolled during the disturbances that took place in 1831 and 1848, and again during the general strike of 1926. During the Great War special constables undertook many of the duties performed by the police and certain others made necessary by the conditions of the time.

Special Reserve Former section of the British Army. It was created in 1907 to take the place of the militia which was then abolished. Each infantry regiment had its special reserve battalion, the men of which were trained for a certain period each year. During the Great War these battalions were used to supply men to the regular battalions in the field. The terms "special reserve" and "extra reserve battalions" were abolished in 1921.

Species Term in biology for a group of organisms, having certain definite characters in common and differing widely from other groups. Within a species are varieties or groups of individuals having small and variable characters, while a number of species resembling each other more or less closely constitute a genus.

Specific Gravity Term expressing the ratio of the density or weight of unit volume of substance to that of water or other standard substance. In the case of gases, air or hydrogen is taken as the standard, and pure water at 4°C for liquids and solids. Specific gravity is determined in several ways: by one method a solid is weighed first in air then in water, the weight in air is divided by the loss of weight in water, the quotient giving the specific gravity.

Specific Heat Ratio of the amount of heat needed to raise the temperature of a unit weight of a substance by 1°C to the amount of heat required to raise one gram of water through 1°C. The specific heat varies with the state and temperature of the substance, for all elementary substances the product of specific heat and atomic weight (the atomic heat) is approximately constant.

Spectator The Series of Essays produced by Addison and Steele, which ran from Mar. 1, 1711, to Dec. 6, 1712.

It was the successor of *The Tatler*. It was a non-political paper, which attempted to bring learning into the everyday life of clubs and homes. It had also a strong moral bias, standing for purity of life, thought and scholarship, in contrast to the life of the times, influenced as it still was by the Restoration.

Spectroheliograph Special form of spectrograph, or spectroscope in which a photographic plate takes the place of the eyepiece. It is used for photographing the sun by monochromatic light, that is, light of a definite colour, corresponding to a certain wave length. By this means a permanent record is made of the distribution on the sun's disc of the element responsible for the particular colour band chosen.

Spectroscope Instrument devised for the study of the characteristics of light which is broken up into a spectrum consisting of the seven colours seen in the rainbow, red at one end, violet at the other. In a spectroscope light passes through a narrow slit, then by means of a lens is formed into a parallel beam which, passing through a glass prism, is resolved into a spectrum. A small viewing telescope is attached for enlargement or photography.

Spectroscopy Study of the spectra of light from various sources and their analysis by means of the spectroscope. Spectroscopy owes its inception to the discovery of dark lines in the solar spectrum by Wollaston and later by Fraunhofer, followed by their interpretation by Kirchhoff in 1859. These absorption lines form an absorption spectrum and indicate the presence of certain elements in a gaseous state. Bright lines also are formed by a gas under low pressure or by the glowing vapour of an element, and such a spectrum is known as an emission spectrum. By this means the constitution of the sun and stars has been ascertained.

Spectrum The continuous, coloured band formed by the passage of white light through a prism, thereby undergoing refraction. The seven colour regions are red, orange, yellow, green, blue, indigo and violet, each differing from each other in wavelength, intensity, etc. Beyond the red end of the spectrum are the infra red rays, and beyond the violet end the ultra-violet rays.

Speech Faculty of uttering articulate sounds or words. It may take the form of a monologue or of conversation. The power of speech comes naturally to all, save a very few, but correct speech, the arrangement of words in their proper order and giving to each its proper pronunciation, is acquired by education. At the public schools the day on which prizes are presented and literary and dramatic exercises given is called the speech day.

Speech House Building in the Forest of Dean. It is 7 m from Lydney near the station called Speech House Road on the G.W. Ry. It was built in 1680 and in it the vnderers of the forest held their courts. It is now an hotel.

Speed Rate of motion. It is the test of motion in contests of various kinds, running, motoring, etc. In running the speed decreases in proportion as the length of the course increases: for instance a man can run 100 yds. at a far higher speed than he can run 3 m. With animals, birds and vehicles

Spilsbury Sir Bernard Henry. English pathologist. Born in 1878, he was educated at Oxford and studied medicine in London. He became a lecturer at St. Bartholomew's Hospital, his subject being pathology, and on this he soon became a leading authority. He is employed by the Home Office to report on cases of poisoning and in all cases of this kind his opinion is regarded as of the highest value. In 1923 he was knighted.

Spilsby Market town of Lincolnshire. It is 18 m from Boston, on the L.N.E. Rly. The parish church dates from the 14th century, and the chief industry is trading in agricultural produce. Sir John Franklin was born here, and the market place has a statue of him.

Spinach Edible herb of the natural order *Chenopodiaceae*. It was introduced into Great Britain in the 16th century and is now a popular table vegetable. It should be thoroughly cleaned and then chopped and boiled. It can be served on toast, as an entree, while spinach and eggs is a favourite dish.

Spindle Tree Tree found in woods and hedges in Great Britain. It bears glassy lance-shaped leaves and clusters of small greenish flowers followed by crimson fruit. It is about 20 ft high and has a smooth, grey bark. The wood, being hard and tough, is used for making skewers and the like. Its botanical name is *Euonymus europaeus*. It belongs to the order *Celastraceae*, and is also found in Europe and Africa.

Spine Most important part of the skeleton of the higher animals, supporting the skull and ribs and enabling the body to be maintained in an erect position. It is composed of a series of bones placed one above, or in front of, the other and called vertebrae. The arches attached to the vertebrae form a continuous canal in which the spinal cord is lodged and protected from injury.

Spinel Mineral composed chiefly of magnesite and alumina, and crystallising in octahedra. There are several kinds of spinel, red, black and green, the two last being known as pleonaste, picotite, gahnite and hercynite. The finest kind of red spinel is the gem known as ruby, found chiefly in Ceylon, Siam and Burma.

Spinnet Musical instrument. It was very popular in the 16th, 17th and 18th centuries and there are some fine examples in existence. It was smaller than the harpsichord, but of the same type. The keys were plucked by means of quills. The smaller ones were placed on the table when in use, but larger ones had legs like a piano. The word in Italian means little thorn.

Spinning Art of twisting fibrous substances into strands of yarn fitted for weaving. Two operations are necessary: (1) Uniform quantities of fibre have to be drawn out continuously and (2) the drawn out material has to be twisted to make it cohere and give it strength and toughness.

The earliest spinning apparatus was the distaff and spindle which were largely superseded by the spinning wheel still in use in Northern and Western Scotland for the local manufacture of worsted yarns. Mechanical spinning had its origin in an invention by Lewis Paul of Birmingham in 1738 for drawing out fibres by accelerated motion, a principle

further developed by Arkwright in 1797. Meanwhile in 1764 James Hargreaves had produced his spinning jenny with which 8 threads a number increased later almost indefinitely, could be spun at once. From 1774 Samuel Crompton of Bolton carried improvements further. Upon these early inventions are based the complex and delicate machinery employed to day in Manchester and other great centres of the spinning industry.

Spinoza Benedict Dutch philosopher. Born at Amsterdam, Nov. 24, 1632, he was by birth a Jew; later he left that faith. He lived chiefly at the Hague where he was employed in polishing lenses and there he died Feb. 21, 1677.

Spinoza devoted his life to the study of philosophy and embodied his ideas in his *Ethica* and other works published after his death. He also wrote an explanation of the philosophy of the Descartes to which he owed much. His *Tractatus Theologico Politicus* is an expansion of the ideas of Descartes.

Spinoza's philosophy is a pantheistic one. There is only one substance—God, the absolutely infinite. This has infinite attributes, which together make up the universe, but man is only acquainted with two of them, thought and extension.

Spion Kop Hill in Natal. It overlooks the river Tugela and became known during the war in South Africa in 1900. It was held by the Boers, who were guarding the way to Ladysmith, when on Jan. 23, 1900, it was attacked by a force under Sir Charles Warren. It was taken during the night and held during the following day, but later, owing to a misunderstanding, it was abandoned. Later it appeared that the step was unnecessary.

Spiraea Genus of plants of the natural order *Rosaceae* and sub-order *Spiraeae*, containing many species of herbaceous plants and low deciduous shrubs, the latter frequently planted for ornament. Two of the herbaceous species, dropwort and meadow sweet, are natives of Britain. In Sweden the tubers of dropwort are ground and made into bread. An American species called hardhack is used as a tonic and astringent.

Spiral Term applied to a screw like curve which continually recedes from a centre about which it revolves. In geometry a number of different forms of spirals are recognised such as the Archimedian, Logarithmic, Hyperbolic and the Ionic Volute, the latter being a characteristic feature of the Ionic Column in Greek architecture.

Spire In architecture a tall, sharply tapering structure rising from a tower or other foundation. It is a feature of Gothic architecture. Most of the Gothic cathedrals and churches possess spires, which are occasionally seen on secular buildings of the same style. It originated in the 10th or 11th century and is regarded as being a development of the pyramidal roof then seen in parts of France and Germany. The first spires were simply built upon towers. Later spires and towers were united in a single structure with pinnacles, crochets and lights and no clear demarcation between the two. The loftiest spire in England (406 ft.) and perhaps the most beautiful, is the one on Salisbury Cathedral, another beautiful example is that of the church of St. Mary the Virgin, Oxford.

Spirit Word used for the soul of any unnatural substance, the part of

man that is not the body. It is also used for the angels, who are sometimes called spirits, and to give an idea of God, who is the Supreme Spirit. See SOUL.

Spirits Word used for certain alcoholic liquors and also for solutions prepared by chemists. Examples are brandy, whisky, gin and rum which are prepared for drinking, and methylated and other spirits that are used as sources of power. Spirits of salts (hydrochloric acid) is an example of a chemical preparation.

Spiritualism Name applied to the belief in the possibility of intercommunication between the living and the dead. The alleged intercourse is usually carried out with the help of mediums who submit to the direction of supposed "controls" or spirits acting as agents for the spirit world. Apart from exposures of imposture, seances, or gatherings, for the purpose of getting into touch with the departed, which have been held in the presence of scientific investigators, have revealed remarkable phenomena. These, with other manifestations, are carefully noted by the Society for Psychical Research, and have been made the subject of various statements by the late Sir Arthur Conan Doyle, Sir Oliver Lodge and others.

Spitalfields District of London. It is in the borough of Stepney and lies to the east of the city. At one time it was a centre of the silk industry. It is now noted for its market where fruit and vegetables are sold. This was enlarged in 1928 and is the property of the city corporation. Near is the London Fruit Exchange. At one time there was the Priory of St. Mary Spital here, hence the name of the place.

Spithead Stretch of water between Hampshire and the Isle of Wight. It is 12 m long and 4 m wide and owing to its nearness to Portsmouth is frequently used by warships. It is continued by the Solent.

Spittal Watering place of Northumberland. It is opposite Berwick at the mouth of the Tweed. There is some fishing.

Spitzbergen Group of islands in the Arctic Ocean between Nova Zembla and Greenland. Their estimated area is about 25,000 sq m. The principal island is known as West Spitzbergen (15,000 sq m). The sovereignty of Norway over the Spitzbergen Archipelago was recognised by the Great Powers in a treaty dated Feb 3, 1920.

The islands are mostly mountainous, some peaks rising to over 5000 ft, and vegetation is scanty. The principal mineral is coal. Trappers and hunters visit the islands in search of seals, foxes and polar bears and there is a wintering population of about 1200, which is considerably increased in summer. The Norwegian Government maintains a high-power wireless station on West Spitzbergen. The climate is Arctic, tempered by the Gulf Stream.

Spleen An oblong, ductless organ situated in the left hypochondriac region. Capable of expansion and contraction, and liable in diseased conditions to enlargement up to several times its natural size, which is about 4 in long by 2½ in broad, it weighs from 6 to 8 oz. In a general way the spleen is a blood modifying gland, both destroying blood corpuscles and forming new ones. It can be excised, but the operation is a serious one. In old times the spleen was supposed to be the

seat of envy, malice and other unpleasant emotions—hence such terms as spleenful, splenetic, etc.

Spleenwort Any form of the genus *Asplenium* of the natural order *Polypodiaceae*. The commonest British form is *Ceteract officinarum*, or scaly spleenwort, which grows on rocks and masonry and is very suitable for cultivation in rock gardens. There are altogether about 300 species of *Asplenium* found in Europe, Western Asia and North and South Africa, nine of them being indigenous to Great Britain. The latter include maidenhair spleenwort (*A. trichomanes*), black spleenwort (*A. adiantum nigrum*) and sea spleenwort (*A. marinum*).

Spode Chinaware made by Josiah Spode. It was first made at Stoke in 1770, when Spode used crushed bone with his soft paste. The result was a very transparent ware which was beautifully decorated with flowers and gilt.

Spofforth Frederick Robert. Australian cricketer. Born at Balmain, New South Wales, Sept 9, 1853, he soon began to play cricket for the state. In 1878 he was a member of the team that visited England and he belonged also to later Australian teams and played against England in Australia. He won fame as a bowler, being called the demon, and was certainly one of the greatest bowlers the world has seen. In test matches he took 94 wickets for 1731 runs, and many other remarkable feats stand to his credit, including on one occasion 11 wickets for 20 runs. Spofforth settled in London and was engaged in the tea trade until his death at Surbiton, Surrey, June 4, 1926.

Spohr Ludwig. German composer. Born at Brunswick, April 5, 1784, he soon played the violin with extraordinary skill and became a member of the orchestra kept by the Duke of Brunswick. He became Director of Music at Gotha in 1805 and from 1813-15 was at Vienna in a similar position. In 1822 he went to Cassel as Director of Music and there he remained until his death, Oct 16, 1859.

Spohr is chiefly known as a composer and especially for his oratorio *The Last Judgment*. He also wrote other oratorios, operas, symphonies and concertos for the violin. His violin course is still authoritative. Spohr, who conducted concerts in London in 1820, wrote an *Autobiography*, which has been translated into English.

Sponge Lowly type of animal belonging to the *Phylum porifera*. In its simplest form consists of an individual organism, having a cylindrical or vase-shaped body, forming a three-layered sac, pierced by numerous pores through which water passes into the inner cavity, whose walls are lined with flagellate cells. The water finally is expelled by a terminal exhalant pore. The more complex colonial sponges assume a plant-like growth, and secrete minute siliceous or calcareous spicules, or have a horny skeleton like the common sponge.

Spoonbill Genus of bird. Allied to the ibis and more distantly to the stork, it is the only European species of *Platalea leucorodia*. Formerly a resident in Great Britain but now only an occasional visitor, it is white in colour with a tinge of pink or buff, and has a remarkably long, flat bill much dilated in spoon-like form at the tip. It lives usually in marshes and always near water.

Sporades Islands in the Aegean Sea. They number 20 and formerly belonged to Turkey. During the Turco-Italian War of 1911 Italy occupied 13 of the islands and in the course of the Balkan War, which broke out in the following year, Greece annexed the others. As a result of the Great War the Sporades now belong to Greece.

Spore Non sexual reproductive cell. It is met with in the flowerless plants and is capable of giving rise to a new plant which may or may not resemble the parent. In ferns the spore develops into a small leafy prothallus or sexual plant quite unlike the fern, and this bears the sexual gametes which produce the fern.

Sporozoa Class of parasitic protozoa. Its early stages are amoeboid or flagellate but it is without locomotor organs in the adult state, which is usually passed in an encysted state in the tissues of a host. Reproduction occurs by means of spores which divide up into small bodies or sporozoites. These sporozoites become transferred ultimately to another host. Some disease germs belong to this class, such as the germs of malaria, tetse fly disease and Texas cattle disease. Others are parasitic in insects and ornateae or in the flesh of mammals.

Sprain Injury of the ligaments, etc., around a joint, such as the ankle. When small blood vessels are torn, there is much bruising and swelling.

Treatment—Hot compresses should be applied. A bad sprain should always be attended to by a doctor, as special bandaging and sometimes a splint are necessary. On no account must the injured foot be used. It should be kept up on a chair or in bed. A sprained wrist can be put in a sling.

Sprat A small fish (*Clupea sprattus*). About 5 in long, of the herring family, it is distinguished from the herring by having a serrated belly and no teeth on the vomer. It abounds along the British coasts and was formerly freely used for manure. A popular article of food, it has been known to figure in tins as a sardine. Young sprats are taken in estuaries and sold as whitebait.

Spree River of Germany. It rises in Saxony near the border of Bohemia and flows into Prussia until at Spandau it falls into the Havel. It is 226 m long and passes through Berlin. Part of its course has been canalised, and by means of canals it is connected with the Oder and so with the Baltic Sea.

Spring Natural outflow of water from the earth. Water percolates through a permeable bed such as sandstone or limestone until it reaches one that is impermeable. Here it accumulates, ultimately finding its way by fissures or joint planes until by pressure the water is forced up to the surface. Mineral springs are formed by water dissolving mineral matter in a porous stratum, and these may be saline, chalybeate, sulphurous. Hot springs occur where water rises from a great depth or in volcanic areas.

Springbok Kind of gazelle. It is found in South Africa, and is famed for its power of springing when running. It is about 30 in high and has magnificent horns. In colour it is yellow.

Springfield Name of several cities in the United States. The largest is in Massachusetts 100 m from Boston.

It is on the Connecticut river and is a manufacturing centre. Pop (1930) 149,900.

Another is in Missouri and a third in Ohio. The best known Springfield is the oldest town in Illinois. It is 186 m from Chicago, and is famed for its connection with Abraham Lincoln, who facturing centre. Pop (1930) 71,864.

Springhill Town of Nova Scotia. It is 121 m from Halifax by railway, and is a coal mining centre. Pop 6355.

Spring-Rice Sir Cecil Arthur English diplomatist. Born Feb 27, 1859, he was educated at Eton and Oxford and entered the Foreign Office in 1884. During the next 24 years he gained experience in various capitals, and in 1908, being then a knight, he was appointed Minister to Sweden. In 1913 he was transferred as ambassador to Washington, and was in the United States when the Great War broke out. He dealt with many difficult matters that arose while that country was neutral, and was still ambassador when he entered the War. In 1918 he resigned, and he died at Ottawa, Feb 14, 1918.

Springtail Small wingless insects. Of the sub order Collembola it is found under stones, bark, and flowerpots. There are some aquatic species and a member of the family, known as the glacier flea, occurs on the ice in the Alps. The name is derived from a forked organ under the abdomen which, on being released, acts as a spring and throws the insect into the air.

Sprinting Full speed racing over short distances. Records are commonly applied to 100 yds, the world's professional record being held by J. Donaldson (Australia), who ran 100 yds in 9½ secs in 1910. The amateur record for this distance is 9½ secs, in which time it was run by F. Wykoff (U.S.A.) in 1930. The record time for women is 11½ secs, made by G. Raddeau (France) in 1926, and E. Robinson (U.S.A.) in 1929. In these sprint races the start is usually made from a crouching position with the fingers lightly touching the ground.

Sprocket Projection on the periphery of a wheel. It is also found on a capstan and its purpose is always to engage a chain, thus a cog wheel acting upon the links of a chain is termed a sprocket wheel.

In architecture it is a piece of wood attached to the end of a rafter to form projecting eaves to a roof.

Spruce Genus of the *coniferae* inhabiting cold and temperate regions of the northern hemisphere. *Picea excelsa* and *P. abies* (Norway spruce) are important timber trees in North Europe and Asia, giving out timber scaffold poles, ladders and pit props. In Norway wood pulp is made from them.

Sprue Tropical disease. It is met with in Asia and Australia and characterised by acute diarrhoea and ulceration of the mouth. It is one of the complaints specially dealt with at the Hospital for Tropical Diseases 25 Gordon Street, W.C.1.

Spurge Genus of plant. Of the natural order *Euphorbiaceae*, mostly herbaceous, but some woody, about 12 species are natives of Britain. All have a resinous milky juice and occur in most warm and temperate climates. Some are cultivated in hothouses, the best known being *Euphorbia pulcherrima*, called by gardeners poinsettia, which has yellow blossoms surrounded by brilliant red bracts.

Spurgeon Charles Haddon Baptist preacher Born at Kelvedon Essex, June 19, 1834, he began teaching in 1849, preaching in Cambridge at 18 He moved to London in 1854, where his eloquence and wit soon began to attract large congregations, people coming from all over the world to hear him He published weekly sermons, which attained large circulations, and was the author of many religious books He founded the Stookwell Orphanage in 1867, and died at Mentone, France, Jan 31, 1892

Spurn Head Headland of Yorkshire It is an extension of the east coast that turns into the Humber Its length is about 2½ m and on it are two light-houses

Spurs Battle of the Fought between the English and the French, Aug 16, 1513 It was fought just outside Thérionne, which the English were besieging The French advanced to relieve the place, but when they appeared the defenders were ready for them, and after a sharp fight they were beaten back This name was given to the skirmish because the knights used their spurs to hasten their escape

Spy One who collects information in time of war He assumes the role of a comrade or fellow countryman of an enemy By international law a spy, if caught, may be shot The organisation that controls spying, both in peace and war, is known as the secret service During the Great War there were spies in the belligerent countries as well as in the armies

Squadron Military, naval or air force In the British army a squadron is a division of a cavalry regiment, which usually possesses four, each under a major or captain In the navy a squadron is a number of warships under an officer of flag rank, battleships and battle cruisers are usually grouped in squadrons of four In the air service the squadron is the smallest number of machines under a single command The rank of squadron leader in the air service is equivalent to that of major in the army and lieutenant-commander in the navy

Square Root Quantity that, multiplied by itself, gives a specified number or formula There is a regular method of finding the square root of a number, although in most cases this is not an exact figure, but runs to many places of decimals The square root of 256 is 16, but the square root of 356 is 18 and a row of decimals Square roots are also obtainable in algebra

Squash Rackets Indoor ball game It is played on a smaller court than in ordinary rackets and is limited to two players The ball is of india-rubber and much larger than an ordinary racket ball being of the same size as that used in fives It is a slower game than ordinary rackets, but is extremely popular and an excellent test of accuracy in placing the ball

Squatter One who settles on land that is unoccupied In English law if such a person has not been disturbed in his possession for a period of years he becomes the owner of the land In the United States the doctrine of squatter sovereignty is that squatters, or actual residents in a territory, have the right to make their own laws

Squid Calamary or cuttle fish The name is more particularly applied to the small variety (*Loligo vulgaris*) found along the

British and French coasts Like some of the other cephalopods it carries a reservoir of inky fluid which it squirts out in order to baffle an enemy Its skeleton is quite commonly found on some English beaches

Squill Two different plants One is of the natural order of *Liliaceae*, and is now more commonly known by its Latin name *scilla*, the other is the official squilla (*Urginea Scilla*) the dried bulb from which, in powdered form, is used mediocinally as an emetic and expectorant

Squinting (or strabismus) Want of parallelism in the visual axes of the eye Causing the eyes to look in different directions when the intention is to direct both on the same object, it may be due to loss of power in one of the eye muscles with consequent over activity on the part of the other Strabismus may be either convergent, when the squinting eye is directed inwards, divergent, when it is directed outwards, the former being much the more frequent

Squire Variant of esquire The first esquires were the youths who attended the knights in the field of battle and later became knights themselves

Later the word was used in England for a landowner who was not a peer, usually one who owned a small estate, and was the chief man in his neighbourhood These squires played a large part in the life of the country during the 18th and 19th centuries The changes of the 20th century have greatly reduced their numbers

Squire Sir John Collings English man of letters Born at Plymouth in 1884, he became literary editor (later acting editor) of *The New Statesman*, and in 1919 founded *The London Mercury*, of which he was editor and chairman His widely popular writings (*Apes and Parrots* and *Sunday Mornings* are recent titles) include essays, reviews, poems and parodies He was knighted in 1933

Squirrel Small rodent of the family *Sciuridae* Mostly arboreal and found nearly everywhere except in Australia, the British variety (*Sciurus vulgaris*) measures 18 in long, including an 8 in tail, and weighs about half a pound It nests in trees and eats berries, nuts, and fir-buds, collecting a store for winter, during which it hibernates awakening from time to time to feed It is being rapidly displaced by the grey squirrel (*S. cinereus*), introduced from North America, which is multiplying so freely as to become a nuisance Its extermination, owing to its predatory habits and its fondness for birds' eggs, is being organised in several countries

Flying Squirrels are a group of squirrel-like rodents which, by means of a membranous extension of skin of the flanks between the limbs, can glide considerable distances through the air from tree to tree Different species occur in N America, India and Africa

Stabiliser Term used in aeronautics employed for the purpose of imparting stability to aircraft when in motion, and is frequently employed to denote the fixed horizontal portion of the tail of an aeroplane

Stability Term used in aeronautics It has reference to the power of an aeroplane when disturbed by air pockets, or other causes, to right itself on the control levers being placed in their normal position Lateral stability preventing a rolling action,

is met by a slight inclination from the horizontal of the wings, and to give longitudinal stability the tail plane also is inclined. Stability in relation to varying wind currents is obtained by the action of the vertical fin and of the rudder.

Stabilization

Action of making any thing firm or stable. It is used chiefly in connection with money which in order properly to fulfil its functions, must have a known value fixed in relation to a standard commodity, which in most countries is gold. This was not the case during the financial derangement that followed the Great War, when the mark, the franc, and other currency units fluctuated violently in value. The evil was remedied by stabilising them, i.e. giving them a new value in relation to gold. This new value is usually expressed in terms of exchange relation with either the £ or the dollar, e.g. in 1924 Germany stabilised her currency at 20 reuter marks to the £. Italy followed suit in 1927 at 92 lire to the £ and France in 1928 at 125 francs to the £.

Stadium

Enclosure used for sports and games. The original stadium was a Greek measure of length, about one tenth of a mile. It was then applied to a race run over a course of this length and finally to the building or enclosure in which such races were held. There were stadia at Olympia, Athens, and in many other Greek cities.

In modern times the word has been revived. A stadium has been erected at Wembley, London, and there are many others in Europe and America, some containing accommodation for 100,000 persons. Those at Berlin and Alexandria and the one built at Los Angeles for the Olympic Games of 1932, are notable examples. There was one at the White City, Shepherd's Bush, London, built for the Olympic Games of 1908.

Stadtholder

Name formerly used in the Netherlands for the highest official. The first stadtholders were representatives of the King of Spain, but in 1579, when they became independent the northern provinces elected stadtholders of their own. In Holland the office became practically hereditary in the family of Orange and was held by William the Silent and subsequently by his great grandson William III of England. The office ceased to exist when the Netherlands became a kingdom in 1815.

Staël

Anne Louise Germaine, Madame de Staël. Born in Paris April 22, 1766 the daughter of Neck, the French banker and Minister of Finance, she achieved fame as a writer, a conversationalist and a society woman. She married Baron de Staël Holstein, Swedish ambassador in Paris and wrote *Germany*, *Delphine* and *De l'Allemagne*, besides many other books. The first named brought her European fame and she visited England, Germany, Austria and Italy. Her liberal tendencies greatly annoyed Napoleon, who persecuted her. Her second husband was Albert de Rocca. She died July 14, 1817.

Staffa

Island of Scotland. One of the Hebrides. It is part of the county of Argyll and is 6 m. north of Iona. It covers only 71 acres but is famous on account of its caves, which are of basalt. The chief is Fingal's Cave which is over 200 ft. long. The island is uninhabited.

Staff College

Training college for army, naval and air force officers. Only a selected number of officers

are admitted to the college, and the passing of the examinations is a great help to promotion. Every modern service has its staff college with a complement of professors and lecturers. In Great Britain the army staff college is at Camberley, the naval staff college at Greenwich, and the air force staff college at Andover.

Stafford

Borough, market town and county town of Staffordshire. It is on the river Sow 133 m. from London and 23 from Birmingham, by the L.M.S. and L.N.E. Ryds. The buildings include the beautiful Church of S. Mary, once collegiate, the restored Church of S. Chad, the shire hall and the town hall. There was a castle in Norman times. The present building is modern.

There are brine baths and salt is prepared, and the town's industries include boot factories and engineering works. Isaac Walton was born in the town. Pop. (1931) 29,485.

Stafford Marquess

of English title now borne by the oldest son of the Duke of Sutherland. Ralf de Stafford, who lived in the castle at Stafford, was created earl in 1351, and his descendant was Humphrey Stafford, Duke of Buckingham. The title became extinct in 1521 but in 1688 it was revived for Henry Stafford Howard, a descendant of the earlier Staffords. It became extinct for the second time in 1762.

In 1758, Earl Gower, the head of the family of Leveson Gower, was created Marquess of Stafford, and his son the 2nd marquess, was made Duke of Sutherland in 1833, having married the heiress of the Earls of Sutherland. The seat of the marquess was Trentham Hall in Staffordshire, now demolished.

Staffordshire

Midland country of England. In area, 1169 sq. m., it is hilly in the north but for the most part gently undulating, with the low upland of Cannock Chase, now a coalfield, in the centre. The chief river is the Trent. In the north are the Potteries, embracing Hanley, Burslem, Stoke upon Trent, etc. In the south is the Black Country, in which, at Wolverhampton and Walsall, iron in all its branches is manufactured. There are some 600 collieries and the breweries of Burton on Trent are world renowned.

Stafford is the county town, but there are many other more populous centres. For parliamentary purposes Staffordshire is divided into seven divisions each returning one member. Among famous natives are Dr Johnson, Isaac Walton and Josiah Wedgwood. Pop. (1931) 1,431,175.

Stag

Male of the red deer. Stags in Scotland are stalked, and shot with a rifle on Exmoor, in the New Forest and in Ribblesdale, Yorkshire wild red deer are hunted the Exmoor season lasting from May 25 to May 10 and again from Aug. 12 to Oct. 8. Elsewhere the practice is to carry a stag to the meet in a van and to set on the hounds a quarter of an hour after the carted stag has been released.

Stage

Platform on which plays are performed. The term has come to be applied generally to the dramatic profession. Greek and Roman theatres were provided with fixed stages placed in the former case opposite the amphitheatre of seats and on a level with the lowest row. Considerable enlargement of the stage and the introduction of stage machinery characterised the Roman theatre. Many early stages on which morality and

mystery plays were performed were natural or movable ones. The use of a revolving stage is a modern development.

THE STAGE AS A CAREER—The lure of the stage is proverbial, but it is well that the aspirant to a career in the theatre should consider carefully various aspects of this exciting calling, which at the present time is woefully overcrowded.

What are the essential qualifications? The greatest actor and manager of the past half century laid it down that the actor must "first satisfy the eye and then please the ear," it being understood, of course, that he must also gratify the intelligence of his audience. Being assured of these abilities, there is no reason why he should not climb to the top of the tree.

For the technical part of his instruction there are admirable institutions, namely, The Royal Academy of Dramatic Art, The Academy of Music, The Guildhall School of Music, three chartered bodies which employ skilled actors to teach the beginner. But valuable as the theory may be, it is by practice alone in the presence of the public that the actor can acquire full command of the rudiments of his art, a process which it was once said, took a man ten years of steady application to master and a woman five years. The best training a beginner can secure is by playing a series of parts, starting with the smallest, in a good class Repertory Theatre.

After a year's work in a recognised school of acting, the novice is eligible for election as a probationer, and after forty weeks' employment in a theatre, as a full member, by the Stago Guild (Trafalgar House, 9 Newport street, WC2).

Stage Coach Vehicle that formerly carried passengers and to some extent goods. It was drawn by two four or even more horses, and had seats inside and outside with a boot for the luggage. It appeared in the 17th century, but its most prosperous period was the early 18th century, and just before it was superseded by railways. The horses were changed at the end of each stage, which was a public-house on the route.

Staggers Disease of horses, cattle and sheep. It has various causes, heart failure, brain disease and constipation being among them. It causes an imperfect co-ordination of the muscles and the affected animal trembles and often falls down. It is usually incurable.

Staghound Breed of dog used for hunting stags. The modern staghound is a large type of foxhound, different from the staghound of old which was a kind of bloodhound. There are several packs in England and Ireland.

Stained Glass Term used to describe glass coloured by fusing metallic oxides into it or burning pigment into its surface. Among the earliest references to stained glass are the mention of a window given to the Abbey of Tegernsee, Bavaria, in A.D. 939, and the redecoration of Rheims Cathedral with windows by Bishop Adalbert. There are many fine examples of the 11th and 12th centuries, e.g., at Chartres Cathedral, Canterbury, York Minster, King's College, Cambridge and elsewhere.

Stainer Sir John, English composer. Born in London, June 6, 1840, he became a chorister in St. Paul's Cathedral. He then studied the organ and became, in

1859, organist at the university of Oxford. In 1872 he returned to London to become organist at St. Paul's, where he remained until 1888, when he was knighted. In 1889 he was elected Professor of Music at Oxford where he remained until his death, which occurred in Italy, March 31, 1901. Stainer composed several cantatas, notably, *The Daughter of Jairus* and *The Crucifixion*, and a number of oratorios.

Staines Urban district of Middlesex. It stands on the Thames, where it is joined by the Colne 19 m. from London, and can be reached by the G.W. and S. Rly. Brewing is an industry. A bridge crosses the Thames here. Pop. (1931) 21,209.

Stainland Urban district of Yorkshire (W.R.) It is 3 m. south of Halifax and 193 from London by the L.M.S. Rly. Here are textile mills and paper mills. Pop. (1931) 4,246.

Stair Earl of Scottish title held by the family of Dalrymple. John Dalrymple, the first earl, was a lawyer who was made a viscount in 1690 and an earl in 1703. He died in 1707. His son John, the 2nd earl (1673-1747), was a soldier who fought against the French between 1702 and 1714 and again in 1712. From 1715 to 1720 he was ambassador in Paris. He was also famous for the improvements he made on his estates. He died, May 9, 1747, when there was a dispute about the succession. This, however, was settled, and the title is still held by the Dalrymples. The earl's eldest son is called Viscount Dalrymple and his estates are in Wigtownshire and Midlothian.

Stalactite Calcareous figure. It is usually cylindrical or conical in shape and is formed by the steady dripping of water from the roof of caves. Each drop when it evaporates leaves behind it a tiny speck of carbonate of lime which it has collected in passing through the roof of the cave. These in time form a stalactite, which is often of fantastic shape. Together the stalactites are a very remarkable, and sometimes, a beautiful sight. There are examples in England in the caves at Cheddar and the Peak cavern in Derbyshire, the finest being seen at Jenolan in New South Wales.

Stalagmites are of similar formation, but are found on the floor of the cave. They are built from the ground upwards usually where the water drops from the roof.

Stalbridge Town of Dorset. It is 6 m. from Sherborne, on the Gt. W. Rly. Here is a 14th century market cross. The title of Baron Stalbridge has been held by the family of Grosvenor since 1886. Pop. (1931) 1,222.

Stalin Joseph Vissarionovitch, Russian journalist and politician. The son of a cobbler, he was born in 1879 in Tiflis, and at 17 joined the Social Democrats in Russia and started a revolutionary agitation in Georgia. Between 1902 and 1912 his political activity led to frequent imprisonments, from each of which he escaped. He was one of the editors of *Pravda* in 1912-13, and directed the Bolshevik campaign of 1913 in the Duma, though not himself a member. He became general secretary of the central committee of the Russian Communist party in 1917, and on Lenin's death, in 1924, succeeded him as dictator. He has since held a leading place in Russian politics. He wrote *Leninism*, 1928. His real name is Dzhughashvili.

Stalybridge Borough of Cheshire and Lancashire Situated on both banks of the boundary River Tame, on the L M S and L N E Rlys It is $7\frac{1}{2}$ m F by N of Manchester with which it is connected by tramway It remained a small village until 1776 when a cotton mill was started there, and then it grew rapidly in importance until it had, as now, large cotton spinning and calico weaving factories, iron foundries and machine shops It was created a municipal borough in 1867 and a Parliamentary borough in 1867 Stalybridge and Hyde now constitute a Parliamentary division of Cheshire returning one member Pop (1931) 24,823

Stamboul Name formerly applied to part of the city of Constantinople (qv) Recently the name Stamboul, or Istanbul, has been applied by the Turks to the whole city

Stamen Part of a flower It is the individual part of the *androecium* or floral whorl next inside the corolla and surrounding the *gynaeceum* or pistil A typical stamen consists of a filament, anther and connective The anther, usually two-lobed, forming a case holding the pollen grains, is essential to reproduction, as each grain forms ultimately, by division, two male germ cells The stamens are regarded as highly modified floral leaves, the filament representing the leaf stalk while the anther corresponds to the leaf blade

Stamford Town and borough of Lincolnshire A number of students from Oxford attempted unsuccessfully in 1333 to establish a university here Burghley House, the seat of the Marquess of Exeter, contains a fine collection of pictures The town is a trading and agricultural centre Pop (1931) 9946

Stamford Bridge Village of York shire It is 9 m. north east of York on the River Derwent, on the L N E Rly, and is famous for the battle fought here, Sept. 25 1066 The Norwegians under their king Harald Hardrada and Tostig, brother of the English king, Harold, had landed in the Humber and marched to York Harold collected an army in the south and hurried northwards After a hard fight the English prevailed and the Norwegian king was killed

Stamford Bridge Athletic ground in London It is in the Fulham Road near a station on the District Railway, and is the headquarters of the London Athletic Club, which opened it in 1878 Here the Chelsea football club play their matches.

Stamfordham Baron. English courtier Arthur John Bage was born June 18 1849 his father being Vicar of Stamfordham in Northumberland He himself became an officer in the artillery and served against the Zulus in 1878 70 He then joined the royal household as private secretary to the queen, and in 1895 became her principal secretary In 1901 he was appointed secretary to the Prince of Wales, afterwards King George V, and retained the post when the prince became king He retired in 1930, and died on March 31, 1931 In 1911 he was created a peer, but the title became extinct at his death

Stammering Infirmary of speech It manifests itself either in an inability to pronounce certain words

or in a tendency to stumble over some syllables and to repeat others Its proximate cause is in the larynx and it may be either a defect of childhood or acquired later as the result of shock or nervous trouble It is curable in all but extreme cases

Stamp (1) Implement designed to make an impression. (2) Label bearing an impression and affixed to envelopes or documents for postal or revenue purposes. (3) Machinery for crushing ores (see STAMP MILL) Its most common use is in respect to the second of these applications See STAMP ACT, STAMP COLLECTING, STAMP DUTIES

Stamp Sir Charles Josiah British economist Born June 21, 1880, and educated at London University, he entered the Inland Revenue department of the Civil Service in 1898 becoming assistant secretary to the Board in 1916 After resigning in 1919, he became secretary of Nobel Industries Ltd., director of Imperial Chemical Industries, 1927 28, and chairman of the L M S Rly An expert financier, he sat on the royal commission on income tax, 1919, the Northern Ireland finance arbitration committee, 1923 4, the committee on taxation and national debt, and the Davies Committee, 1924 He was a member of the court of enquiry into the coal industry 1925, and of the Young Committee on reparations, 1929 He was created C B E in 1924, G C B in 1935

He has been awarded many academic honours, and has been president of the Royal Statistical Society and treasurer of the British Association He is the author of many books on financial subjects, among which are *Wealth and Taxable Capacity*, *Studies in Current Problems in Government and Finance* and *The Financial Aftermath of War*

Stamp Act Measure requiring all legal documents in the American colonies to bear a revenue stamp Passed by Parliament in 1765, the act was violently opposed in America on the ground that Parliament had no right to impose taxation unless representation went hand in hand with it. In Jan., 1766, the protest of the colonists was vigorously upheld by Pitt in the House of Commons The repeal of the Stamp Act was then proposed and carried on Feb. 21 of that year

Stamp Collecting Collecting of postage stamps Formerly regarded as a schoolboy hobby, this has now risen to the dignity of a quasi scientific pursuit known as philately, for the encouragement of which numerous societies have been formed, and hundreds of dealers are in business in all parts of the world

The Royal Philatelic Society and the Junior Philatelic Society have done notable work in detecting forgeries, and in the holding of congresses and exhibitions, their efforts being stimulated by the keen interest in philately of King George V who himself possessed the most complete collection of British and British Empire stamps in existence Its chief rarity was the blue Mauritius stamps of 1847, purchased in 1904 for £1450

Stamp Duty Form of indirect taxation Under it duties are collected by means of stamps, adhesive or impressed, affixed to legal and other documents by which property is transferred or other privileges are secured Among documents requiring to be stamped are insurance policies bills of exchange, contract notes, patent

specifications Stamp duties are administered by the Board of Inland Revenue and vary from the 2d stamp on cheques and receipts for sums of £2 and over to much larger amounts, of which the £10 stamp duty on a grant of arms is an example. The stamp duties payable on the issue of capital by a public company or on the sale of a large estate may amount to thousands of pounds.

Stamp Mill Machine for crushing mineral ore. It consists of a rectangular iron box in the bottom of which are steel dies, and stamps raised by means of cams and falling by gravity. The ore is crushed between the dies and the stamps. The latter are usually five in number and consist of heavy stems with a steel shoe at the bottom. The rectangular box containing the steel dies is fitted with a screen in front and a feed slot at the back. Water flowing through the box carries the crushed ore through the screens, most of which may be varied according to the ore to be dealt with.

Standard That which stands. The term is used for (1) an established rule or model, (2) a grade of classification in elementary schools, (3) a shrub or tree unsupported by a wall, (4) a staff supporting a flag, also the flag itself. The term is specially applied to the Royal Standard of England and to the standards of certain cavalry regiments. The Royal Standard, hoisted only when the sovereign is present or by viceroys, governors and lieutenant governors of colonies and territories, bears the royal arms and measures 15 ft by 7½ ft. The standards of the Household Cavalry and Dragoon Guards are of crimson silk damask bearing the badge, devices and mottoes conferred for service in the field. The flag may not fly from a standard after dusk.

Standard Battle of the. The battle fought between the English and the Scots, Aug 22, 1138. Stephen and Matilda were fighting for the throne of England, and David I, King of the Scots, invaded England to help Matilda. Thurstan, Archbishop of York and the northern barons gathered a force in which there was a great number of priests, and marched to meet the Scots. The two armies met at Northallerton, and the English were in a dense array around their standard, the banners of St Peter of York, St John of Beverley and St Wilfred of Ripon. The Scots attacked but could make little headway against the solid mass opposed to them, and after suffering heavy losses they retreated, leaving a good deal of booty for the English.

Standardisation Method adopted to secure uniformity in quality and character of materials and products, also, in relation to manufacturing processes, to obtain efficiency and increased output with economy of expenditure.

In science, there are the standards of temperature in the well-known thermometric scales, and calories and other thermal units, also in electricity there are many standards of various kinds. Time, weights and measures are each standardised. In pharmacy, preparations of drugs are also standardised.

Standards Department

Branch of the Board of Trade. It is responsible for seeing that all weights and measures in use are correct. The work was controlled by the exchequer until 1866 and the office of the Warden of the Standards existed until 1878. The chief official is now the Deputy Warden.

Standard Time Arrangement of time. This standardisation is uniform over a given area. By it the world is theoretically divided into belts and zones of 15°, each representing an hour. Within each zone time is uniform, but it changes one hour when the next zone is reached. It is used in many parts of the world instead of Greenwich time, which is the same everywhere. The United States and Canada have five zones of standard time.

Standerton Town of the Transvaal. It is 110 m from Pretoria and 370 from Durban and has a railway junction. The Vaal River, here crossed by a bridge, flows past the town. It is an agricultural centre where the government owns an experimental farm. Pop 3000.

Standing Order Rule of procedure. Standing orders are Resolutions passed by the House of Commons, the London County Council or other bodies of that kind, and are enforced by the Speaker or chairman.

Standish District of Lancashire. It is 3 m from Wigan and is a coal mining centre, with a station on the L.M.S. Rly. Here is Standish Hall, the seat of the old family of Standish. It forms part of the urban district of Standish and Langtree. Pop (1931) 7262.

Standish Myles. English colonist. Born at Duxbury about 1584 he served as a soldier in the Netherlands. Having joined the Puritans, he went to the new world in the *Mayflower*, and was one of the founders of the colony of Massachusetts. He was chosen leader of the settlers and led them in several fights with the Indians. He died at Duxbury, Massachusetts, Oct 3, 1656. In *The Courtship of Miles Standish* Longfellow tells of an incident in his life.

Stane Street Roman road in Surrey and Sussex. It ran from Chichester to London and part of its course can be traced. Hilaire Belloc has written a book on it.

Stanford Sir Charles Villiers. British composer. Born in Dublin, Sept 30, 1852, he was educated at Cambridge, and studied music in Leipzig and Berlin. Organist of Trinity College, Cambridge, and conductor of Cambridge University Musical Society, 1872-93, and of the Leeds Festival, 1901-10, he was appointed Professor of Music at Cambridge University, 1887. He produced several operas in Germany, and conducted concerts on the continent. He was the author of numerous songs, trios, quartets, sonatas, symphonies, oratorios, and a large amount of church music. He was knighted in 1902 and died March 29, 1924.

Stanhope Urban district of Durham. It is situated on the Wear, 25 m from Darlington, on the L.N.E. Rly. The church is an old and interesting building and the living, one of the richest in England, has been held by several famous divines. Pop (1931) 1746.

Stanhope Lady Hester Lucy. English traveller. A daughter of the 3rd Earl of Stanhope, she was born March 12, 1776. From 1803 to 1806 she lived with her uncle, William Pitt, and played an important part in political life chiefly through the influence she exercised over the great prime minister. In 1810, four years after his death, she went to Syria and made her home on Mt. Lebanon. There she lived the life of an

eastern potentate until her death, June 23, 1839. A woman of unusual ability, Lady Hester left some *Memoirs*.

Stanley Urban district of Durham. It is 8 m north west of Durham, and is a coal mining centre. Pop (1931) 24,458.

There is also a village of Stanley in Derbyshire, the chief industry of which is coal mining.

Stanley Urban district of Yorkshire (W R). It is 3 m from Wakefield, on the L N E Rly. It is a coal mining centre. Pop (1931) 14,570.

Stanley Port of Tasmania, situated on the north coast of the island, about 150 m by rail from Launceston. Pop 3000.

There is another Stanley, the chief town of the Falkland Islands. Pop (1931) 1213.

Stanley English family. Its name is taken from Stanley in Staffordshire, but the family is now settled in Lancashire and Cheshire. In the 14th century Sir John Stanley became lord of the Isle of Man and his grandson, Thomas, was created a baron in 1456.

Thomas's son, Thomas, was made Earl of Derby in 1485 for assisting Henry VII to secure the throne. This title is still held by the head of the Stanleys, while the barony of Stanley of Alderley was created in 1839 for Sir John Thomas Stanley, the descendant of Sir John Stanley, younger brother of Thomas, Earl of Derby.

Stanley Arthur Penrhyn. English ecclesiast. A son of Edward Stanley afterwards Bishop of Norwich, he was born Dec 12 1815, and was educated at Rugby and Balliol College, Oxford. He was ordained and for a few years was a tutor in Oxford. In 1851 he went to Canterbury as a canon, but in 1856 he returned to Oxford as Professor of Ecclesiastical History and canon of Christ Church. In 1864 he was appointed Dean of Westminster, where he remained until his death, July 18 1881. He married Lady Augusta Bruce a daughter of the Earl of Egin.

Stanley was a churchman of liberal views a close friend of Queen Victoria, and an ecclesiastical historian. His books include, *Lectures on the History of the Eastern Church*, *Memoirs of Westminster Abbey and Life and Correspondence of Thomas Arnold*.

Stanley Sir Henry Morton. African explorer. Originally named John Rowland, he was born in Wales June 10 1841. In 1867 he became special correspondent of the *New York Herald*, and in 1871-72, under the auspices of that paper and *The Daily Telegraph* made his famous journey in search of David Livingstone. He found him near Lake Tanganyika. He returned to England Aug. 1872 but made subsequent trips to Africa. He wrote *How I Found Livingstone*, *Through the Dark Continent*, *The Congo* and *In Darkest Africa* as well as other books. He died May 10 1904.

Stanmore District of Middlesex. It is 13 m. to the north of London, on the L M S Rly. Pop (1931) 3364.

Stannaries Tin mines of Cornwall and Devon. This term includes the local laws and customs relating to them. In early times tin mines were the property of the sovereign and various special usages and regulations were observed in connection with their working. There was a

representative Stannaries Parliament which last met in 1752, and a Lord Warden of the Stannaries, and Stannaries Courts still exist.

Staple Place where goods were stored for sale, the goods themselves, and finally, the principal product of a district or country. In the Middle Ages the term was largely used in connection with what was then England's principal commodity, wool, and merchants were enjoined by royal command to carry their wool to certain towns designated **staple towns**. The growth of commerce broke down the system of staples and the word is now used almost exclusively to denote a chief industry or commodity. In a special sense it is applied to the thread of a textile fabric.

Staple Inn Building and courtyard in Holborn, London, E.C. For about 400 years, until 1884, it was an inn of chancery. The present hall, built in the 16th century, has a fine roof. It is occupied by the Institute of Actuaries and the remainder of the building is let out as offices.

Stapleford Town of Nottinghamshire. It is 6 m from Nottingham, on the L M S Rly. The River Erewash flows through it. The industries are the manufacture of lace and hosiery.

Star Heavenly body. Distinct from a planet (*q.v.*), an enormous number of stars have been charted, and fresh discoveries are constantly being made as the power of telescopes increases. The aspect of the heavens in regard to stars varies according to the annual motion of the sun, one half of the heavens being visible at midnight in June, and exactly another half at midnight in December. Some stars, called **variables**, undergo changes of brilliance, and have to be ranked at different times under different magnitudes. Stars also vary greatly in colour, the contrast between Sirius and Betelgeuse, for instance, being very marked. There are numerous double and binary stars, and in particular parts of the sky there are clusters, such as the Pleiades, Hyades, etc., which are quite distinct from nebulae (*q.v.*). The flux of stars is of great value in regard to time keeping and the measurement of latitude and longitude, the Pole star marking the N and S poles very nearly.

In heraldry (*q.v.*) stars represent orders of knighthood such as the Garter, the Bath and the Thistle. The Star of India is itself a separate order. War medals, again, are sometimes in the form of stars, the Mons star being a recent example.

Starch Product of photosynthesis. A carbohydrate occurring in the cells of plants. Starch consists of various sized grains whose characters differ according to the type of plant. The grains form a reserve material when stored in seeds, tubers and roots. Starch is insoluble in cold water but on boiling gelatinises forms a paste, and when boiled with diluted acids is changed into glucose, or by dry heat into dextrine or British gum.

Star Chamber English law court. It was set up in 1487 by Henry VII to deal with the nobles who were too powerful to be punished by the ordinary courts. The chancellor, treasurer the justiciar and other high officials were the judges and it had very extensive powers. It was operative under the Tudors and Stuarts, and became very much hated in the time of James I and Charles I, owing to its arbitrary and perhaps unjust procedure. It was abolished

in 1611 The name is due to the fact that the members met in a room the ceiling of which was decorated with stars

Starfish Class of *echinoderms* It is closely allied to the sea-urchins In the Pacific it attains a great size, *Asteriac gigantea*, measuring 2 ft in diameter, while *Pycnopodia helianthoides*, about a yard in diameter, has over 20 arms The common starfish of our coasts (*A rubens*) is found at low tide in shallow pools, but its regular haunts are at depths of ten fathoms Suctorial tube feet under each arm enable it to crawl along the sea-floor or up the sides of rocks

Starling Genus of bird (*Sturnus*) Of the family, *Sturnidae*, of passerine birds, it is found in all parts of the world except the Australian mainland. The common starling (*S vulgaris*) is abundant throughout Britain, migrating from district to district in search of food, breeding twice, sometimes thrice, in a season and laying from 4 to 7 pale blue eggs in a rudely built nest In autumn starlings form flocks in which they fly about before roosting They are handsome birds, brown-black with purple and green reflections, and buff tipped feathers In confinement they learn to whistle tunes, and even to articulate words

Star of Bethlehem Genus of plant Bulbous-rooted, of the order, *Liliaceae*, bearing from 6 to 9 large white and rather fragrant flowers, it is a native of France, Germany, Switzerland and other parts of Europe The leaves are grass like with a white stripe The common star of Bethlehem (*Ornithogallum umbellatum*) is a garden flower in England, but a yellow-flowered kind is occasionally found in woods and meadows

Stars and Stripes National flag of the U.S.A. Its seven horizontal red and six horizontal white stripes, represent the original 13 seceding states It has a blue canton emblazoned with 48 stars in 6 rows of 8, representing the 48 states of the union The flag, as originally designed in 1777, had only 13 stars, but the present pattern has been in use since 1819

State Body politic The term is now applied to a body of people under one government, which acts as its agent and governs according to the constitution, which may be either written, *e.g.*, as in the U.S.A. or unwritten, as, *e.g.*, the British constitution The state is not necessarily coincident with the nation since the latter may include sentimental, racial and other considerations with which the state as "the creature of legal enactment" does not concern itself

Staten Island of New York It is at the mouth of the Hudson River, being separated from Manhattan by the Narrows Its area is 70 sq m., and on it is Richmond, one of the boroughs in the city of New York, and several watering places and pleasure resorts, including New Brighton Steamers connect it with New York proper and places in New Jersey

State Rights See **FEDERALISM**.

States General Estates of the realm The name was formerly used in France, Spain and other countries for the precursors of the modern legislatures They consisted usually of three classes, clergy, nobility and commons, and

were so called because each class was a state, or estate of the realm

In France they were first called together to advise the king in 1302, the clergy and commons being representative bodies, but they never obtained much power They met, however, from time to time until 1614 They were not called together again till 1789 when their meeting proved the prelude to the French Revolution

The Dutch republic possessed a states general and this is the name of the legislature of the present kingdom of the Netherlands It consists of two houses One is composed of 50 members elected by the provinces and the other of 100 members elected by the people Women are eligible for election.

Statics Branch of mechanics It treats of bodies and forces at rest or in equilibrium, and is therefore the opposite of dynamics The subject of strains and stresses, so important to the architect, the engineer and the builder, is a branch of statics

Stationer One who deals in writing requisites The Stationers' Company is one of the London livery companies It has a hall in Stationers' Hall Court, Ludgate Hill, and maintains a school for boys at Harringay The company had formerly a monopoly of printing in England and until the law of copyright was altered in 1911 every book published was entered, or registered, at Stationers' Hall

Stationery Office Department of the British Government It was set up in 1782, and supplies stationery to the various public departments. It also publishes and sells blue books and other official publications, among them reports of various kinds, and acts of parliament The head offices are in Storey's Gate, London, S.W., and there are branches in Edinburgh, Cardiff and Belfast. The wholesale warehouse is Cornwall House, Stamford Street, London, S.E.1 There are retail establishments at Adastral House, Kingsway, London, W.C.2, 26 York Street, Manchester, 120 George Street, Edinburgh 1 St Andrew's Circuit, Cardiff, and 15 Donegal Square, West Belfast The printing works are at Harrow

Stations of the Cross Form of devotion Practised in the Roman Catholic Church. It takes place in Passiontide when 14 pictures of scenes from the passion of Jesus Christ placed on the walls of the church, are used in worship The worshippers pass from one to the other, kneeling and praying before each in turn

Statistics Collection and arrangement of figures, bearing more particularly on the social, moral and material condition of peoples Censuses were taken in ancient times, but statistics only became a regular branch of study in the 17th and 18th centuries In this country statistics are mostly to be found in blue books, but a statistical section has been attached to the British Association since 1833 and a Statistical Society has existed since 1834

Status Standing possessed by a person It defines his or her position in the eyes of the law, *e.g.* the status of an Englishman or the status of a magistrate

Statute Law made by parliament and therefore binding on all subjects of the realm This kind of law, as distinguished

from moral law, divine law, or common law, is called statute law, and is said to be placed on the statute book. Statutory rules and orders, made by administrative departments under delegated powers, have not the force of a statute unless it is specially given to them by the act of parliament authorising the delegation.

Stavanger Town and seaport of Norway. It is 105 m from Bergen on the Stavanger Fjord. The industries include fishing and shipping and there are some manufactures. The town has a broadcasting station (240 6 M, 0.5 kW). Pop (1930) 46,780.

Stave Term used in music. It denotes a given five lines with intervening spaces upon which notes are placed to indicate their pitch. A clef or key is placed upon the stave in order to fix the alphabetical names of the lines and the absolute pitch of the notes. In plain song only four lines are used.

Staveley Urban district of Derbyshire. It is 4 m from Chesterfield on the L.M.S. and L.N.E. Ryds. The industrial life centres round the coal mines and ironworks. Pop (1931) 12,646.

Stawell Township of Victoria, Australia. 150 m from Adelaide on the main line from Melbourne to Adelaide, it is a railway junction with gold mines and freestone quarries in the neighbourhood. Pop 4400.

Stead William Thomas. English journalist. Born July 5, 1849, he became in 1880 assistant editor of the *Pall Mall Gazette*, under John Morley, and then editor, 1883-89. He created a tremendous sensation in 1885 by a series of articles entitled, *The Maiden Tribute of Modern Babylon*, fiercely attacking and exposing prostitution. Arising out of his crusade he suffered three months imprisonment. In 1890 he founded the *Review of Reviews*. Another sensational book of his was, *If Christ came to Chicago*. He founded *Borderland* and devoted himself to spiritualism. He went down in the *Titanic*, April 15, 1912.

Steam Water in the form of vapour, especially the gas into which water is changed on boiling. Transparent when pure, it becomes visible when condensation begins owing to the formation of minute particles of water. While still in contact with the water, steam is said to be saturated, when heated further after all the water has been turned into steam, it is super heated. See **BOILING POINT**.

Steam is widely used as a source of power in the steam engine (*q.v.*), and also for heating purposes, as a disinfectant and as a fire extinguisher.

Steam Engine Engine driven by steam. The expansive force of steam is used as the means of producing mechanical work. Hero of Alexandria (circa 100 B.C.) is credited with discovering the motive power of steam, but it was not until comparatively recent times that a practical engine was invented. In 1698 Savery patented a simple type of steam engine for use in pumping water. The invention of the piston and cylinder by Papin in 1690 led to improved engines by Newcomen and Cawley in 1705, but these though more practical, were wasteful in action. Watt in 1769 patented a separate condenser, making possible the double acting engine, and these improvements were applied by Trevithick to a locomotive engine.

Steam Hammer Hammer driven by steam. It was designed by Nagmyth about 1842, but has since been modified and improved in its details. A number of different types are in use at the present day, but the general principle consists of a steam cylinder supported on cast iron standards and inverted over an anvil. The piston ends in a hammer head or trip, and steam is admitted below the piston to raise the hammer and above it to accelerate the fall.

Stearic Acid Fatty acid present in animal fats. Combined with glycerine in the form of a glyceride it occurs also in certain vegetable fats such as shea butter. Like the other fatty acids it forms alkali salts which are present in soap. Stearic acid also crystallises from an alcoholic solution in needles or laminae.

Stearin Glycerine of stearic acid. Occurring in animal fats it forms the substances of tallow, lard and suet along with glycerides of palmitic and oleic acids refined suet being almost pure stearin. The term "stearin" must not be confused with *stearine*, a mixture of palmitic and stearic acids used in making stearine candles.

Steatite Massive form of talc. Known sometimes as soapstone, it is usually white, grey, or green in colour, and is greasy to the touch. It occurs associated with serpentine in Cornwall, Ireland, and North America. Steatite resists heat and therefore is used as a refractory material in furnaces and gas burners, etc.

Steel Compound of iron. Containing a variable amount of carbon and usually small amounts of manganese and other metals, it covers a wide range of materials.

The carbon steels, containing less than 2 per cent. of carbon, comprise the mild steels (0.1 to 1.5 per cent. carbon), and the tool steels (0.6 to 1.5 per cent. carbon). These steels are made by the Bessemer process or by the later open hearth or Siemens-Marten process, and the metal produced is tough and greyish white with great tenacity and tensile strength, these characters adapting it to constructional work.

Crucible steels, made by melting steel bars in crucibles, possess the highest cutting qualities and are used as tools, drills, and razors. The alloy steels contain minute quantities of such metals as manganese, nickel, tungsten or chromium, and thus increase the hardness and give special properties, as in the rustless steels which contain chromium and sometimes nickel.

Steel Flora Annie. English novelist. Born at Harrow, April 2, 1847, for some time she was school inspectress in the Punjab. In collaboration with Sir Richard Temple she wrote, in 1884 *Wide Awake Stories*, she also made a collection of Punjab folklore. Her best known books include *From the Five Rivers*, *The Potter's Thumb*, *Red Rowans*, *On the Face of the Waters*, *In the Permanent Way* and *India Through the Ages*. She died April 12, 1929.

Steel-Maitland Sir Arthur Herbert Drummond Ramsay. English politician. Born July 5, 1876, and educated at Rugby and Oxford, he was M.P. for E. Birmingham, 1910-18, Erdington, 1918-29, and was returned for Tamworth in 1929 and 1931. He was Under-Secretary for the Colonies 1915-17, when he

was made a baronet, Joint Under Secretary for Foreign Affairs and Secretary to the Board of Trade, 1917-19, and Minister of Labour 1924-29. He died on March 30, 1935.

Steele Sir Richard English essayist and playwright. He was born in Dublin in 1672 and educated at Charterhouse and Oxford. In 1709 he founded the famous *Tatler*, it was followed by the *Spectator* and the *Guardian*, Addison co-operating in all. Steele filled several public offices, and was also in Parliament for a time. His best play is *The Conscious Lovers*. He died Sept. 1, 1729. With Addison he shared the credit of raising the moral tone of society in post-Restoration London.

Steelyard Balance or weighing machine dating from Roman times. It consisted of a level with unequal arms, in using which a single weight or counterpoise moved along a graduated beam was employed. In a special sense the term was applied to an association of foreign merchants, mostly Germans, who settled in London in the 13th century under the protection, first of charters and later of the Hanseatic League, but were eventually ousted in 1508.

Steen Jan Dutch painter. Born in Leiden in 1626 he brought a wonderful sympathy and sense of humour into his treatment of genre-pictures. His best-known works are "Doctor Visiting a Patient," "Domestic Life," "Tavern Company," "The Oyster Girl," "Work and Idleness," and "Bad Company." He died Feb. 3, 1679.

Steenbok S African antelope (Dutch, stone buck). It is under 2 ft high and of a stone colour, rendering it difficult to distinguish in the veldt. It has upright horns about 4 in long, and is classified as either *Narotragus* or *Rhaphiceros campestris*.

Steeplechasing Horse racing over hedges, ditches and other obstacles set up on a regular course. The sport is said to have originated in a race ridden by moonlight in Ireland by a party of cavalry officers who agreed to go straight across country towards a distant steeple. The Liverpool Grand National, the great steeplechasing event of the year, was instituted in 1839. It is held at Aintree in March, the course being 4½ m., with 30 jumps.

Stefan's Law Law in physics. First laid down by J Stefan at Vienna in 1879, it states that the total energy of a body which absorbs all the radiation falling upon it, is proportionate to the fourth power of the temperature of the radiator, assuming the radiator to be a perfect one.

Stefansson Vilhjalmur Canadian explorer. He was born Nov. 8, 1879, in Manitoba, of Icelandic parentage. After graduating at the University of Iowa, he studied theology and anthropology at Harvard, where he became assistant instructor in anthropology. He began his explorations with a private archaeological journey to Iceland in 1904, undertaking another for Harvard in 1905. In an Arctic exploration, 1908-12, he encountered tribes which had never seen a white man. In 1913-18 he commanded a Canadian Arctic exploration, and in 1924 he penetrated to the centre of Australia. He is the author of *The Friendly Arctic* and *The Folk Lore of the Eskimos*.

Stegosaur Prehistoric animal. One of the dinosaurs, it attained a length of 30 ft., and was covered with enormous bucklers and spines.

Stein Sir Mark Aurel British archaeologist. Born at Budapest, Nov. 26, 1862, he was educated there and in Germany. He continued his studies in the languages and history of the East in England, and later became naturalised. From 1888 to 1899 he was head of the Oriental College at Lahore, and he filled other educational positions in India. He began his archaeological researches when at Lahore, and in 1900 led an expedition into Turkestan.

During the next 30 years his researches and excavations in C Asia, Persia and Baluchistan produced magnificent results, revealing the existence in these regions of great civilisations, hitherto unknown, or almost so. Many of his finds are in the British Museum and the museum at Delhi. In 1912 he was knighted. His books include *Ancient Khotan*, *The Ruins of Desert Cathay* and the elaborate *Serindia*. In 1932 he was awarded the gold medal of the Royal Asiatic Society. While in Tibet he lost his toes by frost-bite.

Stella Name used by Sir Philip Sidney for Lady Penelope Rich and by Jonathan Swift for Esther Johnson. A steamer of this name was wrecked off the Casquet Rocks near Alderney on March 30, 1899, when 105 lives were lost.

Stellenbosch Town of Cape Province, S Africa. It is 31 m. from Capetown and was one of the first Dutch settlements in Africa. Its university was founded in 1916. The town is named after an early governor and his wife Pop (Eur, 1931) 4,407.

In the war of 1899-1902 against the Boers, Stellenbosch was used by the British as a base. Officers deprived of their commands were sometimes sent there, and so the phrase to be Stellenbosched came to be used for generals and others removed for incapacity.

Stem In botany that portion of the plant axis which bears leaves and flowers, and is a continuation of the root. In herbaceous plants the stem tissues are soft, but in perennial plants it becomes woody and increases in thickness.

Stencilling Method of printing. It consists of cutting out letters or designs on a thin plate, usually of metal, laying this stencil over the surface to be printed, and brushing colour into the cut-out spaces.

Stendhal Name taken by the French novelist, Marie Henri Beyle. He was born at Grenoble, Jan. 23, 1783, and became a soldier. He saw service in the wars of Napoleon, including the campaign of 1812. After 1815 he lived in Italy until 1821, and he was there as a consul from 1830-41. He died in Paris, March 23, 1842. Beyle wrote three novels and several other books including *De l'Amour*, *Racine et Shakespeare*, and one on Italian painting. His novels are *Armance*, *Le Rouge et le Noir* and *La Chartreuse de Parme* which contains an account of the Battle of Waterloo.

Stentor In ancient legend the herald of the Greeks during the war against Troy. His voice is said to have been as loud as that of 50 ordinary men.

Stephen Christian saint. He joined the church at Jerusalem after the death of Jesus Christ, and was one of the seven chosen to look after the poor. He was stoned by an angry crowd of his enemies (Acts vi). His day is Dec. 26.

Stephen King of England. Born in 1104 he was the third son of Stephen, Count of Blois and Adela daughter of William I. On the death of Henry I. in 1135, he usurped the crown, the rightful heiress being Henry's daughter Matilda (Maud). His reign was marked by frequent internal wars, during one of which Matilda took him prisoner. She was acknowledged as queen, but soon alienated the people and left England, Stephen agreeing to appoint her son Henry as his successor. He died in Oct., 1154.

Stephen King of Hungary. Son of a duke of Hungary, he was born in 977. In 997 he became a Christian and changed his name from Vajk to Stephen. Crowned as king by the pope in 1000 he married a princess from Bavaria and during his reign of 38 years did much to convert his people to Christianity. He died in 1038 and in 1083 was canonised. Stephen is regarded as the patron saint of Hungary.

Stephen Sir Leslie. English author. Born in London, March 3, 1829, he was educated at Eton, King's College, London, and Cambridge. Ordained in 1859, he renounced his orders in 1875. A great athlete and mountaineer, he wrote for the *Saturday Review*, helped to found the *Pall Mall Gazette* and was editor of *The Cornhill*, 1871-82, when he was made editor of the *Dictionary of National Biography*. He was author of *The Science of Ethics*, *An Agnostic's Apology*, *The English Utilitarians* *Hours in a Library*, and several biographies in the English Men of Letters series. He was knighted in 1902 and died Feb. 22, 1904.

Stephenson George. English engineer. Born at Newcastle, June 9, 1781, as fireman at a colliery he studied the steam engine, and in 1817 built his first locomotive for colliery tram roads. In 1821 he constructed the Stockton and Darlington Railway, and in 1825 a line from Liverpool to Manchester. His "Rocket" did 35 m. an hour, an inconceivable speed for those days. A network of railways followed. Stephenson died Aug. 12, 1848.

Stephenson Robert. English engineer. Son of George Stephenson, he was born near Newcastle, Oct. 16, 1803, and studied for a time at Edinburgh University. He assisted his father in the building of the Stockton and Darlington, Liverpool and Manchester, and London and Birmingham railways. He built the Britannia Bridge across the Menai Strait, the Victoria Bridge across the St. Lawrence at Montreal, two bridges across the Nile and many others. He was M.P. for Whitby, 1847, died Oct. 12, 1859, and was buried in Westminster Abbey.

Stepney Metropolitan borough of London. It is bounded N. by Bethnal Green, E. by Poplar, W. by the city and Shoreditch and S. by the Thames. There is a suffragan bishop of Stepney. Stepney includes Spitalfields, Whitechapel, Mile End, St. George's in the East, Shadwell, Ratcliffe, Wapping and Limehouse, and contains the Tower Mint and S. Katherine's, London and Regent's Canal Docks. Also the London Hospital and Dr. Barnardo's Homes. Pop. (1931) 225,203.

Steppe Vast grass covered plains of Siberia and the adjacent parts of Asia, where the wandering tribes feed their stock. They resemble the pampas of S. America.

Stereoscope Optical instrument by means of which a drawing or picture is made to stand out in relief. It consists of two inclined lenses through which are viewed two pictures. The two separate images being blended have the appearance of solidity.

Stereotyping Printing process. It is used for reproducing on a metal plate an impression of type or relief blocks first made on a mould or matrix of plaster or papier maché.

Sterility Barrenness in regard to reproduction of the species. It occurs in both animals and plants and may be due to organic defects, functional disorder, changed conditions of life or surgical treatment. Hybrids produced by the pairing of distinct species are usually sterile. Many plants which become fertile when pollinated from another of the same species, are sterile when self pollinated, but there are many exceptions.

Sterilisation Making food, drink, surgical instruments and so on, innocuous by the destruction of bacteria or other micro-organisms. In the case of all surgical instruments, boiling in water, and the use of such disinfectants as iodine and carbolic acid, are the means usually employed. Milk can be sterilised in various ways, the most effective method being pasteurisation (q.v.).

The term sterilisation is also used in connection with methods for rendering the unfit incapable of reproducing their kind. It has been introduced by one or two states (e.g., California in the U.S.A. and Alberta in Canada), and has been advocated in Great Britain.

Sterling Legal tender of the United Kingdom. Its origin is uncertain, but it may come from a silver penny called the sterling, because of the figures of stallions on it. The term was much used in 1931 when Great Britain abandoned the gold standard. The penny sterling, instead of the sovereign of gold, became the standard by which debts overseas were paid. Its value in gold was around 15s. 6d.

Sterne Laurence. English novelist. Born in Glenmel, Ireland, Nov. 24, 1713, of English parentage, he was educated at Halifax and Cambridge. Ordained in 1738, he became prebendary of York and later perpetual curator of Coxwold. In 1759 appeared the first two volumes of his novel, *Tristram Shandy*, giving the author immediate fame. Seven other volumes followed at intervals up to 1767. *The Sentimental Journey* appeared in 1768. Sterne died in London, March 18, 1768.

Stethoscope Instrument used in medical diagnosis for bearing sounds from the lungs, heart or other internal organs. In its original form as invented by Laennec it consisted of a wood, vulcanite or metal tube with expanded ends, but in its modern form consists of two flexible rubber tubes ending in ear pieces.

Stettin Seaport and capital of the Prussian province of Pomerania. It is situated on the Oder 30 m. from the Baltic and 84 m. by rail from Berlin, of which it is the port. There are large shipbuilding yards, engineering works and sugar, cement and other factories. Stettin was the seat of a princely dynasty from 1107 to 1637, was ceded to Sweden in 1648 and to Prussia in 1720. Until

1374 Stettin was strongly fortified. The most notable buildings are the great churches of St Peter and St James, the former the oldest in Pomorania. The city has a broadcasting station (283 M, 0.5 kW). Pop (1933) 270,747.

Stevenage Urban district and market town of Hertfordshire. It is 23 m from London, on the L N E Rly. The chief building is the old parish church of St Nicholas. Pop (1931), 5476.

Stevenson Robert. Scottish engineer. Born in Glasgow, June 8, 1772, a son of a merchant, he was educated in his native city and at the University of Edinburgh. After his father's death his mother married a lighthouse engineer Thomas Smith, who taught young Stevenson his business, and so enabled him to succeed to the position of engineer to the Scottish Lighthouse Board. Stevenson built several lighthouses, including one on the Bell Rock, and added to the power and efficiency of the lights. He died July 12, 1850.

Stevenson's work was carried on by his sons, Thomas and David. Many improvements were introduced by Thomas, who was the father of Robert Louis Stevenson. He died May 8, 1887, and is described in his son's *Memories and Portraits*.

Stevenson Robert Louis. Scottish novelist and man of letters. He was born in Edinburgh, Nov 13, 1850. A delicate child, he was educated at Edinburgh Academy and Edinburgh University, studied law, and eight years later was called to the Bar. He started his literary career with articles in the *Cornhill Magazine* in 1874, and after travelling on the continent produced *An Inland Voyage* and *Travels with a Donkey in the Cévennes*. A spell of literary journalism followed, then travels in America, and marriage in 1880, with an American, Mrs Osbourne.

Returning to Scotland, Stevenson in 1882 wrote *Treasure Island*, which instantly made his reputation as a writer of romance for the young, who also cherish his *Child's Garden of Verses*. Between 1884 and 1887 he produced several stories and plays *Kidnapped* and *The Strange Case of Dr Jekyll and Mr Hyde* appeared in 1886. In 1887 he left England for America, and in 1889, after a yachting cruise in the Pacific, settled at Samoa on an estate which he called Vailima and from which he sent home *Catriona* and other fine stories. He died Dec 4, 1894, while at work on *Wear of Hermiston*. His *Letters* were published in 1899.

Stevenston Town of Ayrshire. It is 1 m inland from the Firth of Clyde and 28 m S W of Glasgow, on the L M S Rly. Formerly a cotton and silk-weaving centre it now largely depends on its coal and chemical industries. There are coal mines and ironworks in the neighbourhood, also a Nobel factory for explosives.

Steward Name now chiefly given to the manager of an estate, attendants on shipboard, managers of provision departments and officials at race-meetings. The Lord High Steward, one of the great officers of state, was anciently the first officer of the crown in England. The office now exists only for use on ceremonial occasions. The Lord Steward is an important officer in the Royal Household (*qv*).

Stewart Name of a great Scottish family, also spelt Stuart. About 1100 King David I made a certain Walter steward

of Scotland and his descendants held that office. One of them a later Walter, married Marjorie, daughter of Robert Bruce and their son, Robert, became King of Scotland in 1371. He was the first of the Stewart kings. The royal line became extinct on the male side in 1542 when James V died, but his daughter, Mary, married Lord Darnley, who was also a Stuart, and their son, James VI, became King of Scotland and then of England. His male descendants ruled Scotland and England until James II was deposed in 1688. After this the Stuarts maintained a claim to the throne until the death of the last male of the family, Henry Benedict, cardinal and Duke of York, July 13, 1807. In the female line the Stewarts are still represented by the family that, until 1913, ruled in Bavaria. See CHARLES I, JACOBITES.

Stewart Dugald. Scottish philosopher. Born in Edinburgh, Nov 22, 1753, he was educated there and in Glasgow. In 1785 he was appointed Professor of Moral Philosophy at Edinburgh. He wrote *Elements of the Philosophy of the Human Mind*, *Philosophical Essays* and *The Philosophy of the Active and Moral Powers*. He died June 11, 1828.

Stewarton Burgh of Ayrshire. It is on Annick Water, 5½ m. from Kilmarnock and 19 m from Glasgow, on the L M S Rly. Spindle-making, carpet-weaving and other textile industries are carried on. Important horse and cattle fairs are held. Pop (1931) 2749.

Stewartry Scottish term formerly applied to a district governed by a steward. Appointed by the king, he exercised both civil and criminal jurisdiction. The term is now obsolete except in the case of Kirkeudbright which is called the Stewartry.

Steving Town of Sussex. Within easy reach of the South Downs, and on the S Rly, it was a Roman settlement, and before the sea receded in the 14th century, an important port. Prior to 1832 it was a borough returning two members. It has a fine church, chiefly Norman, built on the site of an old Saxon church mentioned in Domesday Book.

Stick Insect Family of straight-winged insects (*Phasmidae*). It is so-called because its body, with the wings folded so closely resembles a stick that it often escapes detection when at rest among foliage. It sometimes attains a length of 13 in. in the tropics. Only four or five species out of 600 occur in Europe.

Stickleback Small acanthopterous fish, *sc.*, one in which the dorsal fin is replaced by strong spines. The male is highly coloured, especially at maturity, and exhibits extraordinary parental care during the spawning season. It builds a barrel-shaped nest in which eggs and young are housed, and will fiercely attack fish many sizes larger than itself that approach it.

Stiff Neck Term usually applied to a form of muscular rheumatism. There is a congenital variety, and it may be a symptom of spinal disease. The ordinary kind may be treated by rubbing with stimulating liniments and wrapping up the neck in wool or flannel. Wry-neck or torticollis is a twisting of the neck to one side, and may date from birth. A spasmodic form sometimes occurs in middle age characterised by intermittent spasms of the muscles on one side which forcibly draw the shoulder up and the

back of the head down. The treatment of this should be in medical hands

Stigand Archbishop of Canterbury. He was probably the priest appointed by Canute to a church at Ashington (Assandun), Essex built by the king in commemoration of his victory there. Made Bishop of Elmham in 1038, and of Winchester in 1047 he acted as Edward the Confessor's intermediary in his quarrel with Earl Godwin. Appointed, uncanonically, Archbishop of Canterbury, he was excommunicated by five successive popes. He trafficked in church preferments, and deprived of his see died at Winchester, Feb 22, 1072

Stigma Botanical term for the top of the style surmounting the ovary in a flower. Usually it is swollen and covered with glandular papillae or hairs, and forms the receptive surface for the pollen grains which are brought by the wind, insects and other agencies in the process of pollination

Stigmata (Greek, *stigma*, a puncture). Name applied by Roman Catholic writers to body marks believed to represent the wounds inflicted on our Lord at His crucifixion. These marks are supposed to be the result of prolonged contemplation of the Passion and to denote special divine favour. The most famous case is that of St Francis of Assisi, but two or three hundred other instances are recorded.

Still Life Art term. It is applied to drawings and paintings of immobile objects such as fruits, vases, drapery, fish, game and so on. Subjects of this character first appear in later Greek and Roman art. The Dutch school excelled in paintings of still life

Stilt Wading bird (*Himantopus*) of the snipe family. It is so-called from the length of its legs which is almost equal to that of its body. The wings and bill are also long. *H. candidus* breeds in Holland and S. Europe, but only pays occasional summer visits to England. The bird is usually black and white, but New Zealand has a pure black stilt

Stilton Village of Huntingdonshire. It is 6 m. S.W. of Peterborough, and on the old mail coach route to London. Makers of the cheeses peculiar to the surrounding districts used to put them on the coach at Stilton, which thus gave its name to the commodity

Stimson Henry Lewis. American statesman. Born in New York City, Sept. 21, 1867, he was educated at Yale and Harvard Universities and started to practise law at the Bar of New York City in 1891. He was United States attorney for Southern New York State, 1906-09, and in 1910 was Republican nominee for the governorship of New York State, but was defeated. He was Secretary for War 1911-13 and served in the army during the Great War. From 1927-29 he was Governor General of the Philippine Islands and in March, 1929, was made Secretary of State by President Hoover. He was the head of the American delegation to the London Naval Conference

Stinchar River of Ayrshire. Rising in the S. of the county, it falls into the Firth of Clyde at Ballantrae. It is 30 m. in length

Sting Sharp pointed hollow spine. It is present in certain insects for defence or other purposes, and represents a

modified ovipositor provided with a poison gland supplying an acid or alkaline secretion. The sting of a scorpion is the hooked end of the terminal body segment in which lie two poison glands. Mosquitoes and fleas do not sting, but puncture the flesh with their modified mouth parts

In plants, a stinging hair of the nettle has a flinty point which readily breaks, setting free the acid sap

Stinkhorn Fungus (*Phallus impudicus*). It grows to a height of about 7 in. and is surmounted by a conical cap containing an olive green slime, the disgusting smell of which gives the growth its familiar name

Stinkwood Name given to timbers of several unrelated trees having in common an unpleasant odour. S. African stinkwood, one of the elm family, is as hard as beech and greyish in colour. A much harder and darker S. African wood is known also as Cape walnut

Stint Genus of small shore birds. They are about 6 in. long with a black bill, and brown and buff streaks from the bill to behind the eye. The feathers are grey and brown, with white underneath, and the tail is double forked

Stipendiary Recipient of a stipend or periodical payment. A stipendiary magistrate is one who is paid, as distinct from a justice of the peace who serves voluntarily. Stipendiary magistrates are appointed by the crown, and must be barristers of at least five years standing. They preside over police courts in London, Birmingham and several other cities

Stipple Art term. It is applied to the process of producing an effect by means of dots or small marks with brush, pencil or other appliance. The term is used in drawing, etching, engraving and miniature painting. In tempera painting, owing to the nature of the medium stippling was resorted to to give a high relief, and in the engravings of Bartolozzi the process is seen at its best.

Stirling Burgh of Scotland, and county town of Stirlingshire. It is situated on the Forth 40 m. from Edinburgh, on the L.M.S. and L.N.E. Ryrs. It is full of historical interest, has been a royal burgh since 1100 and was a favourite residence of the Scottish kings. The castle, a strongly fortified place, is public property. Leather and tweeds are manufactured, also agricultural machinery. Pop (1931) 22,593

Stirlingshire County of Scotland. It lies in the middle of the country, bordering on the Firth of Forth, and has an area of 466 sq. m. In the N.W. it has part of the Grampians, including Bea Lomond. Parts of Lochs Lomond and Katrine are in the county. It has some coal mining districts, but is mainly agricultural. Stock is raised and cereals, especially wheat and oats, are grown. Stirling is the county town, and among other towns are Falkirk and Bridge of Allan. With Clackmannan it sends two members to Parliament. Pop (1931) 166,447

Stitchwort (or Starwort) Perennial herbaceous plant (*Stellaria holostea*) common in hedgerows. A native of Europe and parts of Asia, it has long angular stems and narrow grass like leaves in pairs. The 5 petalled star like white flowers are $\frac{1}{2}$ in. across. There is a smaller species (*S. graminea*). *S. media* is known as the chickweed (*q.v.*).

Stiver Obsolete Dutch coin worth about a penny. In common speech the word is used to denote an insignificant sum, much in the same way as "a brass farthing".

Stoat (or Ermine) Small carnivorous mammal (*Mustela erminea*) related to the weasel. It is widely distributed over northern regions, and common in Britain. The total length is about 15 in., of which the black-tipped tail accounts for a third. The pelt is reddish brown above and whitish beneath. In more northern lands it adopts a white winter coat, except for the black tail tip. The fur is much valued as **ERMINE** (q.v.).

Stock (*Matthiola*) Popular annual and biennial flowering plants of the cruciferous order. Ten week stocks, which bloom ten weeks after sowing, should be sown under glass in March and planted out in early May. Brompton stock, a perennial variety, is usually treated as a biennial.

The annual night scented stock (*M. tristis*) has insignificant flowers which give out a delicious fragrance in the evening. Virginia stock is a miniature border plant, 8 or 9 in. high, which has hlooms of pink, mauve and white.

Stockade Type of fence or barrier used in military defence. It is also used in jungle and wild country to keep out wild beasts or to enclose them when captured. An effective stockade is made of a double circle of stakes or posts, with earth between. In military defence there may be a ditch between the rows.

Stockbridge Market town of Hampshire. It is on the Test, 72 m. from London and 19 from Southampton, on the S. Rly., and is a favourite resort for fishermen. Pop 880.

Stock Exchange Market for the buying and selling of securities. The London Stock Exchange is in Throgmorton Street, and transacts more business than any other in the world. Founded in 1773, it opened its present building, since extended, in 1802. The premises and property are owned by a company, administered by nine trustees and managers appointed by the shareholders. The business of the "house" is regulated by a committee of thirty shareholders elected annually, whose permission is required before securities can be dealt in. The income of the Exchange is drawn from the subscriptions of members and their clerks, entrance fees paid by new members, rents and investments. New members with three sureties pay a subscription of 100 guineas, and members with two sureties (i.e. a clerk of four years' service) 50 guineas. Entrance fees are 600 guineas for a member with three sureties and 300 guineas with two sureties. Clerks authorised to deal pay 50 guineas entrance fee and 100 guineas subscription, and unauthorised clerks, 15 and 30 guineas respectively. There are about 4000 members.

Dealers (or jobbers) and brokers have distinctive functions. The jobber, like a wholesale dealer, keeps a stock of securities and quotes his buying and selling prices, the difference representing his profit. Brokers, who represent the public, buy from and sell to the jobber, but may not deal on their own account. Purchasers who speculate for a rise are known as "bulls," those speculating for a fall as "bears."

Other stock exchanges are in Manchester, Glasgow and other large cities of Great Britain,

as well as in the Dominions. In France the Stock Exchange is called the Bourse. In New York it is in Wall Street, by which name it is usually known.

THE STOCK EXCHANGE AS A CAREER The usual training is to enter the office of a member at a nominal salary. A boy of proved ability has the prospect of becoming a settling room or unauthorised clerk, and may eventually be authorised to deal for his employer. The business of a member demands judgment, foresight and a sound knowledge of industrial and economic conditions.

Stock-fish Name given to cod, ling, hake, haddock, etc., split and cured by drying in the air without salt.

Stockholm Capital city of Sweden. It is beautifully situated on islands at the outlet of Lake Mälaren into the Baltic, and is divided into three parts, Staden, the ancient centre, Norrmalm and Södermalm. Staden, with old, winding streets, contains the royal palace, the government buildings, the great church of S. Nicholas, an old Franciscan church used as the royal burying place, the docks and the business district. Norrmalm, however, is the finest quarter of the city and contains the royal opera house, the museum, statues, gardens and fine streets. The city has a university and is the seat of the principal academies and learned societies. There are numerous other places of entertainment and learning. The Deer Park is a noteworthy feature. Of the industries iron and steel, including engineering and shipbuilding, are the most important, others are porcelain works and factories producing cork, wood, silk and chemicals. A new dock for large ships was completed in 1926. The city has a broadcasting station (438 M., 55 kW.) Pop (1931) 514,333.

Stockport County borough chiefly in Cheshire but partly in Lancashire. Built on the slopes of a ravine, it is situated on the Mersey, at the point where that river receives the waters of the Tame and the Gort, and is 6 m. from Manchester, on the L.N.E. and L.M.S. Rlys., with tramway connection with Manchester. Largely a cotton manufacturing centre, the borough has iron foundries, breweries and hat factories. Pop (1931), 125,505.

Stocks Device for punishing offenders. They consist of two bars of wood between which are holes for the feet. When they are locked together the victim is firmly imprisoned. Some stocks have also holes for the arms. Stocks were much used in England in the 16th and 17th centuries, when the usual punishment for a vagabond was to put him in the stocks, and they continued in use until the 19th century. They were usually placed on the village green, and in some villages are still kept as relics of the past. In London, according to John Stow, there were stocks in every ward.

Stocksbridge Urban district of Yorkshire (W.R.). It is 8 m. from Sheffield. There are coal mines and associated industries. Pop (1931) 9253.

Stockton-on-Tees Borough, market town and seaport of Durham. It is 4 m. from Middlesbrough and 235 from London, on the L.N.E. Rly. There are machine shops, glass works, iron foundries and shipbuilding yards. Races are held three times a year. Pop (1931) 67,724.

Stockwell District of London To the S W of the city It is in the borough of Lambeth, on the tube railway Here is the orphanage founded by C H Spurgeon in 1867

Stoicism Ancient school of philosophy Its name is derived from the porch (*Stoa*) where its founder Zeno (340 270 B C) taught at Athens Later Stoicism had great influence in the Roman world, and its greatest teachers Seneca Epictetus and the Emperor Marcus Aurelius were Romans The leading doctrines of the system may be summed up in the aphorism, Virtue alone brings happiness.

Stoke Village of Nottinghamshire It is 4 m from Newark Here, on June 16, 1487 Henry VII defeated an army raised by Lambert Simnel, which contained about 2000 Gorman mercenaries.

There are many other Stokes in England Stoke d'Abernon on the Wey in Surrey has a church containing the oldest brass in England The village is 3 m from Leatherhead Another Stoke, a village near Hartland, has a church called the Cathedral of North Devon

Stoke-on-Trent County borough and market town of Staffordshire It is 140 m from London, on the L M S Rly It includes Stoke proper, the former boroughs of Burslem, Longton and Hanley, and the former urban districts of Fenton and Tunstall which were all united in 1910 The chief industry is the manufacture of pottery In 1925 Stoke was made a city, and in 1928 its mayor was advanced to the rank of lord mayor Pop (1931) 276 619

Stoke Newington Borough of the county of London It lies between Islington and Hackney The buildings include the parish church built by Sir Gilbert Scott. Clissold Park is an open space, and here is Abney Park cemetery Pop (1931) 51,215

Stoke Poges Village of Buckinghamshire It is 20 m from London on the G W Rly The church of St Giles dates from the 14th century Its churchyard is famous as having suggested to Thomas Gray who is buried here, his famous *Elegy* The land near is owned by the National Trust

Stokesay Village of Shropshire It is 6 m from Ludlow, its nearest station being Iron Arms on the L M S and G W Rly Its chief attraction is the 13th century castle probably the most perfect extant example of a fortified manor house in England The gatehouse is Elizabethan and there is a moat

Stokesley Market town of Yorkshire (N R) It stands on the L N E Rly 16 m from Stockton on Tees, on the

Stole Narrow vestment worn by the clergy It is really a long scarf with ornamental ends such as were worn by the magistrates in Rome as a sign of office It is worn by the priests of the Roman Catholic church during mass, and by many clergy of the Church of England at the celebration of the Holy Communion Stoles are of various colours each season of the church's year having its own colour

Stoll Sir Oswald. British theatre and cinema magnate He was born in Melbourne Jan 29 1868 and educated in Liverpool He devoted himself early in life

to matters theatrical, and became chairman and managing director of the Coliseum Syndicate He controls picture houses in London and the provinces, was knighted in 1919 and is the author of some books on philosophy and finance

Stomach Muscular bag like expansion of the alimentary canal It is between the oesophagus and the small intestine and beneath the diaphragm Food in its passage through the stomach is acted upon by secretions from the gastric glands, the insoluble proteins of meat, etc, being changed into soluble peptones which are absorbed readily into the blood

In cases of poisoning and colic given to a stomach pump, or syringe, a flexible tube is used some, unpleasant out the stomach

Stone In geology any hard greyish especially flint or chert, or a mass of hy water or the action of salt water suffix It is found in the small shore and minerals, such as ironstone, alumstone, and buff stream

A precious stone is one of reason of its colour, its white characters, is prized as a gemstone the term is applied to and shaped in a quarry periodical formation in the kidney

Stone English mealties of the stones are found in various shades It varies also according to its age For instance a stone of 100 years standard stone is one of 140 lb

Stone Market town of Staffordshire It is 7 m from Stafford and on the L M S Rly In the town was an abbey here Near the seat of Earl Granville

Stone Marcus. Englishman was born in London in the 18th century and educated privately He is seen at the end of the 18th century illustrations for the *Potential*, and Trollope and others He exhibited more than 63 consecutive exhibitions from the Academy, being made A R A in 1887 He died March 1891

Stone Age Term applied to the primitive stage of strongly developed before man was acquainted with the materials at his command and when he used stone in adaptation to his needs the materials at his command Age is divided into four periods of the dawn of history (1) Palaeolithic (2) Mesolithic (3) Neolithic (4) Neolithic Age when tools were fashioned by flint and polished

Stonechat (*Pratincola rubicola*) A bird found on British meadows and commons It is about 5 in in length, the plumage black with a brownish tinge on the back and white markings on the neck and legs and bill black The eggs are a bluish grey speckled at one end with reddish brown It nests on the ground among grass or under growth

Stonecrop (*Sedum*) Name for a number of creeping plants of the order *crassulaceae*. The stonecrop, common on old walls or roofs of country cottages.

with small thick green leaves and masses of tiny bright yellow flowers, is the biting stone crop, or wall popper. There are eight species native to Great Britain and other cultivated varieties are largely grown in rock gardens.

Stonehaven Burgh, seaport and watering place of Kincardineshire, also the county town. It is on the E coast, 16 m. from Aberdeen, at the mouth of two small rivers, and is served by the L.M.S. and L.N.E. Rlys. The old town was a harbour for the fishing fleet, and a new quarter with many attractions for visitors. Near are the ruins of Dunnottar Castle. Pop (1931) 4185.

Stonehenge Prehistoric stone circle, the most famous in England. It is on Salisbury Plain, about 2 m. from Amesbury. It consists of an outer and an inner circle of stones. In the former 16 of the 30 are still standing. The inner circle is less complete. Within it are other stones, one of which is called the altar stone, and outside are some isolated stones, one being the slaughtering stone. The largest stones are 2½ ft. high.

The stones were brought, it is believed, from Pembrokeshire, and were erected about B.C. 1700. There are various theories about their purpose, the one most favoured is that they were concerned with the worship of the sun. On June 21 many persons visit Stonehenge to see the sun rise over one of the stones. Around are earthworks and barrows.

Stonehouse Town of Lanarkshire. It is situated about 4 m. N.W. of Strathaven, on the L.M.S. Rly. Coal mining and weaving are important industries. Pop 4200.

Stoneleigh Village of Warwickshire. It is on the Avon, 2 m. from Kenilworth. Stoneleigh Abbey, the seat of Lord Leigh, occupies the site of a Cistercian house. It was built early in the 18th century, but includes some remains of the abbey church. It has a valuable collection of paintings and stands in a large park.

Stoneware Hard, glazed form of earthenware usually of a coarse character. Stoneware of the finest quality was made first in England at Fulham in 1671, by John Dwight, under a patent from Charles II. Sanitary ware such as drain pipes, sinks, etc., are made of glazed stoneware.

Stonyhurst English public school. It is 12 m. from Blackburn, its station being Whalley on the L.M.S. Rly. It is conducted by the Society of Jesus for Roman Catholics, and has accommodation for about 400 boys. The college was founded in 1592 at St. Omers, it was moved to Bruges in 1762, and to Liege in 1773. In 1794 the present school was opened in a hall at Stonyhurst presented by Mr. Wold of Lulworth.

Stony Stratford Market town of Buckinghamshire. It is 2 m. from Wolverton and has engineering works and a trade in corn and cattle.

Stool-Ball Ancient game formerly played in the N. of England, and said to be the predecessor of cricket. A stool was placed on the ground, with one player standing before it. His opponent tosses a ball at the stool, the former having to hit it away with his hand. One point is counted each time the ball is hit. A variety of the

ancient game is now occasionally played at camps and fairs in the S. of England.

Stopes Marie Carmichael English scientist and author. Daughter of Henry and Charlotte Carmichael Stopes, and educated at Edinburgh, Munich and London University. She first gained distinction for fossil research in Japan. She is president of the society for constructive birth control and racial progress, and lecturer in palaeobotany at the universities of Manchester and London, being the first woman to be appointed (1909) to the science staff of Manchester University. She has published plays, novels and works on botany. In 1918 she married Humphrey Vardon Roe.

Stork Family of large wading birds (*Ciconiidae*) related to the heron. Protected in some central European countries. It nests on the house tops, feeding on small mammals, reptiles, insects, etc., and acting somewhat as a scavenger. The white stork (*Ciconia alba*) attains a length of 40 ins. The long beak and legs are red. The black species (*C. nigra*), a little smaller, has black plumage except that the lower parts beneath are white. It breeds in N. Europe. Both are migrants, wintering in Africa, the former an occasional visitor to Britain.

Stork's Bill (*Erodium cicutarium*) Herb of the order geraniaceae. Related to the crane's bill, its fern-like leaves have deeply out leaflets growing in pairs rather irregularly along the central rib. The flowers are a bright rosy pink, each rising on a separate slender stem from the flower head, and the seed is pointed and hairy.

Stormont Castle and estate of Co. Down, N. Ireland. Near Belfast, it was bought in 1921 for the headquarters of the Government of N. Ireland. The castle became the official residence of the Governor General and in the grounds the Houses of Parliament and offices for the administration were built. The cost, £500,000, was borne by Great Britain.

Stornoway Burgh and seaport of Lewis in the county of Ross and Cromarty. It is 180 m. from Oban, and is a fishing centre with a good harbour. Lewis Castle was presented to the town by Lord Leverhulme. Pop. (1931), 3771.

Storrs Sir Ronald British administrator. He was born Nov. 19, 1881, and educated at Charterhouse and Cambridge. He entered the Egyptian Ministry of Finance in 1904, and was later Oriental Secretary to the British Embassy in Egypt. In 1917 he was attached to the secretariat of the War Cabinet, and from 1917 to 1920 was Military Governor of Jerusalem, and later Civil Governor of Jerusalem and Judaea. From 1926 to 1932 he was Governor of Cyprus. He received the C.M.G. in 1916, knighthood in 1924 and the K.C.M.G. in 1929.

Stothard Thomas English painter and designer. Born in London, Aug. 17, 1755, his earliest published efforts were designs and illustrations for Bell's *British Poets* and the *Nocturnal's Magazine*. So popular were these that for many years the leading London publishers competed for his services. He exhibited at the Royal Academy, was made a member in 1794, and in 1813 Academy Librarian. He died April 27, 1834.

Stour Name of several English rivers. The most important is in Kent.

It flows from near Hythe, past Ashford and Canterbury to Pegwell Bay. It has an estuary which was protected by castles in Roman times and later. Its length is 40 m.

Another Stour divides Suffolk from Essex. It enters the sea by an estuary at Harwich and is 47 m long. A tributary of the Avon in Oxfordshire, 20 m long, is another river of this name. The fourth Stour rises in Worcester shire and, having passed by Stourbridge and Kidderminster, joins the Severn at Stourport. It is 20 m long. The longest of the Stours is in Somerset, Dorset and Hampshire. It is 55 m long and falls into the Avon at Christ church.

Stourbridge Borough and market town of Worcestershire. It is on the Stour, 12 m from Birmingham and 144 from London, on the G W Rly. Hard ware, fire bricks and glass are manufactured. A canal passes the town. Pop (1931) 18,903.

Stourport River port and urban district of Worcestershire. It stands at the mouth of the Stour where it joins the Severn. It is 14 m from Worcester and is served by the G W Rly and by a canal. Hardware is manufactured. Pop (1931) 5,949.

Stow John English historian and antiquary. Born in London about 1525, the son of a tallow chandler, he became a tailor, but about 1560 took up historical research. His invaluable *Survey of London and Westminster*, 1598, gives a vivid description not only of the buildings, but also of the social conditions and customs prevailing during the previous six centuries. His labours entitled him to an old age of ease, but his only reward was letters patent from James I authorising him to beg. He died April 8, 1606, and was buried in the Church of St Andrew Undershaft.

Stowe Public school in Buckingham shire. It is 3 m. from Buckingham and was formerly the seat of the Duke of Buckingham, and surrounded by extensive grounds and beautiful gardens. The magnificent house was built by Sir Richard Temple about 1660 and was sold in 1921. In 1923 it was opened as a school for boys, and has accommodation for about 600 boys.

Stowe Harriet Elizabeth Beecher American writer. The daughter of Lyman Beecher, a Presbyterian minister, she was born at Litchfield Conn., June 14, 1811, and married Rev C E Stowe in 1836. She lived many years near Kentucky, a slave state, and the horrors she saw there led her to write *Uncle Tom's Cabin*, 1851-52. The anti-slavery feeling this work aroused was partly responsible for the Civil War. The book has been dramatised and translated into more than twenty languages. Mrs Stowe also wrote *Sunny Memories of Foreign Lands*, and stirred up a great deal of controversy in 1859 by her *Lady Byron Vindicated*. She died July 1, 1896.

Stowmarket Market town and urban district of Suffolk. It is 12 m from Ipswich and 80 from London on the river Gipping and on the L N E Rly. There is a trade in farm produce, and fertilisers are manufactured. The restored church has an organ by Father Smith. Pop (1931) 4,296.

Stow-on-the-Wold Market town and urban district of Gloucestershire. It is 20 m from Cheltenham and 89 from London on the G W Rly. A place of singular charm, it has

an old church and a cross in the large market place. Fairs are held. Pop (1931) 1,266.

Strabane Urban district of Co Tyrone, N Ireland. It is on the river Foyle 14 m from Londonderry and 161 from Dublin, and is reached by railway. It has an agricultural trade and other industries. The town has some shipping and a canal connects it with the estuary of the Foyle. Pop (1926) 5,156.

Strabo Greek geographer. He was born in Asia Minor about 63 B.C. He travelled a good deal, but was living in Rome when he died about A.D. 20.

Strabo's *Geographica* deals with the geography of Europe, Asia and Africa and is of high value. The author takes much from earlier writers, but much also is from his personal experience. His *History*, from 146 B.C. to the death of Julius Caesar, has come down to us only in fragments.

Strachey Giles Lytton English essayist and biographer. Born March 1, 1880 son of Sir Richmond Strachey, the Anglo-Indian administrator (1817-1908) he was educated at Trinity College, Cambridge. His first book, *Landmarks in French Literature*, appeared in 1912, and was well received. In 1918, with *Eminent Victorians*, he immediately became famous. With his vivid, incisive and often caustic language, and his penetrating wit, Strachey created a new style in biographies. His other publications were *Queen Victoria*, 1921, *Books and Characters*, 1923, *Pope*, 1925, *Elizabeth and Essex*, 1928, *Portraits in Miniature* 1931, and a few essays. He died Jan 21, 1932.

Stradivarius Antonius Italian violin maker. He was born about 1644 at Cremona, where he raised the art of violin making to its highest perfection. A pupil of Nicolas Amati, he improved on his master's work by modifying and beautifying the designs, and especially by using a wonderful varnish, the secret of which has been lost. His instruments which are all known by name, such as "la Pucelle" "Vieuxtemps" and "the Cessot," to day command enormous prices. He also made excellent violas and cellos. He died Dec 18, 1737.

Strafford Thomas Wentworth, Earl of English statesman. He was born in London, April 13, 1593, eldest son of Sir William Wentworth, and educated at Cambridge. After supporting the Petition of Right in 1628 he transferred his sympathies to the side of Charles I (q.v.), becoming one of his chief advisers. Created Viscount in 1628 and earl in 1639, he was appointed Lord Deputy of Ireland in 1632. He changed the country from anarchy to order and prosperity. Accused by the Long Parliament of high treason during the Scottish Rebellion of 1640, he was beheaded in the Tower, May 12, 1641.

Strain and Stress Terms applied to the condition of a body, either solid or liquid, when its form or volume undergoes a change (strain) by the action of a system of forces known as a stress. These forces always act in a pulling or pushing direction. In a shearing stress the force of compression is met by an elongation at right angles, and the rigidity of a solid is the resistance offered to this stress.

Straits Settlements British crown colony on or near the Malay Peninsula. It includes Singa

pore (with the Cocos Islands and Christmas Islands), Penang (with Wellesley and the Dindings), Malacca, and Labuan. It is administered by a governor aided by executive and legislative councils. The Peninsula areas are connected by railway. They have rich soil with a hot wet climate and export tin, rubber, copra, spices, sago, pine apples, etc. Christmas Island is an important source of phosphate. Singapore is the chief port and the capital. Area 1535 sq m. Pop (1931) 1,113,992.

Strand Word meaning the edge of the sea or of a river. It is used particularly of the street in London that was once the strand of the Thames. It runs from Temple Bar, where it is a continuation of Fleet Street, to Charing Cross. In it are Somerset House, King's College, the Royal Courts of Justice, Australia House, Bush House, the Savoy Hotel, several theatres and two churches, St Clement Danes and St Mary le Strand, both on islands in the street.

Strang William, British painter, engraver and etcher. Born in Dumbarton, Feb 13, 1859, he went to London in 1875, studying for six years under Legros at the Slade School. He was one of the original members of the Royal Society of Painter-Etchers. Hardy and Kipling were among the subjects of his many portrait-etchings. His collected etchings number over 700. Among his notable engravings are "St Jerome," "A Woman Washing her Feet" and "The Bachelor's End." He was elected R.A. (engraving) in 1921, and died April 12, 1921.

Strangford Lough or inlet on the east coast of Northern Ireland. It enters County Down for about 20 m., cutting off the Ards Peninsula from the rest of the country. At its entrance and facing each other are the little towns of Strangford and Portaferry.

The Irish title of Viscount Strangford was borne by the family of Smythe from 1625 to 1869, when it became extinct. Its most notable holders were Percy, the 6th viscount (1780-1855) who was a diplomat, and his son, George, the 7th viscount (1818-57) who was an M.P., 1841-52. He was a member of the Young England Party and is described in *Coningsby*.

Strangles Disease of horses, especially young ones. It is a form of fever. The symptoms are coughing, swelling of the glands and a discharge from the nose.

Stranraer Burgh and seaport of Wigtownshire. It is 59 m. from Ayr and 103 from Edinburgh, on the L.M.S. Rly. There are ruins of a 10th century castle. Stranraer has a good harbour on Loch Ryan, and there is a regular service of boats to Belfast and Larne. Pop (1931) 6420.

Strasbourg Capital of Alsace-Lorraine. It is situated on the Ill, at its junction with the Breusch, and is an historic city of much antiquarian interest. Chief among its ancient buildings is the Gothic cathedral and there is a university, founded in 1567.

Manufactures are beer, locomotives, leather, etc., and there is an extensive printing industry. A famous table d'hôte, pâté de fois gras, is prepared here. Since the Great War Strasbourg has become an important port. The city has changed hands several times since it was captured by the Germans in the 10th century. France lost it to Germany in 1870 after a

severe siege, and it was restored to France after the Great War in 1919. It has a broadcasting station (345 M., 115 kW). Pop (1931) 181,465.

Strategy Art of military, naval and air movements in war. The word is generally used to denote the conduct of a campaign as a whole. See *Tactics*.

Stratford District of London, part of the borough of West Ham. It is on the Lea, 4 m. from the city, and is an important junction on the L.N.E. Rly. There are railway shops, chemical works, breweries, furniture making and many other industries. Thornton Fields is an athletic ground. Across the Lea is Bow, hence the Stratford-atte-Bowe of Chaucer's day.

Stratford City of Ontario. It stands on the river Avon, 88 m. from Toronto. The C.N. Rly. has repairing shops here. There are some manufactures. Pop (1931) 17,742.

Stratford-on-Avon Borough and market town of Warwickshire. It is 24 m. from Birmingham and 103 from London, by the G.W. Rly., it also has a station on the L.M.S. Rly. It is chiefly famous as the birthplace of Shakespeare, and this association attracts many visitors, especially during the annual festival week. Its buildings include the fine church of Holy Trinity with the poet's grave, the house in which he was born, and the guildhall, long used as a grammar school, with its guild chapel adjacent. The town hall dates from the 18th century. Other buildings are Harvard House, and some half-timbered houses. The museum is in an old house next to the gardens of New Place, once Shakespeare's home. The Shakespeare Memorial Theatre, rebuilt after a fire, was opened in 1932. There is a fine bridge across the Avon called Clopton Bridge, and there is a fine fountain in the town. Stratford has an agricultural trade, and every Oct. the Hop Fair is held here. Pop (1931) 11,616.

Strathaven Market town of Lanarkshire. It stands on the river Avon, 14 m. from Glasgow, on the L.M.S. Rly. There are ruins of a castle and textiles are manufactured.

Strathcona District of Edmonton, Canada. It stands on the Saskatchewan river to the south of Edmonton, with which it was included in 1912. Here is the University of Alberta. See *EDMONTON*.

Strathcona and Mount Royal Baron Canadian statesman and railway magnate. Donald Alexander Smith was born Aug. 6, 1820, and emigrating from Scotland to Canada when 18, entered the service of the Hudson's Bay Co. In conjunction with his cousin, George Stephen (later Lord Mount-Stephen) William Van Horne, Thomas Shaughnessy (later Lord Shaughnessy) and a few other men of vision, he built the Canadian Pacific Railway. He was knighted in 1886, made High Commissioner for Canada in London in 1896, and raised to the peerage in 1897. He died Jan. 21, 1914.

Strathmore District of Scotland. It is a great valley stretching for about 100 m. through the counties of Perth and Angus.

The title of Earl of Strathmore and Kinghorne has been held since, 1677 by the family of Lyon, later Bowes-Lyon. Claude George Bowes-Lyon, the 14th earl, was the father

of Elizabeth, who became the wife of the Duke of York. The earl's seat is Glamis Castle and his eldest son is called Lord Glamis.

Strathpeffer Watering place of Ross and Cromarty. It is 5 m. from Dingwall, on the LMS Rly and is an airport. It is noted for its medicinal springs and magnificent scenery.

Stratification Term in geology. It is applied to the arrangement of sedimentary rocks in beds or strata. Derivative rocks, such as sandstone, conglomerate clays and shale have been deposited by water under varying conditions which are indicated by the character of the stratification. The strata by lateral pressure may be tilted or folded.

Stratum In geology an individual layer or bed in a sedimentary rock, such as a limestone sandstone, shale or coal. Strata may be arranged in various ways from horizontal to vertical, the direction of inclination being known as the dip, or the beds may be folded by lateral pressure.

Stratus Low lying cloud. It forms a sheet of mist and appears as a horizontal layer of varied thickness. Clouds of this character act as heat-screens by day, and at night prevent the loss of heat radiated from the earth.

Strauss Johann. Austrian composer and conductor. Born in Vienna, March 14, 1804 and famous for his waltzes, he made his name as the greatest composer of dance music of the day with the *Tauberl Walzer*, 1820. He formed his own concert band, which at one time contained over 200 performers and toured Europe, being noted for his quiet and effective conducting. He died Sept 25, 1849.

His son Johann (1825-99) was the composer of the most famous of all waltzes, *The Blue Danube*.

Strauss Richard. German composer. Born at Munich June 11, 1864, he began playing the piano at four and composing at six. His principal works are *Elektra*, *Ariadne auf Naxos*, *Don Juan*, *Tod und Verklärung*, *Tyl Eulenspiegel*, *Don Quixote*, *Salome*, *Also sprach Zarathustra*, *Der Rosenkavalier*, and *Helen of Egypt*.

Stravinsky Igor Fedorovich. Russian composer. Born near St. Petersburg, Jan. 17, 1882. He aroused admiration by his originality and adverse criticism by his departure from all accepted musical canons. He first studied law, but on the advice of Rimsky Korsakov, devoted himself to music. His first ballet, *The Firebird*, created a sensation by the extreme novelty of its construction. Later followed *Petrushka*, *Le Sacre du Printemps*, *Renard*, *Les Noces*, *I Mageses*, *Oedipus Rex*, and *Le Rossignol*.

Strawberry (*Fragaria*). Perennial herb belonging to the natural order Rosaceae. It is valued for its delicious fruit. The small, wild strawberry (*F. Vesca*) is a native of Britain, and is one of the species from which the cultivated varieties have originated. Although strawberries may be propagated from seed, the usual method is by runners.

Strawberry Hill Suburb of London. It is on the Thames 12 m. from the city, on the S. Rly. Here is the villa in which Horace Walpole lived from 1747-97 with the garden laid out by him.

Streamline Term used for a line corresponding to the course taken by a stream of fluid or air. Motor-cars built for speed are constructed so that the surfaces follow streamline lines, thus offering a minimum resistance to the air. Racing aircraft are streamlined for the same reason.

Streatham Suburb of London. It is 6 m. from the city and has three stations on the S. Rly. It is also served by tramway and motor omnibuses, and is in the borough of Wandsworth. Streatham Common is an open space covering over 60 acres. The districts of Streatham Hill and Streatham Common are new.

Streatley Village of Berkshire. It is a bathing centre on the Thames, 45 m. from London, and has a station, Goring and Streatley, on the G.W. Rly. A bridge, built in 1923, unites the two places.

Street Urban district of Somerset, 14 m. from Bridgwater, on the G.W. Rly. Boots and shoes are made here. Pop. (1931) 4453.

Stresemann Gustav. German statesman. Born May 10, 1875, and educated at the universities of Berlin and Leipzig, he entered the Reichstag as a National Liberal in 1907 and in 1917 was leader of his party. In 1923 he became Chancellor and held the post of Foreign Minister simultaneously. He worked energetically for peace, and was largely instrumental in bringing about the Locarno Pact in Oct., 1925, and the entrance of Germany into the League of Nations. His efforts gained him a Nobel Prize for Peace in 1926. He died Oct. 3, 1929.

Strickland Baron. British administrator. Gerald Strickland, born in Malta, May 24, 1861, son of Captain Walter Strickland, was educated at Trinity College, Cambridge, graduating with honours in Law in 1887. Assistant Secretary of Malta, 1888, he was made Chief Secretary, 1889, and was successively Governor of the Leeward Islands, 1902-4, Tasmania, 1904-9, Western Australia, 1909-13, and New South Wales, 1912-17. Since 1927 he has been head of the Ministry and Minister of Justice in Malta, where he came into conflict with the Roman Catholic Church. He was made a baron in 1928.

Stricture Unnatural contraction of a mucous canal, such as the urethra, oesophagus or an intestine. It is commonly due to inflammation and prompt medical attention is advisable.

Strike Combination among employees in industry or trade to cease work in order to rectify a grievance or enforce a demand. Strikes are commonly organised by trade unions who arrange for distribution of strike pay while the dispute lasts.

In the 19th century, with the growth of the industrial system, strikes became very frequent. In 1880 there was a prolonged strike of dock labourers in London, in 1893 the coal miners ceased work, and in 1911 the railway men did the same. There were many other strikes before the Great War and one or two during its progress though others were prevented by arbitration. In 1919 there was another strike of railwaymen in Great Britain, and in 1921 the coal miners struck work as they did again in 1925. In the winter of 1935-36 another national coal strike was narrowly averted. In Australia, where strikes were also

very frequent, arbitration was made compulsory, as it was in New Zealand, but the system was not a success. In Great Britain strikes have usually been free from serious violence, but in other countries one or two approximated to civil war, e.g., at Pittsburgh in 1892, Chicago in 1894, and Spain in 1934.

In 1926 for the first time in England although it had been tried in France and Sweden, there was a general strike, declared by the trade unions to support the coal miners. The government took prompt steps to safeguard the supply of food and such essential services as sanitation and water supply, and in a few days the strike collapsed, although the miners remained out until nearly the end of the year. In 1927 the Trade Disputes Act was passed making a general strike illegal.

Strindberg Johan August Swedish author. Born Jan 22, 1849 at Stockholm, the poverty of his early days was possibly responsible for much of the cynicism which later brought him unhappiness. His first great drama, *Master Olof*, appeared in 1878. The stories published later under the title of *Married* led to prosecution. He was, however, acquitted. Two tragic marriages did not tend to give him a more cheerful outlook and one morbid book after another appeared. He wrote altogether 53 plays, many stories and treatises on history, the theatre, philosophy and miscellaneous subjects. He died Mar 14, 1912.

Stroke An attack of paralysis. The word is also used to describe the rate at which rowers use their oars and the member of a rowing crew who sets the pace for the others.

Stromboli One of the Lipari Islands. To the north of Sicily, it is famous for its volcano which, being continuously, though, as a rule, mildly active, is known as the "lighthouse of the Mediterranean." The volcano has an altitude of 3035 ft.

Stromness Seaport and summer resort in Pomona, the largest of the Orkney Islands. It lies in a bay 15 m. W S W of Kirkwall and has a good harbour. Herring fishing, distilling, ship repairing and rope making are carried on.

Strontium Metallic element having the symbol Sr and atomic weight 87.63. Strontium occurs as a sulphate in the mineral celestine and as a carbonate in strontianite. It is a hard yellow malleable metal which melts at red heat and oxidises in the air. Its compounds are used in pyrotechny, medicine and in the beet sugar industry.

Strood District of Kent. It is on the left bank of the Medway, opposite Rochester, on the S Rly. It consists of two parishes, Strood intra and Strood extra.

Stroud Market town and urban district of Gloucestershire, 12 m. from Gloucester and 102 from London, by the G W Rly. It stands at the junction of the Stoad and Frome rivers on a branch of the Thames and Severn Canal and is a noted centre for woollen manufactures. It has numerous cloth mills, iron foundries, sawmills, breweries and dye-works. Population 8360.

Stroud, New South Wales, 113 m. by rly. from Sydney, lies near the Copeland Gold Field and has a population of about 1100.

Stroud Green Suburb of N London lying between Highgate and Finsbury Park, on the L.N.E.

Rly. It belongs to the borough of Hornsey, and is 3½ m. from King's Cross.

Strutt Jedediah English inventor. Born in Blackwell, Derbyshire, July 28, 1726, he made a fortune by the invention of a machine for the production of ribbed hose and by planning many devices for improvements in spinning cotton. He died May 6, 1797.

Strychnine Highly poisonous alkaloid obtained from the seeds of *Nux-vomica*, *St Ignatii*' beans and other species of the genus *Strychnos*. It is a white non-odorous crystalline powder, slightly soluble in water, and having an intensely bitter taste.

Strychnine salts are more soluble, and its solubility in water is increased by acids. In its poisonous action, it affects the spinal cord, producing convulsions, but when used medicinally is a cardiac and respiratory stimulant and an aid to weak digestion.

Stucco Smooth, hard plaster applied to the walls of buildings, usually those of brick, to imitate masonry or for decorative work. It consists of three or four parts of fine sand mixed with one part of hydraulic lime.

Stud Establishment for horse-breeding. The place where stallions and brood mares are kept is generally called a stud-farm. Pedigrees of thoroughbred horses have been systematically filed since 1791 and are published at intervals in stud-books. There is also a stud-book for pedigree dogs which has been published since 1874 by the English Kennel Club.

Studio Room or building used as a workshop of an artist or photographer. In a painter's studio the question of lighting is important, usually the windows have a northern or eastern aspect, as the light is less variable, and the size and height of the windows also have to be considered.

Studley Royal Former seat of the Marquess of Ripon. About 3 m. from Ripon, it is situated in a fine park which also contains Fountains Abbey. The grounds were laid out in the 18th century by John Aislabie, and include Dutch and Italian gardens.

Sturdee Sir Frederick Charles Doveton British admiral. Born at Charlton, Kent, June 9, 1859, he entered the navy in 1871. He was made captain, 1899, rear-admiral, 1908, and Admiral of the Fleet, 1921. He early saw service in Egypt and elsewhere, but his name is largely associated with the World War. From 1914 to 1915 he was chief of the War Staff, and on Dec 8, 1914, as Commander-in-Chief in the South Atlantic and Pacific he defeated a German squadron off the Falkland Islands. He was in command of the 4th battle squadron at the Battle of Jutland and was created a baronet in 1916. From 1918 to 1921 he was Commander-in-Chief at the Nore. He died on May 7, 1925.

Sturgeon Genus of ganoid fishes of the family *Acipenseridae*, order *Chondrostei*. The common sturgeon (*Acipenser sturio*) has a long narrow body and snouted head. The skin is provided with five longitudinal rows of bony shields. The length of an adult fish is from 6 ft. to 9 ft. In England the sturgeon is traditionally a roval fish belonging, when captured in a river, to the king. A larger variety (*A. huso*) attaining 25 ft. is found in the Black and Caspian Seas, the roe being made into caviare and the air-bladder into isinglass.

Sturry Village of Kent. It is near Canterbury, 73½ m from London, on the S Rly. Here is a manor house, or court, dating from the 16th century, which is now the junior school of King's School, Canterbury. It was at one time the residence of Viscount Milner, whose widow presented it to the school.

Stuttgart City of Germany, the capital of the republic of Württemberg. Situated about 2 m from the Neckar, 127 m S S E of Frankfurt and 190 m by rail W N W of Munich, it derives its name from a stud farm of the early counts of Württemberg. It has many fine public buildings, including a polytechnic and library with a collection of 7000 Bibles. There are also numerous former royal seats and palaces in the neighbourhood. It ranks, after Leipzig, as a centre of the German book trade. Other industries are textiles, breweries, chemicals, pianos, chocolate and artists' colours. The city has a broadcasting station (360.5 M., 60 kW). Pop. (1933) 415,028.

Stye A small abscess on one of the hair follicles of the eyelid. When the soreness is first felt the treatment is to pull out an eyelash at the point of greatest tenderness. If the styo forms in spite of this preventive measure, bathe with warm boracic lotion (made by dissolving one teaspoonful of boracic powder in 1 pint of boiling water) and apply yellow mercury ointment.

Stylites Simeon, Christian saint and ascetic of the 5th century. He lived on the top of a pillar 72 ft high and only 4 ft square at the top. Here he spent thirty years, preaching to the crowds that gathered around him. The fame of his sanctity attracted pilgrims from all parts. He died A.D. 459, at the age of 72.

Styr River of Galicia, Poland. It rises near Brady, flows north past Lutsk and Rafalovka and, after a course of about 250 m, joins the Pripiet a little east of Pinsk. Two battles in the Great War were fought on the Styr between the Russians and combined Austro-German forces. The first, fought in Oct., 1915, after the second Russian withdrawal from Lutsk, had no definite result. In the second a Russian offensive under Lech in June/July, 1916, was successful, over 12,000 German and Austrian prisoners being captured.

Styria A division of the Austrian republic, formerly an Austrian duchy and crown land. Its present area is 6323 sq m over 2300 sq m in the south having been transferred to Yugoslavia after the Great War. Its capital is Graz. A mountainous region and forested over half its area, it has great mineral wealth. Large quantities of iron are produced and worked and salt, coal, graphite and zinc are also mined. The Styrian Alps stretch to the N E and traverse much of the country. The principal peak is the Schneeberg (6810 ft). Pop. (1923) 978,845.

Styx In classical mythology the river of hate. It was a poisoned stream across which Charon ferried the souls of the departed on their transference to Hades.

Suakin Port of the Anglo-Egyptian Sudan. It is situated partly on an island in the Red Sea and partly on the mainland. It formerly had some commercial importance, but has been largely superseded by Port Sudan. 36 m distant with which it is connected by rail. Suakin was occupied by the British as a strategic point after the Mahdist rising, and several battles were fought in the

neighbourhood. The name is a battle honour for several British and Indian regiments.

Subaltern Term applied to all commissioned officers in the army below the rank of captain. The name is officially recognised by its use in connection with duty notes, a "subaltern of the day" being regularly appointed in regimental orders.

Subconscious Psychological term for ideas and mental processes present in the mind but of which the subject is unaware. Such phenomena as loss of memory, dual personality, somnambulism, trance states and some involuntary actions, have been explained in terms of the Subconscious, which should be carefully differentiated from the Unconscious (q.v.).

Submarine A vessel which can be navigated on the sea surface, but is capable of being submerged and of moving under water without outside assistance. Its principal weapon is the torpedo, but it has guns for use when on the surface. It is also fitted with a lens and mirror system called a periscope which operates through a long tube and enables the occupants to scan the horizon during a period of submersion.

There are various classes of submarines, some of such size and power that they are to all intents and purposes submersible cruisers. Others are more nearly destroyers, and as such are capable of sinking the largest warships. Five British battleships and five cruisers are known to have been sunk by German submarines in the Great War, and the damage done by them to British mercantile shipping was almost incalculable.

The construction of submarines, more particularly in the matter of machinery for submerging and rising to the surface, is necessarily very complicated and they are handled in the British Navy by a separate and specially trained service. As a rule sufficient compressed air is carried to enable submersion to be prolonged for 60 hours. The surface speed of a submarine is about 17 knots, the under water speed about 10 knots.

Repeated disasters to submarines, as e.g. the loss of the British submarine M2 in 1931, and opposition to their illegal use in warfare, have led to a movement for their abolition, which is supported by Great Britain.

Subpoena Latin phrase meaning "under a penalty". It is used in English law to denote a process or writ compelling the attendance of a party, more particularly a witness, in a court of law. It takes the form of a writ in the name of the sovereign insisting upon attendance without regard to business or other preoccupation. If neglected, a fine or committal to prison may follow.

Subsidy Literally, a grant in aid (Latin, *subsidium*, aid). Formerly it was a term applied to parliamentary grants to the Crown, but it is now used chiefly to denote assistance lent either by one Power to another in cash or arms, or by the State to various trades or industries. During the Napoleonic Wars Great Britain furnished subsidies to foreign Powers in order to enlist their assistance against the French, and in later times many Asiatic and African rulers have received subsidies to ensure their friendliness and good behaviour. From time to time various British industries, coal mining, dyeing and others have been subsidised. Shipping companies carrying mails or supplying auxiliary cruisers have regular subsidies.

Succession Duty In Great Britain a duty payable by persons who inherit real estate, or persons who inherit personal estate under a settlement. It is equivalent to the legacy duty, and is at the same rates. See LEGACY DUTY.

Suck River of the Irish Free State. Rising in a lake in Connanght it flows between Co. Roscommon and Co. Galway until it joins the River Shannon below Ballinasloe. It is 60 m. in length.

Sucker Gardening term applied to a shoot coming from a plant at or below the ground level. Carefully detached and transplanted it will sometimes serve the same purpose as an ordinary cutting.

Sucking Fish Name given to the Remora, which has a sucker-disc on its head, and to other fishes which have suckers formed by the union of the ventral fins. With these suckers the fish attaches itself to rocks and ships, and sometimes to turtles and sharks. About seven species are found in British waters.

Sudan Region of North Africa. It includes the Anglo-Egyptian and the French Sudan. The rule of Egypt in the former was interrupted in 1882 by the Mahdist revolt, and only after the Battle of Khartum in Sept., 1898, was the country recovered and placed by a Convention under nominally Anglo-Egyptian, but practically British, administration. There are 15 provinces governed by British officers of the Egyptian Army, or by British officials of the Sudan Political Service. The capital is Khartum. The area is about 1,008,100 (1931) sq. m. Pop. 5,605,848.

The French Sudan was formed in 1904 from the territories of Senegambia and the Niger, less the Senegal Protectorate. It was given its present name by decree of Dec. 4, 1920. Part of Upper Volta was added in 1933. The capital is Bamako. The area is about 380,557 sq. m. Pop. (1933) 3,568,825.

Sudbury Borough of Suffolk. Situated on the Stour, close to the Essex boundary, it has three old churches and a grammar school originally built in 1491. The principal industries are manufactures of coconut matting, bricks, etc. Formerly it was a famous centre of the woollen industry of the Flemings. The painter, Gainsborough, was a native. Pop. (1931) 7007.

Sudbury Town of northern Ontario, Canada, 443 m. W. by N. of Montreal. It has stations on the C.P. and C.N. Ryse. It is connected by branch lines with districts containing large deposits of copper and nickel which are smelted on the spot. Pop. (1931) 18,618.

Sudd Mass of floating vegetation. It is sometimes 20 ft. thick and so dense as to be able to support the weight of an elephant. It occurs on the Upper Nile and completely blocks navigation unless a channel is cut and kept open.

Sudeley Village of Gloucestershire. Here is Sudeley Castle, built in the 14th century by Thomas Boteler, the Lord Sndcloy of a former creation. It was subsequently acquired by the fourth husband of Catharine Parr, the widow of Henry VIII. Catharine married Lord Thomas Seymour of Sudeley, a former lover, very soon after Henry's death in 1547 and died in childbirth at Sudeley Castle the following year. It was restored in the 19th century and is still a place of residence.

Sudermann Hermann. German writer. He was born at Matzinken, East Prussia, on Sept. 30, 1857, and educated at Tilsit and the universities of Königsberg and Berlin. After a short period of journalism, he started writing novels, the best known of which are *Im Zwielicht*, *Frau Sorge*, *Der Katzensteg*, *Das Hohelied*, *Purzelchen*. While these showed keen powers of observation, it is to his plays that he owes his fame. *Die Ehre*, appearing in 1880, secured him instant renown. This was increased by several others, notably by *Magda*, his masterpiece, in 1892. He died in Berlin, Nov. 22, 1928.

Suetonius Gaius Suetonius Tranquillus. Roman historian and critic. The exact date of his birth, his birthplace and his parentage are unknown, but he was a contemporary of the emperors Domitian, Trajan and Hadrian. The younger Pliny, on being appointed proconsul of Bithynia, took Suetonius with him, and subsequently described him to Trajan as the most upright and learned among men. He later became private secretary to Hadrian, and, on losing the post, devoted himself to literature, writing the *Lives* of the first twelve Caesars.

Suez Gulf at the northern end of the Red Sea between Egypt and the Sinai Peninsula. It is 190 m. long and has an average breadth of 30 m. At the head of it lies the town of the same name which is connected by railway with Cairo and Port Said, and with Port Ibrahim at the southern entrance to the Suez Canal. Pop. 40,523.

Suez Canal Artificial waterway connecting the Mediterranean and Red Seas. Projected by Ferdinand de Lesseps it was started in 1859 and opened on Nov. 17, 1869, having cost about £17,000,000. In 1875 Great Britain secured a controlling interest in the canal through the purchase by Lord Beaconsfield of the shares of the Khedive of Egypt. The investment, apart from political considerations, has been a most profitable one. The canal is 90 m. long and now has a minimum depth of 33 ft. and a minimum width of 198 ft. Ships of 27,000 tons with searchlights can navigate the canal in 15 hours.

During the Great War the Turks made two determined attempts to reach the canal, in February and March, 1916, but on both occasions were repulsed and finally retreated across the Sinai Peninsula.

Suffocation Death by obstruction to respiration caused by any means other than by strangulation. It may be due to the closing of air passages by tumours, to the introduction of foreign bodies into the larynx, to pressure on the chest in a crowd, or by falls of earth in tunnels, sandpits, etc. It occurs among children of the poor, owing to the practice of parents sleeping with their infants, which in Germany is illegal.

Suffolk County of England, bounded on the east by the North Sea, on the north by Norfolk, on the south by Essex and on the west by Cambridgeshire. Its area is 1475 sq. m. It is divided into two administrative counties, each with its county council. The county town is Ipswich. Other important places are Lowestoft, Bury St. Edmunds, Beccles and Stowmarket. Felixstowe and Southwold are favourite watering-places. It is mainly an agricultural county, but a considerable amount of horse-breeding is carried on and the Suffolk Punch (q.v.) is famous. East

Suffolk has three Parliamentary divisions, Eye, Lowestoft and Woodbridge. West Suffolk has two, Bury St Edmunds and Sudbury.

Prior to the Norman Conquest Suffolk was part of East Anglia and exposed to frequent Danish raids. Sea fights took place off Lowestoft (1605) and Southwold (1671). Pop (1931) 313,567.

Suffolk Earls and Dukes of Titles borne by the families of Ufford, Polo, Brandon, Grey and Howard. The present earldom dates from 1603, when Thomas Howard, son of the Duke of Norfolk, was created earl. In his youth he fought against the Spanish Armada, becoming an admiral in 1599. He was Lord Chamberlain from 1603 to 1614. Charles Henry George Howard, the present earl, was born March 2, 1906, and succeeded his father as 20th earl in 1917. His full title is Earl of Suffolk and Berkshire.

Of the Dukes of Suffolk, the most famous were William de la Pole (1396-1450) who served with Henry V in France and was taken prisoner by Joan of Arc in 1429, and Charles Brandon (1484-1545), a favourite of Henry VIII.

Suffolk Punch Powerful breed of horses, used chiefly for agricultural purposes and peculiar to Suffolk. Its distinguishing characteristics are a round barrel and short legs, the name being possibly a corruption of bunch.

Suffragan Ecclesiastical term. Strictly speaking all provincial bishops are suffragans as being subordinate to or assistants of the metropolitan. The term is now used in England to denote coadjutor or assistant bishops. A suffragan is appointed in dioceses which have become inconveniently large for single episcopal administration. There are now over thirty suffragan bishops of the Churches of England and Wales.

Suffrage By the Representation of the People (Equal Franchise) Act, 1928, men and women were first put on an equal footing. The following are the conditions under which they can be registered as Parliamentary electors: the individual must be 21 years of age, and have resided for three months in any one constituency or contiguous constituency in the same Parliamentary borough, or have occupied for business purposes land or premises of £10 annual value for the same period.

The qualifications are now the same for both sexes for the Local Govt franchise.

Degree holders are entitled to be registered for university constituencies.

Great extensions of the suffrage have taken place since 1832 when the first Reform Act was passed. Other extensions took place in 1869 and 1885, and in 1918 women were first admitted to the franchise (*q.v.*).

Sufism A form of mysticism within or emanating from Islam, but in some ways antagonistic to it. It was founded in the 9th century and its followers were called Sufis or "men of wool" from their monkish garb. The original object of Sufism was to deliver men from slavery to the passions by destroying the power of the flesh and uniting souls to God by purely spiritual ties. It has flourished chiefly in Persia, and nearly all the great Persian poets, notably Hafiz and Sadi, have been Sufis.

Sugar Generic term for a group of carbohydrate food stuffs present in plant tissue and in milk. The sugars contain carbon, hydrogen and oxygen, and are sweet crystalline

substances very soluble in water. There are two groups: the monosaccharoses, having six carbon atoms, include glucose or dextrose found in grape juice and honey, and levulose also present in honey; the disaccharoses, having twelve carbon atoms, include maltose in malt lactose in milk and sucrose, the sugar of commerce, present in the sap of the sugar cane and the sugar beet. The latter now producing a large share of the world's supply of sugar.

In Great Britain the beet sugar industry within recent years has been fostered by a state subsidy or bounty. The by-products of both the sugar cane and beet industries are of value and include the waste as fuel and cattle food molasses, and the well known spirit, rum.

Suggestion The indirect introduction of a thought or impulse into the mind of another (*Lat sub, under and gerere to carry*). A suggestion may be purely casual and innocent but the term is frequently used to denote the act of exercising control over a hypnotised subject by communicating some belief or impulse by means of words and gestures, sometimes with malevolent intent. Beneficially employed suggestion in the form of faith healing has wrought remarkable cures, and phenomena otherwise inexplicable, have been attributed to it, notably the occurrence of stigmata (*q.v.*).

Suicide Act of killing oneself. In English law it is a felony, and was formerly followed by the barbarous practice of burying the deceased at cross roads, with a stake driven through the body. At coroner's inquests a verdict of suicide while temporarily insane is commonly returned where the act has been committed as the result of mental derangement, *felo de se* being applied to cases in which obviously sane people have killed themselves. Statistics of suicides vary greatly according to contemporary circumstances, epidemics being fairly frequent. Suicides are steadily increasing in Europe and America. In England and Wales there are approximately between 4999 and 5009 suicides every year.

Suir River of the Irish Free State. Rising in the mountains of Tipperary, it flows past Thurles, Cashel, Clonmel and Carrick until it falls into Waterford harbour. Salmon are found in the river, which is about 90 m in length.

Sukkur. See **INDUS**

Sulby Village of the Isle of Man. It is 20 m from Douglas and is known for the woollen goods which have been made here for a century. The industry was established by two Yorkshiremen. Sulby Glen is a beauty spot.

Sulgrave Village of Northamptonshire about 400 ft contains the old manor house occupied by the ancestors of George Washington. The house was bought by the British Peace Centenary Committee and presented to the Sulgrave Institution (office, 1 Central Buildings Westminster, S.W.1) which, in 1914 opened it as a museum of Washington relics.

Sulina Town, port and naval base of Rumania. Situated on the Sulinna, one of the lower branches of the Danube, with a fairway to the Black Sea, it is about 120 m N.E. of Constanza and has a population of about 8000. It was bombarded by the Russians in the Russo-Turkish War of 1877. There is a considerable export trade in grain.

Sulla Lucius Cornelius Roman commander and dictator Born 138 B.C. of a patrician family, he became quaestor in 107 under Marius in Africa, and brought about the surrender of Jugurtha. In 93, after distinguishing himself greatly in the Teutonic Wars (104-101), he was praetor in Cilicia, returning to Rome in 91 after restoring Ariobarzanes to the throne of Cappadocia. Coming into political conflict with Marius he was expelled from Rome, but returned at the head of his legions and overthrew the Marian party. From 87 to 83 he conducted the Mithridatic War. In 82 he became dictator and introduced many reactionary changes. Retiring in 79 he indulged in reckless debauchery, dying in 78 B.C.

Sullivan Sir Arthur Seymour English composer Born in London of Irish parentage on May 13, 1842, as a boy he was chorister in the Chapel Royal. He studied music in Leipzig under Moscheles and Reinecke. He wrote many popular songs—including *The Lost Chord*—cantatas, hymns, and other sacred and secular music. He is best remembered through his collaboration with Sir W. S. Gilbert in the composition of light operas, which had, and still have, an enormous vogue, owing to their humorous librettos and tuneful music. The favourite ones are *Trial by Jury*, *H.M.S. Pinafore*, *The Pirates of Penzance*, *Iolanthe*, *The Yeomen of the Guard*, *Patience*, *The Mikado* and *The Gondoliers*. Sullivan died on Nov. 22, 1900.

Sullivan John Lawrence American prize-fighter Born Oct. 15, 1858, he won the heavyweight championship by defeating Jake Kilrain in 1889, and lost it to James Corbett in 1892. He died Feb. 2, 1918.

Sully Maximilien de Bethune, Duc de French statesman. He was born on Dec. 13, 1560. He was famous as the minister and counsellor of Henry IV of France. He was a Huguenot, but managed to escape the massacre of St. Bartholomew. On appointment, his first task was the gigantic one of repairing the ruinous financial condition of the kingdom. In this he had a great measure of success. In 1601 he became grand-master of artillery, receiving his dukedom in 1606. After Henry IV's assassination, he was obliged to resign. He soon retired from public life, devoting himself to writing his valuable memoirs. He died on Dec. 22, 1641.

Sulphates Name given to a series of salts formed by the action of sulphuric acid upon various bases. Most sulphates are soluble in water, but barium sulphate is insoluble in water and acids, and the sulphates of lead, calcium and strontium are only slightly soluble. Common examples are Epsom salts, Glanber salts, and gypsum.

Sulphonic Acids Name given to a group of compounds formed by the action of strong sulphuric acid upon benzene (benzene sulphonic acids) or other organic compounds (ethyl and methyl sulphonic acids). These acids play an important part in rendering organic dyestuffs soluble in water by the process of sulphonation, a stage in the formation of dyestuff intermediates.

Sulphur Non-metallic element having the symbol S, atomic number 16, and atomic weight 32.06. Sulphur is found in the native state as incrustations in volcanic regions, or in crystalline and earthy forms associated with gypsum in clays and marls. The chief natural supplies come from Italy,

Sicily, Spain and the United States. Sulphur is obtained also from vat-waste in the Leblanc soda process. It is a yellow, crystalline or amorphous, odourless, tasteless solid, insoluble in water and burning with a blue flame at 260° C. It is used in the manufacture of gunpowder, rubber and fireworks, also in medicine and the preparation of many compounds.

Sulphuric Acid Oil of vitriol. It is made on a large scale in Great Britain and other countries chiefly from sulphur dioxide. This is oxidised by nitrogen peroxide in the presence of water into sulphuric acid, or sulphur dioxide and oxygen are passed over a catalyst to form sulphur trioxide, which is dissolved in water to form the acid. Pure sulphuric acid is a heavy, colourless, oily liquid having a strong affinity for water, and forms sulphates with bases. The chemical symbol is H₂SO₄.

Sultan Arabic, Turkish and Persian word signifying the ruler of a Mohammedan country. Formerly the chief holder of the title was the Sultan of Turkey, who used to call himself the Sultan of Sultans. Now the most prominent sultans are those of Morocco, Johore and Zanzibar, but the term is also applied to many petty Asiatic and African potentates who are little more than tribal chiefs.

Sultana is the name given to wife, mother, or daughter of a sultan.

Sultana Kind of raisin. It is the result of drying in the sun a small white grape grown chiefly near Smyrna in Asia Minor. Large quantities are exported and the fruit light brown in colour, is freely used in pudding and cake making for which its seedlessness is a recommendation.

Sumac (or Sumach) Genus (*Rhus*) of the small trees and shrubs of the natural order *Anacardiaceae*. It bears small flowers and fruit, and several species have medicinal and other uses, while two are distinctly poisonous. The Venetian Sumac (*R. cotinus*) is often planted as an ornamental shrub. Its twigs and leaves yield the yellow dye known as young fustic. The sumac used in tanning is derived from *R. coriaria*. The Virginian sumac (*R. typhina*) supplies an astringent and refrigerant. Two poisonous varieties (*R. toxicodendron* and *R. venenata*) are familiarly known as poison ivy and poison elder.

Sumatra Island of the Malay Archipelago. The Malacca passage separates it from the Malay Peninsula and the Sunda Strait from Java. It forms part of the Dutch East Indies and is divided into 8 administrative districts. The area is about 178,000 sq. m. and the population about 7,604,974. A range of mountains rising to heights of 7000-10,000 ft. runs along the west coast, and from them the ground slopes to the N.E. where the soil is fertile and sugar-cane, rice, coffee, pepper, tobacco, etc., are freely grown for export. The mountains are heavily forested. There are close upon a hundred volcanoes, a dozen still more or less in a state of activity. Gold is found and coal is worked. The people are mostly Malay Mohammedans. The chief towns are Padang and Palembang.

Sumer Ancient name for southern Babylonia. It is commonly, but falsely, identified with the Biblical Shinar, which, however, represented northern Babylonia. Sumer was the cradle of a very ancient but highly-developed civilisation, reaching back to prehistoric times. Dynasties post-dating the Flood arose at Kish, Ur, Lagash and Larza,

and important [archaeological remains have been discovered at these cities and at Susa. The Sumerians, a non Semitic people, were the inventors of a pictorial hieroglyphic writing, which was taken over from them and adapted into cuneiform (q v) by the Semitic invaders who built up the Babylonian empire

Summary Jurisdiction

Jurisdiction of a court entitled to try and pronounce sentence forthwith on offenders brought before it. The typical court of summary jurisdiction is that of the stipendiary magistrate, but justices of the peace in petty session have powers of summary jurisdiction in relation to minor offences. In more serious cases they can only commit for trial at assizes, at quarter sessions, or in the Central Criminal Court

Summons In English law a document ordering a person to appear in a court of law to answer a charge. A summons is issued by the magistrates at the request of the police, or a private individual, and must state what is the charge against the person summoned. Other summonses, usually those concerning debts, are issued by the registrars of the county courts. Summonses are issued by the police or by bailiffs of the county courts. See WRIT

Sun The central body of the solar system around which the planets revolve in their orbits and from which their light and heat is derived. The distance of the sun from the earth is about 92,830,000 miles and its diameter is calculated to be 864,000 miles. Its radiating surface or photosphere is finely mottled and in certain positions are to be seen dark sunspots. Above the photosphere is the solar atmosphere whose lower levels are known as the reversing layer. Beyond this lies the bright red incandescent chromosphere, and above the chromosphere the extremely tenuous gaseous corona, which extends to an enormous distance and is seen only during a total eclipse of the sun.

The study of the absorption bands in the solar spectrum has revealed the presence of about fifty of the chemical elements found on the earth. In this way helium was first discovered from its occurrence in the solar envelope.

Sun-bathing Exposure of the body to the rays of the sun for reasons of health. The ultra violet rays of the sun activate the ergosterol (q v) in the skin, which becomes vitamin D, required for bone formation. In addition they increase the power of the blood to destroy microbes and tone up the system generally. Sunbathing, which is of immense benefit in the treatment of rickets (q v), and lupus (q v), has become fashionable. Care should be taken, however, not to allow the skin to become too rapidly sun burnt, and exposure for short periods is desirable at first.

The realisation of the beneficent action of sunlight has stimulated the growth of the Nudist movement—a movement aiming at physical health through the action of sunlight and air on the body, and at psychological well-being through the return to nature and the liberation of the mind from sex repression and morbid curiosity. Nudist colonies have sprung up widely in Germany and also in Britain and the U.S.A.

Sun Bear (or Honey Bear) Small bear (*Ursus malayanus*) in-

habiting forest regions in the Malay Archipelago. It is timid and inoffensive. The fur is short and black, with a lighter patch at the neck. The animal feeds on honey and insects, digging open the mounds of termites and devouring the latter.

Sun-Bird Name for birds of the family *Neotornidae*. Found in tropical Africa, Asia and Australia, they somewhat resemble the hummingbirds in small size and the vivid colouration of the males. There is a long tail. The long slender bill and long tongue are adapted to the diet of insects, nectar of flowers, etc.

Sun Bittern South American bird (*Eurypyga helias*) related to the cranes. It frequents the river banks and feeds on insects and fish. About 16 in long, it has a long neck and beak, the plumage being banded transversely and mottled with black, white and brown. There is another larger species (*E. major*) in Colombia and Central America.

Sunbury Urban district of Middlesex. It is 17 m from London, on the S. Ry. On Sunbury Common the Metropolitan Water Board has reservoirs. Near is Kempton Park racecourse. Situated on the Thames, Sunbury is a boating centre.

Sunday The first day of the week. It is observed by Christians as a day of rest and worship in commemoration of the resurrection of Jesus Christ. In the early Church, Jewish Christians continued to observe their Sabbath together with the rest of the Moslems, but Paul laid down that the Jewish Sabbath was not binding on Gentiles. In A.D. 321 Constantine enjoined Sunday as a day of rest.

There is an Imperial Alliance for the Defence of Sunday and a Lord's Day Observance Society, both with offices in London.

Sunday Closing In Great Britain it is the law that shops and places of amusement must be closed on Sunday, but there are many exceptions. Public houses can legally be open at certain hours in England, but not in Wales. In Scotland each locality decides the question for itself. As regards shops where refreshments and newspapers are sold the law is tacitly broken, and in Jewish quarters Sunday is regarded as the weekly shopping day. As regards places of amusement, the law is that no fees can be charged for admission to an entertainment on a Sunday. Theatrical performances, to which admission is by ticket only, are often given on Sunday.

In the case of cinema houses the local authorities allow them to open on Sunday provided the proceeds are given to charity, although strictly speaking this practice is illegal under an act of 1780. Consequently they are open in some districts for instance the county of London but closed in others. In 1932 a measure was introduced to bring uniformity into the law. It was proposed to continue the law as regards theatres but to alter it as regards cinemas. In its final form the measure allowed the cinema houses to remain open in those districts in which Sunday opening was already the rule. In other districts the local authorities could apply to parliament for permission to open if the inhabitants clearly desired it. The opening hours, however, must not exceed five in the day, and the proceeds, as before must be given to charity, except a part set aside for the support of a film institute. See SHOP

Sunday School Voluntary agency for the religious training of young people. The origin of the Sunday School in its present form is ascribed to Robert Raikes, who, in 1780, gathered a number of poor children from the streets of Gloucester for instruction by paid teachers. The movement thus started grew with remarkable rapidity and in 1803 the Sunday School Union was started. The pioneer work of G. Hamilton Archibald has, within the last 30 years or so, brought about great advances in Sunday School methods.

Sunderland County borough and port of Durham. It is situated on the estuary of the Wear, 12 m north of Durham, and comprises Monkwearmouth and Bishopwearmouth, which face each other on opposite sides of the river. With a good harbour and ample dock accommodation, the borough has important shipping and ship building interests, as well as manufactures of machinery and chemicals. The prosperity of the place is due to its situation on the Durham coalfield, and coal is largely exported. St. Peter's church, at Monkwearmouth, forms part of a 7th century monastery where St. Bede was educated. Pop (1931) 185,870.

Sundew (*Drosera rotundifolia*) Insectivorous plant found in bogs or marshy hollows on heath or moorland. The leaves form a rosette on the ground radiating on long stalks from the slender root. The margin of the leaf has rows of crimson glandular threads in the rounded end of which a sticky fluid is secreted. This entraps small insects who alight on the leaf and their struggles to liberate themselves irritate the glands which close over the intruders. The leaf margins curve inward imprisoning the insect in a hollow, where it is ultimately absorbed by the plant.

Sundial Instrument by which the time of day is shown from the sun's shadow thrown by an upright upon a flat surface. A simple type of shadow clock appears to have been used in ancient Egypt and a more elaborate sundial was known to other early peoples. In its modern form the sundial consists of a plate or dial marked with the hours and their subdivisions, with a metal upright known as a style or gnomon.

Sun Fish Genus of large bony fishes (Globe-fishes) allied to (*Orthogoriscus*) the globe-fishes. The body is short, deep and compressed, with a very short tail, giving the fish a somewhat disk shaped outline. *O. mola*, sometimes met with in British waters, is 7 to 8 ft in length. It is widely distributed.

Sunflower Annual and perennial plant, a genus of the order *Compositae*. Sunflowers are of very vigorous growth with erect stems which attain a height of several feet, the flowers being of a brilliant yellow. The perennial varieties spread rapidly, the roots running underground in every direction. The size of the flowers varies from comparatively small blooms, to the giant cottage garden variety, an annual easily grown from seed sown in spring.

Sunium Rocky promontory on the southern extremity of Attica. It was fortified in 413 B.C. against the Spartans, and there still remain the ruins of a temple to Poseidon, built in the time of Pericles, and used as a landmark for ships. It is the modern Cape Colonna.

Sunn Hemp Herb (*Crotalaria juncea*) of the order Leguminosae.

The flowers, which grow in sprays, are yellow, and similar to the broom. The silvery leaves are long and pointed, covered with fine silky hairs. The plant is a native of India, and the fibre of the inner bark is used commercially.

Sunni Orthodox Mohammedan believer. The sect of the Sunnis (or Sunnites) arose together with others on the death of Mohammed, as he left no authorised successor. The Sunnites derive their name from Sunna, a body of traditional teaching, consisting of rules, regulations and legends, which they ascribe to the prophet. They regard the Sunna as having equal authority with the Koran.

Sun Power Term applied to the suggested utilisation of the sun's heat as a mechanical power. The direct solar heat on the earth's surface is sufficient to raise the temperature of a water film, one centimetre thick, by two degrees Centigrade per minute. A solar engine has been devised for utilising the concentrated solar rays in tropical countries.

Sunspot Black irregular area seen on the photosphere of the sun. Sunspots occur near the equator and their diameter often measures many thousands of miles, although they vary much in size. They consist of a black central nucleus surrounded by a less dark penumbra. Their nature is not definitely known, but one view is that they represent a down rush of cooler gases from the outer atmosphere of the sun. Their numbers vary but reach a maximum every eleven years.

Sunstone A reddish variety of oligoclase feldspar showing a golden sparkle due to the presence of minute scales or spangles of haematite diffused through the mineral.

Sunstroke Form of prostration due to excessive heat usually from the sun. It is common in tropical countries, where Europeans usually cover the head and neck as a preventive. The symptoms include sickness, faintness, headache and dizziness.

Treatment—Remove the patient at once to shade and quiet, loosen the clothing and sponge the face and head with cold water, giving cold water to drink if the patient is conscious, and sal volatile. The head should be kept up, unlike treatment for fainting, as it is necessary to draw the blood away from the brain.

Sun-Worship Ancient cult. By many peoples the sun has been regarded as the supreme deity and source of life. Agricultural peoples particularly have worshipped the sun, in Persia as Mithras, in Egypt as Ra, in Greece as Apollo, and records of sun-worship have been found in Central and South America, India, Japan and elsewhere.

Sun Yat-sen Chinese reformer. He was born in 1867 at Hong-San, Kwantung Province, China, and was the son of a Christian convert. He organised the revolutionary party in 1893, and after many desperate attempts, overthrew the Manchian dynasty, which had ruled China nearly 300 years. He became first president of the republic. In his efforts to establish a democratic form of government and to put China on a new economic foundation, Dr. Sun led his Kuomintang party incessantly against reactionaries who had once joined the revolutionaries and subsequently deserted them. He died in Peking on March 12, 1925.

His most important writings are *Plans for National Reconstruction*, *Fundamentals of*

National Reconstruction and The Three Principles of the People

Superannuation See PENSIONS

Superheater Apparatus for superheating steam used especially for supplying turbines as it gives economy of steam and avoids the corrosive action of water upon pistons and valves. In a superheater the steam is heated in passing through straight or looped steel tubes expanded at their ends into headers or tubeplates.

Superior Lake of North America. The largest freshwater lake in the world, it covers 31,800 sq m. It is 412 m long and divides Canada from the United States. Into it flow the waters of 200 rivers and the united mass passes by the St. Mary River to Lake Huron and then through the other Great Lakes to the St. Lawrence. The chief port on the American side is Duluth and on the Canadian side Port Arthur, from these ports ships can pass to the St. Lawrence and then to Europe. Around the lake are vast supplies of copper, iron and other minerals.

Supernaturalism Belief in a power or powers transcending the forces of nature. Primitive man probably was devoid of the conception of mechanical causation. Hence his belief in the supernatural would arise from a feeling of awe, occasioned by the unfamiliar and startling in natural objects and events. In this emotion is found the raw material of magic as well as religion, which as it rose to higher planes was mingled with gratitude and changed into reverence. Modern thinkers who retain the notion of the supernatural, do so in the conception of a Divine Creator, who maintains the laws that He has made, without interfering with their operation.

Superphosphate Name given to a fertilizer which is a mixture of calcium hydrogen phosphate and calcium sulphate, prepared by treating phosphorite and bone ash with dilute sulphuric acid. The fertilizer value of superphosphate depends upon the amount of soluble phosphate present, and this varies with the source of the material.

Superstition Irrational fear of the unknown or mysterious. This is often expressed in a disposition to ascribe phenomena which admit of natural explanation to occult or supernatural causes. Many primitive superstitions, beliefs and customs survive in the modern world, e.g., Christmas room decoration is connected with an ancient fertility rite, and belief in the luckiness of Friday probably arises from a primitive taboo associated with special days.

Supreme Council Term used for the council set up by the Allies in Paris in 1919. Its business was to see that the terms of the peace of Versailles were carried out and on it were representatives of Great Britain, France and Italy. It ceased to function in about a year. Earlier in 1917-18, there was a Supreme War Council. This met at Versailles and its business was to direct the operations against the Germans thus establishing a single control.

Supreme Court The highest court of law in England, the United States and some other countries. In England the Supreme Court was set up in 1873. It consists of the High Court of Justice and the Court of Appeal. It sits in the Royal

Courts of Justice, Strand, London, and although called supreme there are appeals from it to the House of Lords. In the United States the Supreme Court, with the Chief Justice as president, hears appeals for the courts of the separate states. It sits at Washington and from its decisions there is no appeal. The German republic has a Supreme Court of Appeal that sits at Leipzig.

Surbiton Urban district of Surrey. It is 12 m. from London, on the Thames and is reached by the S. Rly. A residential district for Londoners it is visited for the boating. Pop. (1931) 29,396.

Surd In algebra a quantity which cannot be expressed by rational numbers. The fifth root of 243 is a surd, as it can only be expressed as $\sqrt[5]{3}$.

Surety Person who guarantees something, usually money, for another person. A person charged with a serious offence will only be released, pending his trial, if he finds sureties that he will appear. The sureties usually bind themselves to pay a certain sum of money, fixed by the magistrates or judge if the accused fails to appear. See GUARANTEE.

Surface Tension Term used in physics for the cohesive force between the particles of a liquid, apparent as a tension in the surface film. Common demonstrations of this property are capillarity (*q.v.*), the movement of camphor on water and the spherical shape assumed by small drops of liquids and by soap bubbles.

Surgeon Name used for a medical man who specialises in operations. He goes through the same course of training as any other medical student but usually includes in his degrees fellowship of the Royal College of Surgeons. This dates from before 1369 but in its present form from 1800. The college has a house at 40 Lincoln's Inn Fields, London, W.C., where there is the museum begun by John Hunter. There are royal colleges of surgeons also in Edinburgh and Dublin. Like the English ones these conduct examinations and give degrees to medical students.

Surgery Science of treating disease and accident by cutting and manipulation. It originated with the Greeks and the word means, in Greek, hand work. It has been a separate study since the days of the Greeks. It was revived by the Arabs about 900, but for nearly 1000 years its methods were very crude. In the 17th century anatomy was seriously studied in France, England, Italy and elsewhere and the modern period began. The greatest of English surgeons was John Hunter. Enormous advances were made in the 19th century, these being rendered possible by the invention of anaesthetics and antiseptics, followed by that of the X rays.

Surinam River of Dutch Guiana, S. America. Also another name for the colony itself. The river has a course of about 400 m. and flows into the Atlantic Ocean near Paramaribo. It is navigable for small craft for 100 m. The colony has an area of 54,291 sq m. pop. (1931) 155,888.

Surplice Outer garment worn by the clergy and choristers during divine service in the Roman Catholic and Anglican churches. It is a loose garment of white linen worn over the cassock or other garments. The surplice worn by the clergy is longer and fuller in the sleeves than the one

worn by the choristers. In the Roman Catholic church the surplice is trimmed with lace. In the Church of England its use became general in the 19th century.

Surrey County of England. Wholly inland, it lies to the south of the Thames and covers 722 sq. m. The northern part is included in the county of London and much of it is a residential area for Londoners. In the south, where the North Downs cross the county, is some very beautiful scenery. Kingston is the county town, other boroughs are Croydon, Wimbledon and Richmond in the London area, Guildford, Reigate and Godalming. Other places are Woking, Epsom, Farnham and Dorking and several urban districts of greater London such as Mitcham and Sutton. The chief rivers are the Wey, Mole, Wandle and Eden. In the county are Virginia Water, Leith Hill, Box Hill, Waverley Abbey, Runnymede, Gattton and other places of beauty and interest. The county is in the dioceses of Southwark and Guildford. It sends seven members to Parliament. Pop. (1931) 1,180,810.

The county has two regiments, the East Surrey and the West Surrey. The former, formerly the 31st and 70th Foot, has its depot at Kingston. The latter, known also as the Queen's Royal Regiment, is the old 2nd Foot which was raised in 1661 and was called the Lambs. Its depot is at Guildford.

Surrogate Deputy or delegate. The term is used for the person appointed by a bishop to issue licences for marriages.

Surtax Term used in the United Kingdom for the branch of the income tax called formerly the super tax. It is levied on all incomes, whether earned or unearned, that are in excess of £2000 a year. On the first £500 above £2000, 1s. in the £ is charged and the scale rises until it is 7s. 6d. in the £ on all income over £50,000 a year. In addition, an additional 10 per cent was levied in 1931, making the highest rate 8s. 3d. in the £. These rates were in force in 1931-35.

The surtax was introduced in 1909 when it was 4d. in the £ on all incomes in excess of £5000 a year. It was greatly increased to meet the expenses of the Great War. The existing scale dates from 1930. In 1935 the surtax produced £51,165,000.

Surtees Robert Smith, English novelist. Born in 1803, he is famous for the creation of Jorrocks, a sporting Cookney grocer, who made his appearance in a series of articles, *Jorrocks's Jaunts and Jollities*, written between 1832-34 for the *New Sporting Magazine*, which was founded by Surtees. *Handley Cross*, 1843, is probably the best known of his other works. He died March 16, 1864.

Surveying The art by which the area of the earth's surface are determined for purposes of map-making and the various requirements of civil and other departments of engineering. Surveying has many branches, thus in a topographical survey the contour and principal landmarks of a district are noted, a geological survey shows not only the topography but also the outcrops of the geological strata and rocks, a mine survey is concerned with all indications relating to mining, and a hydrographic survey deals with a chart of the sea and other large bodies of water, their depths, currents, coasts and other necessary data. The survey of Great Britain is carried out by the Ordnance Survey.

Surveyor Overseer or supervisor, or person designing and superintending the construction of a building. The term is also applied to some one who inspects and examines, to ascertain condition or value, and is also used for a customs officer who ascertains the quality and quantity of imported merchandise.

Susa Capital city of Susiana (Elam). The chief residence of Darius I. and his successors, it dates from Neolithic times. It has been the scene of much modern excavation, the code of Hammurabi (q.v.) being discovered there. It was, until the 14th century, a flourishing district, famous for silk, sugar cane, and oranges, but is now desolate.

There is also a city of Tunisia on the Gulf of Hammamet of this name.

Sussex County of England. In the south-east of the country, it covers 1457 sq. m. and has a coastline of 90 m. on the English Channel between Hampshire and Kent. It is crossed by the hills called the Downs and is a district of great beauty. The chief rivers are the Adur, Arun, Cuckmere, Ouse and Rother. The county is agricultural and famous for its sheep. Lewes and Chichester are the county towns, but the largest are the watering places on the coast, Brighton and Eastbourne. Others are Hastings, Hove, Worthing, Seaford, Bexhill, Littlehampton and Newhaven as well as Winchelsea and Rye. Inland are Horsham, Midhurst, Arundel and Hayward's Heath. The county contains Petworth and Goodwood; Battle Abbey and Chancetonbury Ring, Pevensey and Hurstmonceaux. It is divided into two counties, east and west, each with its own county council. Six members are sent to Parliament. The county is in the diocese of Chichester. Pop. (1931) 770,078.

There was an Anglo-Saxon Kingdom of Sussex from about A.D. 470-825, when the South Saxons submitted to Wessex.

The Sussex regiment, is the 35th and 107th of the line. It was raised in 1701 and has been a royal regiment since 1882. The depot is at Chichester.

Sussex Duke of. Title borne by the sixth son of George III. He was Augustus Frederick, created duke in 1801. He married Lady Augusta Murray and their children were named d'Este. Before his time there had been an earldom of Sussex, held from 1529 to 1611 by the family of Radclyffe; from 1644 to 1671 by the family of Savile and from 1717 to 1799 by the family of Yolverton.

Sustentation Maintaining or supporting. It is chiefly used in the Church of Scotland and other Presbyterian churches. These have a sustentation fund from which payments are made to support the ministers of the church. The principle is that the richer churches pay more than they receive, and the poorer ones receive more than they pay.

Sutcliffe Herbert William, English cricketer. Born at Summersbridge, near Harrogate, Nov. 25, 1894, he first played for Yorkshire in 1914. In 1924, having made a great reputation as a batsman, he went to Australia and in the succeeding test matches, down to 1930, with one or two exceptions, he and Hobbs opened the batting for England in a partnership that has become historic. His batting averages in test matches are unique; in 1930 it was 87.2 and he has scored seven centuries against Australia. In 1930 he scored 3006 runs, and in each season since 1919 he

has exceeded 1000 In June, 1932, Sutcliffe and Holmes established a record by scoring 555 runs in a first cricket partnership for Yorkshire against Essex, Sutcliffe's score being 313 With the M C C team he went to Australia in 1932 33 In 1936 he was second to Hammond in the batting averages

Sutherland Duke of Scottish title borne by the family of Leveson Gower The title of Earl of Sutherland, a very old one, was inherited in 1706 by Elizabeth Gordon who married George Granville Leveson-Gower In 1803 he became Marquess of Stafford, and in 1833 was created Duke of Sutherland His successor, George, who became the 6th duke in 1913, was a member of the Unionist Government, and took a special interest in the Air Force The duke owns a great deal of land in Sutherlandshire where he has a splendid seat, Dunrobin Castle His London house is now the London Museum

Sutherlandshire County of Scotland It covers 2028 sq m in the far north of the country, with the sea on three sides The coast is very much indented and to the south is Ross and Cromarty A very mountainous area, it has several peaks over 3000 ft high and a number of lochs, Shin being the largest The soil is unfertile, much of it being only suitable for sheep rearing, deer forests and grouse moors Its rivers include the Oykel, Helmsdale and Brora and the county includes many islands Dornoch is the county town, other places are Golspie, Tongue, Lochinver and Bettyhill, all on or near the coast. With Caltness it sends one member to Parliament. Pop (1931) 16,100

Suttee (or Sati) Hindu custom by which the widow of a dead man flings herself on his funeral pyre and is burned to death It was prohibited by law in 1829 The word is derived from the Hindu meaning "virtuous wife"

Sutton Urban district of Surrey It is 13 m from London, on the S Rly, while it is connected with Wimbledon by another line A feature of the town is the long High Street, which is part of one of the main roads to Brighton Since 1927 the urban district has included Cheam Pop 46,488

Sutton Bridge District of Lincolnshire It is on the Nen, near the Wash, 7 m from Wisbech and is a river port and a railway junction Near is Long Sutton, a town with an old and beautiful church. Pop (1931) 2837

Sutton Coldfield Borough of Warwickshire It is 8 m from Birmingham and 117 from London, on the L N E and L M S Rlys The grammar school dates from the 10th century Sutton Park is a large and picturesque open space The industries include the manufacture of hardware, and there is a trade in farm produce Near the town is a moated mansion of the 13th century called New Hall Pop (1931) 29,920

Sutton Courtenay Village of Berkshire It is 2 m from Abingdon and quite near the Thames There is an old church restored and a 14th century manor house

Sutton-in-Ashfield Urban district of Nottinghamshire It is 140 m from London and 15 from Nottingham on the L N E and L M S Rlys The industries are coal mining and hosiery making Pop (1931) 25,161

Sutton-on-Sea Pleasure resort of Lincolnshire It is 28 m from Boston and 135 from London, on the L N E Rly There are excellent sands

Suture Term applied to the immovable articulations between the bones of the skull and face Usually the edges of the bones are very irregular the projections of one dovetailing into the indentations of the other, giving rise to a zigzag line of union In some, however, the edges overlap forming a squamous suture

Suvla Bay Inlet of the west coast of the Gallipoli Peninsula, where the Gulf of Saros joins the Aegean Sea. On Aug 6, 1915, a British force was landed here as a part of an allied offensive against the Turks It was hoped that this force would succeed in taking the Anafarta Hills and link up with the Australian forces on its left. Difficulties of transport and water supply as well as casualties due to dysentery caused the failure of this plan The position was successfully evacuated on Dec 20

Swadlincote Urban district of Derbyshire It is 5 m from Burton-on-Trent and 126 from London, on the L M S Rly In the urban district are Stanton and Church Gresley Coal mining is the principal industry Pop (1931) 4302

Swaffham Market town and urban district of Norfolk It is 116 m from London, on the L N E Rly The town is an agricultural centre Pop (1931) 2783

Swahili Coast people of E Africa. Derived from Arabic meaning "the coast," the name is applied to the Bantu tribes who have become intermixed with others of African and Arab blood in the coastal area from Somaliland to Mozambique The word is also used for their language, now understood over a considerable part of Central and E Africa

Swakopmund Town of S W Africa, on Walvis Bay, at the mouth of the River Swakop, which flows for a length of 240 m Under German rule, Swakopmund was the port of S W Africa, but with its administration as mandated territory, the port of Walvis Bay is beginning to develop There is a good harbour, and whaling and fishing are carried on British, Dutch and German steamers now call at the main port of Walvis Bay, and Swakopmund has been permanently closed as a port.

Swale Name of two rivers in England. The Yorkshire Swale rises in the N W of the county, about 4 m from Kirkby Stephen, and passes by Richmond until it reaches the Ure It is 60 m long and the district through which it passes is called Swaledale

The Kentish Swale is a branch of the Medway It divides the island of Sheppey from the main land, is 16 m long and flows from Queenborough to Whitstable

Swallow Migratory passerine insect, voracious bird (*Hirundo rustica*) of the family *Hirundinidae* It is allied to the martins (*g v*), and like them characterised by the short, wide beak, forked tail and long, narrow wings Widely distributed through the Old World, it visits Britain during the summer months, making its nest of mud and grass, straw, etc. in the roofs of barns, out-houses or other buildings The male is steel blue on breast and upper parts, chestnut on throat, and whitish beneath

Swallow-Hole Small cave, which forms the entrance to the underground channel of a stream and is made by the corroding action of naturally acidulated water. These swallow-holes are mostly found in chalky and limestone districts.

Swallow-Wort Perennial herbaceous plants of the order *Asclepiadaceae*. Most of them, they are native to America. Some are used medicinally, and the young shoots of others are cooked and eaten. *A. tuberosa* yields a remedy for pleurisy. The blood-flower, *A. curassavica* is used to expel tapeworms.

Swan River of W Australia. It flows from the Darling Mountains to the Indian Ocean. Fremantle is situated at its mouth and Perth 60 m up the river.

Swan Genus (*Cygnus*) of large aquatic birds, widely distributed. Of the family *Anatidae*, they are related to the geese, etc. The mute swan (*C. olor*) one of three species which come to Britain in winter, is the tame swan of our rivers and lakes, having become naturalised in the course of some centuries. It is entirely white, the bill orange with black basal patch and tubercles. The neck is long and curved, the legs short, the body about 54 in long. The young cygnets have greyish brown plumage for the first year.

Swan Sir Joseph Wilson. English physicist and electrician. Born in Sunderland, 31st Oct., 1828, his name is chiefly associated with electric lighting and photography. In 1860 he produced the first carbon electric lamp, a scientific curiosity at the time, but paving the way for Edison's later improvements. He was the first to produce photographic dry plates and bromide printing paper. A miner's electric safety lamp, and improvements in the process of electro-plating are likewise owing to his inventive genius. He was knighted in 1904, and died May 27, 1914.

Swanage Seaport, pleasure resort and urban district of Dorset. It stands on Swanage Bay, 131 m from London by the S Ry. An object of interest is a great globe, a geographical sphere of the world weighing 40 tons. Near Swanage are the Tillywhim caves and Corfe Castle. Pop. 6276.

Swan Mussel Fresh water bivalve mollusc (*Anodonta cygnea*). It is common in ponds and rivers, where it rests half-buried in the mud. It is 4 to 5 in long. The larval form (*glochidium*) is parasitic on fish, becoming encysted on the host. When metamorphosis is completed the mussel leaves its temporary host.

Swansea County borough of Glamorgan-shire, Wales. It is situated on the bay of the same name, 45 m W of Cardiff. Tinplate is an important manufacture, various metals are smelted, and oil is refined. The deep-blue Swansea ware, exquisitely decorated with paintings of flowers and birds, is well known. There are ruins of a 14th century castle. Important buildings include the University College, the Royal Institution, and an art gallery. There are many seamen's and other benevolent institutions. Mumbles Head is a promontory at the western end of Swansea Bay. Pop. (1931) 164,825.

Swaraj Term consisting of two Hindu words which together mean "self-mastery" or "self-government". Since about 1920 it has been accepted by the Indian Nationalists to express their aim of self-government for India. The desire for Swaraj

was greatly stimulated by the Indian share in the European War. There have been in India three parties in the nationalist movement: (1) political extremists who virtually boycotted the Montagu-Chelmsford reforms, (2) a moderate party working with the government in the reforms, but with the same ultimate end in view as (1), and (3) Gandhi and his party whose aim is the strengthening of national character.

Swarthmore Borough of Delaware County, Pennsylvania. It is the site of Swarthmore College, founded in 1864 by the Society of Friends, and of the Swarthmore Press from which much of the society's literature is issued.

Swastika Religious emblem or symbol. It consists of a Greek cross with the ends of the arms bent to right angles. Sometimes it is enclosed in a circle. The swastika originated in India or China and was a mystic symbol amongst the Buddhists, who still use it. It is also used by the American Indians. In Europe it was used as a decorative figure in the Middle Ages. In Germany the Nazi party under Adolf Hitler have adopted the swastika as their symbol. To them it stands for Aryanism against Semitism.

Swaziland British protectorate of S Africa, enclosed by the Transvaal, Natal, and Portuguese E Africa. The western part is high and healthy, but the climate of the lower eastern regions is trying to Europeans. Cattle and sheep are raised and wheat and maize are among the crops grown. Minerals mined include tin and gold. There is a resident commissioner, the ultimate authority being the High Commissioner for S Africa. Swaziland is 6704 sq m in area. Pop. 133,500.

Sweat Term applied to the perspiration or exudation of moisture from small glands in the skin. The sweat gland apparatus acts as a means of regulating the heat of the body as the evaporation of moisture from the skin removes a great amount of bodily heat, especially when the air is hot and dry.

Sweating System which began in the early 19th century, and was due to contractors sub-contracting in certain trades, particularly ready-made clothing. It meant that poor people worked long hours for extremely poor pay, usually in their own overcrowded homes, and as it was chiefly temporary work, there was difficulty in getting these workers to band themselves together, and demand better conditions. These, however, have been gradually obtained by the establishment of Trade Boards (qv) and by the spread of mass production methods, which has rendered sub-contracting unprofitable. Sweating has now almost ceased to exist in England.

Sweating Sickness Epidemic disease which spread over the greater part of Europe during the 15th and 16th centuries. It first appeared in England in 1485 when 20,000 persons died from the disease in London. It was characterised by excessive perspiration, high temperature, and a severe form of eczema and was usually fatal.

Swede (or Swedish Turnip) Large variety of turnip. Its leaves are smooth and bluish, and spring from a collar or neck at the top of the root. It is an important root crop, being fed to cattle, and there are several varieties which are cultivated in the kitchen garden. See TURNIP.

Sweden Country of Europe In the north west of the continent it is part of the district called Scandinavia. It covers 173,000 sq m and has a long sea coast on the Baltic. Its land boundaries are over 1000 m with Norway on the west and a shorter one with Finland. The country is hilly in parts but never mountainous, and the soil is fertile. It contains some great lakes, Vener covering over 2000 sq m. Stockholm is the capital and the largest place. Next in size are Goteborg and Malmö. Pop (1931) 6,162,146.

Sweden is agricultural and produces oats, wheat, rye, etc. Cattle and sheep are reared, and the fisheries are of considerable value. It is rich in minerals, especially iron ore, of which a great deal is exported. Its forests afford much timber which is turned into pulp and paper. The manufactures include textiles, machinery, chemicals, clothing and matches. Electric power is abundant and well developed. Sweden is ruled by a king and a diet, or parliament, of two houses. The upper house consists of 150 members elected by the provinces end towns for eight years. The lower house consists of 230 members elected for four years by universal suffrage. The executive is in the hands of a council of state under a prime minister. The State Church is Lutheran. There is an army raised by compulsory service, a navy and a small air force. The country has a State Bank. The unit of currency is the krona, worth normally 1s 1½d.

Sweden became a kingdom about the 10th century and a little later its inhabitants accepted Christianity. It contained two races the Swedes proper and the Goths, but after a time they were united. The early kings included S. Eric and a conqueror called Birger, and for a time the kingdom was united with Norway. In 1397 it came under the same ruler as Denmark and Norway and for over a century there were struggles with its Danish overlords. In 1523 Gustavus Vasa succeeded in driving out the Danes, and was himself chosen king this event marking the beginning of modern Sweden.

In the 17th century Sweden under Gustavus Adolphus and then under Charles XII, was one of the great powers of Europe, a position due chiefly to military strength. Extensive conquests were made but they were not kept, and the rise of Russia deprived Sweden of her dominant position among the Baltic states. In 1810 Napoleon secured the choice of his marshal Bernadotte, as heir to the childless king, Charles XIII, and in 1818 Bernadotte became king as Charles XIV. He ruled also over Norway which was united with Sweden from 1814 to 1905. In 1907 Gustavus V, a descendant of Bernadotte, succeeded his father Oscar II, as king. Sweden is a member of the League of Nations. The economic depression following the World War was reflected in the great industrial crisis of 1921-2. The temperance question led to the rise of a coalition government 1926-28. The present Socialist Ministry assumed office in 1932.

Swedenborg Emanuel Swedish scientist, philosopher and mystic. He was born in Stockholm on Jan. 29, 1688. The son of the Bishop of Skara, he was educated at Upsala University subsequently travelling widely. Charles XII made him assessor in the College of Mines and he published many scientific works. From his 55th year onward he devoted his time solely to spreading the tenets of the New Jerusalem Church, of which he was the founder, living

alternately in Stockholm, London and Amsterdam. He was never married. He died in London, Mar. 29, 1772.

Swedish Drill Form of physical training also called "free movements" first used in Sweden. It is now in use in Britain and other countries in the army, navy police force and in a modified form in schools. No apparatus is needed.

Sweepstake Form of gambling, in which chance or skill wins the combined subscriptions of the competitors. The commonest form is organised on horse races in which the horses are drawn by lottery the prize money being distributed to the winners according to the placing of the horses in the race. As lotteries sweepstakes are illegal in England but the London Stock Exchange Sweep is organised by means of a "mutual subscription" confined to members of a "private club." The Calcutta Sweepstake on the Derby is another private sweep, limited to members of the Royal Calcutta Turf Club, but shares in tickets can be obtained through members. Sweepstakes on a large scale have recently been organised by the Irish Free State. A proportion of the money subscribed is earmarked for Irish hospitals and the sums yielded have been substantial. It is illegal to sell Irish sweepstake tickets in Britain, and the results of the sweepstake must not be announced in British newspapers.

Sweetbread Term commonly used to denote certain glands of animals when used for food, notably the pancreas, or stomach sweetbread and the thymus, or breast sweetbread.

Sweetbrier (*Rosa rubiginosa*) Species of rose of shrubby growth with prickly stems and serrated leaves. The small rose pink flowers are single and borne in small sprays, followed by red or orange hips in the autumn. The familiar fragrance of the sweetbrier is produced by the exudation of a sticky substance covering the under side of the leaves.

Sweet Flag Perennial herbaceous plant (*Acorus calamus*), of the order *Araceae*. It grows in marshy places, and has long sword shaped leaves and flowering stem. At the end of the latter is the spathe from which arises the spadix with its numerous yellow flowers. The aromatic root stock has been used in medicine.

Sweet Pea Annual leguminous plant (*Lathyrus odoratus*) cultivated for its handsome flowers. The stem is weak and needs some supporting structure to which it can attach itself by its tendrils. The butterfly-like blossoms are borne in clusters of two to four on long stalks, the colours including white and tints of purple, maroon, cerise, pink and red. Large blossoms and good clusters are obtained by limiting the plant to a single stem.

Sweet Potato (or Batata) Perennial herbaceous plant (*Ipomoea batatas*) belonging to the order *Convolvulaceae*. It has a long trailing stem and large funnel shaped white and purple flowers. A native of S. America, it is grown in many warm countries for its edible tubers, and is cultivated elsewhere as a green house plant.

Sweet William Perennial herb of the order *Caryophyllaceae*. A popular garden plant, it is treated as a biennial and propagated from seed and by cuttings. The flowers are

borne in a cluster at the top of the stem. Many varieties have been evolved by horticulturists in recent years.

Swift Insectivorous, gregarious, bird (*Cypselus* or *Micropusapus*) of Europe, Asia and Africa, a summer visitant to Britain. Sometimes confused with the swallow, to which it bears a superficial likeness, it is 7 in. in length with long narrow wings, and forked tail. The claws are curved and hook-like, enabling the bird to cling to walls, etc. It is almost continually on the wing during daytime, and only perches at night. The nest, placed usually under the eaves, is made of straw, grass, etc., cemented together with saliva. The swift's plumage is sooty black, with a greyish white throat patch.

Swift Jonathan. English author. Born in Dublin of Yorkshire parentage on Nov. 30, 1667, he was educated at Trinity College, Dublin. The revolution of 1688 drove him to England, where he became secretary to Sir William Temple, under whose roof he met "Stella" (Hester Johnsen), and wrote *The Tale of a Tub*, his most original satire. Ordained 1694, and holding Irish benefices, he divided his time between Ireland and London, where his gifts as a satirist made him a valuable ally of the Tory party. In 1713 he was made Dean of St. Patrick's, Dublin, and from there he wrote the famous *Draper Letters*, inveighing against the grant of a patent to William Wood, secured by dubious means, for supplying a copper coinage to Ireland. In 1726 he wrote *Gulliver's Travels*, a satire on parties and statesmen, now a classic of children's literature. He died on October 19, 1745.

Swilly Sea lough, or lake, of Ireland. It is in Co. Donegal and extends for about 25 m. into the land. It is 4 m. wide at the entrance and forms a good harbour.

Swimming Self-propulsion in water. As a pastime it has developed greatly in recent years. Competitions for speed, fancy diving, back strokes, etc., have figured prominently in the Olympic Games. The recognised speed stroke was formerly the trudgion, but this has been superseded by the crawl. America, with such champions as Weissmuller, among men, and Miss Ederle, among women, has generally held the first place, but various records have been held by Arne Borg of Sweden, Taris of France and J. Medica, U.S.A. The Channel has been crossed many times since Webb's pioneer effort, in Aug., 1875.

Swinburne Algernon Charles. English poet and critic. Born in London, April 5, 1837, he passed much of his childhood in Northumberland. He was educated at Eton and Oxford, and in early life was intimately associated with Rossetti and William Morris. In 1864 appeared his *Atalanta in Calydon*, considered to be his finest work. His first volume of *Poems and Ballads*, published in 1866, excited storms of adverse criticism. Many of these poems, as well as some of his later works, such as *Songs Before Sunrise*, contain passages which have been considered too erotic, but they show consummate artistry and a wonderful sense of rhythm. He also wrote plays, critical essays, studies, and pamphlets. He died April 10, 1909.

Swindon Borough and market town of Wiltshire. It is 77 m. from London, on the G.W. Ry. Old Swindon is a market town with a corn exchange. Below is New Swindon which grew up after 1840

around the works established here by the G.W. Ry. Most of the inhabitants work on the railway, but there is quarrying and an agricultural trade at Old Swindon. Coate Reservoir, a large artificial lake near the town, covers 80 acres. Pop. (1931) 62,407.

Swine Fever Three infectious and incurable diseases affecting pigs, having certain characters in common. They are of bacterial origin and comprise a form of pneumonia, a septic type of gastro-enteritis, and hog-cholera. When an outbreak occurs, notification must be made and the animals destroyed.

Swinton Market town and urban district of Yorkshire (W.R.). It is on the Don, 10 m. from Sheffield, and is a junction on the L.M.S. Ry. It is also a river port. There are some manufactures and around are coal mines. Pop. (1931) 13,925.

Swinton District of Lancashire. It is 4 m. from Manchester on the L.M.S. Ry., and is part of the urban district of Swinton and Pendlebury. It has large engineering works and cotton mills. Pop. (1931) 32,761.

Switchboard Term in electrical engineering for the assembly of switch gear including switches, pressure gauges, ammeters, rheostats and cut-outs. A switchboard provides the proper isolation and protection of the apparatus, also control of the current, the various appliances being mounted usually on a slate or marble panel in a steel framework.

Swithun English saint, also called Swithin. Born about 800, he became a priest and tutor to Ethelbert, the future king. In 852 he was made Bishop of Winchester and there he died in 862. He was canonised and is commemorated on July 15. It is a common belief that if it rains on that day it will rain for 40 days afterwards, alternatively if it is fair, it will continue so. The legend is that in 971 the removal of the saint's body to the cathedral was delayed for 40 days owing to heavy rain.

Switzerland Country of Europe, lying between France and Austria, Italy and Germany. It has an area of 15,940 sq. m. Politically it consists of a confederation of 25 cantons, each with its separate government, and with a Federal Council over the whole. German is the language of 19 of these cantons, French of 5, and Italian of one only, Ticino. Berne is the federal capital, and the largest cities are Zürich, Bâle, Geneva, Lausanne.

The country has been called the playground of Europe because of the hosts of visitors who go there for its beautiful scenery and for winter sport. It is also much visited for health reasons, especially by tubercular patients. Thus hotel-keeping may be reckoned as an industry. Besides this, the principal one is agriculture, and especially the production of cheese and condensed milk. Manufactures include watches and clocks, chocolate, and such handicrafts as embroidery and wood carving.

Electricity is cheap and easily produced by the many mountain torrents and falls. Tram and railway systems are excellent, and the state education is on a very high level. Pop. (1930) 4,067,305.

Sword Offensive weapon. It consists of a steel blade with one or two cutting edges, and fitted with a hilt for grasping. A

sword is used for cutting or thrusting or for both. Ancient swords were usually short with a broad pointed blade, but in mediaeval types the sword was long and often cross blitted. Two handed swords of considerable length were also used.

Sword Dance Scottish Highland dance performed by a single dancer over crossed swords lying on the ground and accompanied on the bagpipes. It is also a folk dance.

Sword Fish Ocean fish of the family *Xiphidae* of the bony fishes, found in the Atlantic, Pacific and Mediterranean. From 3 to 14 ft long, it is fierce and powerful, with a sword like prolongation of the upper jaw which serves as a weapon to transfix the other large fish which form its prey. The European species *Xiphias gladius*, is seen occasionally in British waters.

Swords Town of Co. Dublin, Irish Free State. It is 8 m. from Dublin on the Gt. Northern (Ireland) Rly. There is a round tower here, as well as ruins of a castle and an abbey.

Sybaris Ancient city of Italy. It stood on the west side of the Gulf of Tarentum and was founded by Greek colonists about 720 B.C. During the next 200 years it was a very wealthy place and its citizens lived in such luxurious fashion that the term *sybarite* has since been used for a person who surrounds himself with an unusual amount of comfort and luxury.

Sycamore Large timber tree (*Acer pseudo-platanus*) of the order *Araceae*. It has long been naturalised in Britain, and is grown as an ornamental tree in parks. The firm, close-grained wood is used for toys, turnery, printing type and furniture. The sycamore grows to a height of 60 ft or more. The large serrated leaves are five lobed. The clusters of drooping greenish flowers appearing in May are succeeded by winged fruit.

Sydenham District of London. It is about 8 m. S. of the city, in the borough of Lewisham. It is reached by the S. Rly., and contains the Crystal Palace on Sydenham Hill.

The title of Baron Sydenham was borne, 1840-41, by Charles Edward Poulett Thomson. He was President of the Board of Trade 1834-39 except for a few months and Governor General of Canada 1839-41. He died Sept. 19, 1841, when his title became extinct. In 1913 the soldier, Sir George Sydenham Clarke, was made Baron Sydenham. He was Governor of Victoria, 1901-04 and of Bombay, 1907-13, and is an authority on Imperial defence.

Sydney Capital of New South Wales. The oldest town in Australia built around Port Jackson. It has one of the finest harbours in the world. It is connected by rail with Queensland, Victoria, its own neighbourhood, and the fertile plains inland of the precipitous Blue Mountains. The city proper covers 3244 acres and is surrounded by 40 municipal areas scattered over 180 sq. m. around the harbour, the suburbs extending to the ocean beaches.

There are some narrow streets but considerable improvements have been made and many excellent modern buildings exist. Including banks, shops and business offices. Notable buildings include Government House, overlooking the harbour, the University and Parliament House. There are many parks and open spaces, including the Domain, Hyde

Park, Moore Park, Centennial Park and the Agricultural Show grounds, while around the harbour are numerous reserves.

The city is the banking, commercial and shipping centre of the country, in direct communication by steamer with most maritime countries. The famous bridge, opened March 19, 1932, provides direct rail and other communication between the city and the northern shore of the harbour, avoiding the previous long detour. It has a broadcasting station (31.28 M., 20 kW.) Pop. (1931) 1,256,230.

Sydney City and seaport of Nova Scotia. It is on Cape Breton Island, 277 m. from Halifax, and is a terminus of the C.N. Rly. It has a fine large harbour from which coal is shipped. There are iron and steel works. Steam ferries cross the harbour, and steamers sail regularly to Newfoundland. From 1784 to 1820 Sydney was the capital of Cape Breton Island, then separate from Nova Scotia proper. Pop. (1931) 23,080.

Sydney Mines Town of Cape Breton Island, Nova Scotia. It stands on the north side of Sydney Harbour, 10 m. from North Sydney, on the C.N. Rly. It is a coal mining centre and has blast furnaces. Pop. (1931) 7,769.

Sykes Sir Tatton English sportsman. He was born in 1772, educated at Westminster and Oxford, and started life as an attorney's articled clerk. In 1803 he took up sheep farming, continuing it with great success for 58 years. He is best known in connection with the Turf, as he was one of the largest breeders in the kingdom having upwards of 200 horses and mares in his stud farm. He frequently rode his own horses to victory. Although he attended only one Derby, he saw 74 St. Legers. He died March 21, 1863.

Syllogism Argument expressed in logical form. It should contain three and not more than three, propositions, the first two being the premises and the last the conclusion. It contains also three terms, the major, the minor and the middle. An example is:

All birds are winged creatures.

Swallows are birds.

Therefore swallows are winged creatures.

In this swallows is the major term, winged creatures is the minor term and birds is the middle term. The propositions of a syllogism may be either universal or particular, affirmative or negative. "All men are liars" is a universal affirmative. "No horses are men," is a universal negative. "Some men are fools," is a particular affirmative.

Symbiosis An intimate association between dissimilar organisms among plants and animals for their mutual benefit. The best known example among plants is the lichen which consists of an association between an alga and a fungus, each being essential to the other and forming a composite plant.

Symonds John Addington English writer and poet. Born in Bristol, Oct. 5, 1840, he was educated at Harrow and Oxford. He won the Newdigate Prize in 1860 and became Fellow of Magdalen College in 1862. He was specially drawn to Italian literature, his first book being on Dante published in 1872. This was followed by *The Renaissance in Italy*. He also wrote books of travel, monographs on Michelangelo, Shelley, Philip Sidney and Ben Jonson as well as many miscellaneous works. He died April 19, 1893.

Symphony Ancient term used by the Greeks for a general conception of concord in music. In the 17th century the term was employed to describe certain vocal compositions accompanied by instruments, for example, those of Schütz. Later, it became a kind of sonata for orchestra, having analogy with an operatic overture. A breaking away from the overture was begun by Mozart and Bach.

Synagogue Meeting place for Jewish worship. Its origin is obscure. There is no certain reference to the synagogue in the Old Testament, but in the time of Christ it was already an old-established and wide spread institution (Acts xv 21) not only in Palestine but throughout the Dispersion. Probably it arose during the Exile, when the Jews were unable to maintain their customary religious observances.

Syncopation Term in music originally signifying displacement of the accent of a beat. Thus a note will commence on an unaccented, and continue with an accented beat. To the practice of this, initiated by Gershwin and others, we owe the present vogue for syncopated music, popularly known as "jazz".

Syncope Severe form of fainting due to the sudden failure of the heart's action. In the case of organic disease of the heart or lungs it may prove fatal. It is sometimes the first indication of organic cardiac disease and it may be necessary to apply electrical treatment, artificial breathing, or subcutaneous injection of ether or brandy.

Syndicalism Term used early in the 20th century for a development of the Labour movement. It aimed at the elimination of the capitalist and the control of industry by syndicates or workers. It originated in France and its principles are set out in the writings of G. Sorel.

Synge John Millington. Irish dramatist. Born at Rathfarnham, near Dublin, on April 16, 1871 he was educated at Trinity College, Dublin. He had an unusually deep insight into the character of the Irish peasantry, and wrote a series of remarkable plays illustrative of their life and their feelings. *The Playboy of the Western World* is considered by many to be the greatest of these plays. Others are *In the Shadow of the Glen*, and *The Well of the Saints*. In 1904 he founded the Abbey Theatre, Dublin, in conjunction with Lady Gregory and W. B. Yeats. He died on March 24, 1909.

Synod Ecclesiastical assembly. In the Presbyterian Church the Synod stands above the local presbyteries and is subject to the General Assembly.

Syphilis Infectious and contagious disease transmitted chiefly by sexual intercourse, but also by contact with some medium contaminated by the virus. The micro-organism responsible for this disease is the bacterium, *Spirochaete pallida*, and the first symptom, which appears about three weeks after infection, is the appearance of a small pustule which passes into a hardened ulcer or chancre. Special treatment over a period of two years is essential if the disease is to be radically cured.

Syracuse Seaport and city of Sicily, on the east coast. Founded about 732 B.C., it was one of the earliest and most important Greek cities in Sicily. It early established a joint land and sea power, securing lasting dominance over the south-east coast. Captured by the Romans, 212 B.C., it became an important Roman provincial town, but was destroyed by the Saracens A.D. 878. The modern city has a cathedral and an amphitheatre. There is a trade in salt, wine, olive oil and fruit. Pop. (1931) 50,320.

Syria State of W. Asia. Bounded on the N. by Turkey, on the S. and E. by Palestine, Transjordan and Iraq, and on the W. by the Mediterranean, it comprises the republic of Syria and the Lebanon, and the states of the Alonites and Jebel ed Druz. Cereals, leguminous crops, and fruits are widely grown, and tobacco is a valuable crop, especially around Latakia. The white mulberry is grown for silkworms in the north. Exports include silk, cattle, sheep, goats, fruits, tobacco and wool. Besides the capital, Damascus, Aleppo, Beirut and Homs are important towns. Modern Syria covers some 60,000 sq. m. Pop. about 3,000,000.

The region to which the name Syria has been applied has varied at different periods. The Syria of ancient times stretched along the Mediterranean from Egypt as far as the Taurus. It passed from Egypt to Assyria and to Persia, and from 64 B.C. until A.D. 634 was part of the Roman Empire. After being occupied successively by the Saracens and the Seljuks, Syria remained, with a short interval, in the hands of the Ottoman Turks from 1516 until 1918, when they were expelled by the British. In 1920 French interests in Syria were recognised by the assignation of a mandate for the country to France. A revolt of the Jebel ed Druz from 1925 to 1927 led to its inclusion in the republic of Syria.

Syringa Genus of deciduous shrubs of the order *Oleaceae*. It includes the common lilac (*S. vulgaris*). The name is popularly applied to the mock orange, a shrub of the order *Saxifragaceae*, which bears panicles of fragrant creamy white blossoms.

TAAI Name for the form of the Dutch language spoken in South Africa. It is lacking in both inflexions and gender, and in it are some English and French words. There is a Taal literature.

Tabard Cloak worn by heralds. On it the arms of the sovereign are displayed. The word is also used for a similar cloak worn by the trumpeters of the Life Guards and Royal Horse Guards. The Tabard Inn at Southwark, from which Chaucer started his pilgrims on their way to Canterbury, has been pulled down.

Tabernacle Recess in which an image is placed, generally over church doorways. The figures in the tabernacle were usually built in, not detached. The Hebrew Tabernacle was a portable sanctuary set up by Moses for the worship of Jehovah in the wilderness (Ex. xxxv). It was formed of curtains and divided into two parts, the holy place, and the "holy of holies," in which was the ark of the covenant.

The Feast of Tabernacles is an autumn festival of the Hebrews. It begins on the 15th of Tishri and lasts seven days, commemorating the dwelling of the Israelites in booths in the wilderness.

Tableland Stretch of land that, although level, is raised above the surrounding country. The Deccan in India is an example. Another word for it is plateau.

Table Mountain Mountain of South Africa. It is at the end of the Cape of Good Hope, near Cape town. It is 3600 ft. high and was first climbed in 1603. A great fire in Dec., 1935, destroyed much of the beautiful forest on the slopes of the mountain. Table Bay is the name of the arm of the sea which it overlooks. It was first called Saldanha Bay, as Antonio de Saldanha was the first European to visit it in 1603.

Tabor Small drum used as an accompaniment to a pipe or fife. In size it is little larger than a tambourine and is carried on the wrist of the player who uses only a single drum stick.

Tabriz Capital of the province of Azarbaijan, Persia. Founded in 701. Tabriz has long been the centre of the carpet-making industry. Until recently railway communication has been indifferent. In 1915 it was the scene of Russo-Persian conflicts, and was occupied by both Russian and Persian forces. It has suffered considerably from earthquakes. Pop. 180,000.

Tabu (or Taboo) Custom of prohibiting contact with certain persons or things. It is a practice widespread among primitive peoples in all parts of the world, and has a two-fold character. Either the object of tabu is the seat of supernatural powers and contact with it may bring harm, or it is evil and will infect a person with its own nature. Some people or things are inherently tabu, e.g., strangers, pregnant women, the dead, or others tabu may be imposed temporarily or permanently by priests or rulers. An offence against tabu makes the offender himself tabu,

in some cases he may cleanse himself by ritual practices, in others the guilt is irremovable.

In a modified form tabu may exist among civilised people, e.g., among the Jews certain foods are tabu, and custom makes certain modes of action tabu in different classes of society.

Tachometer Appliance for measuring variations in the speed of machines. A simple tachometer consists of a revolving spindle with a worm which acts upon a worm wheel attached to a graduated disc and a fixed index. See SPEEDOMETER.

Tacitus Cornelius, praenomen, either Publius or Gaius, historian. Born about A.D. 58, he studied rhetoric, and early became a successful pleader at the Roman bar. He married the daughter of Agricola, the conqueror of Britain, was in Germany from 89 to 93, and was consul in 97. His extant writings are the *Life of Agricola*, a biography of his father-in-law, the *Germania*, treating of the ethnography of Germany, the *Annales*, the history of the Roman Empire from Tiberius to Nero (14 to 68), and the *Historiae*, from Galba to Domitian (69-97). He died in A.D. 120.

Tacna Northern province of Chile. It is important because of its deposits of sodium nitrate and minerals. It has a hot climate and is subject to earthquakes. The capital is Tacna. Pop. 40,000.

The Tacna-Arica question arose at the end of the war between Chile and Peru, won by Chile, 1883. The Treaty of Ancon provided that these two provinces should be held by Chile for ten years and that a plebiscite should then determine their sovereignty. It was found impossible to agree upon the method of carrying out the plebiscite and efforts made in 1925 and 1926, with the U.S.A. as arbitrator, were unsuccessful. The dispute was amicably settled, however, in 1929, Tacna going to Peru, and Arica to Chile.

Tacoma City of Washington, U.S.A. It is named after the Indian term for Mt. Rainier (Ta ho ma, or "great white peak"). Formerly known as Commencement City, Tacoma has supplies of coal, and exports lead, timber and railway stock. It has developed rapidly of recent years. Its harbour having grown greatly in importance since 1925. Pop. (1930) 108,817.

Tactics Term originally applied to the combined use of infantry, cavalry and artillery in battle. It has been generally held that tactics have remained fundamentally similar throughout the ages though changes in weapons have brought corresponding changes in methods of fighting, e.g., the subordination of bayonet and sabre to fire, and the diminishing importance of cavalry. Whereas previously the balance of advantage was usually with the attacking side, the Great War, with the widespread use of machine guns, tilted the scales heavily in favour of the defending side. Tanks, introduced at the Somme in 1916, somewhat restored the balance.

Tadcaster Market town of Yorkshire (W.R.). It is on the river Wharfe 9 m. from York, on the L.N.E. Ry. The chief industry is brewing. Tadcaster was a Roman station, and in the Middle Ages had a castle. Pop. 3500.

Tadmor See PALMYRA.

Tadpole Word used for the undeveloped frog or toad. The tadpole lives in the water, which it leaves when the tail vanishes and the legs appear. See FROG.

Tael Chinese monetary unit. Theoretically it is about an ounce of silver, but its value varies in different parts of the country. The customs tael is worth just under three shillings. Altogether there are about 170 different taels.

Taff River of South Wales. It rises in the hills of Brecknockshire and flows for 40 m through Glamorganshire to the sea at Cardiff. It passes Merthyr Tydfil and a number of other industrial centres. The railway down the valley, once called the Taff Vale, is now part of the G.W. system.

Another Taff flows through Pembrokeshire and Carmarthenshire to the sea in Carmarthen Bay. It is 25 m long.

Taft William Howard. American statesman. Born in Cincinnati, Sept. 15th, 1857, he studied at Yale University. He practised law for several years, and was made Solicitor General in 1890. In 1900 he was appointed first Civil Governor of the Philippine Islands, and in 1906 Provisional Governor of Cuba. He was Secretary for War 1907-8, and 27th President of the United States from 1909-13. He was then appointed Professor of Law at Yale, and in 1921 Chief Justice of the U.S.A. He died March 8th, 1930.

Tagore Sir Rabindranath. Indian poet and sage. Born in Calcutta, May 6, 1861, he received his education in India, subsequently visiting England, Japan, China, and North and South America. In 1901 he founded at Santiniketan, Bolpur, Bengal, a school which gradually developed into a kind of international university, called Visva Bharata, making this his life's work. In 1913 he was awarded a Nobel Prize (£8000) for literature, devoting the proceeds to the upkeep of the institution. He visited England in 1930.

He has written more than 30 volumes of poetry, many essays, novels, dramas, and sermons, and is a composer. All his writings reveal a keen sense of the beauties of nature, a deep love of children, and a consciousness of God. Many have been translated into English.

Tagus River of Spain and Portugal. It rises in Spain, through which it flows for nearly 400 m, then enters Portugal, and falls into the sea near Lisbon, where its estuary begins. It passes Toledo, and is navigable to Santarém. Its total length is 565 m.

Tahiti One of the Society Islands, also called Otahiti. It is a French possession, covering about 600 sq. m., and contains many extinct volcanoes. Papeete is the capital.

Tailor Bird (*Orthotomus sutorius*). Small bird of the order Sylviidae. Its curious method of nest-building has given it the name of tailor bird. Choosing a large leaf at the end of a twig, it fastens the edges together with vegetable fibre, or silk, thus forming a pouch, within which it constructs its nest. It is found in Asia.

Tailteann Games National games of Ireland. These were popular events in the Middle Ages when they were held in many places and in an informal manner. In 1924 the games were revived and they were held again in Dublin.

In 1928. They include literary and artistic, as well as athletic, contests.

Tain Burgh and seaport of Scotland. In the county of Ross and Cromarty, it stands on the Dornoch Firth, 44 m from Inverness, on the L.M.S. Rly. Pop. 1383.

Taine Hyppolite Adolphe, French historian. Born April 21, 1828, in Vouziers, he studied in Paris, taking his Docteur-ès-Lettres in 1853. In 1861 he was appointed Professor of Aesthetics and History of Art at the École des Beaux-Arts. His chief works were *Histoire de la littérature anglaise*, *Notes sur l'Angleterre*, *Philosophie de l'Art*, and his history of the French Revolution *Les origines de la France contemporaine*. He died March 9, 1893.

Tait Archibald Campbell. British prelate. Born in Edinburgh Dec. 22, 1811, he was educated at the Edinburgh Academy, Glasgow University, and Balliol College, Oxford. In 1842 he succeeded Dr. Arnold as headmaster of Rugby, in 1849 he was made Dean of Carlisle, and Bishop of London in 1856. In 1868 he succeeded Longley as Archbishop of Canterbury. He died Dec. 3, 1882.

Taj Mahal Mausoleum at Agra, India, built in 1632 by the Emperor Shah Jahan for the remains of his favourite wife, Mumtaz Mahal, he also lies buried there. It was constructed in the Persian style by Ustad Isa a Turk. It is built of white marble, with a large central dome, four smaller domes at the corners, and four minarets. A marble terrace surrounds it.

Talbot English family. Its head is the Earl of Shrewsbury, and it has a talbot (qv) on its crest. It is descended from a Hertfordshire landowner, and since the 14th century has had members in the House of Lords. To the family belongs Rev. Edward Stewart Talbot. Born Feb. 19, 1844, he was educated at Charterhouse and Christ Church, Oxford. From 1870 to 1889 he was warden of Keble College, Oxford, and from 1889 to 1894 vicar of Leeds. From 1894 to 1905 he was Bishop of Rochester, in 1905 he became the first Bishop of Southwark, and was from 1911 until his retirement in 1923, Bishop of Winchester.

Talbot Extinct breed of hound. It was large eared and broad mouthed, a variety of the bloodhound.

Talbot House Welfare centre for soldiers at Poperinghe. It was established in 1915 in memory of Gilbert Talbot, a son of the Bishop of Winchester, who was killed at Hooze in that year. The organisation which grew out of it is named Toc H (qv).

Talc Soft mineral with greasy feel and pearly lustre composed of magnesium silicate, and occurring in silvery white or greenish foliated masses which readily split into thin flexible but inelastic plates. The name talc is applied commercially to mica, whose plates however are elastic. Steatite or soapstone and potstone are varieties of talc.

Talking Film (or "Talkies"). Name given to motion pictures accompanied by sound, especially speech. Sound films owe their existence largely to modern electrical developments in the reproduction and amplification of sound. One method is to synchronise the motion picture with a separate sound record, but in the method now generally in use the sound is photographically recorded along the edge of

the motion picture film. When the film is being projected, light is transmitted through this record on to a photo-electric cell and trans formed into a variable electric current which is amplified and reproduced as sound by a loud speaker.

Talking pictures, which were first produced about 1928, have not only revolutionised film production and technique but have greatly extended the range of motion pictures, while topically and historically they perform a great service by preserving both the image and the voice of famous persons. See CINEMATOGRAPHY.

Talking Machine See DICTAPHONE, GRAMOPHONE, PHONOGRAPH, TALKING FILM.

Tallage Tax levied in England by the king on the boroughs, and on their demesne lands and by lords on their demesne lands. In 1340 tallages were forbidden except by consent of Parliament, and soon they disappeared.

Talleyrand Charles Maurice de Talleyrand-Perigord. French statesman. Born on Feb. 13, 1754, at Paris in his third year he fell and lamed himself for life. As a youth he trained for the church and became Bishop of Autun in 1789. During the Revolution he loosened the ties binding him to the Church, and played an important part at Paris from 1789-1793. He later became ambassador in London but on the execution of Louis XVI he was banished and lived in America. As foreign minister, from 1797-1807 he frequently sought, but without success, to modify Napoleon's aggression, and to seek aggrandisement by colonisation. At the Congress of Vienna (1815) where he was the French representative, he gained more favourable terms for France than she would otherwise have had. In 1830, as ambassador in England, he played an important part in the foundation of modern Belgium, and in 1834 he negotiated an alliance between England, France, Spain and Portugal. He died on May 17, 1838.

Tallinn Name sometimes used for Reval the capital of Estonia. See REVAL.

Tallis Thomas. English organist and composer. Born about 1515, he was organist of Waltham Abbey till 1540 and later with his pupil Byrd, of the Chapel Royal. He wrote many chants, motets, anthems, Te Deums, etc. He died Nov. 23, 1585, and was buried in Greenwich.

Tallow Tree Chinese tree (*Eucalyptus alba*) of the order *Euphorbiaceae*. The seeds are covered with a tallowy grease from which the Chinese manufacture candles. The African tallow tree (*Persea indica*) of the order *Guttiferae*. This has large red blossoms and edible berries that taste like butter.

Tally Hazel or willow stick, usually about an inch thick, on which notches were cut to indicate an amount paid. Tallies were used in the Exchequer in mediaeval times and the practice was continued in the Treasury till 1826. The amount of the transaction was marked on the two opposite sides, the piece of wood was split down the middle, one half (the tally) going to the payer as receipt, the other (counter tally) kept by the payee. Scoring at cricket was formerly notched on tallies.

Talmud Book of heterogeneous Rabbinical writings. A kind of Jewish Bible. Some consider it to be Mosaic, others think it was handed down by Ezra.

It consists of two parts, the Mishnah, a collection of laws and traditional duties, and the Gemara, a kind of commentary. Two Talmuds exist known as the Jerusalem Talmud, and the Babylonian, the Gemara of each being different. The latter, which is of greater authority among Jews, still exercises enormous influence over that people and stands second only to the Bible.

Tal-y-Llyn Lake of Merionethshire. It is about 2 m long and is surrounded by beautiful scenery. It can be reached from Machynlleth, 8 m to the south.

Tamar River of England. It rises in Cornwall and flows to the sea at Plymouth. It is 90 m long and forms for much of its course the boundary between Devon and Cornwall. Its estuary called the Hamoaze, forms part of Plymouth Harbour. The river is crossed by a fine bridge at Saltash.

Tamarind Tropical leguminous tree (*Tamarindus indica*). Native of the East and West Indies, it bears racemes of yellow flowers striped with red, and the pods contain acidulous pulp which surrounds the seeds. The pods and bark are used medicinally, while the leaves yield a yellow colouring matter.

Tamarisk Evergreen tree (*Tamarix gallica*), of the order *Tamaricaceae*. About 10 or 12 ft in height it has feathery branches and minute leaves, while the tiny white or pale pink flowers are borne in short spikes. It is used extensively for hedges in seaside places in Southern England, owing to its hardness and immunity from the effect of cold, salt winds. There are over 60 species of trees and shrubs in the genus but *T. gallica* is the only one common in England.

Tamatave Seaport of Madagascar, lying on the eastern coast. Its harbour is formed by a coral reef. The town itself is well developed, possessing good thoroughfares, and exports gold dust, raffia and hides. It has suffered severely from plagues. Pop. 15,000.

Tame River of England 30 m long. It rises in the south of Staffordshire and flows in a northerly direction to join the Trent. Tamworth stands on the river.

Tamerlane (or Timur). Oriental conqueror. Born at Kesh in 1336 he was a gentle and studious youth, but in 1358 saw him commence a series of conquests which were to take him from his kingdom in Turkistan as far as the Caspian Sea, the Ural, the Volga through Persia, even into Egypt and India. In 1398 he captured Delhi. Samarkand was his chief city. He died at Ahrar on Feb. 17, 1405.

Tamil Sanskrit name for the Dravidian, or South Indian peoples and languages. The Tamils are small and intelligent and form a merchant and working class. The Tamil language is spoken in S. India and Ceylon. It is the richest and most progressive of the South Indian tongues, and owes less to Sanskrit than Kannarese and Telugu. The literature is of high antiquity.

Tammany Hall Political organisation of New York. The word "Tammany" is an Indian word meaning affable. The Society was founded in 1789 by William Mooney, an Irishman, and there has been a strong Irish element in it ever since. Its headquarters were first in Frankfurt Street and then at the City Hall. The Society has played an important part in city and state

politics, where it has proved a powerful ally of the Democratic party

Tammuz God of the sun in Phoenician legend. He was supposed to spend six months of the year in the heavens with Astarte, the moon goddess, and six in the lower regions. He resembles the Greek Adonis.

Tamping Mining term for the act of filling up a bore hole above the explosive in the process of blasting. This is done to prevent an explosion in the wrong direction, the material or tamp, usually clay or similar matter, being rammed down tightly with a tamping bar.

Tamworth Borough and market town of Staffordshire. It is at the junction of the rivers Tame and Anker, 110 m from London and 13 from Birmingham, on the LMS Rly. The fine parish church, the town hall and the grammar school are of interest. The gateway of the castle is used as a museum. Tamworth's industries include brewing and a trade in farm produce. The town was a stronghold of Mercia before the gold mines. Pop (1931) 7790.

Tamworth Town of New South Wales. A pastoral centre, it is 200 m due north of Sydney, with which it is connected by railway. In the vicinity are gold mines. Pop (1931) 7790.

Tanager Family of finch-like passerine birds. They are natives of America. The plumage is brilliant and the conical bill, notched towards the end, is a characteristic feature. *Tanagra rubra*, the scarlet tanager, or summer red bird, has brilliant scarlet plumage with black wings and tail. In autumn his plumage changes to a dull green like the female bird. The food consists of insects, fruit and berries.

Tanderagee Urban district and market town of Co. Armagh, Northern Ireland. It is on the River Cusher and has a little trade. The castle is a seat of the Duke of Manchester. Pop 1400.

Tanfield Urban district of Durham. In a colliery district, it is 7 m south-west of Gateshead, and 267 from London by the LNE Rly, its station being Shield Row. Pop (1931) 9236.

Another Tanfield is in Yorkshire, 6 m north of Ripon. The church contains monuments of the Marmion family.

Tanga Town and seaport of Tanganyika Territory, East Africa. It has a good harbour protected by the island of Pemba and is connected by railway with the interior. It is 77 m from Mombasa and 73 from Zanzibar. The original town was on the island of Tanga, now a quarantine station. Pop 11,000.

Tanganyika Lake of Africa. It is covers about 13,000 sq m. In the centre of the continent, its eastern shores are British territory and its western shores Belgian. The ports on it include Ujiji, Kigoma, Kirando and Bismarckburg. Kigoma is the terminus of the railway line from Dar-es-Salaam. The chief port on the Belgian side is Albertville. The lake was discovered in 1858.

Tanganyika Territory Territory in Central East Africa, east of Lake Tanganyika. In area it is 374,000 sq m. Formerly German it is now under mandate to Great Britain, small parts being controlled by Belgium and Portugal. It contains the highest peak in Africa, the extinct volcano, Mt. Kilima-

Njaro (19,720 ft). There are large forests containing valuable timber, and much fertile land. The natives keep many cattle and sheep. European settlers grow sisal, coffee, etc., and ground-nuts, copra and cotton are exported. Gold, coal and other minerals are known to exist. The capital is Dar-es-Salaam. Pop 5,022,640.

Tangier Seaport of Morocco. It is situated on the Strait of Gibraltar. The port belonged to England for some 22 years, being part of the dowry of Catherine of Braganza, wife of Charles II. It was captured by the Moors in 1683. To-day it and its surrounding district is international. There is some small trade, but the place is chiefly known as a health resort. Pop 53,000.

Tango Spanish national dance. A modified form of this dance has had considerable vogue in England and on the Continent. It is a slow, graceful dance in 2 time, with a variety of steps which can be combined at the will of the dancers.

Tank Armoured motor vehicle carrying light guns, first used by the British Army for offensive purposes during the Great War. Being secretly made, the first tanks introduced a considerable element of surprise, which contributed to their success. Primarily designed for dealing with machine guns, they were required to traverse rough country, negotiate trenches and overcome minor defences, besides being bullet-proof and armed. They incorporated the caterpillar track, already used in agricultural and other vehicles, disposed along the whole length of the tank which was specially shaped to enable them to deal with trenches 10 ft wide. The modern tank is light, easily handled, fast, and has a large range on one supply of fuel.

Tannenberg Village of East Prussia. It is 75 m from Königsberg, and is celebrated for two battles fought near here. In 1410 the Teutonic Knights were defeated by the Poles, and in August, 1914, the Russians were beaten by the Germans. The battle, directed on the German side by Hindenburg, was one of the most decisive of the Great War.

Tannin Alternative name for tannic acid which is present in gall nuts. It is an amorphous astringent powder very soluble in water and less so in alcohol. An analogous series of tannins is found in many plants, such as tea, oak bark, and catechu, these having the general characters of great solubility, astringency, affinity for the skin of animals, and colouration with iron salts. Tannin is used in making inks, the clearing of wines and in medicine.

Tanning Process by which leather is made from the skins of animals. In vegetable tanning the process depends upon the action of tannic acid upon the skin, and the materials used are oak, wattle and mangrove barks, valonia, divi-divi, sumach, etc. Chromium salts are used in making chromo leather, a highly resistant material, while alum is the tanning agent in another process. Oil tanning is used in making chamois leather to give the required soft supple character.

Tansy Genus of perennial herbaceous plants (*Tanacetum*) of the order Compositae. *T. vulgare*, the native British variety, has a creeping rootstock, green feathery leaves and flower heads of a golden yellow. The plant is aromatic and bitter to the taste. It was formerly used for flavouring and

the motion picture film When the film is being projected, light is transmitted through this record on to a photo-electric cell and transformed into a variable electric current, which is amplified and reproduced as sound by a loud speaker

Talking pictures, which were first produced about 1926, have not only revolutionised film production and technique but have greatly extended the range of motion pictures, while topically and historically they perform a great service by preserving both the image and the voice of famous persons See CINEMATOGRAPHY

Talking Machine See DICTAPHONE, GRAMOPHONE, PHONOGRAPH, TALKING FILM

Tallage Tax levied in England by the king on the boroughs, and on their demesne lands, and by lords on their demesne lands In 1340 tallages were forbidden except by consent of Parliament, and soon they disappeared

Talleyrand Charles Maurice de Talleyrand-Perigord French statesman Born on Feb 13, 1754, at Paris, in his third year he fell and lamed himself for life As a youth he trained for the church and became Bishop of Autun in 1789 During the Revolution he loosened the ties binding him to the Church, and played an important part at Paris from 1789-1793 He later became ambassador in London but on the execution of Louis XVI he was banished and lived in America As foreign minister, from 1797-1807 he frequently sought, but without success, to modify Napoleon's aggression and to seek aggrandisement by colonisation At the Congress of Vienna (1815) where he was the French representative, he gained more favourable terms for France than she would otherwise have had In 1830, as ambassador in England, he played an important part in the foundation of modern Belgium, and in 1834 he negotiated an alliance between England, France, Spain and Portugal He died on May 17, 1838

Tallinn Name sometimes used for Reval, the capital of Estonia. See REVAL

Tallis Thomas English organist and composer Born about 1515 he was organist of Waltham Abbey till 1540 and later with his pupil Byrd of the Chapel Royal He wrote many chants, motets, anthems, Te Deums, etc He died Nov 23, 1585, and was buried in Greenwich

Tallow Tree Chinese tree (*Fracacaria sebifera*) of the order *Euphorbiaceae* The seeds are covered with a tallowy grease from which the Chinese manufacture candles The African tallow tree (*Persea buxifera*) is of the order *Guttiferae* This has large red blossoms and edible berries that taste like butter

Tally Hazel or willow stick, usually about an inch thick, on which notches were cut to indicate an amount paid Tallies were used in the Exchequer in mediaeval times, and the practice was continued in the Treasury till 1826 The amount of the transaction was marked on the two opposite sides the piece of wood was split down the middle one half (the tally) going to the payer as receipt, the other (counter tally) kept by the payee Scoring at cricket was formerly notched on tallies

Talmud Book of heterogeneous Rabbinical writings, a kind of Jewish Bible Some consider it to be Mosalé, others think it was handed down by Ezra

It consists of two parts, the Mishnah, a collection of laws and traditional duties, and the Gemara a kind of commentary Two Talmuds exist known as the Jerusalem Talmud, and the Babylonian, the Gemara of each being different. The latter which is of greater authority among Jews still exercises enormous influence over that people and stands second only to the Bible

Tal-y-Llyn Lake of Merionethshire. It is about 2 m long and is surrounded by beautiful scenery It can be reached from Machynlleth, 8 m to the south

Tamar River of England It rises in Cornwall and flows to the sea at Plymouth It is 60 m long and forms for much of its course the boundary between Devon and Cornwall Its estuary called the Hamoaze, forms part of Plymouth Harbour The river is crossed by a fine bridge at Saltash

Tamarind Tropical leguminous tree (*Tamarindus indica*) Native of the East and West Indies It bears racemes of yellow flowers striped with red, and the pods contain acidulous pulp which surrounds the seeds The pods and bark are used medicinally, while the leaves yield a yellow colouring matter

Tamarisk Evergreen tree (*Tamarix gallica*), of the order *Tamaricaceae* About 10 or 12 ft in height it has feathery branches and minute leaves, while the tiny white or pale pink flowers are borne in short spikes It is used extensively for hedges in seaside places in Southern England, owing to its hardness and immunity from the effect of cold, salt winds There are over 60 species of trees and shrubs in the genus but *T. gallica* is the only one common in England

Tamatave Seaport of Madagascar, lying on the eastern coast Its harbour is formed by a coral reef The town itself is well developed, possessing good thoroughfares, and exports gold dust, raffia and hides It has suffered severely from plagues Pop 15,000

Tame River of England, 30 m long It rises in the south of Staffordshire and flows in a northerly direction to join the Trent. Tamworth stands on the river

Tamerlane (or Timur) Oriental conqueror Born at Kesh in 1336, he was a gentle and studious youth but 1358 saw him commence a series of conquests which were to take him from his kingdom in Turkestan as far as the Caspian Sea, the Urals, the Volga, through Persia, even into Egypt and India In 1398 he captured Delhi Samarkand was his chief city He died at Atrar on Feb 17, 1405

Tamil Sanskrit name for the Dravidian, or South Indian peoples and languages The Tamils are small and intelligent and form a merchant and working class The Tamil language is spoken in S India and Ceylon It is the richest and most progressive of the South Indian tongues, and owes less to Sanskrit than Kannarese and Telugu The literature is of high antiquity

Tammany Hall Political organisation of New York The word "Tammany" is an Indian word meaning "affable" The Society was founded in 1789 by William Mooney an Irishman, and there has been a strong Irish element in it ever since Its headquarters were first in Frankfurt Street and then at the City Hall The Society has played an important part in city and state

politics, where it has proved a powerful ally of the Democratic party

Tammuz God of the sun in Phoenician legend. He was supposed to spend six months of the year in the heavens with Astarte, the moon goddess, and six in the lower regions. He resembles the Greek Adonis.

Tamping Mining term for the act of filling up a bore hole above the explosive in the process of blasting. This is done to prevent an explosion in the wrong direction, the material or tamp, usually clay or similar matter, being rammed down tightly with a tamping bar.

Tamworth Borough and market town of Staffordshire. It is at the junction of the rivers Tame and Anker, 110 m from London and 13 from Birmingham, on the LMS Rly. The fine parish church, the town hall and the grammar school are of interest. The gateway of the castle is used as a museum. Tamworth's industries include brewing and a trade in farm produce. The town was a stronghold of Mercia before the gold mines. Pop (1931) 7790.

Tamworth Town of New South Wales. A pastoral centre, it is 200 m due north of Sydney, with which it is connected by railway. In the vicinity are gold mines. Pop (1931) 7790.

Tanager Family of finch-like passerine birds. They are natives of America. The plumage is brilliant and the conical bill, notched towards the end, is a characteristic feature. *Tanagra rubra*, the scarlet tanager or summer red bird, has brilliant scarlet plumage with black wings and tail. In autumn his plumage changes to a dull green like the female bird. The food consists of insects, fruit and berries.

Tanderagee Urban district and market town of Co. Armagh, Northern Ireland. It is on the River Cusher and has a little trade. The castle is a seat of the Duke of Manchester. Pop 1400.

Tanfield Urban district of Durham. In a colliery district, it is 7 m south-west of Gateshead, and 267 from London by the LNE Rly, its station being Shield Row. Pop (1931) 9236.

Another Tanfield is in Yorkshire, 6 m north of Ripon. The church contains monuments of the Marmion family.

Tanga Town and seaport of Tanganyika Territory, East Africa. It has a good harbour protected by the island of Pemba and is connected by railway with the interior. It is 77 m from Mombasa and 73 from Zanzibar. The original town was on the island of Tanga, now a quarantine station. Pop 11,000.

Tanganyika Lake of Africa. It is about 450 m long and covers about 13,000 sq m. In the centre of the continent, its eastern shores are British territory and its western shores Belgian. The ports on it include Ujiji, Kigoma, Kirando and Bismarckburg. Kigoma is the terminus of the railway line from Dar-es-Salaam. The chief port on the Belgian side is Albertville. The lake was discovered in 1858.

Tanganyika Territory Territory in Central East Africa east of Lake Tanganyika. In area it is 374,000 sq m. Formerly German it is now under mandate to Great Britain, small parts being controlled by Belgium and Portugal. It contains the highest peak in Africa, the extinct volcano, Mt. Kilimanjaro (19,720 ft.).

There are large forests containing valuable timber, and much fertile land. The natives keep many cattle and sheep. European settlers grow sisal, coffee, etc., and ground-nuts, copra and cotton are exported. Gold, coal and other minerals are known to exist. The capital is Dar-es-Salaam. Pop 5,022,640.

Tangier Seaport of Morocco. It is situated on the Strait of Gibraltar. The port belonged to England for some 22 years, being part of the dowry of Catherine of Braganza, wife of Charles II. It was captured by the Moors in 1683. To-day it and its surrounding district is international. There is some small trade, but the place is chiefly known as a health resort. Pop 53,000.

Tango Spanish national dance. A modified form of this dance has had considerable vogue in England and on the Continent. It is a slow, graceful dance in 2 time, with a variety of steps which can be combined at the will of the dancers.

Tank Armoured motor vehicle carrying light guns, first used by the British Army for offensive purposes during the Great War. Being secretly made, the first tanks introduced a considerable element of surprise, which contributed to their success. Primarily designed for dealing with machine guns, they were required to traverse rough country, negotiate trenches and overcome minor defences, besides being bullet-proof and armed. They incorporated the caterpillar track, already used in agricultural and other vehicles, disposed along the whole length of the tank which was specially shaped to enable them to deal with trenches 10 ft wide. The modern tank is light, easily handled, fast, and has a large range on one supply of fuel.

Tannenberg Village of East Prussia. It is 75 m from Königsberg, and is celebrated for two battles fought near here. In 1410 the Teutonic Knights were defeated by the Poles, and in August, 1914, the Russians were beaten by the Germans. The battle, directed on the Gorman side by Hindenburg, was one of the most decisive of the Great War.

Tannin Alternative name for tannic acid which is present in gall nuts. It is an amorphous astringent powder very soluble in water and less so in alcohol. An analogous series of tannins is found in many plants, such as tea, oak bark, and catechu, these having the general characters of great solubility, astringency, affinity for the skin of animals, and colouration with iron salts. Tannin is used in making inks, the clearing of wines and in medicine.

Tanning Process by which leather is made from the skins of animals. In vegetable tanning the process depends upon the action of tannic acid upon the skin, and the materials used are oak, wattle and mangrove barks, valonia, divi-divi, sumach, etc. Chromium salts are used in making chrome leather, a highly resistant material, while alum is the tanning agent in another process. Oil tanning is used in making chamois leather to give the required soft supple character.

Tansy Genus of perennial herbaceous plants (*Tanacetum*) of the order Compositae. *T. vulgare*, the native British variety, has a creeping rootstock, green feathery leaves and flower heads of a golden yellow. The plant is aromatic and bitter to the taste. It was formerly used for flavouring and

medicinal purposes *T. leucophyllum*, a garden variety, has silvery leaves

Tantalum Rare metallic element having the symbol Ta and atomic weight 181.5 It occurs in the minerals tantalite, columbite and struvite When isolated it is a white, ductile, hard metal with a high melting point and electrical resistance It is used for filaments of incandescent lamps and for alloying with steel.

Tantalus In Greek legend, a son of Zeus As punishment for a crime he was sentenced to stand up to his neck in Hades in water which receded when he tried to drink, while above him were fruits which the wind blew beyond his reach when ever he attempted to grasp them. Hence the verb "to tantalise"

Taoism Philosophy and religion of the Chinese The philosophy is a system of the sage Lao Tze, and is associated with movements of the earth and heavens which are the causes of phenomena occurring in the world The religion is a mixture of magic and polytheism and has been largely influenced by Buddhism

Tape Machine Telegraph instrument designed to print messages on a moving paper tape, and used in the distribution of news, especially stock market prices In this instrument a revolving type wheel is pressed against the moving tape by the action of an electro magnet

Tapestry Fabric coverings of furniture, floors and walls, woven with coloured threads by needles instead of in shuttles At the Gobelins factories in Paris, the threads were stretched in vertical frames (high warp), at Beauvais, Bayeux and also where in horizontal frames (low warp) The subjects vary with the prevailing forms of art, but are romantic, historical or pastoral in nature Practised from earliest times, the art has almost died out

Tapeworm Parasite (*Entozoon*) inhabiting the alimentary canal of warm blooded vertebrates It attaches its suckers to the mucous membrane and absorbs its nutrition through its skin Some eight kinds are known in man, and those in animals produce such affections as measles in pigs and oxen, and the staggers in sheep

Tapioca (*Manihot utilisima*) Tropical plant of the order *Euphorbiaceae* It is several feet high, of shrubby growth, and has a large fleshy root. The root contains an acrid milk juice, poisonous in its natural form, which is extracted by pressure and purified Its root also yields a starchy substance which is subjected to heat and dried to form tapioca for use at the table The dried and grated root is baked, forming cassava bread and a beverage called piberry is also made from the fermented juice

Tapir Ungulate mammal (*tapirus*) of the order *Perissodactyla* They are found in Central and S America and Malaya. On the front feet there are four digits, on the hind feet three only A shy nocturnal animal, inhabiting forest regions near water, it is vegetarian in diet The body is clumsy and pig like with short legs and short tail the snout being prolonged into a proboscis The skin is dark brown The Malayan species has a band of white about its middle

Taplow Village of Buckinghamshire It is on the Thames, 4 m from Slough, on the G W Rly There is an interest-

ing old church and here is Taplow Court, the residence of Lord Desborough The village is visited for boating

Tap Root Primary root of certain plants which grows downward without division In some plants it is expanded to form a storage place for plant material as in the beet or parsnip, which tapers towards the end, and the turnip which takes a globular form

Tar Dark brown or black viscid liquid with a peculiar aromatic odour, obtained when wood coal or similar substances are subjected to destructive distillation It is variable in composition, but consists largely of carbon compounds such as acetic and pyrolic acids resins, paraffins, phenols, etc By distillation coal tar yields numerous substances from which aniline dyes are derived Tar is used also as a protective coating for wood and iron, for road making and also in medicine

Tara Village of Co Meath, Irish Free State It is on the Boyne 6 m from Navan On its hill the kings of Ireland were crowned the chieftains assembled, and St Patrick preached

Tarantella Neapolitan dance in 6/8 measure, and the music to which it is performed This quick dance was formerly supposed, by causing perspiration, to drive out the poison caused by the bite of the tarantula, a venomous spider of Tarentum, which was responsible for the malady known as tarantism

Taranto City and seaport of Italy It stands on an island in the Gulf of Taranto, an opening of the Mediterranean Sea, in the extreme south of Italy It is 44 m from Brindisi and consists of a new town and an old one With a large commercial harbour, it is also a station of the Italian Navy The buildings include the cathedral, the castle and a museum The industries include shipping, fishing, oil refining and some manufactures

Taranto was founded by the Greeks who called it Tarentum, and was one of the richest cities on the Mediterranean coast until partly destroyed by the Romans in 209 B.C. Pop (1931) 105,808

Tarantula Several species of large spider, but especially *Lycosa tarantula*, found near Taranto in Italy It is not more poisonous than other spiders of similar size Living in a burrow in the ground, it catches its prey by pouncing on it, not in a web

Tarbert Port of Argyllshire It is on the east side of the Mull of Kintyre, 30 m from Campbeltown There are some ruins of a castle, it is a fishing centre with a good harbour and is visited by tourists

Tardieu André Pierre Gabriel Amédée French statesman He was born in Paris, Sept 22, 1876, and educated there After a journalistic career, during which he was foreign editor of *Le Temps*, he entered the chamber of deputies in 1914, and was High Commissioner of France to the United States, 1917-19 He was a French delegate to the Peace Conference, 1918-19 An adherent of Clemenceau, he firmly opposed any variation of the Versailles Treaty He became Prime Minister in 1929, again in 1930, and on the fall of the Laval government, Feb 21, 1932 He resigned, May 10, on the election of a new

President, following the adverse result of a general election. In 1934, for a time, he was Minister without portfolio. He has published several books of a political character.

Tariff List of goods on which duties are paid when they enter a country. Nearly all countries impose duties on imports, though Great Britain, between 1860 and 1931, preferred free trade. Duties were imposed on certain articles, e.g., tobacco and wines, during that period, but they were for revenue purposes only; industry was in no way protected by tariffs.

In 1903 Joseph Chamberlain advocated a scheme of tariff reform for Great Britain, and led an agitation for the imposition of protective duties. Though not then successful, the movement has been kept alive, and in 1931 the changed economic conditions led to the adoption of a tariff, for which the way had been prepared by the imposition of duties on imported luxuries by Mr McKenna in 1915. Pending the drawing up of a scientific tariff, heavy duties were placed upon certain imports and on certain classes of fruit, flowers and vegetables. This was followed in 1932 by the imposition of a basic tariff of 10 per cent on all manufactured goods, excluding those arriving from other parts of the British Empire. An independent committee of three was established to make recommendations about tariffs and, on its advice, the duties on certain articles were raised beyond 10 per cent, while some of those imposed in 1931 were reduced. This committee remains in being to watch the working of the tariff scheme, and to recommend changes to suit altered conditions. A list of exemptions, reduced duties and additional duties has been published, revised and consolidated as from Jan 1st, 1936. The duties are collected by the board of customs and excise.

It is believed that high tariffs were a contributory cause of the economic crisis of 1931-32, and there has been a good deal of discussion about reducing them. In June the Netherlands, Belgium and Luxembourg made between themselves an agreement for reducing tariffs. See IMPERIAL PREFERENCE, McKENNA, REGINALD.

Tarpeia Figure in Roman legend. She was the daughter of Spurius Tarpeius, keeper of the citadel on the Capitoline Hill. She betrayed the city to the Sabines by opening the gates, but was crushed to death by them. The name was given to the rock on the hill from which traitors were thrown down.

Tarpon (*Megalops atlanticus*) Fish of the herring family. Abundant in South Atlantic waters, it often weighs over a hundredweight. The body is elongated and covered with large silvery scales. It is a food fish and affords good sport to anglers.

Tarquinius Superbus, Lucius. Seventh and last of the traditional kings of Rome. According to legend he began to reign in 534 B.C. He greatly extended the Roman power by the subjection of neighbouring tribes. He completed the Capitol, and built the temple of Jupiter. For 300 pieces of gold he acquired the Sibylline books (see SYBIL). He was eventually driven from Rome, following the outrage perpetrated by his son Sextus on Lucretia (q.v.), and died at Cumae, 510 B.C.

Tarragon Perennial herb (*Artemisia dracunculus*). Native to Spain, Italy and other countries of the Mediterranean region, it is an aromatic plant, allied to wormwood, and is used to flavour vinegar, pickles and sauces.

Tarrytown Village of New York State. It is 25 m. from New York, with which it is connected by railway, and stands on the Hudson River. It is known for its connection with Washington Irving, who made it the Sleepy Hollow of his stories.

Tarsier Rare animal of the genus *Tarsus*, a kind of lout, inhabiting the Eastern Archipelago. It is so named because of its elongated tarsal bones, which produce very long feet and hands. It is about as big as a squirrel, fawn in colour, with large ears and eyes, a tufted tail and disc-like adhesive surfaces on its fingers. It inhabits trees, and feeds on lizards and insects.

Tarsus City of Asia Minor. It is about 12 m. from the north of the River Cydnus. It was an important place under the Greeks and the Persians, but belonged to Rome when St Paul was born here.

Tartan Material cross barred with threads of various colours. Originally of wool or silk, and used in Scotland, where each clan had its own peculiar pattern, the cloth was known as early as the 14th century. After the 1745 rising in Scotland attempts were made to prohibit its use.

Tartar Crude potassium tartrate (K₂H₂C₄O₆). Wines when fermenting deposit a crystalline crust (argol), which, when purified, yields Cream of Tartar. This is used in making tartaric acid, silver cleaning, wool dyeing and in the preparation of drinks and baking powder, also as a purgative. Tartar Emetic is a substance which occasions vomiting. It is, in large doses, a poison and is used as a mordant in dyeing. Tartar of the teeth is a salivary deposit, consisting of mucus and phosphate of lime.

Tartarus In Greek legend a place of punishment in Hades. It was surrounded by a wall and was a place of utter darkness.

Tartary Area inhabited by the Tartars in the Middle Ages. It was partly in Europe and partly in Asia. In the latter continent the name was used for the vast district that stretched to the Pacific.

Tasmania State of Australia. An island south of Victoria discovered in 1642 by Tasman, it became British in 1803. Its excellent climate, noted by Captain Cook, had greatly facilitated development and progress, and, together with natural scenic beauty, is responsible for attracting thousands of visitors yearly. Mining is important, especially zinc, copper, tin and osmiridium. This and other industries owe much to the development of hydro-electric power from elevated lakes, which is still proceeding. Intensive agriculture, such as fruit growing, especially apples, is practised, and timber and wool are important exports. Education, from elementary to university standard, is well organised. Hobart, the capital, is a fine city and the principal port. The area is 26,215 sq m. Pop (1931) 214,694.

Tasmanian Devil Nocturnal marsupial mammal of the genus *Dasypus*, found only in Tasmania. It is about 21 ins in length, with a tail of 7 ins. The limbs are thick-set, short and clumsy, the feet plantigrade, the toes clawed. The black fur is harsh and thick, with white patches on the chest and haunches. Though somewhat resembling the badger, its gait and movements are bearlike. Voracious.

and fierce, it owes its name to the early colonists whose sheep and ponies suffered from its nightly attacks

Tasso Torquato Italian poet He was born in Sorrento, March 11, 1544, the son of Bernardo Tasso, also a poet He became early attached to the ducal court at Ferrara, and while there wrote a beautiful pastoral play, *Aminta*, and his immortal epic, *La Gerusalemme Liberata* Shortly after, his mind became unbalanced, and in 1579 he was confined to hospital for 7 years. Eventually he was summoned to Rome to be crowned as poet laureate, but died April 25, 1596, before the ceremony could take place

Tate Sir Henry British manufacturer, merchant, and patron of art Born in Chorley, Lancashire, on March 4, 1819, he entered the sugar trade and amassed a large fortune A great lover of art, he acquired a fine collection of pictures which he offered to the nation, together with £80,000 towards a building A gallery was erected on the site of the old Millbank Prison on the Thames and opened July 21, 1897 Popularly known as the Tate Gallery, it is under the control of the trustees of the National Gallery Sir Henry also gave liberally to Liverpool University, and presented four free libraries to London He was created a baronet in 1898 and died Dec 5, 1899

Tattersall's Auction rooms in London Here race horses are bought and sold, and the establishment is a meeting place for bookmakers and betting men for settling their accounts with one another The rooms were opened in 1766 by Richard Tattersall at Hyde Park Corner Since 1865 they have been in Knightsbridge

Tattershall Village of Lincolnshire It is 7 m from Horncastle There is an interesting church and a village cross, but the place is more famous for its castle The present building, long a seat of the Cromwell family, dates from the 15th century It was restored by the Marquess Curzon and presented to the nation It is a magnificent example of mediaeval brickwork

Tatting Species of lace made by hand The cotton thread is looped round the fingers and manipulated by means of a small shuttle into tight rings These are then joined to form a pattern Once a popular form of fancy work the shuttles were often of tortoise shell, mother of pearl or ivory

Tattoo Primarily a signal given by a bugle or drum to call soldiers to their quarters Its nature varies with the different branches of the service, but it generally includes 'God Save the King' and 'The Last Post'

The word has come to be used for a military display, given at night Tattoos are held every year at Aldershot and Woolwich Wonderful effects are produced by the moving troops and the use of lights

Tattooing Practice among uncivilised nations of marking the skin by incisions into which are introduced charcoal or coloured liquids This operation is performed in the South Sea Islands with a kind of bone comb dipped in charcoal and driven into the flesh with a mallet High born natives were often tattooed all over, while the result was esteemed as protection against cold heat or insect-bites, as an ornament or as lending an expression of ferocity in battle

The practice, which was condemned by Moses (Lev xix, 28), is now falling into disuse

Tauchnitz Karl Christoph Traugott German publisher Born near Leipzig, Oct 29, 1781, he established a printing and publishing business in Leipzig His fame rests on his enterprise in issuing cheap but excellent editions of the Greek and Latin classics, which soon had a world wide circulation He died in 1836 His nephew, Baron Christian Bernhard von Tauchnitz, born Aug 25 1816 began in 1841 to publish his world famed *Collection of British Authors*, for circulation outside the British Isles He died at Leipzig, Aug 13 1895

Taunton Borough of Somerset, also the county town It is on the Tone, 163 m from London, on the G W Rly The finest building is the church of St Mary Magdalene, with a lofty tower, dating from the 15th century The church of St James is equally old Other buildings include the castle, now used as the county museum There is a market hall and a market cross Taunton is an important agricultural centre and has manufactures of gloves and cider The district around is called Taunton Deane Pop (1931) 25,177

Taurus Mountain range in western Germany, about 55 m in length Some of its peaks overlook the Rhine It is celebrated for its ruined castles, its vineyards and its spas, among them Homburg and Wiesbaden

Taurus System of mountain ranges of Asia Minor, running for the most part parallel to the S E coast The two principal ranges are the Bulghar Dag and the Ala Dag Of the passes of the Taurus the best-known is that called the Cilician Gates, which gives access to the Adana valley In the so-called Anti-Taurus, a northern spur of the Taurus proper is Mt. Argæus, the loftiest peak in Asia Minor

Tau Sagis Wild plant It grows in Turkistan and is said to contain 40 per cent of coagulated pure rubber in its roots In 1932 its cultivation was encouraged by the Soviet authorities as it was hoped that in this way the demand for rubber could be met internally Under the second five year plan some 1,400,000 acres are to be planted with tan sagis, and these will produce 38,000 tons of rubber

Tavistock Urban district and market town of Devonshire It is on the Tavy, 16 m from Plymouth, on the G W and S Rlys A canal connects it with the Tamar The guildhall includes some remains of the abbey Here are Kelly College and Endsleigh, the seat of the Duke of Bedford, whose oldest son is called the Marquess of Tavistock The town has an agricultural trade, but formerly it was a centre of the wool trade and of lead mining Pop (1931) 4453

Tavy River of Devonshire Rising on Dartmoor between Oakhampton and Princetown, it flows south past Tavistock and joins the Tamar about 5 m above Devonport It is about 20 m in length

Taw River of Devonshire It rises on Dartmoor and flows N for 50 m, falling into the sea near Appledore

Tawe River of Wales It rises in the Black Mountains, Brecknockshire and flows S to Swansea, where it falls into Swansea Bay It is about 36 m in length

Taxation Method of raising money from a people for the maintenance of the state. It may be direct or indirect. Direct taxation is levied immediately on the individual, though it may be differently obtained. Income Tax, that is to say a certain proportion of each person's income, is the most obvious type of this kind. Indirect taxes are derived from a general payment on some commodity or activity (e.g., the Entertainment Tax). Here the amount of the tax is paid by the dealer or organiser, who raises the price of his product or entertainment accordingly, thus recouping himself from the public. It is an accepted axiom that if a person is taxed he should also be represented in the legislature.

The term local taxation is sometimes applied to the money collected by means of a local rate by local authorities for the maintenance of public services authorised by the state.

Taxation In law a method of examining, and if necessary reducing, the bills of costs of solicitors. In the supreme court there is a taxing office where this is done, it is also done by the registrars of the county courts. The costs of taxation are borne by the client unless the charges are considered excessive, when they are borne by the solicitor.

Taxidermy Preparation and preserving of the skins of animals. The process was introduced in the 18th century to answer the demands of sportsmen. Formerly the skin was stripped with fine knives or scissors, and stuffed with tightly-packed tow, being made to stand in the desired posture by the judicious use of wire. Nowadays modelling has replaced stuffing, a copy of the body is prepared in full anatomical detail, and the skin placed around it.

Tay River of Scotland. Rising in the hills in the west of Perthshire, it flows across that county to the Firth of Tay, near Perth. It is 118 m. long and on it are Dunkeld and Perth. Its tributaries include the Earn, Almond, Tummel, Garry and Isla. It is famous for its salmon. Loch Tay is a lake in Perthshire, it is 14 m. long and is visited for the fishing. The Firth of Tay is crossed by a railway bridge, the property of the L.N.E. Ry. The first was opened in 1878, but was destroyed by a storm, Dec. 28, 1879. The existing bridge, over 2 m. long, was built between 1882 and 1887.

Taylor Jeremy. English divine. Born in Cambridge, August 15, 1613, he entered Caius College as a sizar at 13, graduated at 18, and was ordained at 21. In 1638 Bishop Aulton made him rector of Uppingham, and after many vicissitudes he was made Bishop of Down and Connor at the Restoration. He died at Lisburn, August 13, 1667. Coleridge called him the most eloquent of divines, if not of men. His *Holy Living* and *Holy Dying* are the finest examples of devotional literature.

Taylor Tom. English playwright and journalist. He was born in Sunderland, Oct. 19, 1817, and educated there and at the universities of Glasgow and Cambridge. He either wrote or adapted more than 100 plays among which were *Still Waters Run Deep*, *The Ticket of Leave Man* and *Our American Cousin*. In 1874 he succeeded Brooks as editor of *Punch*. He died in Wandsworth, July 12, 1880.

Taymouth Name of a castle in Perthshire. Now a hotel, it stands near the union of the River Tay with the loch

of that name. Until 1921 it was the seat of the earls and marquesses of Breadalbane.

Tayport Burgh and port of Fifeshire. It is on the south side of the Firth of Tay, 4 m. from Dundee, with which it is linked by ferry. It has a station on the L.N.E. Ry. The industries include linen and jute mills. Pop. (1931) 3164.

Tchitcherin Georgii Vasilievitch Russian statesman. He was born in 1872, of a noble family, but after leaving the university became a revolutionary, and was banished. He was imprisoned in England during the war, and on his return to Russia in 1918 he succeeded Trotzky as Foreign Commissar. His health broke down in 1928, and except for occasional visits to Moscow he lived abroad mainly in Germany, until January, 1930, when he returned to Russia.

Tea The prepared leaf of the plant *Thea* (*Camellia*) *sinensis*, grown in China for centuries, but only known in England since 1645, when the Dutch introduced it. At first it was infused and kept in barrels like beer. The young leaves are picked, and spread on trays to wither, and then rolled. They are then spread in a moist, fermenting room, and afterwards "fired," (passed on trays through hot-air chambers) sorted, and again fired.

India and Ceylon export about two-thirds, and China one-third of the tea drunk in the British Isles, which are the largest tea-consumers in the world. London is the chief tea-market and controls prices. Tea growing is an important industry in India and Ceylon.

Teaching as a Career. The work of teaching offers an attractive career for both men and women. The salary is reasonably good, the hours are not over long, the holidays are longer than in most occupations, and teachers who work in schools aided or maintained from public funds are entitled to a pension at the age of sixty, provided they have spent not less than thirty years in teaching.

The best preliminary preparation is a good secondary education, followed by a university course. An intending teacher is eligible for a government grant which will pay the cost of tuition and provide a contribution towards maintenance and lodging. After a degree is obtained, a further year is spent in professional training, either in a university department of education or a training college.

Another plan is to enter one of the training colleges provided by municipal authorities or by such bodies as the Church of England or the Wesleyans. Here the student takes a two-year course aided by government grants, and prepares for an examination conducted by university examining bodies, but not leading to a degree. Success in this examination entitles the student to rank as a certified teacher.

Usually the holder of a degree may hope for employment in a secondary school. He must be able to give special instruction in one or more subjects of the school curriculum, while being ready to take part also in the general work of the school. The great public schools usually recruit their staffs from university graduates of good standing, and in schools for boys some athletic prowess is an advantage.

According to the Burnham scale of March, 1925, in public elementary schools the salary of a certificated assistant master begins at a figure of from £168 to £192 a year, according to the district, and rises by increments of £12 a year to a maximum of £312 or £408 a year.

For certificated assistant mistresses the starting salary is from £150 to £180, rising to £240 or £324. Head teachers receive higher salaries according to the locality and size of school. The salaries of an average London headmaster and headmistress are £500 and £400 respectively, though they may rise to £606 and £486.

In state aided secondary schools graduate assistant masters in London begin at £295 a year and rise by annual increases of £15 to £528 a year. In the provinces the corresponding figures are £244 and £480 maximum. Graduate assistant mistresses in London begin at £264 rising to £420 and in the provinces at £216, rising to £384. For headmasters the minimum salary in secondary schools is £600 and for head mistresses £500, and the maximum may be over £1000 a year for an important school. Payment in privately owned schools is on much the same scale. Salaries in state aided schools were subjected to a 10 per cent. reduction in 1931, but half was restored in 1934, and the Burnham Committee resolved that as from July, 1935, salary cuts should not affect annual superannuation allowances beyond 2 per cent.

Teachers in state schools may receive an annual pension depending upon the final salary and the number of years of service. A cash payment is paid in addition. For example, a teacher who has served for forty years will receive on retirement a pension equal to half of the average annual salary during the last five years and a cash payment equal to one and a third times that salary. Retirement is optional at the age of sixty and compulsory at the age of sixty five. In the best privately-owned schools there are also systems of superannuation.

Teachers who hold the qualifications described above are eligible for admission to the Official Register of Teachers on payment of a small registration fee. This entitles them to membership of the Royal Society of Teachers, and the letters MRST indicate definite professional standing, since the Register is authorised by Parliament and maintained by a representative Council of Teachers.

Teak Asiatic timber tree (*Tectona grandis*) of the order *Verbenaceae*. It attains an immense height and bears panicles of small white flowers. The wood, extremely hard and durable is used in shipbuilding.

Teal Small duck (*Querquedula crecca*) of Europe and Asia. It is common throughout the year on British inland waters, and many migrants reach Britain in winter. The male has a chestnut head, marked with a green patch behind the eye, black or buff rump and tail and black and white wing markings. The bill is black and the legs grey. The total length is 14 to 15 ins.

Teasel (*Dipsacus sylvestris*) Common British biennial plant of the order *Dipsacaceae*. The first year it bears only radical leaves which form a large rosette flat upon the ground. The flower stems in the second year attain a height of 5 or 6 ft. They are rough and spiny and bear cylindrical flower heads of purple flowers. *D. fullonum*, a cultivated variety, is used by cloth manufacturers for raising the nap of cloth.

Technical Education

Special training in the arts or sciences under lying a trade or profession, usually taught in a technical school. It has resulted from changed conditions of production whereby the master has no time to instruct his apprentice himself.

In technical schools there are courses in practical instruction for every kind of trade, and in clerical and linguistic work for commercial purposes. With these may be compared the continental trade schools (e.g. *L'Ecole Diderot* at Paris). Modern types are rapidly conforming with commercial conditions, and are attracting greater numbers of students. By the Smith Lever law, the U.S.A. have increased facilities particularly for agricultural instruction.

Teck German family. The name is taken from a castle in Württemberg. In 1871 Francis, a prince of Württemberg, was made Duke of Teck. He married Mary Adelaide, a daughter of the Duke of Cambridge, and settled in England. He died Jan. 20, 1900, and the duchess died Oct. 27, 1897. Their family consisted of a daughter, Mary, who married King George V, and three sons: Adolphus, created Marquess of Cambridge in 1917, Francis, who died in 1910, and Alexander, created Earl of Athlone in 1917. In 1917 the family name was changed to Cambridge.

Teddington Urban district of Middle Thames, and is 13½ m. from London by the S. Ry. The National Physical Laboratory has been here since 1902. The authority of the Port of London ceases at Toddington, and that of the Thames Conservancy begins. Pop. (1931) 23,362.

Te Deum Hymn or psalm used in the services of the Christian Church. Its authorship is unknown, but it was compiled in the 5th century or earlier. It begins with the words *Te Deum Laudamus* (We praise Thee, O God), and is in the prayer book of the Church of England for use at morning prayer. Of the tunes composed for it the most famous is by Handel.

Tees River of England. It rises on Cross Fell and flows east, separating both Yorkshire and Westmorland from Durham. The upper valley of the river is called Teesdale. It flows by Middlesbrough and Darlington and other industrial towns. It is about 80 m. in length and is navigable to Stockton.

Teeth consist of three substances, ivory, enamel and bone, with nerves and blood vessels. The main structure of the tooth is composed of dentine, a hard elastic substance, the exposed part above the gum is covered with enamel, while the surface of the root is covered with bone. The tooth is formed chiefly of calcium phosphate. In man there are 16 teeth in each jaw, arranged symmetrically eight per side. These consist of four incisors, two canines, four bicuspids, and six molars. Teeth develop in two sets: the milk teeth and the permanent. There are twenty milk teeth, ten in each jaw, which drop out in the sixth, seventh and eighth year. The first permanent tooth follows on immediately, and others develop until the wisdom teeth manifest themselves about the eighteenth year, or occasionally later, in some cases they never appear at all.

Teething begins normally about the 6th month. Some babies become quite feverish with teething, and if they seem really ill a doctor should be consulted. The bowels should be kept open and plenty of water and diluted milk given, but the child should not be forced to eat. He should be given a bone or ring to chew.

In case of toothache the only adequate treatment is to have the tooth seen to by a

dentist, and this should be done at the first hint of trouble. Acute pain may be relieved by rubbing the gum with oil of cloves or brandy.

Teheran (or Tehran) Capital of Persia. About 70 m S of the southern shore of the Caspian Sea, it occupies a plain formed from a gravel deposit sloping from the foothills of the Elburz mountain range. It is surrounded by walls, and has an inner circumference of about $7\frac{1}{2}$ sq m. It is the centre of a carpet industry and has been the capital since the last quarter of the 18th century. Pop 350,000.

Teifi River of Cardiganshire. It rises in the north of the county, and flows S W to enter the sea at Cardigan, where it forms an estuary. It is 50 m in length, and for part of its course divides Cardiganshire from Carmarthenshire and Pembrokeshire.

Teign River of Devonshire. It rises on Dartmoor and flows for 30 m. to the English Channel, which it enters at Telgumouth. Newton Abbot is on its banks.

Teignmouth Urban district and seaside resort of Devonshire. It is 15 m south of Exeter and 189 from London by the G W Rly. China clay is shipped from the town, which stands at the mouth of the Teign. Teignmouth had an interesting history in the middle ages, when it was a flourishing port. Pop (1931) 10,019.

Telautograph Telegraphic instrument invented by Elisha Gray for transmitting and recording a message in facsimile. In Gray's instrument a series of intermittent electric currents act upon electro-magnets causing the movement of a stylus or writing pen in a distant station, thus making a copy of a written message. In another form of telautograph devised by J H Robertson, the strength of the current is varied according to the curves of the writing, this varied current acting upon the stylus.

Telegraph Electrical apparatus devised to transmit messages to a distance. The first needle telegraph was patented by Cooke and Wheatstone in 1836, and in the following year tried successfully between Euston and Camden Town Stations. In this form of the instrument a magneto needle at the receiving station is deflected by an electric current sent by a conducting wire from the transmitting station. The Morse telegraph involves the principle of the electro-magnet and is in general use for most land-lines. The Morse code is used for telegraphic messages, the dots and dashes being represented by short or long periods during which the current is kept on.

Recording is made automatically on a tape or by means of a perforated ribbon, and in one type of instrument by printing the message. In submarine telegraphy a siphon recorder invented by Lord Kelvin acts as a receiving instrument and marks the message upon a travelling tape in a series of irregular waves.

The wireless telegraph (*qv*) is based upon similar principles, the messages being transmitted by electro-magnetic radiations.

A method has recently been developed by which photographs can be transmitted by telegraph, the picture being broken up into dots during the process.

Tel-el-Kebir Village of Egypt. Near Cairo, it was the scene of a battle between the British and the Egyptians on Sept 13, 1882. There Arabi Pasha and his army, 38,000 strong, had en-

trenched themselves. Under Sir Garnet Wolseley a British army of 15,000 men marched silently across the desert by night and in the morning the Highland brigade led the attack on the enemy position which was over two miles long. In an hour or more the Egyptians had fled. The British losses were under 500.

Telemachus In Greek legend the son of Odysseus and Penelope. He lived with his mother during his father's absence, and when he was 20 years old he set out to find the wanderer. He returned to Ithaca after his father's return, and assisted him to kill the suitors of Penelope.

Telemeter Instrument for determining distances in surveying and in gun practice. There are a number of types, many coming under the head of range finders. In most cases they are based upon the angular measurements of a triangle whose base is the instrument and whose apex is the object whose distance is to be measured.

Teleology Philosophical term for the doctrine of ends or final causes. It is discussed in Kant's *Critique of Judgment*.

Telepathy Transference of thought. The earliest recorded experiments in telepathy were conducted by Sidgwick in 1871, while among later experimenters may be mentioned Sir Oliver Lodge, yet, to date, the successes have not greatly exceeded those which might be ascribed to chance. Sir W Crookes has attempted to explain telepathy as a series of waves, while others have suggested telepathy to be responsible for mediumship.

Telephone Electrical instrument by which sound is transmitted and reproduced at a distance. The first telephone capable of reproducing speech was invented by Graham Bell and exhibited at the Philadelphia Exhibition in 1876. In this instrument a circular diaphragm of soft iron was made to vibrate by the sound waves impinging upon it in front of the poles of an electro-magnet, whereby a variable current was generated. By a reverse action in the receiver the diaphragm was set vibrating, reproducing the original sound waves.

Improvements were made by Edison, and a carbon transmitter or microphone was devised by Prof Hughes. In the modern type of microphone the action depends upon the varying compression of carbon granules between two carbon discs caused by the vibrations set up by the sound waves.

The wireless telephone (*qv*) is a development on similar principles, but using electro-magnetic radiations for transmission.

Telephotography Long-distance photography. The photographing of distant objects by ordinary photographic methods is rendered unsatisfactory by atmospheric moisture which diffuses the rays of visible light and produces the blurred effect of normal vision. Long-distance photography, however, can now be achieved, with or without the use of a telescopic lens, by using only the infra red rays, which are less easily diffused and so travel in a more direct line than visible rays from the object to the lens, thus giving a sharper definition. For this purpose a special filter is used which cuts out all but the infra-red rays, while the exposure is made on a plate particularly sensitive to these rays. In this way details of landscape, etc., which are obscured

by haze to normal vision, can be rendered clearly in a photograph

Telescope Optical instrument for viewing distant objects. The simplest form of astronomical telescope consists of two lenses placed one at each end of a tube. One of these, the objective, is either a simple convex lens or a compound achromatic lens which receives the rays from the distant object, bringing them to a focus and forming a small inverted image. The other lens, the eyepiece, may be a simple lens or a system of two lenses which presents a magnified and erect image to the observer.

In the reflecting type of telescope a slightly concave mirror at the end of the tube forms the objective, the rays from the open end of the tube being reflected either to one side by a secondary mirror through a lateral eyepiece, or by an aperture in the mirror to a terminal eyepiece. Opera and field glasses are binocular modifications in which there are two parallel telescopes.

Television Transmission by electrical means of representations of events at the time they occur. One successful method breaks up the whole scene into a series of points of light, which by means of photoelectric cells, are converted into electric currents, amplified and transmitted. At the receiving end, the electric signals are converted into light the varying intensity of which, when symmetrically arranged as at the transmitting end, gives a representation of the scene.

The greatest principles required for the accomplishment of television were known as long ago as 1884, but success was not achieved till the perfection of devices for amplifying currents. J. L. Baird, in Britain, and C. F. Jenkins, in America, exhibited television apparatus in 1925, in 1927 the American Telephone and Telegraph Co. gave a public demonstration over a long distance, and in 1928 Baird transmitted images across the Atlantic, and in colour. The B.B.C. began broadcasting television programmes in 1932 and discontinued in Sept., 1935. But the Television Committee, appointed in Feb., 1935, arranged that regular transmission under the aegis of the B.B.C. should start early in 1936 from London's first television station at Alexandra Palace.

Telford Thomas, Scottish engineer. He was born in Eskdale, Aug. 9, 1767, and became a stonemason. In 1783 he moved to London, and in 1787 secured an official position as superintendent of the roads in Shropshire. This led to his appointment as engineer for the suggested Ellesmere canal. He was chosen by the Government to report on the Scottish roads, and became engineer for the Caledonian Canal. In addition, he was responsible for many hundred miles of roads, numerous bridges and work on the harbours of some Scottish seaports. He died Sept. 2, 1834, and was buried in Westminster Abbey.

Tell William, Swiss legendary hero. According to tradition he was instrumental in Nov., 1307, in rescuing his country from the tyranny of Austria, whose duke, Albert II, wished to annex certain cantons. The story of how Tell was compelled to shoot an apple from his son's head, how he subsequently shot Gessler, the Austrian voigt, or steward, and how this led to a rising of the people is accepted as a myth. Schiller made the story into one of his finest plays.

Tell el-Amarna Ancient city of Egypt. It stood

on the right bank of the Nile and was built by Akhenaton (q.v.) as the seat of government in place of Thebes. Excavations here have brought to light important relics of Egyptian civilisation, including 300 clay tablets in cuneiform, which contain correspondence between Akhenaton and his governors in Palestine.

Tellurium Non-metallic element having the symbol Te and atomic weight 127.5. Tellurium, though resembling a metal in its silvery lustre, is placed along with sulphur and selenium. It occurs rarely in the pure state and is found chiefly as a telluride in combination with bismuth, gold, silver, etc., in the minerals sylvanite and tetradymite.

Telpherage System of electric traction on a ropeway for transport of ore or other material over rough country. It consists of a track formed of a strong steel cable supported at intervals by posts. On this cable run the wheels of small suspended trolleys which are propelled by a current from an overhead wire.

Tempe Valley of Greece. It is in the north of the country, between the mountains of Olympus and Ossa, and is now called Lykostomo, or "wolf's mouth." The River Peneus flows through it. To the ancients it was known for its beautiful scenery and in it Apollo was worshipped.

Tempera Ancient method of painting, the forerunner of fresco. The medium used is some kind of sticky substance with which the colour can be mixed and the whole then applied to the stone surface. Yolk of egg was one of the most usual mediums.

Temperance Movement which aims at reducing or ending the consumption of alcohol as a beverage. It originated in 1826 and seeks to attain its purpose by the advocacy of total abstinence, by spreading information concerning the effects of alcohol as a narcotic drug, and by political action. The Report of the Royal Commission on Licensing, issued in 1931, was received with satisfaction by the leaders of the movement, at least so far as its findings are concerned, though disappointment was expressed at its recommendations for legislative reform. See PROHIBITION.

Temperature Thermal condition. Condition of hotness or coldness of a body that determines the transfer of heat energy to other bodies according to the second law of thermodynamics, always to those of lower temperature. Two bodies are at the same temperature when the mutual interchange of heat is the same, but if one body transmits more heat than it receives from the other, the first body is said to be at a higher temperature. The thermal range is measured in units or degrees of temperature by means of a thermometer.

As regards the human body the temperature in health is about 98.4° F., but in fevers may rise to 106° F. or higher, while in collapse it may fall to 80° F. or even lower. Only a limited range of temperature of the air is endured by the body in comfort, the normal condition for a room being about 62.5° F.

Tempering Process by which steel is hardened. Heated steel quickly cooled becomes dead hard but too brittle for use. Reheating it reduces the hardness but leaves it suitable for practical purposes. This "tempering" is indicated by the colour during the heating.

ranging from pale yellow to deep blue in the lowest temper

Tempest Marie Susan English actress She was born in London, July 15, 1866, and educated at the Ursuline convent at Brildenek Belgium Her first stage appearance was as Planetta in Beccaccio She has toured in Canada, the United States, Australia, New Zealand, South Africa, Peking and Manila, and has produced plays by Arneid Bennett, Harold Chapin, Jerome K Jerome, Henry Arthur Jones, Robert Marshall, etc She gave up musical plays in 1900, and turned to comedy, and in recent years has appeared in *The First Mrs Fraser* (1929), *To morrow will be Friday* (1932) and *Theatre Royal* (1934) The jubilee of her stage debut was celebrated in 1935

Templars See KNIGHTS TEMPLARS

Template Pattern in wood or metal used as a guide in the making of mouldings, etc., or of parts of machinery showing the position of the holes for rivets or bolts and other details also the stone block in a wall to hold the end of a girder

Temple Building for worship It originally fulfilled the need for a shelter for a deity, and was a stage onward from open-air worshipping places The earliest Jewish temple was that built by Micah (Judges xvii, 5), but the most famous was that of Solomon This consisted of three parts, the temple proper, a porch in front of it, and a lower building surrounding the other three sides Egyptian temples, which were on a simpler but no less imposing plan, reached their apogee in the magnificent sanctuary of Karnak Then follow Greek and Roman temples, usually rectangular in form The Temple Church, in London, one of the fine round churches in England, was built by the Knights Templars

Temple District in London It lies between Fleet Street and the Thames Embankment, and is so named because it was once the property of the Knights Templars It now belongs to the two legal societies, the Inner Temple and the Middle Temple, both of which have the right to call students to the bar The buildings include the two halls, that of the Middle Temple dating from 1572, the libraries and the chambers in the various squares and courts, e.g., Fountain Court, Pump Court, etc The finest building is the church notable for its Norman doorway, its figures of the Templars, and its marble pillars Its musical services are famous In the gardens an annual rose show is held Temple Bar, the western boundary of the city, is in Fleet Street The old bar is now in Theobald's Park It is a gateway designed by Wren, replacing an old one in which the heads of traitors were exposed

Temple Frederick English archbishop Born Nov 30, 1821, in the Ionian Islands, he was educated at Blundell's School and Balliol College, Oxford He was ordained in 1846 and took up educational work In 1857 he was appointed headmaster of Rugby, where he remained for 12 years In 1869 he was appointed Bishop of Exeter, in 1885 Bishop of London, and 1896 Archbishop of Canterbury He died Dec 23 1902

Temple Richard Grenville-Temple, first Earl Born September 26, 1711, he held various public offices between 1752 and 1761 under his brother-in-law, Pitt (Earl Chatham) He broke with him on the question

of the Stamp Act in 1766, and, together with his brother, George Grenville, bitterly opposed him afterwards He retired from public life in 1770, and died Sept 12, 1779

Temple Sir William English diplomat and author He was born in London in 1628 and educated at Cambridge In 1668 he negotiated the Triple Alliance between England, Holland and Sweden to resist the designs of France on the Netherlands, a treaty nullified by Charles II by his secret Treaty of Dover (1670) He became ambassador at the Hague in 1668, and negotiated the marriage of William of Orange and Princess Mary He is known by his *Memoirs* and various essays He died Jan 27, 1689

Temple William English archbishop Born Oct 15, 1881, a son of Frederick Temple, then Bishop of Exeter, he was educated at Rugby and Balliol College, Oxford He was fellow and tutor of Queen's College from 1904 to 1910, when he became headmaster of Repton School In 1914 he became Rector of St James's, Piccadilly, London In 1919 he was made Canon of Westminster in 1920 Bishop of Manchester, and in 1928 Archbishop of York

Templemore Urban district and market town of Co Tipperary, Irish Free State It is 70 m from Dublin, on the G S Rlys, and is situated on the Suir The town has an agricultural trade Its name is due to the fact that the Templars once had a castle here Pop (1926) 2233

Temple Newsam District of Leeds It is 3 m from the city proper Here in the 12th century the Templars had a house, believed to be the original of Tomplostowe in *Ianhoc* In 1922 Viscount Irwin presented the house and much of the estate to the city of Leeds The house, a Jacobean one and the birthplace of Lord Darnley, husband of Mary Queen of Scots, contains some fine paintings

Tempo Rate of a movement of a piece of music, e.g., grave (very slow), lento (slow), largo or adagio (leisurely), andante (walking), allegro (quick), presto (rapid) These words are often qualified by molto (very), non troppo (not too much) "A tempo" indicates resumption of a former speed

Tenacity Term in physics applied to the resistance of a material to a tensile or stretching force tending to overcome the cohesion of the component particles. Usually the tenacity of a metal or other substance is decreased by a rise in temperature or by the presence of impurities

Tenant One who holds or occupies land or buildings which belong to another, called the landlord For this he pays rent and his tenancy is protected under the Law of Property Act (1925), the Landlord and Tenant Act (1927), the Rent Restriction and other acts See LANDLORD, RENT, REPAIRS

Tenbury Market town of Worcestershire It stands on the Teme, 22 m from Worcester and 149 from London, by the G W Rly There are mineral springs and the town is sometimes called Tenbury Wells. St Michael's College, founded in 1857 for the study of church music, is 2 m distant

Tenby Borough, market town and pleasure resort of Pembrokeshire It is 257 m from London by the G W Rly, and 9 from Pembroke There is a harbour for the fishing Objects of interest are the walls and a gateway of the old fortifications, and the remains of the castle The town has become a

popular watering place, and round is some beautiful scenery Pop (1931) 4108

Tench Fresh water fish (*Tinca vulgaris*) related to the carp. It is a native of Europe and certain parts of Asia Minor. It grows to a length of 16 in and a weight of 4 lb. A fish of quiet waters, it frequents the muddier bed and passes the winter buried there. The colouring is usually deep olive above with grey beneath. There are two barbels at the head. The flesh is somewhat tasteless, and the fish requires prolonged washing to render it fit for cooking.

Ten Commandments See Decalogue

Tendon Fibrous cord, attaching the muscles to the bone which it regulates. The name is frequently applied to those particular tendons which are thick and rounded and attached to round muscles when broad and flat they are known as aponeuroses. Tendons are white and glistening, and consist of fibres joined by cellular tissue.

Tendrils Botanical term for spiral thread like growths which enable certain species of plants to attach themselves to an adjacent support. Some tendrils, as in *Clematis vitalba* or traveller's joy, are extensions of the leaf stalk, and are hard and wirelike. Those of the white honyons are slender coiled shoots which support the trailing stems and enable them to twine in all directions. Other forms are modifications of a part of the leaf blade, or of the leaf blade itself.

Tenebrae Service in the Roman Catholic Church. It is said or sung on the last three days of Holy Week and celebrates the darkness that fell on the earth at the Crucifixion. One by one the lighted candles are extinguished until only one remains alight. This is then hidden in order to be brought forth as a symbol of the Resurrection.

Tenedos Island of Turkey. It is in the Aegean Sea and covers 16 sq m. Here, according to Homer, the Greek fleet anchored during the siege of Troy. The island became famed for its wine and its pottery. It became a Turkish possession and so remained until surrendered to Greece in 1920. By the Treaty of Lausanne in 1923, it was returned to Turkey. Pop 4000.

Teneriffe Largest of the Canary Islands belonging to Spain. Its capital is Santa Cruz and Orotava is another important town. Its scenery and mild climate commend it to visitors. The centre of the island is occupied by the extinct volcano Pico de Teide, whose highest point, El Piton is 12 200 ft high. It has a broadcasting station (41.6 M 0.05 kW). Pop 110,000. See CANARY ISLANDS.

Teniers Family of Flemish painters of the 17th century. David Teniers the Elder was born at Antwerp in 1582, and died there in 1649. He was a pupil of Rubens, and his canvases are either mythological, or rustic in subject. His "Playing at Bowls" is in the National Gallery. David Teniers the younger was born at Antwerp Dec 15, 1610, and died at Brussels April 25 1690. He was a greater painter than his father. His greatest picture, "Meeting of the Civic Guards" is at Leningrad while his "Village Fête" is in the National Gallery, London.

Tenison Thomas English prelate. Born at Cottenham, Cambridgeshire, Sept 29 1636, he was educated at Norwich and Corpus Christi College, Cambridge. In

1680 he was presented to the living of St. Martin in the Fields where he endowed a school for boys. In 1691 he was appointed Bishop of Lincoln and in 1694 Archbishop of Canterbury. He crowned Queen Anne and George I, and died Dec 14, 1715.

Tennant Sir Charles. British merchant. Born in Glasgow, Nov 4, 1823, he was educated there, and entered his grandfather's chemical works at St. Rollox. By his skilful management of this and other industrial ventures he amassed a big fortune. He became a great patron of the arts and was made a trustee of the National Gallery in 1894. His private collection was opened to the public in the Tennant Gallery. He sat in the House of Commons as a Liberal from 1879-86, but later joined Chamberlain as a tariff reformer. He was made baronet in 1885, and died June 4, 1906. His grandson now holds the title of Lord Glenconner, and his daughter Margot married H. H. Asquith (q.v.).

Tennessee State of the United States. It is wholly inland, in the south central part of the country, and covers 42,000 sq m. Nashville is the capital, but Memphis is the largest city. It produces large crops of cotton and tobacco and much coal is mined. Extensive areas are covered with forest. The state is governed by a legislature of two houses. Pop (1930) 2,816,556.

Tenniel Sir John. English caricaturist. Born in London, Feb 28 1820, he became world famous through his long connection with *Punch* (1850-1901), for which he drew the principal weekly cartoon. The last of these appeared in Jan., 1901. He also illustrated *Alice in Wonderland*, *Through the Looking Glass*, *Lalla Rookh* and the *Inglisby Legends*. All his illustrations are remarkable for their originality, their finish, and their accurate, graceful drawing. He was knighted in 1893, and died Feb 25, 1914.

Tennis Ball game. It is played in a walled court divided by a net, and from it the modern game of lawn tennis has developed. It was played in Italy, France and England in the 16th century, when courts were built at some of the palaces. Henry VIII, who built one at Hampton Court, and later Henry IV of France, both played the game.

The game is still played to-day, and there are courts at some of the London clubs, at Oxford and Cambridge and at one or two country houses. On three sides of the court there is an inner wall, with a roof sloping from the outer wall, called the penthouse. On the front wall is a buttress, called the tamhour. In one of the end walls is an opening, called the dedans, and in the other a smaller opening, called the grille. All these have their part in making scoring points. The sides are called the hazard side and the service side respectively. The floor is of stone or composition. Both balls and rackets are much heavier than those used in lawn tennis.

There is an amateur championship at tennis, and its holders have included such noted players as J. M. Heathcote, Alfred Lyttelton, Viscount Grey, and Jay Gould. Peter Latham is perhaps the greatest professional player of the game. Matches are played between the older universities.

Tennyson Alfred, Baron. English poet, He was born at Somersby, Lincolnshire, Aug 6 1809, the third son of the rector and educated at Louth Grammar School and Trinity College, Cambridge. In 1826

Poems by Two Brothers (Alfred and Charles) gave an inkling of the poet's great future. His first publication, *Poems, Chiefly Lyrical* (1830) elicited both praise and derision, but a succession of beautiful lyrics during the next 10 years made his place secure, and in 1850 he succeeded Wordsworth as poet laureate. In this year appeared *In Memoriam*, occasioned by the death of his friend Arthur Hallam.

The Idylls of the King appeared in instalments in 1859, 1870, 1872 and 1885. Of his several plays, *Becket* is perhaps the finest. His last poem, *Crossing the Bar*, would alone entitle him to immortality. In 1884 Tennyson was created Baron Tennyson of Freshwater and Aldworth. He died Oct. 6, 1892, and was buried in Westminster Abbey.

Tenor Third of the four parts of harmonised music, and the highest range of the adult male voice, the compass being normally from C in the second space of the bass staff to A in the second space of the treble staff.

Tension Term applied when a body is subjected to a state of stretching or straining, resulting in an alteration of its original form or volume. The series of forces causing this tension or strain is termed a stress, and this always acts either in a pulling or pushing direction.

Tentacle An elongated arm proceeding from the head or cephalic extremity of a number of lower animals. It is used for gripping or for exploring. The tentacles of an octopus possess great power owing to the suckers upon them.

Tenterden Borough and market town of Kent, 62 m from London, on the S Rly. At one time it was a Cinque Port, but the sea has receded. It is an agricultural town with fairs and markets, and has associations with Ellen Terry. Pop (1931) 3473.

Charles Abbott, appointed Lord Chief Justice in 1813, was made a peer as Baron Tenterden in 1827. He died Nov. 4, 1832.

Terebene Colourless liquid consisting of a mixture of terpene, dipentene, and other hydrocarbons. It is prepared by treating turpentine with sulphuric acid followed by distillation. Terebene has an odour resembling pine-wood, and is used as an antiseptic and deodoriser. A painters' drier called terebine is a mixture of turpentine, linseed oil and metallic salts.

Terebinth Tree, also known as Chian turpentine (*Pistacia terebinthus*). Belonging to the order *Anacardiaceae*, it is a native of southern Europe and the Levant. An oleo-resin, Chian turpentine which exudes from the excised trunk and hardens on exposure, is used in medicine in liniment form.

Teredo Genus of molluscs. They are found in the submerged timber of ships, piers, etc. The small annular shell is open at each end and the molluscs establish themselves when small in the timber, perforating it in numberless directions by means of two small valves. The common ship worm is *Teredo navalis*.

Terence Latin poet. Publius Terentius Afer was born at Carthage in 195 B.C. He was a slave, but his remarkable talents gained for him his freedom. His chief comedy was *Andria*, which was followed by five others. He was fortunate in the protection of Scipio the younger. He died in Greece in 159 B.C.

Teresa Christian saint. She was born in Castile, March 28, 1515, the daughter of a Spanish noble, Alphonsus de Cepeda. She early entered the Carmelite Order, and lived to found 32 convents. She left an autobiography which is a Spanish classic. She died at Alba, Oct. 4, 1582, and was canonised by Pope Gregory XV in 1622.

Term Period of time. Lawyers used it in connection with leases which are for a term of years. At one time it was used for the sitting of the English law courts, and it is still used for the four periods during which students for the Bar eat their dinners.

In educational circles the word still persists. At Oxford there are four terms, but two of them, Hilary and Lent, are kept as one, making in practice three, the others being Trinity and Michaelmas. At Cambridge and practically all the English universities, colleges and public schools, the terms are Lent, Easter and Michaelmas, or Easter, summer and autumn.

Tern Sea bird of the *Laridae*, or gull family. The common tern (*Sterna fuscata*) has a black head and nape of neck, grey back, white rump and under parts, the bill being orange with bluish black extremity, and the legs red. The whole length is 14 to 15 in. The legs are short, and the wings long and pointed. It is a summer visitant to Britain, frequenting inland as well as coastal waters.

Terni City of Italy. It is on the River Nera, 68 m from Rome by railway. It has a cathedral and there are remains of a Roman city. The river Velino, which falls into the Nera near here, has a famous waterfall, 650 ft high, used for generating electric power.

Terpenes Series of isomeric hydrocarbons nearly related to cymene. They form one of the benzene derivatives, and occur in the essential oils of many plants. The principal terpenes are pinene, present in turpentine and the oils of eucalyptus and juniper, limonene, in the oils of lemon and orange, and the solid terpene, camphor.

Terpsichore One of the nine muses. Her province was dancing, and she was pictured holding a lyre. See MUSE.

Terra Cotta Variety of reddish brick-like earthenware, consisting of a mixture of fine clay and sand moulded into the required form, dried in the air and baked at a high temperature. It was used for decorative purposes and statuary by the Greeks and in Italy during the Middle Ages. As a mural decorative material, terra cotta became popular in England during the 19th century, as its partially vitrified surface resists atmospheric action well.

Terrapin Amphibious tortoise of the family *Testudinidae*. One species, *Malacoclemmys terrapin*, found in the salt marshes of the eastern shores of N. America, is used as food. Some terrapins (*Cryptodera*) have a snake-like neck which is vortically bent on itself when withdrawn within the carapace, others (*Pleurodera*) bend the neck laterally for this purpose. See TORTOISE, TURTLE.

Terrier Breed of dog. Light and nimble, with short muzzles and large brains, they are extremely intelligent and brave. Among the many breeds may be cited the English or fox-terrier, smooth of coat; the rough-haired Scotch terrier, the

Skye terrier, short legged, with long body and large ears the small Maltese terrier, and the hull terrier, which possesses many of the qualities of the bull-dog

Territorial Army Part of the British Army It was established under the Territorial and Reserve Forces Act of 1908 by Lord Haldane who made it a self-contained body, with cadets, officers' training corps, and veteran reserves The modern army demands a four years engagement, 14 days' service per year, and attendance at camp, usually in August The Territorial Army first served in the War in Sept., 1914 Its numerical force in 1934 was 198,935 See ARMY

Territorial Waters Belt of sea surrounding the coast of a state and subject to its jurisdiction By the Territorial Waters Jurisdiction Act of 1878, English courts have power to arrest and try persons, whether British subjects or not, for offences committed on the high seas within one marine league (i.e., the range of a gun) from the coast Twelve miles from the coast is the limit within which the U.S.A. by treaty with Gt. Britain and other powers, has the right to seize suspected "boot-legging" vessels

Territory Land forming part of a federal state, but not fully organised with state rights, e.g., the North West Territories of Canada A territory is usually administered by officers of the federal government

Terror Extinct volcano of Ross Island, Antarctica It is 11,000 ft high, and was named after the ship of Sir James Ross, who discovered it in 1841

Terry Dame Ellen Allida English actress She was born in Coventry Feb. 27 1848 making her first stage appearance at the age of 8 Her real début was in 1863, at the Haymarket, as *Gertrude* in *The Little Treasure* In 1875 she made a sensation as *Portia* under the Bancrofts In Dec., 1878, began her memorable association with Irving at the Lyceum After Irving's death in 1905 she continued to act at the Court Theatre under her own management Her stage jubilee in 1906 excited world wide interest In 1925 she was given an O.B.E. She died July 21, 1928 Sir Johnston Forbes Robertson said of her that "taken all in all she was one of the most remarkable figures in the history of the stage"

Tertiary Geological group of systems of strata Lying above the Cretaceous rocks, it is also known as Cainozoic, a term implying that the forms of life present are more nearly related to present types This period is divided into Eocene Oligocene, Miocene Pliocene and Post Pliocene The climate was mild at first then tropical followed by a cold period and during this age mammals became abundant and diversified in character, finally approaching existing genera

Tertiary Member of a Roman Catholic order Tertiaries were instituted by the Mendicant Orders as a third order the first being the friars and the second the nuns They were laymen or women who shared in the religious life of the community, but did not live under a rule They are now divided into Regulars leading a fully organised religious life and Seculars living according to the original idea

Tertullian Christian theologian Born about 155 at Carthage,

Quintus Septimus Florens Tertullianus was not converted to Christianity until after 190 He was the founder of a Christian Latin literature and influenced Cyprian and Augustine, as well as many other early religious writers The unity of the early Church owes much to him He died in 222

Teschen Town of Poland It is about 50 m S.E. of Troppau, and is situated on the Olsa, a tributary of the Oder Coal is mined, and other industries are tanning, cloth weaving and flax spinning In 1623 the duchy became an appanage of the Bohemian crown, and in 1722 it passed to Austria In 1920 the Teschen district was divided between Poland and Czechoslovakia The Poles call it Cieszyn and the Czechs Tesin Pop. 23,336

Test River in Hampshire It rises in the north of the county, and flows into Southampton Water, which it enters near Totton It is a famous trout stream Its chief tributary is the Anton, and Stockbridge and Romsey are the largest places on its banks

Test Act A measure passed in England in 1673 By it every one holding office must take the sacrament according to the rites of the Church of England, once a year After a time it ceased to be enforced, but it was not repealed until 1828

Testament Any solemn declaration, a statement that is witnessed and therefore authentic A will is called a testament and the word is used for the two parts of the Bible, the New and the Old Testament See WILL

Tester English coin now obsolete It was coined in the 16th century and was worth about 1s 6d Later the word was sometimes used for a sixpence Another tester is the canopy over a headstead

Tetanus Infective disease Popularly known as lockjaw It is due to the action of the *Bacillus tetani* introduced into the body through a wound from infected soil The virus acts specially upon the nervous system causing a spasm of the jaw and other muscles The use of an antitetanic serum has been found of value

Tetany Nervous disease connected with the impaired action of the parathyroid glands It occurs in children suffering from rickets or the effects of teething and also in adults weakened by certain diseases or defective hygienic conditions It is characterised by attacks of tonic spasms of the muscles, especially those of the hand or foot

Tetbury Urban district and market town of Gloucestershire It is 8 m. from Stroud and 98 from London, by the G.W. Ry The town has an agricultural trade Pop. (1931) 2237

Tetradymite Alternative name for telluric bisminth, a mineral consisting of the telluride of bismuth occurring associated with gold in N. America, Norway and Hungary Tetradymite is found massive, granular or in tabular steel grey crystals showing a metallic lustre In some cases sulphur and selenium also are present

Tetrarch Originally the ruler of a fourth part It came to be used for any subordinate ruler, especially for the princes who ruled in Syria when it was part of the Roman Empire There is a reference to Herod the Tetrarch of Galilee in Luke iii

Tetrazzini Luisa Italian singer Born in Florence in 1871, she

studied singing there under Cecherini, and made her debut in 1896 in the Teatro Verdi, Florence. She captured London on her first appearance at Covent Garden in 1907. A wonderful coloratura soprano, she excels in Italian opera, her favourite rôles being *Lucia* and *La Sonnambula*. In 1921 she published *My Life of Song*. In 1933 she visited Britain in the course of a "Farewell Tour".

Tettenhall Urban district of Staffordshire. It is 2 m from Wolverhampton. Near is Wrottesley Hall, the residence of Lord Wrottesley. Pop 5767.

Tetuan City of Morocco. It is about 6 m from the Bay of Tetuan, and 2½ m from Ceuta. Connected by railway with the coast and the interior, it is the capital of the Spanish zone. Pop 38,000.

Tetzel Johann, Dominican monk. Born in Leipzig about 1456, he entered the Dominican Order in 1489. In 1517 he travelled in Germany, selling indulgences to assist Pope Leo X. in raising funds for the building of St Peter's, Rome. Luther, indignant at the procedure, nailed his famous 95 theses on the church door at Wittenberg, combating this abuse, and others. Indirectly this act led to the Reformation in Germany. Tetzel died of the plague at Leipzig on July 4, 1519.

Teutonic Order Religious order. Together with the Templars and Hospitaliers it came into being during the Crusades. It owes its origin to some pious citizens of Bremen and Lübeck, who desired to alleviate the sufferings of the troops attacking Acre in 1190. Later it became a powerful instrument for the spread of German civilisation, was suppressed by Napoleon in 1809, but was revived in Austria in 1830.

Teviot River of Roxburghshire. It rises on the Dumfriesshire border and flows across the county until it falls into the Tweed near Kelso. It passes by Hawick, is noted for its fishing and is 40 m in length. The beautiful district through which the river flows is known as Teviotdale.

Tewkesbury Borough and market town of Gloucestershire. It is 8 m from Cheltenham and 153 from London, by the LMS Rly., and stands on the Avon near its junction with the Severn. An agricultural centre, the town is famous for its abbey church, once part of a Benedictine monastery. Tewkesbury is the Nortonbury of *John Halifax, Gentleman*. Pop (1931) 4352.

During the Wars of the Roses, the Battle of Tewkesbury was fought near here, May 3, 1471, when the Lancastrians were defeated.

Texas State of the United States. It is in the south of the country with a coastline on the Gulf of Mexico. It covers 265,900 sq m., making it the largest state in the union. Austin is the capital, but there are many larger places, especially Houston, Dallas, San Antonio, Fort Worth, El Paso, and Galveston. The state produces an enormous quantity of cotton, maize, wheat and oats. Fruit is extensively grown and there are very productive oil wells. It is governed by a legislature of two houses. Formerly part of Mexico, Texas was an independent republic, 1836 to 1845, when it became a state of the United States. Pop (1930) 5,824,715.

Texel Island of the Netherlands. It covers 70 sq m and is the most westerly of the Frisian Islands. De Burg is the chief town. The northern part is famous

as a haunt of seabirds. The inhabitants are engaged in fishing and keeping sheep.

On July 31, 1663, an English fleet, under Blake and Monk, defeated a Dutch fleet here. On Aug 11, 1673, there was another fight between the same antagonists. The English were helped by the French, but the result was indecisive. On Oct 11, 1797, a Dutch fleet was defeated here by Duncan's ships.

Textiles General name for woven goods. The raw materials employed may be flax, silk, wool or cotton. In Great Britain the principal centres of the textile trade are Lancashire and Yorkshire for cotton and wool, Northern Ireland for linen, and certain districts in Scotland, e.g., the Hebrides, for special tweeds.

Thackeray William Makepeace. English author. He was born July 18, 1811, in Calcutta, of Yorkshire parentage, and educated at Charterhouse and Cambridge. He then took up, successively, law, journalism, art (in Paris), and journalism again, and contributed for a time regularly to *The Times*. In 1840 appeared his first book, *The Paris Sketchbook*. He joined *Punch* in 1842, using both pen and pencil. Early in 1847 he began *Vanity Fair*, issuing it in monthly parts. It was finished in July, 1848. Thackeray's reputation was made, and he became the idol of society. *Pendennis* and *Esmond* quickly followed, and he then conducted a successful lecture tour in the United States. *The Newcomes* appeared in 1853, he edited *The Cornhill Magazine* from 1860-62, his *Roundabout Papers* appearing in it, and he was engaged on *Dennis Duval* when he died suddenly, Dec 24, 1863. Just as Dickens was a master with his pictures of low life, so was Thackeray supreme in his high life delineations.

Thais Greek courtesan. She is known for her association with Alexander the Great. She went with him to Asia, and the legend says she persuaded him to burn the Persian palace at Persepolis. Dryden, in *Alexander's Feast*, describes the incident.

Thaler Old coin of Germany. It was first struck in the valley of St Joachim in Bohemia, and was originally known as a Joachimsthaler. It was in circulation from about 1520 until the latter part of the 17th century. The word dollar is a corruption of thaler. The silver thaler had a value of about three shillings.

Thales Greek philosopher. He was born about 640 B.C. at Miletus and lived until 550. Regarded as one of the seven wise men of Greece, he put forward the idea that water is the first principle of the universe, everything else being but a variant of it. Although his theory is absurd, he was the first to suggest a scientific explanation of the facts of the universe. He is said to have foretold an eclipse of the sun that took place in 585 B.C.

Thalia Name of one of the nine muses. The muse of comedy, she is usually represented with a comic mask and a shepherd's staff.

Thallium Rare metallic element having the symbol Tl and atomic weight 204.39. It is widely diffused in small quantities in iron pyrites, chalcopyrites, mica and lepidolite, also as a selenide in certain silver ores. It is a soft, heavy, white metal resembling lead in many of its properties, and readily tarnishes on exposure to air.

Thame River of England. It rises in the Chiltern Hills and flows past

Thame to the Thames, which it enters near Dorchester in Oxfordshire. It is 35 m. in length.

Thame Urban district and market town of Oxfordshire. It is 41 m. from London and 15 from Oxford, by the G. W. Rly., and is situated on the Thames. It is an agricultural centre. Lord Williams' Grammar School is an old foundation, and the Spread Eagle is a famous inn. Near is Thame Park. Pop. (1931) 3019.

Thames River of England. It rises in the Cotswold Hills and flows in an easterly direction to its estuary in the North Sea. From Lechlade in Gloucestershire to the Nore it is 250 m. long, the last 60 being from London Bridge to the open sea. It flows past Oxford, Reading, and other places, and is crossed by a number of bridges, especially in the London area. The lowest is the Tower Bridge. Below this it is crossed by tunnels, one being between Greenwich and Poplar, and lower down by ferries at Woolwich and Gravesend. The chief tributaries from the north are the Cherwell, Thame, Colne, Brent, Lea and Rodong, from the south they are the Kennet, Loddon, Wey, Mole, Darent and Medway. Canals connect it with the Severn and other waterways. At London Bridge the river is 300 yds. wide, at Greenwich 800 yds., and at the Nore 6 m.

The Thames is tidal to Teddington, and from there to Oxford it is given up almost entirely to boating and angling, although steamers go regularly along it. On its banks are many beauty spots, such as Goring and Clivedon. Below Teddington it is a commercial river controlled by the Port of London Authority. It is much subject to floods. A good deal has been done to alleviate these, although there were serious ones in London in Jan. 1928.

Thames River of Canada. It rises in the peninsula of Ontario between Lakes Huron and Erie and flows into Lake St. Clair. It is 160 m. long and on it is the city of London.

Thames Town and seaport of New Zealand. It stands on a bay of the North Island, 40 m. from Auckland, with which it is connected by railway. There is a little shipping, and in the neighbourhood are gold mines. Near the town a river called the Thames, or the Waihi, falls into the bay.

Thames Conservancy Body appointed to look after the River Thames. It controls the river from its source down to Teddington. The duties include the care of the locks and the prevention of floods. It dates from 1857. Its members are chosen by the county councils and other authorities whose interests adjoin the Thames. Serious drought in this area in 1933 and 1934 caused grave concern, and suggestions for a regulated national water supply were brought forward. The offices are in Norfolk Street, Strand, London WC2.

Thames Ditton District of Surrey, part of the urban district of Esher and the Dittons. It is 14 m. from London by the S. Rly., and stands on the Thames. The place is an angling centre. Pop. 8450. See ESHER.

Thameshaven Seaport of Essex. It is 32 m. from London on the L. M. S. Rly. Developed as a centre for the storage of oil, it has wharves and other accommodation for the landing of the fuel.

Thane Title of honour among Anglo-Saxons. Originally confined to

personal followers of the king, the honour could be gained by a freeman who acquired 5 hides of land or made 3 sea voyages. A thane was also entitled to sit in the Witan. Thanes grew in powers with the kings, but the title lost significance after the Norman Conquest.

Thanet District, sometimes called an island, of Kent. In the north-east of the county, it is made an island by the River Stour. It is surrounded on three sides by the sea, and its prominent headland is the North Foreland. On it are Margate, Ramsgate, Broadstairs, and other watering places, as well as Ebbsfleet.

Thanet beds is the geological name for the lowest division of the Eocene in Gt. Britain. It is found in Thanet, and in it are many marine fossils.

Thanksgiving Day Holiday in the United States. It began in New England as a thanksgiving for the harvest. In the 19th century it was made a general holiday. The last Thursday in November was chosen and since 1864 this has been a general holiday.

Theatines Order in the Roman Catholic Church. It was founded in 1524 by the cleric who afterwards became Pope Paul IV.

Theatre Building for public performances. The drama originally rose from the choric dances composed in honour of Dionysus. The cult of the theatre was very wide spread in Greek and Roman times, and great amphitheatres, capable of seating 40,000 persons, were constructed. In the Middle Ages set stages were abandoned for booths and tents, while miracle plays replaced dramas. The first English theatre was constructed at Shoreditch in 1576, but theatre construction and popularity reached its apogee in England in the 19th century. The post-war years have seen a marked decline in dramatic activities, amateur and professional, owing to the popularity of the film, which responds to an increased desire for action.

Thebaine Alkaloid also known as paramorphine occurring in minute proportions in opium. When isolated it crystallises in square plates of a silvery colour. In its physiological action thebaine is more like strychnine than morphine, and in its molecular structure is similar to the closely allied opium alkaloid, narcotine.

Thebes Ancient city of Boeotia (Greece). It is said to have been built by Amphion at whose playing of his lyre the stones moved into their places. It was the birthplace of Hercules and Bacchus. It appears very early as a flourishing city, with seven gates, the rival of neighbouring Athens. In 371, at the Battle of Leuctra, Thebes defeated Sparta and became the foremost city of Greece. With the death of Epaminondas, its glory faded, and it was partially destroyed by Alexander in 336.

Thebes Ancient city of the Upper Nile, now completely in ruin. One of the oldest cities of Egypt. It reached the zenith of its greatness in the 18th and 19th Dynasties under Rameses II., when its mammoth buildings and riches were the envy of the world. Later, the seat of power moved northward and after the sacking of the city in 668 B.C. by Assur banipal, it never recovered its former greatness. Thebes, the greatest collection of monumental ruins in the world, boasts of a giant necropolis, the colossus of Rameses II.

(58 ft. high), the temples of Karnak and Luxor, and the colossi of Memnon.

Thecla Christian saint. She lived at Iconium in Asia Minor, and was converted to Christianity by the preaching of S. Paul. She suffered persecution. A book of the Apocrypha called *The Acts of Paul and Thecla*, deals with her career. Another Thecla was an English saint who went with St. Boniface to Germany.

Theebaw King of Burma. He began to reign in 1878. He failed to keep his engagements with Great Britain and this, together with some years of bad government, led to war in 1885. After a short campaign the king was deposed, and sent a prisoner to India. He died Dec. 16, 1916.

Theft General term for robbery, or the act of acquiring property unlawfully. In English law it may be burglary, larceny or embezzlement, and the punishment depends upon the nature of the offence and the amount at stake. Robbery with violence is punished more severely. See LARCENY.

Theism Belief in the existence of God, and in His influence upon the world. Theism should not be confused with deism, which admits the existence of God, but denies His revelation in the world. Theism corresponds to the Natural Theology of the Romans, and, in its exclusion of polytheism, has been extensively meditated through the ages. Cicero was a theist, as were Kant, Hegel (whose theism was impregnated with pantheism), Descartes (who sought God as a Cause), Malebranche, Leibnitz, and others.

Themis In Greek legend a wife of Zeus and Ge, and was regarded as the goddess of law. She bore to Zeus the three Hours and the Fates. Later he left her for Hera.

Themistocles Athenian general and statesman. Born about 514 B.C., he became the political leader in Athens after the ostracism of Aristides (482), and induced the Athenians to build a navy and fortify the Peloponnese. In 480 B.C. by means of a stratagem, he inflicted a crushing defeat near the Isle of Salamis on Xerxes, who had arrived with an enormous fleet. This victory and others over the Persians made Athens the foremost maritime power of the period. Themistocles, however, now lost the confidence of the people, was ostracised, and settled at Magnesia (q.v.) where he died in 449 B.C.

Theobald's Park District of Hertfordshire. It is near Waltham Cross, being 12 m. from London, on the L.N.E.R. Near here Lord Burghley built a fine house which came to James I., who died here in 1625. It was pulled down and sold in the 18th century, and near the site a new house was built between 1765 and 1770. In the park is old Temple Bar. In 1931 the house was opened as an hotel or country club.

Theocritus Greek poet. He was born about 300 B.C. probably at Syracuse, and lived first at Cos and then at Alexandria. Of his poems 30 called *Idylls* are extant. He is the first and the greatest of the pastoral poets, and also wrote epic poems. His pastoral poems are famous for passages beautiful in idea and perfect in form. They influenced the work of Virgil and have been translated into English.

Theodolite Instrument used in land surveying for measuring

areas by the method of triangulation. By means of the theodolite horizontal and vertical angles are measured. It consists essentially of a telescope capable of being rotated in a vertical and a horizontal plane, the movements being read off by means of two graduated circles. A compass and a spirit level are incorporated, and the instrument is supported on a tripod.

Theodora Roman empress. She was the mistress and then the wife of Justinian I., over whom she exercised much influence. A later Theodora was the wife of Theophilus, and was regent for her son, Michael III in 842.

Theodoric the Great. Founder of the Ostrogothic monarchy. Born about A.D. 454, he led the East Goths from Pannonia over the Alps in 487, defeated Odoacer at Aquileia and Verona, and after the capture of Ravenna in 493 founded the Ostrogothic Empire, comprising Italy, the lands as far as the Danube, Switzerland, S.E. Gaul and Dalmatia. His wise and just rule gave the country a period of tranquillity and prosperity not enjoyed for centuries, and few autocratic rulers in history have, on the whole, used their powers so well. He died Aug. 30, 526. As Dietrich von Bern he figures largely in Germanic legends, such as the *Nibelungenlied*.

Theodosius I. The Great. Roman Emperor. He was born about 346 in Spain. In 379 he was offered the emperorship of the East, and for 4 years successfully resisted the oncoming tide of the Goths, who were more and more threatening the very existence of the empire. After the death of Gratian and Valentinian II he became (the last) sole ruler, and on the whole ruled wisely. Soon after his death, Jan. 17, 395, began the barbarian invasions which eventually led to the overthrow of the empire.

Theodosius II, grandson of the above (401-50), succeeded his father, Arcadius, in 408. From 441 the Balkan region was frequently overrun by Attila's hordes, who were sometimes beaten back, sometimes bought off. He compiled the *Codex Theodosianus*.

Theology Science of religion, the study of God and man, and their relations to one another. Theology may be dogmatic, stating what is taught by the Scripture, exegetical, interpreting the Bible, historical, moral, polemical, metaphysical or practical. The first theologians were the Greek Gnostics, after which may be cited Athanasius, apostle of human immortality, Augustine, Calvin, the father of the Protestant faith, Luther and the leaders of the Oxford Movement. Among modern tendencies in moral theology are the principles of the German, Barth, which insist upon a greater spiritual reality.

Theosophy Religious system. The word means "divine wisdom" and has been applied to various systems of philosophy and religion, which profess to attain to a knowledge of God by direct intuition. These include the Theosophical Society (London office, 45 Lancaster Gate W. 2), founded by Madame Blavatsky in 1875, which has 400 branches throughout the world. Its teachings, which have close affinity with Buddhism, Gnosticism and Neoplatonism, are based on the principles of Karma and Re-incarnation (q.v.).

Therm Term adopted in England for the thermal unit of heat. It is defined as the amount of heat required to raise

1 lb of water through one degree Fahrenheit. The term is also used in connection with the consumption of coal gas for domestic purposes measuring the quantity equal to 100,000 British thermal units

Thermionics Branch of physics dealing with the emission of electrically charged particles from heated solid matter. The thermionic valve, used in wireless telegraphy and broadcasting, consists of a metal filament enclosed in an evacuated tube and heated by an electric current. The electrons given off enable electric current to pass to another conductor (the anode) only in one direction. The valve can therefore be used for rectifying alternating electric currents, and also for amplification and the production of high frequency alternating current, the control being introduced by a third electrode, the "grid."

Thermit Mixture of aluminium powder and a metallic oxide, usually that of iron, used for producing high localised temperatures for welding iron or steel rails, etc. Aluminium has a great affinity for oxygen, and when in contact with an oxygen-carrying substance and ignited usually by means of magnesium ribbon, a violent action takes place with the evolution of great heat. Defective castings can often be repaired by the thermit process.

Thermochemistry Branch of physical chemistry dealing with the relation between heat and chemical action. The quantity of heat evolved during chemical action bears a definite relation to the quantity of the elements involved. The study of the subject has had an important bearing on many industrial processes.

Thermodynamics Section of physical science dealing with heat in relation to mechanical work. Thermodynamics owes its inception principally to Joule who first determined the mechanical equivalent of heat, definitely asserting that heat is a form of energy. The first law of thermodynamics states that a definite amount of heat is absorbed for every unit of work done and that a given quantity of work produces a definite amount of heat. The second law states that heat energy is transferred always from a high to a low temperature.

Thermograph Thermometer which registers a continuous record of the variations of temperature. In one form a strip composed of two metals with dissimilar coefficients of expansion under heat is fixed at one end and connected at the other to a pen marking on a revolving drum. Alterations in temperature cause the pen to rise or fall leaving a permanent record.

Thermometer Instrument for measuring variations in temperature by the expansion or contraction of a liquid or gas. One thermometer in general use consists of a sealed capillary glass tube ending in a bulb and containing mercury in the lower part with a vacuum in the upper portion. The thermometric scale commonly used in English speaking countries is that of Fahrenheit with freezing point as 32 and boiling point at 212°, but for scientific work the Centigrade scale with 0° as freezing point and 100° as boiling point is used everywhere. Specially constructed thermometers are employed for registering maximum and minimum temperatures for clinical purposes, etc.

Thermopylae (Gr "Hot springs") Pass of Greece. It leads from the north into the south of the country, being between the mountains and the sea on the east coast. Here, in 480 B.C., about 300 Greeks under Leonidas, King of Sparta, defended the pass against a Persian army, one of the great feats of antiquity. The Persians, by treachery, got to the rear of the Greeks who were all killed. Their famous epitaph may be translated as, "Here we lie, Sparta, obedient to thy word."

Thermostat Appliance for indicating automatically changes in temperature by the expansion of metals, and used for regulating steam pressures or temperatures in incubators, etc. One type used in some fire alarms consists of a platinum wire, connected with an electric circuit, fused into a thermometer bulb, and another wire into the tube about the normal temperature level. On an excessive rise in temperature the mercury contacts the upper wire, completing the circuit and ringing a bell.

Theseus Legendary hero of Attica. The son of Aegeus, King of Athens, he performed many marvellous feats, freeing his country from robbers and monsters. Perhaps the greatest was the slaying of the Minotaur, a monster living in Crete, in the labyrinth. The Athenians had to pay him a periodical sacrifice of seven youths and seven maidens. Ariadne, daughter of King Minos, gave Theseus a ball of string, which he unwound on entering the labyrinth, thus leaving a clue to the exit.

Thespis Greek dramatist. He lived in the 6th century B.C., and is regarded as the founder of the drama, as he introduced an actor to assist the chorus in the festivals that were held in honour of Bacchus. The actor wore a mask and spoke from the platform, being responsible for the prologue and the dialogue. Thus the choral songs of the festival became the drama that was one of the greatest productions of Greece.

Thessalonians Epistles to Two New Testament books. They appear to have been written by Paul to the Church at Thessalonica (mod Salonica) not very long after his visit to that place recorded in Acts xvii. They are probably among the earliest of his letters. Their purpose is to congratulate the Thessalonian Church on its steadfastness under persecution, to reply to charges made against Paul, and to deal with difficulties about the Second Coming of Christ.

Thessalonica Original name of the town of Salonica (q.v.).

Thessaly District of Greece. In the north of the country, it lies to the south of Macedonia. The River Peneus flows through it and it is really a plain about 70 m across surrounded by mountains. The Vale of Tempe leads through them to the north.

Thetford Borough and market town of Norfolk. It is 31 m from Norwich and 94 from London by the L.N.E. Ry. It takes its name from the River Thet, which here falls into the Little Ouse. There are remains of two religious houses. There is also a grammar school and a museum. It has an agricultural trade and brewing is carried on. In Anglo-Saxon times it was the capital of East Anglia and had a bishop whose see was transferred to Norwich. To day the Bishop of Thetford is a suffragan of the Bishop of Norwich. Pop (1931) 4087.

Thetford City of Quebec, Canada. It is 76 m from Quebec, and is served by the Quebec Central Rly. Here are asbestos mines. Pop 7886.

Theydon Bois Village of Essex. It is 15 m from London, on the L.N.E. Rly. The church is modern. Here are Theydon Garnon and Theydon Mount, both with churches of interest.

Thiepval Village of France. It is on the River Ancre 4 m from Albert. It was the scene of fierce fighting during the Great War, especially during the Battle of the Somme (July, 1916), when it was one of the places taken by the British. It has a memorial to the men of the Ulster Division and here in 1932 the Somme memorial was unveiled by the King when Prince of Wales.

Thiers Louis Adolphe. French statesman and writer. Born at Marseilles, April 16, 1797, he became a barrister and in 1821 went to Paris, where he soon became a prominent Liberal. Between 1823 and 1827 he wrote his famous *Histoire de la Révolution Française*, and in 1830 helped to found a news paper, the *National*, which helped to provoke the revolution of that year. Elected Deputy for Aix in 1830, he was Minister of the Interior in 1832, and became President of the Council and virtual Prime Minister. Resigning in 1836, in 1840 he was again President of the Council and Foreign Minister. Exiled for a year after Louis Napoleon's *coup d'état*, he returned to politics in 1863 and after the fall of the empire in 1870, he negotiated for peace. From 1871 to 1873 he was President of the Republic. He died Sept. 3, 1877. Thiers also wrote *L'Histoire du Consulat et de l'Empire*.

Third Degree Originally an American slang expression (probably connected with the "Third Degree" in Masonry), it has now come into general use to denote the employment by the police of violence or other forms of physical maltreatment of a prisoner in order to extort a confession.

Third Party Term used in English law. It describes a person who is brought into a law suit, but is not a principal. It is also much used in connection with insurance against accidents. Since the legislation of 1929 in Great Britain, motorists must insure against risks to third parties, i.e., they must not only insure their own lives and property against accident, but also those of any person who is injured by them, such being a third party.

Third Republic Republic that has existed in France since 1870. The first republic was set up at the Revolution and overthrown by Napoleon. The second was set up in 1848 and overthrown by Napoleon III.

Thirlmere Lake of Cumberland. It is near Helvellyn, and is over 3 m in length. From it Manchester obtains much of its water supply. The water is carried to that city by an aqueduct, 105 m long.

Thirlwall Connop. English bishop. He was born at Stepney, Jan. 11, 1797, educated at Charterhouse and Cambridge, where he gained many distinctions, and ordained in 1827. From 1840-1874 he was Bishop of St. David's. He wrote a history of Greece, and in conjunction with his friend, Julius Hare, translated Niebuhr's *History of Rome* from the German. He died at Bath, July, 27th, 1875.

Thirsk Market town of Yorkshire (W.R.). It is 23 m north west of York and 210 from London by the L.N.E. Rly. The River Ouse flows through the town, which is an agricultural centre. Tanning and flour milling are carried on. Pop 2755.

Thirty-nine Articles Creed of the Church of England. The Articles were adopted by the united convocations in 1563 and became law by Act of Parliament in 1571. Since 1604 no change has been made in them. The following are the topics dealt with, Articles 1-5, Universally recognised truths of the Christian religion, 6-8, Standards of faith, 9-18, Sin and Grace, 19-36, Church and Sacraments, 37-39, Civil order. Their predominantly negative character as shown in their condemnation of heresy and error is due to the exigencies of the special situation which they were designed to meet and they are not to be interpreted as containing a systematic statement of Christian doctrine.

Thirty Years' War Name given to hostilities carried on in Germany between the years 1618 and 1648. The war started through the revolt of Bohemia against the rule of the Catholic Hapsburgs. The offer of the Bohemian crown to the Lutheran prince, Frederick, Elector Palatine and son-in-law of James I of England, was followed by the defeat of Frederick and the seizure of his lands by the Emperor Ferdinand. The Protestant princes of Germany and Gustavus Adolphus of Sweden then carried on the struggle for Protestantism against Catholicism, but after the death of Gustavus at Lützen in 1632 the war lost its religious character and became a political struggle between the Hapsburgs and Spain on the one side, and France, who entered it in 1635, on the other. The war was ended in 1648, when the Emperor, after suffering defeat, agreed to the terms of the Treaty of Westphalia (q.v.).

Thisbe Figure in Babylonian legend. She is the beloved of Pyramus. The story is used by Shakespeare in *A Midsummer Night's Dream*.

Thistle Name given to many plants with prickly stems, leaves, etc. There are many kinds and they belong chiefly to the genus *carduus* and the natural order *Compositae*. Some of the varieties are the spear thistle, specially associated with Scotland, the dwarf thistle, the milk thistle and the musk thistle. Another is the field thistle which is very harmful to agriculture. The thistle bears red or purple florets and silky hairs called thistledown are attached to the seeds.

Thistle Order of the Scottish order of Knighthood founded by James II in 1687 and dedicated to St. Andrew. Falling into abeyance at the Revolution, it was revived by Queen Anne. Originally it consisted of the sovereign and eight knights. The number of knights was raised to twelve in 1703, and to sixteen in 1827. The collar is formed of thistles alternating with sprigs of rue. The motto is *Nemo me impune lacessit*. The chapel is in St. Giles', Edinburgh.

Thomas Called Didymus (the twin), one of the twelve apostles. He is known as "doubting Thomas," on account of his disbelief in Christ's resurrection until he had received personal proof (John xx. 26-29). According to tradition, St. Thomas founded the church in Parthia, going later to India. He is commemorated on December 21.

Thomas Albert French politician He was born at Champligny sur Marne in 1878 His father, a baker, managed to give Albert a university education. In 1903 he became associated with Jean Jaurès, as assistant editor of *L'Humanité*. Elected to the Chamber of Deputies in 1910, he became Under Secretary for Armaments in 1916, and Minister for Munitions in 1916 He left politics in January, 1920 to become the first Director of the International Labour Bureau at Geneva, where he worked strenuously for world peace He died in Paris, May 8, 1932

Thomas James Henry English politician Born at Newport, Monmouthshire, Oct 3, 1876, he began life as an errand boy and became a railwayman as a cleaner on the G W Rly In Swindon he came to the front both as a railwayman and in municipal affairs, and by 1910 was president of the Amalgamated Society of Railway Servants He helped to reorganise the National Union of Railwaymen becoming General Secretary in 1911 In 1910 he was elected to Parliament for Derby in the Labour interest, and has represented that constituency ever since He was chairman of the Parliamentary Committee of the Trades Union Congress, 1920-21, and president of the International Federation of Trade Unions, 1920-24 In the Labour Government of 1924 he was Colonial Secretary, and in the second Labour ministry of 1929, he was Lord Privy Seal, later becoming Secretary for the Dominions In the crisis of 1931 he joined the National Government again becoming Dominions Secretary, in which capacity he attended the Imperial Economic Conference at Ottawa in 1932 After the General Election of Nov, 1935, he became Secretary of State for the Colonies A popular and easy speaker, he published *When Labour Rules* in 1902

Thomond District of Ireland, now part of Munster The earldom of Thomond was held by the family of O'Brien between 1643 and 1774, and members of this family were Marquesses of Thomond from 1800 to 1855

Thompson Francis English poet Born in Preston, Dec 18, 1859, and educated at Ushan College, he studied medicine at Owens College Manchester for 6 years, but never qualified. In 1885 he left for London where, falling a prey to opium, he became destitute, but managed to write some poems which were highly praised by Browning He found good friends in William and Alice Meynell and in 1893 appeared his first volume, containing his masterpiece, *The Hound of Heaven*, and bringing him fame He wrote many other poems and contributed prose to the *Academy* and the *Athenaeum* He died Nov 13, 1907

Thomson James British poet, who wrote under the pseudonym of B V (Bysshe Vanolis) He was born at Port Glasgow, Nov 23 1834 and was trained to be an army schoolmaster However, his friend, Charles Bradlaugh, induced him to turn to literature, offering him space in his *National Reformer* In this appeared his most famous work, *The City of Dreadful Night*, and other powerful but gloomy poems *Vane's Story* *Essays and Phantasies* and *A Voice from the Night* are other works He died June 3, 1882

Thomson Sir John Arthur British naturalist. He was born in East Lothian July 8, 1861 and studied at Edinburgh Jena and Berlin Universities. He

held the post of lecturer in biology and zoology at the Edinburgh School of Medicine, and in 1899 was appointed Regius Professor of Natural History at Aberdeen University, where he remained till his retirement in 1930 His works include *Secrets of Animal Life* (1919), *Science and Religion* (1925), and *Outline of Biology* (1930) He died in 1933

Thomson Sir Joseph John English scientist Born near Manchester, Dec. 18, 1856, he was educated at Owens College and at Trinity College, Cambridge, of which he was made Fellow in 1880, and lecturer in 1883 From 1884 to 1918 he was Cavendish Professor of Experimental Physics in Cambridge and from 1905-1918 Professor of Physics at the Royal Institution in London He was awarded the Nobel Prize for Physics in 1906, was President of the Royal Society, 1916-1920 and since 1918 has been Master of Trinity College, Cambridge He was knighted in 1908, and awarded the O M in 1912

Thor In Scandinavian mythology, one of the twelve asas, or gods, and a son of Odín He lived in a huge palace called Bliskirnir, and the rolling of his chariot caused the thunder His most precious possession was a magic hammer called Mjölnir, which always returned to his hands after being hurled Thursday is called after him

Thorax Anatomical name for the chest or anterior portion of the trunk in animals and man Its muscular walls are supported in front by the breastbone and rib cartilages, on the sides and back by the body ribs, and in the median dorsal line by the dorsal spinal vertebrae

Thoreau Henry David American writer Born at Concord, Mass., July 12, 1817, he was educated at Harvard In 1835 he began a diary which extended to 30 volumes, full of fine thoughts and graphic descriptions For several years he was a member of Emerson's household His most popular book, *Walden, A Life in the Woods*, is a description of two years spent alone in a shanty he himself built in the forest. He died May 6, 1862

Thorium Rare metallic element having the symbol Th and atomic weight 232.15 It occurs in the minerals thorite, thorianite and monazite As extracted, it forms a greyish powder which is converted by hydraulic pressure into malleable, ductile bars. It has radioactive properties and is used for X-ray targets and wireless valve filaments

Thorn Generic name for all trees or bushes with thorny shoots or spined or thorny branches The common hawthorn, *Crataegus oxyacantha*, is an example

Thornaby Borough and market town of Yorkshire (N.R.) It stands on the Tees, opposite Stockton, with which a bridge connects it It is 235 m from London, on the L N E Rly The industries include shipbuilding yards, corn mills and engineering works Pop (1931) 21,233

Thorndike Dame Sybil English actress She was born at Gainsborough Oct. 24 1885, and educated at the High School, Rochester, and the Guildhall School of Music, London She studied at Ben Greet's Academy, and made her debut at Oxford, June, 1904, as Phyllis in *My Lord from Town* She then toured in the United States in Shakespeare repertoire with

Ben Greet. Later she was with the Horniman Company in Manchester. Her London debut was in 1908 at the Scala, and in the same year she married Mr Lewis Casson. She was seen at her best as Jane Clegg in the play of that name by St. John Ervine, and as Joan of Arc in Shaw's *Saint Joan*. She was made a D B E in 1931, toured Egypt, Palestine, Australia and New Zealand in 1932-3, and returned to play in London and New York. In 1935 she appeared in London in *Grief Goes Over* and in 1936 in *Short Story*.

Thorne Market town of Yorkshire (W R.) It is 10 m from Doncaster and 166 from London, by the L N E Rly and is situated on the Don. Rope is made, and there is an agricultural trade. There is a 14th century church.

Thorne Will English politician. He was born in Birmingham, Oct 8, 1857, and began life at 6 in a harrier's shop. In 1889 he helped to found the National Union of General and Municipal Workers, and has been general secretary since, he has represented West Ham in the Labour interests since 1906, and has been a member of the West Ham Town Council since 1890, being mayor, 1917-18. He published *My Life's Battle* in 1925.

Thornton Urban district of Lancashire. It is 16 m from Preston, on the L M S Rly. Pop (1931) 10,144.

Another Thornton, 6 m from Bradford, Yorks, was the birthplace of the Brontë sisters. Another is a rly junction in Fife-shire.

Thornton Heath District of Croydon. It lies to the N of the borough and is a residential area for Londoners, the city being 9 m away. It is on the S Rly, and is united by tramways with Croydon and London.

Thornycroft Sir William Hamo English sculptor. Born in London March 9, 1850, he was educated at University College School, London, and the R.A. Schools. His first success was "Artemis" (1880). Among his many statues, or memorials, are "Queen Victoria" at the Royal Exchange and at Karachi, "King Edward VII" at Karachi, "General Gordon," in Trafalgar Square, "John Bright," in Rochdale, "Gladstone," in the Strand, London, "Lord Curzon," in Calcutta and the War Memorial in Durban. Elected A.R.A. in 1884 and R.A. in 1888, he was knighted in 1917, and died, Dec 18, 1925.

Thorwaldsen Bertel Danish sculptor. He was born at sea, Nov 19, 1770. In 1793 he gained a gold medal and a three years' travelling scholarship, at the Copenhagen Academy. He went to Rome, and in 1796 won fame with his "Jason." Other works of his are "Christ and the Twelve Apostles," "Byron," the bas-reliefs "Night" and "Morning," and the "Lion of Lucerne." He died March 24, 1844.

Thoth Egyptian deity. Measurer of souls, his emblem is the ibis. He was the God of science, invention and magic.

Thothmes Name of four kings of Egypt of the 18th dynasty. Thothmes I carried his arms as far as the Euphrates and greatly beautified Thebes. Thothmes II, under the tutelage of his sister, conquered the Arabs. His brother, Thothmes III, raised Egypt to its highest glory.

Thought Reading See TELEPATHY.

Thrace Area in the Balkan Peninsula. It is a country of rugged hills, originally inhabited by a dark long-skulled race, which dated from the Stone Age. It became a Roman province, and has been frequently overrun by invaders. In 1923 it was divided—Western Thrace being given to Greece, Eastern Thrace to Turkey.

Threadneedle Street Street of the City of London. It goes from the Mansion House to Bishopsgate. On the north side is the Bank of England, which is sometimes referred to as the Old Lady of Threadneedle Street.

Three Rivers City and river port of the St. Lawrence, where the St. Maurice falls into it through its two mouths, thus giving rise to the name of the city. It is 96 m. from Montreal and 76 from Quebec, and has a good harbour and stations on the C.P. and C.N. Rlys. Lumber is exported and there are pulp and paper mills, for which electric power is derived from the Shawinigan Falls. There is a Roman Catholic cathedral. Three Rivers was founded by the French in 1634. Pop (1931) 35,450.

Three Taverns Village of Italy. It was on the Appian Way, 38 m from Rome. Here St. Paul, on his way to Rome, was met by his friends (Acts xxviii).

Thrift Perennial plant (*Armeria vulgaris*) of the order *Plumbaginaceae*, also known as the sea pink. It has tufts of grass-like leaves on woody branching roots which flower heads rise on slender, hairy stems. It is found wild on cliffs and rocks in many seaside places, and also in mountain districts.

Thring Edward English schoolmaster, born Nov 29, 1821. In 1853 he became Headmaster of Uppingham School, a post he held with distinction till his death, Oct 22, 1887.

Throat Front part of the neck from the chin to the collar bone and (internally) the pharynx, which connects to the nose, larynx, vocal cords (Adam's apple), windpipe and oesophagus. Throat ailments include pharyngitis and laryngitis, inflammations of the parts concerned, diphtheria, tonsillitis, adenoids and cancer. The Throat Hospital in Golden Square, London, was founded in 1863.

Sore Throat. A slight sore throat, from a chill, strain, dirt, etc., will be relieved by sucking chlorate of potash pellets. A gargle of borax and water or salt and water is also soothing, especially for hoarseness. If there is any swelling, hot flannels should be applied, and if the condition is at all severe it is best to go to bed.

Throgmorton Street Thoroughfare in the City of London. It goes from Old Broad Street into Lothbury, and is chiefly known because here is the Stock Exchange. Another building in the street is the Drapers' Hall.

Thrombosis Clotting of blood within a blood vessel. In the brain it leads to hemiplegia, or paralysis of one half of the body. It may occur in connection with varicose veins.

Throne Chair of state occupied by the sovereign. In ancient times, especially in the east, gold, ivory and rock

crystal were used in their construction, while precious stones were freely used for their decoration

Throttle Valve Type of valve used for the regulation of steam or gas to a cylinder, and worked by means of a lever

Thrush or *Throstle* Bird of the species *Turdidae*, allied to which are the oussels, stonechats, robins and hedge sparrows. The song thrush is to be met within the British Isles all the year round, its eggs are sea green with black spots

Thrush Disease of the mouth and throat. It is marked by the appearance of pearl coloured fungous vesicles in the part affected, and occurs especially in children, but also affects adults who have been enfeebled by wasting disease. It is also a disease affecting the frog of a horse's foot

Thucydides Athenian historian. He was born about 460 B.C. A man of wealth and influence, he commanded an Athenian naval squadron on the Thracian coast in 424 and was exiled after failing to relieve Amphipolis from the Spartans. He now travelled, visiting the countries of the Spartan allies, which doubtless, apart from his judicial outlook, enabled him to take the impartial view for which his *History of the Peloponnesian War* is famous. In 404 he returned to Athens, and he died, probably by violence, about 399.

He wrote his *History* not only as a record but to be a source of political learning for posterity, scrutinising facts and dates with immense care, while the speeches which he puts into the mouths of the leaders of the time throw a bright light on the attitude of the Greek mind to political events

Thug Indian religious fanatic. The campaign of murder and robbery carried on by thugs in Northern and Central India was suppressed in 1830-48. Thuggery was associated with the worship of Kali, to whom its devotees regarded their victims as sacrifices

Thumbscrew Instrument of torture. Made of iron, it was operated so as to crush or even break the thumb, thus causing exquisite pain. It was used by the Inquisition in Spain and elsewhere and by the persecutors of the Covenanters in Scotland. Its last recorded use in Scotland was towards the end of the 17th century

Thun Lake and town of Switzerland. Situated in the Canton of Berne, and on the Aar, the town is a tourist centre and has industries of pottery, slate and brickwork. Pop (1930) 16,428. The lake is 11 m long, with an area of about 19 sq m, surrounded by beautiful scenery

Thunder Deep roaring sound, which occurs after a flash of lightning. It is caused by the sudden expansion of heated air during the passage of the electric current followed by an equally sudden contraction

Thunderstone Common name for objects once regarded as being formed by thunder or lightning. It is used especially for objects having more or less a dart or arrow shape, for bolennites, meteorites and the pyritous nodules occurring in cretaceous rocks

Thurifer In the Roman Catholic Church one who carries the thurible in which incense is burned

Thuringia Republic of Germany. In Upper Saxony, it lies between the Thuringian Forest and the Harz Mts. It was formerly tributary to Attila, the Hun and to the Franks under Charles Martel. Following the German Revolution, the free state of Thuringia was formed in 1920 by the union of Saxe-Weimar-Eisenach, Saxe-Meiningen, Saxe-Altenburg, Saxe-Gotha, Reuss, Schwarzburg-Rudolstadt and Schwarzburg-Sondershausen. It is a republic with parliamentary government. Weimar is the capital, Jena and Gera are larger towns. Of its area of 4540 sq m, over half is devoted to agriculture. The manufactures include textiles, glass, porcelain, machinery, optical and scientific instruments and toys. Pop (1925) 1,196,244

Thurles Market town of Co. Tipperary, Irish Free State. It is 29 m from Clonmel, stands on the Suir, on the G.S. Rlys. There is a Roman Catholic cathedral. Pop (1926) 4815

Thurlow Edward Thurlow, Baron Eng. Irish lawyer and politician. Born at Bracon Ash, Norfolk, Dec. 9, 1731, was educated at Canterbury and Cambridge. He studied law, became K.C. in 1761, and entered Parliament in 1768, becoming Solicitor General, Attorney General, and, in 1778, Lord Chancellor (and Baron Thurlow) a post he retained till 1792. He died Sept. 12, 1806

Thursday Island Small island in the Torres Strait. Belonging to Queensland, it lies 30 m off Cape York, and has a good harbour, Port Kennedy, at which mail steamers, passing through the Strait, call. The chief industry is pearl and tropic fishing. Pop 1700

Thursley Village of Surrey. It is near Hindhead and is known for its picturesque common. The parish church is partly Saxon. Iron was once worked in the neighbourhood and the hammer ponds are still seen

Thurso Burgh and seaport of Caithness. It is 154 m from Inverness, on the L.M.S. Rly. Here are the ruins of a 14th century church and a bishop's palace, also a modern castle and a museum. Thurso is the starting place for steamers for the Orkney and Shetland Islands. Pop (1931), 2946

Thurston Ernest Temple. English novelist and playwright. He was born, Sept. 23, 1879, and at 16 had published two books of poems. His *City of Beautiful Nonsense* (1909) brought him into prominence, and *The Garden of Resurrection* (1911) increased his reputation. Since 1905 he has published 38 novels, 3 volumes of poems and 10 plays. He died in 1933

Thyatira Ancient city of Asia Minor. It had one of the Seven Churches mentioned in Revelation (II 18-23). The site is now occupied by Akhisar

Thylacine Tasmanian marsupial. In appearance it is a cross between a hyena and an opossum, with dog-like muzzle, long tail and grey brown fur striped with black. It is nocturnal and destructive to sheep

Thyme Genus of small, aromatic shrubs (*Thymus*) of the order *Labiatae*. The wild thyme (*T. serpyllum*) is found on downs and hillsides. It has a creeping stem, small leaves and spikes of purplish flowers. Lemon thyme is a variety of the same species. *T. vulgaris*, the garden thyme, is taller and is used for flavouring food

Thymol Crystalline substance belonging to the phenol group. It is present in the volatile oil of thyme and forms 50 per cent. of oil of ajowan, its chief commercial source. Thymol forms large transparent crystals, having the odour of thyme and a pungent taste. It is a powerful antiseptic and germicide.

Thyroid Gland Soft endocrine gland consisting of two lobes lying one on either side of the trachea and joined by an isthmus. Its internal secretion or hormone increases combustion in the body, stimulates growth of bone and is related to the activity of the sexual glands. Inactivity of the thyroid results in the diseases myxoedema and cretinism and in these cases the use of thyroid extract is found beneficial, while excessive activity causes Grave's Disease, or exophthalmic goitre.

Tiara Triple crown worn by the pope. It was originally worn by the Persian kings and later by Romans, both men and women. A similar headdress was worn by the Jewish high priest and the clergy of the Greek Church. Jewelled tiaras are worn by women of rank on state occasions.

Tiber River of Italy. Rising at Tifernum in the Apennines, its total length is 240 m. It is frequently in flood and has muddy, yellowish waters. It flows past Rome and is famous for its association with that city.

Tiberias City on the western shore of the Sea of Galilee. Built by Herod, it was a centre of rabbinical learning, and was named after the emperor Tiberius. From here came the sightseers to the scene of the feeding of the five thousand (John vi 23).

Tiberius Roman emperor. Born Nov. 16, 42 B.C., he assumed power at Rome in A.D. 14, by the influence of his mother, Livia. He resided at Capreae, and was murdered on Mar. 16, 37. Abetted by his favourite, Sejanus, he marred his reign by deeds of the greatest cruelty and sensuality.

Tibet Country of Asia. It lies between China and India and covers 463,200 sq. m. A mountainous area, it is thinly peopled and much of its surface is unexplored. Lhasa is the capital. The head of the government is the Dalai Lama, who appoints a regent and ministers to administer the country. The religion is Lamaism. Nominally Tibet is under the rule of China. Rice, barley and a little fruit are grown. Sheep and pigs are kept and there is a little mining. There is a considerable trade between Tibet and India, and treaties between the two countries have been signed. Pop. 3,000,000.

Tibia Roman musical instrument. It was similar to the present-day oboe. The name is also given to the shinbone, a long, triangular bone on the inside of the fibula. At its joint with the femur it is broad, but tapers down to join the foot.

Tichborne Village of Hampshire. It is 2 m. from Alresford and has a church with a Saxon chancel. Here is Tichborne House, the residence of a family that has owned the estate for some 800 yrs. In 1872 there was a famous lawsuit about the ownership, in which the claimant, whose real name was Arthur Orton, failed to prove his case.

Tickhill Urban district of Yorkshire (W.R.). It is 6 m. south of Doncaster, and 158 from London, by the

L.N.E. Rly. There is a ruined castle. Pop. (1931) 2297.

Tide Regular ebb and flow of the oceans, due to the attraction of moon and sun. The lunar force predominates. The waters are drawn into a long wave, whose crests (high tide) are antipodal with corresponding troughs (low tide) between them. Owing to the earth's rotation these high and low tides follow each other regularly from east to west, but differences in ocean depths and the continental masses cause tidal variations along the coasts.

Tideswell Town of Derbyshire. It is 61 m. east of Buxton, the nearest rly. station being Miller's Dale, on the L.M.S. line. It has a grammar school and a 14th-century church. Near is some of the most beautiful scenery of the Peak District.

Tidworth Village of Wiltshire. It is 9 m. from Andover and 76 from London by the S. Rly. It is near the Hampshire border, and is a military centre in the Salisbury area.

Tientsin Treaty port of China. Opened for foreign trade in 1860. It is situated at the point where the Grand Canal joins the Boho and is about 70 m. from Peking (Peking) midway between that city and the coast. Unlike the native city, the foreign city is well built and well kept. Tientsin is the entrepot for Peking, and from here tea caravans start for Russia and Siberia. Salt is an important article of commerce. Pop. (1931), 1,387,462.

Tierra del Fuego Group of islands at the extreme south of South America. Divided between Chile and Argentina, it consists of one large and several small islands, separated by the Strait of Magellan from the mainland. They were discovered by Magellan in 1520. The southern point is Cape Horn. The land is steep and windswept with a few fertile areas on which, in the Chilean area, settlers raise horses, cattle and sheep.

Tiflis Capital of the Soviet Republic of Georgia, and also of the Transcaucasian Socialist Federated Soviet Republic. It is picturesquely situated on both banks of the Kura and is shut in by high mountains. There are warm springs. Cotton, silk, carpets and tobacco are manufactured. It has a broadcasting station (1071 M., 10 kW). Pop. (1931) 294,007.

Tiger After the lion, the largest carnivore (*Felis tigris*) of the *Felidae*. Widely distributed throughout Asia, it inhabits jungle and forest regions, preying on deer, pigs and other animals. On occasion domestic cattle and man himself are attacked. The body is 6 ft. long with a 3-ft. tail, and at the shoulder the tiger stands 3 ft. high. The rough tongue assists the teeth when the animal is tearing off flesh. The fur is reddish-brown above, with black striping on head, limbs, body and tail. The under parts are white.

Tiger Lily Bulbous plant (*Lilium tigrinum*) of the order *Liliaceae*. It is a Chinese variety of lily, three or four ft. high, with racemes of handsome orange-red blooms spotted with black. The bulbs are usually planted in the early spring.

Tiglath-Pileser Name of four kings of Assyria. Tholast, Tiglath-Pileser II, who reigned 745-727 B.C., was a usurper who founded the second Assyrian

Empire King Ahaz called in his help against Rezin of Syria and Pekah of Israel (2 Kings xv and xvi 2 Chron xxviii)

Tigris River of Mesopotamia. It rises in the mountains of Armenia and Turkistan, and flows S E for some 1100 m to join the Shat el-Arab near Kurna. It is known to the Arabs as the Dجلة, and is one of the rivers of antiquity Basra and Bagdad are on its banks.

Tilbury Urban district and port of Essex. It is on the Thames, 22 m from London, on the L M S Rly. There is an old church, but the place is chiefly known for its docks. Belonging to the Port of London and enlarged since the Great War, these cover 878 acres and accommodate the largest vessels afloat. They are chiefly used by vessels trading with the East. Near the town is Tilbury Fort. This was built in the time of Henry VIII and here at the time of the Spanish Armada Elizabeth reviewed her troops. Pop (1931) 18,826

Tile Thin flat slab of marble, stone or baked clay, glazed or unglazed, and used in the structure or decoration of a building. Tiles are divided into three groups—roofing floor and wall tiles.

Roofing tiles were known early in Japan, and were usually yellow and glazed, and in ancient Greece and Rome were of marble coloured clay, and "Spanish" with the contour of the letter "S".

Floor tiles were, in 12th-century Europe, usually mosaic in type, or of two colours. Italian majolica tiles were decorated in the classic designs. The modern tendency is to use machine pressed tiles which are hard and vitrified, in a few simple colours and shapes.

Wall tiles were known in an elaborate form in ancient Egypt and Babylon, and later in Persia and Rome. The Persian tiles were blue white in colour, with beautifully intertwined flowering plants in green with occasional touches of colour. Moorish tiles had metallic lustre decoration, and in Delft, from 1600, were made blue tiles containing a picture, or a piece of landscape, or a figure. Modern wall tiles have many beautiful cracked effects, in a great variety of shades and blendings.

Tillett Benjamin. English Labour leader. He was born in Bristol in 1860 and after serving in the navy and the mercantile marine, settled at the London docks and organised the Dockers' Union. He was M P for N Salford, 1917-24 and 1929-31, and chairman of the General Council of the Trade Union Congress, 1928-29 and published his *Memories and Reflections* in 1931.

Tillicoultry Town of Clackmannan shire. It is 5 m from Alloa, on the L N E Rly. The River Devon flows past the town, which has a reputation for plaids and tartans. Pop 4461.

Tillotson John Robert. Archbishop of Canterbury. He was born at Sowerby, Yorkshire 1630 and educated at Cambridge. He served Cromwell as Attorney General in 1658, and in 1664 married Cromwell's niece. In 1672 he was made Dean of Canterbury, in 1689 Dean of St Paul's and in 1691 Archbishop of Canterbury. He died Nov 22, 1694. The best preacher of his age, he was mild and tactful in controversy. His sermons are noteworthy for their masterly prose style.

Tilly Count. German soldier. Born in Tilly, Brabant, in 1559. Johann Tzerclaes Count of Tilly commanded the League in the

Thirty Years' War. He won many victories, including the storming of Magdeburg in May, 1631, when over 40,000 people were butchered. In the following Sept. Tilly was routed by Gustavus Adolphus at Breitenfeld and in April, 1632, was mortally wounded at the Battle of the Lech.

Tilsit Prussian town. It is situated on the Memel about 95 m N E of Königsberg and manufactures iron glass, cloth and machinery. Pop about 40,000. Here on July 7, 1807, Napoleon, then at the height of his power, made a Treaty with Tsar Alexander I, by which Westphalia was formed out of Hanover and West Prussia, and placed under Jerome Bonaparte. Prussian Poland was given to Russia and Saxony, Alexander was to join France against Britain.

Timber Wood prepared for building. Timber is divided into soft and hard woods, and after felling is sorted according to grain and texture. It is seasoned in sheds and to prevent decay and rot is soaked in or painted with a preservative, such as creosote. Oak is used for indoor and outdoor work, ash for aircraft. In real property, timber means oak, ash and elm, and, in some localities, beech.

Timbrel Musical instrument. It was a form of tambourine and is mentioned in the Bible, being used by the Israelites in dance and song.

Timbuctu City in the French Soudan. It is on the edge of the Sahara, near the most northerly point of the Niger. Formerly an immense walled city, it has been improved and partly rebuilt since the French occupation in 1894. It is an important trading centre and terminus for camel caravans bringing salt, gold, dates, etc., for exchange for cloth and other manufactured goods. Pop (1931) 5,677, but 20,000 during the trading season.

Time Term generally applied for the sequence of events. The solar day of 24 hrs is the universal unit. Other natural units are the month and year, the hour, minute and second being artificial. For time measurement clock mechanism is in common use. Owing to the west to east rotation of the earth in 24 hrs equal to 15° per hour there is a difference in local times, consequently standard time belts have been adopted.

Time In music, relative duration of sound or rest. The semibreve is the unit. The minim is half a semibreve, the crotchet half a minim, the quaver half a crotchet, there are also the semiquaver, demisemiquaver, and so on.

Times The London newspaper, regarded as the country's premier journal. It was founded in 1785 by John Walter, its price being 3d. The building is in Printing House Square, London, E C 4. Under John Walter's son and grandson the paper became very influential and prosperous. New methods were adopted, and the personality of its greatest editor, John T. Deane, added much to its authority. In 1861, the price, which had been as high as 7d, was reduced to the original 3d. Towards the end of the 19th century *The Times* became less prosperous and this made it possible, in 1908, for Viscount Northcliffe to acquire control. He introduced a number of mechanical improvements and reduced the price to a penny. Later it was raised and in 1922 it was stabilised at 2d. On Lord Northcliffe's

death in 1922 the control was acquired by Mr John Walter and Major the Hon J J Astor, who made arrangements to prevent the paper from passing into the hands of any sectional interest. The *Times* publishes a weekly illustrated edition and various supplements, including the valuable weekly, *The Times Literary Supplement*. Others are the educational and the trade and engineering supplements. Its *Law Reports* are authoritative.

Timgad Ruined city of Algeria. It lies on the lower slopes of the north side of the Aures Range, at the point where six roads meet. It was called Thamugas by the Romans. The Arch of Trajan, restored in 1900, is a fine example of the triumphal arch. A temple of Jupiter, a theatre, and baths have been excavated.

Timor Island of the Malay Archipelago. It is mountainous, one peak reaching 11,600 ft and the volcanic activity of the neighbourhood is represented by mud geysers. The western area forms part of the Dutch East Indies, capital Kupang. The eastern part is Portuguese, capital Dilly. The products include coffee, cocoa, copra and sandalwood. Pop., Portuguese (1927) 451,604, Dutch (1930) 1,656,636.

Timothy Saint and companion of S. Paul, whom he accompanied to Europe. He helped to found churches in Macedonia and did important missionary work in Corinth, Thessalonica and Philippi, and later in Asia Minor. He was imprisoned at one time with S. Paul, and tradition makes him Bishop of Ephesus and a martyr under Domitian. His death is celebrated by the church on Jan 21.

Timothy Epistles to. Two books of the New Testament. The traditional view that they were written by the apostle Paul has not been disproved, though they reveal striking points of divergence from the other Pauline letters, both in language and subject-matter. The purpose of the letters is summed up in I Timothy iii, 15.

Tin Metal, atomic weight 118, symbol Sn, melting point 232°C. It is a brilliant, whitish-grey metal, its chief source being cassiterite SnO₂. The principal mines are in the Malay States, Bolivia, the Dutch E. Indies, Nigeria, China and Siam. It is largely used as a covering for iron, in tinfoil for wrappings (though largely superseded for this use by aluminium), mirrors and in vessels. As an alloy with copper, it forms bronze and bell-metal and pewter with lead.

Tincture In medicine, the solution of a substance in alcohol, tincture of iodine is a familiar example. The term is also used in heraldry to denote metals, colours and furs. In general use it means simply a tone or shade of colour.

Tindal Matthew. English deist, born in Devonshire about 1656. In 1706 he excited fierce controversy by the publication of *The Rights of the Christian Church Against All Romish and Other Priests*. In 1730 he published *Christianity as Old as the Creation*, popularly called "The Deist's Bible," which was intended "to strip religion of the additions which policy, mistakes and the circumstances of the time have made to it." He died Aug 16, 1733.

Tinder Any inflammable substance used in kindling a flame. Before the invention of matches a spark struck by means

of a flint and steel was used to ignite the tinder. This consisted chiefly of rotten wood, touch paper, scorched linen, and amadou—a form of dry fungus found on forest trees.

Tinfoil Name given to thin sheets of aluminium or sometimes of an alloy of tin used for wrapping tobacco, drugs, chocolate, and so on.

Tinplate Sheets of wrought iron or mild steel coated with tin and so protected from oxidation. Tinplate is used extensively in the manufacture of receptacles for preserved meat, fruit, fish, etc. The process of tinplating originated in Bohemia. Tinplate should not be confused with terno plate, which is formed by dipping the sheets of iron and steel into baths of molten lead and tin. The result is dull-coloured and used extensively in roofing.

Tinsel Fabric of silk of wool, into which are interwoven threads of gold or silver. The name is also given to any glittering metallic substance which has been cut into pieces, strips or threads and presents a sparkling appearance.

Tintagel Village of Cornwall. It is on the north coast, 5 m from Camelford and 20 from Launceston. On Tintagel Head are the ruins of a castle which legend associates with King Arthur. The scenery around is very wild and the coast very rocky. There are golf links.

Tintern Village of Monmouthshire. It is 5 m from Chepstow and 144 from London, on the G.W. Rly. It is famous for the ruins of its abbey, once one of the wealthiest Cistercian houses in England. The ruins include the chapter house and refectory, but above all the church, rivaling in size the minster at York. In 1900 the Duke of Beaufort presented the estate to the nation and extensive repairs have been carried out. The abbey stands by the Wye in a landscape of almost unique beauty.

Tintoretto Italian painter whose real name was Jacopo Robusti. Born in Venice, Sept 29, 1518, he studied under Titian. His skill in portraiture, in composition, drawing, colour and general conception caused Ruskin to rank him among the "two supreme painters." Famous works of his are "St. George and the Dragon" in the National Gallery, London, "Belshazzar's Feast," "The Last Supper," and the large painting "Paradise," in the Doge's Palace, Venice. He died May 31, 1594.

Tinworth George. English artist in terra-cotta. Born in Walworth, Nov 5, 1843, he studied sculpture, and in 1867 joined Doulton's pottery works in Lambeth, staying there till his death on Sept. 10, 1913. He excelled in terra-cotta reliefs, exhibiting at the Royal Academy for many years. In collaboration with Street, the architect, he executed a large panel of the Crucifixion for York Minster, as well as 28 panels for the Guards' Chapel in St. James' Park.

Tipperary County of Munster, Irish Free State. Wholly inland, it covers 1662 sq. m., and is divided into two parts or ridings. In it are the Galty Mountains and other ranges of hills, but in the centre and the W. the land is level and the soil fertile. The Suir is the chief river. Clonmel is the county town of the S riding, and Nenagh of the N riding. Other places are Thurles,

Cashel, Tipperary and Carrick on Suir. Milk and butter are produced, and there is a little coal mining. Pop (1926) 141,115

Tipperary Urban district and market town of Co. Tipperary, Irish Free State. It is 110 m from Dublin, on the Gt S. Rlys. It is a centre for the sale of butter, milk and other farm produce. There are remains of a monastery, but none of the castle built here by the English. Although it gives its name to the county, Tipperary is not the county town. Pop 5555.

The song, "It's a Long Way to Tipperary," so popular during the Great War, was written and composed by Jack Judge in 1911.

Tippu Sahib Sultan of Mysore. He was born in 1749. His invasion of Travancore in 1789 led to a three years' sanguinary war, on his defeat he was compelled to resign half of his dominions, pay a big indemnity and give his two sons as hostages for future good behaviour. His implacable hatred of the British, however, led him to stir up further strife. On May 4, 1799, he was killed during the storming of his capital, Seringapatam.

Tipstaff Officer of the high court of justice. His business is to arrest persons guilty of contempt of court or other offences in the region of the court. The name is due to his staff, which is tipped with metal.

Tipton Urban district and market town of Staffordshire. It is 8 m NW of Birmingham and 124 from London, by the L.M.S. Rly, and is also served by the G.W. Rly. In the Black Country, the town is a centre of the coal mining and iron working industries. Pop (1931), 35,792.

Tiptree Town of Essex. It is 40 m from London, on the L.N.E. Rly, a light railway running from Kelvedon. The place is famed for its jam factories. The jam is made from fruit grown on land once a bare heath, but made productive by irrigation and drainage.

Tirah Mountainous tract in the NW Frontier Province of India. Lying between the Khyber Pass and the Khanki Valley, in a kind of mountain cul-de-sac, it covers some 700 sq m, and comprises the valleys round the headwaters of the River Bara. Peopled by the fierce and warlike Afridis and Orakzais. It is chiefly memorable as the scene of the British campaign against these tribes in 1897-98.

Tiree Island of the Hebrides. Part of the county of Argyll, it lies to the S. of Coll, and 19 m from Iona. It is 14 m long and covers 30 sq m. There are two small harbours and the chief occupation is the rearing of cattle.

Tiresias In Greek mythology a famous blind soothsayer of Thebes. He is the subject of a fine poem by Tennyson.

Tirol Region of Austria and Italy. It lies between Munich and Verona, and contains all the highest peaks of the Austrian Alps, with the Brennan Pass as the way from one country to the other. It has an area of 4,790 sq m, and is almost entirely mountain and forest. Innsbruck is the capital. The Ortler Spitz (12,811 ft.) is the highest mountain.

Since the Great War the Trentino, which used to be part of the Austrian Tirol, has been longed to Italy. The industries are mainly

agricultural, with lumbering and cattle rearing. Salt and lead are mined and there is some silk manufacture. Pop 313,885.

Tirpitz Alfred Friedrich von, German admiral. Born at Küstrin, March 19, 1849, he entered the navy in 1865, and became Lord High Admiral in 1911. In his capacity of Secretary for the Navy (1897-1916) his aim was to make Germany a great naval power, and he gradually built a formidable battle fleet. He commanded the navy from Aug. 1914, to March, 1916, being a strong advocate of the policy of "frightfulness." He entered the Reichstag in 1921 as a national deputy. He died March 8, 1930.

Tiryns Ancient fortified city on a rocky ridge near the E. side of the plain of Argos, in the Peloponnese. About 3 m from the coast, it was supposed to have been founded by Proetus, brother of the Argive king, Acrisius. It was destroyed in 468 B.C. Ruins of two palaces, dating about 1600 B.C., have been among the more interesting archaeological discoveries.

Tissot James Joseph Jacques, French painter. He was born at Nantes, Oct. 15, 1836, and studied art in Paris. In 1861 his great painting, "The Meeting of Faust and Marguerite," was bought by the state for the Luxembourg Gallery. During the war of 1870-71 he left Paris for London, where he soon attracted attention by his caricatures in *Vanity Fair*. His great work was a series of some 700 water colours illustrating the Bible, and 350 drawings of events in the life of Christ. He died Aug. 8, 1902.

Tissue Biological term for cell aggregation. It is applied to cellular tissue as found in nails and epidermis and connective tissue, in which the cells are separated, as in fat and cartilages. Tissues are tubular in muscles and nerves. Tissue culture, the cultivation of cells, wherein they multiply and synthesise new protoplasm, is a study of importance to physiology and pathology.

Tit Small passerine bird of the family *Paridae*. Natives of N. Europe and Asia, some seven species of tits are found in Britain. They are tree living birds. The tomtit or blue tit (*Parus caeruleus*) is about 4½ in long. The head, wings and tail are blue, upper parts greenish-yellow, yellowish beneath, throat being black. The long tailed, bearded and marsh tit are common, the great tit and crested tit being confined to certain regions.

Titan Name given to the children of Uranus (Heaven), and Ge (Earth), in Greek mythology. They were twelve in number—six male and six female. The males were Oceanus, Coeus, Crius, Hyperion, Iapetus and Cronus, the females, Thea, Rhea, Themis, Mnemosyne, Phoebe and Tethys. Cronus became involved in a war with Zeus, and the other Titans sided with Cronus, but Zeus was victorious, and imprisoned them all in Tartarus.

Titanic British liner. She belonged to the White Star Line, and was sunk in the Atlantic Ocean, April 15, 1912. Over 1500 lives were lost including W. T. Stead and J. J. Aster, and about 700 were saved. The disaster was due to the vessel striking an iceberg. An inquiry was held in London into the affair.

Titanium Metallic element having the symbol Ti and atomic weight 48.1. It occurs in ilmenite containing iron

and titanium oxides, in rutile, an impure titanate acid, and in certain iron ores. It is a white, very infusible metal used in steel alloys, also for incandescent lamp filaments, and the oxide for making a white pigment.

Tithe Originally a levy of one-tenth of a man's estate. This tax is of great antiquity, and took the form of a levy upon produce payable to the Church. The Tithe Commutation Acts (1836-60) commuted tithes into a permanent tithe rent charge, payable in money. The Act of 1891 put responsibility for collection on the landowner, while the Tithe Act of 1925 secured the complete redemption of ecclesiastical tithes in a period of 85 years, the tithe rent charge being fixed at £105, of which clerical owners receive £100. By this Act any rent charge, attached before March 31, 1927, to a benefice or ecclesiastical corporation, was transferred to the Governors of Queen Anne's Bounty (q.v.) to be held in trust for the incumbent. Tithe Barns were barns belonging to a lord or religious house in which crops representing rent or tithes were stored.

Titian Italian painter. Tiziano Vecelli was born about 1477. The son of Gregorio Vecelli, a soldier and councillor, he was sent as a child to Venice. There he became the pupil of Giovanni and Gentile Bellini, and Giorgione. He is one of the greatest portrait painters and colourists in the history of art. The Emperor Charles V. whose portrait he painted, made him a Knight of the Golden Spur. He painted many great religious pictures and a number of an allegorical and poetical character. Five of his works are in the National Gallery, London. He died Aug. 27, 1576.

Title In law the right by which a person holds property, especially real property. It may be acquired by purchase, gift, inheritance or even length of possession, as when a squatter obtains a title to the land on which he has settled for a period of years.

In Great Britain the title to land is usually transferred by conveyance, this being done by lawyers who prepare the necessary documents. Land can be transferred by registration, a method which has been operative for some time in Australia and other British possessions. In the county of London the registration of title to land is compulsory when property is bought or sold. When this has been done the title is guaranteed by the state. The land registration office is in Lincoln's Inn Fields, London, W.C.

Titus Christian convert and follower of S. Paul, who consecrated him first bishop in Crete, and addressed one of his epistles to him. He died towards the end of the 1st century.

Titus Flavius Sabinus Vespasianus. Born Dec. 30, A.D. 41, he served as military tribune in Britain and Germany. In 70 he besieged and destroyed Jerusalem. The terrible eruption of Vesuvius, when Herculaneum, Pompeii and Stabiae were buried by lava, occurred during the first year of his reign. He completed the Colosseum, and died Sept. 13, 81. Probably the best beloved of all Roman emperors, he earned the title *amator et deliciarum generis humani*.

Tiverton Borough and market town of Devonshire. It is 12 m. N. of Exeter and 163 from London by the

G.W. Rly., and stands on the Exe. An agricultural centre, it has breweries and flour-mills. Here is Blundell's School, founded in 1604, and now occupying modern buildings outside the town. Tiverton has also a 15th century church, a blue coat school and the remains of a castle. The town hall contains some fine pictures. Pop. (1931) 9611.

Tivoli City of Italy. In the province of Rome, and known to the Romans as Tibur, it was a favourite resort of the ancient world. The Emperor Hadrian had a villa here, of which the ruins are still extant. It is still visited by thousands of people annually for its sulphur baths, as well as for its archaeological interest. Its situation at an altitude of 750 ft. in the Sabine Hills makes it both beautiful and healthy. Pop. 12,340.

Tlemcen Town of Algeria. It is 2500 ft. above sea-level and about 70 m. S.W. of Oran. Known to the Romans as Pomaria, and later the Moorish capital of N.W. Africa, it contains several handsome mosques, a fortress of the Moorish sultans and other relics of Moorish culture. The museum possesses among other treasures the epitaph of Boabdil, the last King of Granada, and also the standard cubit measure. Olive oil and alfalfa are among the exports. Pop. (1931) 46,060.

Toad Genus (*Bufo*) of batrachians. Toads resemble frogs in the metamorphosis, etc., but with striking differences. The skin is dry, with glands exuding an acid secretion, there are no teeth and the legs are shorter. After the larval stage toads are land dwellers. British species are the common toad (*B. vulgaris*), which has a wrinkled, warty skin, and the hatterjack (*B. calamita*) of sandy regions, which has a smooth skin and runs instead of hopping.

Toad Flax Genus of plants (*Linaria*) of the order *scrophulariaceae*. The yellow toad flax (*L. vulgaris*) has a creeping rootstock, tufts of long, narrow leaves and bright yellow flowers resembling the snapdragon. Unlike the snapdragon, the flowers are spurred, the hollow spur containing honey.

The ivy toad flax (*L. cymbalaria*) has slender trailing stems, dark-green leaves with a purplish under surface and delicate purple-blue blossoms. It grows on old walls and ruins. *L. spuria* and *L. minor* are annuals found in sandy cornfields during the summer months.

Toadstool Mushroom-like fungi of the order *hymenomycetales*. Some varieties are definitely known to be poisonous, others may be innocuous, but it is unwise to regard any of them as edible.

Toast Drinking toasts is said to be so named from the pieces of toast which formerly were placed in one's liquor to improve the taste. The custom of toasts is probably derived from the ancient rite of drinking to the gods and to the dead. Norsemen, Romans and Greeks all observed this custom. Whereas toasting is now merely a rite of little importance, it was formerly regarded as an insult not to respond to it.

Tobacco Plant of genus *Nicotiana*. It is extensively used as a narcotic in chewing, snuff and smoking through cigars, pipes and cigarettes. Natives smoking cigars were seen by Columbus in 1492, snuff as noted by Ponce in 1494, and tobacco chewing observed in 1502, in America, where the custom seemed to be an ancient tribal one. Tobacco

was first brought to Europe by Francisco Fernandes and was sent by Jean Nicot (whence Nicotine) to Catherine de Medici. The United States still yield the largest supply, but Mexico, Germany, Russia, China and Turkey produce large quantities, while the tobacco export of S. Africa and Canada is increasing. The plant requires rich soil and plenty of sun, and, having been cut, is sun-cured and fermented before being used.

Tobacco is an important source of revenue, duty being paid in England on tobacco in the manufactured state. The world production is about 2,300,000 tons per annum.

Tobago Island in the British W Indies. One of the healthiest, it lies 20 m N.E. of Trinidad. It is 26 m long and 7½ m broad and has an area of 114 sq m.

Much of the island is covered with dense forest, but the valleys produce sugar, cotton, tobacco, cocoa and rubber. There is also some horse and sheep rearing. It is under the same laws as Trinidad. Tobago was discovered in 1498 by Columbus. The chief town is Scarborough. Pop (1930) 26,407.

Tobermory Seaport of Argyllshire. It is on Tobermory Bay, 30 m from Oban, with which there is a regular steamer service, and has a good harbour. Fishing is the chief industry. In 1588 a Spanish galleon sank in the bay with, it was believed, a vast sum of gold and other treasure on board. In recent years many attempts have been made to recover this.

Tobit Book of One of the books of the Old Testament. Apocrypha. It has been dated at about 350 B.C. Amid the account of the life in Nineveh of Tobit, his wife Anna and his son Tobias, are pleas for the giving of alms and tithes.

Tobogganing Winter sport. It was the devices of American Indians for sliding down steep snow-covered hills. Tobogganing or coasting is prevalent in America, Great Britain and Scandinavia. It has been perfected in the winter resorts of the Engadine, Switzerland, where specially prepared runs, such as the Cresta at St. Moritz, are available for annual championships. The most modern toboggans or sleds are of steel, and on them competitors, lying flat and steering with their feet, have attained 75 m p.h.

Toby Jug Small earthenware jug or beer mug. Toby jugs are made in the semblance of a corpulent jolly-looking man wearing a three-cornered hat, the corners forming spouts. The old name was Toby flumpot. Some 18th century specimens are valued by collectors.

Tobolsk Former government of W Siberia now known as the Ural area. Its capital, Tobolsk, stands on the Irtysh River and is a trade centre of some importance. It was formerly the capital of the whole of W Siberia. Pop 18,268.

Toc H Organisation for Christian fellowship and social service. It originated during the Great War at Poperinghe where Talbot House (so named after a fallen officer, and founded by the Rev P. T. B. Clayton) served as a club and a church for soldiers from Dec, 1915. Toc H is the army signaller's name for the initials T. H. The aim of the movement is to uphold the ideals of fellowship and service. In 1922 it was incorporated by royal charter. It has now

(1936) 1000 branches scattered all over the world with headquarters at 47 Francis Street, London S.W. 1 and its guild church is All Hallows, Barking-by-the Tower.

Tocqueville Alexis Charles Henri Clément de French politician and writer. Born in Paris, July 29, 1805, and called to the bar in 1825, he acquired fame by his *De la Démocratie en Amérique*, written after a visit to America in 1831. He visited England in 1835. Another important work was *L'ancien Régime et la Révolution*. He died April 16, 1859.

Todmorden Municipal borough of Yorkshire (W.R.). It lies 19 m from Manchester and 203 m from London, by the L.M.S. Ry. It is situated in a coal district and its industries include spinning, weaving and foundries. Pop (1931) 22,223.

Toga Loose outer garment, once a mark of Roman citizenship. The ordinary toga was white and was assumed by Roman youths on attaining majority. The purple toga of triumphant generals became the prerogative of the emperors.

Togoland Country in W Africa, between the Gold Coast and Dahomey. Formerly German, it was divided between France and Britain in 1919. The British area is attached to the Gold Coast, French administration is centred at the port, Lomé. The land is hilly with stretches of forest and open savannah country. The chief crops are foodstuffs, exports being cocoa, cotton and oil palm products. Area French, 21,893 sq m; British 13,041 sq m. Pop. French area (1932) 750,065. British area (1931) 275,988.

Tokay Town of Hungary, famous for its wine. Tokay wine is white and sweet. Imperial Tokay is a greenish colour and is a liquor made from the juice of over-ripe grapes which is expressed by their own weight. Aushueh is another quality, made from dried grapes of an ordinary kind. All have a delicate flavour due to the sunny land in which the grapes are grown and the method of preparation. Pop 5570.

Token Form of coin. It differs from ordinary coinage in that its intrinsic value is considerably less than its currency value. Tokens have been used as state currency, but are more often issued privately. In modern times they are often issued by tramway companies and similar corporations, especially on the Continent.

Tokyo Capital of Japan formerly called Yedo. It is situated on Honshu Island, on both banks of the Sumida River. The part known as Honjo is an island, intersected by canals and connected by bridges with Tokyo proper. The temples are found chiefly in Honjo and in the suburbs or Midzi, which is the seat of the Imperial university, with a fine library. Notable among the temples are that of Kwannon, the goddess of mercy, in Midzi and, in Honjo, the temple of Hachiman, the god of war, and the temple of 500 Images. The Government buildings and the mercantile and manufacturing quarters are in the ward of Kojimaichi also the Imperial palace. In Ueno Park are the zoological gardens. The city dates from the 16th century. It received its present name in 1868, at the time of the revolution. Tokyo suffered severely from an earthquake in 1923. Pop (1930) 4,978,390.

Tolbooth Term used in Scotland for a prison. The most famous was the one in Edinburgh mentioned in *The Heart of Midlothian*. Near St Giles Cathedral in the High Street, it was pulled down in 1817. In one or two of the Scottish burghs the tolbooth still stands. The word meant originally a booth at which dues or tolls were collected.

Toledo Province and city of Spain. The city, one of the most ancient and interesting in Spain, stands on the Tagus, 47 m from Madrid, and is full of beautiful buildings, the most notable being the cathedral and the Alcazar. Many of the old fortifications, gateways and the like, are still standing. Its principal manufacture of old days, i.e., sword blades, is still important. Cutlery, cloth and richly embroidered ecclesiastical vestments are also made. Pop 27,443.

Toleration Term used to denote the right of private judgment in matters of religion. It has never been professed by the Roman Catholic Church. Even the reformers, who claimed liberty for themselves, did not tolerate what they regarded as "the pernicious doctrines" of their opponents. The Act of Toleration passed by William III removed some disabilities from dissenters, but the feeling in favour of complete religious toleration is a modern movement.

Toll Payment made in return for a privilege. They are best known as payments for the use of markets, bridges, roads and rivers. In olden times they were made to the king or lord who granted the privilege, and who often found it a valuable source of income. To collect the tolls on roads and bridges toll gates were erected, and these were a feature of England in the 18th and 19th centuries. Most of them have been abolished.

Tolstoy Count Leo Nikolaevitch Russian author, social reformer and religious mystic. He was born Aug 28, 1828, and attended Kazan University. He joined the army, but left it after the siege of Sebastopol (1855), later becoming a fanatical believer in non-violence. After marrying in 1862 he settled on his estates, devoting himself to the interests of the peasantry. He wrote all his life—poems, novels, philosophising. Important works include *War and Peace*, *Anna Karenina*, *The Kreutzer Sonata*, *What is Art?*, *Resurrection*. The last few years of his life he shared the poor life of the peasants. He died Nov 20, 1910.

Toltec Race once living in Mexico and Central America. They were the precursors of the Aztecs who inherited some of their civilisation. Remains of their buildings can be still seen, but little is really known about them. Their greatest figure was Quetzalcoatl, who lived in the 9th century, and is the subject of many legends.

Toluene Clear liquid with a pleasant aromatic odour. It occurs in the light oils distilled from coal tar and separated by further distillation. By nitration, amidation and sulphonation it is converted into important intermediates for making a number of synthetic dye-stuffs. Toluene is also the source of the high explosive, trinitrotoluene.

Tomato (*Lycopersicon esculentum*) S. American plant of the order Solanaceae. It is a climbing plant with red

or golden fruit, and is now a popular article of food. Tomatoes are grown extensively in England for the market. Under glass with heat they can be grown in succession for crops all the year round. They can be grown out of doors in any sunny, suitable position, in good soil free from manure.

The plants should be placed out in June and staked as soon as a suitable height is attained. All side shoots should be pinched off, and the plants kept moist, with the roots mulched in very hot weather. If the amount of fruit is great, the plant must be well supported. Green tomatoes can be ripened in a warm sunny room if the season is cold, or utilised for chutney. Tomatoes are very rich in vitamins A, B, and C.

Tombola Form of lottery. It is a popular amusement, especially in Italy and France, and is seen sometimes at bazaars and entertainments in England. Cards, each bearing several numbers, are used. When the numbers are drawn any card on which every number is drawn brings a prize to the owner.

Tomsk Town of Siberia. It is built on two terraces on the right bank of the Tom River, some 25 m above the point where it is joined by the Ob, and is a station on a branch line of the Trans-Siberian Rly. The place owes its rise to the discovery of gold in the district in 1824. Manufactures include soap, candles and spirits. There is considerable river traffic. The university was founded in 1888. Pop 92,418.

Tom Thumb Name given to an American dwarf whose real name was Charles Sherwood Stratton. Born at Bridgeport, Conn., in 1838, he was 2 ft 7 in in height, and was exhibited in London in 1844 and 1857. He married another dwarf, Lavinia Warren, in 1863. Charles died in 1883 and Lavinia in 1919.

A fairy tale of the same name by Perrault deals with the adventures of a child dwarf.

Ton Measure of weight. In Great Britain it is 2240 lb, or 20 hundredweight. The American ton is 2000 lb, and is called the short ton, the English one being a long ton. For international purposes the metric ton of 2204 6 lb is much used.

Tonbridge Urban district and market town of Kent. It is on the Medway, 29 m from London, and is a junction on the S Rly. The principal building is the restored parish church. The gateway of the castle still stands, and the Chequers Inn dates from the 16th century. Brewing is an industry. At Tonbridge is the headquarters of the Kent county cricket club, and a cricket week is held here every year in June. Pop (1931), 16,332.

Tonbridge School was founded in 1553, and is now a large public school. It is controlled by the Skinners' Company, and has extensive modern buildings accommodating 500 boys. There is a separate preparatory school.

Tone Theobald Wolfe. Irish patriot. He was born in Dublin, June 20, 1763, educated at Trinity College and became a barrister in 1778. Wishing to make Ireland independent, he enlisted the help of the French, and took part in Hoche's unsuccessful attempt at invasion in 1796. Two years later he again embarked with a small French squadron, which was captured. He was condemned to be hanged for treason but cut his throat in prison, Nov 19, 1798.

Tong Village of Shropshire. It is 3 m from Shifnal, and has a church called the village Westminster Abbey, its golden chapel with a fan vaulted roof is notable, and it contains the tombs of the Vernons, and a small library. The existing castle, a building in the Moorish style, dates from 1765. Another Tong, in Kent, near Sittingbourne, is also notable for its church. A village in Ross and Cromarty and a town in Yorkshire (W.R.), have the same name.

Tong-King French protectorate, between China and Annam. In the forests of the mountainous regions of the N. teak abounds. The shores of the Gulf of Tong King in the S. are flat and swampy. The principal river is the Hong Klang. Products include rice, ramie, tin, coal and silk. The capital is Hanoi. Tong King covers 40,530 sq m. The French protectorate dates from 1883. Prior to that it was a province of Annam. Pop (1932) 8,012,429.

Tongue Fleshy organ in the mouth. It is used for eating and in human beings is the organ of speech and taste. It is covered with a mucous membrane, and at the base is in relation with the epiglottis and the pharynx.

Tonic Sol-fa System of writing music. Any scale is a natural scale whether founded on the key of C D E or on another tone. The key note or tonic note of the scale is called *doh*, the others successively, *ray*, *me*, *fah*, *soh lah*, *to or*, as in print *d, r, m, f, s, l, t*. Time and accents are marked by dots in tonic sol fa music. Higher octaves are marked *d r' m' lower d, r, m*.

Tonnage Carrying capacity of a ship. The gross tonnage is the total space occupied by the vessel, the net tonnage is the space available for carrying cargo. In Great Britain a space of 40 cubic ft is regarded as equal to one ton. Each country has its own laws for calculating tonnage, and the registered tonnage is really less than the real tonnage. Shipping dues are usually charged upon the registered tonnage. In the case of warships the tonnage is the weight of the vessel *i.e.*, the weight of the water displaced.

Tonnage and Poundage In England a tax once levied on imported goods. It was formerly imposed on English ports in the form of duty on every tun of wine and every pound of goods, whether imported or exported, and was frequently voted direct to the sovereign. Under George III the whole custom and excise system was reorganised, and tonnage and poundage was abolished.

Tonquin Bean Seed of a leguminous tree of Giana (*Dipleryx odorata*). It is a scented bean growing in a short one seeded pod, and is used in perfumery.

Tonsil Name of two small glands situated at the entrance to the throat, and placed between the pillars of the fauces or soft palate. The tonsil tissue is lymphoid in character, and the glands normally serve to trap and destroy germs in the air passing to the throat. As they so often tend to become septic, especially in children, their removal is advocated by many doctors, if chronically enlarged and infected.

Tonsillitis, or inflammation of the tonsils, may arise from a cold and is often accompanied by enlargement of the glands. Where there is a rheumatic tendency the condition may pass to suppuration resulting in quinsy.

Tonsure Rite of shaving the head. The custom is observed, as by those who enter the priesthood or a monastic order, as a symbol of self-dedication. In the Greek Church the whole head is left bare in the Roman Church only the crown is shaved, so as to leave a fringe of hair all round ("the coronal of S. Peter").

Tontine Form of life insurance. It originated with an Italian banker named Lorenzo Tonti. His idea was that a number of persons should subscribe to a fund which is invested and becomes the property of the last survivor. In France and Great Britain in the 18th century, the state raised money by tontines.

Toole John Lawrence. British comedian. He was born in London March 12, 1832, and educated at the City of London School. He made his first stage appearance at 20, and in a short time had acquired immense popularity in Ireland and Scotland. He arrived in London in 1854, appeared at the Adelphi and the Gaiety, and in 1879 took over the Folly, changing its name to Toole's. He toured successfully in America and Australia. He retired in 1896 and died July 30, 1906. A great friend of Irving, he published his *Reminiscences* in 1889.

Toothwort Perennial plant (*Lathraea squamaria*) of the order *Orobanchaceae*. A British species of a genus of root parasites, it is found chiefly on the roots of hazel bushes in woods and coppices in spring. The roots are fleshy, the stems thick and scaly and the flowers a bright purple.

Tooting District of London. It is in the borough of Wandsworth, and has stations on the underground and other railways. Tooting Common, covering 200 acres is a large open space embracing the commons of Tooting Bec and Tooting Grave. Those were at one time separate areas, and are now represented by Lower Tooting and Upper Tooting. On the common is a large Asylum. The churches of S. Nicholas and Holy Trinity are notable.

Toowoomba Town of Queensland. It is 101 m from Brisbane on a main railway leading inland. It is connected by rail with Sydney, and is the centre not only for its immediate neighbourhood, which produces wine and other crops, but also, by means of branch lines, for the surrounding wheat pastoral and timber country. Pop (1931) 26,439.

Topaz Chemically a silicate of aluminium. Used as a gem stone its characteristic colour is yellow, varying from a pale tint to a deep orange. It is also white, greenish or blue, and some specimens become pink or red when heated. The topaz occurs in gneiss or granite. The finest stones are found in Russia and Brazil.

Toreador (Lat. *taurus* a bull). One of the participants in a bull fight. He usually fights on horseback.

Tornado Type of whirlwind. Tornadoes travel at an average rate of between 20 and 40 m.p.h. from 5 to 30 m., and devastate the country as they go. They are seen as a funnel-shaped cloud, and make a peculiar roaring noise. At sea they are known as waterspouts. They are prevalent in the basin of the Mississippi and Ohio.

Toronto Capital city of Ontario, Canada. Situated on the north shore of

Lake Ontario, it contains the provincial parliament buildings, a great provincial university, many fine schools and libraries, 69 parks, 72 hospitals, and many fine commercial buildings, including the Royal York Hotel, the largest in the British Empire, and the Union Station. The Canadian National Exhibition held here is the greatest annual fair in the world, and a great agricultural Winter Fair is held here every year. There is a fine harbour with accommodation for large vessels, and a fine lakeshore driveway built on reclaimed land. A great manufacturing and publishing centre, Toronto is also a fine residential city, served by a municipally owned street-car system and deriving cheap electric power from the publicly owned Hydro-Electric Power Commission. It is served by both C.P. and C.N. Rives, and has connections by water with Montreal and Great Lakes ports both Canadian and American. It has several flying fields. Pop (1931) 672,982.

Torpedo Type of missile used by ships or aircraft. It consists of a cigar-shaped receptacle with a high-explosive charge, and was invented by Whitehead in 1870. Besides the charge, each torpedo has an engine which propels it, and it can be directed by means of a gyroscope. Torpedoes have a range varying between 7000 and 10,000 yards, and when discharged travel under water, striking the target below the water line. Aerial torpedoes are discharged by a special launching gear.

Torpedo Boat Vessel built for carrying torpedoes. It has been largely superseded by the destroyer, the full title of which is torpedo boat destroyer, which has a far greater speed and resistance than the original torpedo boat. See DESTROYER.

Torphichen Coal mining centre of Linlithgowshire. It is 4 m S.W. of Linlithgow. The nucleus of the place was a preceptory of the Knights of St. John of Jerusalem, on the site of whose church the parish church stands. There are remains of the hospital of the knights. Pop 4000.

Torquay Borough, seaport and watering place of Devon. It is situated on Tor Bay, on the English Channel, 26 m S. of Exeter. It has an equable climate, and this, added to the natural beauty of its site, makes it popular as a winter resort.

Terra-cotta, clay and marble are found in the neighbourhood. There are remains of Tor Abbey, built in 1196. William of Orange landed at Torbay in 1688. Pop (1931) 46,165.

Torque Twisted collar of gold or other metal. They were worn by some of the early inhabitants of Europe and Asia, especially by the Celts. They were formed of bands or bars of the metal twisted spirally. The finest extant examples were found in Ireland. They were worn on the arms or perhaps round the neck. See also TORSION.

Torquemada Thomas de Spanish Inquisitor. He was born in Valladolid about 1420. He became prior of a Dominican monastery, and, in his zeal for the destruction of heresy, induced the pope to create the Holy Office of the Inquisition. Appointed first general in 1483, his ruthless methods have made his name a by-word for cruelty. He died Sept. 16, 1498.

Torrens Lake. Shallow lake of S. Australia. It is about 90 m.

N. of Spencer Gulf, in the northern part of the Great Valley. Its greatest length is 130 m. and its greatest breadth 20 m. It was discovered by E. J. Eyre in 1840, and was named after Sir R. R. Torrens.

Torrens Sir Robert Richard Australian statesman. He was born in Cork in 1814, and educated at Trinity College, Dublin. In 1840 he went to S. Australia, becoming premier in 1857, and conferring enormous benefit on the country by his Act—known as the Torrens Act—which substitutes public registration of land for the cumbersome system of conveyancing. This system became general throughout Australia by 1862. He returned to England in 1863, sat as a Liberal 1868-74, and died Aug. 31, 1884.

Torres Strait Strait between Queensland and New Guinea. It is 90 m. wide, and in it are a number of islands. The strait, discovered by Torres in 1606, is noted for its pearl fisheries.

Torres Vedras Town in Portugal. It is 40 m. by rail from Lisbon. Near here, during the Peninsular War, Wellington constructed the famous fortifications known as the "Lines of Torres Vedras," which he successfully defended during the winter of 1810. Pop 7900.

Torrige River of Devonshire. It rises in the N. of the county, and near Barnstaple falls into the estuary of the Taw. It passes by Bideford.

Torricon Village and sea loch of Scotland. The village stands on the loch, which is an opening of the sea into the W. coast of the county of Ross and Cromarty.

Torrington Borough and market town of Devonshire. An agricultural centre, it is 7 m. S. of Bideford and 226 from London by the S. Ry. Gloves are manufactured here. It is a blue-coat school, founded in the 17th century. Pop (1931) 2913.

Tor Royal Devonshire residence of the King when Prince of Wales. It is near Princetown.

Torsion Term in mechanics. It is used for the strain produced in a body such as a bar or wire when the parallel planes are twisted round a perpendicular axis by a torsion force acting at a certain distance from the axis. The product of the magnitude of the force and its distance is termed the torque, and the quotient of the torque by the sectional area of the body which is twisted, is known as the torsional stress.

Tort In English law a class of wrongs. It describes all wrongs which are not breaches of contract, but for which compensation or damages may be awarded. Trespassing and doing damage on land is a case of tort. An infant is responsible for his torts, although not for his contracts, and a husband is responsible for his wife's torts.

Tortoise Land reptiles of the order Chelonia, which includes also turtles and terrapins (q.v.). It is characterised, like these, by a box-like armour beneath which head, limbs and tail can be withdrawn for security. The dorsal and ventral carapaces of horny material overlie bony shields formed from the ribs, etc. Tortoises belong to the warm regions. Five European species—from 6 in long to the giant tortoise of Galapagos Is.,

which may attain a length of 5 ft.—are known. The handsome mottled tortoise shell of commerce is obtained from one of the turtles, the hawksbill (*C. imbricata*)

Torture Extreme physical pain inflicted for judicial purposes. In ancient times it was inflicted either as part of punishment or to extort a confession. For the latter purpose it persisted until comparatively modern times. It was never recognised as legal in England but was practised extensively, reaching its culmination in the reign of Elizabeth. In Scotland it was retained until much later, and obstinate prisoners were sometimes transferred from England to Scotland to be examined by torture. Types were the rack, the boot and the thumbscrew.

Tory Name of an English political party. Used for robbers in Ireland, it was employed as a term of contempt in England for the supporters of Charles I and Charles II. It was used derisively for those who opposed the proposal to exclude James, Duke of York, from the throne. It soon became the accepted name of the party opposed to the Whigs, and remained so until about 1832, when it was superseded by Conservative. The early leaders of the party were Bollingbroke and St. John, and the later ones Wellington and Peel. It is now used for members of the Unionist Party. See CONSERVATIVE.

An island off the coast of Donegal, Irish Free State, is called Tory Island.

Tosti Sir Francesco Paolo. Italian songwriter. He was born at Ortona, Abruzzi, April 9, 1846, studied in Naples, and became singing master to Princess (later Queen) Margherita, and later to the English Royal Family. In 1894 he was made Professor of Singing at the Royal College of Music. He composed many hundreds of songs, "Good-bye" being probably the most popular. He was knighted in 1906, and died in Rome, Dec 2, 1918.

Totalisator Machine used for betting on horse and dog races, and also other sporting events. They are worked by electricity and automatically record the number of bets on a given horse or dog, and the amount of money that the winners receive. Long used on the continent of Europe, in Australia and elsewhere, they were first permitted in England in 1928. They can be used in racing clubs, but the consent of the Betting Control Board is necessary before they can be erected on courses where horse races are run. Totalisator betting was prohibited on greyhound tracks in 1933 but was restored as from July, 1935, subject to certain restrictions such as the nature of the bet, the number of meetings, etc.

Totemism Primitive religious belief. It was held by the ancient Britons, Hebrews and Greeks and is still in vogue among the Australian aborigines and N. American Indians. Totemism rests on the belief in a blood relationship between the members of a tribe and a plant or animal, the latter being assumed as an emblem and often as an object of worship.

Totnes Borough and market town of Devonshire. It is 22 m. S.W. of Exeter, 203 m. from London by the G.W. Ry., and stands on the Dart. The town has a 10th-century grammar school, and ruins of a castle. It is visited by tourists, and steamers go along the Dart. Pop. (1931) 4625.

Tottenham Urban district of Middlesex. It is 6 m. N. of the city and is served by the L.N.E. and L.M.S. Ryas. The buildings include Bruce Castle with its grounds and the hospital. Tottenham Court Road leads from Charing Cross Road to Hampstead Road. Pop. (1931) 167,748.

Tottenham Hotspur Association football club. It was founded by some boys at Tottenham in 1882, and in 1895 became a professional organisation. It became a member of the Southern League in 1896, and in 1909 entered the League proper. In 1901 and again in 1921, the club won the Association Cup. The ground is in High Road, Tottenham.

Tottington Urban district of Lancashire. A centre of the cotton industry it is 2½ m. N.W. of Bury and 199 from London by the L.M.S. Ry. Pop. (1931) 6582.

Toucan Bird of the family *Rhamphastidae*, of tropical S. America. Allied to the barbets, toucans have vividly coloured bill and plumage, the former very large, though light and thin-walled. They inhabit forest regions and feed on fruit, insects etc.

Touchstone Stone used for testing the purity of gold alloys. It is a black variety of quartz. When rubbed across it, the gold leaves a streak which is then moistened with an acid of 78.4 per cent. nitric acid, 1.6 per cent. of hydrochloric acid and 20 per cent. of water. An examination then tells the expert the nature of the alloy. It is sometimes called Lydian stone because a quartz from Lydia was used for this purpose.

Touchwood Tree fungus of the natural order *Polyporus ignitarius*. It grows on beech and other forest trees, and smoulders away if ignited.

Toulon Seaport and principal naval station of France. It is on the Mediterranean, 42 m. S.E. of Marseilles. The Roman Telo Martius, it was sacked by Goths, Burgundians, Saracens and Franks. Here Henry IV. established an arsenal which was strengthened by Richelieu and fortified by Vauban. At the Battle of Toulon, in 1744, the English fleet, under Admiral Mathews, was defeated by a combined French and Spanish fleet. It was at the siege of Toulon in 1793 that Napoleon first distinguished himself.

Toulon, which has a fine harbour on the bay, is very strongly fortified and is the headquarters of the French Mediterranean fleet. The arsenal and shipbuilding provide important industries, others are fishing and wine growing. Salt, figs, raisins, almonds, oranges, cork, soap, etc., are exported. The chief buildings are the former cathedral, the naval and military hospital, naval school of medicine, the hospital of St. Mandrier and the Lazaretto. There is a broadcasting station (385 M., 8 h. W.). Pop. (1931) 133,263.

Toulouse City of S.W. France, on the Garonne. The Church of S. Saturnin has the largest Romanesque basilica extant, parts of the cathedral date back to the 11th and 13th centuries, and there are many old houses. Toulouse has factories, including the national tobacco factory, and important agricultural markets, as well as two wireless stations (385 M., 8 kW and 235 M., 0.7 kW).

which may attain a length of 5 ft.—are known. The handsome mottled tortoise shell of commerce is obtained from one of the turtles, the hawksbill (*C. imbricata*)

Torture Extreme physical pain inflicted for judicial purposes. In ancient times it was inflicted either as part of punishment or to extort a confession. For the latter purpose it persisted until comparatively modern times. It was never recognised as legal in England, but was practised extensively reaching its culmination in the reign of Elizabeth. In Scotland it was retained until much later, and obstinate prisoners were sometimes transferred from England to Scotland to be examined by torture. Types were the rack, the boot and the thumbscrew.

Tory Name of an English political party. Used for robbers in Ireland, it was employed as a term of contempt in England for the supporters of Charles I and Charles II. It was used derisively for those who opposed the proposal to exclude James, Duke of York, from the throne. It soon became the accepted name of the party opposed to the Whigs, and remained so until about 1832, when it was superseded by Conservative. The early leaders of the party were Bolingbroke and St. John, and the later ones Wellington and Peel. It is now used for members of the Unionist party. See CONSERVATIVE.

An island off the coast of Donogal, Irish Free State, is called Tory Island.

Tosti Sir Francesco Paolo. Italian songwriter. He was born at Ortona, Abruzzi, April 9, 1846, studied in Naples, and became singing-master to Princess (later Queen) Margherita, and later to the English Royal Family. In 1894 he was made Professor of Singing at the Royal College of Music. He composed many hundreds of songs. "Good-bye" being probably the most popular. He was knighted in 1908, and died in Rome, Dec 2, 1918.

Totalisator Machine used for betting on horse and dog races, and also other sporting events. They are worked by electricity and automatically record the number of bets on a given horse or dog, and the amount of money that the winners receive. Long used on the continent of Europe, in Australia and elsewhere, they were first permitted in England in 1928. They can be used in racing clubs but the consent of the Betting Control Board is necessary before they can be erected on courses where horse races are run. Totalisator betting was prohibited on greyhound tracks in 1933 but was restored as from July, 1935, subject to certain restrictions such as the nature of the bet, the number of meetings, etc.

Totemism Primitive religious belief. It was held by the ancient Britons, Hebrews and Greeks and is still in vogue among the Australian aborigines and N. American Indians. Totemism rests on the belief in a blood relationship between the members of a tribe and a plant or animal, the latter being assumed as an emblem and often as an object of worship.

Totnes Borough and market town of Devonshire. It is 22 m. S.W. of Exeter, 203 m. from London by the G.W. Rly., and stands on the Dart. The town has a 16th-century grammar school, and ruins of a castle. It is visited by tourists, and steamers go along the Dart. Pop (1931) 4523.

Tottenham Urban district of Middlesex. It is 6 m. N. of the city and is served by the L.N.E. and L.M.S. Rlys. The buildings include Bruno Castle with its grounds and the hospital. Tottenham Court Road leads from Charing Cross Road to Hampstead Road. Pop (1931) 157,748.

Tottenham Hotspur Association football club. It was founded by some boys at Tottenham in 1882, and in 1895 became a professional organisation. It became a member of the Southern League in 1896, and in 1909 entered the League proper. In 1901 and again in 1921, the club won the Association Cup. The ground is in High Road, Tottenham.

Tottington Urban district of Lancashire. A centre of the cotton industry. It is 2½ m. N.W. of Bury and 190 from London by the L.M.S. Rly. Pop (1931) 6582.

Toucan Bird of the family *Rhamphastidae*, of tropical S. America. Allied to the barbets, toucans have vividly coloured bill and plumage, the former very large, though light and thin walled. They inhabit forest regions and feed on fruit, insects, etc.

Touchstone Stone used for testing the purity of gold alloys. It is a black variety of quartz. When rubbed across it, the gold leaves a streak which is then moistened with an acid of 78.4 per cent. nitric acid 1.6 per cent. of hydrochloric acid and 20 per cent. of water. An examination then tells the expert the nature of the alloy. It is sometimes called Lydian stone because a quartz from Lydia was used for this purpose.

Touchwood Tree fungus of the natural order *Polyporus ignarius*. It grows on beech and other forest trees, and smoulders away if ignited.

Toulon Seaport and principal naval station of France. It is on the Mediterranean, 42 m. S.E. of Marseilles. The Roman Telo Martius, it was sacked by Goths, Burgundians, Saracens and Franks. Hero Henry IV. established an arsenal which was strengthened by Richelieu and fortified by Vauban. At the Battle of Toulon, in 1744, the English fleet, under Admiral Matthews, was defeated by a combined French and Spanish fleet. It was at the siege of Toulon in 1793 that Napoleon first distinguished himself.

Toulon, which has a fine harbour on the bay, is very strongly fortified and is the head quarters of the French Mediterranean fleet. The arsenal and shipbuilding provide important industries, others are fishing and wine growing. Salt, figs, raisins, almonds, oranges, cork, soap, etc., are exported. The chief buildings are the former cathedral, the naval and military hospital, naval school of medicine, the hospital of St. Mandrier and the lazaretto. There is a broadcasting station (385 M., 8 k W.) Pop (1931) 133,263.

Toulouse City of S.W. France, on the Garonne. The Church of S. Saturnin has the largest Romanesque basilica extant, parts of the cathedral date back to the 11th and 13th centuries, and there are many old houses. Toulouse has factories, including the national tobacco factory, and important agricultural markets, as well as two wireless stations (385 M., 8 k W. and 235 M., 0.7 k W.).

in 1660. This lasted until 1782 and was replaced in 1786 by a committee of the Council on Trade under a president. The president, who is a member of the Cabinet, is assisted by a Parliamentary and a permanent secretary and a large staff. The duties of the board include the control of shipping and mines. Trade marks and patents are within its province as are all matters affecting trade with other nations. It administers the company and bankruptcy laws and is concerned with duties on imports. With the Foreign Office it controls the Department of Overseas Trade. The board issues monthly the *Board of Trade Journal*, which deals with trade matters.

Trade Board Organisation set up in Great Britain. In certain industries it exists for fixing rates of pay. The first were established in 1909 in four industries in which the conditions of labour were unsatisfactory. Each board consists of an equal number of employers and employed with an independent chairman. The boards are controlled by the Ministry of Labour. They exist for the following trades: tailoring, box making, chair making, lace finishing, confectionery making, food preserving, shirt making, laundry work and milk distribution.

Trade Mark Distinctive mark placed upon goods offered for sale. The trade mark may be any device, label, ticket, heading, signature, word, letter or numeral. If the mark is a word it must be an invented word, such as *HOVIS*, not one that is in general use, or the name of a place or person. Trade marks are protected by law provided they are registered. They can be registered at the Patent Office, Southampton Buildings, London, W.C.2. Marks on cotton goods can be registered in Manchester, on metal goods in Sheffield. See **PATENT**.

Trade Union Association of workers. Such associations are almost as old as industry itself. In their modern form they date in Great Britain from 1824 when the laws, which had been passed in the 18th century forbidding combinations of masters and workmen, were repealed. About the middle of the 19th century the unions became more active and in 1865 the first Trade Union Congress was held. At first there were many unions, each with a small membership, but soon a policy of amalgamation began. In 1884 the weavers formed themselves into a large union or federation and in 1888 the coal miners did the same. In 1889, to give still more unity to the movement, the General Federation of Trade Unions was set up.

Other events of note were the first election of trade unionists to Parliament in 1874, the introduction of the Trade Union Movement among agricultural labourers by Joseph Arch and the formation of a union of women workers. An Act passed in 1875 made peaceful picketing legal. In 1901, in a famous law case called the *Taff Vale*, the House of Lords decided that the unions were liable for the illegal acts of their officials and that compensation for damages could be obtained from their funds. In 1906, after a long agitation, the law was altered. The funds of the unions were protected from liability and peaceful picketing was allowed in an extended form.

This lasted until 1927 and then the law was again altered. In addition to declaring a general strike illegal, the act of that year ordered the political funds of the unions to be

kept separate from the other funds and provided that no member could be compelled to contribute to the political funds.

The political side of the Trade Union Movement has overshadowed the great work they do as friendly societies. They pay out to members large sums during times of illness and unemployment, and in connection with them are approved societies under the National Health Insurance Scheme. They also assist in working the National Scheme of Insurance against unemployment.

In 1934 there were in the United Kingdom 449 unions; the total membership of the 19 industrial groups, excluding employers' associations, being 515,097. The income for 1934 was £10,111,132. The transport workers and the miners have very strong unions. The Trade Union Movement has spread to other countries and there are powerful unions in the United States, Australia and elsewhere.

Trade Wind Persistent wind always blowing in certain latitudes, in the northern hemisphere it blows towards the Equator from the N.E., in the southern from the S.E. In the days of sailing ships it was of the greatest importance to trade, hence the name. It prevails in the Atlantic and Pacific Oceans, and influences rainfall and climatic conditions generally.

Trafalgar Spanish Cape. It is situated on the south coast and was the scene of the famous battle on Oct. 21, 1805, when Nelson defeated the combined French and Spanish fleets under Villeneuve. Nelson himself was killed in the hour of victory. His last order was the historic message: "England expects every man this day to do his duty."

Trafalgar Square Areen in London. It is laid out to celebrate the victory at Trafalgar, and in it is the Nelson Column, 145 ft. high, with a statue of the hero at the top and four bronze lions by Sir E. Landseer at the bottom. This was completed in 1867.

Traffic Passing to and fro, especially of vehicles. The introduction of motor vehicles and the rapid increase in their number in the 20th century have made the regulation of traffic difficult. It is done in the main by the police, but other systems have been suggested, including the enrolment of a special force for the purpose.

Since the Great War automatic signals have been introduced for the control of traffic. These take the form of lights, green to proceed and red to stand still; they are changed at stated intervals, and are controlled from a central operating station. Another innovation is the restriction of traffic in certain streets to one way. The roads are marked with white lines, sometimes down the centre and sometimes to show stopping places and direction marks are prominently displayed. In Great Britain road traffic is controlled by the Ministry of Transport and the police jointly, and was dealt with in an important series of Acts in 1930, 1931, 1933 and 1934. By these the Minister of Transport is empowered to issue a Highway Code, subject to constant revision, for the greater safety and convenience of all road-users, including cyclists and pedestrians. Licensing and registration, lighting, identification and insurance are carefully dealt with, and the 1934 Act introduced the speed limit of 50 m.p.h. within built-up areas. It also made compulsory a standard driving test before the issue of a licence to a new driver.

The council elects every year a mayor who presides over its meetings and is the official head of the town. Each has a paid official called the town clerk, and a staff of officials. In Scotland the aldermen are called bailies and the mayors are provosts. The powers of the councils vary, according to the size of city, borough or burgh.

Town Planning Phrase used for laying out an area in order to give it a pleasing appearance and ensure healthy conditions. Something of this kind was done in the 19th century when new towns were planned, especially in the United States, and where land was plentiful. In 1909 in England a law was passed to encourage town planning, and other Acts followed. The law was consolidated in 1925, in 1932 its scope was further defined and the measure of 1933 vested extensive powers in the local authorities.

The effect of the laws is to enable these authorities to make plans for any area that is built over. They can restrict the number of houses per acre, provide open spaces and make other regulations that will prevent the district from becoming a slum area. They can improve areas in which housing conditions are bad, make roads and build houses.

Townshend Sir Charles Vere Ferrers English general. He was born Feb. 21, 1861, joined the Indian Army in 1886 and served in the 1891 expedition to the Himalayas and in Chitral in 1895. In April, 1916, he commanded the Sixth Division in Mesopotamia, where he captured Kut al Imara in Sept. 1916. Here, however, he was later besieged, being forced to surrender, April 29, 1916. He was interned till 1918 and he died May 18, 1924.

Township Word used by scholars for a district of England in Anglo-Saxon times. It is practically the same as village. In Canada and other parts of the British Empire, it is used to day for a settlement not large enough to be a town or city.

Townsville Seaport of Queensland, Australia. Situated on Cleveland Bay, it trades in sugar and exports the produce of the district. It is the terminus of the N. Q. Rly. Pop. (1931) 32,050.

Towton Village of Yorkshire (W. R.) 12 m. S.W. of York. Here on March 29, 1461, the Yorkists won a decisive victory in one of the most important of the battles of the Wars of the Roses.

Towy River of Wales. It rises in Cardiganshire and flows in a southerly direction, by Llandovery and Carmarthen, to enter Carmarthen Bay by an estuary. It is 66 m. in length.

Towyn Urban district of Merionethshire. A seaside resort, it is situated on Cardigan Bay, 12 m. from Aberystwyth and 232 from London by the G.W. Rly. Pop. (1931) 3863.

Toy Children's toys, or playthings, have varied little with the ages. Dolls and toy animals still remain with which the children of ancient Egypt played. In Greek and Roman times there were dolls, miniature furniture and halls of different sizes, including one blown out like the modern football. The top is mentioned by Virgil, and has never waned in popularity.

More elaborate toys, such as model train sets, are now largely made in England, while

hand made toys are made by peasants in the Black Forest and Switzerland.

Toynbee Arnold English social reformer. He was born in London, Aug. 23, 1852, and educated at Oxford. Believing that only those could help the poor who lived among them, he took lodgings in Commercial Road Whitechapel, co. operating closely with Canon Barnett. His health gradually gave way, and he died March 9, 1883. Toynbee Hall was opened in 1884 as a memorial to him, with Canon Barnett as its first warden. It is a college and social centre, where university men go into residence, provide facilities for education and recreation, and formulate plans for promoting the general welfare of the poorer classes, and is the model on which similar institutions in other parts of the world have been founded.

Tracery In architecture the stone frame work seen at the head of Gothic windows. It is formed by a continuation of the mullions which are bent to form an ornamental design. At first it consisted of geometrical forms, but later the designs became more free.

Trachea The windpipe, which extends from the larynx to the two bronchial tubes into which it divides. Its walls are strengthened by a series of cartilaginous rings incomplete at the back, where lies the oesophagus. In diphtheria and other throat diseases it is opened sometimes to prevent suffocation.

Tracheotomy Surgical operation. By it the trachea is opened to admit the insertion of a metal tube to allow air to pass to the lungs in cases of obstruction, disease of the larynx or other parts of the upper respiratory passage as in the case of diphtheria.

Trachodon Extinct animal. It was a dinosaur, and fossil remains have been found in the west of the United States. It resembled the iguanodon.

Tractarian Name given to a supporter of the Oxford Movement. It is due to the fact that its ideas were contained in *Tracts for the Times*. See OXFORD MOVEMENT.

Traction Act of drawing something along a road, or other land, or waterway. A locomotive used for drawing vehicles along the road is called a traction engine. A traction wheel is a locomotive driving wheel which acts by frictional adherence to a smooth track.

Tractor Word used for a traction engine. It is especially applied to the kind used for ploughing, the horses being replaced by power obtained from steam or oil. The word tractor is also used for an aeroplane with the screw or screws in front.

A caterpillar tractor is one in which the wheels are replaced by metal belts, for travel over rough country.

Trade Commerce. This term implies the exchange of commodities for purposes of gain. The word is also used for the organisation and workers of a particular trade. Trade has increased greatly with the advance of civilisation, but in 1932 a serious contraction of world trade was reported, due, in part at least, to the system of tariffs. See BALANCE OF TRADE, TRADE BOARD, ETC.

Trade Board of Department of the British Government. It originated in the Board of Trade and Plantations, founded

Transfiguration Feast of the One of the twelve great ecclesiastical feasts which rank after Easter in importance. It commemorates the incident in the life of Christ described in Matt. xvi and is celebrated by both Greek and Roman Churches on Aug. 6. The feast is said to have been instituted by Pope Calixtus III. (1455-58), but earlier allusions to it have been discovered.

Transformer Term used in electrical engineering. It is applied to the device for producing from one alternating electric current, another of a different voltage, and strength. There are many types but essentially a transformer consists of two insulated coils wound upon a laminated iron core, one coil of fine wire with many turns the other or primary coil of coarse wire with few turns, the change in voltage depending upon the rates of the numbers of turns. In wireless, a transformer of a special type is used in some receivers for coupling the valves.

Transfusion Medical term. It is applied to the practice adopted at the present time in certain cases of collapse of transferring blood from a healthy person to a patient. See BLOOD TRANSFUSION.

Transit In astronomy the passage of a heavenly body over the meridian of a place. Transits are very important to astronomers, especially the transits of Venus, which enable them to calculate the distances of the sun from the earth. A transit circle is an instrument for ascertaining the correct time of a transit. It consists of a telescope capable of rotation only in the plane of the meridian with a divided circle on either side of it and elaborate mechanism for registration purposes.

Transmigration of the Soul. See RE-INCARNATION.

Transmission See POWER TRANSMISSION.

Transom In architecture a bar or beam laid horizontally across a window or door. It is of wood or stone and is often seen in the windows of Gothic buildings, where it divides the window into an upper and a lower part.

Transport Ministry of the Department of the British Government. It was established in 1919 and until 1922 was in control of the railways. It still exercises a certain amount of control over them, but its main business is concerned with the care and improvement of the roads. See ROADS.

Transportation Punishment for criminals. By this they are sent to a penal settlement in a distant land. From England prisoners were sent to the plantations in America, a practice which lasted throughout the 17th century and until the independence of the United States in 1783. In 1783 convicts were first sent to Botany Bay in Australia, but this ceased in 1840. From then until 1853, when transportation from England ceased, they were sent to Tasmania.

In Russia, under the Tsars, there was much transportation of prisoners to Siberia, and the system is still practised in Franco and other countries. Transportation differs from banishment. The latter merely sends the offender out of the country, allowing him to go where he likes. Transportation sends him to a definite place for a definite period under supervision.

Transubstantiation Theological term. It denotes the belief held by the Roman Catholic Church that "the whole substance" of the Eucharistic bread and wine are changed, in virtue of their consecration, into the body and blood of Christ.

Transvaal Province of the Union of S. Africa. Lying in the north east, it is entirely inland. It was first settled by farmers from the Cape, intolerant of English control, and became a republic in 1852, but was annexed by the British in 1877. Self-government for internal affairs was recognised in 1881, but the country was again annexed in 1900. Responsible government was granted in 1906, and it became one of the original provinces of the Union in 1910.

The Transvaal consists of a high plateau, largely excellent stock country, principally devoted to cattle and sheep, but there is much good agricultural land, maize and tobacco being important crops. The chief asset of the province is its mineral wealth, especially gold and diamonds from the Witwatersrand area in the neighbourhood of Johannesburg, which celebrated its jubilee in Jan., 1936. Railways are well developed, forming part of the Union railway system, and connect the capital, Pretoria, with other centres and with Delagoa Bay. Area 110,450 sq. m. Pop. 2,187,636, Europeans (1931) 695,963.

Transylvania District of Rumania, officially called Ardeal. It is a high plateau surrounded by a continuation of the Carpathians (q.v.). Desorted by the Romans A.D. 271, it was taken by Hungary in 1003. In 1526, after the Hungarian defeat by the Turks, it became independent. Transylvania welcomed the Reformation, and under George Rakoczi I (1631-48) was the leading champion of Protestantism in Eastern Europe. Reduced to vassalage by the Turks, however, in 1681, Transylvania, after the Turkish defeat at Vienna in 1683, came under the Hapsburgs as part of Hungary. The privileged Saxon and Magyar communities now lost much of their supremacy, and the Rumanian peasantry rose until, in the early 19th century a Magyar revival took place, the attempt at reunion with Hungary in 1848 leading to fighting between the Rumanian and Saxon and the Magyar factions. Transylvania was part of Hungary until 1918, when union with Rumania was proclaimed on Dec. 1. Area 22,312 sq. m. Pop. 2,678,367.

Trappist Member of a branch of the Cistercian religious order. It was founded by Dominique A. J. de B. de Raney, who lived from 1626-1700. De Raney reorganised the monastery of La Trappe in Normandy and himself became its regular abbot in 1664. The Trappist monks are vowed to strict silence, hard labour and seclusion from the world, and no wine, meat, eggs, fish or seasoning was permitted in their diet.

Travancore Native state of India, in Madras. It occupies the western side of the southern Deccan, and stretches more than 150 m. along the coast as far as Cape Comorin. The surface is undulating, with mountains in the east, and the coast is fringed with lagoons. Products include teak, pepper, coffee, rubber and coconuts. The maharaja is entitled to a salute of 19 guns. The area is 7625 sq. m. Pop. 4,000,000.

Tragedy Form of drama. It is the name given to a type of drama which has for its subject the misfortunes of human beings, presented in such a way as to arouse the pity and sympathy of the spectators. It originated in Greece, in the "goat song," or dirge, accompanying the sacrifice of a goat to Dionysos, and reached, in Athens during the 5th century B.C., a level of beauty and dignity which has not since been surpassed except possibly by the tragedies of Shakespeare.

Train Ferry See FERRY

Training Ship Ship for training boys for sea service. There are several of these establishments in Great Britain both for the navy and the mercantile marine. Of the former may be mentioned the *Warspite* and the *Arcturion*, lying off Grays and off Greenhithe respectively. The *Worcester*, training ship for officers of the mercantile marine, lies off Greenhithe also, and the *Indefatigable* is at Rock Ferry, Birkenhead. There is also the reformatory ship *Cornwall* lying off Denton, Gravesend.

Trajan (Marcus Ulpius Trajanus) Roman emperor, A.D. 98-117. He was born in Spain, Sept. 18, 52, and adopted by Nerva in 97. Under him, the empire reached its widest extent for he made Dacia, Mesopotamia, Armenia and Assyria Roman provinces. Although his military expeditions entailed long absences from Rome, he saw to it that all details of good government were carried out. He built many new bridges, roads and canals, established libraries, built the Forum Trajanum, restored the Via Appia. He died in Cilicia in Aug., A.D. 117.

Trajectory Term in physical science. It is applied to the curved path of a body and formed by the action of certain propelling forces as in the case of a planet, or more especially as applied in ballistics to the path taken by a projectile when disengaged from a gun and due to the initial velocity, air resistance and action of gravity.

Tralee County town and seaport of Co. Kerry, Irish Free State. It is situated on the bay of the same name, 21 m. from Killarney, not far from the estuary of the river Lee, and is a junction on the G.S. Rlys. Butter and grain are exported. The town had its nucleus in a Dominican monastery, founded in 1213. The cathedral of Ardfer, some 4 m. N.W. of Tralee, now forms part of the see of Limerick. Pop. (1926) 10,533.

Trammel Net Species of fishing net. It is used principally off the rocky shores of the English Channel. It is composed of three nets, the outer two of a coarse mesh, the inner one finer and hanging more loosely. They are so placed that the fish penetrate the coarse mesh and, striking the inner net, carry it through the meshes of the third net, thus imprisoning themselves inextricably.

Tramway Track along which street cars are drawn or propelled by electricity. The earliest trams were drawn by horses, and were introduced into England about the middle of the 19th century.

Electric trams are run either by overhead wires, or by one of several underground systems. In some systems the car carries its own power while in others the power is derived from a central power station. The rails are laid on a concrete bed, usually with a gauge of

4 ft 8½ in. In large cities cars are made with two decks to accommodate more passengers. Sometimes they move underground for part of their journey, a notable instance being the London subway from the top of Kingsway down to the Victoria Embankment. Some towns (e.g., Nottingham) have adopted a trackless, overhead tramway system, the vehicles being fitted with pneumatic tyres.

Trance State of sleep like insensibility. When accompanied by muscular rigidity it is known as catalepsy. It is of rare occurrence and appears to be of nervous origin. It may be regarded as indicative of some neurological disease or hysteria. A form of trance may also be induced under hypnosis.

Tranent Burgh of E. Lothian. A oolierly centro, it is 10 m. from Edinburgh and is served by the L.N.E. Rly. Pop. (1931) 4528.

Transcaucasia District S. of the Caucasus Mount. Formerly applied to the provinces and governments of Russian Caucasia, with the exception of the provinces of Terek and Kaban, and the Government of Stavropol, and forming part of the Russian Empire, it was in 1919 the scene of prolonged fighting between the Tartars, Armenians, Georgians and other peoples inhabiting the district. Eventually Armenia, Azerbaijan, and Georgia agreed to join the Union of Soviet Republics, and in 1922 the Transcaucasian Socialist Federated Soviet Republic was established, consisting of these three republics together with an autonomous district, and the Batum area.

Transcendent (and Transcendental) Philosophical and religious terms. In philosophy, transcendental was used by Kant to denote *a priori* principles e.g., causality, which are presupposed in and necessary to experience, and in the Kantian philosophy transcendental is applied to doctrines e.g., those of natural theology, which are not realisable in experience. In religion, the doctrine of the transcendence of God emphasises the existence of the Divine Being apart from the material universe and His freedom from its limitations.

Transcendentalism denotes a school of thought represented by Emerson, which defends the idea of an intuitive perception of divine truth in opposition to dogmatic rationalism.

Transept Section of a building which runs at right angles to the main body, giving it the shape of a T or a cross. Transepts became a common feature of Byzantine work in the 8th century, and are found in a highly developed state in the Norman ecclesiastical architecture of France and England, being used for additional altars.

Transfer The handing over, or conveyance of anything from one place or person to another. The term is also used for the form, manner or method by which it is done. Designs and drawings are transferred by means of transfer papers to the surface of material, pottery and stone.

The transfer of stocks and shares is bound up with the formalities of buying and selling of stocks and shares, and the transfer often takes the form of deeds which have to be duly signed and sealed before the shares belong to the new owner. The transfer of land is attended by more elaborate formalities. See CONVEYANCE.

Transfiguration Feast of the One of the twelve great ecclesiastical feasts which rank after Easter in importance. It commemorates the incident in the life of Christ described in Matt xvi and is celebrated by both Greek and Roman Churches on Aug 6. The feast is said to have been instituted by Pope Callixtus III (1455-58), but earlier allusions to it have been discovered.

Transformer Term used in electrical engineering. It is applied to the device for producing from one alternating electric current, another of a different voltage, and strength. There are many types but essentially a transformer consists of two insulated coils wound upon a laminated iron core, one coil of fine wire with many turns, the other or primary coil of coarse wire with few turns, the change in voltage depending upon the ratio of the numbers of turns. In wireless a transformer of a special type is used in some receivers for coupling the valves.

Transfusion Medical term. It is applied to the practice adopted at the present time in certain cases of collapse of transferring blood from a healthy person to a patient. See BLOOD TRANSFUSION.

Transit In astronomy the passage of a heavenly body over the meridian of a place. Transits are very important to astronomers, especially the transits of Venus, which enable them to calculate the distances of the sun from the earth. A transit circle is an instrument for ascertaining the correct time of a transit. It consists of a telescope capable of rotation only in the plane of the meridian with a divided circle on either side of it and elaborate mechanism for registration purposes.

Transmigration of the Soul. See RE-INCARNATION.

Transmission See POWER TRANSMISSION.

Transom In architecture a bar or beam laid horizontally across a window or door. It is of wood or stone and is often seen in the windows of Gothic buildings, where it divides the window into an upper and a lower part.

Transport Ministry of Department of the British Government. It was established in 1919 and until 1922 was in control of the railways. It still exercises a certain amount of control over them, but its main business is concerned with the care and improvement of the roads. See ROADS.

Transportation Punishment for criminals. By this they are sent to a penal settlement in a distant land. From England prisoners were sent to the plantations in America, a practice which lasted throughout the 17th century and until the independence of the United States in 1783. In 1783 convicts were first sent to Botany Bay in Australia, but this ceased in 1840. From then until 1853, when transportation from England ceased, they were sent to Tasmania.

In Russia, under the Tsars, there was much transportation of prisoners to Siberia, and the system is still practised in France and other countries. Transportation differs from banishment. The latter merely sends the offender out of the country, allowing him to go where he likes. Transportation sends him to a definite place for a definite period under supervision.

Transubstantiation Theological term. It denotes the belief held by the Roman Catholic Church that "the whole substance" of the Eucharistic bread and wine are changed, in virtue of their consecration, into the body and blood of Christ.

Transvaal Province of the Union of S Africa. Lying in the north east it is entirely inland. It was first settled by farmers from the Cape, intolerant of English control, and became a republic in 1852, but was annexed by the British in 1877. Self-government for internal affairs was recognised in 1881 but the country was again annexed in 1900. Responsible government was granted in 1905 and it became one of the original provinces of the Union in 1910.

The Transvaal consists of a high plateau, largely excellent stock country, principally devoted to cattle and sheep, but there is much good agricultural land, maize and tobacco being important crops. The chief asset of the province is its mineral wealth especially gold and diamonds from the Witwatersrand area in the neighbourhood of Johannesburg, which celebrated its jubilee in Jan. 1936. Railways are well developed forming part of the Union railway system, and connect the capital, Pretoria, with other centres and with Delagoa Bay. Area 110,450 sq m. Pop 2,187,636, Europeans (1931) 695,963.

Transylvania District of Rumania, officially called Ardeal. It is a high plateau surrounded by a continuation of the Carpathians (q.v.). Deserted by the Romans A.D. 271, it was taken by Hungary in 1003. In 1526, after the Hungarian defeat by the Turks, it became independent. Transylvania welcomed the Reformation, and under George Rakoczi I (1631-48) was the leading champion of Protestantism in Eastern Europe. Reduced to vassalage by the Turks, however, in 1661, Transylvania, after the Turkish defeat at Vienna in 1683, came under the Hapsburgs as part of Hungary. The privileged Saxon and Magyar communities now lost much of their supremacy, and the Rumanian peasantry rose until, in the early 19th century a Magyar revival took place, the attempt at reunion with Hungary in 1848 leading to fighting between the Rumanian and Saxon and the Magyar factions. Transylvania was part of Hungary until 1918, when union with Rumania was proclaimed on Dec 1. Area 22,312 sq m. Pop 2,678,367.

Trappist Member of a branch of the Cistercian religious order. It was founded by Dominique A. J. le B. de Raney, who lived from 1626-1700. De Raney reorganised the monastery of La Trappe in Normandy and himself became its regular abbot in 1664. The Trappist monks are vowed to strict silence, hard labour and seclusion from the world, and no wine, meat, eggs, fish or seasoning was permitted in their diet.

Travancore Native state of India, in western side of the southern Deccan, and stretches more than 150 m along the coast as far as Capo Comorin. The surface is undulating, with mountains in the east, and the coast is fringed with lagoons. Products include tea, pepper, coffee, rubber and copra. The maharaja is entitled to a salute of 19 guns. The area is 7625 sq m. Pop 4,000,000.

Traveller's Joy (*Clematis vitalba*) English wild climbering plant of the natural order *Ranunculaceae*. It is a perennial shrub with tough stems and twining leaf stalks by means of which it climbs in every direction. Four greenish white sepals form the flowers, numerous stamens surround the styles which in autumn elongate into white plummy tails. These give it the familiar name of old man's beard.

Traveller's Tree (*Ravenala madagascariensis*) Plant of Madagascar allied to the banana and resembling a palm. Its leaves, many feet in length, grow in rows on opposite sides of the stem terminating in a cluster giving a fan like effect. Rain water collects in a cavity at the base of each leaf stalk, and flour prepared from the ground seeds is used as food by the natives.

Trawling Method of deep sea fishing. A net is dragged along the bed of the ocean, the mouth of which is kept open, the upper edge being supported a few feet above the sea bed, the lower edge sweeping over it. The net tapers from the mouth, the open end and being tied up during trawling to retain the catch which is hoisted aboard when the trawl is released.

Treadmill Form of mill used in England for punishing prisoners. The prisoner moved the wheel by ascending it step by step, but never made any upward progress. The power obtained was sometimes put to practical use, but was never very great. The first treadmills were erected at Brixton Prison in 1817, and they were in use for nearly a century. The wheel was used by the Chinese for obtaining water for irrigation purposes.

Treason In English law a serious crime. It means to betray and is used for crimes against the sovereign or the state. At one time there were two kinds of treason, petty and high, but petty treason, an act of treachery of a vassal towards his lord, was abolished in 1828. As defined by an Act of 1848 high treason is any serious betrayal of the interests of the State and the penalty is death by hanging. In Tudor times and earlier many persons were put to death for treason, the punishment at that time being hanging and disembowelling, followed by beheading and quartering. This punishment was inflicted on some persons after the Jacobite risings of 1716 and 1746.

Treasure Trove Term in English law. It denotes any gold or silver, in coin, plate or bullion, found hidden in a house or in the earth, or other private place, the owner thereof being unknown. It belongs to the crown, but usually it is given to the finder. Any one who finds treasure trove and does not disclose the fact may be prosecuted. One of the duties of coroners is to inquire into cases of treasure trove.

Treasury Department of the British Government. It supervises the national revenue and expenditure. The Chancellor of the Exchequer is its head and his chief assistant is the Financial Secretary to the Treasury. The first lord and the junior lords of the treasury have nothing to do with the management of the department. The permanent head is the Secretary to the Treasury who is the official head of the Civil Service. The offices are in Whitehall.

At one time the Treasury was under the Lord High Treasurer one of the great officers

of State, but since 1711 his duties have been discharged by a commission. At first the chief official was the first lord, but gradually his work passed to the Chancellor of the Exchequer. The office of the first Lord of the Treasury is usually held by the Prime Minister.

Treasury Bill Document issued by the British Government in return for money borrowed. Introduced in 1877, treasury bills are usually sold by tender to banks and financial houses those who offer the money at the lowest rate of interest securing them. They are repayable in three, six or nine months. They are in multiples of £1000 and are used to obtain money when it is wanted for short periods. In 1932 the national debt included £604,465,000 in treasury bills.

Treasury Bond Document of borrowed money for the government. It is borrowed for a definite term of years usually five, and the bonds are repayable at par, although they may be sold at less than par. In 1932 the national debt included £194,216,566 borrowed by means of treasury bonds. They usually bear interest at the rate of five per cent.

Treasury Note Term used for the notes for £1 and 10s first issued by the Treasury in Aug., 1914. They continued in use until 1928, when they were superseded by the currency notes issued by the Bank of England.

Treaty Agreement, contract or league between two or more nations. Treaties are made by diplomats and other representatives of the various countries, but before they are valid they need ratification by legislative or other authority in the several countries. Important treaties deal with the arrangements made at the conclusion of a war, but others deal with a specific subject and have no relation to war. In modern times many treaties are commercial. Since the Great War it has become the custom to deposit copies of treaties with the League of Nations.

Important European treaties are the Treaty of Westphalia (1648), the Treaty of Ryswik (1713), the Treaty of Paris (1814), the Treaty of Vienna (1815), the Treaty of Berlin (1878), and above all, the Treaty of Versailles (1919).

Treaty Port Name used for certain seaports in China and Manchuria. They are those which are open to European trade by treaty. This was first done in 1842 after a war between Britain and China.

Trebbia River of Italy. A short stream, only 58 m. long, it is a tributary of the Po which it joins near Piacenza. It is notable for the victory gained by Hannibal over a Roman army in 218 B.C.

Trebizond City of Asia Minor. It was founded as a Greek colony near the S.E. angle of the Black sea, and derived its importance from its position on the main caravan route from Asia through Armenia to Europe. For two and a half centuries it was the capital of an empire, founded by Alexius Comnenus after Constantinople was occupied by the Crusaders in 1204. Being well protected on the land side by a range of mountains, it withstood many sieges, until it fell finally to Sultan Mohammed II in the 16th century. The population is about 80,975.

Treble Term used in instrumental music. In a musical composition the treble is played by instruments of acute tone, such as the violin, flute, clarinet, or on the

higher keys of a piano and organ. It is so called because it was formerly a third part added to the *gusto fermo* and counterpoint.

Tredegar Market town and urban district of Monmouthshire. It stands on the river Sirhowy, 24 m from Cardiff and 163 m from London, on the G.W. Rly. The chief industries are iron working and coal mining. Pop. (1931) 23,195.

The title of Baron Tredegar is held by the family of Morgan. It dates from 1859 and the family seat is Tredegar Park.

Tree Woody stemmed plant, differing from a shrub in size only and perennial in habit. Trees are either deciduous, as the oak and elm, or evergreen like the pine.

Trees are worshipped by some peoples. Each worship may be animistic, i.e., the tree may be regarded as the home of some powerful spirit or departed soul, or may be part of a fertility cult. In the latter instance the tree is rather the symbol than the object of worship. There are some curious survivals of tree worship in civilised countries, the best known of which is the maypole. Trees were also sometimes used as the symbol of life, as may be read in the opening chapters of Genesis. See AFFORESTATION, FORESTRY.

Tree Sir Herbert Beerbohm. English actor. He was born in London, Dec. 17, 1853, the son of Julius Beerbohm, a merchant, and was educated in Germany. Under the stage name of Beerbohm-Tree he made his debut in London in 1877. In 1884 he took the theatre-going world by storm as the curate in *The Private Secretary*. He played melodrama for ten years at the Haymarket Theatre, and later put on Shakespeare with great success at His Majesty's. He was knighted in 1909, and died July 2, 1917.

Tree-creeper Small bird (*Certhia familiaris*) widely spread in the temperate regions of Europe, North America, Asia, and North Africa. It climbs about on the bark of trees by means of its claws and tail feathers in search of insects on which it feeds.

Tree Frog Family (*Hylidae*) of tree living frogs. There are many species widely distributed. The digits of both pairs of limbs are furnished with adhesive pads adapted to its habitat. The male has a vocal sac. *Hyla arborea* is common in S. Europe. Tree frogs resort to water for the breeding season.

Treforest District of Glamorganshire. It stands on the South Wales coalfield, 12 m from Cardiff and 164 m from London by the G.W. Rly. Pop. 12,365.

Tregaron Town of Cardiganshire. It is 10 m from Lampeter and 37 m from Carmarthen, on the G.W. Rly.

Treharris Urban district of Glamorganshire. It is 14 m north of Cardiff and 165 m from London, on the G.W. Rly. It is a coal mining centre. Pop. 8,787.

Treitschke Heinrich von Gorman writer. He was born in Dresden, Sept. 15, 1834, and studied at the universities of Leipzig and Bonn, becoming professor at Freiburg in 1863, and later at Koll, Heidelberg and Berlin. He edited *Preussische Jahrbücher* and *Historische Zeitschriften*, wrote a German history of the 19th century, and many political and historical essays. He died April 28, 1890.

Trelawny Sir Jonathan Cornish bishop. Born in Polynt,

Cornwall, March 24, 1650, and educated at Westminster and Oxford, he was ordained in 1673, and held the livings of St Ives and Southill. In 1685 he was made bishop of Bristol, in 1688 bishop of Exeter, and in 1707 Queen Anne promoted him to the See of Winchester. He was one of the seven bishops accused by James II. in 1688 of seditious libel, and is the subject of the famous ballad "And shall Trelawny die?" The poem is supposed to have been inspired by the fact that Trelawny was the head of an ancient Cornish house. He died July 19, 1721.

Treloar Sir William Purdie. English philanthropist. He was born in London, Jan. 13, 1843, and educated at King's College School. He embarked upon a business career, at the same time taking an active interest in public affairs. In 1880 he became a member of the city corporation, was sheriff in 1899-1900, and Lord Mayor 1906-07. He founded the Lord Mayor Treloar's Cripples' Hospital and College at Alton and Havling Island, Hants. Knighted in 1900, created a baronet in 1907, he died Sept. 6, 1923.

Trench In warfare an excavation in the earth used to protect soldiers from enemy fire. Early in 1915, when the Great War on the western front ceased to be a war of movement, trenches were dug on both sides and soon there were lines of these from the Belgian coast to Switzerland. There were advance, support, communication and other kinds of trenches, and weapons and machines specially suited for trench warfare were developed. These included a cutter for excavating them and a mortar for throwing bombs into them. A disease called trench fever developed among troops serving in the trenches.

Trenchard Hugh Montague, 1st Baron. Born Feb. 3, 1873, he entered the army in 1893 and served with distinction in the Boer War (1899-1902), as well as during the Great War. He was Colonel in 1915, Major-general in 1916, Air Chief Marshal, 1922, and Marshal of the Air, 1927. He succeeded Lord Byng as Commissioner of the Metropolitan Police Force, Nov. 2, 1931. He was created baronet in 1919 and baron in 1930, and was awarded a G.C.B. in 1924. In 1933 a bill for the reform of the police organisation ("Trenchard's Bill") based on a report by Lord Trenchard, was introduced in Parliament. He retired in Nov., 1935.

Trent River of England. It rises in Staffordshire and flows through Derbyshire into Nottinghamshire. It joins the Humber near Alkborough. It is 180 m long and has a bore or aegre. It passes by Stoke, Burton, Nottingham, Newark, and Gainsborough and its tributaries include the Stow, Tame, Dove, Soar, Erewash, Derwent and Idle. The Trent is navigable to Nottingham by small craft and to Gainsborough by larger ones. Plans have been prepared to improve the channel and make Nottingham a river port. Canals unite the Trent with other waterways in the northern and central parts of England.

Trent Junction is a station on the L.M.S. Rly., 7 m from Nottingham. Near is Trent College, a public school for boys founded in 1866.

Trent Town of S. Tirol. Formerly Austrian, it now belongs to Italy. It is situated on the River Adige, and is strongly fortified, being the capital of the Trentino. It was captured by the Italians on Nov. 3, 1918. Among the industries may be mentioned

pottery, silk, wine and playing cards Marble is quarried Pop (1931) 56,837

The Council of Trent, held here in three sessions between 1545-63, was a general council of the Roman Church. It dealt with various doctrinal matters and has deeply influenced that church ever since. The decrees were confirmed by Pope Pius IV in the year following its conclusion.

Trente et Quarante Card game. Alternative ly named *Rouge et Noir*, it is a gambling game played with six packs of cards, on a table specially marked out. The cards are dealt out in a row (the black row) until the total number of pips exceeds 30. (Court cards count 10 and aces 1). A second (or red) row is then dealt below the first, and the winning row is that containing the most pips. Players stake on *coulour* (the winning row) or *inverse* or *à cheval*, a combination of these. When both rows total 31, the *refait* occurs, and stakes are put *en prison* until after the next deal.

Trentham Village of Staffordshire. It is 3 m. from Stoke-on-Trent on the L.M.S. Rly. Trentham Hall, the seat of the Duke of Sutherland, was pulled down in 1911 and the grounds made into a public park. One of the finest houses in England, it was built about 1840.

Trentino Italian district. It is a mountainous area on both sides of the River Adige, surrounding the town of Trent, which is 57 m. N. of Verona. Essentially an Italian region it had become, prior to the Great War, part of the Austrian Tirol, with a frontier unfavourable to Italy, leaving 400,000 Italians under Austrian rule. It was the scene of much heavy fighting during the war, and on Nov. 3, 1918, the day before the cessation of hostilities, Trent was occupied by Italian troops. After the war the district, which covers 2539 sq. m., was restored to Italy.

Trenton City of New Jersey, the capital of the state. It stands on the River Delaware, 34 m. from Philadelphia, and is served by several railway lines. There are a number of manufactures for which electric power is generated from the falls in the river. Pop. (1930) 123,356.

Trephine Surgical instrument. It is a small cylindrical saw used by surgeons for operations on the skull. By means of this instrument a small circular portion of bone can be removed to relieve pressure on the brain, caused by disease or injury.

Tresco One of the Scilly Islands. It is 42 m. from Penzance and covers 720 acres. It contains the residence of the lord proprietor famous for its beautiful gardens, remains of the old abbey and a ruin called Cromwell's Castle. See SCILLY ISLANDS.

Trespass Act of going without permission on land belonging to someone else. An action for trespass can be brought by the owner but unless the trespasser did damage to the property he will be acquitted or let off with a very small fine. Other kinds of trespass are trespass to goods and trespass to the person. The former is interfering with a person's property and the other interfering with his liberty.

Trevelyan Sir George Otto. English statesman and writer. He was born in Leicestershire July 20, 1838, and educated at Harrow and Cambridge, where he took high honours. Entering Parliament in

1885, he was successively a Lord of the Admiralty, Chief Secretary for Ireland, and Secretary for Scotland, retiring from public life in 1897. His best known works are *Life and Letters of Lord Macaulay*, *The Early History of Charles James Fox*, and *The American Revolution*. He died Aug. 16, 1928.

His eldest son the Rt. Hon. Charles Phillips Trevelyan, was born in London, Oct. 28, 1870, and also educated at Harrow and Cambridge. He became Parliamentary Secretary to the Board of Education in 1908, but resigned in 1914, being opposed to the Government war policy. He re-entered Parliament in 1922 in the Labour interest, and was President of the Board of Education in 1924 and 1929-31.

George Macaulay Trevelyan, the third son of Sir George Otto, was born Feb. 16, 1876, and also educated at Harrow and Cambridge, where he has been Regius Professor of History since 1927. He has honorary degrees from Oxford, St. Andrews, Edinburgh and Durham, and has written an appreciation of Meredith, three books on Garibaldi, *A Life of John Bright*, *England under the Stuarts*, *British History in the Nineteenth Century*, *A History of England*, *Blenheim*, and other books on historical subjects.

Trèves French name for Trier, an ancient German city. It lies on the Moselle, in a fertile valley, spanned by vine-clad hills. Trèves contains many ancient buildings, a Roman amphitheatre and palaces, and an ancient and beautiful cathedral. It was conquered by Caesar in 56 B.C., and later by the Franks, and was throughout the Middle Ages a seat of monastic learning. Pop. (1925) 57,344.

Trevithick Richard. English inventor. He was born in Cornwall, April 13, 1771, the son of a coal mine manager. In 1800 he built a high pressure non-condensing steam engine and in 1801 a locomotive which carried passengers along a road. He applied his high pressure engine to many purposes, such as boring and breaking rocks, dredging, threshing. In 1816 he was in Peru, building mining engines. He died April 22, 1833.

Trial Name used for the examination of a prisoner in a court of law before a judge or recorder. It is only used when a person is charged with a criminal offence which is too serious for the magistrates. In some trials there is a jury, but not in all. The counsel for the prosecution opens the case and calls his witnesses, who can be cross-examined by the defending counsel. The defendant's counsel then states his case and calls his witnesses. The judge then gives his verdict or, if there is a jury, sums up the case and leaves the verdict to them. Finally he discharges the prisoner or delivers sentence in accordance with the verdict of the jury.

Trianon Pavilions built in the great park at Versailles. The Grand Trianon was built in 1670 for Louis XIV. It is a one-storied building and was later used by Napoleon and Louis Philippe. The Petit Trianon was built in 1766. It was a favourite abode of Marie Antoinette, who laid out gardens around it.

The Treaty of Trianon between the Allied Powers and Hungary, signed June 4, 1920, separated Hungary from Austria, allotted parts of her territory to Rumania, Czechoslovakia and Yugoslavia on a basis of nationality, and provided for reparations and the reduction of her military forces. The Covenant of the League of Nations forms part of the treaty.

Triassic System *Geological system* lying on the Permian. It occurs in Wales, the midland and northern counties of England and around the Moray Firth in Scotland. It consists of conglomerates, breccias, sandstones and marls. Gypsum, alabaster and salt are mined, and the rocks provide important building and other materials.

Tribe *Clan or body of people descended from the same ancestor.* A number of tribes make up a people or nation. The Jews were divided into twelve tribes, descendants of the sons of Jacob, and the American Indians are divided into tribes to-day. In early days the Romans were divided into three tribes and there were also tribes among the Greeks.

Tribune *Roman magistrate.* The name was given to plebeian officers in Rome, who were first elected 494 B.C. to safeguard the plebeians from oppression by the patricians. They had the right of vetoing the action of any magistrate. At first there were two, afterwards ten, tribunes, whose persons were sacrosanct. Their power was curtailed by Sulla's legislation, but was restored by Pompey, 70 B.C. Under Augustus, the tribunician power passed into the hands of the emperor.

Tricolor *Word used for the national flag of the French republic.* It dates from the time of the Revolution of 1789, and is red, white and blue. Other European countries have three-coloured flags, but the word is in practice confined to the French one.

Trieste *Seaport of Italy.* Formerly Austrian, it is on the Adriatic, on the Gulf of Trieste, some 70 m. N.E. of Venice. It has a fine harbour and an extensive trade in oil and wine. Shipbuilding is important. Other industries are oil-refining, iron foundries, chemicals, soap making, cotton spinning, etc. There are marble quarries nearby. There is a broadcasting station (247.7 M., 10 kW.). The cathedral of San Ginsto occupies the site of a Roman temple. Five miles distant is the castle of Miramare, built for the ill-fated Emperor of Mexico. The port became Italian territory after the Great War. Pop. (1931) 249,495.

Triforium *Term in ecclesiastical architecture.* It is used for an upper storey above the aisle. Originally set apart for the women of the congregation, the triforium had arched openings. It persisted in later architecture, and in English churches frequently forms a wide passage right round the building.

Triglyph *In architecture an ornament.* It is repeated at equal intervals in a Doric frieze. Each triglyph consists of two gutters, or channels, cut to a right angle, called glyphs, and separated from each other by their interstices.

Trigonometry *Branch of mathematics.* It treats of the relations concerning the sides and angles of triangles and especially of methods of deducing from given parts other required parts. It is much used by surveyors who take certain points, calculate the size of the angles and from these obtain the required measurements.

Trilobites *Class of fossil marine crustacea.* Peculiar to the palaeozoic rocks and especially abundant in the Cambrian and Silurian periods, the oval

flattened body was covered with a hard trilobed exoskeleton on the dorsal surface and divided into a head bearing a carapace, a thorax composed of movable segments, and an abdomen or tail piece of fused segments. The thoracic segments being movable, the trilobites were able to roll themselves up like wood-lice.

Trim *County and market town of Co. Meath, Irish Free State.* It is on the Boyne, 30 m. from Dublin, and is reached by the G.S. Rlys. There are considerable ruins of a castle built in the 13th century by the English invaders, and remains of several abbeys. There is an agricultural trade. Pop. 2800.

Trimdon *Urban district of Durham.* A colliery centre, it is 8 m. S.E. of Durham and 249 m. from London by the L.N.E. Rly. Pop. (1931) 5410.

Trimmer *Term used for a man of moderate views, especially in politics.* It is due to the Marquess of Halifax, who used it of himself in a work called *The Character of a Trimmer*, in which he defended persons who could see both sides of a question.

Tring *Urban district and market town of Hertfordshire.* It is 32 m. from London on the L.M.S. Rly. There is a trade in agricultural produce. Tring Park is the magnificent seat of Lord Rothschild. Pop. (1931) 4364.

Trinidad *Island in the West Indies.* Forming with Tobago a British Crown Colony, and lying a few miles north of Venezuela, it was discovered by Columbus in 1498, colonised by Spain and ceded to Britain in 1802. It has a tropical, but not oppressive, climate. Principally an agricultural country, producing cane sugar by means of large modern mills, a high grade of cocoa and other tropical produce, it is famous for its pitch lake, covering 114 acres, an important source of asphalt, while petroleum is also worked. The capital, Port of Spain, has excellent buildings. Area, 1802 sq. m. Pop. (1931) 414,572.

Trinitarian *One who believes in the Trinity.*

Trinitarian is the name of a Roman Catholic order, called also the Redemptionists. It was founded in 1198 to ransom Christian soldiers who had been taken prisoners by the infidels. The members known as the red, or cruciated (crossed) friars, had a red cross on a white robe. They had houses in London and elsewhere. The order is now a small one with headquarters in Rome, and its chief work is the ransoming of negro slaves.

Trinitrophenol *Yellow crystalline substance.* Also known as picric acid, it is formed by the action of strong nitric acid upon phenol. It acts as a strong acid forming salts which explode when heated or struck, especially in the case of potassium and ammonium picrates. Picric acid is sparingly soluble in water and its solution is used in medicine as an application for burns. It is used as a dye, and enters into the composition of high explosives.

Trinitrotoluene *High explosive for shells.* Formed by the action of strong nitric acid upon toluene, it is also known as trotyl or T.N.T. Unlike trinitrophenol it does not behave as an acid forming explosive salts, and has a lower melting point and sensitivity, also it is insoluble in water, consequently there is less danger in manufacture and use. The high explosives

amato and ammonal are mixtures of this substance with ammonium nitrate, powdered aluminium and other ingredients

Trinity The Holy Theological term It denotes the Christ an holier in the union of three 'persons' (Father, Son and Holy Spirit) in one Godhead The development of this doctrine, traces of which are to be found in the New Testament, owes much to the influence of Greek philosophical thought on the Christian Church during the early centuries of its history

Trinity College Cambridge The largest college of Cambridge University Founded in 1516 by Henry VIII, it absorbed several earlier foundations among which were Michaelhouse dating from 1324, and King's Hall, founded in 1337 The five courts include Great Court, Cloister or Noville's Court, and King's or New Court The library was designed by Wren and contains busts of eminent alumni The Master is appointed by the Crown There are valuable exhibitions, some restricted to Westminster School

Trinity College Dublin University in Dublin It was founded in 1591, and is mainly a Protestant body, although religious tests were discontinued in 1873 Unlike Oxford and Cambridge the university consists of a single college, the head of which is the provost Women were first admitted in 1903 The library contains a very valuable collection of Irish MSS There is an observatory at Dunsink and a hotanic garden at Balls Bridge Trinity College returns three members to Dail Eireann

Trinity House Association of sea men It was incorporated in 1514, has its headquarters on Tower Hill, London, and is responsible for all pilotage round the British coasts and at Gibraltar This involves the upkeep of light houses and ships, the buoying of channels removal of dangerous wrecks, and so on The Elder Brethren of Trinity House are persons of high standing in the country, including members of the Royal Family and retired naval officers of high rank They wear a distinctive costume on state occasions.

Trinity Sunday Sunday after Whit Sunday (Pentecost) observed by the Anglican and Roman Catholic churches in honour of the Holy Trinity The festival, which was not generally observed until the 12th century, was established authoritatively by Pope John XXII in 1334

Triolet Form of verse, consisting of eight lines, the first and last two lines are identical and the fourth line is the same as the first The lines are of six or eight syllables and only two rhymes are used

Tripe Food prepared from the intestines of ruminant animals It is usually out in slices and served with milk and onions It is regarded as the most easily digestible of all meat foods

Triple Alliance Alliance made between three nations There have been many triple alliances between European nations the most recent of these was that formed in 1883 between Germany, Austria and Italy against the power of Russia and France This alliance was severed when Italy joined the Allies in the Great War on May 4 1915

Tripoli City of North Africa It is the capital of the district of Libya

usually called Tripolitana, but sometimes itself known as Tripoli Situated on a promontory of the Mediterranean, at the intersection of three caravan routes it comprises all the features of a typical Moorish city, containing several fine mosques The arch of Marcus Aurelius is an imposing monument in marble, and there is an interesting Spanish fortress Since the Italian occupation many fine government buildings have been erected as well as a modern fort In the 16th century Tripoli passed from the Arabs to the Turks Pop (1931) 71,793

Tripolitana Italian colony of N Africa. It is the W part of Libya, and is divided into civil and military zones Until 1911 it was a Turkish vilayet The chief industry is agriculture and especially fruit growing Tripoli is the capital Other places are Yefren, Gharlan and Aziza It is a centre for caravan trade with the interior

Tripes Three legged stool or altar, used by the Greeks

Tripes is the name, at Cambridge University, of the Honours examination in various schools and is derived from the obsolete custom of sitting on a three legged stool on Ash Wednesday to debate in the Philosophy School

Triptolemus Son of Cereus, king of Eleusis An agricultural hero and supposed inventor of the plough he was, according to one legend, brought up by Demeter, becoming the first priest of Demeter and founder of the Eleusinian Mysteries According to the Attic legend, he was a judge in the underworld

Triptych Decorative piece consisting of three panels They are often seen in churches where they are used as altar pieces Some of them are beautifully decorated with paintings of religious personages or scenes The two wings usually fold over the centre piece

Tirreme Vessel with three banks of oars and two masts It probably originated in Tyre or Sidon, but was soon copied by the Greeks The Attic tirreme contained up to 174 oarsmen, and possibly reached a speed of nine knots The sails were not used in battle

Tristan Hero of romantic legend He was the nephew of King Mark of Cornwall and the ill fated lover of his uncle's wife, Isolt According to some versions, the legend is connected with the Arthurian cycle, but the poem written by Thomas of Brittany and translated by Gottfried von Strassburg (which forms the basis of Wagner's Opera, *Tristan and Isolde*), knows nothing of King Arthur Other modern renderings of the tale are found in poems by Swinburne, Arnold and Tennyson

Tristan da Cunha Island midway between South Africa and South America It is occupied by the descendants of some of the military force stationed there while Napoleon resided at St Helena, and remaining when the garrison was withdrawn in 1817 The people, numbering 163 (1932) raise potatoes and have cattle, sheep, pigs and poultry

Tritoma Genus of herbaceous plants, also known as kniphofia. They belong to the natural order *Liliaceae* and are natives of South Africa Several species are grown as garden plants, one known as the red hot poker plant is conspicuous for its elongated spike of scarlet flowers in the late summer or autumn

Triton Greek merman Son of Poseidon and Amphitrite, he dwelt on the Libyan coast, and assisted the Argonauts when their ship went ashore on the Lesser Syrtis. He was human to the waist, but had a fish-tail and carried a sea shell which he blew to bring storms or calms

Triumph Celebration of a Roman general's success. It was an occasion of great rejoicing. The general and his troops marched through the city, with the prisoners and the spoil they had taken, as is illustrated in the story of the British chief, Caractacus. The general went then to the Capitol where sacrifices were offered. One of the most splendid triumphs ever celebrated was that of the Emperor Aurelian in 274.

Arches erected to commemorate these victories were known as triumphal arches. There were many of them throughout the empire and some of them still stand. One of the finest is the arch of Titus in Rome, erected to celebrate the capture of Jerusalem in A.D. 70.

Triumvir Member of the Triumvirate in Rome. The first Triumvirate was formed in 60 B.C. when Caesar, Pompey and Crassus joined forces to govern Rome. The second Triumvirate, 43 B.C., consisted of Octavian, Antony and Lepidus, who divided the Roman Empire among them. The word comes from the Latin *tres*, three, and *vir*, a man.

Troglodyte Name given by the Greeks to dwellers in caves. They were supposed to live in the Caucasus, or on the shores of the Red Sea. Their chief occupation was keeping cattle.

Troll Creature of Scandinavian folk-lore. It is sometimes represented as a kind of giant or ogre, sometimes more like a gnome, but always with evil powers and malevolent disposition.

Trolley Small truck on wheels. Usually made to run on rails, it is used in mines, gravel and chalk pits, and for similar purposes. A trolley car is a kind of wheeled tram car, much like a motor-bus in appearance, but propelled by electricity and running on rails. In some places it has superseded the ordinary tram.

Trollope Anthony, British author. Born April 24, 1815, into a literary family, he was educated at Winchester and Harrow. He worked in the surveyor's department of the Post Office from 1841 to 1867, his duties taking him to the United States, the West Indies and Egypt. He travelled later in S. Africa and Australia, acquiring in all his journeys material for books. His first work fell flat, but *The Warden* (1855) excited attention, and when *Barchester Towers* appeared his reputation was established. *The Last Chronicle of Barset*, *The Claverings*, *John Caldigate* and *An Old Man's Love* are only a few of a very long list. He died Dec. 6, 1882.

Trombone Brass wind instrument formerly known as the sackbut. It possesses a deep tone. In the slide trombone, an outer semicircular tube slides up and down the inner tube, altering at will the length of the tube of air, thus the pitch can be varied. The valve trombone, another variety, is equipped with pistons instead of a slide. Trombones are of three kinds, alto, tenor and bass.

Tromp Martin Harpertzoon van, Dutch admiral. He was born at Brielle in 1597, and his name is associated with

the seventeenth century struggle for sea supremacy between the Dutch and the English. In May, 1652, he was worsted by Blake, but in November he defeated him in the Straits of Dover. In Feb., 1653, van Tromp returned and suffered defeat off Portland. The final struggle was July 31, 1653, off the coast of Holland, where the Dutch lost thirty vessels, and Admiral van Tromp was killed by a bullet. He was victorious in 33 naval encounters.

Tromsø Seaport of Norway. It is on the island of Tromsø and is the principal port for Spitzbergen. Fishing and its subsidiaries are the chief industry. The town has a broadcasting station (453.2 M., 0.1 kW).

Trondhjem (or Nidaros) City and seaport of Norway. It is situated on the fjord of the same name, on the estuary of the Nid, 350 m. by railway N. of Oslo. The cathedral built in the 11th, 12th and 13th centuries has suffered many times from fire. From 1818 the kings of Norway have been crowned here. Shipbuilding is carried on, and there are saw mills, tobacco and other factories. The city has a broadcasting station (493.4 M., 1.2 kW). Pop. (1930) 54,458.

Founded in 996, Trondhjem was the capital till 1380, after which it declined till the present century. In 1930 it changed its name officially to the older Nidaros.

Troon Burgh, seaport and pleasure resort of Ayrshire. It is 9 m. from Kilmarnock, on the L.M.S. Rly. It has a good harbour from which coal is shipped and has other industries. Troon has become a popular watering place. Pop. (1931) 8544.

Troop Body of soldiers. In the British army it is only used in the cavalry regiments where each squadron is divided into troops. It numbers about 40 men. The phrase trooping the colour means carrying the colours in front of a regiment or battalion on the king's birthday.

Trope Expression used in a sense different from that which it properly possesses. It is usually done for emphasis. It is a trope to call a man a dark horse or a sly old fox.

Tropics Term for part of the earth's surface. There are two tropics, north and south. The northern one, bounded by the tropic of cancer, lies between latitude 23½° N. and the equator, and the southern, bounded by the tropic of capricorn, lies between the equator and 23½° S. They include, therefore, the hottest part of the earth, which is called the torrid zone.

Trossachs The Mountain district of Perthshire, Scotland. The name is Gaelic and means bristling country. The region, which consists of a pass extending from Loch Katrine to Loch Achray, is densely wooded and is noted for its lovely scenery. Overlooking the pass are Ben Venue, 2393 ft., and Ben A'an, 1850 ft.

Trotsky Leo Davidovich, Russian politician (or Braunstein). His real name is Bronstein. He was born in 1877 near Elisavetgrad and educated at Odessa University. Arrested as a revolutionary in 1898, he was exiled to Siberia, but escaped to England, where he became acquainted with Lenin. He returned to Russia in 1905, was again arrested, but escaped to Vienna. At the revolution of 1917 he became the People's Commissar for foreign affairs and after the treaty of Brest-Litovsk, Commissar for War.

In 1927 he was expelled from the Communist party, and exiled to Turkestan. In 1929 he went to Constantinople. He was refused entry to England and Denmark, but in 1931 was permitted to live in Spain. In January, 1932, he was banished for two years by the Soviet Government. In the same year he lectured on Communism in Copenhagen.

Troubadour Mediaeval poet. The troubadours flourished in Provence from the eleventh to the thirteenth century. The three great sources of their inspiration were war, religion and love, and their poetry is for the most part written in very complicated metre and rhyme. They received from the nobility protection and patronage in return for their services in celebrating the exploits of their patrons. The counterpart of the troubadour in northern France was the *trouvère*.

Trout Fresh water fish of the family *Salmonidae*. The common trout (*Salmo fario*) is found in streams and rivers of northern Europe, or in inland waters from which these flow. There is considerable variation in colouration, but this is generally olive green above and paler beneath, the head, body and fins marked with roundish black spots. The trout varies in weight from $\frac{1}{2}$ lb to 2 lb or more, the larger fish being found in the deeper waters. Trout resort to the upper shallow waters of streams to spawn. The fish affords good sport to the angler who uses a light flexible rod and bait of an artificial fly.

Trouville Watering place of France. It stands on the River Touques 10 m from Havre and 132 m from Paris. There is a small harbour and a little fishing, but the place is best known as a popular pleasure resort, with a casino, good bathing and other attractions. Steamers go regularly from Havre. Deauville is on the other side of the river.

Trowbridge Urban district and market town of Wiltshire. It is 12 m from Chippenham and 97 m from London by the G W Rly. Woollen goods are manufactured. Pop (1931) 12,011.

Troy Ancient city. It was situated on the N W promontory of Asia Minor, at the junction of the rivers Scamander and Simois $3\frac{1}{2}$ m from the Hellespont. Its site has been identified in modern times with the mound of Hisarlik, and excavation has revealed the remains of nine cities, of which the sixth has been established by modern scholarship as the Troy of Greek legend. This was believed to have been founded by Teneos, and was the scene of the Trojan War, a ten years' war between the Greeks, led by Agamemnon and Menelaus, and the Trojans, whose prince Paris had abducted Helen, the wife of Menelaus. The Greeks finally captured the city by stratagem and sacked it. See HOMER, AGAMEMNON, HELEN etc. A small city on the site in Alexander's day was in ruins by Strabo's time.

Troy Weight Measure of weight. Used for weighing gold, precious stones and other precious materials, it was as follows:

24 grains	make	1 dwt.
20 dwts	"	1 oz
12 ozs	"	1 lb
2 lbs	"	1 qr
100 lbs	"	1 cwt

In addition 4 grains make one carat and 6 carats make 1 dwt.

Troy weight was abolished in 1878 except for the troy ounce which, with its decimals, is still used for weighing precious metals.

Troyes City of France. The most notable feature of the town is its cathedral which was begun in 1208, and which contains some fine stained glass. The manufacture of cotton, woollen and silk hosiery is here carried on. Troyes is the early Roman Augustobona, and derives its name from the early settlers, the Triocassi. It reached its zenith in the Middle Ages, but has since declined very considerably in importance. Pop (1931) 58,804.

Truce Word used for a cessation of war for a definite time. It differs from an armistice, which is a cessation of war preparatory to the negotiation of a peace treaty. When a combatant asks for a truce it is usual to carry a white flag.

Truck Term used for the payment of wages in goods instead of in money. It was at one time very usual, but in Great Britain it has been made illegal by a series of acts passed in 1831 and later. The prohibition now applies to all classes of employees, except domestic servants. The truck acts also forbid employers to deduct money for the sharpening of tools and similar purposes, and limit the power of the employer to levy fines. They also forbid the payment of wages in kind where intoxicating liquor is sold. Offenders against the acts can be fined and it is the duty of the factory inspectors to enforce them.

Truffle Genus of edible fungi of the division *Ascomycetales*. They are underground in habit, being found just below the soil usually beneath a tree or in wooded places. The best known variety (*Taechrum*) is somewhat like a potato in appearance, usually oblong or irregularly globose, with a dark, warty, hard exterior. It is fleshy in consistency with a delicate distinctive flavour. Dogs and pigs are useful in locating them, by means of their scent, as there is no growth above the soil by which to discover them. A French variety (*Tmelausporum*) is especially valued.

Trug Name for a long shallow square-ended basket made of wood. It is light and strong and used by gardeners for carrying small plants, etc.

Trumper Victor Thomas, Australian cricketer. Born in Sydney, Nov. 2, 1877, he was early noticed as a fine batsman. He played for N S Wales, and later was chosen to play in the test teams against England and South Africa, for which he made a series of centuries. He died June 28, 1915.

Trumpet Wind instrument, one of the oldest known. There are three main kinds: the natural trumpet, used mainly by cavalry regiments with its pitch varied by means of crooks; the slide trumpet, in which pitch variation is obtained by tubes sliding upon one another; and the valve trumpet. The trumpet tuned on C produces the following range of tones: C (second space, bass clef), G, C, E, G, Bb, C, D, E, G.

Trumpet Flower Genus of half hardy perennial climbing shrub of the order *Bigoniacae*. They bear brilliant red or orange flowers, and should be grown in a sunny sheltered position. The scientific name is *Ipomoea*.

Trunk Main central part of the human body to which are attached the head and limbs. The upper part is the thorax,

enclosed by the ribs, contains the heart and the lungs, the abdomen below being occupied principally by the alimentary system. Various muscles cover the surface under the skin.

Truro City, borough and market town of Cornwall. It stands on Truro River, 12 m from Falmouth and 279 m from London, on the G W Rly. The chief building is the cathedral. This was built between 1880 and 1910 part of the parish church being incorporated in it. Truro has an agricultural trade. Pop (1931) 11,074.

Truro Town of Nova Scotia, Canada, 61 m from Halifax, situated on the river Salmon, in the midst of a splendid agricultural district. It is the seat of the Nova Scotia College of Agriculture and of the Provincial Normal College. Pop (1931) 7,901.

Truss Apparatus for the prevention or relief of hernia. It is worn over the affected part of the body and its object is to prevent any further protrusion.

In building, the timbers that are fastened together for bluding a beam or supporting a roof are called trusses. The word means a bundle.

Trustee One who holds property on trust for another. A trustee must not make any profit out of his trust, but he can appoint a solicitor to act as his agent. He must observe strictly the terms of the will by which he is appointed. He must make good any losses caused by his negligence, or that of his agent, but by a law passed in 1925 he cannot be punished for a breach of trust if he has acted honestly and reasonably. He cannot, however, get rid of his responsibilities for a breach of trust by retiring.

Trustee securities are those securities in which a trustee can invest the money in his charge. They include all stocks issued by the British Government, or guaranteed by it, and all stock of British corporations and undertakings such as the Metropolitan Water Board. The debentures and preference stocks of British railways are also trustee securities, except that since the Great War, owing to the absence of dividends thereon, some of these have been taken out of the list.

Trusts See COMBINES.

Tsar or Czar. Title borne before 1917 by the rulers of Russia. It is a variant of Caesar. Tsarskoye Selo, meaning Imperial village was the name of a town 15 m from Petrograd. It had two palaces, favourite residences of the tsars, and a cathedral.

Tschaikovsky Piotr Ilyich. Russian composer. Born May 7, 1840, he studied music at St Petersburg under Zarombka and Rubinstein. In 1866 he was appointed Professor of Theory at the Moscow Conservatoire, but ill health forced him to resign in 1877. Thenceforward he devoted his energies to composition. His works comprise ten operas, six symphonies, numerous "tone poems," overtures and concertos, the best known being in the 1812 overture, the *Nutcracker Suite*, the *Queen of Spades*, the *Tempest*, *Francesca da Rimini* and *Eugen Onegin*. Of all Russian music, his is the best known, and enjoys world-wide popularity. He died from cholera in Nov., 1893.

Tsetse Fly Name given to blood sucking dipterous flies of the genus *Glossina*, they are natives of tropical Africa. They inhabit low-lying bush or forest regions near water, and transmit by

their bites the parasites of sleeping sickness, and of nagana, a fatal disease attacking domesticated cattle. The fly somewhat resembles the house fly, with a larger proboscis which projects in front of the head.

Tsingtao Seaport of China. It is on the south side of the Shantung Peninsula in the territory of Kiao Chow which, before the World War, was a German possession. The port was strongly fortified. In Sept., 1914, a Japanese force, aided by a small British contingent, began the siege of the fortress, and this lasted until Nov. 10, when it surrendered. It was kept for a time by Japan, but later was handed back to China. Pop (1931) 390,337.

Tuam Market town of Co. Galway, Irish Free State. It is 20 m from Galway and is served by the G S Rlys. It is best known as an ecclesiastical centre, as it has both Roman Catholic and Protestant cathedrals. There is a fine cross in the market place. Pop (1926) 3293.

Tuber Literally a swelling. In botany it describes a thickened underground stem. Very succulent, this is covered with buds from which new plants or other tubers are produced. Many tubers are highly nutritious, the potato and the artichoke being examples.

Tuberculosis Infectious disease. Its causative micro-organism is the tubercle bacillus which invades the body and attacks the bones, lungs and glands, and other tissues. The disease, which has been one of the greatest scourges to mankind is conveyed chiefly by milk from cows suffering from the disease, and may result in enlargement of the neck glands, disease of the hip-joint, etc.

In phthisis or pulmonary tuberculosis airborne germs enter the lungs, usually attacking young persons, and the disease is accompanied by anaemia, emaciation, loss of energy with a troublesome cough and purulent expectoration. Tuberculosis is no longer regarded as hereditary, and in many cases it yields to special treatment.

In 1911 a committee under Lord Astor investigated the general policy on tuberculosis in Great Britain, and a scheme for combating tuberculosis was inaugurated, consisting of special tuberculosis institutes and residential sanatoria, while the Public Health (Tuberculosis) Act of 1921 made it obligatory on each county to arrange for treatment of all sufferers from tuberculosis, whether insured or not.

Tubingen Town of Württemberg, Germany. On the outskirts of the Black Forest, it is a chemical manufacturing centre. The chief buildings are the old castle of Hohentübingen, on a hill overlooking the town, which contains the university library, an observatory, the town hall, and the Stiftskirche (built 1469-83), which is a Gothic building, containing the tombs of the rulers of Württemberg. Pop 20,276.

At the university, which was founded in 1477, the Tübingen school of theology had its origin, and theology has always been the foremost faculty.

Tudor Surname of an English dynasty. It was founded by a Welshman, Owen Tudor, who married Catherine of France, the widow of Henry V. His eldest son was Edmund, Earl of Richmond, who married Margaret, daughter of John Beaufort, Duke of Somerset, whose son was afterwards Henry

VII Henry VIII, Edward VI, Mary and Elizabeth were Tudor monarchs

In architecture, the Tudor style designates buildings showing traces of Gothic influence, chiefly large country houses or manors, built in the time of the Tudors (1485-1603)

Tugela River of Natal It rises in the Drakensberg Mts and flows past Ladysmith and Colenso into the Indian Ocean, near Port Durnford For part of its course it is the boundary between Natal and Zululand In its early course it is called the Buffalo

During the early part of the South African War, from Dec 1899, to Feb, 1900, there was a good deal of fighting along the Tugela. The Boers were strongly entrenched in the hills to the south of Ladysmith, thus preventing the British from relieving that town. The river was crossed without any great difficulty, but several attempts to dislodge the Boers failed. The final crossing, on Feb 26, however, had a more satisfactory result and Ladysmith was relieved

Tug-of-War Event at sporting and athletic meetings. Two sides, each consisting usually of eight men or boys, pull against each other with a rope. The object of each is to pull the other team over the midway line. The decision usually depends on the best of three tugs

Tuileries Palais des Building in Paris The palace was founded by Catherine de' Medici and Henri IV, and was for long the residence of Louis XIV, in whose reign the gardens were laid out by André LeNôtre in the present style. The Tuileries played an important part in the French Revolution. On June 20, 1792 the palace was invaded by the mob and again on August 20 of the same year, when the Swiss Guards were brutally massacred. This second onslaught resulted in the capture and imprisonment of Louis XVI

Tulip Genus of bulbous plants of the order *Liliaceae*. Natives of Asia and the eastern Mediterranean, they were introduced into England from Holland in the 16th century, and they have been established as garden favourites ever since then. Early flowering varieties single and double, are from 6 to 12 inches in height. The beautiful Darwin Cottage or May Flowering tulips have tall, strong stems up to 2 ft. The gorgeously striped Parrot Tulips in shades of scarlet, yellow, red and green are also a late flowering variety.

Owing to crossing and cultivation, there are now an enormous number of species in a range which includes almost every brilliant and beautiful colour. Tulips can be grown in any garden soil that is not too damp or water logged. The ground should be dug deeply and the bulbs planted in late September, about 6 in deep. A mixture of sand with the soil when planting is advantageous

Tulip Tree (*Liriodendron tulipifera*) timber tree. A North American flowering tree. A species of magnolia it grows to a great height, sometimes reaching 180 ft. It has glossy leaves and large tulip shaped flowers of variegated yellow, orange and green colour

Tullamore Urban district and market town of Offaly, Irish Free State. It is 58 m from Dublin, on the G S Rlys. It is an agricultural centre and has some industries. The Grand Canal passes the town. Pop (1926) 4930

Tullus Hostilius Third legendary king of Rome. His traditional dates are 672-640 B.C. The destruction of Alba Longa is the only event of those ascribed to his reign which may be regarded as an historical fact.

Tulse Hill District of London. It is 6 m to the S W of the city, on the S Rly. It is part of the borough of Lambeth and contains Brockwell Park, a large public pleasure ground.

Tummel River of Perthshire. It flows out of Loch Rannoch and empties itself into the Tay 7 m from Dunkeld. On it are the Falls of Tummel, a famous beauty spot, and for three miles of its course it forms Loch Tummel. The Garry is a tributary.

Tumour Morbid parasitic growth, usually accompanied by a swelling. They are either malignant or non malignant, although some are intermediate. The latter do not ulcerate and if removed when young by an operation do not usually form again. Malignant tumours may grow on any part of the body, some are cancerous and others sarcomatous. They affect the adjacent parts of the body and the blood stream and even if removed tend to grow again.

Tumulus Mound of stone or earth. It indicates an ancient burial place though tumuli are occasionally found simply as memorials. Another name for tumulus is a barrow.

Tun British unit of liquid measure. It consists of 4 hogsheads, or 252 gallons.

Tunbridge Wells Borough, market town and spa of Kent. It is 35 m from London and is served by the S Rly. Its healing waters made it a popular resort in the 17th and 18th centuries. Places of interest are the covered promenade called the Pantiles and the parish church of King Charles. The town is famed for the ware made here. A cricket week is held and there are golf links and other facilities for sport. Tunbridge has been a borough since 1909. Pop (1931) 35,367.

Tundra Cold desert area of northern Russia and Siberia. It lies behind the Arctic coasts of that region and during the long winter is ice and snow covered. In summer only the surface becomes thawed, the temperature being even then only about 48°-50° F. It is a treeless plain, sparsely bearing lichen, mosses and low shrubs. The fauna include carbon and reindeer.

Tungsten Metallic element having the symbol W, and atomic weight 184. It occurs in the minerals scheelite, a tungstate of lime, and wolfram, a mixture of iron and manganese tungstates. It is a dull white, somewhat malleable metal with a very high melting point, and added to steel increases the hardness and cutting properties. Tungsten also is used for electric light and thermionic valve filaments and its compounds for making ceramic glazes, dye mordants, and for fire-proofing.

Tunic Short loose garment. Garments of this kind were worn by the ancients. The Romans wore them under the toga. A similar garment is worn by children to day.

Tunis Seaport and capital of Tunisia. Situated on a small bay of the Gulf of Tunis, it has access to the sea by means of a channel dredged in 1893. It is an ancient city with many fine examples of Arab archi-

teetnre, chieflv mosques It was occupied by the French in 1881 Tunis has many industries and considerable trade The remains of Carthage are only 3 m away Pop (1931) 202,405

Tunisia French protectorate of N Africa It lies along the Mediterranean coast, between Algeria and Tripoli, and has an area of about 48,300 sq m Tunis is the capital Other towns are Bizerta, Sousse and Sfax

The country is mainly argricultural Cereals are grown, also olives, dates and other fruits There is considerable mineral wealth in phosphates, lead, zinc and iron, which is now being developed Other industries include spinning and weaving, leather embroidery and similar crafts It was occupied by the French in 1881 Pop (1931) 2,110,692, of whom 193,293 are Europeans

Tunnel Passage cut through a hill or under a river, usually for traffic purposes The earliest tunnels were made to take railway lines through hills, but later they were much used for relieving the congestion of the traffic in large cities Tunnels, or tubes for railway lines, are a feature of the travel facilities in London and New York There are also tunnels beneath the Thames and the Hudson, as well as the Mersey and other rivers

Tunnels for drainage purposes were made by the ancients For transport purposes the first in England was made on the Bridgwater Canal about 1760 The longest is probably the one under the St Gothard Pass from Switzerland to Italy Suggested tunnels are one under the English Channel from Dover to Calais, and one under the Thames from Gravesend to Tilbury See CHANNEL TUNNEL

Tunney James Joseph, more usually Gene American boxer Born in Greenwich Village, New York, in 1898, he served for a time in the marines, but later took up boxing He defeated Carpenter in 1924, and Jack Dempsey in 1926, the latter match securing for him the world's title In 1928 he scored a further success against Tom Heenoy, after which he retired into private life

Tunny Large marine fish of the family Scombridae related to the mackerel It is found abundantly in the Mediterranean and also off the southern and eastern British coasts, having a fairly wide distribution through the warm seas It may attain a length of 8 to 10 ft, and a weight of 1000 lb, and is a useful food fish Attempts have been made to encourage its use in Britain

Tunstall Market town of Staffordshire, since 1910 part of Stoke-on-Trent It lies to the north of Stoke, on the L.M.S. Rly, 151 m from London See STROKE-ON-TRENT

Tupper Sir Charles Canadian statesman He was born in Amherst, Nova Scotia, July 21, 1821 He studied medicine in Edinburgh, and was president of the Canadian Medical Association, 1867-1870 Beginning his political career in his native Province, he became its Prime Minister in 1864 After Confederation in 1867, he entered Dominion politics, holding various portfolios From May, 1884, to Jan, 1896, he was High Commissioner for Canada in London, and from April 27, 1896, he was Prime Minister until the defeat of the Conservatives, June 23 In 1909 he settled in England, and died Oct. 30, 1915

Tupper Martin Farquhar English author He was born in London, July 17,

1810, and educated at Charterhouse and Oxford In 1835 he was called to the Bar, but after pleviling only one case he forsook law for authorship In all he wrote some forty works, one alone of which, *Proverbial Philosophy*, brought him both fame and wealth He made two lecture tours in the U.S.A. He died Nov 29 1889

Turban Oriental headdress It consists of a scarf of silk or muslin material, arranged in folds over a fez or cap which forms the foundation It is the headdress of some regiments in the Indian army Caps in this style were worn by ladies in the early 19th century In *Cranford* Miss Mattie refers to one worn by Queen Adelaide

Turbine Rotary motor employing water or steam to rotate it directly in its bearings In its simplest form it consists of a wheel with vanes moved by the pressure of water, but the name also denotes a similar device where steam is the moving power Hydraulic turbines are employed in utilising water power for conversion into mechanical or electrical energy, as in the Pelton wheel where a water jet acts upon the buckets on the rim or in the Francis turbine where a large body of water acts upon curved vanes Steam turbines of several types are used in electrical generating stations, and are applied also to the propulsion of ships

Turbot Flat fish (*Rhombus*) Of the *Pleuronectidae* family, it is common in northern British waters The broad body is roughly diamond shaped, greyish brown, with darker spots It is a popular food fish

Turenne Henri de la Tour d'Auvergne, Vicomte de French general He was born at Sedan, Sept 11, 1611 In 1641 Richelieu entrusted him with the supreme command of the French troops engaged in the Thirty Years' War, during which, with Condé, he gained several notable victories During the civil wars of the Fronde, Turenne fought against his former friend Condé He conquered parts of the Spanish Netherlands, ravaged Alsace and the Palatinate, advanced into Germany, but was killed at Salzbach, July 27, 1675

Turf Top layer of grassland It has become a colloquial term for horse-racing The Turf Club, 85 Piccadilly, is a centre for racing men and sportsmen generally

Turgenev Ivan Sergeevitch Russian author He was born Nov 9, 1818, of a noble family, and educated in Moscow, St Petersburg and Berlin He was the first to make western Europe acquainted with Russian life, his character sketches being unsurpassed His *Annals of a Sportsman* (1846) brought him fame, but his novel, *Fathers and Children*, is perhaps his most distinguished work His somewhat outspoken opinions earned him a brief imprisonment in 1852, and he lived thereafter chiefly in Baden-Baden and Paris, where he died Sept 3, 1883

Turgot Anne Robert Jacques, baron de L'Aulne French statesman One of the few honest statesmen of his day, he was born in Paris, May 10, 1727, and educated at the Sorbonne He was Intendant of Limoges from 1761-1774, and did much to improve the condition of the peasantry He was appointed Minister of Finance by Louis XVI in 1774, and endeavoured to reform the whole system of taxation He thereby made bitter enemies of the privileged classes, and was forced to resign after 20 months, when he retired to private life He died March 8, 1781.

Turin City of Piedmont, Italy. It was, until 1860, capital of the kingdom of Sardinia, and from 1861-65 the capital of Italy. Of Roman origin, it stands on the Po, about 780 ft above sea level, 80 m NW of Genoa. Among the notable buildings are the cathedral of S John the Baptist, the church of San Filippo, the Palazzo Madama, the royal palace with a valuable library, and other palaces with fine pillared courtyards. In the Castello del Valentino are a polytechnic school and scientific museums. There is a flourishing university, founded in 1400. The Academy of Sciences is also a museum. The Mole Antonelliana, also used as a museum, is the highest brick building in Europe (610 ft). On the Hill of Superga is a basilica, used as the burial place of the House of Savoy. There are several royal castles in the vicinity.

Turin is an important industrial city, the centre of Italy's motor industry. Other industries include aeroplanes, metallurgy, machinery, chemicals, weaving, perfumes, glass, chocolate, liqueurs and vermouth. Hydro-electric power is obtained from the Alpine valleys. The city has a broadcasting station (273.7 M, 7 kW). Pop. (1931) 596,566.

Turkey Large game bird (*Meleagris*). A native of N America, there are two species. The common domesticated birds are derived from *M. Gallopavo*, a number of varieties having been evolved by breeders. The male bird may weigh up to 34 lb., with a heavy body, metallic bronze plumage, marked with black and fan like expandible tail. The latter has a white margin, and the tail coverts also are tipped with white. The neck and head are reddish or bluish, nearly bare, wrinkled and tubercled, and on the head is a pendent dilatable appendage. On the chest is a bunch of black bristles. The bird is extensively bred for the table.

Turkey Republican country. Lying partly in Asia and partly in Europe, it has an area estimated at 294,416 sq m, of which 9257 sq m are in Europe, and a population of 13,860,276. This figure was arrived at in 1927 by the first census ever taken in Turkey. The capital is Ankara, but Istanbul is the largest city. The next largest towns are Izmir, Smyrna, Adana, Brussa and Konia.

Turkey is rich in minerals but up to the present these have been little worked. They include chrome ore, zinc, silver, manganese, copper and antimony. Agriculture is backward, but is being improved and extended under the new régime. Products include fruits and spices, cereals, oil, opium, furs and hides, etc. Wool and mohair are also objects of commerce.

Carpet weaving is the most important industry. Others are being gradually built up and machinery is being imported for that purpose. Among these, sugar factories may be mentioned. The Ford Company has an assembly works at Tophane.

HISTORY The Turks enter European history when after a westward movement of the Ottoman tribe, Amurath I established his capital at Adrianople and defeated the Serbians at Kosovo (1389). His son, Bajazet I, annihilated the combined hosts of Hungary and Poland at Nicopolis (1396) and Ottoman aggression continued till it reached its limit under Solymán the Magnificent (1520-66) who humiliated Vienna and marched against Germany. By the Battle of Lepanto (1571) Spain taught Europe that the Turk was not invincible and the Peace of Karlowitz (1699) was humiliating to

the Porte. In 1730 began the long series of Russo-Turkish wars in which Russia appearing as the champion of the Christians under Turkish rule, pushed south the northern Turkish frontier. The Crimean War saw England and France united in protecting the Sultan's Empire against Nicholas I. In 1875 risings among the subject peoples of the Ottoman Empire were mercilessly suppressed and Europe rang with reports of atrocities. Again in the war of 1877 and the resultant Berlin Treaty, it was foreign interference which saved the "sick man of Europe" from Russian domination. The Young Turk Reform party was ruthlessly suppressed in 1901, but drove Abdul Hamid from his throne in 1908. In the Great War the Turks stayed the allied attempts to force the Dardanelles (1915). A Nationalist revolution (1919) resulted in the establishment of a separate government at Angora, and a war with Greece ended in Turkey's favour (1922). On Nov 1, 1922, the sultanate was abolished and on Oct 29, 1923, Turkey was declared a republic with Mustapha Kemal as President. He was re-elected in 1927, and in 1931. Government is by a Grand Assembly, elected for four years.

Under the guidance of Kemal, Turkey has been modernised and has made great progress. Industry and agriculture have been advanced, the position of women has been raised to European status, and western methods are being adopted in government, education and industry.

Turkistan Area of central Asia. Western Turkistan was formerly known as Russian Turkistan and includes the northernmost province of Afghanistan. Eastern Turkistan is Chinese Turkistan, officially included in the province of Sin-kiang. The Pamir district occupies a large part of the area, and much is desert. The population is almost entirely nomadic, trading in skins, furs and similar articles of commerce. Some of the best known of the tribes are Uzbeks, Kirghiz and Turcomans. Some cereal crops are grown here and the mulberry tree is extensively cultivated. There is also considerable trade in horses. The term Turkistan is used so vaguely that it is difficult to estimate either area or population.

Turks Islands Group of islands in the West Indies. They are a British possession and are ruled from Jamaica. Grand Turk is the largest.

Turnberry Pleasure resort of Ayrshire. It is on the coast 5 m from Girvan and is a noted golfing centre. Here are the ruins of a castle which once belonged to Robert Bruce. On the L.M.S. Rly., 418 m from London.

Turnbuckle Kind of coupling. It is so arranged that it regulates the length or tension of the connected parts. It is chiefly used for adding tension to bars, or steel ropes.

Turner Artisan who practices the art of turning. This is a process by which pieces of metal or wood are shaped by holding a tool against the piece while revolving in a lathe. It is used for the legs of chairs and other pieces of furniture.

The Turners' Company is one of the London ivory companies.

Turner Joseph Mallord William. English landscape painter. Born in London April 23, 1775, he learnt much about painting, but little about anything else, his

Education being considerably neglected. He had the good fortune to know Sir Joshua Reynolds, and studied under his roof. He first exhibited at 15, at 21 his reputation was established and at 28 he was elected R.A. He was an ascetic by nature, never married, and shunned all society. Turner painted in two distinct styles. His early pictures are sober in colouring, browns, blue and greys predominating. The works of his middle and late period are marked by the splendour of colour and brilliance of light of pictures such as "The Fighting Temeraire" and "The Sun of Venice Going to Sea". Much of his most beautiful work is to be found in his water colours. His industry must have been prodigious, for "Turners" are found all over the world. He died in London, Dec. 19, 1851, having bequeathed a large collection of his works to the nation.

Turnham Green District of London. To the west of the city, it is between Hammersmith and Chiswick on the District Ry. The green still remains an open space, but around the land has been built over.

Turnip (*Brassica campestris*) Edible tuber of the natural order *Cruciferae*. A native of Europe and Asia, it grows freely in Great Britain where it is cultivated as a food plant both for human beings and for cattle. It grows up to a height of 2 ft., has bristly leaves and yellow flowers. There are two main kinds. The white turnip is grown for the table, both leaves and root being used. The gold turnip, or swede is grown as a cattle food, especially suitable for winter feeding. In Great Britain turnips are raised from seed sown in March or April, or in June or July for an autumn crop. The drills should be 12 in. apart and they require only a slight covering of soil. The plants should be thinned out to about 6 to 8 in. apart. The plant is attacked by the turnip flea which can be killed by repeated dustings with soot. They are also used to flavour soup. In 1931 the turnip crop of Great Britain amounted to 16,262,000.

Turnpike Gate across a road. They were at one time fairly common in England, their object being to enable the tolls to be collected from vehicles. When the toll was paid the gate was turned. Pike is an old word meaning to go or turn quickly.

The turnstile is a variant of the turnpike. It is used to arrest the entrance of visitors to places of amusement and the like. As each entrant pays the required fee the turnstile, which has four arms, moves round and allows him to pass in. The modern turnstile records automatically the number of people who pass through it.

Turnstone (*Streptopelia interpres*) Small shore bird. Allied to the lapwing, it is about 9 in. in length. The plumage is black and white, with reddish brown shading on the back, white tips to the tail feathers, under plumage of white, and legs orange yellow. It frequents the shores of Great Britain from Aug. to March or April. Its name is derived from its method of turning over stones and seaweed on the water's edge in search of crustacea, etc., on which it feeds.

Turntable Device for moving railway engines. It consists of a platform which has on it one or more lines of rail and which rotates in a horizontal plane. It can thus be turned round so that the lines can

connect with the other lines running to it, and the engine can be transferred from one set of rails to another.

Turpentine Liquid used for cleaning and industrial purposes. It is obtained by distilling a resin which exudes from pine and other coniferous trees. Oil of turpentine is used in making varnishes and paints. It is also used in medicine to some extent.

Turpin Richard English highwayman. Better known as "Dick" Turpin, he was born in Essex in Sept. 1705. He began life as a butcher's apprentice, but, wishing for a more adventurous career, took to stealing cattle and horses, to smuggling and house-breaking, and finally became a notorious highwayman. He was hanged for murder in York, April 10, 1739.

Turquoise Mineral used as a gem stone. It is a hydrated aluminium phosphate, containing a little copper. It is found in the rocks of Persia, Arabia and the United States. The best stones come from Persia. In colour the turquoise varies from blue to green, the best being blue. It is valued because it takes a bright polish. The name is a variant of Turkey, because the early stones came from Persia by way of Turkey.

Turret Small tower. They are seen on mediaeval castles where they were part of the scheme of defence. To day they are introduced into buildings for ornamental purposes. Another kind of turret is the revolving structure which contains the big guns on a battleship. Usually there are two guns in each turret.

Turriff Burgh of Aberdeenshire. It is 38 m. north of Aberdeen and is served by the L.N.E. Ry. Pop. (1931) 2298.

Turtle Aquatic reptile of the tortoise (*Testudinidae*) family. The limbs are modified into paddles adapted to the habitat. The turtles resort to the sandy shores to lay their eggs. The hawksbill turtle (*Thelone imbricata*) yields tortoiseshell. The edible green turtle (*C. mydas*) is used for making turtle soup. See TERRAPIN.

Turtle Dove Genus of pigeons. A native of N. Africa and parts of Asia, the common turtle dove (*Streptopelia turtur*) is a summer migrant to Britain, nesting in coppices and woods, or even tall hedges. It is a pest of grain crops. The plumage is ashen blue on head, wings, rump and back, wing coverts rufous, brownish tail, margined with white, under parts white to buff, there is a white and black patch on each side of the neck. The length is 11 to 12 in.

Turton Urban district of Lancashire. It is 4 m. from Bolton and 202 from London by the L.M.S. Ry. A house called Turton Tower is of interest. It was built in the 12th century, and has been restored. The town is a centre of the cotton industry. Pop. (1931) 11,847.

Tuscany Division of Italy. Situated to the west of the centre of the peninsula, it consists of nine provinces, having a population of (1931) 2,892,364, and an area of 8,853 sq. m. The valley of the Arno is the most fertile region, the rest being hilly, and in some places thickly forested. The purity of the language of Tuscany has caused its adoption as the literary language of Italy. Here are the great art centres of Florence, the capital, Pisa and Siena.

From 1590 1737 Tuscany was ruled by the Medici (q v) and on their extinction was given to the dukes of Lorraine of whom Leopold I (later the emperor Leopold II) carried out extensive reforms. During the French revolutionary wars Tuscany was overrun, the grand duke Ferdinand III being forced to fly, and in 1801, by the peace of Lunéville, Tuscany was given to Spain only to be ceded to Napoleon in 1807. In 1814, however, Ferdinand returned. Under his son, Leopold II, a constitution was granted in 1848 but revolution broke out, and from 1849 1855 Leopold ruled with the help of Austrian troops. In 1859 Leopold was driven out by the Florentines and in 1860 Tuscany voted for annexation to Sardinia, becoming part of the Italian kingdom in 1861.

Tusculum The modern Frascati. It was situated in Latium, on a spur of the Alban hills, about 12 m south-east of Rome. When Octavius Mamilius, Tarquin's son in law, was expelled from Rome, he fled to Tusculum, whence he led the Latin allies of Lars Porsena against the Romans.

Tussaud Madame Marie Effigist Born in Berne in 1760, she learned the art of wax modelling in Paris. She had opportunities for becoming acquainted with many leading persons through the lessons in modelling that she gave to Elizabeth a sister of Louis XVI. In 1802 she established herself in London, gradually building up the famous waxwork show in Baker Street. Her portraits were always lifelike, and "Madame Tussaud's" is one of the sights of London. She died April 16 1850 and the show is now owned by her descendants. The building was destroyed by fire in 1925, and was then re-erected upon a larger scale than ever.

Tutankhamen Egyptian king of the 18th dynasty. He succeeded, after a short interval, his more famous father in law Akhenaton whom he had assisted in his religious reforms. His reign (c 1350 B C) appears to have lasted only nine years. In Nov., 1922, his tomb-chamber was found intact in the Valley of the Kings by excavators working under the direction of the late Lord Carnarvon. This discovery proved to be the most remarkable ever made in the history of Egyptological research, for the outer and inner chambers of the tomb contained treasures in unparalleled profusion, including the royal sarcophagus, two splendid canopies, a magnificent chair of state, the paddles of the royal barge, amulets, scarabs, etc.

Tutbury Town of Staffordshire. It is 4½ m from Burton on Trent, and 140 from London by the LMS Ry. Standing on the Dove, it has an agricultural trade. It is known for its castle, now a ruin, in which Mary Queen of Scots was imprisoned. The parish church is a fine building the Norman doorway being specially notable. The castle and the surrounding land is the property of the Dnchy of Lancaster. Pop 2062.

Twain Mark. Pen name of Samuel Langhorne Clemens. American humorist and author. He was born at Florida, Miss., Nov 30 1830. In turns printer, river pilot, miner and journalist he gained fame overnight with *The Celebrated Jumping Frog of Calaveras County*, the result being that he was commissioned in 1867 by a San Francisco paper to write letters descriptive of a European trip. Those were published under the title of *The Innocents Abroad*, and had a prodigious sale, as did also *A Tramp Abroad*, published 1880.

Among many other works were *The Prince and the Pauper*, *Tom Sawyer*, *Huckleberry Finn*. He died April 21, 1910.

Tweed River of Great Britain. It rises in the county of Peebles and flows through the county of Selkirk into Roxburghshire. At Kelso it becomes the boundary between England and Scotland, which it remains until just before it enters the sea at Tweedmouth. It is 98 m long and its tributaries include the Ettrick, Till and Teviot. It is noted for its fishing and is famous in stories and legends of the border country.

Tweedmouth Town and seaport of Northumberland. It stands at the north of the Tweed, opposite Berwick with which it is linked by a long stone bridge of 28 arches. It is 32½ m from London and has a station on the LNE Ry. Shipping and fishing are the chief industries. Pop 5000.

The title of Baron Tweedmouth has been borne by the family of Marjoribanks since 1881. Edward Marjoribanks, the 2nd baron was a Liberal MP from 1880 to 1894 when he succeeded his father in the peerage. Having been chief whip of the Liberal party when in opposition, he was Parliamentary Secretary of the Treasury, 1892-94, and Lord Privy Seal, 1894-95. In 1905 he was made First Lord of the Admiralty, an office he left in 1908 in consequence of a letter he wrote to the German Emperor. He was then made Lord President of the Council and he died Sept. 19, 1909. His son, Dudley Churchill Marjoribanks, who became the 3rd baron, is known as a sportsman.

Twelfth Day Twelfth day after Christmas, therefore Jan 6. On it the feast of the Epiphany is held to commemorate the bringing of gifts to Jesus Christ by the wise men on this day. In the 16th and 17th centuries Twelfth Night was a time of rejoicing, festivities of all kinds being held. Shakespeare's comedy, *Twelfth Night*, or *What You Will* was probably written to be first performed on this night.

Twelve Tables The Code of the Roman law. One of the earliest written codes, it was drawn up in 449 B C by the *decemviri*, a body of ten chosen for the purpose, after a long struggle between patricians and plebeians. The laws were the written expression of old Roman customs, and their appearance marked a definite step in the progress towards liberty of the Roman people, who had hitherto been at the mercy of patrician magistrates.

Twickenham Borough of Middlesex. It is 11 m from London on the S Ry from Waterloo. York House, once a royal residence, has been bought for the council offices, the grounds are open to the public as are those of Marble Hill, which stretches down to the Thames. In the river here is Eel Pie Island and in the borough is the football ground of the Rugby Union where the international and other important matches are played. Alexander Pope, who is buried in the church, had his famous villa here. A new one occupies the site. Twickenham was made a borough in 1926. Pop (1931) 39,009.

Twilight Sleep Obstetric method of insensibility to pain and partial unconsciousness by the use of the drug scopolamine morphine. By this means it is claimed that the mental and physical pains of childbirth may be removed or prevented without any injurious after-effects.

Two Step American dance Popular in Europe at the beginning of the 20th century. It soon gave place to the one step. The step is similar to the polka, and is included in various other dances

Two Thousand Guineas

In England one of the five great horse races. It is run at Newmarket over the Rowley mile on the Wednesday of the first spring meeting. It is for colts and fillies which are three years old. It was first run in 1852.

Twyford Village of Berkshire. It is 31 m from London by the G.W. Rly., on which it is a junction. Pop. 1269. There is a village of the same name near Winchester, which is 69 m from London by the S. Rly.

Tyburn Name of a small tributary of the Thames. It gave its name to the gallows formerly standing at the west end of Oxford St., London, not far from the modern Marble Arch. The last execution there took place in 1783. Among those who met their fate there were Perkin Warbeck (1419), the Jesuit, Edmund Campion (1588), Jack Sheppard (1724), and Earl Ferrers (1760). The skeletons of Cromwell and his associates were hung in 1661. The stream flowed from Hampstead heights in a southerly direction to the present site of Buckingham Palace.

Tyldesley Urban district of Lancashire. A centre of the cotton industry. It is 5 m from Bolton, and 195 m from London by the L.M.S. Rly. There are coal mines in the neighbourhood. The urban district includes Shakerley. Pop. (1931) 14,848.

Tyler Wat, leader of the peasants' revolt in 1381. The story goes that he killed a poll-tax collector, then gathered a following in Kent and Essex, and marched to London, doing much damage. On their arrival at Smithfield they were met by Richard II and the Lord Mayor, the latter killing Tyler during an altercation. This revolt was but one of many risings in different parts of the kingdom, the chief cause being unjust taxation.

Tympanum An ancient musical instrument. Called "Tympanon" by the Romans, this name appeared to include the tambourine and the kettledrums, the instrument was used at Bacchanalian feasts.

In architecture, the tympanum is the triangular space contained between the horizontal cornice and the two sloping cornices.

Tyndale William English translator of the Pentateuch and the New Testament. He was born in Gloucestershire, about 1492, and educated at Oxford. He then went to Cambridge, probably attracted by its reputation as a centre of Greek study which Erasmus had helped to establish. In 1525 we find him in Cologne, where he began to print the New Testament in English. It was published in Worms the same year, and was followed by several other editions. He also translated the Pentateuch and several other portions of the Bible. He suffered martyrdom, Oct. 6, 1536.

Tyndall John British scientist. He was born in Co. Carlow, Ireland, Aug. 21, 1820. He studied at Marburg University, and held many important posts, such as Professor of Natural Philosophy at the Royal Institution (where he was a colleague of Faraday), scientific adviser to Trinity House

and the Board of Trade, and superintendent of the Royal Institution. He was eminent as a lucid exponent of last century's physical science, and wrote a number of books on the subject, some of the most important being *Heat as a Mode of Motion*, *Flouring Matter in the Air*, *Lectures on Light*. He died Dec. 4, 1893.

Tyne River of England. It is formed by the union of two streams, the North Tyne and the South Tyne, which unite at Hexham. The former rises in the Cheviot Hills and the latter near Cross-fell and before they join each has travelled about 33 m. The Tyne proper is 30 m long and is a great industrial river. It passes by Jarrow, Wallsend, South Shields, Gateshead and Newcastle and falls into the North Sea at Tynemouth. On its banks are great shipping yards and engineering works.

Tynemouth County, borough and seaport of Northumberland. It stands at the mouth of the Tyne, 6 m from Newcastle, and is reached by the L.N.E. Rly. It includes North Shields and Cullercoats which is a pleasure resort. The chief industry is shipping for which there are large docks. The borough, which dates from 1549, sends one member to Parliament. Pop. (1931) 64,913.

Tynwald Hill in the Isle of Man. It is 9 m from Douglas on the way to Peel and is the place where the laws of the island after having been passed are read on July 5. A fair is held on that day. In 1928 the hill was presented by the king to the island. Near is the Manx war memorial. The two houses of the parliament of the island are called the Tynwald Court, when they meet together for public business.

Typewriter Machine for producing characters in printing type on paper without the use of the pen. It appears to have been invented early in the 18th century, but it was not put to practical use until well into the 19th. There are various kinds of machines on the market, and all contain mechanism for reproducing capital and small letters, figures, etc.

Typhoid Infectious disease. Also known as enteric fever, it is due to the presence in the alimentary canal of an organism, the *bacillus typhosus*. Infection may be conveyed by a contaminated water supply, milk, food, or defective sanitary arrangements. The disease incubates from 8 to 14 days, followed by diarrhoea, rapid pulse, bodily prostration and not infrequently purplish spots which appear on the abdomen. Owing to the high fever, the urine becomes deficient and may cause uraemic poisoning, coma and death. Perforation of the intestine and bleeding into the bowel are the two most dangerous complications of this fever.

Typhoon Cyclonic hurricane. The term is applied to a violent type of hurricane occurring in the China Sea from July to Nov., and having its origin in the southern waters under calm conditions and extreme heat. Apart from the danger to shipping, the immense waves associated with the typhoon often cause destruction on the coasts.

Typhus Fever Infectious disease. Also known as gaol fever or spotted fever, it was once prevalent as a regularly recurring disease in Western Europe. It is known now that the causative organism is conveyed by lice, hence the disappearance of the disease where bodily cleanliness is observed. After an incubation of

12 days shivering, a rapidly rising temperature and severe vomiting sets in, followed by a skin eruption. A feeble heart action may cause coma and death in severe cases.

Typography Art of printing, whether from movable type or from type setting machines, such as are used in modern printing. The letter or figure, word or line, which is used in the printing process, is called type. In olden times it was of wood but to day it is usually of type metal, a mixture of lead and antimony. It is occasionally set or put in position by hand, but usually by machines.

There are several kinds and sizes of type, each with a distinctive name. The sizes are diamond, pearl, ruby, nonpareil, minion, brevier, bourgeois, long primer, small pica, pica, great primer, and others still larger. Type is also reckoned in points, an American device. Brevier, for instance, is 8 point, and great primer is 18. A higher point means a larger type.

Tyrant Originally, a despotic ruler. The term was applied in particular to rulers over the Greek city states in the 7th and 6th centuries B.C., such as Hiero of Syracuse, Peisistratus at Athens, etc. With the passing of time the word received its modern meaning, although originally it held no derogatory sense.

Tyrconnel Earl of. Born in Ireland about 1625. Richard Talbot came early to London, gained the royal favour, and soon showed himself to be devoid of any scruple. James II created him Earl of Tyrconnel and Lord Deputy of Ireland, with command of the troops there. At the revolution he carried favour with William III, but after the Battle of the Boyne he fled to France. He died soon after his return to Ireland in 1691.

Tyre Phoenician seaport. It was founded in the 15th century B.C., and became the great mart of the Mediterranean world. Originally a colony of Sidon, it was divided between the mainland and the island, which were joined by a causeway. As an island fortress, Tyre withstood many sieges, but was captured by Alexander the Great in 332 B.C., taken by the Muslims, captured by the Crusaders and finally destroyed by the Muslims after the fall of Acre. In Roman times, Tyre was famous for its silk and purple dye. To-day it is in the state of Great Lebanon, French mandated territory and is known as es-Sur. Its trade is insignificant. Pop. 57,000.

Tyre Outer part of a wheel. On many farm and commercial vehicles metal

hoops are used. For bicycles and cars rubber or pneumatic tyres are employed, the latter more generally. An inner tube of rubber is made separable from the outer cover. Bicycle tyres are repaired by a solution of rubber in CS, motor-car tyres by vulcanising. Vast improvements have taken place in their manufacture during recent years.

Tyrone County of Northern Ireland. It is situated south of Londonderry, where the river Fovle forms the boundary, other rivers including the Blackwater and the Derg. With the exception of the eastern plain the county is hilly, the chief heights being the Sperrin range. Cattle are raised, and oats, flax, and potatoes are the chief crops. The county town is Omagh. Clogher, once important ecclesiastically, has a cathedral dating from the 18th century. The area is 1218 sq. m. Pop. (1926) 132,792.

Tyrrell Baron. English diplomat. Born Aug. 17 1866, and educated at Oxford, William George Tyrrell has had a distinguished diplomatic career. He entered the Foreign Office in 1889, where from 1896-1903 he was private secretary to the Under-Secretary, secretary to the Imperial Defence Committee, 1903-4, acting secretary to the Embassy in Rome 1904. From 1907-1925 he occupied other important posts at the Foreign Office. He was Permanent Under-Secretary from 1925-28, and British Ambassador in Paris, 1928-34. In 1934 he received the Grand Cordon Legion of Honour.

Tyrrell Father George. Irish divine. He was born in Dublin of a Protestant family, Feb. 6, 1861. Entering the Roman Catholic Church, he was ordained priest in 1891. His advocacy of modernist views brought about his dismissal from the Society of Jesus, followed by his excommunication in 1907. For the last twelve years of his life he was the close friend of Baron von Hügel. He died July 15, 1909, having received absolution on his death-bed.

Tyrwhitt Admiral Sir Reginald. British sailor. Born May 10, 1870, he became Lieutenant on H.M.S. *Cleopatra* in 1894. In the Great War he commanded destroyer flotillas near Heligoland, and was in action off the Dogger Bank. In 1921-22 he commanded the third light cruiser squadron in the Mediterranean, was commanding officer of the Coast of Scotland, 1923-25, and commander-in-chief of the China station, 1927-29. He was promoted to the rank of admiral in 1929, and has been commander in chief at the Nore since 1930. He was created baronet in 1919 and made G.C.B. in 1929.

U

-BOAT Abbreviation for *Unterseeboot*, the German name for a submarine. As used in the Great War they were marked U, followed by a number. See **SUBMARINE**.

Uckfield Market town of Sussex. Situated on the Sussex Ouse, it is 5 m from Lewes and 53 from London by the S. Ry. It is a farming centre and had an agricultural college. Pop (1931) 3557.

Uganda British protectorate of E Central Africa. It has an area of 91,201 sq. m. and a population of 3,553,534 (1931). Administration is by a governor, assisted by executive and legislative councils, but the native states are encouraged to practise a degree of home rule. Kampala is the capital, with the administrative headquarters at Entebbe. The country lies round the great lakes Victoria and Albert Nyanza, Rudolf and others. There is much big game in the swampy areas and tropical forests. Ivory is exported also and skins, chillies, coffee and cotton. The climate is not very healthy for Europeans, and sleeping sickness is a scourge both to them and to the native races. Since the discovery of the tsetse fly as carrier of the parasite responsible for the disease, it has been possible to control this to some extent. The European population has coffee and rubber plantations.

Uhlán Polish word for a cavalry soldier. In the German and Austrian armies, before the Great War, there were regiments of Uhlans, corresponding to the lancer regiments in the British service.

Uist Two islands of the Outer Hebrides, belonging to the county of Inverness. They are mountainous. On North Uist the chief place is Lochmaddy at the head of the harbour and on South Uist it is Lochboisdale. The inhabitants are engaged in cattle and sheep rearing and fishing. North Uist is 18 m long and South Uist 22 m.

Uitlander Dutch word for a foreigner or outlander. It is chiefly used in S. Africa, when, in the Transvaal and Orange Free State before 1899, the British were regarded as *uitlanders*.

Ukraine Soviet republic of S.W. Russia. It comprises the former governments of Chernigov, Kharkov, Kiev, Poltava, Ekaterinoslav, Kherson, Podolia and Volhynia and joined the Soviet Union in 1920. The chief rivers are the Dnieper, Dniester, Bug and Donetz, and the main feature of the country is its steppe land. Agriculture is the most important industry, the Ukraine being the principal cereal-growing district of Russia. Principal crops are wheat and beet-sugar are produced, stock raising is carried on on a large scale, and flour milling, sugar refining, oil pressing, leather and textiles are important industries. The minerals include salt, coal, iron, manganese and mercury, and the metallurgical, chemical and other industries contribute a large proportion of Russia's output. There is considerable hydro-electric development on the rivers. The capital is Kharkov and Odessa is the principal port. Other large centres are Kiev, Dnepropetrovsk and Ekaterinoslav. Area 166,368 sq. m. Pop (1931) 31,403,200.

Ukulele Small musical instrument. It possesses four strings and is played by plucking them much as a banjo. The instrument belongs to the Hawaiian Islands from where it was introduced into Great Britain and the United States.

Ulcer Open discharging sore. Some ulcers are of a chronic nature and may arise from local infection or inflammation of the tissues, and some are of a tubercular or syphilitic nature. Bed sores are a form of ulcer arising from continuous friction through being always in one position during illness. Suitable medical treatment is essential in all cases, and in the case of ulceration of the limbs rest is imperative.

Ulex Botanical name for gorse or furze, shrubs of the bean family.

Ullswater Lake of England. It is on the borders of Cumberland and Westmorland, between Keswick and Penrith, and is perhaps the most beautiful of the English lakes. It is 7½ m long. Steamers traverse it, touching at Pooley Bridge, Patterdale and Howtown.

Ullswater Viscount. English statesman. James William Lowther was born April 1, 1855 and educated at Eton, King's College, London and Trinity College, Cambridge. He was called to the bar in 1879, entered Parliament as member for Rutland in 1883, represented Penrith, 1886-1921, and was Speaker of the House of Commons from 1905 to 1921, being created Viscount on his retirement. Since then he has served as chairman of many royal commissions, such as those on London government, political honours and electoral reform. He is a trustee of the British Museum.

Ulm City of Germany, in the republic of Württemberg. It is situated on the Danube, at the point where the Blau and the Iller join the main stream, and is 58 m. S.E. of Stuttgart. Across the Danube is New Ulm, in Bavaria. The vast cathedral, with a conspicuously lofty spire, dates from the 14th century. There is a 16th century town hall. Ulm has brass foundries, breweries and other manufacturing establishments. It was originally a free imperial city. Pop 59,000.

Ulster One of the four provinces of Ireland. It is in the north of the country, and consists of the counties of Donegal, Londonderry, Antrim, Tyrone, Cavan, Fermanagh, Monaghan, Armagh and Down. The area is 8611 sq. m. and Belfast is the provincial capital. The six counties in the north-east form the state of Northern Ireland, the other three—Cavan, Donegal and Monaghan—are in the Irish Free State.

Ultimatum Final demand of any kind. It is used most generally for the final demand that precedes a declaration of war. Thus in Aug. 1914, the British Government issued an ultimatum requesting Germany to respect the neutrality of Belgium.

Ultramontane (From the Latin *ultra*, beyond and *mons*, a mountain) Ultramontanists are those who maintain the supreme authority of the Papacy over the Catholic Church, in all countries, in matters which infringe upon temporal

airs, e.g. appointment to benefices and revenues, as well as in the spiritual sphere, e matters of faith and morals

Ultra-Violet Rays Radiations of a wave length next to and shorter than the visible rays. They are present in sunlight, and are a source of the beneficial properties of which advantage is taken in sun bathing. Generated artificially they are used for treatment of rickets, their beneficial action being due to the formation in the skin of the vitamin which is necessary for the proper formation of bone
See SUN BATHING

Ulundi Village of Zululand, until 1883 the residence of the Zulu kings. On July 4 1879, a Zulu army was annihilated by Lord Chelmsford at Ulundi, and after the battle the royal kraal was burned. In 1883 Cetewayo was re-established by the British at Ulundi, but he was driven out by his rival, Ushibepu

Ulverston Market town, seaport and urban district of Lancashire. It is on Morecambe Bay 26 m from Lancaster, on the LMS Rly. The industries are coal mining and iron founding. Pop (1931) 9235

Ulysses (Odysseus) One of the heroes of the Trojan war. Homer's *Odyssey* describes his ten years' adventures on his way home after the destruction of Troy. He blinded the one-eyed cyclops Polyphemos, visited the sorceress Circe and the nymph Calypso, sailed safely between Scylla and Charybdis, resisted the Sirens, and after other adventures reached home

Umber Brown earth containing iron and manganese oxides. It is used as a pigment by artists. When calcined or burnt it gives a warmer tint than the raw umber

Umbra Region of complete shadow caused when an opaque body obstructs light. In astronomy it is used for the dark cone that is projected from a planet on one of its satellites on the side away from the sun. The outer region of partial shadow is called the penumbra (*q.v.*)

Umbrella Contrivance for protecting a person from rain or snow. Umbrellas were used by the Chinese and were regarded in the East as a sign of rank. Jonas Hanway, who died in 1786 is regarded as the first man habitually to carry an umbrella in England

Umbrella Tree (*Magnolia umbrellata*) American species of small magnolia tree. The blossoms are white and the long, oval leaves radiate from the end of the flowering branches in a form suggesting an umbrella

Umbria Ancient and modern district in Italy. The name is derived from the Umbri, the chief Italian tribe before the Roman conquest. Modern Umbria, not entirely co-extensive with the ancient district, contains many manufactories, besides hydro-electric plants, and is touched by the main lines from Rome to Florence and Ancona

Umpire Person called in to decide an industrial or other dispute. The word is also used for the two men who interpret the rules and decide doubtful points at cricket and in general control the course of the game. In most other games the term referee is used. The word umpire is employed, however, at the university boat race and other sporting events

Umtali Town of Rhodesia. It is 170 m from Salisbury with which it is connected by railway. The town is the distributing centre of a mining and agricultural district and the starting point of important roads. Pop 2300 (whites)

Una Character in Spenser's *Faerie Queene*. Lovely in person and in character, her name denotes singleness of heart and mind in devotion to all that is true and beautiful. She is therefore, regarded as the personification of truth

Unconscious The term used in psychology to denote the deep regions of the mind where repressed memories survive and act. It cannot be reached by normal memory, but only by psycho-analysis (*q.v.*) its content being usually repugnant to the conscious mind. Its importance to the individual lies in its effect on everyday behaviour. In his relation to society he is forced to repress his natural instincts, and these, now operating in the region of the unconscious, are responsible for emotional conflicts which express themselves in dreams and as irrational dislikes, fears, inhibitions and physical disabilities. *See* REPRESSION, INHIBITION, SUBCONSCIOUS

Unconsciousness Complete loss of sensibility. It may be caused in many ways, such as by poisoning, apoplexy, intense cold, loss of blood, violence especially to the head etc. The patient should receive immediate medical attention and in the meantime should be placed in a horizontal position, the head being on no account raised unless the face is flushed, when cold water may be applied, otherwise, the patient should be kept warm. Any obvious injury may receive suitable first aid treatment.

Unction Extreme. *See* EXTREME.

Undercliff Name used for the coastline of the Isle of Wight between Ventnor and St Catherine's Point. It is famed for its mild climate and its beautiful scenery. It is about 6 m long and about 1 m wide

Undertaker A contractor. To day the word is used especially for one who contracts or undertakes to carry out funerals

Historically the word is used for those who settled in Ireland in the 16th and 17th centuries and undertook to cultivate the land that was granted to them. Other undertakers started negotiations with James I for a contract to collect the country's revenue, but the proposal fell through

Underwriter One who takes up or underwrites a policy of insurance. The word is chiefly used for the men, generally members of Lloyds who insure ships and their cargoes. It is also used for the financial houses and individuals who insure the success of an issue of capital. In return for a certain percentage they undertake to subscribe for such parts of the issue as are not taken up by the public. The commission paid varies with the nature of the security and the conditions prevailing at the time

Undine Name given in legend to a water sprite. She is soulless, and can obtain a soul only when she becomes the mother of a child after marriage to a mortal. *Undine*, the novel of De la Motte Fouqué, is a story based on this idea

Undset Sigrid Norwegian novelist. Born in 1882 at Kallundborg, Denmark, she was educated at Christiania. In 1912 she wrote her first successful novel *Jenny*, which was translated into English in 1917. She became a Roman Catholic after the World War and wrote a novel of historical interest, *Kristin Lavransdatter*, which was translated into English in 1930. She was awarded a Nobel Prize in 1928, and her other novels include *The Cross* (1927), *The Axe* (1928), *The Son Avenger* (1930), *The Wild Orchid* (1931) and *Ida Elizabeth* (1933).

Unemployment Absence of employment which provides a livelihood. The conditions of modern industry, mass production, fashion, machinery, the credit system and many other factors have created a grant, but varying, amount of unemployment which presents one of the most formidable problems of the day. No single solution is possible, but something may perhaps be done by stimulating demand and reducing hours of labour. As however, a perfect equilibrium between production and consumption can never be reached unemployment is never likely entirely to disappear.

Since the Great War there has been a great increase in the number of unemployed, although this is partly accounted for by the greater fulness and accuracy of the figures kept by the various nations. In Great Britain the figure has only rarely fallen below 2,000,000, and in 1932 it was only a little under 3,000,000, or something like one fifth of the working population. In 1932 Germany reported over 6,600,000 unemployed. For the United States there are no exact figures, but 10,000,000 and even 12,000,000 were freely mentioned. In 1932 it was stated by the International Labour Office that 30 per cent of the workers were unemployed. Succeeding years, however, have shown a steady improvement, and in 1935 the total number of unemployed in Great Britain was 1,910,000. The German unemployment figure for 1935 was given as 1,711,000, but this may be misleading. In the United States the number had dropped by 1935 to about 4,000,000.

UNEMPLOYMENT INSURANCE Since 1911 Great Britain has had a system of insurance against unemployment, and a similar scheme has been in operation in Northern Ireland. The contributions payable and the benefits receivable have been altered several times, the last time being as from July, 1934, while the minimum entry age was lowered from 16 to 14 as from Sept. 1934. The scheme applies to all manual workers and to all others who are in receipt of less than £250 a year and are between the ages of 14 and 65, with the exception of two large classes, agricultural labourers and domestic servants. About 13,000,000 persons are insured under the scheme, which is controlled by the Ministry of Labour. The local centres for the payment of benefits are the employment exchanges and the offices of trade unions.

The rates of contribution are per week

	Insured Person	Employer
Males	10d	10d
" 18 to 21	6d	6d
" 16 to 18	6d	6d
" 14 to 16	2d	2d
Women	6d	6d
" 18 to 21	8d	8d
" 16 to 18	4½d	4½d
" 14 to 16	2d	2d

The benefits are Mon 17s per week, and

women 16s per week with smaller sums for those under 21 years old. In addition 9s a week is paid for a wife or other adult dependent and 2s for each child.

Owing to the serious increase in unemployment, it was necessary for the state to borrow large sums in order to maintain the benefits, and in 1931 over £100,000,000 had been borrowed. The Act of 1934 followed reports of a royal commission appointed to investigate the situation and by it the debt was funded, to be repaid at a fixed annual rate. Also it restored the 10 per cent benefit economy cut of 1931, and granted additional days, increasing benefit in certain cases beyond the 26 weeks previously specified.

Ungava District of Canada. It lies in the N of Labrador and has an area of 456 000 sq m. There is much forest land in the S and rich deposits of iron ore. Lead and copper are also found. There are large numbers of fur-bearing animals with consequent trade in skins. The territory became part of Quebec in 1912.

Uniat Name used for Christian churches that are Greek in practice, but have accepted the authority of the Church of Rome. They are found in various places in the Balkan area and other parts of Europe and Asia Minor. The largest are the Rumanian and the Armenian.

Unicorn Fabulous animal with head and body of a horse and a long, sharp horn in the middle of its forehead. Its existence is testified to by Pliny, Aristotle and the Bible, but it is probable that it was confused with the rhinoceros. The Scottish royal arms are supported by two unicorns, giving rise to the traditional rivalry with the English lion.

Uniformity Conformity to one pattern or rule. Acts of uniformity have been passed from time to time to enforce a set form of religious worship. In England they were passed in 1549, 1552 and 1559. The fourth and last, passed in 1662, ordered all clergymen to be properly ordained, to accept the 39 articles and to use the Book of Common Prayer. Those who refused were expelled from the Established Church and joined the Nonconformists.

Union Act Name of two Acts of Parliament. By the first, passed in 1707, the English and Scottish Parliaments were united. By the second, passed in 1800, the British and Irish Parliaments were united. Each aroused a good deal of opposition in its particular country. The Irish union was partly annulled by the legislation of 1921-22. Another Act of Union was that which in 1907 created the Union of South Africa.

Union Day Annual public holiday in S Africa. Held on May 31, it commemorates the foundation of the Union of S Africa in 1910.

Unionist Political party in Great Britain. It originated in 1885 when Gladstone proposed to give Home Rule to Ireland. A number of Liberals, led by the Marquis of Hartington and Joseph Chamberlain, thereupon left the party and called themselves Liberal Unionists because they were determined to maintain the union between England and Ireland. In 1895 they joined the Conservative party in forming a government, and gradually the two parties became one, and the term Conservative was dropped for that of Unionist. After the Great

War when Home Rule had ceased to be a vital question, there was a return to the name Conservative. The name Unionist, however, is still used and the official name for the Central Association of the party is Conservative and Unionist. See CONSERVATIVE

Union Jack National flag of Great Britain. It is the outcome of the union of the banner of St George white with a red cross for England, the banner of St Andrew, blue with a white diagonal cross, for Scotland and the banner of St Patrick, white with a red diagonal cross, for Ireland.

The Union Jack Club is a club for men of the navy, army and air force. It was founded in 1907 and a building was erected in Waterloo Road, London, S.E. 1

Unitarianism Theological term. It denotes belief in one God and is generally used to designate the faith held by those Protestants, who, while denying the doctrine of the Trinity and other beliefs of orthodox Christianity, nevertheless accept the pre-eminence of Jesus Christ as a religious teacher and prophet. English Unitarians trace their origin to the ejection from the Established Church of the 2000 clergy under the Act of Uniformity in 1662. In 1813 the last disabilities from which Unitarians suffered were removed, and since then their faith has flourished in England under the leadership of such men as Martineau, Stopford Brooke and Estlin Carpenter.

United Irishmen A revolutionary society of 18th century Ireland. Shortly after the French Revolution, malcontents, profiting by a wave of unity which allied Presbyterians of the North with Catholics of the South, sought to introduce French ideas and to procure an independent Irish Republic. Foremost among these were Tone, Russell, Emmet and Tandy while Lord Edward Fitzgerald agitated on their behalf. This unrest culminated in the rebellion of 1798, which was repressed, after which the organisation was broken up.

United Kingdom Name given in 1800 to the kingdom of Great Britain and Ireland. The parliaments of England and Scotland were united in 1707, and the first parliaments of Great Britain and Ireland met in June, 1801. The latter union was dissolved in 1922, when the Irish Free State was established and to-day the phrase United Kingdom means the United Kingdom of Great Britain and Northern Ireland, i.e. the areas represented in the Parliament at Westminster. See ENGLAND, NORTHERN IRELAND, SCOTLAND, WALES.

United Methodist Church. English Nonconformist body. It was formed on July 26, 1907, by the union of three churches which had seceded at different times from the Methodist body founded by John Wesley—the Methodist New Connection (1787) the Bible Christians (1815), and the Methodist Free Church (1857). With the consummation of Methodist Union in Sept., 1932 the United Methodist Church ceased to have a separate existence.

United Provinces Province of India, in full the United Provinces of Agra and Oudh. It was formed in 1902 and since 1921 its chief official has held the rank of Governor. It covers 106,248 sq m. Lucknow is the capital, other places are Cawnpore, Benares, Allahabad, Agra, Bareilly and Meerut. In it are three

native states. The Ganges flows through the province, which is an agricultural area. It is governed by a legislature of 123 members, of whom 100 are elected. Pop. (1931) 48,408,763.

The term United Provinces is also used for those provinces of the Netherlands under the leadership of Holland that revolted against Spain in the 16th century. In 1581 they declared their independence, which was recognised by Europe in 1648 by the Treaty of Westphalia. See NETHERLANDS.

United Service Museum. Museum in London belonging to the Royal United Service Institution. It occupies the banqueting hall in Whitehall and contains articles showing the development of weapons, ships and aeroplanes, as well as naval and military relics and models. It is open to the public every day except Sunday.

United States Country of North America. It extends from the Atlantic to the Pacific Ocean, with Canada on the north and Mexico on the south. It has a total area of 3,026,789 sq m. The population (1930) was 122,775,046, of whom 11,891,143 are negroes, and 2,019,696 belong to other races who are not whites. A few Indians remain living chiefly on reservations. Washington is the capital, but New York is the principal city. Other places with over a million inhabitants are Chicago, Philadelphia, Detroit and Los Angeles.

The country contains great varieties of climate, but is entirely habitable, and except in certain areas the soil is fertile. In it are parts of the Great Lakes. The greatest river is the Mississippi with the Missouri and other tributaries, but there are many other great rivers including the Hudson, Delaware, Potomac, Savannah and Colorado. The greatest mountain ranges are the Appalachians in the east and the Rockies in the west.

The United States is rich in natural wealth of almost every kind. It has vast deposits of coal, iron and copper, and much of the world's oil and silver comes from the country. Maize, wheat, cotton, tobacco and sugar are grown on a vast scale. As a manufacturing country it is perhaps the greatest in the world.

The United States consists of 48 states, divided into groups according to geographical position, and differing greatly in size and in other ways. Texas is the largest and Rhode Island the smallest. Several cover over 100,000 sq m., or twice the size of England. One group in the north-east forms New England.

The possessions of the United States are Alaska, the Philippine Islands, the Hawaiian Islands, Puerto Rico, Guam, the Virgin Islands and some Samoan Islands, as well as the Panama Canal zone. The country is a republic governed by a president elected every four years, and a ministry responsible to a legislature called Congress (qv). The constitution is a written one, and its terms cannot be altered without considerable difficulty. The country has an army, a navy of considerable size and an air force. The unit of currency is the dollar and most of the currency is in paper.

History. The United States originated in settlements made by English and Dutch on the Atlantic coast, but in the 17th century the Dutch colonies were acquired by Great Britain. These were in the main independent of each other, but in 1776 a union was formed to resist the claim of Great Britain to tax them. A war followed and in 1783 thirteen of them, hence-

ward known as the United States, declared their independence. A constitution was formed, and in 1788 they elected their first president, George Washington. The country then extended westwards as far as the Mississippi, but gradually further areas were acquired and fresh states entered the union. In 1800 Louisiana was bought from France, and in 1819 Florida from Spain. A war with Mexico, 1846-48, brought the territory in the south into the union and by the time of the Civil War the land had its present area, though in the west much of it had not taken on the status of states. The last states to join the union were Arizona and New Mexico in 1912.

In 1861 the United States were engaged in a Civil War in which the northern federal states fought the southern confederate states, who claimed the right to secede and to keep their slaves. Finally the north, with its vastly superior resources won the union was saved and the slaves freed. Reconstruction was followed by an era of expansion and extraordinary prosperity, alternating with periods of depression, the most severe of which was in 1930-32. In 1917 the United States entered the Great War on the side of the Allies, and her statesmen had a large share in framing the Treaty of Versailles. She did not, however, enter the League of Nations the author of which was her president, T. Woodrow Wilson (qv). In 1932 Franklin Roosevelt (qv) became president. His government took part in the World Monetary and Economic Conference, called by the League of Nations in 1933. Among Roosevelt's economic difficulties were the vast number of unemployed, deferred payments of war debts by other countries, demands for continuation of the ex-soldiers' bonus, and a budget deficit—in 1934 it was £1,800,000,000. In Sept. of that year Roosevelt appointed a committee to take charge of the broad policies of future legislation of his famous National Recovery Administration (N.R.A.). The Finance Committee of Senate in May, 1935, voted continuation of the N.R.A. for another year, but the Supreme Court decided that unconstitutional power was thereby surrendered by Congress to the President, and in June the N.R.A. chairman resigned. Yet the bill for its extension was passed, although Senator Huey Long spoke in the Senate against it for 16 hours.

Marked opposition, however, had undermined the N.R.A., and President Roosevelt brought forward his New Deal, which was "to give Labour freedom to organise and protection from exploitation, to safeguard and develop the national resources," etc. Its farm programme was put in the hands of the Agricultural Adjustment Administration (A.A.A.), signed by the president Aug. 1935, and despite a declaration of unconstitutionality by the Supreme Court in Jan. 1936, this administration introduced a bill giving it power to make grants to farmers on specified bases.

Universal Word used for a general term in logic. Its opposite is a particular. There are five classes of universal genus, species, difference, property and accident, but their nature led to great arguments among the scholars of the Middle Ages. "All cats are animals" is a universal, "some cats are black" is a particular.

Universal Language In 1880 a universal language named Volapük was brought forward, and other efforts are Esperanto, invented by Dr. Zamenhof, a Warsaw medical man, in 1887,

and Idiom Neutral. Esperanto has made some headway and is practicable as an auxiliary language.

Universe The whole system of created things. Man has always speculated on its nature, extent and the means of its creation. Until the 17th century the earth was considered as the centre, with the sun, moon and stars revolving round it. In 1632, however, Galileo showed that the earth moved round the sun, and the work of Newton and Kepler led to the accurate forecasting of the movement of all the planetary bodies.

The improvement of the telescope led to the discovery of more and more stars, and spectroscopy enabled their distance and constitution to be investigated. Now, astronomers estimate that the universe contains at least 2000 million stars, the nearest being 25,500,000,000,000 m. from the earth, this being also about the average distance separating one star from the next. Many of the elements found on the earth have been detected in the stars, and it is probable that some stars are themselves centres of planetary systems.

The extent of the universe has caused much philosophical difficulty. Einstein's theory of relativity led to experimental proof that light travels in a curved path, which if prolonged far enough, will return to its starting point, and it is in this sense that the universe is now considered finite but boundless. See SPACE.

There is some evidence to show that the material bodies of the universe have been created by a slow process of evolution, stars forming by concentration from nebulae, and planets by the cooling of portions of the stars. See *The Mysterious Universe* and other books by Sir J. H. Jeans (qv).

University Community of teachers and scholars. Salerno, founded in the 9th century for the study of medicine, was the first European university, the revival of legal studies in the 12th century led to the foundation of Bologna, Padua and others, and the schools of dialectic in Paris developed in the 13th century into the Sorbonne. The universities of Central and Northern Europe, including Prague, Heidelberg, Louvain and the first Scottish foundation at St. Andrews, were founded in the 14th and 15th centuries. The earliest English universities were Oxford and Cambridge, in the 12th and 13th centuries, and here colleges were first established as places of residence for students. Trinity College, Dublin, was founded in 1591. In response to modern needs, many other English universities were founded in the 19th and early 20th centuries, London, Manchester and Liverpool being the first.

University Settlement

Community of social workers, having a connection with a university. The present University Settlement Association owes its origin to Canon S. A. Barnett, vicar of Whitechapel. In 1884, in an article in the *Nineteenth Century*, he discussed the question of university settlements, and this led to the formation of an association. Barnett, Rogers and Montefiore were the movers in the construction of Toynbee Hall, Commercial Street, Stepney, connected with Oxford University. Barnett was the first warden of Toynbee Hall, which was the forerunner of the many east end social settlements of to-day.

Unknown Warrior Body of an unidentified

soldier killed in the Great War, buried as representing all who fell in the struggle. In Great Britain the unknown warrior was buried in Westminster Abbey on Nov. 11, 1920. In France beneath the Arc de Triomphe in Paris. In the United States in the National Cemetery at Arlington. And in Italy in the church of Santa Maria degli Angeli, Rome.

Unleavened Bread Food eaten by the Jews in commemoration of the Passover and in obedience to the instructions of Moses (Exodus xii 15). The prohibition of leaven has a ritual significance which may be associated with the idea that fermentation involves corruption.

Unwritten Law Term used for a principle that is regarded as a law, although it is not included in any legal code. It is an unwritten law, according to one view, that a husband may kill the seducer of his wife without being punished for the offence.

Upas Tree Tree found in Java and in tropical Africa. Its juice contains a poison formerly used by the natives to poison their darts.

Uppingham Market town of Rutland. It is 10½ m. from London, on the L.M.S. Rly. The chief building is the parish church and there is an agricultural trade. Pop. 2453.

Uppingham School, founded in 1584, became a leading public school under the headmastership of Edward Thring (1853-87) and has now a fine range of buildings with accommodation for about 500 boys.

Uppsala City of Sweden, on Lake Mälaren. Its university, founded in 1477, is the oldest in Sweden, containing schools for every department of learning, as well as an observatory. Uppsala Cathedral, which is French in style, was begun in 1287. Old Uppsala dates back to the 9th century, when its heathen temple, made of gold, made it famous. During the Middle Ages, Uppsala was a kind of ecclesiastical capital, and it was here, in 1593, that the Synod, which proclaimed the final victory of Protestantism in Sweden, was held. The city was burned down in 1702. There is a broadcasting station (453.2 M., 0.15 kW.) Pop. (1932), 30,741.

Ur Ancient Sumerian city. The biblical "Ur of the Chaldees" (Gen. xi 31, xv 7), whence Abram set out on his journey into Canaan, is generally identified with it. It was situated on the left bank of the Euphrates, about 153 m. S.E. of Babylon. The modern name of the mound under which it lay is Mugheir. Excavations were begun in the 19th century and after the Great War continuous work was carried on. Since 1922 a joint expedition of the British Museum and the University of Pennsylvania has excavated the mound with remarkable results. The great temple of Nannar, the moon god (c. 2300 B.C.) with its *sigillur* or stage tower, was unearthed; the discovery of other temples and some private houses followed, and then some royal graves (c. 3200 B.C.) in which were many objects of gold, silver and semi-precious stones of finest workmanship. In 1929-30 the walls of the city, with a circuit of two and a half miles, were traced.

Ural Range of mountains running from the Arctic to the Caspian Sea forming a boundary between Europe and Asia. The Ural range is important chiefly for the timber from its densely wooded slopes. Its salt mines

and deposits of gold, platinum, copper, iron and coal. These deposits were originally worked by serfs.

The River Ural rises in the Southern Ural Mts., and flowing past Ural'sk, empties itself into the Caspian Sea at Tschapajew.

Uralite Type of rock. Uralite is formed by the changing of rock masses, and in the process of urallisation secondary hornblende replaces augite. Urallisation occurs in a rock known as diabase, urallite itself may be said to be an alteration product of diallage, a calcium magnesium silicate.

Uranium Metallic element, symbol U, atomic number 92, atomic weight 238.14. Uranium was first obtained from pitchblende by Klaproth in 1789. Pitchblende still furnishes most of the world's uranium being U₃O₈ and remarkable in that it contains helium. Uranium is a white, malleable metal which tarnishes slowly in air. It burns to U₃O₈ and decomposes water. It forms two series of compounds, uranic and uranyl. It is chemically related to tungsten and chromium.

Uranus God of Greek legend. He was the son or husband of Ge, the Earth and was the first King of the Gods. He was the father of Kronos and the other Titans, the Cyclopes, Oceanus, Hyperion and the monsters Briareus and Gyges. Legend tells how, hating his children, he imprisoned them in Tartarus. Led by Kronos, they rebelled against him and conquered him. He was torn to pieces, the giants sprang from his blood, and Aphrodite from the foam of the sea into which his mutilated limbs were thrown.

Uranus One of the planets, discovered by Sir William Herschel on March 13, 1781. It was first called *Georgium Sidus*, in honour of King George III. Except Neptune, it is the farthest planet from the sun, and the time required for a revolution in its orbit is 84 years. The diameter is four times that of the earth, and the density slightly greater than that of water. It has four satellites, Titania, Oberon, Ariel and Umbriel.

Urban Name of eight popes. S. Urban was Bishop of Rome from 222 to 230. Urban II (1088-1099) had to contend with the antipope Gilbert of Ravenna, and promoted the First Crusade. Urban III. (1186-1187) also supported the crusaders. After Urban IV. (1261-1264) the son of a shoemaker, and Urban V. (1362-1370), Urban VI. (1378-1389) had to contend with fierce opposition from the French popes. Urban VII. only occupied the papal chair for a short time in 1590. Urban VIII. (Barberini) was ready to wage war on behalf of the papacy, and on his equipping the Castel Sant' Angelo with bronze from the Pantheon, he was satirised as a Vandal thus—*Quod non fecerunt barbari, fecerunt Barberini*, i.e., "What the barbarians did not do, Barberini has done."

Urban District In England and Wales an area set up for purposes of local government in 1804. Each urban district has a council, elected by the people for three years and presided over by a chairman. The council is responsible for the care of the streets and for sanitary matters. If the district has a population of over 20,000 it is also responsible for elementary education. The urban districts are represented on the county councils.

Urbino Town of Italy. It contains a 15th century palace, which houses a magnificent arcaded courtyard, a cathedral

and university, also a monument to Raphael, who was born at Urbino. It is the ancient town of Urbinum and was formerly one of the chief centres of art and literature in Italy. During the 16th century majolica pottery was extensively produced at Urbino.

Ure River of Yorkshire. Rising in the Pennine Hills, it flows east and then south-east. During its course of about 70 m. it passes Askrigg and Ripon, near which it joins the Swale to form with it the River Ouse.

Urga City of Mongolia (known as Hurne). It is the Mongol holy city and the residence of the lama known as the "Living Buddha." Urga can be roughly divided into three sections: the Kuren where the lama resides, the Mongol quarter and the Chinese settlement. The Chinese trade extensively with the Mongols and the Russians in cattle, camels, horses, sheep and milk.

Urial (Orrial or Orfel). Ancient province of Ireland, comprising the present counties of Armagh, Louth, Monaghan and Fermanagh. This province was founded in the early 4th century by the three Collas, who drove out the Ulidians from the province. Numerous castles and tumuli remain to mark this early province.

Urine Fluid secretion containing waste material abstracted from the blood as it passes through the capillaries in the tissues of the kidneys. In a healthy state urea, uric acid, hippuric acid and sodium chloride are present, but sugar and albumin are absent. The colour, derived from bile pigments, is normally yellow, but may vary considerably. Excess of uric acid tends to the formation of gravel, while the presence of sugar or albumin is indicative of certain diseases.

Urmston Urban district of Lancashire. It is 5 m. from the Central Station, Manchester, and 194 m. from London, by the L.M.S. Ry. Its industries are mainly connected with cotton. Pop. (1931) 9284.

Urquhart Sir Thomas. Scottish author. Born in 1611, he was a member of an old Scottish family. An ardent Royalist, he was knighted by Charles I. in 1641 at Whitehall, and was captured by the Cromwellian army at Worcester, but released after a short term of imprisonment. His writings include epigrams, a trigonometrical treatise, a translation of Rabelais (1653) and a *plaidoyer* in favour of a universal language. He died in 1660.

Ursula Roman Catholic saint commemorated on Oct. 21. Most stories about S. Ursula are ill-founded. According to one legend, she and a body of nuns were slaughtered by the Huns in the 3rd century, when defending their virginity. Other stories say that she led a party of 11,000 virgins from Britain to avoid Maximian's persecution.

Ursulines Religious order. It was established by Angela Merici at Brescia in Italy, for the education of girls and the care of the poor, in 1535. In the 17th century the order was supported by S. François de Sales. The nuns numbered some 20,000 in the 18th century, but have since dwindled. Their patron saint is S. Ursula.

Uruguay Republic of South America. It is situated south of Brazil, fronting the Atlantic, and is divided from Argentina on its western border by the River Uruguay and the Plata estuary. Like the Argentine Pampa, the country consists, for the

most part, of a grassy plain with few trees save along the river banks. It is well watered. The Uruguay River is 1000 m. long, and for 100 m. of its length is from 6 to 9 m. wide. The climate is well suited to Europeans, and a large proportion of the population are immigrants from Spain and Italy. Spanish is the principal language used. The country affords excellent pasture ground, and the chief industries are those connected with meat, wool and hides. Meat extracts are manufactured on a large scale, and there are several large refrigerating stations. Uruguay is rich in minerals which include gold, silver, copper and lead. The capital is Montevideo. Paysandú has important shattoirs.

Originally forming part of a Spanish vicereignty, Uruguay became a province of Brazil, and in 1825 established itself as an independent republic. The government is vested in a senate and elected chamber of representatives. The president who is aided by an administrative council is elected for four years. The area is 72,153 sq. m. Pop. (1932) 1,941,398.

Uses in Law In olden times, a man could not dispose of an estate by will; the use was invented to avoid the laws against mortmain by making over the estate to a friend on the understanding that the original owner should still profit from it. This was found valuable for defeating creditors. In 1536 was passed the Statute of Uses, which was not successful in its attempt to counter these methods. This province is now governed by the law of trusts.

Usedom Island of Germany. It forms part of the province of Pomerania, off the Baltic coast. The surface is flat, being covered mainly by moor and marsh. Fishing and agriculture are the industries of the island, which contains some popular watering places.

Ushant (Fr. *Ouessant*). Island off the coast of Brittany. In area 3000 acres, it is some 15 m. from Finistère, with which it forms a canton. It consists mainly of granite rock and its rugged coasts are made dangerous by fogs and frequent gales. Cereals and potatoes are grown and sheep bred. Fishing is also carried on.

In 1383 the island was ravaged by the British. On "the Glorious First of June," 1791, Admiral Lord Howe was victorious over the French fleet, and in 1778 the English and French fought an indecisive naval action off Ushant.

Ushaw Village of Durham. It is 4 m. from Durham, and has a college for training men for the Roman Catholic priesthood. It was founded in 1804 for the students who had been obliged to leave Donal and is dedicated to S. Cuthbert.

Usk River of Wales, rising on the border of Brecknockshire and Carmarthenshire, it flows east and then in a southerly direction to the Bristol Channel. It is navigable to Newport and is about 70 m. in length.

Usk Market town of Monmouthshire. On the River Usk, it is 11 m. from Monmouth. There is an old church restored, and also the ruins of a castle, once a royal residence. The place is visited for the fishing.

Uskub (or Skoplje). Ancient Turkish town, now in Yugoslavia. It lies on the Vardar, and is the junction of the line from Belgrade and Monastir to Salonica. It occupies a strategic position, and possesses

in 364 he succeeded him. He was very intolerant in religious matters, but he made wise and useful laws. He divided the empire into east and west, taking the west himself.

Valentinian II (372-392) was the second son of Valentinian I. Three years after he began to rule he was murdered by Arhogastes, commander in chief of his army, and his executor.

Valentinian III (419-455), the son of Constantius III, was Emperor of the West, being thus created by Theodosius II, Emperor of the East, in 425. He was weak and vicious, and was overruled, first by his mother, Placidia, and then by the eunuch, Héraclius. By his maltreatment of Bonifacius, he lost Africa to the Empire. In 455 he was killed by Maximus.

Valerian Perennial herbaceous plant (*Valeriana officinalis*) of the order *Valerianaceae*. The leaves are narrow and the broad clusters of tiny pink flowers are borne on stems several feet high. The root is used medicinally for nervous affections. Another variety, the small marsh valerian (*V. dioica*), has minute pink flowers and is found chiefly in boggy places.

Valerian Publius Licinius Roman Emperor (193-260). He was elected by the legions in Rhaetia in 253, after Galha had been murdered. He had a very troubled reign, being threatened on every border. In 260 he marched against the Persians at Edessa under their king, Sapor, was defeated and taken prisoner, and tortured to death.

Valetta The capital of Malta. The main part of the city lies upon a spur of rock, which projects into the middle of a bay, dividing it into two harbours. The streets and houses are mainly of stone. There are many fine public buildings, such as the governor's palace, the opera house, museum, and the old lodges of the Knights of St. John, now used for clubs and offices. The Roman Catholic Cathedral of St. Giovanni dating from 1576, contains some fine paintings and tapestries. Since the British occupation Valetta has been an important naval and military centre. General want and discontent, consequent upon the Great War, led to serious riots in June, 1919. Pop. 25,000.

Valhalla In Norse legend the great hall of the souls of warriors slain in battle. The hall contains 540 great gates, through which they issue daily to engage in battle, returning at nightfall to feast with Odin and the gods.

Valkyrie In Scandinavian mythology, divine maidens who rode through the air, sword in hand, upon swift horses to do Odin's bidding. They presided over battlefields to determine the course of strife or to select the bravest fighters for Valhalla. Here they ministered for them at feasts serving them with ale or mead in skulls. Similarly named creatures (*valcyryean*) were mentioned in early England, but were identified with witches.

Valladolid City and province of Spain. and was an ancient stronghold of the Moors, but it has been greatly modernised, possessing fine streets and buildings which set off its cathedral and university. Cervantes lived here and Columbus died here. Linen, silk, woollen goods, pottery, leather and ironware are among the manufactures. Pop. (1931) 89,342.

Valladolid is also the name of a town of Mexico in Yucatan, founded in 1644, soon after the conquest.

Valleyfield City and port of Quebec. It stands on the south shore of the St. Lawrence, 43 m. from Montreal, and is served by canal and railway. Here are cotton mills. The chief building is the Roman Catholic cathedral which was destroyed by fire in 1933. Pop. 9215.

Vallombrosa Summer resort of Tuscan, in Italy. Here and in surrounding villages are ancient monasteries, one of which, at La Verna, was founded by St. Francis in 1215.

The Vallombrosians are an order of monks founded in 1038 by St. John Gualbert at Vallombrosa, some 60 monks of this order still exist.

Valmy Village in the department of the Marne, France. At Valmy, in Sept., 1792, the Prussians, who were advancing to Paris to restore the dethroned Louis XVI, were heavily defeated.

Valois French family, formerly a royal house of France. The name is that of a small town near Valenciennes. The Duchy of Valois formed part of the lands of the dukes of Orleans up to the Revolution. Members of the house of Valois were kings of France from 1228 to 1589. Marguerite de Valois, daughter of Henry II and Catherine de' Medici, married Henry of Navarre, and was one of the best memoir writers of the 16th century. Henri de Valois (1603-76) is famous as a translator of Latin and Greek classics.

Valparaiso Province and city of Chile. The city, which possesses perhaps the most important harbour on the Pacific Coast of S. America, is a port of call for many lines of steamers plying between the United States and Europe. Valparaiso ("Paradise Valley") is most inappropriately named, its streets being narrow and dirty. It has had an eventful history, having been, at various times, captured by the English under Drake and Hawkins and sacked by the Dutch and Spanish. The city lies under the shadow of great volcanoes, and as late as 1906 a large part of it was destroyed. Pop. (1932) 189,117.

Value Term of political economy. It is not quite the same as price, which expresses value only in terms of money. Economists who use the word a good deal, distinguish between value in use and value in exchange. Such things as water, air, comfort and friendship have a high value in use, but no value in exchange.

In music value is the relative length of a tone signified by a note, in painting it is the relation of one part of a picture to the others with reference to light and shade, but without reference to colour. Philosophers also use the word when referring to the relation of one desire to another.

Valve Contrivance devised for the regulation of the flow of a fluid through pipes, pumps, etc. There are many types of valves, some automatic in action, others regulated by hand or mechanically. Of the automatic type, a simple form is the flap or check valve used in suction pumps, which consists of a metal plate with leather hinge. A stop valve, operated by hand, is raised by a screw spindle with a handle and passes through a stuffing box to obviate leakage. The slide valve used in steam engines is an example

THE COUNCIL CHAMBER, NEW DELHI

of the mechanically worked type *See also*
THERMONICS

Vampire Imaginary monster The belief in vampires, or blood-sucking ghosts, is a very ancient one, and appears to have emanated from Eastern Europe A vampire is alleged to be the soul of a dead man, which leaves the body by night in the form of a bat, bird or spider to suck the blood of the living, who slowly decline and die The corpse of the vampire, however, remains fresh and life-like The activities of vampires are supposed to be stopped by driving a stake through the corpse Wizards, witches and suicides become vampires after death

Vampire Bat Species of bat, of which Central America were discovered by Darwin It bites horses upon the withers, rendering them unfit for the saddle The commoner type, *Desmodus rufus*, is some 3 in in length, reddish-brown, with sharp teeth, and of forbidding aspect

Van Town, lake and province of Asia Minor The town, which is populated by Moslems and Armenians, lies about a mile from the lake It is of ancient origin, dating from about 900 B.C. and contains numerous cuneiform inscriptions

Lake Van is 5000 feet above sea level, and contains many islands on which churches and monasteries are situated The water is undrinkable, containing salts which are evaporated in pans

Vanadium A rare earth, symbol V, atomic number 23, atomic weight 51.2 Discovered by Berzelius in 1831, the metal, which is of a light colour, belongs to the phosphorus group and has five oxides, V_2O_3 , V_2O_4 , V_2O_5 , V_2O_6 , and V_2O_7 , to the last of which it burns in oxygen It dissolves in nitric acid Vanadium in small quantities improves the resistance of steel, and is used in the manufacture of motor car engines

Vanbrugh Irene English actress The younger daughter of the late Prebendary Barnes of Exeter, she was born in 1872 She started her theatrical career at Margate, as Phoebe in *As You Like It* She is a leading comedy actress, combining fine technique with great natural charm Amongst her numerous parts have been Lady Rosamund in *The Liars*, Sophy Fullgarny in *The Gay Lord Quex*, Lady Mary Lazenby in *The Admirable Crichton*, and Belinda (1918) She toured the southern colonies in 1923-25, and again in 1927-29 She played in *The Swan* (1930) and as the Queen in *Hamlet* (1931)

Vanbrugh Sir John English architect and dramatist He was born in London in Jan., 1664, and educated in France He became a leading figure in society and as an architect was responsible for the finishing of Greenwich Hospital (1695), Castle Howard in Yorkshire (1702), and Blenheim Palace (1705) As a dramatist, he collaborated in management with Congreve and wrote society plays, notably *The Relapse*, *The Provoked Wife* (1697), and *The Confederacy* (1705) He died March 20, 1726

Vancouver City of British Columbia It stands on the south shore of Burrard Inlet There is a legend that a Chinese settlement existed near the present site of Vancouver in A.D. 499, but it was not until the Canadian Pacific Railway completed its transcontinental line in 1886 that there was any real growth, and in less than 50 years

It has grown to be the largest city in British Columbia Splendidly laid out, with many large parks, it possesses buildings of the most modern type, and the C.P.R. has made it an important port for trading with Japan, China, New Zealand and Australia It has a broadcasting station, (49.43 M) Pop (1931) 245,307

Vancouver Island of Canada Off the coast of British Columbia, it was discovered in 1592 by Juan de Fuca and visited later by Capt. Vancouver and named after himself It is 275 m long and has an area of 20,000 sq m In 1840 it was proclaimed a British colony The mainland, in these days, was generally known as New Caledonia In 1858 the colony of British Columbia was created, and in 1866 the two colonies were united under that name In 1871 it became a province of the Dominion of Canada Victoria, the capital of British Columbia, and Esquimalt, a naval station, are both situated on the island, most of which is wooded There are golf links and facilities for camping and every kind of sport

Vandals Tribe which first appeared in eastern Germany In A.D. 400 they began to move westwards, coming into contact with the Goths and Franks Under Gunderic they crossed the Pyrenees, settling in Gallia and Andalusia In 428, 80,000 Vandals under Genseric crossed to N. Africa where they slowly ousted the Romans They formed bands of pirates and in 455 captured Rome by surprise, carrying off valuable treasures Their cruelty to the Christians gave rise to the word Vandalism Following their defeat by Belisarius, the envoy of Justinian, in 533 near Carthage, they slowly disappear from history

Vanderbilt American family The founder, Cornelius, was born on Staten Island, N.Y., Mar. 27, 1794 At sixteen he ran a ferry between the island and New York City, this gradually developed into a coastal trade so extensive as to earn for him the nickname "Commodore" Abandoning shipping for railways, then being rapidly built, he acquired enormous and commanding interests He died Jan. 4, 1877 His eldest son, William Henry, born May 8, 1821, acquired further extensive railway control and died Dec. 8, 1855, president of several railways His eldest son, also W. H. Vanderbilt (1843-1899) followed in the family traditions

Van de Velde Family of Dutch painters Of these, Adrian (1639-72) excelled in pastoral scenes, he also painted religious subjects Jan (1593-1642) left behind him over 400 engravings Willem (1611-93) painted sea battles for the Dutch Government, accompanying the Dutch fleet during their war with the English He and his son Willem (1633-1707) were later engaged by Charles II and James I to paint naval actions Willem Sen died in Greenwich, his epitaph recording that he was "a painter of sea fights to their Majesties" Willem Jun was made court painter, and died in 1707

Vandervelde Émile Belgian statesman He was born Jan. 25, 1866, near Brussels In 1886 he joined the Belgian Labour Party, and soon became its leader He entered Parliament in 1894 He was a member of the Cabinet during the World War, and afterwards, as Minister of Justice effected many humanitarian and scientific reforms in the prison system He was Minister for Foreign Affairs from 1925 to 1927. In 1925

he played an important part in negotiating the Locarno Pact. He has written on labour questions and on Marxism, and with his wife published *Le Pays d'Israel* (1929).

Van Diemen's Land Name given to Tasmania (qv) by the Dutch explorer, Tasman, who discovered it in 1642. It was renamed in 1863.

Van Dyck Sir Anthony Flemish painter. He was born at Antwerp on the 22nd March, 1599. After studying under Rubens, he visited England in 1620 and painted a portrait of James I. From 1623 to 1628 he was in Italy painting portraits and religious subjects. Later he executed a series of portraits as engravings which won him fame as an etcher. Returning to England in 1632, he secured the patronage of Charles I, was knighted and appointed painter in ordinary. He painted the portraits of all the Royal Family, and many distinguished members of the court. Most of these pictures are now at Windsor Castle. He married Lady Mary Ruthven in 1639, and died on Dec 9, 1641.

Vane Sir Henry English statesman. Born in 1615 and educated at Westminster and Magdalen Hall, Oxford, he was early known for his republican and anti-Church sympathies. In 1635 he left England and became Governor of Massachusetts. He returned two years later and entered Parliament. During the Civil War he was the civil leader — "that in the state which Cromwell was in the field". After a quarrel with Cromwell he was imprisoned. Returning to public life after the Restoration he was beheaded on Tower Hill for high treason on June 14, 1662. He was a promoter of the Solemn League and Covenant, and author of *The Healing Question*.

Vanilla Flavouring material obtained from the seed pod of the vanilla plant (*Vanilla planifolia*). This plant is a native of Central America. It has green flowers and long slender seed pods, and belongs to the natural order of *Orchidaceae*.

Vaporisation Change of matter into the gaseous state. It occurs at all temperatures and continues until the vapour reaches the saturation pressure. Rise of temperature raises this pressure, until it equals the pressure of the atmosphere when boiling occurs. At still higher temperatures the vapour behaves as a gas. Vaporisation cools the parent liquid and is assisted by a reduction of pressure, as by air in motion, hence the danger of draughts.

Vardar River of Yugoslavia and Greece. It rises in the north of the former country and falls into the sea near Salonika. It is about 200 m. long. There was a good deal of fighting along the Vardar in 1915 and 1918, the French and British here being in conflict with the Bulgarians. In Sept., 1918, the French and Serbians drove the Bulgars before them and entered Uskub.

Vardon Harry English golfer. Born at Grouville, Jersey, Aug. 9, 1870, he became professional at Ripon when 20. Between 1896 and 1914 he won the British Open Championship six times, the American Championship in 1900, and the German in 1911. He is the author of *The Complete Golfer* and *How to Play Golf*. Vardon Braid and Taylor were known as 'the great triumvirate' of British golf.

Varennés Village of France. In the department of Meuse. Here Louis XVI. and his family were stopped in

1791 when they attempted to flee from the country. It is situated on the Aisne, and was occupied by the Germans during the Great War.

Variation Term in biology for the characters often seen between a parent organism and its offspring, and representing deviations from the normal characters of the stock. Some of these variations are continuous, forming a graded series, others are discontinuous as where very unlike forms suddenly appear. These cases are termed mutations. Some variations are due to environment. Many secondary variations are now known to be due to dissimilarities in the functioning of the ductless glands. The theory of natural selection was based upon the gradual increase in continuous variations, but more recently mutations have been regarded as taking an important part in evolution.

Varicose Veins Dilated veins in the leg. They may be due to constitutional causes or to prolonged standing and walking tight garters, or muscular strain.

Treatment—Avoid garters, any pressure on the veins, and much standing or walking, relieve chronic constipation and any liver complaints, wear a light, porous, elastic bandage during the day. In young subjects an operation may be desirable. In the case of Haemorrhage from the veins, lay the patient down and raise his leg to a vertical position, apply pressure to the bleeding point with a knotted handkerchief until medical aid is obtained.

Variolite Basaltic rock. It occurs in Co. Down, Ireland, the Point of Sleat in Skye and at Ardnamurchan, Argyllshire. It has a glassy matrix containing numerous fan-shaped, sheaf-like, or radiate aggregations of felspathic fibres, that assume in some types the form of large pea-like spherules.

Varna Bulgarian port. On the Black Sea, it is the third city of the country, ranking after Sofia and Philippopolis. In Varna is the summer palace of the King of Bulgaria. The exports include grain and wine. Varna was the headquarters of the Allies in the Crimean War, and was ceded to Bulgaria by the Treaty of Berlin (1878). Pop. (1926) 60,563.

Varnish Decorative and preserving substance for wood, etc. There are two main kinds. Spirit varnish, in which various resinous substances are dissolved in spirit, and oil varnish in which oil is the dissolving agent. Shellac, mastic and the like are used for spirit varnishes, while for oil varnishes the more usual resins are amber or copal.

Varnish Tree Tree which flourishes in China (*Aleurites cordata*). The seeds of this tree contain lac, a resinous secretion exuded by certain insects, to which the tree owes its name.

Varus Publius Quinctilius Roman general. He was consul in 13 B.C. and afterwards Governor of Syria. In A.D. 8 Augustus sent him to command the Roman forces in Germany. He was ambushed by Arminius the German chief, and was routed with three legions, whereupon he killed himself.

Vascular System Biological term for the system of channels in animals and the higher plants by means of which nutrient materials are supplied to the various parts, and waste matter, in animals, is removed from the tissues. In man, blood is circulated through

thick-walled arteries by the heart, returning through thinner-walled veins, the two sets of channels being connected by a network of fine capillaries in the tissues

Vatican Pontifical palace, Rome In size it is the greatest palace in the world, covering an area of 1151 ft by 767 ft. and containing over 4000 rooms, 8 grand staircases as well as numerous courts, gardens and halls. Pope Gregory XI, on his return from Avignon in 1377, chose the place as his residence, and ever since that date it has remained the home of the popes and the centre of the Roman Catholic Church, including within its area all the offices of Papal government

One pope after another has tried to outdo his predecessors in making this palace the largest and most beautiful in the world. The Sistine Chapel where the pope is crowned, erected under Sixtus IV, in 1473 is famous for its masterpieces by Michelangelo. The grand corridor of the Vatican Library is the longest room in the world, over a fifth of a mile in length. The library itself is estimated to contain some 220 000 volumes including many ancient manuscripts. Among its treasures is the famous *Codex Vaticanus*, a Greek Bible dating from the 4th century

The Lateran Treaty between Italy and the Holy See was ratified here in 1929. By it the state of Vatican City came into being. The succession of the Papal States was ruled over by the pope until 1870. It has an area of 108 acres in Rome and possesses certain buildings and estates outside its walls. Foreign powers are specially represented at the court of the Vatican, and the city has its own railway station, postage stamps, coinage, flag, etc. It has a broadcasting station (50.26 M., 10 kW and 19.84 M., 10 kW). Pop (1932) 1025

Vauban Sebastian le Prestre de, French soldier and military engineer. Born on May 15, 1633, near Avallon, he served in the French army in Spain, under Condé, and in 1658 he was France's chief engineer under Turenne. He directed thirty-five successful sieges, erected thirty-three forts, and re fortified three hundred. After the Peace of Ryswick in 1697, he studied politics, and in 1707 published his *Dime Royal*, a project for equality of taxation. His scheme was condemned by Louis XIV. He died March 13, 1707.

Vaudeville Originally a popular song with topical allusions. Today it describes a play interspersed with dances and songs, usually humorous, which are introduced incidentally.

The Vaudeville Theatre is in the Strand, London, nearly opposite Charing Cross Station.

Vaudois Alternative name for the Waldenses (qv).

Vaughan Charles John Clerie and schoolmaster. He was born in St Martin's Vicarage, Leicester, in 1816, educated at Rugby, under Dr Arnold, and graduated from Trinity College, Cambridge, with high honours in 1838, becoming a Fellow in 1839. After three years as Vicar of St Martin's, Leicester, he was headmaster of Harrow, 1844-50, then Vicar of Doncaster. From 1869-94 he was Master of the Temple, in 1870 he was made Dean of Llandaff. He died Oct. 15, 1897.

Vaughan Henry British poet. He was born in Breconshire, April 17, 1822, went to Jesus College, Oxford, in 1838,

and in 1846 published his first poems, "with the tenth Satyre of Juvenal Englished." He took a medical degree, and practised at Brecon. He published pious meditations, *Silex Scintillans* in 1850-55, and in 1852 *The Mount of Olives*, devotions in prose. In 1878, *Thalia Rediviva*, the *Pastimes and Diversions of a Country Muse*, which consisted of elegies, translations, and religious poems, was published. He died April 23, 1895.

Vaughan Herbert English cardinal. Born on April 15, 1832, at Gloucester, and educated at Stonyhurst and Rome, he entered the priesthood in 1854, and became Bishop of Salford in 1872. He was made Archbishop of Westminster in 1892, and became a cardinal a year later. He founded St Joseph's College for foreign missions at Mill Hill, and was the owner of the Catholic papers, the *Tablet* and the *Dublin Review*. He died on June 19, 1903.

Vaughan-Williams Ralph British composer. Born Oct. 12, 1872, he was educated at Charterhouse and Trinity College, Cambridge, taking his Mus. Bac. in 1894, and his Mus. Doc. in 1901. His works include *A London Symphony*, *A Sea Symphony*, as well as an opera, *Hugh the Drover* (1924), notable songs, hymns and other church music. A new piano concerto was produced in 1933. He was a prime mover in the Leith Hill Musical Festival.

Vault Primarily an arched roof. It is much used in architecture. Groined vaulting is found in Norman buildings and ribbed vaulting is a feature of Gothic architecture. The word came to be used for an underground chamber, owing to its arched roof, and so for the places where wine is stored and the chambers in which dead bodies are buried.

A vault also means a leap, and for this purpose a device called the vaulting horse is seen in gymnasia.

Vauxhall District of London. It is on the south or Surrey side of the river in the borough of Lambeth and is a busy industrial district, on the S. Rly. Vauxhall Park is an open space and a bridge crosses the Thames here. Vauxhall Gardens was a popular pleasure resort from about 1670 until it was closed in 1859. The name is a variant of Faulkes Hall, or Fulkes Hall.

Vedas Ancient writings of the early Hindus. The word *veda* means knowledge, and the ancient Vedas were supposed to be due to divine revelation. The Vedas, which comprise precepts, hymns and poems, have been called the "Hindu Bible."

Veddas Primitive people of Ceylon, they were the true aborigines. They are now confined to the south-eastern part of the island. Practically dwarfs, they are a shy, harmless folk, dwelling in caves. They are monogamous, a trait very rare in such tribes. Their worship consists of rude dances to scare away demons.

Vegetable General term for plants, and specifically those edible by man or beast. A further distinction can be made between vegetables and fruits. Herbs are a type of vegetable. These are mainly a dwarf perennial plant, such as parsley, mint, marjoram, basil, rue, hyssop and thyme. Other vegetables can be divided into Tap Roots (carrots, turnips, parsnips), Tubers (potatoes, Jerusalem artichokes), Bulbs (onions), Buds (lettuce, cabbage, broccoli), Leaf Stalks (celery, etc.) Gourds, i.e., marrows and

pumpkins, are popularly known as vegetables, but, containing seeds, are properly fruits

Vegetable Marrow The commonest of the gourds. Marrows demand a warm situation and rich soil. The fruit is of oblong-elliptical shape, of some 9 in long, though some varieties are some 18 in in length. When young, they are pale green, but become light-yellow on ripening.

Vegetarianism Term used for abstaining from eating meat. The word came into use about 1847, and is applied to the practice of living on foods from which fish, flesh and fowl are excluded. Some sects even deny themselves all animal products, such as milk and eggs, and confine their food to nuts, fruits and cereals. The commonest grounds adduced are those of health (in so far as diseases of animals are communicated to consumers of their flesh), economy, and kindness to animals. There are vegetarian societies and restaurants.

Vein Blood vessel which returns impure blood from the capillaries towards the heart, motion of the blood being secured by the pressure of moving muscles and the force from the arterial system. The venous system may be divided into three classes: (a) general venous system including facial, jugular, abdominal veins and veins of the thorax; (b) pulmonary veins which emerge from the lungs, bringing back oxygenated blood to heart; (c) hepatic portal system which drains blood from the stomach and intestines.

Velasquez Diego de Silva y Spanish painter. He was born June 1599, in Seville, and studied under Herrera and Pacheco. His earliest success was the "Water Seller." Philip IV made him his private painter, and he painted many portraits and studies of court life. He visited Italy twice. Examples of his work are "Christ in the House of Martha," in the National Gallery, and the "Boar Hunt," and portraits of Philip IV. His pictures are admirable in colour and relief, and he is the most powerful and original Spanish painter. He died Aug 6, 1660.

Vellum Parchment made from the skin of a newly-born calf or kid. Vellum was formerly the recognised surface for writing and was also used in such articles as fans. To day it is employed in book binding and percussion instruments. As a medium for writing it has been entirely replaced by paper.

Velvet Silk fabric. It is woven with a short, thick pile on one side only. In mediaeval times Genoa was the source of the finest velvet with some other Italian cities as the next producers. In modern times much of the trade has passed to Lyons. Velvet is although very similar in appearance is a cotton fabric, or at best a mixture of silk and cotton.

Vendée Maritime department of Western France. The principal towns are La Roche-sur-Yon and Sables-d'Olonne. While Poitiers and Maitlezeaux are of historical interest. Wars of the Vendée were counter-revolutionary risings of 1793 in France. Discontented peasants joined by some of the émigrés succeeded for a while in withstanding the republicans, but they were annihilated at Le Mans (Dec., 1793).

Vendetta Feud between private individuals. It refers to the practice of the relatives of a murdered man

taking vengeance on those who killed him the feud being kept up perhaps for generations. Something of the kind prevailed among the clans in the Highlands of Scotland, and more recently in Italy, especially in Corsica.

Vendôme Town of N Central France, 20 m N W of Blois. The town contains many fine old churches and was formerly the Gallie Vendocium. The Abbey of the Trinity was one of the most important early Christian Churches, and claims to possess a tear shed by Christ at Lazarus's tomb. Paper and gloves are manufactured at Vendôme. Louis Joseph, Duc de Vendôme, was one of the greatest generals of Louis XIV.

Venereal Diseases Diseases arising from infection generally contracted during sexual intercourse including gonorrhoea, local ulcers and syphilis (qv). In the two former the attack is localised in the parts affected, in syphilis the whole system is involved. Immediate medical attention is necessary. Treatment of syphilis by arsenic benzol compounds has been developed with success in recent years. The prevention of and treatment for these diseases is receiving the attention of authorities in many countries by the establishment of centres for treatment, provision of properly tested remedies, and by educational means.

Venezuela Republic of S America. The United States of Venezuela are bounded N and E by the Caribbean Sea and the Atlantic Ocean, and on the S and W by Colombia and Brazil. More than half of the country, south of the Orinoco, consists of tropical forest. The rest is made up of immense grassy plains, known as llanos, while in the more northerly regions are the Andes and the Orinoco area. The valleys of the mountain district comprise some of the most fruitful and most densely populated parts of the republic. The climate varies. The lowlands are very hot, the hill country is temperate, and in the Andine regions the cold is severe. The Caribbean coastland is cooled by the trade winds. Coffee, cocoa, sugarcane, maize and cotton are grown. The plains produce good pasture. Forest products include rubber, balata, and vanilla. Among the minerals found are petroleum, asphalt, gold and copper. There are some pearl fisheries. The capital is Caracas, other towns including Maracaibo and Valencia. Spanish is the language used. The population is a medley of European Indian, and negro blood. A Spanish possession from 1550, Venezuela revolted in 1810 and finally secured her independence in 1830. The area is 393,976 sq m. Pop (1930) 3,216,000.

Venice Seaport of Italy, capital of the province of the same name. It is situated on the Adriatic Sea, and, being built on some 80 islets of the lagoon, is raised mostly on piles, while canals are the main thoroughfares.

The ancient republic of Venice was a maritime power of great importance until the capture of Constantinople by the Turks in 1453, and the discovery of the Cape route to the Indies which diverted trade from the Mediterranean. Its independence came to an end in 1797, when Napoleon gave the city to Austria. In 1866, after the defeat of Austria by Prussia, Venice became part of United Italy. The city, which is divided by the Grand Canal has many famous buildings, including the Palace of the Doges, the cathedral of St. Mark, the Bridge of Sighs, numerous Gothic

and Renaissance churches, guildhalls and campanilli. Byzantine architecture is a feature of the city. Other notable buildings are the Arsenal, and the libraries including that of San Marco. To the S.E. is the Lido, a famous watering place. The modern harbour is large and well equipped. Industries include the manufacture of glass, for which Venice is famous, tapestry, brocades, laces, etc. Pop (1931) 256,144.

Venison Flesh of the deer. In olden days it was a popular article of diet and there was a deer park round most great houses. It is eaten to-day, but to a much smaller extent.

Venizelos Eleutherios Greek statesman. He was born on Aug. 23, 1861, near Canea in Crete and educated at Canea, Syra and the University of Athens. He practised as a barrister in Crete. Entering politics, he became a deputy in the Cretan Assembly in 1888 and took part in the Cretan rising in 1896 becoming president of the Assembly in 1897, and Minister for Foreign Affairs. He led another insurrectionary movement in 1901. In 1909 he went to Athens, and became Prime Minister of Greece in 1910. At the outbreak of the Great War his sympathies contrary to those of his sovereign, were with the Allies and he resigned in 1915. After the dethronement of King George in 1917, he was again Prime Minister until 1920. He held the office again in 1921, and almost uninterruptedly from 1928 to 1932.

Vennachar Loch in Perthshire. It is near Callander and is 4 m long. The river Teith flows through it.

Ventilation The means by which a free circulation of air is maintained in houses or other buildings to secure proper healthy conditions. This is secured in houses usually by an adequate room space, open windows, and the draught from fires, etc., the art of ventilation being to ensure free circulation of air and equable temperature without draughts. In factories, mines, crowded halls, etc., where poisonous fumes are present or the oxygen content may become low, systems of ventilation specially studied and built are required. Ventilation is important also for the preservation of perishable goods and other materials.

Ventnor Pleasure resort and urban district of the Isle of Wight. It is 12 m from Ryde, on the S. side. Near the town are St Boniface Down, Bonchurch and other beauty spots. Pop (1931) 5112.

Ventriloquism The art of making sounds so that they appear to come from a distance, and not from the speaker's own mouth. The name indicated that this gift was thought to be due to some use of the stomach while breathing. Actually, it results when the mouth is but slightly opened, and only the tip of the tongue moved. Ventriloquism is an ancient art, and it has been suggested that various phenomena, such as oracles and Egyptian speaking statues, owed their explanation to the mastery of this practise by priests.

Venus Goddess of Roman mythology. She was regarded as a representation of beauty and growth in nature, particularly, the Romans considered, as applied to gardens. Her two temples in Rome had the same dedication day, which coincided with the Vinalia Rustica, and gives added significance

to the theory that she was especially the goddess of human cultivation. Her identity was eventually merged with that of the Greek Aphrodite, under which form she assumed patronage of human love.

Venus Planet of the solar system having its orbit between the earth and Mercury. It has nearly the same diameter as the earth (7700 miles), its year consists of 224.7 days, and its distance from the sun is 67,200,000 m. Venus is the most brilliant of the planets and exhibits phases like those of the moon, showing, when at its brightest, a brilliant crescent form. Its surface is obscured by dense clouds, but probably the atmosphere is similar to our own. Transits of Venus across the sun are important as a means of measuring the solar parallax, though more efficient means of achieving this object are now available.

Venus's Looking Glass

(*Specularia speculum*) Annual herbaceous plant of the order *Campanulaceae*. It is about 12 in. in height with vivid purple flowers and narrow lanceolate leaves, and is easily grown from seed planted in a light sunny position.

Vera Cruz City and seaport on the Gulf of Mexico. It dates from 1520, following the advent of Cortes. The port suffered so severely from the depredations of pirates, that the fort of San Juan de Ulua was constructed on one of the reefs in the bay. Coffee, tobacco, sugar, rubber and minerals are exported. Pop (1930) 70,000.

Verbena Genus of shrubs, mostly native to America. It ranges in colour from white, rose, carmine to violet and purple, and occurs in clusters of long spiky flowers. It was formerly used in the composition of charms and love-philtres. One variety is known as lemon grass and yields a fragrant oil.

Verderer (Lat. *viridis*, green). Name used for one who looked after one of the king's forests. To day verderers are still appointed in the New Forest and the Forest of Dean, where they are the representatives of the commoners of the forest.

Verdi Giuseppe Italian composer. Born at Roncole, Oct. 10, 1813, after studying at Milan, he produced his first opera, *Oberto*, in 1839. His first success was scored with *Nabucodonosor* (1842) and his most famous contributions to the Italian school of opera are *Ernani* (1844), *Rigoletto* (1851), *Il Trovatore* (1852), and *La Traviata* (1853). *Aida*, produced in 1871, is of a different type, and shows the influence of Wagner. His work is highly dramatic and theatrical, and owes its popularity to this and to its notable rhythm, which makes it particularly effective in performance. He also wrote the great *Manzoni Requiem* in memory of his author friend, Alessandro Manzoni. He died at Milan on Jan. 27, 1901.

Verdict Finding of a jury at a trial. It is pronounced by the foreman after the jury has returned to court from considering the matter. In English law a jury must return a unanimous verdict of either guilty or not guilty, if unable to do this it is discharged and another jury sworn in for a new trial. In Scotland a jury can return an intermediate verdict, one of non proven.

Verdigris A green deposit formed on copper by exposure to air. Unlike iron rust, it will protect the metal and prevent further corrosion. This deposit is a

hasle copper carbonate Verdigris is used as a paint in dyeing and calico printing It is used in an ointment for warts It is an irritant poison, and hence, copper utensils are not frequently used in cooking

Verdun Town of N.E. France It was the Roman Verodunum. Its bishopric dates from the 3rd century, and after being destroyed by the barbarians, the town was rebuilt at the end of the 5th century After the revolution of 1789 the citizens opened the gates of the city to the Germans It also capitulated to the Germans in 1870 In the Great War Verdun which was the scene of terrific fighting, suffered heavily

The town lies upon the Meuse, and is surrounded by a bastioned rampart, pierced by four gates It possesses a cathedral and its 17th century hôtel-de ville contains a museum Its industries include metal founding, manufacture of sweetmeats, machinery, nails, chairs and linen It lies on a canal, and its canal port has trade in agricultural produce and timber

Vereeniging Town of the Transvaal. It is on the Vaal River, 50 m from Johannesburg, and 904 from Cape town with which it is connected by railway Near are coal mines Its industries include brick making and flour milling Here a great barrage has been built to provide water for irrigation purposes and for generating electric power Pop (White) 700

Being a border town, with the Transvaal just across the river, Vereeniging was chosen for the Peace Conference between the British and the Boers in 1902 The treaty signed on May 31 provided for the annexation by Britain of the two republics, the Boers receiving £3,000,000 as compensation for the burning of their farms

Verlaine Paul French poet and decadent Born at Motz March 31, 1844, he chose French nationality in 1873 He wrote *Poèmes Saturniens* (1865), *Les Fêtes Galantes* (1869) and *La Bonne Chanson* (1870), and then for twelve years led a life of dissipation, broken by illness In 1881 *Sagesse* appeared, verse showing sweetness and sanity He afterwards wrote *Amour* (1885) *Bonheur* (1889) and *Parallèlement* (1890) He died Jan 8, 1896

Vermeer Jan Dutch painter He was born at Delft, Oct 31, 1632 He probably studied under Karel Fabritius a pupil of Rembrandt He was master of the Guild of Painters of Delft in 1662 and 1670 He was forgotten until 1866, when he was "discovered" by Theophile Thore, the French critic, and Vermeer is now considered the most perfect in technique of the Dutch masters Among his works are "Street in Delft," "The Pianist," "The Lace maker," "The Woman with a Water Jug" He died Dec. 15, 1675

Vermicelli Paste of flour obtained from the harder species of wheat. It is pressed through fine tubes into a thin thread like shape It is used in soups, or like macaroni as a food stuff

Vermin Word used for a noxious animal, or one destructive to crops and game Rats, mice, moles, foxes, polecats and weasels are vermin In Great Britain, by a law passed in 1919, persons who fail to destroy rats and mice on their land, wherever it is reasonably possible to do so, can be prosecuted and fined The word is also used for lice, fleas and other insects that infest dirty persons and

articles Persons infested with vermin can be taken to a public station and cleansed if a magistrate's order is obtained.

Vermont State of the United States, is in the N.E. of the country and its area is 9564 sq m Montpelier is the capital It is almost wholly an agricultural area, and produces a great quantity of maize, wheat, oats and barley It is also famous for its cattle Another product is sugar, and a good deal of lumber is cut The government of the state is under a legislature of two houses two senators and one representative are sent to Congress Vermont became a state in 1791 Pop (1930) 359,611

Vermouth Liqueur prepared from distilled white wines. It is flavoured with wormwood, oranges and other bitter or aromatic ingredients and sweetened with white sugar It is made in France and also in Italy, chiefly in Turin The Italian vermouth is slightly more potent than the French variety

Verne Jules French writer Born at Nantes on Feb 8, 1828, he went to study at Paris where his talent manifested itself in librettos and comedies He was inspired on hearing stories from traveller friends, to write the tales of travel for which he is famous Among the best known are *Round the World in Eighty Days* and *Twenty Thousand Leagues under the Sea* His novels have been widely translated, and he has done much to popularise scientific knowledge Owing much to Swift and Defoe, his influence may be traced in the works of Wells and Rider Haggard He died March 24, 1905

Vernet Name of a family of French painters Claude Joseph Vernet was born at Avignon, Aug 14, 1714, and studied art in Rome where he lived for 20 years Later he worked in Paris for Louis XV and Louis XVI and there he died Dec 3, 1789 His son, Antoine Charles Horace Vernet, born in 1758, painted battle scenes for Napoleon, but is best known as a painter of horses He died in Paris Nov 17, 1835 His son, Emil Jean Horace Vernet born in 1789, was also a painter of battle scenes From 1828-34 he was director of the French school of art in Rome He died in Paris Jan 17, 1863

Vernier Pierre French scientist Born at Ornans near Besançon in 1580, his most famous invention, the vernier, consists of a small movable scale, running parallel with a fixed scale of a theodolite or barometer and is used for measuring a fractional part of one of the equal divisions on the fixed scale He died in 1637

Verona Capital of the province of Verona, Italy Verona is an extremely ancient city Its cathedral was consecrated in 1187, while it contains numerous palaces, castles and a Roman amphitheatre It is also rich in paintings and sculptures The Congress of Verona, held on Oct 20 1822 was based on principles laid down by the Treaty of Paris (1815) Here Great Britain by her policy of non intervention in Spain, broke away from the Great Alliance of Russia, Prussia and Austria

Veronal (or diethylbarbituric acid) White powder, possessing a bitter taste As a drug it is used in treatment of heart, lung and kidney diseases and other nervous diseases associated with sleeplessness Although a very slow poison, its excessive use

has caused many deaths among sufferers from insomnia

Veronese Paolo Venetian painter Born in 1528 at Verona after working there and in Mantua, he settled in Venice in 1555, where he made wealth and earned fame. He visited Rome in 1563, and that gave greater dignity and grace to his work, which was always rich in colour and noble in design.

His best known work is "Marriage Feast at Cana" now in the Louvre, and others are "The Feast of Simon" and "The Triumph of Venice". He died April 19, 1588.

Veronica Christian saint. She is alleged to have been a woman of Jerusalem who, as Jesus was bearing the Cross to Golgotha, offered him her handkerchief to wipe his brow. The image of His face became impressed upon it. She may also have been she whom Christ healed of an issue of blood (Matt ix 20).

Veronica Genus of plants, shrubby and herbaceous, of the order *Scrophulariaceae*. The flowers are in all shades of violet, mauve, blue, and white. *Veronica longifolia*, a popular garden variety is about 2 ft. high and bears spikes of blue flowers. *V. spicata*, 18 ins., has varieties bearing rose, blue or white blooms, and another *V. rupestris* is of dwarf growth, more suitable for the rock garden. *V. chamaedrys*, the gemmador speedwell, is the best known of the 16 British species, and is often called Bird's eye, or Cat's eye. The tiny flowers are a brilliant blue. *V. agrestis*, the field speedwell, has small blue blooms with a white lower petal.

Verrocchio Andrea del. Florentine artist. His real name was Cione. He was born in 1435 and worked under Donatello. Though specially distinguished as a sculptor, he was also goldsmith, architect, painter and musician. His most famous work is the bronze equestrian statue of Colonna at Venice. Leonardo da Vinci was his pupil. He died in 1488.

Versailles French town. It is situated 11 m. S.W. of Paris and is chiefly famous for its royal palace. Erected by Louis XIII, it was enlarged by Louis XIV. The palace is remarkable for its massive proportions and vast extent (on the garden side the façade is 520 yds long).

Here King William of Prussia was proclaimed German Emperor in 1871. Here too, was signed on June 28, 1919, the Treaty of Versailles which fixed the terms of peace after the Great War. It contained 15 parts. Part I dealt with the Covenant of the League of Nations (v), II and III with territorial dispositions, Germany losing Alsace and Lorraine to France, several frontier districts to Belgium, part of Schleswig to Denmark, lower Silesia to Poland, the Memel district to Lithuania, while the banks of the Rhine were demilitarised and the Saar basin was placed under an international commission. By Part IV Germany ceded all her colonial possessions to the chief Allied Powers, and by Part V her armaments were drastically restricted. Part VII, dealing with penalties remained a dead letter, Parts VIII and IX dealt with Reparations (v) and finance. Part X with economic restitution, commercial treaties, shipping, etc., Part XII with ports, waterways and railways. Part XIII provided for the setting up of an international labour organisation. Part XIV provided for military occupation of the Rhine zone by the Allies. The

other parts dealt with prisoners, war graves, aerial navigation and miscellaneous technical points. In Europe Germany lost 27,250 sq. m. and about 6½ millions in population, as well as most of her iron and minerals, abroad she lost 1,128,000 sq. m., with a population of over 13 millions.

Vertebrata A branch of the animal kingdom, comprising mammals, birds, fishes and reptiles, or those creatures with vertebrae or backbone, actually, such a division is faulty, since many invertebrates possess an unjointed rod, the notochord, which is an embryonic spine. Other characteristics are jaws as part of the head, nervous system separated from body cavity and never more than four limbs disposed in pairs.

Vertigo Dizziness or a sensation of giddiness. It is a symptom of certain ear and general systemic diseases.

Verulam City of Hertfordshire, now called St. Albans. Offa, King of Mercia, built a Benedictine abbey here in 793, it was rebuilt in 1077, and in 1877 was made the cathedral of the newly-formed diocese. St. Albans was the scene of the opening battle of the Wars of the Roses (1455) and of another in 1461. There is a monument to Francis Bacon, Lord Verulam and Viscount St. Albans in St. Michael's church. The present earldom of Verulam dates from 1815.

Very Light Firework that throws a light as a signal, or to illuminate a dark area. It resembles a cartridge and is fired from a pistol. It is named after Samuel W. Very who, in 1877, invented a method of firing coloured balls from a pistol to serve as signals. Very lights were much used during the Great War.

Vespasian Roman emperor. Born Nov. 18, A.D. 9, he served in Britain under Aulus Plautius and reduced the Isle of Wight. He was Consul in 51, governor of Africa in 63, waged war in Judaea in 66. In 69 he was declared emperor and seized Rome from Vitellius. He led a simple life and under his rule literature flourished, while Agricola took North Wales in 78. He died June 24, 79.

Vespers In the Roman Catholic liturgy, the sixth of the seven "hours" which make up the daily office. It is generally recited between the hours of 4 and 6 p.m. The office contains five Psalms, a short lesson, versicle and responses, a hymn, the Magnificat and the prayer of the day. The service is derived from the nocturnal vigil of primitive Christian assemblies. It corresponds to the Evensong of the Anglican Church.

Vespucci Amerigo Italian explorer. Born at Florence, March 9, 1491, he became a provision contractor, and provisioned one or two of the voyages of Columbus. When fifty years old he organised a voyage to the New World by the same route as Columbus. Sailing under the commander Hojeda, he explored the coasts of Venezuela. His name, Amerigo (America), was given to the two continents through the erroneous belief, fostered by the letters he wrote, that he had reached and discovered the mainland in 1497, the year before Columbus. He died Feb. 22, 1512.

Vesta Roman divinity, identified with the Greek goddess, Hestia. She was worshipped as the goddess of the hearth in a

emple erected by Numa between the Capitoline and Palatine hills. Here the goddess was represented not by a statue, but by the eternal fire kept burning by the Vestal Virgins, or priestesses. Their term of office was thirty years, ten of which were set apart for learning her duties, ten for actual ministrations, and ten for teaching the neophytes. They were six in number and carried out their duties under the control of the pontifex, who had authority to punish by death the violation of the vow of chastity, which each took on her appointment.

Vestment Ceremonial garment worn by priests, clergymen and others performing religious offices. The use of vestments in Christian churches dates from an early period, but is not directly connected with the vestments of the Jewish priest. The vestments worn by a Roman Catholic priest for Mass are amice, alb, girdle, stole, maniple, chasuble. In the Anglican Church the vestments are the cassock, the surplice and the stole.

Vestry Room attached to a church, in which vestments are kept. Hence it came to mean a meeting of the ratepayers of a parish held in this room for the transaction of parochial business. The vestry is responsible for the management of church property, the election of church wardens, etc. It now exists for ecclesiastical purposes only, having been deprived of other functions by the Local Government Act of 1894.

Vesuvius Volcano east of the Bay of Naples, Italy. It stands some 4000 ft. above sea level, but its height varies. At one time it was probably much higher than at present, but during a gigantic eruption the upper half of the cone was blown away. Its volcanic nature was unsuspected by early settlers around its base, until in 79, a tremendous explosion destroyed Pompeii and Herculaneum (q.v.). Slight activities have since been frequent until as recently as 1906. An electric railway now plies from Naples to the edge of the crater.

Vetch Plant belonging to the genus *Vicia*, sometimes known as tares. Certain vetches, loosely named, belong to other genera, i.e., horse shoe Vetch (*Hippocrepis*), and milk vetch (*Astragalus*). The vetches are reddish-purple, annual herbs and form a valuable forage crop.

Veterinary Surgeons Surgeons specialising in the treatment of domestic animals. To the French belongs the honour of being pioneers in veterinary science. The first veterinary college was established at Lyons, in 1762, and it was a Frenchman, St. Bel, who founded the London College in 1790. To day the veterinary surgeon has a high professional status, and the growth of the public concern about the health of domestic animals has brought about an increased demand for his services.

Both men and women are eligible for the profession of veterinary medicine. The Diploma of M.R.C.V.S. is the only recognised qualification, and the course of training must be taken at one of the five colleges affiliated to the Royal College of Veterinary Surgeons, viz. The Royal Veterinary College, Camden Town, London, and the Veterinary Colleges of Edinburgh, Glasgow, Liverpool and Dublin. The course occupies five years, after the passing of a recognised matriculation examination. Veterinary students may also take the university degrees of B.Sc. and D.Sc. in Veterinary

Science at the Universities of London, Edinburgh and Liverpool.

While the treatment of farm animals—horses, cows, pigs and sheep—is mainly carried out by men, a few women have taken up the treatment of the smaller domestic animals. There is an unsatisfied demand for highly trained veterinarians for Government services at home and in the colonies, and Government scholarships are available to suitable applicants. All particulars can be obtained from the R.C.V.S., 10 Red Lion Square, London, W.C.1.

Veto Act of forbidding or stopping. It is chiefly used in connection with legislation. In the British Empire the king emperor has in theory the right of vetoing, or refusing to assent to any piece of legislation, but the right has not been exercised since the times of Anne, and is regarded as obsolete. The president of the United States possesses a limited right of veto. The right possessed by the House of Lords and other second chambers of refusing to assent to a measure is not, strictly speaking, a veto.

Vevey Pleasure resort of Switzerland. It is on the north shore of Lake Geneva, 11 m. from Lausanne, and is a calling place for steamers. The buildings include an old tower.

Viaduct Elevated way. It is usually built on arches to carry a road or railway across a valley. An example in London is the Holborn Viaduct. There are a number along the railway lines of Great Britain.

Viaticum In the Roman Catholic Church the eucharist as reserved for the dying. The word is also used for a portable altar employed by the priest on these occasions.

Viborg Town of Jutland, Denmark. Its cathedral dates back to 1130, and its museum possesses relics of the Stone, Bronze and Iron Ages. Capital of province of the same name, standing on the Bay or Viborg, Finland. It is the seaport of Karelia and its pleasant scenery attracts tourists from Finland and Leningrad. It has a broadcasting station (291 M., 13.2 kW). Pop. (1930) 56,295.

Vicar The word meaning a delegate or deputy (Lat. *vicarius*). In the ecclesiastical sense it denotes an incumbent who is the deputy of the rector, the latter being entitled to a share of the emoluments of the incumbency. By an Act of 1888 all incumbents who are not rectors are entitled to be called vicars, if they are duly authorised to officiate at weddings, etc.

Vicar-General Ecclesiastical official in the Church of England the term denotes the assistant employed by the Archbishop or bishop to help in an ecclesiastical visitation. In the Roman Catholic Church the vicar general performs the duties of an archdeacon, especially assisting the bishop in matters of jurisdiction.

Vice Tool used for holding a piece of wood or metal firmly. It consists of two jaws and a screw which regulates the jaws, one of which is usually immovable. There are various kinds, among them the swivel vice and the parallel vice. A hand vice is made to hold in the hand and a table vice is fastened to a table. A pin vice is a delicate instrument used by watchmakers.

Vice-Chancellor Deputy of a chancellor. It is chiefly used at the universities where the vice

chancellor is the acting head, the chancellor being an honorary official. At Oxford and Cambridge the vice-chancellor is the head of a college and he serves for four years. At the newer universities he is appointed for life.

Vicenza Town of Venetia, Italy, at the foot of the Alps. It contains many fine buildings, a town hall or basilica of the Renaissance period, a cathedral dating from the 13th century, and villas of Palladio. Trade in wool, leather, linen, gold and silver goods is carried on at Vicenza, while mulberry trees flourish in the vicinity. Vicenza was formerly Vicetia, and was laid waste by Attila Mantegna, the painter of "The Crucifixion," was born here. Pop. (1931) 65,161.

Viceroy One who represents the sovereign in one of the countries or districts under his rule. It is applied to the governor general of India and was the usual term for the lord lieutenant of Ireland until the office was abolished in 1922.

Vichy Town of central France, on the river Allier. Its mineral waters were known to the Romans. There are 34 springs at Vichy, 12 of which belong to the State, those in the environs of the town are brought in by aqueducts. The waters, which have an alkaline taste, and smell faintly of sulphuretted hydrogen, contain a large percentage of sodium carbonate, while some are chalybeate. They are used in treatment of gout and diabetes. Large quantities of the water are bottled and exported.

Victor The title of three popes and two anti-popes. Victor I was bishop of Rome from 190-198, Victor II held sway from 1055-1057, Victor III was proclaimed pope in 1086 against his will, but died in the following year. He was a notable classical writer. Victor IV was a name taken by two anti-popes. The first, Gregorio Conti, was chosen in 1138 as successor to Anacletus II, the second, Octavian, the Ghibelline anti-pope, was supported by Frederick Barbarossa in 1159 against Alexander III. He died in 1164.

Victor Emmanuel I. King of Sardinia. Born at Turin, July 24, 1759, he was forced to abdicate in favour of his brother Felix in 1821 by a rising of the liberals. He died in Jan. 10, 1825.

Victor Emmanuel II, King of Sardinia, afterwards King of Italy. Born at Turin, March 14, 1820, he gained military distinction at an early age, and after his accession he allied himself with France against Austria. With the help of his army and Garibaldi, and by diplomacy with the help of his minister, Cavour, he was the real creator of a united Italy. As King of Italy he ruled as a strictly constitutional monarch. He died Jan. 9, 1878.

Victor Emmanuel III King of Italy. Born at Naples, Nov. 11, 1869, the son of Humbert I, he came to the throne July 29, 1900. He married Princess Elena of Montenegro in 1896. A man of culture and artistic taste, he ruled constitutionally and well but has had little prominence since the advent of Fascism in Italy. The "March to Rome," Oct. 1, 1922, brought to power the Fascists, representing a revolutionary movement against the inactivity of post-war Italian statesmen. The leader is Signor Benito Mussolini, who has acquired dictatorial power, militarised the state, and was largely responsible for the Abyssinian war.

Victoria Queen of the United Kingdom of Great Britain and Ireland and Empress of India. She was the only child of Edward, Duke of Kent (fourth son of George III), and was born in Kensington Palace, May 24, 1819. She succeeded William IV, June 20, 1837, and married her cousin, Prince Albert of Saxe-Coburg-Gotha, in 1840. Her long reign saw more changes—political, social, industrial, scientific—than any other in British history. The Empire was considerably enlarged, the greater colonies achieved self-government, successive reform bills extended the franchise, the Corn Laws were repealed, and Free Trade was adopted. Education was made compulsory, extraordinary advances were made in all domains of science, railways, the telegraph and telephone came into being, penny postage was inaugurated, and many measures for improvement in working class conditions were passed.

Great Britain's interests abroad involved her in several wars. In the East she waged war in China and Afghanistan, her rule in India involved her in the Indian Mutiny, two Sikh wars and two Burmese wars. In Africa outstanding wars were the Zulu wars, the Boer War and the South African War. In Europe she took part in the Crimean War, and British diplomacy played its part in international affairs, especially in the Near East.

Among the queen's prime ministers were Melbourne, Peel, Palmerston, Disraeli, Gladstone and Salisbury. Though as a constitutional monarch she followed the policy indicated by them, she made her influence felt in the political sphere, as well as in social and religious affairs. She celebrated her Diamond Jubilee in 1897 and died Jan. 22, 1901.

Victoria State of Australia. It covers 87,884 sq. m. in the S.E. of the continent and is divided into 37 counties. Melbourne is the capital and the largest city. Other cities are Geelong, Ballarat and Bendigo. It is governed by a parliament of two houses, council and assembly. Members of the council are persons of standing and substance elected for six years, they number 34. Members of the assembly, 65 in number, are elected for 3 years or a shorter period. There is a cabinet responsible to the legislature. The state sends members to a federal parliament which is responsible for some of its affairs. Victoria produces a good deal of wheat, but is more famous for its wool, vast numbers of sheep being kept. A good deal of coal and a little gold are mined. The state has a supreme court of justice and a university. There is a scheme of old age pensions.

Originally part of New South Wales, Victoria became a separate colony in 1851. It became self governing in 1855 and in 1900 joined the Commonwealth of Australia. Pop. (1932) 1,805,298.

Victoria Capital city of British Columbia. Camosun, the site of a former Indian settlement at the southern end of Vancouver Island, was selected in 1843 by the Hudson Bay Company for the erection of a fort to protect its trading, the name being changed to Fort Victoria in honour of the Queen. In 1858 the town grew rapidly, owing to the unmineralised discovery of gold, but the rush soon ceased, a healthy and steady growth followed, and in 1866 the city was chosen as the capital of the newly formed province of British Columbia. It is now one of the most beautiful residential cities on the Pacific coast, with a splendid harbour, fine

public and private buildings, and a wonderfully mild climate Pop (1931) 38,441

Victoria and Albert Royal Order of British order It was founded in 1865 and is given to women, but there have been no appointments to it since 1901 Members are divided into four classes and are distinguished by the letters V.A.

Victoria Cross Medal bestowed for conspicuous valour in presence of the enemy It was instituted by Queen Victoria in 1856, and consists of a bronze cross in the centre of which is a lion standing on a crown, and a scroll with the words "For Valour" It is suspended by a plain red ribbon and is worn on the left breast. Any member of the British Army, Navy or Air Force can win it, and it carries with it a small pension It is a very signal honour, sparingly awarded. Sometimes the cross is awarded to a ship or a regiment, in which circumstances the persons concerned decide among themselves which member of their company shall wear the decoration for them Thus Captain Alfred Carpenter, R.N., was selected by the crew of the *Vindictive* and the assaulting party on Zeebrugge to wear the cross for them after the famous attack on St. George's day, 1918. In 1929 the King when Prince of Wales gave a dinner in the House of Lords to all V.C.'s, at which 321 assembled

Victoria Falls Falls on the Zambesi River in Rhodesia, 800 m from the sea They were discovered by Livingstone in 1855 The falls consist of a single drop of 256-343 feet into a vertical chasm at a place where the river is very wide The water strikes the opposite wall of the chasm, becoming a mass of spray Passing through a narrow channel, the river enters a tortuous 40 mile course at the bottom of a canyon with almost vertical sides 400 feet high.

Victorian Order Royal British order of knight hood It was established in 1896, and its members are divided into five classes These are Knight Grand Cross (G.C.V.O.), Knight Commander (K.C.V.O.), Commander (C.V.O.) and Members, in two classes (M.V.O.) Women are eligible and if of the rank of knight are distinguished as dames, D.V.O. being Dame Commander The ribbon is blue with red and white edges and the motto is Victoria

Victoria Nyanza Lake of central Africa It is surrounded by Kenya and Uganda on the north, and Tanganyika on the south The southern end was discovered in 1856 by Speke who also found the northern outlet in 1861 The depth varies, soundings of over 600 feet having been taken It is 3726 feet above sea level and the area is about 32,000 sq m It is the principal source of the White Nile over the Ripon Falls at the north end

Victory English warship A wooden vessel, she was launched at Chatham in 1765 In 1803 she became the flagship of Nelson, and in her he fought the Battle of Trafalgar In 1825 she was paid off, and since then has been in the harbour at Portsmouth as the flagship of the commander-in-chief Between 1923 and 1928 the *Victory* was restored to her original condition, the money being raised by public subscription.

Victory Medal Allied medal bestowed after the Great War Any member of the fighting forces who

had been on active service during the four years of war was eligible for it, as well as women of the nursing and auxiliary services The medal is bronze with a rainbow coloured ribbon

Vicuna (or Vileugna) (*Aluchena vicugna*) Species of llama found in Peru and Chile Related to the camel, it is smaller being about two and a half feet in height, and the limbs are slender and graceful The hair, or wool is soft and fine in texture and is of a pale yellowish brown shading to white underneath The wool is used in the manufacture of a fine cloth which is used for clothing

Vienna Austrian capital situated on the Danube The inner town, surrounded by the Ringstrasse, a beautiful boulevard on the site of the old fortifications, contains the Gothic cathedral of St Stephen, the Hofburg, formerly the imperial palace in the Baroque style, and the university founded 1365 There are also many modern buildings including the houses of parliament, the town hall, and the Palace of Justice The cultural centre of S.E. Europe, the city has museums and picture galleries and its beauty is enhanced by wide parks and gardens.

A leading commercial city, Vienna has an extensive transit trade, and exports luxury goods, chiefly silk and velvet, clothing, gloves, leather goods and jewellery Besides manufacturing optical instruments machinery and chemicals, it has a large film industry An international fair is held yearly

A Roman garrison town named Vindobona, the city became the capital of the Duchy of Austria in 1137, and the centre of the Hapsburg power in the 14th century It was besieged by the Turks in 1529 and 1683 In the 18th century it was the chief residence of the Emperors, who built the palace of Schönbrunn, and in 1814 the Congress which resettled Europe after the Napoleonic wars was held there After the Great War Vienna became the capital of the Austrian Republic The success of its municipal housing has aroused much attention It has two broadcasting stations (1237 M., and 517 M., 15 kW) Pop 1,865,000

Vigo Port of N.W. Spain on the S.E. shore of Vigo Bay The bay extends inland for 20 m., and the town possesses a deep harbour and is well known for its sardine fisheries, as well as for its flour, paper and saw-mills. Vigo is a port of call for ships plying between Europe and South America. Drake attacked Vigo in 1585 and 1689 while in 1702 Rooke won a great victory in the bay over a combined French and Spanish fleet Pop (1930) 63,091

Viking (Icelandic, *víkingr*, a warrior or rover) Scandinavian adventurer engaged in plundering the coasts of Europe from the 8th to the 10th century

Vilayet Name used in the republic of Turkey and in districts once under the rule of the sultan of Turkey, for a province Iraq for example, is divided into vilayets, each with a capital

Villars Claude Louis Hector French soldier and diplomat Born at Moulins, May 8, 1653, he was responsible for the victories of Friedlingen and Kehl He fought against Marlborough at Malplaquet, and drove Prince Eugene back to Brussels after the victory of Denain (1712) He concluded the peace of Rastadt (1714) as plenipotentiary of France In the war of the Polish Succession (1732-34), he was again remarkable for his

military genius He died at Turin, June 17, 1734

Villein A term in feudal law, denoting one who held lands by "base or servile tenure." Villeins were intermediate in social status between serfs and freemen, and were attached to the soil. One man in a holding had to work so many days per week for the lord, but in the fourteenth century money payments were often accepted in the place of these services. Villeinage died out in England owing to changing economic conditions in the fifteenth century.

Villeneuve Pierre Charles Jean Baptist Sylvestre de French admiral. Born at Valensoles, Dec 31 1763, in the Battle of the Nile he commanded the rear division of the French navy and saved it from disaster. After luring Nelson away to the West Indies and back in his pursuit, he was blockaded by him at Cadiz, and in a desperate attempt to vindicate himself, gave battle to Nelson at Trafalgar in 1805, and was defeated. He was a prisoner in England until 1806. He stabbed himself fatally at Rennes, April 22, 1806.

Villeroi François de Neuville French soldier. He was born in Paris, April 7, 1644, was a great courtier and was made Marshal in 1693. Thoroughly incompetent, he was defeated in the Netherlands, in Italy—where he was taken prisoner by Prince Eugene—and again at Ramillies. Later he was made governor of Lyons, and died in Paris, July 18, 1730.

Villers-Cotterêts Town of the department of the Aisne, near Soissons. The Ordinance of Villers-Cotterêts (1539) substituted the use of French for Latin in legal procedure, and was the work of the magistrate, Guillaume Poyot. It had the effect of shortening legal work. The town was the birthplace of the older Dumas. There was fighting here during the retreat from Mons in 1914.

Villon François French poet. Born in 1431 at Paris, he passed his youth in extreme dissoluteness. Many legends have survived concerning him. His poems, *Les testaments*, strike a lyrical note rare in those times. In them are some delightful ballads and rondeaux. He died about 1463.

Vilna (or Wilno) Province and town of Poland separating Lithuania from West Russia.

A large and ancient town, capital of the province, Vilna is rich in historical association and possesses two cathedrals. It was formerly inhabited by the Lithuanians and, after being seized by Russia and Sweden, was ceded to the former in 1795 by the Partition of Poland. It was in 1831 and 1863 the seat of unsuccessful Polish insurrections against Russia. After the Great War the Lithuanians claimed the town, but the Poles, after some fighting, took possession of it. In spite of the efforts of the League of Nations to obtain a settlement the matter is still a source of friction. Vilna is the centre of the export trade of grain and timber. It has a broadcasting station (563 M., 16 kW.) Pop (1931) 197,049.

Vimy Ridge Battlefield of the Great War. Situated midway between Lens and Arras, Vimy Ridge played an exceptionally important part in the Great War. In early 1915 the French successfully opposed the Germans at Vimy. In 1916 a Canadian force, by dint of great bravery, took

possession of the ridge. This possession was extremely valuable during the stemming of the German onslaught in 1918.

Vincennes Town in northern France, in the department of the Seine. Its castle was once a royal residence, and later a prison in which Henry of Navarre, Condé and Mirabeau were at various times confined. Under Napoleon, the castle was converted into a powder magazine (See Vigny's famous story *La Peillee de Vincennes*).

A city of Indiana, U.S.A., is called Vincennes. It has an old university and was in 1778 captured by the British who renamed it Fort Sackville. Clark recaptured it in 1779.

Vincent Saint and martyr. He was a Huesca. In 304 he was put in prison, and at Valencia was tortured to death in 304 by the Roman governor. His feast is on Jan 22, in the Roman Catholic Church, but he is not in the English Calendar.

Vincent de Paul St. French ecclesiastic. He was born on April 24, 1576, at Pony, France. He was ordained priest in 1600. From 1604 to 1607 he served as a slave in Tunis, having been captured by pirates. On regaining his freedom, he returned to Paris and devoted himself to charitable works, appointing "Confrères de Charité" to serve in various French towns. In 1632 he founded the Mission of the Sisters of Charity. He died on Sept 27, 1660, and was canonised in 1739.

Vindictive British warship. A cruiser of 5700 tons, she was used in the attack on Zebruge on April 23, 1918, to carry the men who landed on the mole. Later, on May 10, she was sunk to block the channel leading into the harbour at Ostend. In April, 1920, the vessel was raised and afterwards broken up. A new *Vindictive*, also a light cruiser, but somewhat larger, was built to replace her.

Vine Climbing plant of the natural order *Vitaceae*. It has sturdy woody stems, which cling by means of tendrils to a wall or any other support. The large leaves have tooth-like edges and the small green flowers are clustered in racemes. The five petals are united above and below, so that the expansion of the stamens throws them off. The berries or grapes, contain hard seeds.

In colour the grape varies from dark purple to a very light green, almost white. There are many varieties, varying with the soil and other conditions of the particular district. The chief areas for growing the vine are the countries around the Mediterranean Sea, but it is also grown in Australia and South Africa, as well as in parts of America. In England and other countries it will grow under glass, although there are vines growing in the open in sheltered spots. Viticulture is most flourishing in the Rhineland in Germany, in the southern parts of France, in Italy, Spain, Portugal, Hungary, etc.

The vine requires a sunny position and a rich loamy soil dug to a depth of 3 ft. The plants should be out back each year and well fed with liquid manure. When grown under glass they should be planted in a rich loam mixed with lime rubbish and put in 6 ins apart. The fruit is liable to attack by an aphid called *phylloxera*.

Vinegar Sour liquid used for culinary and other purposes. It is acetic acid and is usually made in Great Britain from

malted barley, which is fermented. It can be made from alcoholic liquors and in Europe is made from white wine. In the United States it is made from cider. Fancy vinegars are made by adding tarragon, or chili, garlic or other substances. Aromatic vinegars, used medicinally, contain cinnamon, peppermint and the like.

In addition to its uses in cookery and with salads and fish, vinegar is a base in the manufacture of many sauces and is employed in pickling and for preserving meat and vegetables.

Vinegar Hill Hill in Co. Wexford, Irish Free State. It is near Enniscorthy and was the headquarters of those who rose in rebellion in 1798. They made their camp here and committed outrages in the surrounding country. The British troops surrounded them on June 21, and, after a hard fight, killed or dispersed them.

Vinegar Plant Term applied to a slimy gelatinous mass found on the surface of alcoholic fluids during fermentation. It is composed of filaments of bacteria and fungi which form a floating layer on the fluid. The action of these, the fungi *Mycoderma aceti* in particular, converts the alcohol into vinegar.

Vingt-et-Un Game of cards. It is played by two or more persons and the aim of each player is to get his score as near to 21 as possible without exceeding that number. It is played with the whole pack of 52 cards. The court cards count 10 each and an ace may count either 1 or 11 as its holder wishes.

Vint Card game. It is not unlike bridge. The full pack is used and the player making the highest call declares trumps. Each player bids for the deal independently and the one sitting opposite to the successful caller automatically becomes his partner. The suits rank spades, clubs, diamonds and hearts when calling, but in scoring all are equal. As in bridge there is a trump call but the scoring is somewhat different. See BRIDGE.

Vintage Yearly produce of grapes, the grape harvest. The term is used for the wine made from the grapes of a particular year, as when one speaks of the champagne vintage of 1888. In this sense it is much used by wine merchants.

Vintner Old name for a seller of wine. The Vintners Company is one of the twelve great livery companies of the city of London. It has an income of £15,000 a year. Its hall in Upper Thames Street, facing the Thames, was rebuilt in 1929.

Viol Musical instrument. It was the predecessor of the violin or little viol. Like it, the viol which has three, four, five or six strings is played with a bow.

Viola Musical instrument. To this large type of violin, the part between the bass and second violin is assigned in orchestration. Of its four catgut strings the third and fourth are covered with silver wire. It is tuned C (second space of bass staff), D, A, G, and is a perfect fifth lower than the violin, and an octave higher than the cello.

Violet Genus of herbs of the order *Violaceae*. They are perennials of low growth, seven species being British. The sweet violet, *V. odorata*, is found wild in southern and eastern England. The leaves are broad and heart shaped and the blossoms purple or white. Other varieties include the

dog violet, *V. canina* and *V. silvestris*, and the wood violet, whose leaves form a rosette round which the small flowering branches extend. The genus includes the heartsease or wild pansy, *Viola tricolor*, with blooms of purple yellow or white or a blending of these colours.

Violin Instrument of music. The modern instrument seems to be a development of the ancient viol, a bowed instrument, and owes much to the science and craftsmanship of the 16th, 17th and 18th century Italian schools, among which the Brescia and Cremona schools are the most notable. The variations of the sound holes represent the different styles of manufacture, but the superiority of the older violins is probably traceable not to superior wood, but to a secret method of preparing the varnish. Essential features of the modern instrument are the four strings, tuned in fifths, the bridge which was perfected by Stradivari, the catgut made from lamb's intestines and the bow, which is of Pernambuco wood or of American oak in poorer quality bows.

Violoncello Instrument of music. Similar in construction and in all its essentials to the violin, its name signifies small violone, yet it has nothing in common with the violone which has the flat back and sloping shoulders of the viol. The cello has four strings. It is tuned C, G, D, A, an octave lower than the viola, and rests on a spike between the performer's knees, when being played.

Viper Group of venomous snakes of the *Viperidae*, found in Europe, Africa and Asia. The British species is known as the adder (*g.v.*). True vipers (*Vipera*) have a characteristic flattened triangular head and relatively short, thick body. Russell's viper of India causes many deaths each year. The family includes also the rattlesnakes and other venomous species. The horned viper (*Cerastes*) of Africa, a small sand coloured species with short horn like projections above the eyes is reputed to be the "asp" of Cleopatra.

Viper's Bugloss (*Echium vulgare*) Annual or biennial herbaceous plant of the order *Boraginaceae*. The tall stem and the leaves are covered with short bristly hairs. The flowers are borne in a long panicle bearing short clusters of crowded blossoms. These are at first purplish red, changing to a vivid blue as the bloom expands. It grows wild in chalky and gravelly places.

Virchow Rudolf, German pathologist. Born Oct. 13, 1821, at Schivelbein, Pomerania, he studied medicine in Berlin, became lecturer at the university there in 1847, and later director of the Pathological Institute. His contributions to pathological science were unrivalled, and those to archaeology and anthropology equally great. He worked incessantly for the improvement of hospitals and asylums for adequate drainage and pure water, and took an active part in the municipal government of Berlin. He died Sept. 6, 1902.

Virginal Musical instrument. A form of harpsichord, it has one key and is oblong in shape. See HARPSICHORD.

Virgil Roman poet. P. Vergilius Maro was born on Oct. 15, 70 B.C. at Mantua, in Cisalpine Gaul. He had a thorough education and retired to his farm to write. This farm was seized after the Battle of Philippi, but given back to him by Octavian to whom

in gratitude he wrote the *Eclogues*. He was fortunate in the patronage of Maecenas and others whose munificence gave him the leisure to write the *Aeneid*, a supreme epic poem celebrating the glory of Rome and of the Julian house, and the *Georgics*, his most finished work. He died at Brundisium on Sept. 22, 19 B.C.

Virginia State of the U.S.A. It lies along the Atlantic Ocean, with Pennsylvania on the north and the Carolinas on the south, and covers 42,627 sq. m. The valley of Virginia, enclosed by the Alleghenies and the Blue Ridge range, is extremely fertile, as is also the central plain. Rivers include the Potomac, Rappahannock, York and James. There are many first rate harbours. Tobacco is very widely grown, as well as maize and other cereals. There are coalfields and granite and slate quarries, and profitable oyster fisheries. The capital is Richmond. The state was named after Queen Elizabeth, and contains the oldest European settlements in the country, the first permanent colonists landing there in 1607. It was one of the 13 original states of the Union and it retains many traces of English influence. It is governed by a legislature of two houses and sends two senators and 9 representatives to Congress. Pop. (1930) 2,421,851.

Virginia Creeper (*Vitis quinquefolia*) Hard climbing shrub of the order *Vitaceae*. American in origin. It is commonly grown on walls or houses. The leaves are large and green, turning in autumn to vivid scarlet and russet shades. *Ampelopsis rotunda*, a Japanese species, has smaller short stemmed leaves which adhere closely to any wall or support forming a compact thick covering.

Virginia Water Artificial lake in Windsor Park, also the name of a district in Surrey, with a station on the S. Ry. The lake, 1½ m. long, was made from marshland by order of the Duke of Cumberland in 1746. Near it is Fort Belvedere, the residence of the Prince of Wales.

Virgin Islands A group of 100 islands of the West Indies. The majority are barren, sandy or rocky, but maize, coffee, cotton, sugar and indigo are produced. Several are British, and the rest formerly belonged to Denmark and U.S.A. Denmark sold hers to U.S.A. in 1917. The principal town of the British Islands is Roadtown. They were discovered in 1494 by Columbus and named after S. Ursula.

Vischer Peter. German sculptor. He was born in Nuremberg in 1455, the son of an artist in bronze. Among his best known works are the tomb of Duke Ernest in Magdeburg Cathedral, the shrine of S. Sebald in Nuremberg, and the relief representing the coronation of the Blessed Virgin in Erfurt Cathedral. He died Jan. 7, 1529.

Visconti Famous family, which ruled over Milan for two hundred years. Ottone Visconti was appointed to the Archbishopric of Milan in 1262. He had to drive the rival family of Della Torre out of the city before he could take possession of the see. His nephew Matteo succeeded him. During the 14th century, there was much trouble between the Visconti and the Pope, but they were supreme in Milan, and Galeazzo II. made marriage alliances with Edward III. of England, and John of France. He was a patron of the arts, and established a university at Pavia.

Barnabo and Gian Galeazzo (1347-1402) succeeded him jointly. Gian, who was all-powerful, was made Duke of Milan by the Emperor Wenceslaus, and he founded Milan Cathedral. He was succeeded by his brother Filippo Maria, who died in 1447, the last of the male line.

Viscosity Term in physics applied to the property of matter in a fluid or gaseous state of resisting immediate change of shape or relative motion of its parts. This results, when viscosity is high, in a slow flowing movement of the fluid as in gums, oils and treacle. Liquids vary greatly in their degree of viscosity, which also varies according to the temperature of the substance. A special instrument known as a viscometer is used to measure the viscosity of petroleum, oils and other viscous liquids.

Viscount Title in the peerage of the United Kingdom. It originated in France when the *vicomte* was the deputy of the count. It ranks fourth in the peerage, between earl and baron, although it is the junior of all, as the first viscount was not created until 1446. The oldest existing viscounties are the Irish one of Gormanston dating from 1478, and the English one of Hereford from 1550. It has become the custom to bestow the title of viscount upon all cabinet ministers who are raised to the peerage.

Vishnu In Hindu mythology, a solar god, one of the Supreme Three, together with Brahma and Shiva, to-day he is often worshipped as the superior of Brahma. In Vedic books, he is represented as the youth who traverses the world in three strides the last of which is invisible to man. This symbolises the rising, culminating, and setting sun. To-day he is called the Preserver, and is represented with four arms, holding a conch, shell, discus and lotus, and riding upon the Garuda.

Visigoth Branch of the Goths. In the 2nd century the Goths divided themselves into two branches, east and west, called Ostrogoths and Visigoths. The latter moved westward and founded a kingdom in Spain, which lasted till 711. See GOTH.

Visitation Order of the Religious festival in the Roman Catholic and Greek churches. It is held on July 2 and commemorates the visit of the Virgin Mary to Elizabeth as recorded in the Gospels.

The visitation of the sick is an office in the Anglican church. It includes provision for special confession and absolution. The service for it is in the prayer book of the Church of England.

Visitor Literally one who visits. In a special sense it is used for a person who is authorised to visit a college or institution to see that it is properly managed. Thus each of the colleges at Oxford and Cambridge has its visitor and the judges of the high court are the visitors of the Inns of court. The office is mainly an honorary one, but an occasion for the visitor to exercise his authority may arise at any time. At Oxford and Cambridge the office is held in most cases by a bishop, but occasionally by a nobleman, the Earl of Pembroke is the visitor of Pembroke College, Oxford. Balliol College, Oxford, is the only college that has the right to elect its own visitor.

Vistula River of central Europe. Rising in Czechoslovakia, it flows

through Poland and Prussia and debouches at Danzig. It is about 650 m. in length, and floods freezing and shifting banks are a serious impediment to navigation. Formerly all German, the possession of the Vistula was a subject of legal dispute at the Treaty of Versailles. The campaign of the San Vistula was the scene of an unsuccessful attack by Falkenhayn on the Russian troops for the relief of Austria.

Vitamin Group of substances, present in various foods and indispensable to health and growth. Their composition and mode of action is not yet understood, but a number have been differentiated by their chemical and physiological action. Vitamin A, present in cod liver oil, eggs and liver of many animals and Vitamin B in lean meat, yeast eggs, wheat-germs, legumes, etc., are necessary for proper growth. Vitamin C, in green vegetables and citrus fruit juice prevents, or cures, scurvy. Vitamin D, also present in cod liver oil, is necessary for the proper calcification of bones, its absence causing "rickets."

Vitriol Comprehensive name for various metal sulphates. Zinc sulphate is white, copper sulphate blue and iron sulphate green vitriol. See SULPHURIC ACID.

Vittoria City of Spain. In the north of the country. It is 30 m. from Bilbao and stands on the River Zadorra. The chief building is the cathedral and there are others dating from the time when the city was a fortress. Pop. (1931) 40,942.

On June 21, 1813 the British troops under Wellington gained a decisive victory over the French here.

Vittorio Town of Italy. It gives its name to a battle fought near here in Oct., 1812, between the Italians and the Austrians and called the Battle of Vittorio Veneto. It was part of the Italian offensive and began on Oct. 23. By Oct. 31 the Austrians were in retreat.

Vitus Roman martyr. The son of a Sicilian pagan, he perished at Rome in the persecution under Diocletian. In the Roman Church his day is celebrated on June 15. His aid is invoked against various ailments, which include hydrophobia and chorea (St. Vitus' dance).

Viviani René, French statesman. Born at Sidi bel Abbès, Algeria, Nov. 8, 1863, he became a lawyer, and was elected Socialist deputy for Paris in 1893. In 1906 he became Minister of Labour. In June, 1914, Viviani became Premier and Minister for Foreign Affairs. While returning from Russia with Poincaré he heard of Austria's ultimatum to Serbia, and withdrew the French forces ten kilometres from the frontier to show his pacific attitude. He was succeeded in 1915 by Briand, but became Minister of Justice and in 1921 he accompanied Briand to the Washington conference. He was in full sympathy with the League of Nations. He died Sept. 7, 1925.

Vivien Character of the Arthurian legends. Vivien was a lovely enchantress, the mistress of the sorcerer, Merlin. She cast a spell over him, which took away his power, and imprisoned him in a thicket of thorns. She is sometimes called "The Lady of the Lake," because her palace was set in the middle of a magical lake.

Vivisection Operation performed on a living animal in the interest of medical advancement. The progress of

vivisection has been hampered by the propaganda of anti vivisection societies, despite the good work which vivisection has done. Since the 19th century, strict control has been exercised over vivisection, making licences and anaesthetics essential, though inoculations were the early method.

Vizier Name formerly used in Turkey and other Mohammedan countries for a minister of state. In Turkey, under the Sultan, the prime minister was known as the Grand Vizier.

Vladivostok Town of the far eastern area of Soviet Asia. It is situated on the Sea of Japan, on the opening known as Peter the Great Bay. The place derives its importance from the fact that it is the Pacific terminus of the Trans-Siberian Railway and from its possession of a good harbour. The town dates from 1860. During the Great War Vladivostok was used as a base for the Czechoslovak troops. Pop. (1930) 107,977.

Vocalion Name given to a type of harmonium. It was invented in the 19th century and was considered to possess greater purity and variety of tone than the ordinary harmonium.

Vodka Name of a spirituous liquor. It is made in Russia by distilling rye or potatoes. It is very potent and at times its manufacture and sale have been forbidden.

Voice Sound from the mouth, utterance or mode of utterance. It is used chiefly for sounds made by human beings in whom the tones of the voice differ, the voices of men being lower than those of women and children, the reason being that the vocal cords are longer. The training of the voice is a matter of great importance to singers and actors, to a lesser extent to clergymen, ministers and other public speakers, and to a good deal of attention is paid at training colleges.

Voil Loch or lake of Perthshire. It is in the hills, 3 m. from Balquhadder. It is 3½ m. long and the little river Balvag flows through it.

Volapuk Universal language. It was invented by a pastor, Johann Martin Schleyer, at Constance in 1879. It has a vocabulary of about 15,000 words, taken from Latin, English and the Romance languages. The alphabet consists of 26 letters, 8 being vowels and the rest consonants. It has only one declension and one conjugation, and most of the words are monosyllables.

Volcano An opening in the crust of the earth, through which super-heated matter is expelled, forming a hill with a crater. The chief volcanic centres are Italy and Sicily (Vesuvius, Etna, Stromboli), the southern Andes, Dutch East Indies and Japan. Volcanoes may be many years in repose, but the longer their repose the greater their violence in eruption. Bandai san in Japan, previous to its eruption in 1888, had lain dormant for 1000 years. Preparatory phenomena are earthquakes and detonations, and the eruptions are succeeded by dense clouds of vapour which may form brilliant sunsets and lava (a mud formed by steam and ash or else molten silicates).

Vole Genus of small herbivorous rodents of the *Arvicolidae*. Superficially like rats and mice they have distinctive peculiarities such as short hairy tails, blunt rounded snout, small ears and thick stony body, and

teeth adapted to their diet of plants, grain, etc. The field vole (*Microtus agrestis*) has a short tail, brown fur above and lighter beneath. It damages crops by its burrowing habits. The water vole, 8 ins long without its tail, has reddish or yellowish-brown fur and lives in a burrow beside a stream.

Volga Russian river. It is 2325 m in length, rises in the Valdai plateau, and enters the Caspian Sea at Astrakhan. Leningrad is now connected with the Volga by canal, and forms a much more important port than Astrakhan which is spoiled by sandbars. The Volga tends to destroy its banks and to flood. Steamers now ply between Leningrad and Astrakhan. The sturgeon, esteemed for its caviare, is found in the lower waters of the river.

Volstead Act Term popularly used for the act of Congress that in 1919 made the sale of intoxicating liquor illegal in the United States. It took the form of the 18th amendment to the constitution and is named after one of its promoters. There was a considerable agitation for the repeal of the Act and the abolition of prohibition in the middle of 1932.

Volt Unit of electromotive force or potential difference (electrical pressure). It is defined as the pressure which, applied to a conductor of 1 ohm resistance, will produce a current of 1 ampere. One volt \times one ampere = one watt. See AMPERE, OHM, WATT.

Voltaire François Marie Arouet de, French author, playwright and philosopher. Born at Paris on Nov. 24, 1694, he took the name of Voltaire at the age of 21. Educated by the Jesuits he soon became known in the literary world. He lived for a short time in England, and later visited Berlin, where he was for a period the close friend and counsellor of Frederick II. After quarrelling with the king he returned to France and spent the remainder of his life at Ferney on Lake Geneva.

As a playwright, his best known works are *Zaire*, *Méropé* and *Mohamed*. In verse his satires and epigrams are still remembered. His best history studies are those of Charles XII and of the age of Louis XIV. His stories, *Candide* and *Zadig*, and his long epic, *La Henriade*, are also famous.

As a philosopher, he fought against intolerance of all kinds, including religious bigotry. While not a democrat (he believed rather in enlightened despotism), he was a promoter of social reforms of all kinds. His style is an outstanding example of clarity, elegance and purity of expression. He died May 30, 1778.

Voltmeter Instrument used for measuring the amount of electrolytic decomposition produced by an electric current. It should be distinguished from a voltmeter, which is an instrument for measuring voltage.

Volunteer One who offers his services especially to bands of men who volunteered to undergo military training in order to serve their country in case of invasion or war. In England the first volunteers to bear the name were raised during the American War of 1778, and some fifteen years later they were again formed to resist a possible French invasion. The volunteer force proper was formed in 1859 and continued with increasing strength until 1908, when it was merged into the

territorials. The name persists in such organizations as the Naval Volunteer Reserve.

Volvox Genus of flagellate infusorians resembling algae, found in fresh water ponds. The protozoon exists as a colony of one-celled organisms in the form of a hollow sphere, mobile by reason of the two flagella borne by each individual. The sphere has a gelatinous covering through which the flagella protrude. The organisms secrete chlorophyll, and use this substance to manufacture starch in the same manner as plants.

Vomiting of Blood This may be due to internal injury, to poisoning by some corrosive, to varicose veins of the lower part of the gullet, or to disease of the stomach, such as cancer or ulcer.

Treatment—Keep the patient lying on his side, give no food or alcohol, and no ice to suck. Place an ice-bag on the pit of the stomach.

Remember that blood may have been swallowed, as in some cases of bleeding from the lung, and after an operation such as the removal of tonsils.

Voodoo Form of fetish-worship. It is prevalent among the West Indian and American negroes, especially those of Haiti, and is supposed to have been introduced from Africa by slaves. With it are associated snake worship, and obscene rites involving the use of human blood.

Voronoff Serge, Russian surgeon. Born July 10, 1866, he studied medicine in Paris, becoming chief surgeon in the Russian Hospital and later at the Military Hospital there. He is best known for his method of preventing or delaying senility by grafting healthy animal glands into the human body. Among his publications are *Thyroid Grafting and Life*, *The Study of Old Age* and *My Method of Rejuvenation*.

Vorticism A tendency in pre-war art. The vorticists originated in 1913 from a society which included P. Wyndham Lewis and the poet Ezra Pound. Their theory was that modern art should be based on the principles of an industrial civilisation, and that subjects should evolve from the artist's "vortex," or general conceptions of relations of ideas. Vorticism, which had much in common with futurism and cubism, has produced such artists as Lewis and J. Kauffman.

Vos Marten de, Flemish painter. Born in Antwerp in 1532, he spent some years in Rome and Venice, where he greatly benefited from Tintoretto's friendship. He painted several of the Medicci family and returned to Flanders a celebrity. His later works included several altar pieces, and the two triptychs "The Triumph of Christ" and "The Incredulity of St. Thomas." He died in Antwerp on Dec. 17, 1603. Many of his pictures were destroyed by the iconoclasts.

Vosges Mountains of central Europe, ranging 150 m along the west of the Rhine from Basle to Mainz. This well-wooded territory has much in common with the Black Forest region. The mountains are rarely more than 3000 ft., in them rise the Meurthe, Moselle, Sarre and Ill. Notably at Saverne, Ste Odile, etc., the scenery is very picturesque.

A department of France, in which vine-cultivation and arable farming flourish, is also

named Vosges Gerardiner is a famous summer resort, while Vittel and Contrexeville are notable for their mineral waters. Epinal is the principal town.

Vote Expression of a will or an opinion, especially at an election. Voting is sometimes done by show of hands, as at public meetings, but for important purposes, such as the election of members to parliament and county and other councils, it is done by ballot. Before 1870 open voting was usual at elections for members of parliament. Voting is usually for a man, but it may be a referendum for a cause, e.g., prohibition or Sunday closing.

Each country has its own laws stating who is entitled to vote. The privilege is confined to adults, and for long to men only, but in the 20th century many countries gave to women the right to vote.

A vote of credit is a grant of money by the House of Commons without knowing how it will be spent. Such are made in times of emergency, such as at the outbreak of a war. See ELECTION.

Vow Solemn promise or undertaking. It is chiefly used in a religious sense. There are examples in the Bible of the taking of vows to do a certain thing, and the custom was popular among knights and others in the Middle Ages. Many of them undertook to abstain from some pleasure, or even necessity, until they had performed a certain act. Members of the religious orders took vows of poverty, chastity and obedience, and those who enter these orders to day take vows. In the Church of England there is a difference of opinion as to whether vows of this kind should be recognised.

Vryheid Town of Natal. It is 290 m from Durban, on the railway line to Dundee. It is a mining centre especially for coal and iron ore. From 1884 to 1888 Vryheid was a little Boer republic. In 1888 it

was included in the Transvaal and in 1902 was transferred to Natal. Pop 3940.

Vrynwy Artificial lake in Montgomeryshire. It was made between 1890 and 1905 in order to supply Liverpool with water. The name is that of a river, a tributary of the Severn, which was used to make the lake. The lake is 5 m long and the water is taken for 68 m to Liverpool.

Vulcan Roman god of fire. It is very doubtful that he was the patron of smiths. Augustus' efforts to check the frequent disastrous Roman fires earned him the worship of the people as *Volcanus quietus augustus*. In places where much grain was stored Vulcan's worship became famous.

Vulcanite Modification of rubber. It is made by treating rubber with sulphur, the result being a hard, dark-coloured composition which has a number of commercial uses, especially as an electrical insulator. It is also known as ebonite.

Vulgate Latin version of the Bible. It was prepared by Jerome in the latter part of the 4th century at the invitation of Pope Damasus. In the New Testament the Vulgate was little more than a revision of the existing text, but the Old Testament version was an independent translation from the Hebrew into Latin. It was pronounced authentic by the Council of Trent for use in the Roman Church.

Vulture Name given to birds of prey of the families *Fulguridae* and *Cathartidae*, the latter being American. They resemble the eagles, but almost all have a bare head and neck. The beak is hooked. They feed on dead animals. The black vulture (*Fulvus monachus*) and the griffin vulture (*Gyps fulvus*), large birds of the Mediterranean region and S. Europe respectively, belong to the *Fulguridae*. Of the American family may be mentioned the condor and the turkey buzzard (*q v*).

W AAL Branch of the Rhine, flowing through the Netherlands. The Rhine divides near Arnheim, the Waal being the larger branch which flows through Gelderland and is joined by the Meuse and flows into the North Sea through several mouths. The chief towns on its banks are Nijmegen and Tiel.

Waddon District of Croydon. It is to the west of the borough, about 11 m from London, on the S Rly. Here is the chief air port of London and there are aerodromes, custom house, repairing shops and large landing grounds.

Wadebridge Urban district and market town of Cornwall. An agricultural centre, it stands on the estuary of the river Camel, 7 m north-east of Bodmin and 264 from London, by the G W Rly. Pop (1931) 2460.

Wages Money paid for work done. They may be paid by time or by output, i.e., piece work. The standard tends to fluctuate with the question of supply and demand, but no member of a trade union is supposed to work for wages below the minimum rate fixed by his union, lest he should undersell his fellows. In theory wages have some relation to the cost of living.

Wagga Wagga Town of New South Wales. An important junction on the Southern Main Railway, 314 m from Sydney and on the Murrumbidgee River, it is a business centre for the Riverina, one of the richest agricultural and pastoral districts, with good buildings and well-paved streets lined with avenues of trees. An agricultural show is held annually. Pop (1931) 9110.

Wagner Richard. German composer. Born at Leipzig, May 22, 1813, he took early to writing, but success did not reward him until he had experienced the most straitened circumstances. After he had found a friend in Ludwig II of Bavaria, he wrote in quick succession *Rienzi*, *Der Fliegende Holländer*, *Tannhäuser*, *Lohengrin*, *Der Ring des Nibelungen* (a tetralogy), *Tristan und Isolde*, *Die Meistersinger* and *Parsifal*, mainly legendary in theme. Wagner resided at Bayreuth for a time and died from heart failure at Venice, Feb 13, 1883. His importance in music is due to his dramatic style, while his harmony, which at first seemed discordant, has opened up the way to others, influencing strongly, for example, Strauss and Debussy.

Wagram Village near Vienna, Austria, which gave its name to the battle of Wagram, fought July 5 and 6, 1809, between Napoleon and the Austrians under the Archduke Charles. Napoleon concentrated all available cavalry, artillery and man-power for a final effort. Using the island of Lobau, on the Danube, as a fortress, and with the aid of his generals, Davout, Oudinot and Masséna, he split the Austrian army near Wagram, and won the battle, although with tremendous loss.

Wagtail Insectivorous, passerine bird (*Motacilla*) related to the pipits. It is almost entirely limited to the old world.

The tail is long and is in lively movement while the bird runs about. The yellow, grey and pied wagtails are common in Britain, the white wagtail is a migrant visitor.

Wahhabi Mohammedan sect. The Wahhabis are followers of Abū al-Wahhab, an Arab reformer who, at the beginning of the 18th century, taught the necessity of complete obedience to the Koran. In 1742 Mahommed Ibn Saud embraced the reform and set about spreading it, with the result that by 1804 the sect had established dominion over Arabia. Their power was broken by Mohemet Ali in 1818 and their chief executed. In the 20th century they came into prominence under the Saud (q.v.).

Waihi Town of New Zealand. In the North Island, it is 32 m from Thames, on the rly line to Auckland. It is famous for its gold mines. Pop 7000.

Waikato River of New Zealand. In the North Island, it is 200 m long. It flows through Lake Taupo, and is navigable for about 75 m, before it enters the Tasman Sea. On the river are some fine falls.

Wailing Wall Part of the western wall of the Temple Court at Jerusalem. The name is that given by Gentile observers of the Jewish ritual associated with this place. Part of the wall probably dates from the time of Solomon, and for centuries the place has been regarded by both Jews and Moslems as one of special sanctity. A dispute between these two rival claimants led to an outbreak of violence in Aug., 1929, which was settled by a League of Nations Commission.

Waimati Town of New Zealand. On the South Island it is 130 m from Christchurch. The industries include flour mills. Pop 1900.

Wainfleet Town of Lincolnshire. It is 5 m. S.W. of Skegness, and 127 m from London by the L N E Rly. William de Wainfleet, founder of Magdalen College, Oxford, also founded the grammar school here. Pop 2164.

Wakefield City, county borough and market town of Yorkshire (W R). It is also the capital of the West Riding. It stands on the Calder, 9 m. from Leeds, on the L M S and L N E Rlys. The buildings include the fine cathedral in the perpendicular style, the parish church until Wakefield was made the seat of a bishop in 1888. The grammar school dates from the 16th century, and on a bridge over the Calder is a beautiful chantry chapel. Chemicals, soap and beer are manufactured and there is a large trade in agricultural produce. Around are coal mines. Pop (1931) 59,115.

The Battle of Wakefield was fought between the Yorkists and the Lancastrians just outside the town on Dec 30, 1460. The Yorkists were defeated and Richard, Duke of York, and his son, Edward, were among the killed.

Wakefield Edward Gibbon. British statesman and colonist. Born May 20, 1796, he was educated at Westminster. After a period of service in the diplomatic service and a term of imprisonment for abduction, he took part in the colonisation of South Australia, went to Canada as secretary

to the Earl of Durham (1838), and played a large part in the colonisation of New Zealand. He wrote a book on capital punishment (1830), and a *View of the Art of Colonisation* (1849). He died May 18, 1862.

Wake Robin Perennial wild plant (*Arum maculatum*) familiarly known as jords and ladies, cuckoo pint or starchwort. The rootstock is tuberous, and the first leaves arrow-shaped and spotted with purple or black. The flower's stem bears a pale green folded wrapper which opens in the shape of a monk's cowl. This reveals a purple column round the lower part of which the minute flowers are arranged. As the plant withers, the flowers are succeeded by pale scarlet poisonous berries.

Walcheren Island of the Netherlands. It is in the estuary of the Scheldt and is about 13 m. long. It produces wheat and other cereals. Cattle are reared; the chief places on the island are Middelburg, Flushing and others, which are connected by railway with the mainland.

In 1809 a British expedition was sent to Walcheren, then in the possession of the French. It consisted of about 39,000 men commanded by the Earl of Chatham. They landed in July and captured Flushing, but fever broke out and the survivors were compelled to return before the end of the year.

Waldenses Religious sect. Founded by Peter Waldo, a Lyons philanthropist, about 1114, they denounced the Church of Rome and developed individualism. Persecuted, they disappeared from the South of France, and lived in the valleys of Piedmont, S.W. of Turin, for several centuries. They were later known as the Vaudois, and became absorbed in the general movement of Protestantism about 1532.

Wales Country or principality of Great Britain. It is to the west of England and has a long coast line on the Irish Sea and Bristol Channel. It is divided into 12 counties, six in North and six in South. Wales. Caernarvon and Cardiff are the capitals. It covers 7467 sq. m. For purposes of administration Monmouthshire, which is partly Welsh, is included in Wales.

Wales is famous for its scenery, especially its mountain scenery. In North Wales are Snowdon and other peaks over 3000 ft. high, with magnificent passes and lovely valleys between them. The rivers add much to the beauty of the district. Cader Idris in Merionethshire dominates another district of great beauty and here too, the rivers and lakes add much to the charm. In South Wales the mountains and river valleys of Cardiganshire, Brecknockshire and Radnorshire are in their way equally fine. Glamorganshire is an industrial district, but here too are landscapes of great beauty. Finally there is the romantic coast scenery of Pembrokeshire and Carmarthenshire.

Wales has many watering places. Llandudno, Rhyl, Aberystwyth, Barmouth, Tenby and Porthcawl are among the most popular, but there are many others. Inland are several spas, notably Llandrindod Wells. The rivers Severn and Wye rise in Wales and they pass into England, the shorter ones—Dee, Conway, Borey, Mawddagh, Teify, Towy, Taft, Ogmore and others are wholly Welsh. Bala is the largest lake. This country is served by the G.W. and L.M.S. Rlys. Pop. (1931) 2,247,391, of which 1,225,713 live in Glamorganshire.

The earliest recorded inhabitants of Wales were Celts, they were subdued by the Romans and the Normans, but not completely by any means and lived in their own way under their own princes for many centuries, carrying on constant war with their English neighbours. They were converted to Christianity in Roman times. In the time of Edward I Wales was really conquered by England and an English prince was made Prince of Wales. The native rulers disappeared and somewhat later the land was divided into counties. By the Act of Union (1536) English law was made current in Wales, and Welsh representatives were admitted to Parliament.

The Welsh have a language and literature of their own. In the 18th century there was a considerable revival of national feeling. Welsh is taught in the schools over a good part of Wales and a considerable proportion of the people speak both it and English. This national feeling has been kept alive by the Eisteddfod which has been held annually for at least 800 years.

The English Church was for long established in Wales, but in the 18th and 19th centuries the majority of the people became Nonconformists. As the result of a long agitation the church was disestablished and disendowed in 1920. It is now an independent organisation divided into six dioceses, S. Asaph, S. David, Llandaff, Bangor, Monmouth and Swansea and Brecon. The Archbishop of Wales is the primate and the synod is the governing body.

The University of Wales, founded in 1893, consists of colleges at Aberystwyth, Bangor, Cardiff and Swansea.

Wales Prince of See EDWARD

Walking Form of sport. It has been practised more in Italy than elsewhere. The earliest champion walkers were, however, Lerner and Webb of Britain. In England, the London Brighton Walk is still held yearly, and a host of clubs and competitions flourish. Keenness for walking has enjoyed a remarkable vogue in Britain since 1931, being familiarly known as hiking, but it had been for a long time a popular form of recreation in Germany.

Wallaby Species of small kangaroo (*q.v.*) from which it differs only in size and coloration.

Wallace Alfred Russel. English naturalist. Born Jan. 8, 1823, at Usk in Monmouth. He travelled extensively and formed his theory of evolution at the same time as Darwin (*q.v.*). On many points he differed from Darwin, particularly in regard to selection in animals. The "Wallace line" is an imaginary line drawn through the Malay Islands, to the north of which exist mammals widely differing from those of the south. Wallace died at Broadstone on Nov. 7, 1913. Among his many books are *Man's Place in the Universe* and *Social Environment and Moral Progress*.

Wallace Edgar. English journalist. Born in London in 1875, and brought up by a Billingsgate fish porter, he developed literary tastes while a soldier in S. Africa, and then became a war correspondent, and later dramatic and racing journalist in London. He had an unrivalled acquaintance with the criminal classes, and wrote 150 novels and 14 plays. He died Feb. 10, 1932, in Hollywood, California.

Wallace Sir Richard English art collector Born in London, July 26, 1818, he spent much of his life in Paris, where he made a wonderful collection of paintings, furniture, armour and bric-a-brac In 1871 he was made a baronet for services in the siege of Paris, where he died July 20, 1890 Lady Wallace (d 1897) bequeathed his collection to England It is housed in Hertford House, Manchester Square, London

Wallace Sir William Scottish national hero Born in 1270, he was outlawed for killing an Englishman in a quarrel, and gathering a desperate band round him, drove the English from Scotland in 1297 He was then made Guardian of Scotland and ruled wisely In 1298 he was conquered by Edward I at Falkirk, and in 1305 was treacherously handed over to the king, who had him executed, Aug 22, 1305

Wallachia Division of Rumania It lies between the Carpathians and the Danube, the Black Sea and Serbia, and has an area of 30,000 sq m. and a population of about 3,298,400 It was formerly a Danubian principality

Walleroo Seaport of S Australia Situated on Spencer Gulf, it is the port for a copper mining district and considerable export trade The chief industry is copper smelting Pop 4020

Wallasey County borough of Cheshire It stands on the south side of the estuary of the Mersey, and 206 m from London, on the LMS Rly A ferry service connects it with Liverpool It includes the seaside resorts of New Brighton, Seacombe, Egremont and Liscard and is a residential suburb of Liverpool Pop (1931) 97,465

Wallenstein Albrecht Wenzel Eusebius von German soldier and politician He was born in Bohemia, Sept. 15 1583 During the capture of Bohemia by Ferdinand II he secured territory which he made into his own realm of Friedland He was Ferdinand's most powerful supporter in the Thirty Years' War Ultimately, after attaining great power, he was suspected of treachery and dismissed in Jan, 1664, being assassinated on Feb 25

Waller Edmund English poet. He was born Mar 9, 1806 at Colehill, Buckinghamshire, and was educated at Eton and King's College, Cambridge He entered Parliament in 1826 and was a member of the Long Parliament until 1843, and sat in Parliament after the Restoration For his share in a plot to assist Charles I in 1643 he was fined £10,000 and banished, but was pardoned, and returned to England in 1651 He is chiefly known for the lyrics he wrote to the lady he called Sacharissa, who was Lady Dorothy Sidney He died Oct 21, 1687

Wallflower Perennial flowering plant (*Cheiranthus cheiri*) of the order *Cruciferae*. The original wild variety, introduced into England in the 16th century bears single yellow blooms and is found on ruined buildings in many parts of the country Cultivated varieties display every shade of red brown, gold, bronze and purple

Wallingford Borough and market town of Berkshire It is on the Thames, 15 m from Reading, and 51 from London by the GW Rly. There are remains of a castle, and a stone bridge crosses the river Here, in 1153, Stephen

concluded a treaty with Matilda, in which it was agreed that her son, afterwards Henry II, should succeed Stephen Pop (1931) 2840

Wallington With Beddington an urban district of Surrey It is 3 m S W of Croydon, on the S Rly See BRIDINGTON

Walloon Race found in certain parts of Belgium and N France Their language is a Romance dialect akin to modern French but possessing affinities with the Celtic group The Walloons are said to number three millions, and resemble their French more than their Flemish neighbours Many came to England as refugees from the Inquisition They carried on silk weaving and other industries and have a chapel in the crypt of Canterbury Cathedral

Wall Pennywort Herbaceous plant (*Cotyledon umbilicus*) of the order *Crassulaceae* The flowers are borne in a long spike of drooping, greenish white cup shaped blossoms Found on dry walls and rocky banks, it flourishes in Devon and the western counties of England

Wallsend Borough of Northumberland A colliery centre, it is 4 m from Newcastle and 272 from London by the LNE Rly The town is situated at the end of Hadrian's Wall, hence its name. Pop (1931) 44,582

Wall Street Street in New York It is in the older part of the city, near the end of the island Here is the stock exchange

Walmer Urban district and summer resort of Kent It is 3 m from Deal and 82 from London, on the S Rly The castle was built in the 16th century, and is the residence of the Lord Warden of the Cinque Ports Pop (1931) 5324

Walney Island and bathing resort of Lancashire It is 10 m long and about a mile wide In the centre is Vickerstown The island is part of the borough of Barrow-in-Furness

Walnut Tree (*Juglans regia*) grown in Britain since the 15th century From 40 to 60 ft in height, the massive stem has a smooth grey bark, which furrows and becomes rugged with age The head is wide and spreading with glossy green leaves, formed of a variable number of lance shaped leaflets A green fleshy case encloses the seed, or nut, in its hard, wrinkled shell The unripened fruits are used for pickling, and a fine oil expressed from the matured nut is employed in paint and varnish making The ripe nut of the walnut is a popular dessert fruit, and is much used in the making of sweetmeats It is also pickled for use at the table

The wood is valuable for furniture and cabinet-making, and was once employed for the fashioning of gun stocks

Walpole Horace English man of letters Born Sept 24, 1717, in London, fourth son of the 1st Earl of Orford, he travelled abroad, after leaving Cambridge, until 1741, and sat in Parliament from 1741-68 He bought a villa at Strawberry Hill near Twickenham in 1748, and rebuilt it as a Gothic mansion and museum He succeeded to the earldom in 1791, and was the author of *The Castle of Otranto* and many letters He died March 2, 1797

Walpole Hugh Seymour English novelist Son of George Walpole, Bishop of Edinburgh, he was born in

to the Earl of Darham (1838), and played a large part in the colonisation of New Zealand. He wrote a book on capital punishment (1830), and a *View of the Art of Colonisation* (1849). He died May 18, 1862.

Wake Robin Perennial wild plant (*Arum maculatum*) familiarly known as lords and ladies, cuckoo pint or starchwort. The rootstock is tuberous and the first leaves arrow-shaped and spotted with purple or black. The flower's stem bears a pale green folded wrapper which opens in the shape of a monk's cowl. This reveals a purple column round the lower part of which the minute flowers are arranged. As the plant withers, the flowers are succeeded by pale scarlet poisonous berries.

Walcheren Island of the Netherlands. It is in the estuary of the Scheldt and is about 13 m long. It produces wheat and other cereals. Cattle are reared the chief places on the island are Middelburg, Flushing and others which are connected by railway with the mainland.

In 1809 a British expedition was sent to Walcheren, then in the possession of the French. It consisted of about 39,000 men commanded by the Earl of Chatham. They landed in July and captured Flushing, but fever broke out and the survivors were compelled to return before the end of the year.

Waldenses Religious sect. Founded by Peter Waldo, a Lyons philanthropist, about 1114, they denounced the Church of Rome and developed individualism. Persecuted, they disappeared from the South of France, and lived in the valleys of Piedmont, S.W. of Turin, for several centuries. They were later known as the Vandols, and became absorbed in the general movement of Protestantism about 1532.

Wales Country or principality of Great Britain. It is to the west of England and has a long coast line on the Irish Sea and Bristol Channel. It is divided into 12 counties, six in North and six in South. Wales. Caernarvon and Cardiff are the capitals. It covers 7467 sq m. For purposes of administration Monmouthshire, which is partly Welsh, is included in Wales.

Wales is famous for its scenery especially its mountain scenery. In North Wales are Snowdon and other peaks over 3000 ft high, with magnificent passes and lovely valleys between them. In South Wales the mountains and river valleys of Cardiganshire, Brecknockshire and Radnorshire are in their way equally fine. Glamorganshire is an industrial district but here too are landscapes of great beauty. Finally there is the romantic coast scenery of Pembrokeshire and Carmarthenshire.

Wales has many watering places. Llandudno, Rhyl, Aberystwyth, Barmouth, Tenby and Porthcawl are among the most popular, but there are many others. Inland are several spas, notably Llandrindod Wells. The rivers Severn and Wye rise in Wales and they pass into England the shorter ones—Dee, Conway, Borey, Mawddagh, Teify, Towy, Taff, Ogmore and others are wholly Welsh. Bala is the largest lake. This country is served by the G.W. and L.M.S. Ryhs. Pop (1931) 2,247,391, of which 1,225,713 live in Glamorganshire.

The earliest recorded inhabitants of Wales were Celts, they were subdued by the Romans and the Normans, but not completely by any means, and lived in their own way under their own princes for many centuries, carrying on constant war with their English neighbours. They were converted to Christianity in Roman times. In the time of Edward I Wales was really conquered by England and an English prince was made Prince of Wales. The native rulers disappeared and somewhat later the land was divided into counties. By the Act of Union (1536) English law was made current in Wales, and Welsh representatives were admitted to Parliament.

The Welsh have a language and literature of their own. In the 18th century there was a considerable revival of national feeling. Welsh is taught in the schools over a good part of Wales and a considerable proportion of the people speak both it and English. This national feeling has been kept alive by the Eisteddfod which has been held annually for at least 800 years.

The English Church was for long established in Wales, but in the 18th and 19th centuries the majority of the people became Nonconformists. As the result of a long agitation the church was disestablished and disendowed in 1920. It is now an independent organisation divided into six dioceses, S. Asaph, S. Davids, Llandaff, Bangor, Monmouth and Swansea and Brecon. The Archbishop of Wales is the primate and the synod is the governing body.

The University of Wales, founded in 1893, consists of colleges at Aberystwyth, Bangor, Cardiff and Swansea.

Wales Prince of See EDWARD

Walking Form of sport. It has been practised more in Italy than elsewhere. The earliest champion walkers were, however, Lerner and Webb of Britain. In England the London Brighton Walk is still held yearly, and a host of clubs and competitions flourish. Keenness for walking has enjoyed a remarkable vogue in Britain since 1931, being familiarly known as hiking, but it had been for a long time a popular form of recreation in Germany.

Wallaby Species of small kangaroo (*qu*) from which it differs only in size and coloration.

Wallace Alfred Russel, English naturalist. Born Jan. 8, 1823, at Usk in Monmouth, he travelled extensively and formed his theory of evolution at the same time as Darwin (*qu*). On many points he differed from Darwin particularly in regard to selection in animals. The "Wallace line" is an imaginary line drawn through the Malay Islands, to the north of which exist mammals widely differing from those of the south. Wallace died at Broadstone on Nov. 7, 1913. Among his many books are *Man's Place in the Universe* and *Social Environment and Moral Progress*.

Wallace Edgar, English journalist. Born in London in 1875, and brought up by a Billingsgate fish porter, he developed literary tastes while a soldier in S. Africa and then became a war correspondent, and later dramatic and racing journalist in London. He had an unrivalled acquaintance with the criminal classes and wrote 150 novels and 14 plays. He died Feb. 10, 1932, in Hollywood, California.

Wallace Sir Richard English art collector Born in London, July 26, 1818, he spent much of his life in Paris, where he made a wonderful collection of paintings, furniture, armour and bric-a-brac In 1871 he was made a baronet for services in the siege of Paris, where he died July 20, 1890 Lady Wallace (d 1897) bequeathed his collection to England It is housed in Hertford House, Manchester Square, London

Wallace Sir William Scottish national hero Born in 1270, he was outlawed for killing an Englishman in a quarrel, and, gathering a desperate band round him, drove the English from Scotland in 1297 He was then made Guardian of Scotland and ruled well In 1298 he was conquered by Edward I at Falkirk, and in 1305 was treacherously handed over to the king, who had him executed, Aug 22, 1305

Wallachia Division of Rumania. It lies between the Carpathians and the Danube, the Black Sea and Serbia, and has an area of 30,000 sq m. and a population of about 3,298,400 It was formerly a Danubian principality

Wallaroo Seaport of S Australia Situated on Spencer Gulf, it is the port for a copper mining district and considerable export trade The chief industry is copper smelting Pop 4020

Wallasey County borough of Cheshire It stands on the south side of the estuary of the Mersey, and 206 m from London, on the L.M.S. Rly A ferry service connects it with Liverpool It includes the seaside resorts of New Brighton, Seacombe, Egremont and Liscard and is a residential suburb of Liverpool Pop (1931) 97,465

Wallenstein Albrecht Wenzel Eusebius von Gorman goldier and politician He was born in Bohemia, Sept. 15 1583 During the capture of Bohemia by Ferdinand II he secured territory which he made into his own realm of Friedland He was Ferdinand's most powerful supporter in the Thirty Years' War Ultimately, after attaining great power, he was suspected of treachery and dismissed in Jan., 1634, being assassinated on Feb 25

Waller Edmund English poet He was born Mar 9, 1606 at Colehill, Buckinghamshire, and was educated at Eton and King's College, Cambridge He entered Parliament in 1625 and was a member of the Long Parliament until 1643, and sat in Parliament after the Restoration For his share in a plot to assist Charles I in 1643 he was fined £10,000 and banished, but was pardoned, and returned to England in 1651 He is chiefly known for the lyrics he wrote to the lady he called Sacharissa, who was Lady Dorothy Sidney He died Oct 21, 1687

Wallflower Perennial flowering plant (*Cheiranthus cheiri*) of the order *Cruciferae* The original wild variety, introduced into England in the 16th century bears single yellow blooms and is found on ruined buildings in many parts of the country Cultivated varieties display every shade of red-brown, gold, bronze and purple

Wallingford Borough and market town of Berkshire It is on the Thames, 15 m from Reading, and 51 from London by the G.W. Rly There are remains of a castle, and a stone bridge crosses the river Here, in 1153, Stephen

concluded a treaty with Matilda, in which it was agreed that her son, afterwards Henry II, should succeed Stephen Pop (1931) 2840

Wallington With Beddington an urban district of Surrey It is 3 m S.W. of Croydon, on the S.Rly See BEDDINGTON

Walloon Race found in certain parts of Belgium and N France Their language is a Romance dialect akin to modern French but possessing affinities with the Celtic group The Walloons are said to number three millions, and resemble their French more than their Flemish neighbours Many came to England as refugees from the Inquisition They carried on silk weaving and other industries and have a chapel in the crypt of Canterbury Cathedral

Wall Pennywort Herbaceous plant (*Cotyledon umbilicus*) of the order *Crassulaceae* The flowers are borne in a long spike of drooping, greenish white cup shaped blossoms Found on dry walls and rocky banks, it flourishes in Devon and the western counties of England

Wallsend Borough of Northumberland A colliery centre, it is 4 m. from Newcastle and 272 from London by the L.N.E. Rly The town is situated at the end of Hadrian's Wall, hence its name Pop (1931) 44,582

Wall Street Street in New York It is in the older part of the city, near the end of the island Here is the stock exchange

Walmer Urban district and summer resort of Kent It is 3 m from Deal and 82 from London, on the S.Rly The castle was built in the 16th century, and is the residence of the Lord Warden of the Cinque Ports Pop (1931) 5324

Walney Island and bathing resort of Lancashire It is 10 m long and about a mile wide In the centre is Vickerstown The island is part of the borough of Barrow-in-Furness

Walnut Tree (*Juglans regia*) grown in Britain since the 15th century From 40 to 60 ft in height, the massive stem has a smooth grey bark, which furrows and becomes rugged with age The head is wide and spreading with glossy green leaves, formed of a variable number of lance shaped leaflets A green fleshy case encloses the seed, or nut, in its hard, wrinkled shell The unripened fruits are used for pickling, and a fine oil expressed from the matured nut is employed in paint and varnish making The ripe nut of the walnut is a popular dessert fruit, and is much used in the making of sweetmeats It is also pickled for use at the table The wood is valuable for furniture and cabinet-making, and was once employed for the fashioning of gun stocks

Walpole Horace English man of letters Born Sept 24, 1717, in London, fourth son of the 1st Earl of Orford, he travelled abroad, after leaving Cambridge, until 1741, and sat in Parliament from 1741-68 He bought a villa at Strawberry Hill near Twickenham in 1748, and rebuilt it as a Gothic mansion and museum He succeeded to the earldom in 1791, and was the author of *The Castle of Otranto* and many letters He died March 2, 1797

Walpole Hugh Seymour English novelist Son of George Walpole, Bishop of Edinburgh, he was born in

Auckland N Z, March 13, 1884, and educated at King's School, Canterbury, and Cambridge. He served with the Russian Red Cross in the Great War, and was awarded the C B E. His first book, *The Wooden Horse*, appeared in 1903. It has been followed by many others: the favourites probably being *Mr Perrin and Mr Trull*, *The Dark Forest*, *Jeremy*, *The Cathedral*, *Rogue Herries* and *Judith Paris*. *The Cathedral* was dramatised. In 1932 he published *The Fortress*.

Walpole Sir Robert English statesman. Born Aug 26, 1676, and educated at Eton and Cambridge, he entered Parliament in 1701 and became Secretary for War in 1708. On the accession of George I, he was appointed Chancellor of the Exchequer. Out of office from 1717 to 1721, his handling of the crisis occasioned by the South Sea Bubble (qv) brought him back to power. For the next 21 years he was virtually Prime Minister (though the name was not then in use), directing policy and presiding over the cabinet. His Whig principles secured him the support of the Whig landowners, his policy of peace ensured that of the commercial classes. His geniality and commonsense gained him the support of Parliament, which he further secured by bribery. He had, however, to withdraw his only important measure the Excise Bill of 1733, owing to its principles being misunderstood. He was opposed to the War of Jenkins's Ear and to English participation in the Austrian Succession War, and resigned in 1742. Created Earl of Orford, he died March 18, 1745.

Walpurga English saint. Daughter of a king of the West Saxons, she went as a missionary to Germany, and in 754 became abbess of the Benedictine nunnery at Heidenheim. After her death, about 780, her relics were laid in a cave, whose rock afterwards exuded an oil regarded as miraculous against disease. A church was built there, and became a place of pilgrimage. Walpurgisnacht is the name given to the eve of St Walpurga's day, which is celebrated on May 1. On this night, which coincided with an old pagan festival, witches were supposed to meet on the mountains, especially the Brocken (qv).

Walrus Large marine mammal. It is allied to the seals and has a round head, small eyes, no external ears and a heavy body. It is characterised by the prolongation of the upper canine teeth into tusks. The walrus inhabits the N polar regions in small herds. Its flesh is eaten by the Eskimos, and the oil, hide and ivory are commercially valuable.

Walsall County, borough and market town of Staffordshire. It is 8 m from Birmingham and 121 from London by the L M S Rly. The town has long been noted for its saddlery, other industries are the manufacture of hardware and coal mining. It sends one member to Parliament. Pop (1931) 103,102.

Walsingham Town of Norfolk. It is on the River Stiffkey 5 m from Wells, on the L N E Rly. The parish church is a beautiful building, but the place is best known for its ruined priory, dedicated to Our Lady of Walsingham, a popular shrine in the Middle Ages.

The title of Baron Walsingham has been held since 1780 by the family of de Grey Thomas.

Walsingham Sir Francis English statesman. Born at Chislehurst about 1530, and educated in Cambridge and abroad, he soon attracted the notice of Burghley, who sent him on various diplomatic missions. So successful was he in these, that Burghley recommended Eliza, both to appoint him one of her secretaries of state. He was an enemy of Mary Queen of Scots. He intercepted many of her letters, and had his spies among her entourage. His activities probably prepared the way for her execution. Knighted in 1577, he died in indigence, April 6, 1590.

Waltham Holy Cross Urban district of Essex, also called Waltham Abbey. It is 13 m from London on the L N E Rly. The chief building is the church of the old abbey founded here in 1060. The industries are brewing and flour milling. Pop (1931) 7,116.

Waltham Cross District of Hertfordshire. About 13 m from London on the L N E Rly, it possesses one of the five crosses erected by Edward I to commemorate the resting places of the body of Queen Eleanor on its way to burial in Westminster Abbey.

Walthamstow Borough of Essex. It is on the L M S and L N E Rlys, and is a residential suburb of Greater London. It has been a borough since 1929. Pop (1931) 132,965.

Walton Isaac. 'The Father of Angling'. He was born at Stafford, Aug 9, 1593, and after 20 years in business as a linen draper in London, retired in 1614. He married in 1626, Ann Kon through whom he formed many friendships among the English clergy. His most famous work, *The Compleat Angler or The Contemplative Man's Recreation*, was published in 1653. A later edition (1676) contained Charles Cotton's *Second Part of the Compleat Angler*. Walton also wrote *Lives of Donne, Wotton, Herbert* and others. He died Dec 15, 1683.

Walton Heath District of Surrey. Its station is Tadworth, 23 m from London by the S Rly. Walton Heath has a golf course, and at the village of Walton on the Hill is an old church.

Walton-le-Dale Urban district of Lancashire. It is 2 m from Preston, 230 from London by the L M S Rly, and stands on the Ribbles. It is a centre of the cotton industry and has market gardens. Pop (1931) 12,718.

Walton-on-Thames Urban district of Surrey. It is 5 m from Kingston, on the S Rly. Besides its attractive position on the Thames, it has a famous golf course. Pop 14,647.

Walton-on-the-Naze Urban district and seaside resort of Essex. It is 7 m from Harwich and 70 m from London by the L N E Rly. Its importance has been reduced by the inroads of the sea, and in 1798 the parish church was destroyed by the tides. It is a popular seaside resort. Near is Walton Mere, a noted resort of wild duck. Pop (1931) 30,666.

Waltz Round dance. Originating in Germany it was introduced in the 18th century into France, and into England

in 1812. At first much ridiculed, it became very popular, and has survived to the present day, with some variations in time and movement. It is written in 3 time. The most famous waltz composers were the Viennese composers, Johann Strauss and his brothers.

Walvis Bay Bay and port on the W coast of Africa, 725 m from Cape Town. An area of 374 sq m round the bay became British in 1878, and was annexed to Cape Colony in 1884. It now forms part of S.W. Africa under the Union of S. Africa.

Walworth District of S.E. London. It forms part of the borough of Southwark. The Browning Settlement is in York Street. Walworth is said to have been the birthplace of Sir William Walworth (d. 1385), the Lord Mayor of London, who, with John Standwick, killed Wat Tyler.

Wampum Small bead made of shell. They are used by the American Indians as money or as ornaments.

Wandering Jew Legendary character who is doomed to wander until Christ comes again. According to one of the old stories, he is thus punished because, as Jesus passed him bearing the cross, he said, "Get on! Faster!" whereupon Jesus replied "I am going, but thou shalt wait until I come again." The legend is embodied in a romance by Eugène Sue and a play by Mr Temple Thurston.

Wandle River of Surrey. It rises near Mitcham and flows through Croydon to join the Thames. Its length is about 11 m.

Wandsworth Borough of the county of London. It covers an area of 141 sq m, and owes its name to the river Wandle on which it stands. It has a fine common of 183 acres, and a park of 204 acres opened in 1903. Wandsworth Prison dates from 1851. A bridge built in 1873 provides a roadway to Fulham. There is a Huguenot burial ground at East Hill dating back to the time when Wandsworth was a haven for refugees of that faith. It sends five members to Parliament. Pop. (1931) 353,101.

Wanganui River and town of North Island, New Zealand. The river rises on Mt. Tongariro and flows into Cook Strait. Small craft can sail up some 140 m of its 200 m course. The town is situated 4 m from the mouth of the river, 134 m from Wellington. It exports local agricultural produce. Pop. (1932) 27,800.

Wangaratta Town of Victoria, Australia. It is situated at the junction of the Ovens and King rivers, 145 m by rail from Melbourne. The centre of a fruit district, it has an agricultural show-ground and is the headquarters of an Anglican bishopric. Pop. 3500.

Wanstead Urban district of Essex. It is served by the L.M.S. and L.N.E. Ryys, and lies on the borders of Epping Forest. It has a park of 200 acres, with lakes and a heronry, secured by the city corporation in 1880. Pop. (1931) 15,297.

Wantage Urban district and market town of Berkshire. It is 60 m from London and 26 from Reading, and has a station called Wantage Road on the G.W. Ry. The parish church has some features of great interest. In the market place is a statue of Alfred the Great, who was born

here. The town has an agricultural trade. Pop. (1931) 3424.

The title of Baron Wantage was borne by Robert James Loyd Lindsay. He won the V.C. in the Crimea and was M.P. for Berkshire, 1865-85. In 1885 he was made a peer, but his title became extinct when he died, June 10, 1901.

Wapiti Deer (*Cervus canadensis*) found in N. America. It is larger than the red deer and has very fine antlers. It frequents low ground or woody districts near marshes. The hide makes excellent leather.

Wapping District of London. It is on the N. side of the Thames in the borough of Stepney, and its industries are connected with the docks. The Thames tunnel goes from here to Rotherhithe.

War Great International struggle which raged nearly all over the Old World between Aug., 1914, and Nov., 1918. It began with Austria's attack on Serbia in July, 1914, following the murder of the Archduke Francis Ferdinand at Sarajevo. Russia came to the help of Serbia, and Germany to that of Austria. War was then declared on France, as Russia's ally, and the invasion of Belgium brought Great Britain into the struggle. Germany and Austria, a little later, secured the aid of Turkey and then of Bulgaria, and these four countries formed the group called, from their geographical position, the Central Powers.

France, Russia and Great Britain, the three strongest members of the group called the Allies, with Belgium and Serbia on their side, were also joined by Japan and Italy in 1915, and by Rumania in 1916. Another ally was Portugal, and the last to join the group was the United States in April, 1917. The struggle was on an unprecedented scale. Probably 30,000,000 men were under arms at the same time, and money and munitions were expended to an extent hitherto regarded as impossible.

The main theatres of war were in Europe where, on the Western Front, France and Great Britain confronted Germany, while on the Eastern Front Austria and Germany confronted Russia. The operations on the Italian frontiers may be regarded as an extension of the Western Front, and those in the Balkans, including the Salonika campaign, as an extension of the Eastern one. The Turkish Empire afforded two other theatres, the Gallipoli Peninsula and Mesopotamia. Elsewhere, attacks were made on Germany's colonial possessions. Japan captured Kiao Chow, and those in Africa and the South Seas were taken by the British, including Australian and South African forces, with aid from the French and Belgians. Only in German East Africa was the struggle prolonged or uncertain.

Second in importance only to the struggle on the Western Front was the command of the sea by the British and Allied fleets. Without this the transport of troops and munitions to the various areas would have been impossible. The German fleet was penned in its harbours from which it could only emerge occasionally and by stealth for raids on the British coast, and German ports were successfully blockaded.

On the other hand, the German fleet was not destroyed, nor were its harbours attacked. It remained in being even after the indecisive Battle of Jutland, the one major naval engagement of the war, and this fact had an important bearing on the course of the war. The submarine campaign conducted by the Germans against Allied shipping caused serious losses and grave

anxieties, especially in 1910 and 1917, only narrowly failing to achieve its purpose.

Each year of the struggle had its own features. In 1914 the Germans nearly reached Paris, and the Russians invaded East Prussia and Austria, but both advances were driven back after the opening battles. The chief engagements were on the Marne and the Aisne in the west and Tannenberg in the east.

In the west 1915 was a year of trench warfare, with trenches stretching from the Belgian coast to Switzerland. Attacks were made by the British at Noye Chapelle and Loos, while the Germans attacked, as in 1914, at Ypres. The British landed on the Gallipoli Peninsula, but withdrew before the end of the year. From India an army was sent to Mesopotamia, but this campaign also failed, though not so completely as that at Gallipoli. Russian successes proved only temporary, and Poland was overrun by Germany. Serbia suffered a like fate while Italy's attacks on Austria produced small results.

Events of 1916 included the costly British attack known as the Battle of the Somme, the desperate fighting between the French and Germans for the possession of Verdun, and the German conquest of Rumania. Russia was weakening, Italy was making no progress, and the British suffered a serious reverse at Kut in Mesopotamia. Meanwhile the submarine war was being ruthlessly carried on, and allied shipping was suffering severely.

On land the stalemate seemed complete when 1917 opened. The fierce and costly fighting in the west led to no definite result. The year's main events were the entry of the United States into the war and the collapse of Russia, which after a last desperate offensive in July, made peace with Germany at Brest Litovsk early in 1918. After the Italian defeat at Caporetto, British and French troops were sent to that country. The British, however, regained the upper hand in Mesopotamia, and Allenby entered upon his successful campaign in Palestine.

Early in 1918 the Germans in a last offensive, defeated the British at St. Quentin, and drove back the French to Paris as in 1914, but with American armies in the field a marked change was soon seen. In a series of battles the Allies drove the Germans from the ground they had held for years in France and Belgium, until they were in a position to invade the enemy country. At the same time the Italians defeated the Austrians, the Turkish armies were routed everywhere, and the advances from Salonika crushed the Bulgarians. The enemy on 11 Nov. 1918, Terms of peace were arranged in Paris and embodied in the Treaty of Versailles and in other treaties. See AISNE, ARRAS, CAMBRAI, GALLIOLI, JUTLAND, LOOS, MARNE, MONS, NOUVE CHAPELLE, SOMME, TANNENBERG, VERSAILLES.

War of 1812 War fought between England and the U.S.A. The war, declared by Congress, June 18, 1812, was caused by the rigorous exercise on the part of Britain of her rights of search (under Canning's Orders in Council, 1807) over neutral (in this case American) vessels. At sea the Americans were generally successful, but not in the famous duel between the Shannon and the Chesapeake, June, 1813, while three expeditions against Canada were complete failures. In 1814 a British force under Ross captured Washington and burnt the White

House, but a second contingent under Pakenham was repulsed at New Orleans in Jan., 1815, by Andrew Jackson with great loss. The peace previously concluded by the Treaty of Ghent (Dec., 1814) did not appear to give the victory to either side.

Waratah Australian shrub (*Telopea speciosissima*) of the order *Proteaceae*. It is one of the national emblems of Australia. The tubular crimson or scarlet flowers are borne in terminal clusters.

Waratah Town of New South Wales. On the N. Riv., 4 m. from Newcastle of which it is a suburb, and 107 m. from Sydney, it is a popular residential area. Steel works employ many thousands. Fruit is grown in the surrounding district.

Waratah Town of Tasmania. About 90 m. due W. of Launceston and about 120 m. by rail, it was formerly the centre for the tin mines at Mt. Bischoff, now almost abandoned.

Warbeck Perkin. Native of Tournai who posed as Richard, Duke of York, the younger of the princes said to have been murdered in the Tower by Richard III. Recognised by Charles VIII. of France, and supported by the emperor Maximilian, he landed in Kent in 1495 and was accepted at the Scottish court by James IV. Surrendering at Beaulieu Hampshire, in 1498, on a promise of pardon, he was imprisoned. He escaped, was retaken and hanged at Tyburn, Nov. 23, 1499.

Warbler Insectivorous bird of the family *Sylviidae*, related to the thrushes. Among British species are the garden warbler (*Sylvia hortensis*), Dartford warbler (*Melospiza or S. undata*), white-throat (*S. communis*), blackcap (*S. atricapilla*), chiffchaff (*Phylloscopus rufus*), wood warbler (*P. sibilatrix*), reed warbler (*Acrocephalus streperus*), sedge warbler (*A. phragmitis*).

Ward Term used for a person under 21 who is in the guardianship of some older person. Orphans who have inherited money are usually wards. See GUARDIAN.

Ward In England and Wales a division of a city borough or urban district. It sends representatives to the council, each ward usually electing three members. The wards were created when the boroughs were reformed in the 19th century, except in the city of London where they are old and bear old names, e.g., Candlewick and Portsoken.

Ward *Artemus* Pen name of Charles Farrar Browne, American humorous writer. He was born at Watford, Maine, April 26, 1834. In 1858 he published a description of an imaginary menagerie in the *Cleveland Plaindealer*. He followed this with a series of humorous letters, remarkable for their quaint spelling and the sound sense hidden under a comic style. He then spent three years as a lecturer and panorama showman, and coming to England in 1866, died there March 6, 1867.

Ward Sir Joseph George New Zealand statesman. Born in Melbourne, April 26, 1837, he entered politics in 1887 as Liberal member for Awarua. He held office in the departments of customs, industries and commerce, marine, railways, was Postmaster-General and Colonial Secretary, 1899-1906, Prime Minister, 1906-12, Minister of Finance in the National War Cabinet, 1915-19, and

represented New Zealand at the Peace Conference, 1919. Created a baronet in 1911 he was again Premier, Dec., 1928-May, 1930. He died July 8, 1930.

Ward Mary Augusta English novelist. Born June 11, 1851, at Hobart, Tasmania, in 1872 she married Thomas Humphry Ward. She began by writing for *Macmillan's*, and then wrote a children's story, *Milly and Olly*, 1881 followed by *Miss Bretherton*, 1884 and a translation of Amiel's *Journal Intime*, 1885. Later she wrote the three novels for which she is most famous, *Robert Elsmere*, 1888, *David Grieve*, 1892, and *The Marriage of William Ashe*, 1905. She founded the Passmore Edwards Institute, now known as the Mary Ward Settlement, in Tavistock Place, London, W.C., and died March 24, 1920.

Warden Word often used to denote a watchman or guardian, but used in England also for a head official, e.g., warden of a university settlement or of a college. The chief officer of the Stannaries of Cornwall has the title of Lord Warden, as has the Governor of Dover Castle. In mediæval times the lords warden were powerful nobles who guarded the English borders against Scotland and Wales.

Wardmaster Officer in the royal navy. A few are commissioned officers and others warrant officers.

Ward Room Room in a battleship used by the senior officers for meals, etc. The captain takes his meals in his own cabin, but the other officers down to the lieutenants use the ward room. Junior officers use the gun room.

Ware Urban district of Hertfordshire. It is 2 m. from Hertford, on the River Lea and on the L.N.E. Rly. There is a Roman Catholic training college, St. Edmund's. The town has breweries and brickfields, and a considerable trade in malt. The Great Bed of Ware, formerly at the Saracen's Head Inn, has been removed to Rye House near Hoddeston. Pop. (1931) 5949.

Wareham Borough of Dorset. It is on the Frome 10 m. from Poole and 121 m. from London, on the S. Rly. The churches of S. Mary and S. Martin are both old, and in S. Mary's is the coffin of Edward the Martyr. There are some ancient British earthworks. Pop. 2057.

War Graves Burial places of those who fell in the World War. The largest number are in France, others being in Belgium, Italy, Greece, Egypt and Palestine. The War Graves are cared for by a permanent commission, and each country has set aside a sum to provide for their maintenance.

Warkworth Village of Northumberland. It is 32 m. from Newcastle, on the L.N.E. Rly. There are extensive ruins of an old castle of the Percys; these include the Lion Tower, the great hall and the chapel. The church is Norman. An old bridge crosses the river to Ambie, on it is a fortified gateway.

Warminster Urban district and market town of Wiltshire. It is 9 m. from Trowbridge, stands on the Wylye and is served by the G.W. Rly. It is an agricultural centre, and has some small manufactures. The church of S. Denys is of interest. Pop. (1931) 5176.

Warmley Village of Gloucestershire, on the Somerset coalfield, 5 m. from Bristol and 123 m. from London.

War Museum Collection in London illustrating the Great War. It was opened in 1920 at the Crystal Palace, and in 1924 was removed to Imperial Institute Road, S. Kensington, and in the winter of 1935-36 to Lambeth Road, S.E. 1. It includes naval and military trophies and relics, ordnance, small arms and ammunition, ships and other models, works of art and photographs. There is also a library of 60,000 books.

War Office Department of the British Government. It is responsible for the control of the army. Its head is the Secretary of State, who is a politician and a member of the Cabinet. He is assisted by a parliamentary, a financial and a permanent secretary, as well as by a large military and civilian staff. Established in the time of Charles II., it has been several times reorganised, notably in 1903. Originally at the Horse Guards in Whitehall and then in Pall Mall, it is now in a new building in Whitehall completed in 1906.

Warrant Legal document which gives a person power to perform an act, or alternatively a document giving a person authority to fill an office or function. Much of the government of the country was carried out by Royal Warrant in the days when the king's power was greater and not accurately defined. There exist also Judicial Warrants, giving power of arrest and detention before trial, seizure of property, search of houses and buildings. Financial and Commercial Warrants are used by the National Treasury and many big business houses for payment of dividends. Appointments by Warrant are made in the services. Officers appointed by warrant and not by commission are termed "warrant" officers.

Warrant Officer Class of officer in the British navy and army. They are appointed to their position by warrant. In the navy they rank between the commissioned officers and the men, and are electricians, engineers, masters-at-arms, shipwrights, telegraphists, ward-masters, writers and others. In the army, regimental sergeant majors and master gunners are usually warrant officers. There are also warrant officers in the air force.

Warrenpoint Seaport and urban district of Co. Down, N. Ireland. It is on Carlingford Lough 6 m. from Newry. Steamers run from here to Liverpool. Pop. 1900.

Warrington County borough and market town of Lancashire. It stands on the Mersey, 18 m. from Liverpool and 182 m. from London, and is reached by the L.M.S. and C.L. Rlys. The fine old parish church contains some interesting memorials and the town hall was once a manor house. Cotton, hardware, soap and glass are among the manufactures. Pop. (1931) 79,322.

Warrnambool Town and seaport of Victoria. It is 166 m. by rail from Melbourne. It has a good harbour. Shipping is the chief industry. Pop. (1931) 8,200.

Warsaw Capital of Poland. It is picturesque placed on the left bank of the Vistula, about 400 m. E. of Berlin. The religious, as well as the political capital, it has a Roman Catholic and a Greek Orthodox archbishop. The walls which surround the city are entered by eleven gates. Among the

many fine churches are the Roman Catholic Cathedral of St John, dating from the 13th century, the Lutheran Church and those of Holy Cross and St Andrew.

The Orthodox Alexander Nevski cathedral, a modern building begun in 1894, was pulled down after the Great War. The university, which dates from 1861, has a fine library. There is a large Jewish colony in the suburb of Praga. Warsaw superseded Cracow as the Polish capital in 1609. It is an important industrial centre, wool and woollen goods being the chief manufactures. There is railway communication with Vienna, Leningrad, Moscow and elsewhere. It has two broadcasting stations (1411 M, 120 kW, and 214.3 M, 1.9 kW). Pop (1931) 1,178,211.

Wart Papillary growth of the skin in children. The flat variety occurs mostly in the long, pendulous variety occurs on the chin, neck, or scalp of adults. Warts may appear in crops, suddenly, and as suddenly disappear. In adult life they are sometimes due to repeated irritation, and are often of a tubercular or cancerous origin. Treatment is by some caustic such as glacial acetic acid, applied once daily on the pointed end of a match, or by X-rays.

Wartburg Hill in Thuringia. It is a castle, until 1918 a residence of the Duke of Saxe-Weimar. In the original castle, built about 1200 was held the famous contest of the Minnesingers described in *Tannhäuser*. In 1521 Luther found a refuge here.

Wart Disease Disease which attacks potatoes, affecting both tubers and leaves. Large excrescences, resembling cauliflowers, are formed which gradually become quite black. Small blackish warts appear near the eyes of the younger tubers, increase in size and sometimes completely cover the potato. The spores may lie dormant in the soil for four or five years.

Wart Hog Genus of African pigs (*Phacochoerus*) with two species. The boar has four large tusks, and at each side of the face are large wart-like pads. *P. africanus* is found over most of the continent. *P. aethiopicus* in the SE regions.

Warwick Borough and market town of Warwickshire, also the county town. It is 21 m. from Birmingham and 98 from London, and is reached by the G.W. and L.M.S. Ry., the latter station being at Milverton. The chief building is the castle built in the 14th century, one of the most perfect existing specimens of its age. A seat of the Earl of Warwick, it possesses a priceless collection of works of art and stands in a large park. St Mary's Church, a fine building with a lofty tower, contains the Beauchamp Chapel with its famous tombs. Leicester's hospital an almshouse of the 14th century, is regarded as one of the finest of its kind in the country. Two of the town gates, each with a chapel, still stand. Leamington and Gny's Cliffe are beauty spots near. Pop (1931) 13,459.

Warwick Earl of English soldier called the King Maker. Born Nov 22, 1428, son of Richard, Earl of Salisbury, Richard Neville became Earl of Warwick by his wife's inheritance. For his success at the battle of St. Albans (1455) he was rewarded with the captaincy of Calais. At Northampton (1460) he took Henry VI prisoner, placing Edward IV on the throne in

1461. In 1464, Edward married secretly, in opposition to Warwick, who ultimately was forced into revolt. In 1470 he landed from Calais with the Lancastrians, and restored Henry VI to the throne, but the next year Edward returned, and Warwick was killed at Barnet, April 14, 1471.

Warwickshire County of England. In the centre of the country, it covers 902 sq. m. Warwick is the county town, but Birmingham is much the largest city. Other cities or boroughs are Coventry, Leamington, Rugby, Stratford-on-Avon, Sutton Coldfield, Nuneaton and Tamworth. Around Birmingham and Coventry are great industrial areas, but elsewhere the land is pastoral. The county contains the forest of Arden and among its places of interest are Kenilworth, Edge Hill and Meriden. The Avon and the Tame are the chief rivers. It contains the dioceses of Coventry and Birmingham, and sends four members to Parliament. Pop (1931) 1,534,782.

The **Warwickshire Regiment**, the 6th of the line, dates from 1684. It is a royal regiment, and its depot is at Warwick.

Wash The Arm of the North Sea. It lies between the counties of Lincoln and Norfolk. Its area is about 22 m. by 15, but this is continually being reduced as land is reclaimed. The Great Ouse, Nen, Welland and Witham flow into the Wash. Its ports are Boston and King's Lynn, both somewhat inland.

Washington Urban district of Durham. In a coal mining district, it is 6 m. from Sunderland, and 260 from London, by the L.N.E. Ry. Pop (1931) 16,989.

Washington State of the United States. It is in the extreme NW of the country with a coastline on the Pacific Ocean and Canada to the N, and covers 69,130 sq. m. Olympia is the capital, but Seattle, Spokane, Tacoma and other places are much larger. The chief industries are the growing of wheat and other cereals, fruit farming on a great scale, and the rearing of cattle, sheep and pigs. Much coal is mined. There are large forest areas and a number of reservations for the Indians. The state has a legislature of two houses, and sends two senators and six representatives to Congress. Pop (1930) 1,563,396.

Washington Capital city of the United States. It is 136 m. from Philadelphia and 226 from New York, on the Potomac River, and is served by several railway lines. The land on which it stands is federal territory called the district of Columbia, 638 sq. m. in area, surrounded by the state of Maryland.

Washington was founded about 1790 as the seat of government, and contains a great number of public buildings. Chief among them is the Capitol, finely situated on a hill and famous for its magnificent dome. It was begun in 1818 to replace one burned by the British in 1812, and contains accommodation for the two houses of Congress. At the other end of Pennsylvania Avenue is the White House where the President lives. Washington has four universities—Georgetown, Columbian, George Washington and Howard. The Lincoln Memorial was erected in 1922. The Washington Monument was begun in 1848. Many of the inhabitants are in the public service and there is a large negro element. The industries

are concerned chiefly with printing and publishing and the preparation of foodstuffs. Across the Potomac, crossed by a fine bridge is the Arlington National Park and the national cemetery. Pop (1931) 486,869

Washington George American soldier and statesman. Born near Fredericksburg, Virginia, Feb 22, 1732 he inherited the estate of his half-brother at Mount Vernon in 1752 and became a prominent tobacco planter. Between 1753 and 1758 he saw military service against the French. Elected a member of the House of Burgesses in 1758, in 1770 he came to the front as a champion of colonial liberties. As a Virginian representative to the Continental Congress of 1774 he did not favour American independence, but in 1775 he was chosen to command the colonial forces. In 1776 he succeeded in occupying Boston, but was driven out of New York. Victories at Trenton and Princeton, however, gave new life to American resistance. Defeated in 1777 at Brandywine Creek, he wintered at Valley Forge, fought an indecisive battle at Monmouth in 1778, and in 1781 received the surrender of Cornwallis at Yorktown. In 1787 as representative of Virginia he presided at the Federal Convention in Philadelphia and in 1788 was chosen first President of the United States. Cautious and painstaking as President, he was re-elected against his will in 1792, and in 1797 retired to his estates, where he died Dec 14, 1799.

Washington Booker T. Tallafarro. Negro educationalist. He was born on a Virginian plantation in 1858, the son of a slave, and educated at the Hampton Institute where he became a successful teacher. In 1881 he was selected as the head of Tuskegee College, Alabama. Beginning in a broken-down shanty, at the end of 20 years he saw the institute firmly established with over 1000 pupils. He died Nov 14, 1915.

Washington Treaty of International treaty signed at Washington. At the invitation of the United States a conference met at Washington towards the end of 1921, and was attended by representatives of the United States, the British Empire, France, Italy, Japan, the Netherlands and Portugal. It dealt mainly with two subjects, China and the limitation of naval armaments. Great Britain, the United States, Japan and France, signed a treaty on Dec 13, 1921, in which they agreed to respect mutually "their rights in relation to their insular possessions and insular dominions in the region of the Pacific Ocean." On Feb 10, 1922, these four powers and Italy signed a treaty which limited the size of their navies. The United States kept 18 capital ships, the British Empire, 22, and Japan, 10. In future no capital ship was to be larger than 35,000 tons.

Wasp Hymenopterous insect of the *Vespa* and other families, including both social and solitary genera. Social wasps of the genus *Vespa* are represented in Britain by a half dozen species. The colony is begun by a female (queen) of the previous summer's brood, who lays eggs in a few cells made of pulped wood fibre, situated in a burrow made in the ground. The colony is added to, and in due course males and workers appear, then females nurtured in larger cells, who are the "queens." Certain of the latter survive the winter and carry on the race.

Wassermann reaction Bacteriological test for syphilitic infection. It is based on a method, developed earlier, which demonstrated the presence in blood serum of compounds produced in blood for protective purposes against invading germs. It was adapted by Wassermann specially for detecting invasion by the germ of syphilis.

Wastwater Lake of Cumberland. It lies under Scafell and is the wildest of the English lakes. On one side the fells rise almost perpendicularly from the water. To the N is Wasdale Head, a great centre for climbers.

Watch Portable timepiece. It consists of a case and framework which contains a main spring and apparatus for winding, a train of wheels with hands and face, an escapement, and a balance wheel and hair-spring. The first watch was made by Peter Henle in Nuremberg about 1500.

Watch Portion of time, during which sailors are on duty. The first watch extends from 8 P.M. to midnight; the middle watch from midnight to 4 A.M.; the morning watch from 4 A.M. to 8 A.M.; the forenoon watch from 8 A.M. to 12 noon; the afternoon watch from 12 noon to 4 P.M.; the first dog-watch from 4 P.M. to 6 P.M., and the second dog-watch from 6 P.M. to 8 P.M.

Watchet Urban district and port of Somerset. It is 17 m N.W. of Taunton and 160 m from London by the G.W. Rly., and is situated on the Bristol Channel. There is a harbour for the fishing. Pop (1931) 1936.

Water Colourless liquid, a chemical compound of hydrogen and oxygen, with the chemical formula H_2O . When pure it is clear, tasteless and chemically neutral. Its freezing and boiling points under normal atmospheric pressure are used as standards in measuring temperature, defining $0^\circ C$ ($32^\circ F$) and $100^\circ C$ ($212^\circ F$) respectively. It reaches its maximum density at $4^\circ C$ and expands on freezing (which causes the bursting of pipes), while when converted into steam it expands about 1700 times. It is a poor conductor of heat and electricity, and has the highest known specific heat (q_v). Water covers 72 per cent of the area of the earth, forms two-thirds by weight of the human body, and is indispensable to the existence of life.

Apart from the many uses to which it is put by man, and its rôle in promoting the growth of vegetation, it is, as water vapour, an important constituent of the atmosphere. By the pressure exerted when freezing it disintegrates rocks, and as rain, rivers and sea it erodes land surfaces. It is harnessed for the development of water power, and as steam is the basis of the steam engine, its virtual incompressibility and its power as a liquid of transmitting pressure equally in all directions are adaptable for use in engineering. It has been adopted as the standard for measurements of specific gravity and specific heat, and is used universally as a solvent. See ICE, STEAM, WATER POWER, HYDRAULICS.

Waterboatman (or Boatfly) Insect of the family *Notonectidae*, found in ponds in Great Britain. It swims upside down, propelling the body through the water with long strokes of its hind legs, which, when still, extend sideways like oars in a boat. The insect lives on water larvae and worms, and lays its eggs in the stems of water-plants.

Waterbuck Type of antelope (*Cobus elipsiprmanus*) It lives in swamps and boggy places in S and E Africa, travelling in herds Its colour is greyish brown

Water Bug Name loosely applied to hemipterous insects which are common in ponds. These include the water boatman or boatfly (*q v*), water scorpion (*q v*), and the water measurers or skaters

Water Chestnut (or Jesuit's nut) Water plant (*Trapa natans*), of the order *Onagraceae*, a native of Central Europe The four potted white flowers are borne in the floating leaves, which form a rosette on the stem.

Water Colour Method of painting are mixed with some adhesive substance and applied with water and are supplied either in cakes or in tubes The art is of considerable antiquity and is still the most popular method for sketching and other rapid work Moreover more delicate effects can be obtained in water colour than in oils Of the British school J M W Turner may be regarded as the supreme master in water colour, with David Cox and John Sell Cotman as his successors

Water Cress Edible perennial aquatic herb (*Radicula nasturtium*) of the order *Cruciferae* It inhabits brooks and streams in Europe and parts of Africa and Asia, and is cultivated shallow in beds fed by running water for use as a salad.

Waterford County of Munster, Irish Free State. In the S of the country, it covers 708 sq m, and has a coastline of about 50 m Waterford is the county town. Other places include Dungarvan, Youghal and Lismore The chief rivers are the Suir and the Blackwater The surface is hilly, but the soil is not unfertile Butter and eggs are produced, and the fisheries are valuable Pop (1926) 51,915

Waterford Borough and river port of Waterford, Irish Free State also the county town It stands at the junction of the rivers Suir and Barrow, 94 m from Dublin by the G S Rlys There are two cathedrals Reginald's Tower is said to date from the 10th century The industries include shipping, bacon curing and a trade in livestock and dairy produce At one time the city was famous for its glassware Pop (1926) 26,647

The title of Marquess of Waterford has been borne by the family of Beresford since 1789 The eldest son of the marquess is called the Earl of Tyrone

Water Gas Gas made by forcing steam through incandescent coke or anthracite Carburetted it is mixed with coal gas for lighting, and it is also used as furnace fuel

Water-Glass Popular name for sodium silicate It is made by fusing together soda ash and clean sand under strong heat It is so called because, though it looks like glass, it is soluble in water Its most common use is for preserving eggs for domestic use

Waterhouse Alfred English architect. He was born in Liverpool, July 19, 1830, and practised first in Manchester and then in London He designed the Natural History Museum, 8 Kensington,

the town hall, Manchester, University College, Liverpool, St Paul's School, London, and Girton College Cambridge He was made A R A in 1878, and R A in 1885 He died Aug 22, 1906

Water Hyacinth Perennial South American aquatic plant (*Eichhornia crassipes*) of the order *Pontederiaceae* It is a native of tropical regions, floating on the rivers, and is grown as a hot house plant The handsome violet flowers appear in clusters

Water Lily Aquatic plant of the order *Nymphaeaceae*, found in temperate to tropical regions Mostly with broad large floating leaves, and red, yellow or white flowers, they range from the common British white (*Nymphaea alba*), and yellow (*Nymphaea luteum*) lilies to the giant Brazilian lily (*Victoria regia*), with leaves over a yard across

Waterloo Village of Belgium It lies about 11 m to the S of Brussels and gives its name to a battle fought there between the British and their allies, and the French on June 18, 1815 This was the culminating engagement in a campaign often called the campaign of Waterloo

The army of Napoleon, who had escaped from Elba, came into touch with the allied forces near Brussels On the 16th there were two indecisive battles at Quatre Bras, where a mixed force of Dutch, Belgians and British drove back the French, and at Ligny, where the Prussians were forced to retreat, thus widening the gap between them and the British The British under Wellington fell back to Waterloo, followed by the French. In the battle which began on 18th, the British held the Chateau of Hougomont, in spite of furious attempts to dislodge them, and the British infantry made a desperate stand against the French cavalry charges The arrival of the Prussians under Blücher turned the scale, and the French took to flight The battle finally ended Napoleon's attempt to regain the French throne, he surrendered to the British on board the *Bellerophon*, July 15, 1815, and was sent a prisoner to St. Helena.

Waterloo Station in London. On the S side of the river, it is the headquarters of the S Rly It was opened in 1848, and until the changes of 1921 was the headquarters of the L & S W line It was rebuilt in 1921-22, and with its 21 platforms is the largest of the London termini. There are connections by tube railways to all parts of London

Waterloo Suburb of the city of Sydney, New South Wales It includes Zetland and Rosebury, and has 25 m of streets Pop 12,500

Waterloo Bridge Bridge over the Thames in London. It connects Wellington Street, Strand, to Waterloo Road. Built from designs by John Rennie, it was opened in 1817, and named in memory of the battle It consists of nine arches In 1924 the bridge began to give way, and in 1925 it was closed for repairs, a temporary bridge being built alongside for the traffic It was proposed to build a new bridge, and the London County Council accepted the idea. There was, however, a good deal of opposition, and in 1932 the House of Commons refused to vote the necessary money The L.C.C. proceeded with the work, which is now (1936) nearing completion

Waterloo Cup

Chief coursing event in Great Britain. The race for it is held each year in Feb., on the flats at Altcar near Liverpool. It dates from 1836. The Waterloo Purse and the Waterloo Plate are other coursing events.

Waterloo

-with-Seaforth Urban district and seaside resort of Lancashire. It is on the Mersey 4 m. N.W. of Liverpool and 207 from London by the L.M.S. Rly. Pop. (1931) 31,180.

Water Mark

Any distinguishing device stamped in the substance of a sheet of paper. It is done when the paper is in a wet and pulpy condition. Some of the old water marks are very elaborate designs. They serve, especially in the case of paper used for bank and currency notes, as a protection against forgery.

Water Mite

Tiny aquatic parasite (*Hydrachina*) of the order Acarina. It lives on water-beetles and similar insects.

Water Ousel

(or Dipper) Bird (*Cinclus aquaticus*) of the *Cinclidae* common in parts of Britain. It is brown to slate coloured above, and white beneath. The length is 7 in. The water ousel frequents quick running streams, and dives to the bed to seek its food, aquatic insects and their larvae. Its feet are specially adapted to grip stones.

Water Polo

Ball game played by swimmers. The game consists of propelling an inflated rubber ball into a goal. The pitch is 30 yds. long by 20 yds. wide. About seven minutes each way are played, and the players on each side are 3 forwards, 1 half, 2 backs and 1 goalkeeper. A London Water Polo League was formed in 1889.

Water Power

Energy obtained from moving or falling water. Water has been used for many centuries to drive the wheels that provide power for mills where flour, paper and other commodities are produced, and many of these mills may be seen on the banks of rivers in England.

The introduction of electricity led to a great increase in the use of water power, as it was found that it could be employed to drive turbines to generate electricity. In this way the water power, hitherto only local in its results, can be made to provide power at great distances from its site. The power from the falls at Niagara, for instance, is taken great distances, and that of the Shannon is used over most of the Irish Free State. The power is obtained from the force of the falling water and is increased by forcing this through a narrow aperture. The electricity generated is used for lighting and power purposes.

It is estimated that the world's developed water power is 34,675,000 h.p., and the potential supply is 459,000,000 h.p. To this total the United States with 13,571,530 and Canada with 4,556,000 are the largest contributors. Other countries in which a good deal of water power is used are Italy, 2,300,000, France, 2,000,000, Norway, 1,900,000, Switzerland, 1,850,000, Sweden, 1,350,000, Germany, 1,100,000, and Spain, 1,000,000. The British Isles has 250,000, developed, and a potential supply of 850,000 h.p.

Waterproofing

Treating of a surface so as to render it resistant to the penetration of water. Fab-

rics are often coated with rubber, naphtha being used as the solvent. Proofing with oil is another common method. The process called rain-proofing depends on the deposition on the fibres of the fabric of an insoluble precipitate of some such chemical as alum. A special close weave is employed.

Water Scorpion

Hemipterous insect (*Nepa cinerea*) of ponds and other stagnant waters. It has a flat, thin body, furnished with a tail-like breathing tube, which is protruded from the water when the insect takes in air. This tube and the large curved, pincer-like forelegs give it its name.

Watershed

Ridge of land separating the head-waters of two different river systems. In mountainous areas the watershed is generally well defined, but not in comparatively flat tableland, where head-streams of two or more distinct rivers may arise in one common swampy area.

Water-Snake

Popular name of several different aquatic serpents. (1) A harmless colubrine serpent of the *Tropidonotus* or related genus, found in America and Europe. (2) An E. Indian freshwater, fish-eating homalopsoid serpent. (3) A wart snake. (4) A sea snake or hydrophid.

Waterspout

Meteorological phenomenon occurring at sea, associated with violent cyclonic storms of very small diameter. From the lower surface of a central cloud, a funnel shaped projection approaches the sea, a mass of spray from the sea becoming involved, forming a column which is, however, composed principally of raindrops.

Water Thyme

Water weed (*Elodea canadensis*), with long jointed stems which root at every joint. It increases rapidly, causing congestion in streams and canals.

Waterville

City of Maine, U.S.A. It is about 20 m. from Augusta on the Kennebec River. Water power from falls on the river is used in manufacturing cottons and woollens. The city is the seat of Colby College, a Baptist institution. Pop. (1930) 15,454.

Water Violet

Water plant (*Hottonia palustris*) of the order *Primulaceae*. The long roots are suspended in the water and the thick branching stems are tufted with feathery leaves which are submerged. The flower stem rises about a foot above the water bearing whorls of salver-shaped flowers, white or lilac, with a yellow centre.

Watford

Borough and market town of Hertfordshire. It is situated on the Colne, and is served by the L.M.S., Mot., and Bakerloo Rlys. and numerous bus and coach services. A large residential district, its parish church contains memorials of the Essex family. There are chocolate and cocoa factories and other manufactures, and brewing, milling and printing works. The London Orphan Asylum is situated here. Pop. (1931) 56,799.

Wath-upon-Dearne

Market town and urban district of Yorkshire (W.R.). It is 7 m. S.E. of Barnsley, and 164 from London by the L.N.E. Rly. It is on the South Yorkshire coalfield and is served by a canal. Pop. (1931) 13,653.

Watling Street Roman built road which ran from Dover to Wroter. It is in some places used to-day.

Watson Sir William English poet. He was born at Burley in Wharfedale, Aug. 2, 1858. In 1880 he published a volume of poems called *The Prince's Quest* and between 1890 and 1928 a considerable quantity of verse, including *Wordsworth's Grace*, *For England Sable and Purple* and *The Muse in Exile*. Collected editions of his works appeared in 1898 and 1906. He was knighted in 1917 and a national presentation was made to him in 1930. He died on Aug. 12, 1935.

Watt James English inventor. He was born at Greenock Jan. 19, 1736, going in 1754 to Glasgow where later he was appointed mathematical instrument maker to the university. His experiments gradually led to the evolution of the modern steam engine, his crowning achievement being the invention of the governor. In 1774, in partnership with Matthew Boulton, he produced an engine vastly superior to Newcome's pumping engine. He died Aug. 19, 1819.

Watteau Antoine French painter. He was born at Valenciennes in Oct., 1684, and studied at the Academy, of which he became a member in 1717. He excelled as a painter of pastoral scenes, fêtes galantes etc., and was supreme in both design and colour. He died July 18, 1721.

Wattle Twig, flexible rod or hurdle. By plaiting them together the twigs are made into fencing. At one time they were used for building houses known as wattle and daub buildings.

Another wattle is one of the acacias that grow in Australia. Sprigs of it are worn on Australia Day.

The wattle bird is found only in Australia. It is named from the wattle or fleshy excrescence seen under the throat.

Watts George Frederick English painter and sculptor. He was born in London, Feb. 23, 1817, spent three years studying in Italy, and exhibited at the Royal Academy in 1837. His 'Cerberus led in Triumph Through Rome' won a prize of £300 in 1843. A host of famous people sat to him and there is a collection of his symbolical pictures in the Tate Gallery. His statuary includes 'Physical Energy', a replica standing in Kensington Gardens. He received the Order of Merit in 1902 and died July 1, 1904.

Watts Isaac English hymn writer and divine. He was born in Southampton July 17, 1674, educated in London and in 1702 became minister of the Independent Church in Mark Lane. In 1712 he went to stay with Thomas Abney at Theobalds, and remained with the family until his death, Nov. 25, 1748. His numerous hymns include "O God our help in ages past" "When I survey the wondrous cross" and "Jesus shall reign where'er the sun".

Wave Disturbance of equilibrium in a body or medium, having motion and direction in itself, but not involving the particles of the medium permanently in its forward motion. Thus in water the wave progresses, but the water itself has an oscillatory motion only, the energy communicated to and producing the wave being yielded up when the wave reaches the shore. The oscillatory motion may be along a straight line or (usually) a closed curve, and may be perpendicular to the

direction of motion of the wave (as in wireless waves in which the electric and magnetic components are also perpendicular to each other) or in the same direction (as in sound) or a combination of both (as in surface waves in liquids). Sound waves travel through matter as a medium, wireless, heat, light waves the gamma rays of radium, X rays and cosmic rays have been conceived as waves travelling through the ether (φ) having the same form and velocity, but differing in wave length from metres to a ten millionth of a millimetre.

Wave motion can be represented graphically by an undulatory line, varying in form with the nature of the wave and wave length (λ) is the distance from one crest to the next on this line being connected with the velocity of the waves (v) and their frequency (n) in corresponding units by the formula $v = n\lambda$. In broadcasting each station has a definite wave length assigned to it by an international body. See LIGHT SOUND, BROADCASTING.

Waveney River of East Anglia. It rises in Norfolk and forms part of the boundary between this county and Suffolk, passing by Bungay. It is navigable for the lower part of its length of 50 m and flows into the estuary of the Yare.

Waverley Abbey Ruined abbey near Farnham Surrey, on the River Wey. It was the earliest Cistercian house in England, being founded by William Gifford, Bishop of Winchester, in 1128. Little now remains of the original buildings. The house was dissolved in 1536. Sir Walter Scott is thought to have taken the name of his first novel from Waverley Abbey.

Wax Word used originally for beeswax, but now extended to other substances having similar properties. At ordinary temperatures, waxes are more or less hard, but they become soft when warmed. They are insoluble in water, slightly soluble in alcohol, and readily soluble in ether, chloroform and in the fixed and volatile oils. They are either vegetable or mineral waxes, and include spermaceti derived from the sperm whale. Chinese wax, and paraffin wax obtained from mineral oils. Waxes are used in the making of candles, ointment, polishes, etc.

Waxbill Small bird of the order *Estrelinidae*, related to the weaver birds (φ). Waxbills are found in Africa, Australia and parts of Asia. They have waxy translucent, often vividly-coloured bills.

Wax Flower Australian climbing evergreen shrub (*Hoya carnosa*) of the order *Asclepiadaceae*. It has a twining stem, fleshy and somewhat oval leaves and pinky white, waxy flowers. It is largely grown as a hot house plant.

Wax Palm Palm tree (*Corypha foetida*) of tropical S America. Its trunk is coated with wax which is removed and used for candles etc. Another wax palm is *Ceroxylon andicola*, a native of Colombia.

Wax Tree (or American Gamboge) Shrub (*Pistia guttensis*) of tropical S America, also known as the gutta gum tree. It exudes a resinous juice with similar properties to that of Gacalia, the gamboge of Siam. It belongs to the order *Hypericaceae*, and is cultivated as a hot house plant, bearing yellow flowers in clusters.

Waxwing Bird (*Ampehs parvulus*) of the order *Ampehidae*. It breeds in the extreme north of Europe and is a winter visitant to Britain. It is about 7½ in. long,

with a short, stout body. The plumage is brownish-grey and crested head and throat are black, the wings and tail black with white and yellow marking. The secondary wing feathers and sometimes the tail feathers have wax-like vermilion tips.

Waxwork Effigy executed in wax, usually an imitation of a real person. In the 18th century exhibitions of wax figures of famous or notorious personages became popular at fairs or holiday resorts. Madame Tussaud's exhibition in London originated in Paris in 1780.

Wayland the Smith In German mythology, a sort of demi god, the son of Wado, the sea giant. He was apprenticed to Mimir, the famous smith, and became a master craftsman under the tuition of the dwarfs. Wayland Smith's cave, in Berkshire, mentioned in *Kennilworth*, is, in English folk-lore, his forge.

Wayleave Legally a permission granted by the owner of property. It allows a person to go upon land for a particular purpose and at reasonable hours. It is chiefly used in connection with the mining of coal and the payment for it approximates to a royalty (q.v.).

Ways and Means Committee of Term used in parliamentary procedure. When the House of Commons is dealing with the methods of raising money proposed by the Chancellor of the Exchequer, it is a committee of ways and means. At such times the Chairman of Committees, not the Speaker, presides.

Waziristan Mountainous region of the North-West Frontier Province of India. Under British influence, it is divided into three parts—the Tochi Valley and northern and southern Waziristan. The Waziri tribes are fierce and warlike, and it was not until a motor road was driven through their territory after the World War that order was continuously maintained.

Weald The Name of a district in Kent and Sussex. It is the remains of a great forest known as the Andredsweald, in which iron ore was smelted in Roman and Anglo-Saxon times and earlier. It lay between the North and South Downs and stretched through Sussex to the eastern coast of Kent. The name is now confined to the eastern part of Sussex and the western part of Kent.

Wealdstone Urban district of Middlesex. It is 11½ m from London, by the L M S Rly and is a residential district. Pop (1931) 17,001.

Wealth Riches or material possessions. To economists it is a term embracing only such objects as have utility and can be exchanged. The creation and distribution of wealth is one of the main subjects with which political economy deals, and the first great book thereon is Adam Smith's *Wealth of Nations* (1776). National wealth depends ultimately on intangible and unestimable assets such as sunshine, rainfall, rivers, etc., apart from its tangible assets. But these cannot be taken into account in estimating a country's resources. There are four general methods of computing national wealth—(1) from data gained from the taxation of incomes, (2) from annual taxation of capital, (3) from taxation of capital at intervals, (4) by a method of inventory. None of these methods, however, is free from imperfections. The

national wealth of Great Britain in 1926 was estimated at about 20,000 million pounds.

Wear River of Durham. It rises in the Pennines and enters the North Sea at Sunderland. Barges can go up as far as Durham. The Wear flows through some very beautiful scenery and is 65 m in length.

Weasel Small carnivorous mammal (*Mustela nivalis*) of the *Mustelidae*. It is related to the polecat, marten, etc. It is a native of Europe, parts of Asia, and N. America. The body is about 6 in long, the pelt being reddish-brown above and white below. It preys on rats, mice and small game. In more northern regions the winter coat is white.

Weather State of climate at a given time. It comprises the sum total of the results of temperature, pressure, rainfall, winds, condition of the atmosphere, relative presence or absence of clouds, duration of sunlight, etc. Weather forecasts are made from reports received from meteorological stations, home and foreign. These enable the probable future weather to be predicted with a varying degree of accuracy. See CLIMATE, ISOBAR, METEOROLOGY.

Weatherboard Protective outer covering of a building. It is usually specially adapted to shed water by forming lapped joints with the boards above and below. The word is also a nautical term denoting that side of a vessel which is towards the weather and wind.

Weathercock Wind indicator. Usually it consists of a thin piece of metal or wood affixed to a vertical rod on which it is pivoted by any change of wind. Designs are various, but the most popular one is a cock, hence the term weathercock.

Weaver River of Cheshire. Rising in the hills near the borders of Shropshire it flows N. to join the Mersey near Frodsham and between there and Northwich. It has been connected with the Trent and Mersey Canal. Northwich and Northwich stand on it and its chief affluent is the Dane. The river is about 50 m long.

Weaver Bird Small bird which constructs a nest of woven grass. Some, such as the *Philactacus* of S. Africa, make a common nest in which each pair has a separate cavity with its own entrance. Others make separate bottle shaped nests, some adding clay to increase the weight and check the swaying.

Weaving Act of interlacing threads so as to form a fabric. It is essential to the making of all fabrics, whether tapestry or material of silk, linen, woollen or cotton. The weaving is done on looms, the early looms were worked by hand, but to day power looms are practically universal.

Weaving was practised in China, Egypt and other countries of antiquity, as it was later in Greece, where the classic instance is Homer's references to Penelope weaving and unweaving her threads. In the Middle Ages the weavers of the Netherlands became famous and greatly influenced the craft in England, Germany and elsewhere.

Webb Sir Aston English architect. He was born in London, May 22, 1849 and soon came to the front in his profession. He designed the Victoria Memorial, the Admiralty Arch and the new front of Buckingham Palace. He also restored the

1841-46 He died at Walmor Sept 14, 1852, and was buried in St. Paul's Cathedral See WELLESLEY, PENINSULAR WAR

Wellingtonia (*Sequoia gigantea*) Giant evergreen tree of California of the order *Coniferae* The timber is hard red and close-grained

Wells City and market town of Somerset It is 20 m from Bristol and 120 from London, on the G W Rly The chief building is the cathedral of the diocese of Bath and Wells, famed for its west front, its lady chapel its crypt and its curious clock, dating from the 14th century The choir and chapter house are very fine St Cuthbert's is a notable church The bishop's palace is surrounded by a moat and the deanery is a fine old house The Vicar's Close, with a chapel at the top, is picturesque, and in the recreation ground is the bishop's barn of the 15th century Pop (1931) 4833

Wells Urban district and seaport of Norfolk It is 23 m from Kings Lynn and 147 from London, by the L N Rly There is a harbour and a little shipping Pop (1931) 2505

Wells Herbert George English writer Born at Bromley, Kent, Sept 21, 1866, after graduating from the Royal College of Science in 1888 he taught, until, in 1893, he became a journalist, publishing his first novel *The Time Machine*, in 1895 His work falls roughly into three classes Of his novels, *Kipps* (1905) is acclaimed his masterpiece In this, as in *Love and Mr Lewisham* (1900) and *The History of Mr Polly* (1910), he describes the romance of the lower middle class Other major novels are *Tono Bungay* (1909), *Mr Bridding Sees It Through* (1916) and *The World of William Clissold* (1926) His scientific romances include *The Invisible Man* (1897), *The Food of the Gods* (1904) *The Island of Doctor Moreau* (1896) and *The First Men in the Moon* (1901) Among his general works, the more important are *First and Last Things* (1908), *New Worlds for Old* (1908), *The Open Conspiracy* (1928), *The Outline of History* (1920), *The Work, Wealth and Happiness of Mankind* (1932) and *The Shape of Things to Come* (1933) As a novelist he is open to the criticism that he fails to shed the robe of the reformer for that of the untrammelled artist, while his work in general suffers from hasty judgment, impatience at the gradual nature of change and a tendency to override the convictions of others Nevertheless he has exercised a profound influence on his generation as an able exponent of the application of scientific method on a universal scale

Welsh Harp Reservoir near Hendon The name is taken from those of two inns now and old on the Edgware Road It is a popular pleasure resort

Welshpool Borough and market town of Montgomeryshire An agricultural centre, it is 15 m south of Oswestry and 172 from London by the G W Rly Pop (1931) 5637

Welsh Poppy Hardy perennial species of poppy (*Meconopsis cambrica*) The delicate pale green segmented leaves grow in a tuft from the root, and the pale yellow or orange flowers rise on tall erect stems

Welsh Rabbit Cheese dish, wrongly termed rarebit The cheese is grated, mixed with butter and a little milk seasoned spread on buttered toast

and toasted Frequently a little beer or stout is added

Welwyn Rural district of Hertfordshire It is situated 5 m from Hatfield, on the L N E Rly, 22 m from London The Garden City, planned in 1920, between Welwyn proper and Hatfield, is a progressive community with its own station on the L N E Rly Welwyn is now a centre of the film industry Pop (1931, Garden City) 5585

Wem Market town and urban district of Shropshire It is 11 m. from Shrewsbury, on the L M S Rly The parish church has a Norman tower The chief industries are a trade in cattle, milling and tanning Pop (1931) 2157

Wembley Urban district of Middlesex It is 8 m N W of London, on the L M S and Underground Rlys It is a residential district, but it is best known for its exhibition grounds and stadium Here the British Empire Exhibitions were held in 1924 and 1925 and in the stadium, which holds 125,000 people, the finals for the association football cup are played Pop (1931) 48,546

Wemyss Parish of Fifeshire, Scotland which includes the villages of East and West Wemyss, Buckhaven, Methil and Innerleven It is on the Firth of Forth Wemyss Castle, deriving its name from the archaic caves, or weems, in the neighbourhood, was the scene of the first meeting between Mary Queen of Scots and Darnley Pop (1931) 26,619

Wemyss Earl of Title of the Scottish owners of the "shire" of Wemyss in Fifeshire since the 12th century There was a Sir John of Wemyss and Methil in 1239, and a Sir John who was created a baronet of Nova Scotia in 1626, Lord Wemyss of Elotho in 1628 and earl in 1633 Hugo Richard Wemyss Charteris (b 1857) the 11th earl succeeded to the title in 1914 The earl's oldest son is called Lord Elcho

Wenceslaus Gorman King and King of Bohemia The son of the Emperor Charles IV, he was born at Nuremberg Feb 26, 1361 Elected German King in 1376, he became paramount in Germany and Bohemia on his father's death in 1378 He disregarded German affairs and ruled Bohemia well, but quarrelled with the nobles. In 1394 he was captured hut, released under threats from the German princes, failed to restore peace in Germany and was declared deposed in 1400 Quarrelling with his brother, Sigismund of Austria, he was captured in 1402 and held prisoner for two years, after abdicating in Bohemia In 1404, however, he was released and regained his authority in Bohemia. His later years were disturbed by the troubles caused by the death of John Huss He died at Prague, Aug 16, 1419

Wendover Market town of Buckinghamshire It is 33 m from London, on the L N E Rly The parish church has been restored and there are some half timbered houses Until 1832 Wendover sent two members to Parliament

Wenlock Borough of Shropshire It is on the Severn, 14 m. from Shrewsbury and 148 from London, with a station—Much Wenlock—on the G W Rly The guildhall dates from the 16th century There are remains of an abbey The borough includes Much Wenlock, Madeley and Broseley It has an agricultural trade and around are

A TRIUMPH OF MODERN ENGINEERING

The new tube station at Piccadilly Circus, showing the busy network of tunnels, tubes and escalators under the heart of the West End of London.

coal and iron stone mines Wenlock Edge is a famous beauty spot Pop (1931) 14,152

The title of Baron Wenlock has been borne since 1839 by the Family of Lawley The Wenlock series is the name given by geologists to the middle division of the Silurian rocks

Wentworth English family tracing its descent from William Wentworth of Yorkshire, who died 1308 Its most important members were Strafford and Rockingham (q r) The barony of Wentworth held by the family descended from 1687 to the female line and so passed by marriage to the Earls of Lovelace till 1906, when it again passed to the female line

Wentworth Woodhouse Seat of Yorkshire (W R) about 5 m from Rotherham Original- the home of the great Earl of Strafford, it was rebuilt about 1740, and added to in 1806 It is a magnificent building with a south frontage of 660 ft and has a deer park of 1500 acres

Werewolf Mythical being in folklore It was supposed to be a person transformed into a wolf in form and appetite, either temporarily or permanently Sometimes the transformation was supposed to be the result of witchcraft, in other cases "the wolf" was a form assumed at will generally to satisfy the craving for human flesh

Wergild Among the Teutonic races, the value set upon a man's life, or the amount payable by the family of a man-slaver to the family of the slain, to avoid a blood feud It varied in value from 40 pence for a slave to £24 for a freeman, and proportionately more for a noble or king

Weser River of Germany, formed by a union of the Fulda and the Werra at Minden It is 300 m long and flows mainly north until it enters the North Sea as an estuary It is a busy commercial highway as far as Bremen, and canals connect it with other waterways Bremerhaven is the great port near its mouth The Aller is its chief tributary

Wesley Charles. English hymn-writer He was born Dec 18, 1707, and was educated at Westminster School and Christ Church, Oxford He helped his brother, John, to found the Methodist movement In 1735 he went to Georgia but returned to England in the following year He took part in orange-battle work, but is known to day as one of the greatest hymn writers of the 18th century His best known hymn is *Jesus, Lover of my Soul* He died March 29, 1788

Wesley John English divine He was born at Epworth, Lincs., where his father was rector, on June 17, 1703 After an education at Charterhouse and Christ Church, Oxford, he took orders in 1725 Returning to Oxford in 1729 as tutor in Lincoln College, he joined a group of undergraduates who had received the nickname of "Methodists" because of their strict adherence to a religious way of life On his return from a mission to Georgia, he took the lead in a similar society which met near Moorfields, London and began his campaign of field preaching, which continued unbroken for half a century He gathered his followers into "classes" under the direction of "leaders" and placed them under the government of a Conference of Ministers At his death, March 2, 1791, they numbered a hundred thousand

Wesleyan Methodist Church Non-conformist denomination

The Wesleyan Methodists were the original body founded in 1739 by John and Charles Wesley The constitution is Presbyterian in character, consisting of local quarterly meetings and district synods, both subordinate to the annual conference, which has supreme legislative and judicial power The separate existence of the Wesleyan Methodist Church ceased in Sept 1932, on the re-union of the Wesleyan Methodists with the Primitive Methodists and United Methodists

Wessex Kingdom of the West Saxons. It was established in the 6th century by the Saxon invaders of England. It covered the district south of the Thames between Sussex and Dorset, with its capital at Winchester Its first kings were Cerdic and Cynric, who were succeeded by others, usually vassals of Northumbria or Mercia

In 802 Egbert became King of Wessex and in a few years was overlord of England He and his successors, one of whom was Alfred the Great are known as kings of England, of which Wessex was, in the 9th century, the most powerful state To-day Wessex is used as a general term for the counties of Dorset, Hampshire and Somerset, the district made familiar by the novels of Thomas Hardy.

West Benjamin Anglo-American artist. Born at Springfield, Pennsylvania, Oct 10, 1738, he settled in London in 1763 George III was his patron for forty years Among his most famous works are "Death of General Wolfe," "The Black Prince at Poitiers," and "Christ Healing the Sick." He died March 11, 1820

West Bridgford Urban district of Nottinghamshire It lies to the south of the city of Nottingham, from which it is separated by the River Trent, and of which it is really a residential suburb The chief building is the church of St Giles Pop (1931) 17,821 East Bridgford is a village, 7 m away.

West Bromwich County borough of Staffordshire It is situated on the Tame, 6 m from Birmingham, on the G W Rly Its manufactures include machinery, tools and metal work, and there are foundries and smelting furnaces Other industries are brick making, tar distillation and the manufacture of washing powders. It sends one member to Parliament. Pop (1928) 81,281

The football club, West Bromwich Albion, founded in 1879, won the first division championship in 1920, Association Cup in 1888 and 1892 and Cup and League in 1931

Westbury Urban district and market town of Wiltshire It stands on the Biss, and is a junction on the G W Rly The town has a trade in farm produce and some manufactures

Westcott Brooks Foss English divine Born near Birmingham, Jan 12, 1825, and educated at King Edward's school and at Cambridge, he took orders in 1851, and was an assistant master at Harrow, 1852-69 He then became Canon of Peterborough and Professor of Divinity at Cambridge and in 1883 Canon of Westminster In 1890 he became Bishop of Durham He helped to revise the New Testament, and wrote *The History of the New Testament Canon*, 1855, and *The History of the English Bible*, 1868 After twenty-eight years' work, Westcott and Dr. Hort published *The New Testament in Greek*, 1881 He died July 27, 1901

West Drayton Village of Middlesex It is 13 m from London, by the G W Rly, on which it is an important junction. It is part of the urban district of Yiewsley and West Drayton Pop (1931) 13,057

Westerham Market town of Kent It is 5 m from Seven oaks, and 26 from London, on the S Rly James Wolfe was born at the vicarage here, and lived at the house now called Quebec House Westerham Hill (800 ft.) is the highest point in Kent. Pop 8050

Western Australia Stato of Australia It occupies all the western area. The centre is largely unexplored, settlement being mostly near the coast. The discovery of the rich goldfields near Coolgardie about 1892 played an important part in the progress of the state. Wheat growing is an important export industry, but more intensive forms of agriculture, e.g. fruit and wine production, are developing. The wool clip is considerable, while the southern part has valuable hard wood forests. Perth, the capital, is connected by rail with areas north and south and, through Coolgardie, with the Transcontinental Rly. In 1930 there was a movement favouring secession from the Australian Commonwealth and a deputation was sent to the British Government, who referred the matter to the Federal Government of Australia. Area 975,920 sq m Pop (1932) 422,495

Wester-Wemyss Baron. British sailor. Rosslyn Erskine Wemyss was born, April 12, 1864 and entered the navy. He was promoted full admiral in 1919, having served as commander-in-chief in the East Indies and Egypt, as First Sea Lord, and as a member of the War Cabinet. He was created baron in 1919. In 1929 he was placed on the retired list.

Westgate-on-Sea Watering place of Kent. It is 2 m. from Margate, on the S Rly and is a health resort noted for its bracing air.

Westhoughton Urban district of Lancashire, about 5 m from Bolton, it is 202 m from London, by the LMS Rly. It is in a coal mining district and has cotton manufactures. Pop (1931) 15,592

West Ham County borough of Essex. It is bounded by the Thames and the Lea and is a residential district of the working classes and an industrial area. It has a park of 80 acres. The inhabitants are employed in the railway shops at Stratford, at the docks, and in the factories of the neighbourhood. Pop 294,086

West Indies Fertile tropical islands, discovered by Columbus. They form a chain from Florida and Mexico to Venezuela enclosing the Caribbean Sea, being the peaks of a submerged mountain range. Martinique and St. Vincent possess volcanoes which were active in 1902. The western islands except for the Bahamas, are large, the eastern ones quite small, except for Trinidad. First colonised by Spain, they have been the scene of much strife among various nations. They now comprise the republics of Dominica, Cuba and Haiti, and dependencies of the U.S.A., France, the Netherlands and Great Britain. Area about 100,000 sq m.

Westinghouse George American engineer. He was born at Central Bridge, N.Y., Oct. 6, 1846, and at 18 was assistant engineer in the navy. In 1872 he patented his famous air-brake which acts automatically in case of accident. It was quickly adopted on practically all railways. In 1912 he was awarded the Edison gold medal for certain electrical achievements. He built dynamos for the Niagara Falls power plants and for the London Metropolitan Rly. He died March 12, 1914.

West Kirby Watering place of Cheshire. It is in the Wirral Peninsula, 8 m from Birkenhead on the River Dee, and besides being a popular resort is also a residential district for Birkenhead. Pop, with Hoylake (1931), 16,628.

West Lothian See LINLITHGOWSHIRE

Westmeath County of the Irish Free State. In the province of Leinster, it has an area of 709 sq m., is a limestone country, and has some fine loughs, notably Lough Ree on the Shannon. The Royal Canal cuts across Westmeath providing easy access to Dublin. The county is agricultural, dairy farming, and some woollens and linens are manufactured. The chief towns are Athlone and Mullingar. Pop (1926) 56,796.

The Earldom of Westmeath was created in 1621. Anthony Francis Nugent (b. 1870) the 11th earl, succeeded to the title in 1933.

Westminster City and borough of the county of London. It is about a mile to the E of the city, with which it is connected by the Strand and the Embankment. It occupies a considerable area to the north of the river and includes many buildings of note and much valuable property, making it the richest of the London boroughs. Therein, in addition to the Abbey and the School, are the Houses of Parliament, the government offices, St. James's and Buckingham Palaces, theatres, restaurants, hotels and clubs, as well as the National Galleries. Other buildings include the City Hall, the Middlesex Guildhall, the Weslevan Central Hall and Burlington House. The Roman Catholic Cathedral is a fine structure. In the city is Hyde Park, and its thoroughfares include Piccadilly, Whitehall and Trafalgar Square. Westminster Bridge crosses the river here. Westminster was at one time notorious for its slums, but much clearance work has been done. Westminster grew up around the Abbey and the palace of the early kings. In 1540 it was made a city, and in 1547 began to send two members to Parliament. In 1888 it became one of the boroughs of the county of London. Pop (1931) 129,535.

Westminster Duke of British title held since 1784 by the family of Grosvenor. Hugh Richard Arthur Grosvenor, 2nd Duke of Westminster was born Mar 19, 1879, of the ancient Cheshire family of Grosvenor, and was educated at Eton. He succeeded to the title on the death of his grandfather in 1899. He served with distinction in the Boer War, as A.D.C. to Lord Roberts, and also in the Great War. The family seat is Eaton Hall, near Chester.

Westminster Statute of Act passed in 1932 by the Parliament of the United Kingdom and the parliaments of the self governing dominions of the British Empire. It deals with the relations between them, which are now on the basis

of absolute equality. By it the parliament at Westminster ceases to have any right to revise the legislation passed by the other parliaments which can legislate in matters that concern them even if such are outside their territory. In the case of discrepancies between the legislation of the United Kingdom and that of the parliament of any of the Dominions the law passed by the latter shall not therefore be invalid. The statute also declares that no alteration shall be made in the laws affecting the succession to the throne without the consent of the Dominion parliaments.

Westminster Abbey Church in Westminster one of the finest Gothic buildings in the world. In full the Collegiate Church of St Peter, it was originally the church of a Benedictine abbey founded before the Norman Conquest. The oldest parts of the building are Norman with perhaps a little Anglo-Saxon but the main structure dates from the 13th and 14th centuries. In the 15th century Henry VII's chapel was built and Wren designed the western towers completed in 1740. An extensive scheme of restoration was carried out after the Great War.

The west front, the choir, the nave and the north transept are magnificent in their beauty and proportions but the gem of the building is Henry VII's chapel the chapel of the Order of the Bath. The abbey contains the tombs of many sovereigns, statesmen, poets and others, and a large number of memorials. The tomb of the Unknown Warrior (q.v.) is near the western end of the nave. There are many chapels notably the Chapel of St Edmund with his shrine and the Warrior's Chapel opened in 1932. In the south transept is the Poets' Corner. Adjoining the church are the cloisters and the Chapter House, in which the House of Commons sat for nearly three centuries before 1547. The Jerusalem Chamber is part of the deanery. The abbey is the coronation place of the sovereigns and in it is the coronation chair. The oldest part is the Norman undercroft and excavations in 1931-32 unearthed fragments of the earliest building. The abbey is governed by a dean and chapter and is outside the authority of any diocesan bishop.

Westminster Hall This was built by William Rufus and finished in 1099. Its timbered roof was added in 1394. The immense span of the roof (67 ft.) which has no intermediate supports, marked a notable step forward in roof design and building. In the present century the roof was seriously marred by the destructive work of the "death watch" beetle, and extensive repairs were carried out and completed in 1922. The hall was the scene of many famous trials, including those of Richard II, Charles I., and Queen Caroline.

Westminster School Public school in London. In full St. Peter's College, it has a long and close connection with the Abbey, although the legal tie between the two was severed in 1868. The Abbey is still the school chapel and the boys have certain privileges on great occasions. It dates from 1339 or earlier but the present foundation is one of 1561. The buildings, around Little Dean's Yard, include the school hall, once the dormitory of the monks, the dining-hall and several houses, including Ashburnham House, once the residence of the Ashburnham family. There is also a science building in Great College St.

The playing fields are in Vincent Square, and there is also a ground at Grove Park, bought in 1932. The boys number about 370, of whom about 150 are boarders. Those on the foundations, 50 in number, are called King's Scholars. A Latin play is given every Christmas, with topical prologue and epilogue, and the pancake is tossed on Shrove Tuesday.

Westmorland North-western county of England. It has a land area of 790 sq. m. and contains a great part of the Lake District and magnificent mountain scenery (Helvellyn, 3118 ft.). The lakes include Windermere, part of Ullswater, Grasmere and Haweswater. There is little agriculture, as the climate is cold and wet, and sheep rearing and dairy-farming are the chief occupations. There is some slate and granite quarrying. The chief towns are Kendal and Appleby. Pop. (1931) 65,398.

The Earldom of Westmorland has been held by the family of Neville and Fauconberg since 1397 and 1624 respectively. Vere Anthony Francis S. Clair-Fauconberg (b. 1893) the 14th earl, succeeded to the title in 1922.

Weston-super-Mare Pleasure resort and urban district of Somerset. It is on the Bristol Channel, 15 m. from Bristol, and 137 m. from London, and is reached by the G.W. Ry. Steamers go to Cardiff and other places on the Bristol Channel. Near are the two islands of Flat Holme and Steep Holme and on the mainland is Brean Down, a sanctuary for wild birds. Pop. (1931) 28,555.

Westphalia District of Germany. It lies to the S.E. of the Netherlands and on the east side of the Rhine. In 1180 it was made into a duchy, and was ruled by the electors of Cologne until 1803. In that year it was given to Hesse-Darmstadt, and in 1815 to Prussia. From 1807-13 there was a kingdom of Westphalia, its king being Jerome Bonaparte. To day it is a province of Prussia famous for its coal and iron mines and its industrial activity. Münster is the capital and in the province are Essen, Dortmund, Düsseldorf and other manufacturing towns.

Westphalia Treaty of Peace signed on Oct. 24, 1648, which ended the Thirty Years' War (q.v.). By its provisions France gained Alsace and the recognition of her sovereignty over Metz, Toul and Verdun, Sweden gained Western Pomerania, Bremen and Verden. The independence of Switzerland and the United Provinces and the sovereignty of the remaining states within the Empire were recognised. Religious toleration was granted to Calvinists as well as Lutherans in Germany. The treaty marks the failure of the Austro-Spanish attempt to restore Roman Catholicism universally in Central Europe, and is the starting point of French domination in Europe.

West Point Training college for officers for the army of the United States. It stands on the right bank of the Hudson River, 50 m. from New York. It dates from 1802 and the buildings are in extensive grounds.

Westport Seaport, urban district and market town of Co. Mayo, Irish Free State. It is on Clew Bay, 10 m. from Castlebar by the G.S. Ry. There is some shipping and an agricultural trade. Pop. (1926) 3,688.

Westport Port of New Zealand. Situated on the west coast of South Island, 57 m from Greymouth, it is the centre of an extensive coal area, with which it is connected by rail. The trade is principally a coastal one in coal. Pop 7000.

West Virginia State of the United States. In the east of the country it lies to the west of Virginia and covers 24,282 sq m. Charleston is the capital. It produces much wheat, maize and oats as well as tobacco and apples. Oil and coal are mined on a large scale. It is governed by a legislature of two houses and sends two senators and six representatives to Congress. The state has a university at Morgantown. Pop (1930) 1,729,205.

Westward Ho! Holiday resort of Devonshire. It is on the north coast, 3 m from Bideford, its station on the G.W. Rly. It is part of the urban district of Northam.

Wetherby (W.R.) Market town of Yorkshire. Situated on the Wharfe it is about 12 m N.W. of Leeds and 191 m from London, by the L.N.E. Rly. It is an agricultural centre and brewing is carried on. Pop 2300.

Wetterhorn Mountain of Switzerland. It is in the Bernese Oberland near Grindelwald and is 12,165 ft high. It was first climbed in 1844.

Wexford Borough, market town and seaport, also the county town of Co. Wexford. Irish Free State. It stands on the estuary of the Slaney, 87 m from Dublin, on the G.S. Rly. Fishing, distilling and brewing are carried on. Objects of interest are the old bull ring and the ruins of the castle. Pop (1926) 11,879.

Wexford County of Leinster, Irish Free State. In the S.E. coast of the country, it has a coastline, both on the east and the south totalling about 90 m. Wexford is the county town, other places are Enniscorthy, New Ross, Ferns and Gorey. There are several good harbours. The surface is hilly, but on the whole the land is fertile. The Slaney and the Barrow are the principal rivers. Agriculture and fishing the staple industries. The county's area is 900 sq m. Pop (1926) 95,848.

Wey River of Hampshire and Surrey. Rising in Hampshire near Alton, it flows N. through Surrey until it joins the Thames near Weybridge. It is 36 m in length. A stream in Dorset called the Wey rises near Upwey and flows into the English Channel at Weymouth.

Weybridge Urban district of Surrey. It is situated on two rivers—the Wey and the Thames—19 m from London, on the S. Rly. It is principally a residential district, being near several good golf courses and only a few miles from Brooklands, the station for which is known as West Weybridge. There is a fine, open common. Pop (1931) 7359.

Weygand Maximé French cavalry general. He was born at Brussels Jan. 21, 1867. Throughout the Great War he was the assistant and trusted adviser of General Foch. He conducted a successful campaign against the Bolsheviks in Poland in 1920 and liberated Warsaw. In 1923-26 he was High Commissioner in Syria, in 1930 Chief of the General Staff.

Weyman Stanley John English author. He was born at Ludlow, Aug. 7, 1855, and was educated at Shrewsbury and Christ Church, Oxford. He became a harrister, but devoted most of his time to writing and in 1889 published *The House of the Wolf*. Other historical novels followed, including *A Gentleman of France*, *Under the Red Robe*, *Shrewsbury*, *The Castle Inn*, *Ovington's Bank* and *Queen's Folly*. He died April 12, 1928.

Weymouth Seaport and market town of Dorset. It lies 8 m. from Dorchester, on the S. and G.W. Rlys. It was popularised as a watering place by George III. It has considerable coastal shipping traffic, and there is a regular steamboat service to the Channel Islands. Pop (with Melcombe Regis) 21,982.

Whales Order of mammals inhabiting the sea. They are divided into the fossilised whales, *Mystacoceti*, whalebone whales and *Odontoceti*, toothed whales which include sperm and bottle-nosed whales and dolphins. They vary in length between four and a hundred feet. They are warm-blooded, breathing through lungs, having no scales, reproducing and feeding their young like land mammals.

WHALING Early whaling was carried out by means of harpoons flung by men in small boats, but now a Svend Foyn gun is used, which is mounted in the fore-castle of a whaling ship. When the gun is fired, a harpoon capped by an explosive is released, which explodes three seconds after reaching the whale.

Whaling is carried on in the Falkland Islands and the Arctic and Antarctic Oceans. Blubber is now stripped by machinery, and the carcasses are used for oil and fertiliser.

Whalley Village of Lancashire. It is 32 m from Manchester and 8 from Blackburn, on the L.M.S. Rly. The parish church was once that of a Cistercian abbey of which some remains still exist. Pop 1378.

Wharfe River of Yorkshire. It rises on the moors in the north west of the county and joins the Ouse at Cawood. It passes by Ilkley and Wetherby and has a length of 60 m. The picturesque district through which it flows is called Wharfedale.

Wheat Grain of the genus *Triticum*. It bears a dense four-sided spike and the flowering glumes may be bearded or beardless. Within the glumes are the florets, each of which bears a grain which is the edible part of the grass. This is a cereal, the most important food of temperate climates, and next to rice the most largely used of any grain. When ground it yields a fine white flour which is made into bread, cakes, pastry, etc. Many varieties of wheat are cultivated. The most important is *Triticum sativum*. It will grow in almost every climate and the yield per acre is as high as 60 bushels. It is rich in starch. Bran is produced from its coating. It is liable to attack by rust, hunt and other diseases. Wheat has been widely grown for food since pre-historic times. In the 19th century experiments resulted in a great improvement in its quality, the introduction of new fertilisers added to its productivity and varieties were evolved that will grow on soils previously regarded as unsuitable. The result was a glut of wheat which was very pronounced in 1932, and in 1933 an international Wheat Conference was held in London, with the object of establishing a balance between the production and consumption of wheat.

In 1931 the world's wheat crop amounted to 545,000,000 quarters, the largest producers were Russia, the United States, Canada, India, Argentina, France, Australia and Italy. The British production was 5,000,000 quarters and the consumption 30,000,000, leaving 25,000,000 to be imported. The estimated world production for 1931 is 633,000,000 of 480 quarters. In 1917, to encourage the growing of wheat in Great Britain, an Act of Parliament fixed a minimum price, but this scheme was abandoned in 1921. In 1931, when the country adopted protection for home industries, the question of the growth of wheat was again in the foreground. The policy adopted was that every miller should be required to use a quarter of home-grown wheat and after the conference at Ottawa, a quarter of Empire-grown wheat. A wheat commission was set up and to this every miller and every importer of wheat must pay 10s 8d per cwt of his output of flour. These payments, which began on July 23, 1932, secure a minimum price for British wheat.

Wheatear Small bird (*Saricola aenanthe*) allied to the stonechat and the whinchat. It is found in the northern parts of Europe, Asia and America, chiefly on waste land. It is seen in England during the summer. Bluish-grey on the back, the bird has a light buff breast and a white rump which is very noticeable in flight.

Wheatley Urban district of Oxfordshire. It is 8 m from Oxford and 48 from London by the G W Rly. Pop (1931) 1269.

Wheatstone Sir Charles English Inventor. Born near Gloucester in Feb. 1802, he was appointed Professor of Experimental Philosophy in 1834 at King's College, London, where he investigated the properties of sound, light and electricity. In conjunction with W. F. Cooke he patented, in 1837, a system for giving signals in distant places by means of electric currents. In 1838 he invented the stereoscope. He was elected F.R.S. in 1837, was knighted in 1868, and died Oct. 19, 1875.

Wheel Circular disc or frame revolving on an axis, calculated to further motion and also used for mechanical purposes. Wheels in the earliest vehicles were round discs cut out of solid wood. This type of wheel still exists in primitive countries. Various types of wheels are used in modern mechanics, including the eccentric wheel, that is, a wheel having its axis not in the centre. A form of torture known as breaking on the wheel formerly existed in many countries, prisoners being laid on a wheel and their limbs broken by the executioner with an iron bar.

Wheel Lock An early kind of gunlock in which sparks were struck from a flint, or piece of iron pyrites, by a revolving wheel.

Whelk Sea fish with a spiral shell. Whelks are found over a wide area stretching from the North Atlantic to the Bay of Biscay, and from the coast of America to Siberia. The whelk is carnivorous and eats living and dead shell fish. It is caught in wicker pots and by dredging.

Whernside Mountain of Yorkshire. It is on the moors in the north-west of the county. It is 2414 ft high and is best ascended from Giggleswick.

Whewell William English scientist and philosopher. Born at Lancaster, May 24, 1794, and educated at Trinity

College, Cambridge, in 1838 he became Professor of Moral Theology at Cambridge, in 1841 Master of Trinity and president of the British Association, and in 1855 Vice-Chancellor of the University. He wrote on astronomy, physics, philosophy, architecture, and many other subjects. He died March 6, 1866.

Whey Watery part of the milk. It is separated from the curd usually in the process of cheese making.

Whickham Urban district of Durham. It is 3½ m from Gateshead. The industries are connected with steel and chemicals. Pop (1931) 20 782.

Whig English political party. The name, originating in Scotland, was connected in the 17th century with Presbyterianism and therefore rebellion, and became current in England in 1679 during the struggle to exclude James, Duke of York, from the throne. It was applied to those who urged the waiving of the hereditary succession in the national interest. The opponents of the Whigs were the Tories (q.v.). The party supported the Hanoverian Succession and enjoyed undisputed political power between 1714 and 1760. At the end of the century it espoused the cause of political and social reform and in the early 19th century developed into the Liberal party. See LIBERAL.

Whinchat Small bird (*Saricola rubetra*). It resembles the stonechat, but is distinguished from it by white streaks on the head and neck. It visits England in the summer and lays its eggs in nests on the ground.

Whinstone Scottish term for any basaltic or unstratified rock.

Whip English parliamentary official. Abbreviated from the "whipper-in" of a hunt, the name denotes a member of a political party chosen by its leader, whose special duty it is to secure the attendance of all members of his party on necessary occasions. The name is also used for the summons calling members to attend on these occasions. The Whips must always be present at debates, and in a position to inform their leader of the state of the House.

Whippet Breed of dog, used for coursing and racing. It resembles the greyhound, but is smaller, and was probably derived by crossing terriers and Italian greyhounds.

Whippingham Village of the Isle of Wight. It stands on the Medina, about 4 m from Newport. Near is Osborne House, a favourite residence of Queen Victoria. Pop 2033.

Whip-poor-will Nightjar (*Antrostomus vociferus*) of N America. It is 9 to 10 ins long, with brown plumage mottled with black and cream. There is a white band at the throat, and at the base of the bill are a number of stiff elastic bristles. The name is derived from the characteristic call, uttered only at night.

Whipsnade District of Hertfordshire. It is 34 m from London and 3 from Dunstable. Formerly part of the Ashridge estate, it was bought in 1927 by the Zoological Society and laid out as a zoological garden where many of the animals live in the open air.

Whip-snake Snake of the genus *Dryophis*. It is a native of India and Malaya, and its long, slender shape facilitates tree climbing.

Whisky Spirit made by the distillation of the fermented extracts from malted or unmalted cereals, potatoes or any starch yielding material. The best whisky is made from unmalted barley, but it can be made from malted barley, or a mash of barley with oats, rye or wheat. The liquid must be kept in wooden casks before it is ready for drinking. In Great Britain there is a duty of £3 12s 6d per proof gallon on whisky.

Whist English card game. It originated from a combination of several older games, probably about 1621 and was so called because it needed silence and concentration. It is played by four persons, two sides of two partners each, with a full pack of 52 cards equally divided, the last card dealt being turned up and declared trumps. A game consists of seven points, each trick above six counting one towards the score.

Whistler James Abbott McNeill Ameri, an artist. Born at Lowell, Mass., July 10, 1834, he studied art in Paris later settling in London. His numerous etchings include, "The Thames Set," "The Venice Sets," and "The Paris Set," while of his many portraits the two outstanding ones are, "The Artist's Mother" and "Portrait of Carlyle." He died July 17, 1903.

Whitby Urban district, market town, seaport and pleasure resort of Yorkshire (N.R.). It stands at the mouth of the Esk, on the North Sea, 30 m from Scarborough and 244 from London, on the L.N.E. Ry. The chief object of interest is the ruined abbey on the cliffs. Founded by King Oswiu, it has associations with S. Hilda and Caedmon and is now national property. The town is famous for its jets. Fishing is an important industry. On Dec. 16, 1914, the town and abbey were damaged by a German bombardment. Pop. (1931) 11,441.

Whitchurch Village of Middlesex, now part of the urban district of Wealdstone and Edgware. It is famous for its church where Handel was organist from 1718 to 1721.

Whitchurch Urban district and market town of Shropshire. It is 19 m from Shrewsbury and 171 from London, on the G.W. and L.M.S. Ry. Brewing is an industry and there is an agricultural trade. Pop. (1931) 6016.

Whitchurch Town of Hampshire. It is 7 m from Andover and 59 from London, on the S. and G.W. Ry. The parish church possesses a curious Saxon stone. The town has an agricultural trade. Pop. 2461.

White Sir George Stuart. British soldier. Born in Whitehall, Co. Antrim, July 6, 1835, he was educated at Sandhurst, and served in the Indian Mutiny, Afghan War (during which he gained his V.C.), Egypt, Burma and Baluchistan. In 1893 he succeeded Lord Roberts as commander-in-chief in India. In the South African War he held Ladysmith for 119 days until relieved by Lord Roberts, March 1, 1900. He died June 24, 1912.

White Gilbert. English naturalist. Born at Selborne, Hampshire, July 13, 1720, he was educated at Basingstoke and Oxford. He is remembered chiefly by his *Natural History and Antiquities of Selborne*, published in 1789. He died June 26, 1793.

White Henry Kirke. English poet. He was born Mar. 21, 1785, the son

of a Nottingham butcher. He entered a lawyer's office, but abandoned this career to become a clergyman and went to St. John's College, Cambridge. Shortly after he died of consumption, Oct. 19, 1806. Kirke White attracted attention by his volume of poems published in 1803, but is better known to-day as the author of the hymn, "Oft in danger, oft in woe."

White Arum South African plant (*Richardia*) of the order *Araceae*, popularly known as the arum lily. The leaves are arrow-shaped, and the white spathe or mantle enfolds a central column round which the minute yellow blossoms are clustered. The British cuckoo pint, or wake robin is of the same family.

Whitebait Fry of sprats and herrings, taken in bag nets at the mouth of the Thames and in other estuaries, during the months March to August.

Whiteboys Agrarian association formed among the Irish peasantry about 1760. It aimed at redressing their grievances against their landlords, and resisting the collection of tithes. They wore white shirts, in which they went on night raids.

Whitechapel District of London. It is to the east of the city in the metropolitan borough of Stepney, and is largely inhabited by Jews. S. Mary's and S. Jude's are its chief churches. Here are Toynbee Hall and the Whitechapel art gallery. It has stations on the D. and E.L. Ry.

White City Name given to an exhibition ground at Shepherd's Bush, London. It was opened in 1908 and a number of exhibitions were held there, except during the war period (1914-18) when it was used for military purposes. It possesses a track for greyhound racing. In 1932 a cinder track was constructed for athletic meetings.

Whitefield Urban district of Lancashire. It is 6 m from Manchester and 193 from London by the L.M.S. Ry., and is a centre of the cotton industry. Pop. (1931) 9107.

Whitefield George. English religious leader. Born at Gloucester Dec. 16, 1714, at Oxford he met John and Charles Wesley, already engaged in evangelistic work. He received Deacon's Orders in 1736, then went to America to join Wesley who was establishing missions there. After his return he preached in the open air with such success that he spent much of his life as a travelling preacher. His Calvinistic views led to a breach with the Wesleys, but he received great support from others, who built him a chapel in London. He made seven evangelistic trips to America, dying there, Sept. 30, 1770.

Whitefish Fish of the genus *Coregonus*. It is related to the salmon, and found chiefly in large inland lakes. It is a native of N. America and the cold to temperate regions of Europe and Asia. The pollan, the vendace, and the gwyniad are British species.

White Flag Sign of truce or surrender. A white flag, or something white used as a substitute, is recognised in all civilised armies as a flag of truce or as a sign of surrender, when flown over a place, position, or body of men.

Whitehall Street of London. It runs from Charing Cross to Parliament Street, and in it are some of the Government offices. Old Whitehall Palace, now the

United Services Institute and Museum, was designed by Inigo Jones, and from the banqueting hall Charles I. walked out to his execution in 1649. The original Whitehall was built by Henry VIII and was burned down in 1698. In the middle of the thoroughfare is the Cenotaph erected in memory of those who fell in the Great War.

Whitehaven Borough, seaport and market town of Cumberland. It is 303 m from London, on the L M S Ry. There is a good harbour from which coal, pig iron, ore and steel are shipped. The industries include coal and iron mining, ship-building, etc. In 1915 the town was bombarded by a German submarine. Pop (1931) 21,142.

White Hellebore Perennial coarse herb (*Veratrum album*) also called false hellebore. A native of Europe, it has long vertical leaves and panicles of white flowers on the upper portion of the stem. The rootstock is poisonous, yielding veratrin, a substance used medicinally in muscular and cardiac affections.

White Horse Figure of a horse cut in chalk on a hillside. There are several such in England. The most famous is near Wantage in Berkshire in the Vale of the White Horse. The figure is 374 ft. high and according to tradition commemorates the victory of Alfred over the Danes. There are other figures of the kind near Wymouth and at Bratton, and several other places on the Wiltshire hills.

White House Official residence of the president of the United States. It is at Washington and has been used for its present purpose since 1800.

White Lead Carbonate of lead. A dense white powder, it is insoluble in water, but is easily dissolved in dilute nitric acid or acetic acid. It is made by an elaborate process, thin sheets of lead being placed in earthenware pots containing dilute acetic acid and then packed round with special tan and left to stand for several months. The process produces a substance which is baked, ground and dried, and used in the manufacture of paint. The manufacture of white lead is a hazardous occupation owing to the risk of poisoning, and laws have been passed to protect the health of its workers.

White Sea Branch of the Arctic Ocean. It lies between the peninsulas of Kamia and Kola, and is over 300 m long. Through its chief port, Archangel, it is connected with the Caspian and Black Seas by canal, but owing to ice it is only open to shipping in the summer.

Whitethroat Migratory bird of the family *Sylviidae*. The larger whitethroat (*Sylvia cinerea*), is 5½ to 6 in long, with greyish or reddish brown plumage above, and white to buff beneath. The lesser whitethroat (*S. curruca*) is 5½ in long. Both are common summer visitors to Britain.

Whitgift John, English prelate. He was born at Great Grimsby about 1530, and educated at Wellow Abbey, near Grimsby, St. Anthony's School, London, and Cambridge, where he became Fellow of Peterhouse in 1555. He was ordained in 1560, became Dean of Lincoln in 1571, Bishop of Worcester in 1577, and Archbishop of Canterbury in 1583. He vigorously supported Queen Elizabeth's policy of religious uniformity. He died Feb 20, 1604.

Whithorn Burgh and seaport of Wigtownshire. It is on the Irish Sea, 11 m from Wigtown, on the L M S line. There are ruins of a priory and the town was the seat of a bishopric before the Reformation. It has a trade in cattle. Pop (1931) 951.

Whiting Marine food fish (*Gadus merlangus*) related to the cod. It is usually 1½ lb or so in weight, and is esteemed for the table. The whiting-pout, an allied species of W European waters, has a deeper body and has a barbel on the chin.

Whitley John Henry, English politician. He was born in Halifax, Feb 8, 1866, and educated at Clifton College and London University. He represented Halifax as a Liberal from 1900 to 1928, and was Speaker, 1911-1928. On his retirement he was awarded the Order of Merit. He was chairman of the committee on Relations between Employer and Employed in 1916. From this developed the Whitley Councils, an attempt to satisfy the claim of organised labour to a measure of control in industry. In 1929 he was appointed chairman of the Royal Commission on Indian Labour, and in 1930 chairman of the B B C. He died on Feb 3, 1935.

Whitley Bay Pleasure resort of Northumberland. It stands on the North Sea, 2 m from Tynemouth, on the L N E Ry. It has fine sands, pleasure gardens and other attractions for visitors. The urban district is known as Whitley Bay and Monkseaton. Pop (1931) 21,210.

Whitlow Inflammation of the finger especially round the nail. Hot fomentations should be applied to the finger, and the whitlow should be opened by a doctor to allow the escape of pus.

Whitman Walt, American poet. Born at West Hills, Long Island, N Y, May 31, 1819, he left school early, and tried various occupations before he turned to literature. His *Leaves of Grass* and a prose work, *Specimen Days*, are the extent of his writings, but they made him the most vital literary force in America. He died March 27, 1892.

Whitstable Urban district and pleasure resort of Kent. It is on the estuary of the Thames 6 m from Canterbury, on the S Ry. The chief industry is oyster fishing. There is a small harbour, and coasting trade, but the place is better known as a seaside resort for Londoners. Pop (1931) 11,201.

Whitsunday Feast of the Christian Church. It is celebrated six weeks after Easter Sunday, in memory of the descent upon the disciples of the Holy Ghost. It is also called Pentecost, the name given in the early days of the Church to the whole fifty days following Easter.

Whittier John Greenleaf, American poet. He was born in Haverhill, Mass. Dec 17, 1807, the son of a struggling farmer. To his schoolmaster, Joseph Coffin, he owed his deep love of nature. For a time he was a journalist, but poetry claimed him, and his ballads, *Barclay of Ury* and *Barbara Frielie* rank high. He belonged to the Society of Friends, and his poems reflect much of the Quaker spirit. It is in the spiritual and mystic spheres, as in *My Psalm*, that he excels. He died Sept 7, 1892.

Whittington Richard, Mayor of London. Born in Gloucestershire about 1358, at thirteen he arrived in

London to seek his fortune. He became an apprentice to Sir John Fitz-Warren, a mercer, eventually marrying his daughter. He was Mayor in 1398, 1406, and 1419, was knighted by King Henry V, and died in 1423. The story of his leaving London in despair, the sound of Bow Bells calling him back, may be considered true, but his cat is a creature of legend.

Whittlesea Urban district of Cambridgeshire. It is in the Isle of Ely, 95 m. from London and 5 from Peterborough, on the L.N.E. Ry. Around it is the land that was formerly Whittlesea Mere, the largest sheet of water in England. Pop (1931) 8299.

Whitwood Urban district of Yorkshire (W.R.). It is about 9 m. south east of Leeds, and stands on the Calder. Coal mining is its chief industry. Pop (1931) 6196.

Whitworth Urban district of Lancashire. It is 3 m. from Rochdale, and 200 from London by the L.M.S. Ry. Pop (1931) 8360.

Whitworth Sir Joseph. English engineer. Born at Stockport Dec. 21, 1803, he was educated privately. In 1833 he established a tool making business in Manchester, and devoted himself to the manufacture of precision tools and improvement of lathes, planing and drilling machines, etc. He perfected a system of standard measures and gauges, and devised methods for securing greater accuracy in rifles and cannon. His works were eventually united with Armstrong's of Elswick. He died Jan. 22, 1887.

Whooping-cough Disease affecting the respiratory organs. It is characterised by fits of convulsive coughing, accompanied by the peculiar sound known as a "whoop." It frequently occurs in childhood, and occasionally in adult life. It has a period of incubation of from two to ten days, and the first stage is similar to catarrh. This lasts about fourteen days, when the coughing increases, and the "whoop" begins, lasting generally for about two months, and becoming gradually less fierce. There is no special treatment, but fresh air and sunshine are beneficial.

Whortleberry Name sometimes used for the bilberry (q.v.).

Whymper Edward. British mountaineer. Born in London, April 27, 1840, for some years he continued his father's wood engraving business in Lambeth. His greater fame rests on his mountaineering feats. After seven vain attempts he was the first to reach the summit of the Matterhorn, in July, 1865. He later explored Greenland and visited the Andes and the Canadian Rockies, leaving several works recording his experiences. He died Sept. 16, 1911.

Whyte-Melville George John. English novelist. Born June 19, 1821, he was educated at Eton, entered the army in 1839, and saw service in the Crimea. He then devoted himself to writing, most of his books dealing with sport. His first novel, *Digby Grand*, appeared in 1863. He was killed while hunting, Dec. 5, 1878.

Wick Burgh, seaport and market town of Caithness, also the county town. It stands on the east coast, 200 m. from Thurso and 729 from London on the L.M.S. Ry. There is a good harbour, the place

is a centre of the herring fishery, and from here steamers go to the Orkney and Shetland Islands. Nearby are the relics of Wick Castle, called the Old Man of Wick. Pop (1931) 7648.

Wicken Village of Cambridgeshire. It is 7 m. from Ely, and has an interesting old church. Near is Wicken Fen, a sanctuary for insects and the property of the National Trust. It covers 640 acres and was taken over in 1928.

Wicklow County of the Irish Free State. In the province of Leinster, it has a coastline on the Irish Sea. Its area is 781 sq. m. Wicklow is the county town, other places are Arklow and Bray. The surface is mountainous and much of it is devoted to sheep rearing. Minerals are worked. Noted heathy spots are the vales of Avoca and Glendalough. The highest mountain is Lugnaquilla, over 3000 ft. high. Pop (1926) 57,591.

Wicklow County town and pleasure resort of Co. Wicklow, Irish Free State. It stands at the mouth of the river Vartry, 28 m. from Dublin, on the G.S. Ry. There is some shipping. Pop (1926) 3025.

The title of Earl of Wicklow has been held since 1793 by the family of Howard. The earl's eldest son is called Baron Clonmore.

Widdecombe Village of Devonshire. It is 3 m. from Ashburton and, being on Dartmoor, is called Widdecombe-on-the-Moor. It is famous for its church, one of the largest in the county and called the cathedral of Dartmoor, and for the song, "Widdecombe Fair," which commemorates its annual fair.

Widgeon A species of wild duck (*Anas penelope*), which abounds in Europe and Northern Asia. The drake has a chestnut head and neck, cream forehead, grey flanks, and green and black wings. It has a cry which sounds like "wheew duck."

Widnes Borough of Lancashire. It is on the Mersey, 12 m. from Liverpool, and is served by the L.M.S. and C.L. Ry. There are large docks on the river. The chief industry is the making of alkalis and soap, while another is copper smelting. A transporter bridge crosses the river here. Pop (1931) 40,608.

Wiesbaden City, spa and pleasure resort of Germany. It is beautifully situated among the Taurus Mts. near the Rhine, 5 m. from Mainz, on the main railway line from Cologne to Frankfurt. There are beautiful gardens and other attractions. The place is much visited by persons wishing to drink its medicinal waters, and there is a fine kurhaus. Before 1872 Wiesbaden was famous for its gaming tables. From 1815 to 1866, when it became Prussian, the city was the capital of Hesse Nassau. The city has a trade in wine. Pop (1930) 151,961.

Wig Artificial head of hair, which is worn for ornament, disguise, or as a symbol of office. Wigs were known in the early days of Egypt, Greece and Rome. In the sixteenth and seventeenth centuries periwigs developed from the simple simulation of real hair to elaborate, curled coiffures. They died out gradually, and are now confined almost entirely to members of the legal profession, as part of their official costume.

Wigan County borough and market town of Lancashire. It is 18 m. from Manchester and 194 from London, on the

river Douglas It is served by the L.M.S. Rly. It has cotton mills, clothing factories and engineering works, and around are coal mines. Pop. (1931) 83,357.

Wight Isle of England. It covers 147 sq. m., and is separated from the mainland of Hampshire by the Solent and Spithead. It is chiefly a holiday resort, and is famed for its quiet beauty and its mild climate. Newport is the capital and around the coast are Ventnor, Freshwater, Cowes, Ryde, Shanklin, Sandown and other watering places. It has a railway system centring on Newport, and is reached by steamers from Portsmouth, Southampton and Lymington. The island contains Carisbrooke Castle, Osborne House, the Undercliff, Brading, and other places of beauty or historic interest. It has its own county council, but for some purposes is in the county of Hampshire. It is in the diocese of Portsmouth. The island has its own governor. Pop. (1931) 88,400.

Wightman Cup Trophy at lawn tennis. It is competed for each year by women players from Britain and the United States.

Wigston Urban district of Leicester shire. It is 95 m. from London and 4 from Leicester, and is a junction on the L.M.S. Rly. It is called sometimes Wigston Two Steeples because it has two fine parish churches. The making of hosiery is the main industry. Pop. (1931) 11,393.

Wigton Urban district of Cumberland. It is 12 m. S.W. of Carlisle, and 311 from London by the L.M.S. Rly. There are breweries and tanneries. Near was the Roman station of old Carlisle. Pop. (1931) 3521.

Wigtown Burgh and seaport of Wigtownshire, also the county town. It stands on Wigtown Bay and has a station on the L.M.S. Rly. The town has a memorial to two martyrs, women who were drowned in the Solway because they were Covenanters. Pop. (1931) 1261.

Wigtownshire County of Scotland. In the south-west of the country, it is part of the district called Galloway. It covers 487 sq. m., and has a long coastline on the Irish Sea. Luce Bay and Loch Ryan almost cut it into two. Wigtown is the county town, other places are Stranraer, Portpatrick, Newton Stewart, Whithorn and Glenluce. The rivers include the Cree and the Luce. In the west is the peninsula called the Rhinns of Galloway and the county includes several islands. Cattle and sheep are reared, and milk and butter produced. Pop. 29,299.

Wigwam Anglicised form of an Algonkian phrase denoting a conical hut made of wooden poles lashed together at the top, and covered with bark. It is used generally for any of the houses, or skin tents (properly called tepees) of the North American Indians.

Wilberforce Samuel. English prelate. The third son of William Wilberforce, the slavery abolitionist, he was born in Clapham, London, Sept. 7, 1805, and educated at Oxford. Ordained in 1828, he was appointed rector of Brightstone, Isle of Wight, Canon of Winchester in 1840, Dean of Westminster in March, 1844, and Bishop of Oxford the same year. In 1869 he was translated to Winchester. He was killed July 19, 1873, while riding near Dorking.

Wilberforce William. English philanthropist. Born in Hull,

Aug. 24, 1759, he was educated privately and at Cambridge. In 1780 he was returned to Parliament for Hull. Shortly afterwards he was converted to Evangelical Christianity and, in 1788, soon after meeting Thomas Clarkson (q.v.), he began his long and arduous fight for the abolition of slavery against formidable opposition, both within the House and without. The bill for abolition finally passed, March 25, 1807. Wilberforce took an active interest in many philanthropic schemes. He died July 29, 1833, and was buried in Westminster Abbey.

Wild Jonathan. English criminal. Born at Wolverhampton about 1682, he came to London, where in association with other criminals he built up a connection as receiver of stolen goods. He employed numbers of thieves, each one being allotted his special sphere. He was hanged May 24, 1725.

Wilde James. British pugilist. Born at Craig Troharris, Glamorgan, May 12, 1802. He held the flyweight championship of the world, though 14 lbs. under the regulation weight. Since 1922 he has only acted as referee.

Wilde Oscar O'Flahertie Wills. English author. Born in Dublin, Oct. 15, 1856, he was educated at Dublin and Oxford. While still at college he laid the foundation of the aesthetic cult ("Art for Art's sake"), satirised in Gilbert and Sullivan's *Patience*. Among his plays are *Lady Windermere's Fan*, *A Woman of No Importance*, *The Importance of Being Earnest*, among his novels, *The Picture of Dorian Gray*, and *Lord Arthur Savile's Crime*. In May, 1895, Wilde was sentenced to two years' imprisonment for immoral practices, subsequently retiring to Paris, where he died Nov. 30, 1900.

Wilfrid English saint. Born about 634, he became a monk at Lindisfarne and was soon influential in Northumbria. About 665 he was made Bishop of York, but he was soon at variance with Theodore, Archbishop of Canterbury. For a time he lived in Compiègne, but in 688 he returned to Northumbria, and was restored to his see, only to be driven out by King Egfrith. In 685 he was again restored, but was again expelled in 691. He died at Eborac in 709. Wilfrid built churches at Hexham, Ripon and York.

Wilhelmina Queen of the Netherlands. She was born at the Hague, Aug. 31, 1880, the only child of William III by his second marriage. She succeeded to the throne, Nov. 23, 1890. She married on Feb. 7, 1901, Henry Wladimir Albert Ernst, Duke of Mecklenburg-Schwerin. On April 30, 1909, she gave birth to a daughter, Princess Juliana.

Wilhelmshaven Seaport of Germany. It stands on the North Sea, 41 m. from Bremen. Before the Great War it was Germany's chief naval base on the North Sea, with accommodation for docking and repairing the largest warships. In 1919 the fortifications were dismantled and the harbour works fell into disuse. The port was created in 1853 and named after William I, King of Prussia.

Wilkes John. English politician and journalist. He was born in London in 1727. Though a man of dissolute character, he was instrumental in arousing the nation to the need for Parliamentary reform,

and in establishing the right of the Press to discuss public affairs. In 1764 he was expelled from Parliament and outlawed for a libel contained in his paper, *The North Briton*. He was three times returned to Parliament as member for Middlesex in 1768 and 1769, but he was not allowed to take his seat until 1774. He was Lord Mayor of London in 1774. He died Dec. 26, 1797.

Wilkie Sir David Scottish painter Born Nov. 18, 1785, in 1806 he settled in London, where his "Village Politicians" and "Blind Fiddler" gained him his R.A. in 1811. In rapid succession came his portrait of Sir Walter Scott, "Card Players," "Rent Day," "Reading the Will," and a host of pictures depicting humble life. His best known work was "Chelsea Pensioners listening to the news of Waterloo." He died June 1, 1841.

Will Document by which a person called the testator disposes of property on death. By English law wills must be in writing and all signatures of the testator witnessed by two persons. The witnesses should be persons who have no interest in the will. In Scots law a will need not be witnessed if it is in the hand writing of the testator. The will of a sailor at sea or of a soldier on active service need not be in writing.

No person under 21 years of age can make a will. A will becomes invalid if a later will is made or if the testator marries. A will can be altered by the addition of a codicil. In cases where a good deal of property is at stake, and several persons are interested in it, then the will should be drawn up by a solicitor. A will must name one or more executors or trustees whose duty it is to have it proved and to carry out its provisions. The property of persons who die intestate, or without making a will, is dealt with by taking out letters of administration. See EXECUTOR.

Willenhall Urban district of Staffordshire. It is 3 m. from Wolverhampton and 122 from London by the L.N.S. Rly. Here are metal manufactures Pop. (1931) 21,147.

Willesden Urban district of Middlesex. It is 6 m. to the north west of the city. Here is a great junction on the L.M.S. line. The urban district includes Cricklewood, Brondesbury and Harlesden Pop. (1931) 184,410.

Willett William English builder Born in Sept. 1856, at Farnham, Surrey, he was well known in London as a builder of beautifully designed houses, but he is famous for his Daylight Saving scheme, which was first put into operation in England in 1916. He died March 4, 1915. See DAYLIGHT SAVING.

William I. King of England, surnamed the Conqueror. He was born in 1027, the natural son of Robert II. Duke of Normandy, and succeeded to the dukedom in 1035. He invaded England in 1066, landing at Pevensey on Sept. 28, and defeating the English army under King Harold at Senlac, near Hastings, on Oct. 14. After his coronation at Westminster at Christmas, 1066, he had to quell insurrections in various parts of the country and later in Normandy. He carried out a complete survey of his English realm, the results of which are preserved in Domesday Book (q.v.). He died Sept. 9, 1087.

William II. King of England, generally known as William

Rufus. He was born about 1058, the third son of William the Conqueror. He gained military successes in Normandy and Scotland, but his cruelty and profligacy earned for him the hatred of his subjects, and there was little sorrow when he was found dead in the New Forest with an arrow in his breast, Aug. 2, 1100.

William III. King of Gt. Britain. He was born, Nov. 4, 1650, the posthumous son of William II. Prince of Orange and Mary, daughter of Charles I. of Gt. Britain. Appointed captain general of the Dutch forces when he had scarcely reached manhood, he carried on the struggle of the Dutch against Louis XIV. with gallant determination. In 1677 he married Mary, daughter of James II. of Britain. In 1689 after the deposition of James II. (q.v.) he and Mary became joint sovereigns of Britain, his main object in accepting the crown being to ensure British participation in the War of the Grand Alliance (q.v.). The expenses of the war necessitated the institution of the National Debt in 1695. His last years were occupied with negotiations concerning the Spanish Succession (see SPAIN), and war had just been declared when William died March 8, 1702.

William IV. British king. He was the third son of George III. and Charlotte Sophia, of Mecklenburg-Strelitz. After a term of service in the navy he was created Duke of Clarence in 1789 and became Lord High Admiral of England in 1827. After a twenty years' association with Mrs. Jordan (their children bearing the name of Fitzclarence), he married Adelaide of Saxe-Meiningen, but had no issue. He succeeded George IV. on the throne in 1830. The Reform Act of 1832 was the outstanding measure of his reign. He died June 20, 1837.

William I. King of Prussia and German Emperor. Born March 22, 1797, second son of Frederick William III., King of Prussia, he received a military training and took part in the final campaigns of the Napoleonic Wars. Conservative in his views, he supported repression of the revolutionary movement of 1848. In 1861 on the death of his brother, Frederick William IV., he became king. Antocratic in temper, and a believer in military power, he worked in harmony with Bismarck (q.v.) in carrying out the policy which led to the formation of the German Empire. During the Franco-Prussian War he was in command of the Prussian forces and was present at the victories of Gravelotte and Sedan. He was proclaimed German Emperor at Versailles, Jan. 18, 1871, and died at Berlin, March 9, 1888.

William II. German Emperor and King of Prussia. He was born at Berlin, Jan. 27, 1859, the eldest son of the Crown Prince Frederick (afterwards Frederick III.) and of Victoria (eldest daughter of Queen Victoria). He married on Feb. 27, 1881, the Princess Augusta Victoria of Schleswig-Holstein, by whom he had six sons and one daughter. When he became German Emperor, June 15, 1888, he had received a thorough military training, but his character was markedly immature and overweening. Within two years of his accession Bismarck was dismissed, and the Emperor went ahead, sometimes very imprudently, with his policy of expanding Germany's power. At the beginning of the Great War he directed operations in person, but later retired into the background.

On Oct. 9, 1918, he abdicated and crossed the Dutch frontier to reside at Doorn Castle

William the Silent, Prince of Orange-Nassau. Born in Nassau April 25, 1533, he was favoured by the Emperor Charles V., and Philip II made him stadtholder (governor) of Holland, Zealand and Utrecht. In 1567 he espoused the cause of the Netherlanders against Spanish domination, and of Protestantism against Roman Catholicism. He failed largely through religious dissensions to unite all the Netherlands provinces into one independent state, but in 1579 the Union of Utrecht established the seven Protestant United Provinces. He was killed by an assassin July 9, 1584

Williams Sir George. Founder of the Young Men's Christian Association. Born at Dulverton, Somerset, Oct. 11, 1821, he went to London in 1841, and eventually became partner in the drapery firm, Hitchcock and Williams, St. Paul's Churchyard. He took an active interest in religious work, and on June 6, 1844, twelve men met in his bedroom and founded the Y M C A (g v). He was knighted in 1894, and died at Torquay, Nov. 6, 1905

Williamsburg City of Virginia. It is 47 m. from Richmond, on the James River. Here is William and Mary College, founded in 1693, the second oldest in the country. Founded in 1632, it is the oldest municipality in the United States, and was capital of Virginia from 1698-1779. In 1928 it was decided to restore it so that it will appear as it was in the 17th and 18th centuries. In May, 1862, there was an indecisive battle here during the Civil War. Pop. 30,000

Williamstown Town and seaport of Victoria, part of the municipality of Melbourne. It is 5 m. from Melbourne on the estuary of the Yarra Yarra River. It has accommodation for shipping and there are shipbuilding yards, railway shops, engineering works and canning factories

Willington Urban district of Durham. A coal mining centre, it is 4 m. from Bishop Auckland and 249 from London by the L N E Ry. Pop. (1931) 9197

Willoughby Sir Hugh. English adventurer. Born about 1500, he served against the Scots in the time of Henry VIII., being knighted in 1544. In 1553 he was appointed commander of a fleet of three ships, sent out to find the north-east passage. With two of his ships he reached Lapland, where he died of scurvy in 1554

Willoughby de Eresby Peregrine Bertie. English soldier and statesman, famous for his many diplomatic and military services to Queen Elizabeth, he was born Oct. 12, 1555, at Lower Wessell, Cleveland, during the temporary absence from England of his parents. From 1582 onwards, he was sent on various diplomatic missions to Denmark, which he accomplished successfully. In 1586 he routed the Spaniards at Zutphen, in the engagement that cost Sir Philip Sidney his life. He also served in France and Scotland. He died June 25, 1601

Willow A tree or shrub, belonging to the botanical family *Salicaceae*, and varying in height from a few inches to 120 feet. The leaves are longer than broad. The flowers are borne on catkins, which appear

before the leaves. Male and female catkins grow on separate trees, and cross-pollination is effected by insects and the wind. Willow is used as timber and wood pulp, and for wicker and basket-making. The timber of one variety is used for making cricket-bats, the wood of the female tree being preferred for this purpose.

Willow Pattern Ware. Chinaware bearing a design which copies the original blue china of Nanking. It was introduced into English porcelain by Thomas Turner of Caughley, about 1700. The blue is printed under the glaze. The scene depicted is a Chinese one, in which three men, according to a legend, are crossing a bridge, in pursuit of two runaway lovers, who have escaped and changed themselves into two doves, who fly freely above them

Wills Family of English tobacco manufacturers. The founder was Henry Overton Wills (1761-1828), who married Anne Day, daughter of a tobacco manufacturer, and gradually obtained a controlling interest in the business. From this beginning grew up the Imperial Tobacco Co. (of Great Britain and Ireland) Limited, formed in 1901, and uniting many competing firms. His grandson, Henry William Wills (born Sept. 1, 1830, died Jan. 29, 1911) became the first Baron Winterstoke. Others were, Sir Edward Payson Wills, Bart. (1834-1910), and Sir Frederick Wills, Bart. (1838-1909). Their united benefactions to Bristol were very large. Gilbert Alan Hamilton Wills, 1st Baron Dulverton (born March 28, 1880) is now president of the Imperial Tobacco Co.

Wilmington Village of Sussex. It is 8 m. from Eastbourne, and is famous for the figure of a man cut in the chalk on the hillside. This is 240 ft. high and is called the Long Man of Wilmington

Another Wilmington is a city and seaport of Delaware, U.S.A. It is 26 m. from Philadelphia and has many industries. The Swedish church here, erected in 1698, is one of the oldest buildings in the country. Pop. (1930) 106,957.

Wilmslow Urban district of Cheshire. It is 6 m. south east of Stockport, and 177 m. from London, by the L M S Ry. The town stands on the Bollin. Pop. (1931) 9760

Wilson Sir Henry Hughes. British soldier. He was born at Edgeworthstown, Co. Longford, Ireland, March 5, 1864, and educated at Marlborough and Sandhurst. He served with distinction in Burma and South Africa. In the Great War he was Assistant-Chief of General Staff to Lord French. In 1918 he was made Chief of Imperial General Staff in London, and a member of the War Cabinet, and was created a baronet in 1919. He entered Parliament in Feb., 1922, and criticised the Government's Irish policy. On June 22, 1922, he was murdered on his own doorstep

Wilson Thomas Woodrow. American president and statesman. Born at Staunton, Virginia, Dec. 28, 1856, he was educated at Princeton and Johns Hopkins Universities, becoming President of Princeton in 1902. In 1910 he resigned, having been elected Governor of New Jersey. In 1912, owing to a split in the Republican vote between Roosevelt and Taft, he was elected President of the Republic. At the outbreak of the Great War he favoured neutrality, and

he was re-elected in 1916 on the slogan, "He kept us out of the war." The continued ruthless submarine campaign, however, forced Wilson to join the Allied cause in April, 1917. He took a leading part in the peace negotiations and suggested the formation of the League of Nations. The rejection of the Versailles Treaty by the U.S. Senate and his own rejection in the presidential contest of 1920, however, led to his complete retirement from public life, and he died Feb. 3, 1924. Wilson's lofty idealism, combined with his inability to realise his own political weaknesses, and his unwillingness to listen to the advice of others, make his career one of the greatest tragedies of modern times.

Wilton Borough of Wiltshire. It stands on the Wylye, 2 m from Salisbury on the S. Rly. It gives its name to a kind of carpet made here. Here is Wilton House, the magnificent seat of the Earl of Pembroke, designed by Inigo Jones. The house is memorable for its association with Shakespeare and Sidney. Pop. (1931) 2193.

Wiltshire County of England. In the south of the country, it is wholly inland. It covers 1375 sq. m. There are hills in the north and in the south is Salisbury Plain. The county also contains Savernake Forest. Salisbury is the county town. Other towns are Swindon, Marlborough, Calne, Chippenham, Wilton, Devizes, Pewsey, Malmesbury and Warminster. The rivers include two Avons, the Nadder and the Kennet. The county is an agricultural area and supplies much milk to London. Sheep are also reared in great numbers. It contains Stonehenge and other places of beauty and interest. Notable houses are Longford Castle and Bowood. Pop. (1931) 303,258.

The Wiltshire Regiment was originally the 62nd and 99th Foot, raised in 1756 and 1824 respectively. They are called the Springers. The depot is at Devizes. The Wiltshire Yeomanry is the senior of its kind in the army.

Wimbledon Borough of Surrey. It is 8 m from London, on the S. and District Rlys. It is famous for its common, a fine open space covering 1000 acres, and for its lawn tennis ground, the headquarters of the game where, in June, the championship matches are played. On the common is a Celtic earthwork called Caesar's Camp. Pop. (1931) 59,920.

Wimborne Market town and urban district of Dorset. It is 6 m from Poole, on the S. Rly. It is famous for its collegiate church, called the Minster, a large and magnificent building with a Norman central tower. It has a library of chained books. Its trade is agricultural. Pop. 3895.

Wimborne Viscount. English title held by the family of Guest. In 1880, Sir Ivor Guest, a son of Sir Josiah Guest, who had made a large fortune from his ironworks in South Wales, was made a baron. His son, Ivor Churchill Guest, was born on Jan. 6, 1873, and educated at Eton and Trinity College, Cambridge. From 1900 to 1918 he was a Liberal M.P., and from 1915-18 he was Lord Lieutenant of Ireland. He was made a baron in 1910, four years before he succeeded his father as Baron Wimborne. In 1918 he was made a viscount.

Wimereux Pleasure resort of France, 4 m from Boulogne. There is good bathing. During the Great War the British forces had large hospitals here. Pop. 1498.

Winchcombe Market town of Gloucestershire. It is 6 m north-east of Cheltenham, and 114 m from London, by the G.W. Rly. There is a fine church, and nearby is Sudoley Castle, built in the 15th century. Pop. 2741.

Winchelsea Town of Sussex. It is 8 m from Hastings and 74 m from London, and is reached by the S. Rly. It was a Cinque Port and a flourishing place until the sea receded and left it inland.

There have been two earlier Winchelseas. The older one was destroyed by the sea in the 13th century. It was 3 m to the south-east of the present site. The newer one was built about 1300 by Edward I. in 40 squares, but in little over a century it too began to decay.

The title of Earl of Winchelsea has been held since 1628 by the family of Finch Hatton. Since 1681 it has been united with the earldom of Nottingham. The earl's eldest son is called Viscount Maldstone.

Winchester City and market town of Hampshire, also the county town. It is on the Itchen 66 m from London, on the S. and G.W. Rlys. The chief building is the cathedral, notable for its long nave, its west front, and its historic monuments. In the Shire Hall, which is part of the old castle in which the kings lived, is the so-called table of King Arthur. Other buildings are the modern Guildhall and Wolvesey Castle restored as a residence for the bishops. Two of the old gates still stand. They are the West Gate, in which is a museum, and King's Gate, over which is a church, S. Swithins, leading into the close. Near the city is the Hospital of St. Cross founded in 1136 for poor old men. The picturesque group of buildings includes a beautiful church. In the refectory, ale and bread are distributed each day to visitors.

Winchester has an agricultural trade and is a military centre, the depots of the rifle regiments being here. The diocese has been divided into three, Guildford and Portsmouth being the others. Until 1818 the city was separately represented in Parliament. Of Roman origin, it was the capital of Wessex, and for about 200 years before the Norman Conquest was the capital of England. Pop. (1931) 22,969.

Winchester Marquess of English title, the oldest of its rank, borne since 1551 by the family of Paulet. Sir William Paulet was the first holder. The 5th marquess was the defender of Basing House for Charles I., and the 9th marquess was made Duke of Bolton in 1689. In 1794, when the 6th Duke of Bolton died, his dukedom became extinct, but the marquessate passed to a descendant of the earlier Paulets.

Winchester College English public school. It was founded by William of Wykeham in 1382 and on it the English public school system has been modelled. It is controlled by a corporation of wardens and fellows. The boys are divided into scholars and commoners. The scholars live in college, the commoners live in houses near the chapel and other buildings erected in the 14th century are still used, but there are extensive modern ones. The school motto is *Manners maketh man*.

Wind Air in natural motion. Winds are caused by differences of atmospheric pressure, in turn produced by temperature differences. Air flows to a low pressure region from one where a higher pressure exists. Wind

force is measured according to the Beaufort scale

No	Wind	Velocity in m. per hour
0	Calm	0
1	Light Air	1
2	Light breeze	2
3	Gentle breeze	10
4	Moderate breeze	15
5	Fresh breeze	21
6	Strong breeze	27
7	Moderate gale	35
8	Fresh gale	42
9	Strong gale	49
10	Whole gale	59
11	Storm	68
12	Hurricane	Over 73

See TRADE WINDS

Windermere Lake of Westmorland, the largest in England. It is 10½ m long and covers about 6 sq m. The Leven takes its water to Morcambe Bay. There is a station at Lakeside on the south, and steamers go along it, touching at Bowness and Waterhead.

Windermere Urban district of Westmorland. It is near the east side of the lake of the same name, 4 m from Ambleside, and is the terminus of a branch line of the L M S Ry. The parish church has some old paintings. The urban district includes Bowness on the lake. Pop (1931) 5701.

Windflower Name by which the wood anemone (*Anemone nemorosa*) is popularly known. See ANEMONE.

Windhoek Capital of the South-West Africa Protectorate. It is 170 m by railway from Walvis Bay. It was entered by British forces in May, 1915, when the colony was captured from the Germans.

Windlass Device for raising weights. It consists of a revolving cylinder round which the hauling rope is wound by turning a oranked handle.

Windmill Machine which uses the energy of the wind to perform work. The best-known kind is a building with sails attached, the action of the wind on the sails producing a torque, from which power is transmitted to perform work. They are now used in the form of steel sail windmills, largely to pump water for rural use, and in Great Britain as generating plants for electricity.

Window Opening in the wall of a structure that admits light and air. There were windows in houses in the 9th century, B.C., although the Greeks dispensed with them and built their houses around courtyards. The Romans were the first to glaze windows. The Church has played a great part in the development of windows. In Europe, the type known as French windows, high and narrow, and opening inwards, was superseded in England by the double hung type, in which the lower and upper sashes could be moved, but this again has given place to the older casement type, opening out. In many large, modern buildings, "metal" windows, with frames of pressed steel, are used, which give a maximum of light and air.

In the Orient, there is very little glazing, the space being filled usually by intricately latticed wood. In China and Japan, the windows are covered by paper or shell, and are arranged to slide into a case, fitted on the outside of the wall.

Windsor Borough and market town of Berkshire. It is on the Thames, 22 m. from London, and is reached by

the S and G W Rlys. It includes the village of Old Windsor, 2 m to the south-east. Bridges connect it with Eton. Windsor is a popular boating centre and has associations with Shakespeare. Pop (1931) 20,284.

Windsor City and port of Ontario, Canada. It is situated on the left bank of the Detroit River, immediately opposite Detroit. The two towns are connected by a suspension bridge, and a vehicular tunnel nearly a mile long. Windsor is an important centre both for the manufacture of motor vehicles, and for railways connecting with American systems by means of car ferries. Pop (1931) 63,108.

Windsor Borough of Nova Scotia, Canada. An attractive residential town, 46 m from Halifax, it is situated in a district famous for its apples. It is the seat of the oldest Colonial university, King's College. In the neighbourhood are vast deposits of gypsum. Pop 3500.

Windsor House of the British royal family. King George V is regarded as the founder of the House of Windsor, having, in 1917, abandoned for himself and his family all German titles, together with the dynastic name of Saxe-Coburg Gotha. The members of the royal family are King Edward VIII, Queen Mary, the Duke and Duchess of York and their two daughters, the Princesses Elizabeth and Margaret Rose, the Princess Mary and her husband, the Earl of Harewood, and their two sons, Viscount Lascelles and Hon David Lascelles, the Duke and Duchess of Gloucester, and the Duke and Duchess of Kent and their infant son.

Windsor Castle Chief residence of the British sovereign. It stands above the town of Windsor, from which there are two entrances. The first castle was built by William I, but the present one dates from the 14th century, with additions made in the 18th and 19th. It contains some magnificent rooms and a priceless collection of works of art. The gem of the building is St. George's Chapel, a Gothic edifice restored in 1922-23. The keep, or round tower, is in the centre of the castle, and the grounds cover 12 acres. Around is the home park, and beyond that the great park covering 3 sq m. The state apartments, round tower, stables, St. George's Chapel and Albert Memorial Chapel are open to the public when the royal family are away.

Windward Islands Group of islands in the West Indies. They belong to Great Britain and are the southern part of the Lesser Antilles. The group consists of Grenada, St. Vincent, St. Lucia and the Grenadines. There is a governor for the islands, living at St. George's, Grenada, but they are otherwise independent of each other. Each has its own government except that there is a court of appeal for the group. The islands cover 516 sq m., and the pop. is (1931) 186,299. See GRENADA, ST. LUCIA, LEEWARD ISLANDS, etc.

Wine Fermented juice of the grape. It varies in colour from a pale yellow to the darkest red. Beverage wines are made from ripe grapes, and the juice allowed to ferment naturally, without interference. Fine wines are from perfect grapes, perfectly fermented, and possess "quality." Fortified wines contain a certain proportion of spirit distilled from wine, added to raise the alcohol

strength. Still wines are those which have been allowed to lose their carbon dioxide during the process of fermentation and sparkling wines have been kept bottled up until used, when the gas escapes in bubbles.

There are vineyards in various parts of the world, including South Africa and Australia, but the finest and most numerous are those in the Mediterranean basin. France produces over a thousand million gallons every year.

Wineland Name, often called Vinland given by the Scandinavian seamen to a part of North America which they visited in the 10th century. It was so named by Leif Ericsson because of the grapes found there. The exact locality is doubtful, some think it was Newfoundland and others New England.

Wingate Town of Co. Durham. A colliery centre, it is 9 m. from Durham and 248 from London, by the L.N.E. Ry. Bricks are made here. Pop. 11,424.

Wingfield Sculls Chief sculling race in England. It is rowed every July on the Thames, from Putney to Mortlake, 4½ m. The winner is the amateur sculling champion of England.

Winnington-Ingram Arthur Foley British ecclesiastic. Born Jan. 26, 1855, in Worcestershire, he was educated at Marlborough and Keble College, Oxford. He held a curacy at Shrewsbury, 1884-85, and then became private chaplain to the Bishop of Lichfield. In 1889 he became chaplain to the Archbishop of York and the Bishop of S. Alban's. In 1895 he became Rector of S. Matthew's, Bethnal Green, and in 1896 rural dean of Spitalfields. He was Canon of S. Paul's Cathedral and Bishop Suffragan of Stepney, 1897-1901, and was made Bishop of London in the latter year. His books include *The Sword of Goliath* (1926), *Holiday Recollections of a World Tour* (1928).

Winnipeg City and capital of Manitoba, Canada. Situated about half way between the Atlantic and the Pacific Oceans and 60 m. north of the United States boundary, it stands at the confluence of the Assiniboine and Red Rivers, on the site of Fort Garry, a Hudson Bay trading post, having in 1870 a population of 215. It is now the capital of the province of Manitoba and the third largest city in Canada. It is a city of beautiful and substantial houses and wide streets and is provided liberally with parks and squares. It has the largest grain market on the American continent. There are many grain elevators and flour mills, besides other industries. It has two broadcasting stations (48.8 M, 3.5 kW, and 25.6 M, 2 kW). Pop. (1931) 217,587.

Winnipeg Lake and river of Canada. The lake, situated 40 m. north of Winnipeg City, is 260 m. long with an average width of 30 m. It receives the Saskatchewan, the Winnipeg, and the Red Rivers and empties into the Nelson River. Issuing from the Lake of the Woods, the Winnipeg River flows north west into Lake Winnipeg. The largest power plants in Manitoba have been built on its banks, and supply 310,000 horse power to the City of Winnipeg and many industrial areas in Central Manitoba. Other plants being constructed have an additional capacity of 225,000 horse power.

Winnipegosis Lake of Manitoba and Saskatchewan.

Lying to the west of Lake Winnipeg, it is about 120 m. long, and is connected by Waterhen River with Lake Manitoba, which in turn connects through the Dauphin River with Lake Winnipeg.

Winnowing Process of driving off or separating chaff from grain, by means of a fan. This is sometimes done by hand, as in primitive countries, and sometimes by machinery.

Winsford Urban district of Cheshire. It stands on the Weaver, 4 m. from Middlewich on the L.M.S. Ry. The chief industry is the mining of salt and there are chemical works. Pop. (1931) 10,997.

Winslow Market town of Buckinghamshire. An agricultural centre, it is 6½ m. south east of Buckingham, and 54 m. from London by the L.M.S. Ry. Pop. 1532.

Winter Berry Shrub (*Ilex verticillata*) of eastern N. America also known as the black alder. The leaves are toothed and the small white flowers appear in early summer followed by scarlet berries. A medicinal preparation is obtained from the bark.

Winter Cherry Hardy herbaceous plant (*Physalis*) of Chinese origin. It has tall stems, oval leaves and white blossoms. After the petals drop the orange-coloured calyx becomes enlarged and distended its appearance giving the plant its familiar name of Chinese lantern.

Wintergreen Genus of small herbaceous evergreen plants (*Pyrola*) of the order Ericaceae. *Pyrola rotundifolia*, a British species has small round leaves at the base of the plant and white flowers. The American wintergreen or chickenberry (*Gaultheria procumbens*) is a low-growing, aromatic plant, with white flowers succeeded by red berries. Oil of wintergreen, used for flavouring, and also in unguents for external application, is obtained from the leaves. A synthetic preparation of methyl salicylate which is its chief property, is often used under the same name.

Winter Sports Recreations such as skating, skiing, tobogganing, and ice-hockey, which are enjoyed in winter in regions covered with snow. The chief centre for winter sports in Europe is Switzerland, where the season lasts from December to May, in the highest parts. Winter sports are included in the programme of the Olympic Games. Winter sports are held also in the United States, Canada, Norway, Sweden and Austria.

Wire Threads of metal. Several metals are used in its manufacture, but commercial wire is chiefly of copper, iron or steel. It is made by drawing the material through dies, and is used for a great variety of purposes. Wire ropes are in general use and the development of electricity has created a great demand for insulated wire. Wire is also used for fencing purposes and for musical instruments.

Wireless Telegraphy and Telephony. Method of communication by means of electro magnetic waves. The telegraphic systems include spark and continuous wave signals, in morse, being produced by a key or other apparatus used to interrupt the radiated wave train. Telephony is achieved by using the microphone to modulate a carrier wave. It became practicable with the invention of the thermionic valve.

Marconi constructed a workable wireless signalling apparatus in 1895, and his system was investigated by the British Government the following year. The navy successfully used the system in 1898, and in 1901 trans-Atlantic signalling was achieved. Tuning, invented by Lodge in 1897, was practically applied by Marconi. The first detectors were of the coherer type invented by Branly in 1890. Later the crystal was employed. Fleming's diode valve (1904) and de Forest's triode (1906) made possible enormous advances; the latter especially in its inventor's amplifying arrangement (1907). A feed back arrangement was devised by Franklin in 1913, and Meissner's use of regeneration to utilise the valve as generator of oscillations (1913) marked another forward stage. Trans Atlantic telephony was effected in 1915 by the Poulsen spark system (Arlington, U.S.A. to Paris). In 1919 Canada, and in 1924 Australia, were reached from Britain (Marconi system). Commercial telephone links with New York (1927) and Sydney (1929) followed in due course, as did the natural development of long distance ship-to-shore speech. Now it is possible to speak to most of the countries of the world, and new developments of the radio telephone service are constantly being made.

In 1928, while external telephony services were retained, the British Government transferred certain other wireless interests to an *ad hoc* merger of cable and wireless telegraphy firms. See BROADCASTING MICROPHONE, WAVE

Wireworm Larva of the click-beetles (*Elateridae*). It is about 3 in. in length, and yellow in colour. The body is hard, cylindrical and shining, giving it the name of "wireworm." It has three pairs of jointed legs and very powerful jaws. Wireworms are very general feeders, living on the roots of plants and scarcely any crop of fruit or vegetable is immune from their attack.

Wirksworth Market town and urban district of Derbyshire. It is 13 m. from Derby, on the L.M.S. Rly. Pop. (1931) 3911.

Wisbech Borough, market town and river port of Cambridgeshire. It stands on the Nen, 15 m. from King's Lynn. A canal connects it with Cambridge. The town is the centre of a market gardening district in the Isle of Ely. Pop. (1931) 12,005.

Wisby City and seaport of Sweden, often called Vlsby. It is on the Island of Gotland, 150 m. from Stockholm. In the Middle Ages it was one of the wealthiest and busiest of the Hanseatic towns. The city walls and towers are practically intact. The port has a good modern harbour and still does a considerable trade. Pop. (1930) 10,467.

Wisconsin State of the United States. In the north of the country, it lies in the angle formed by Lakes Superior and Michigan. It is 56,060 sq. m. in extent, and has about 10,000 sq. m. of lake water. Madison is the capital, but Milwaukee is much the largest city. The state is noted for its dairy farms. Maize, oats and barley are widely grown. Iron ore is mined. Wisconsin is governed by a legislature of two houses. It became a state in 1848. Pop. (1930) 2,939,000.

Wisdom Book of. A book of the Apocrypha. It was probably written between 150 B.C. and 30 B.C., and falls into three parts: (a) in which the author argues that as far as the righteous are con-

cerned, death is not the end; (b) which portrays Wisdom, and (c) a historical retrospect written to show the evil results of idolatry.

Wiseman Nicholas Patrick Stephen English Cardinal. Born at Sorlile, Spain, Aug. 2, 1802, he was educated at Ushaw College, near Durham, and at the English College at Rome, where he became Professor of Oriental Languages, and Rector in 1828. Consecrated as a bishop in 1840, after work in England, in 1850 he was made Cardinal Archbishop of Westminster. Wiseman's pastoral aroused fears in England of "papal aggression," but his admirable *Appeal to the English People*, and his subsequent tact and moderation enabled him to outlive the hostility engendered by his pastoral. He was the founder, in 1830, of the *Dublin Review*. He died Feb. 16 1865.

Wisley Village of Surrey. It is 3½ m. from Weybridge, on the Portsmouth Road. Here are the gardens of the Royal Horticultural Society.

Wistaria Genus of leguminous climbing shrubs (*W. chinensis*). The Chinese Kidney bean, it is a popular variety for growing on walls, trellis or garden arches. The soft blue flowers grow in long drooping racemes. Another variety is *W. japonica*, which is a white variety.

Wit Happy expression of associations between ideas or words not usually connected, so that it produces an amusing surprise. It is a neat turn of speech, and depends for its effect on readiness of application. It is more intellectual than humour, implying, as it does, a swift perception of the incongruous.

Witan Short name for the witenagemot, an assembly of the wise that met in England in Anglo-Saxon times. Its members were called together by the king when he wanted advice. He made grants of land and took decisions of importance after taking counsel with "the witan of my people." It consisted of members of the royal family, the archbishops, bishops, abbots, and thegns. It lasted until the Norman Conquest, when it was replaced by the feudal Great Council.

Witch (and Witchcraft) Woman who practised sorcery, and was supposed to have dealings with the devil. In medieval times, witches were generally women more knowledgeable than the others of their village, who foretold the future, and practised white magic—the gathering and brewing of herbs to cure people, with benisons chanted over them, or black magic, when these things were done to work harm. Witches usually had "familiars"—supposedly the devil in the disguise of a dog, cat or toad. Whole villages were under the spell of these witches, and practised rites in February, May, August, and November, when sacrifices were made to the old pagan gods, and there was dancing, with much excitement and emotion. Witches and witchcraft were sternly put down from the 15th century by all zealous members of all the Christian Churches, and witches were hanged, burned, and drowned.

Witch Hazel (or Winter Bloom) North American shrub (*Hamamelis virginica*), resembling the hazel, with oval leaves and clusters of autumn and winter blooming yellow flowers. The bark and leaves have an astringent property, and are used for various medicinal preparations.

Witham River of England. It rises in Rutland, passes into Lincolnshire, and flows to the Wash near Boston. It is 70 m long, and on it are Boston, Grantham and Lincoln. It is navigable to Boston.

Witham Urban district of Essex. It is 38 m from London, by the L.N.E. Rly., on which it is a junction. Here is an old church and some picturesque houses, including the Spread Eagle Inn, which dates from the 14th century. There is an agricultural trade. Pop (1931) 4367.

Witney Urban district and market town of Oxfordshire. It stands on the Windrush, 10 m to the west of Oxford, on the G.W. Rly. It is a centre of the blanket manufacture. The fine old parish church is partly Norman, and there is a butter cross in the market place. Pop (1931) 3409.

Witt Jan de Dintch statesman. Born at Dort in 1625 as leader of the wealthy bourgeois he combined with the nobles to oppose William II of Orange, and later the young prince (afterwards William III). Appointed Grand Pensionary of Holland while the Dutch were at war with England, he concluded peace in 1654. Again in 1667 he negotiated peace with England by the Treaty of Breda, and next year brought about the Triple Alliance between England, Holland and Sweden. Louis XIV's invasion of the United Provinces brought about his fall and the return of William of Orange to power. With his brother Cornelius he was attacked by the mob and beaten to death Aug. 20, 1672.

Witton Gilbert Village of Durham. It is on high ground $3\frac{1}{2}$ m NW of Durham City. Here in the 13th century, Gilbert de la Leq built a hospital of which all that remains is a decorated window in a farmhouse near the church of S Michael, which was rebuilt in 1867.

Witwatersrand District of the Transvaal. It is generally known as the Rand, and is famous for its gold mines. There has been a university of this name at Johannesburg since 1922.

Wiveliscombe Urban district and market town of Somerset. It is 9 m from Taunton and 152 from London, on the G.W. Rly. There is an agricultural trade. Pop (1931) 1262.

Woad Herbaceous plant of the family *Cruciferae*. It grows in England on chalky soil and has yellow flowers. The juice derived from the root leaves was used by the ancient Britons to stain themselves blue.

Woburn Market town of Bedfordshire. It is 15 m from Bedford. Here is Woburn Abbey, seat of the Duke of Bedford. Built about 1756, it contains a priceless collection of works of art and stands in a park of 2400 acres. There was once a Cistercian house here, but since 1547 the estate has belonged to the Russells.

Wodehouse Pelham Grenville. English humorist and playwright. Born at Guildford, Oct. 15, 1881, he was educated at Dulwich. For some years he was on the staff of the *Globe*. Since 1902, when he published *Pothunters*, at least one work has come from his pen every year. He is part author of 30 plays, among them *Kissing Time* and *Leave it to Psmith*, among his stories are *Psmith in the City*, *Procadilly Jim*, *The Inimitable Jeeves*, *Hot Water*, and *Right Ho, Jeeves* (1935).

Woden See ODIN

Woffington Margaret. Irish actress. She was born in Dublin, Oct. 18, 1718, and made her London debut at Covent Garden in 1740. Her chief successes were in the parts of male characters (e.g., Sir Harry Wildair in *The Constant Couple*), and those of society ladies (e.g., Lady Betty Modish). She was familiarly known as "Peg" Woffington, and acted with David Garrick at Drury Lane. Retiring in 1757, she died Mar. 28, 1760.

Woking Urban district of Surrey. It is on the Wey, 24 m from London, and is reached by the S. Rly. Near are Brookwood with its cemetery and crematorium, the ruins of Newark Priory, and Worplesdon. Pop (1931) 29,927.

Wokingham Borough and market town of Berkshire. An agricultural centre, it is 7 m from Reading, and 37 from London by the S. Rly. Pop 7294.

Wolf Wild member of the dog family. Found in all northern countries, its colour is usually grey, and its size and thickness of fur become less the farther south the animal lives. Wolves run down their quarry and are killers of sheep, but when hunting in packs can overcome deer and antelope. Wolves have been extinct in Great Britain for 200 years, but France still has occasional raids, and they abound in Russia and in the Rocky Mountains.

Wolf Hugo. Viennese composer. He was born at Windschgratz (Styria) March 13, 1860, and studied music at the Vienna Conservatorium. His work was done under the handicap of dire poverty and towards the end of his life of brain disease, which culminated in insanity. His fame as a composer rests on his songs, which number nearly 500. He died Feb. 22, 1903.

Wolfe James. English soldier. The eldest son of General Edward Wolfe, he was born in Westerham, Kent, Jan. 2, 1727. He took part in the battles of Dettingen, Culloden and Laffeldt. In 1758, after a siege of seven weeks, he captured the fortress of Louisbourg, N.S. His crowning achievement was the taking of Quebec, Sept. 13, 1759. Having scaled the heights in the dead of night, he routed the French under General Montcalm, the result being that Canada in 1760, became a British possession. Both Wolfe and Montcalm lost their lives in the encounter, and both are commemorated on the site of the battle.

Wolfhound Name given to species of dogs used to hunt the wolf. The Irish, the horzoi and the Alsatian wolfhounds are examples.

Wolfram Ore from which tungsten is extracted. It is found in Malay, Spain, Australia and Colorado, and is a mixture of iron tungstate (FeWO_4) and manganese tungstate (MnWO_4).

Wollaton Village near Nottingham. It is 3 m to the west of the city and has coal mines. Here is Wollaton Hall, built in 1580-90, an outstanding example of Elizabethan domestic architecture. In 1924 it was bought by the city of Nottingham. The hall was preserved, but part of the park of 790 acres was sold for building.

Wollongong Seaport and pleasure resort of New South Wales. It is on the coast, 50 m to the south of Sydney, with which it is connected by rail-

war There is a harbour from which coal is shipped Pop (1931) 10,800

Wolseley Garnet Joseph Wolseley, 1st Viscount English soldier Born in Ireland of English stock, June 4, 1833, he served in Burma in 1852, in the Crimea, Indian Mutiny China, Canada (Riel's rebellion, 1870), and Ashanti, 1873-74 For his success at Tel-el-Kebir he was made baron in 1882 His mission to relieve General Gordon (1884-85) unfortunately failed. He was made viscount in 1891, field-marshal in 1894, and was commander-in-chief, 1895-1900 In 1903 appeared his *Story of a Soldier's Life*. He died March 26, 1913, his title passing to his daughter

Wolsey Thomas English cardinal He was born at Ipswich about 1471, son of a grazier, and, after studying at Oxford, became a royal chaplain in 1506 His rise under Henry VIII was rapid, in 1514 he became Bishop of Lincoln and Archbishop of York, and in 1515 he was made cardinal. Appointed Chancellor the same year, he did valuable administrative work, while as the king's chief adviser in his foreign policy of balancing the rival powers of France and Spain he was one of the leading European diplomats. He used some of his great wealth to found the college of Christchurch, Oxford, and to build Hampton Court. His failure to obtain for Henry a divorce from Catherine of Aragon was the beginning of his downfall. In 1529 he was deprived of his chancellorship and was later arrested for high treason. He died on the way to trial Nov 29, 1530

Wolsingham Town of Co Durham, 23 m SW of Newcastle and 255 from London, by the L N E Rly. It has steelworks and woollen mills Pop 3500

Wolstanton Urban district of Staffordshire It is a mile from Newcastle-under-Lyme, and is a centre of the pottery industry Pop (1931) 30,528

Wolverhampton Borough and market town of Staffordshire It is 13 m from Birmingham and 123 from London, on the G W and L M S Rlys. The town is a centre of the hardware manufacture. It has also engineering works, railway shops, and makes motor cars and motor-cycles Pop (1931) 133,190 Races are held in the town, and the Association football club, Wolverhampton Wanderers, won the Association Cup in 1893 and 1908

Wolverhampton Henry Hartley Fowler, 1st Viscount, English politician Born at Sunderland, May 16, 1830, he became a solicitor, and in 1880 was elected Liberal M P for the borough. In 1884-85 he was under-secretary for the Home Department, and in 1886 Financial Secretary to the Treasury. He was President of the Local Government Board, 1892-94, and Secretary for India, 1894-95. In 1898 he was knighted. From 1905 to 1908, when he was made a viscount, he was Chancellor of the Duchy of Lancaster. He died Feb 15, 1911, and his son, Henry Ernest Fowler (b 1870), became the second viscount.

Wolverton Urban district of Buckinghamshire It is on the Great Ouse, 52 m from London, and is an important point on the L M S Rly, which has works at New Wolverton Pop (1931) 12,870

Woman Suffrage Exercise of the vote in parliamentary and municipal elections by women.

Advocated in the middle of the 19th century by Cobden, Mill, and Disraeli, the societies formed to promote it were united in a National Union in 1887, under Mrs Henry Fawcett. In 1903 the Women's Social and Political Union was formed under Mrs Pankhurst (*q v*), and soon developed militant tactics. In 1906 the Liberal party came into power under Asquith who was a violent opponent of the cause. Suffragettes, as women suffragists were called, heckled members of Parliament, and held demonstrations. They were sent to prison, and went on hunger-strike. During the World War they showed such ability and unsuspected powers of citizenship, that in 1916 a conference decided that women over 30 years old who were householders, wives of householders, should be allowed to vote, and this was passed by Lloyd George's Government in June, 1917. In 1918 the Act making women eligible to sit in Parliament was passed, and in 1919 Viscountess Astor was the first to take her seat. In 1928 a Bill was passed giving complete political equality to women.

In all the Dominions except South Africa, women suffrage is in force, and in most countries, except France Italy and Spain

Wombat Australian marsupial. Wombats have large flat heads, small eyes, sharp teeth and a vestigial tail. They have short, stout legs, with broad, naked-soled feet. Usually they are brownish-grey in colour, with short fur, and a naked muzzle. Shy and gentle, they sleep during the day in holes and burrows, and at night go out in search of food, which consists of grass and roots.

Wombwell Urban district of Yorkshire (W R) It stands on the Don, 7 m from Rotherham, on the L M S Rly; it is also served by a canal. It has coal mining and iron working industries. Pop (1931) 18,365

Wood Solid part of trees and plants, the source of their mechanical strength, used also to transport water and dissolved salts from the roots to the growing parts. Commercially it is classified into wood and timber (*q v*). Timber is wood of large dimensions only. Wood includes thin branches, twigs, etc., used for making baskets and brooms, soft, light wood used for insulation, floating buoys etc., and pithy woods used in making solar topees. Timber is of two kinds—soft woods, derived from conifers, and hardwoods produced by dicotyledonous trees such as oak, ash, beech, teak, etc. Both varieties are much used structurally. In addition, soft woods are used in the manufacture of wood pulp and paper, artificial silk and other cellulose industries, while the finer hardwoods are used for cabinet-making, carving, etc. See CELLULOSE, LUMBER.

Wood Mrs Henry English novelist Born at Worcester, Jan. 13, 1814, she married in 1836, and afterwards lived mostly in France. She wrote a temperance story, *Danesbury House*, in 1860, and her best known novel, *East Lynne*, in 1861, which was translated into several languages, and dramatised. Other books include *The Channings* (1866), and the *Johnny Ludlow* tales which appeared in 1868, in the *Argosy* magazine, which she owned. She died Feb 20, 1887.

Wood Sir Henry Joseph English conductor He was born in London, March 3, 1869, and since 1895 has conducted the Queen's Hall Promenade concerts and since 1897 the Sunday orchestral concerts in London.

He has also conducted the Norwich, Sheffield, Birmingham and other musical festivals, and has not only raised the standard of musical taste in England but has secured a hearing for many modern composers, British or foreign. He was knighted in 1910.

Wood Sir Howard Kingsley English politician. Born in 1881, he started active life as a solicitor, and served for some years on the L.C.C. Unionist M.P. for Woolwich West since Dec., 1918, when he was knighted, he was Parliamentary Secretary to the Ministry of Health, Nov. 1924 to June, 1929, and in Nov., 1931, became Postmaster General. He is an authority on insurance and housing.

Woodbridge Urban district and market town of Suffolk. It is 8 m. N.E. of Ipswich and 79 from London by the L.N.E. Ry., and is an agricultural centre. Pop. (1931) 4734.

Wood-Carving Process by which wood is hand-cut by sharp tools for ornamental purposes. It has been practised from the 8th century in Japan and China. Wood-carving was general among the Moors, who used it for ornamented windows, frameworks, mosaic ceilings and floors. The negroid races carve mostly gods and fetiches, and some household utensils. Gothic, Renaissance and modern wood-carving has been used to a great extent to decorate churches.

Woodchuck Name applied to a species of marmot. It is found in parts of the United States, and is known also as the ground hog. See MARMOT.

Woodcock Wild bird (*Scopula rusticola*) found in many parts of Europe and Asia. It has a long bill which is used in digging for insects. It is grey, buff or mottled black in colour. The bird nests in a hollow on the ground and moves about at night. It is about 14 in long and is very like the snipe. A wild bird, it is shot during the season and is regarded as a table luxury. A smaller woodcock is found in North America.

Woodford Urban district of London. It is 11 m. from London, on the L.N.E. Ry. on the outskirts of Epping Forest. A residential district for Londoners, it includes the areas called Woodford Wells and Woodford Green. Pop. 23,946.

Wood Green Urban district of Middlesex. It is 5 m. from the City of London, by the L.N.E. Ry. Pop. (1931) 54,190.

Woodhall Spa Urban district of Lincolnshire. Known for its mineral springs, it is 6 m. S.W. of Horn castle and 130 from London, by the L.N.E. Ry. Pop. (1931) 1372.

Woodlouse Small crustacean of the *Isopoda*. It feeds on decaying vegetation, coming out at night from damp crevices, under stones, etc. The body has seven segments, each with a pair of legs and for protection the common woodlouse (*Oniscus*) can roll itself into a ball.

Woodpecker Climbing birds of the family *Picidae*. The feet are adapted to arboreal life, the toes being directed two forward and two backward, and the long barbed and sticky tongue is employed to get insects out of crevices in the bark, etc. The nest is made in a deep hole dug in the tree trunk. A common British species, the green woodpecker (*Picus viridis*) is about 12½ in long, the plumage olive green,

yellow to grey on rump and under parts. The head and nape of neck are crimson, with a black cheek. Others found less abundantly in Britain are *Dendrocopos major* and *minor*, the greater and lesser spotted woodpeckers, 9 in and 6 in in length respectively.

Woodruff Wild herb (*Asperula odorata*) of the natural order *Rubiacae*. The slender erect stems, about 12 in in height, bear whorls of bright, smooth leaves, placed one above another and surmounted by a flowerhead of very small funnel shaped white blooms. The plant has little fragrance until gathered and dried, when it gives out a scent resembling that of new mown hay.

Woodrush Genus of perennial plants (*Luzula*). They have short, grass like leaves, with a hairy edge, and clusters of brown flowers borne in small sprays. The hairy woodrush has clusters of chestnut brown flowers, the leaves only slightly haired. The great hairy woodrush (*L. maxima*) is of larger growth, with large cymes of pale flowers. Other varieties include the field woodrush (*L. campestris*), and the mountain species (*L. spicata* and *L. arcuata*).

Wood Sorrel Perennial wild herb (*Oxalis acetosella*). It is native to the British Isles. The rootstock is creeping, the heart shaped leaves grow in threes, resembling the clover leaf. The five petalled flowers are borne singly and are white, veined with soft purple or pink. The seed capsule at the slightest touch discharges the seeds forcibly for some distance.

Woodstock Borough of Oxfordshire. It is 72 m. from London and 8 from Oxford, on the G.W. Ry. The place is famous for its association with the palace built by Henry I. This has now disappeared. Gloves are made in the town, near which is Blenheim (q.v.). Pop. (1931) 1484.

Woodstock Town in Ontario. It is on the Thames, in a splendid agricultural district, has a population of 11,000.

Wood Swallow Genus of insectivorous birds (*Artamus*). They are natives of Australia, Polynesia, India, and islands in the Indian Seas. The conical beak is somewhat curved and sharp tipped, the tail short, and the wings long. They are swift in flight and very fearless.

Woodworm Larvae of certain beetles, so called because it feeds on wood. To destroy the worms brush the wood with a solution of formalin. Carbolic acid and paraffin are also recommended. Another method is to fumigate the affected piece of furniture.

Wooskey Village of Somerset. It is a mile from Wells, in the Mendips Hills. Here is the Wooskey Hole, a cave 500 ft. long, in which the river Axe rises.

Wool Coat of sheep. It is one of the most important textile fibres. Most of the wool used is of one year growth which is often washed on the sheep, and then sheared. It is then sent away sorted according to fineness, scoured and dried by hot air, and finally teased to make it loose.

Wool manufacture was established in Britain by the Romans, to clothe the army of occupation. Through the Middle Ages successive kings introduced Flemish weavers into England, and discouraged the exportation of raw wool. Until the end of the 18th century, when the cotton trade developed, the woollen industry

was by far the most important in the country. Australian and South African wool is very important the merino sheep of Spain having been introduced into those countries about the beginning of the 19th century. To-day the great British woollen industry has its chief centres in Yorkshire, especially at Bradford, Dewsbury and other places in the neighbourhood, which is known as the "heavy woollen district," but it is also carried on in a number of towns in the west and south. Both masters and men have strong unions and organizations for dealing with wages and other questions. The industry is protected by a tariff on imported woollen goods introduced in 1931 and revised in 1932. In 1931 to help to relieve the depression, an Imperial World Fair was held in Bradford, which with its merchants and brokers is the English wool metropolis.

The world's annual output of wool (1932) is about 1,600,000 tons, of which Australia produces 400,000 tons. This is chiefly sold in Sweden, which is the greatest wool mart in the world.

Other producing countries are Russia, the United States, Argentine, South Africa and New Zealand. The British output, though excellent in quality, is quite small.

Wooler Town of Northumberland. In an agricultural district, 15 m from Berwick-on-Tweed, it is picturesquely placed on the edge of the Cheviot Hills.

Woolley Frank Edward. English cricketer. Born at Tonbridge, May 27, 1887, he joined the Kent team as a professional in 1906. A left-handed batsman his style of play is remarkably attractive and he has been a very useful bowler. In seven seasons he has taken over 100 wickets for Kent, and he is one of the few batsmen who have scored over 100 centuries. In 1928 he scored 3352 runs. Woolley has played for England against Australia and has been to Australia several times. His batting average for 1933 was 11.76.

Woolmer Forest District of Hampshire. It is near Alton, and stretches into Sussex. At one time it was Crown property.

Woolsack Seat in the House of Lords on which its president, the Lord Chancellor, sits, originally a sack of wool.

Woolwich Borough of the county of London. It lies to the south of the Thames, 9 m from the city on the S. Rly. It includes a small area on the north bank of the river, as well as the districts of Plumstead and Eltham. The chief object of interest is the royal arsenal dating from the 17th century. Woolwich is also the headquarters of the Royal Artillery and has barracks, near which is the Royal Military Academy for training officers for the artillery and engineers. A steam ferry and a tunnel for foot passengers connect the two sides of the river. Pop. (1931) 146,944.

Woolworth Frank Winfield. American merchant. Born near Rodman, N.Y., April 13, 1852, after two failures he opened a 5, 10, and 15 cent store in New York City. In a few years he had hundreds of branches all over the States, and by 1912 had grown rich enough to erect the Woolworth Building in New York at that time the highest commercial building in the world. His stores have spread over England and Scotland and are to be found in several Continental capitals. He died April 8, 1919, worth \$27,000,000.

Worcester City and market town of Worcestershire also the county town. It stands on the left bank of the Severn, 22 m from Birmingham and 120 from London and is reached by the G.W. and L.M.S. Rlys. The chief building is the cathedral with a magnificent central tower. Other old buildings include the Tudor Commandery, the old churches of St. Helen and Holy Trinity remains of a castle, etc. King's School is an old foundation and there are some old houses on the Cornmarket. The chief industries are the making of gloves, boots, vinegar and sauces. The porcelain works, established in 1751, are celebrated. There are also engineering works and it is an agricultural centre. Pop. (1931) 50,497.

The Battle of Worcester was fought just outside the town between the English and the Scots Sept. 3, 1651. The English under Cromwell crossed the river and made their way into the city, which the Scots were defending. This was soon in their possession and Charles II. became a fugitive.

Worcester City of Massachusetts. It is on the Blackstone River, 45 m from Boston and on several lines of railway. Here is Clark University. Pop. (1930) 193,311.

Worcestershire County of England. It is one of the midland shires and covers 716 sq. m. The Malvern, Cotswold, Lick, Cleint and other hills are in the county. The chief rivers are the Severn, Avon, Stour and Temo. Worcester is the county town, other places are Dudley, Stourport, Stourbridge, Kidderminster, Droitwich, Evesham and Malvern. In the north is part of the Black Country and some of the suburbs of Birmingham, but elsewhere it is agricultural. The county is famous for its plums, apples and other fruit, also for its hops. Wheat and other cereals are grown. Pop. (1931) 420,156.

The Worcestershire Regiment is the old 29th and 36th Foot. It dates from 1694, and has a fine record of service including the Great War. The depot is at Worcester.

Wordsworth William. English poet. Born at Cookernmouth, Cumberland, April 7, 1770, he was educated at Hawkshead and St. John's College, Cambridge. In 1790 he visited the continent and he spent a year in France where he sympathized with the Revolution. *An Evening Walk* and *Descriptive Sketches* (1793) opened his poetic career, and *Lyrical Ballads*, produced with S. T. Coleridge in 1798, established his name. After a visit to Germany, 1798-99, he settled at Grasmere, Westmorland, and in 1802 married Mary Hutchinson. In 1813 he settled at Rydal Mount where he remained till his death, April 23, 1850. In 1843 he had succeeded Southey as poet laureate.

One of the greatest of English poets, his finest work was done before 1807, including the *Ode to Duty* and the *Ode on Intimations of Immortality*, but he published up to 1835 many of his finest sonnets falling in the later period. Other notable poems are *The Prelude*, a spiritual autobiography, *Tintern Abbey*, the *Sonnet Composed on Westminster Bridge* and *Sonnets Dedicated to Liberty*.

Wordsworth's sister, Dorothy Wordsworth (1771-1855), who lived with him, left some valuable *Journals* and is believed to have assisted the poet in his studies of nature and rustic life.

Great Britain The feathers are shaded brown, the short tail erect and the movements quick and restless. The domed nest has an aperture at the side, and is lined with feathers, hair or wool. The yellowish white eggs are spotted with light brown, and usually number 6 or 8.

Wren Sir Christopher English architect. He was born at East Knoyle, Wiltshire, Oct. 20, 1632, and educated at Westminster and Oxford, where he showed great aptitude for mathematics and science. From 1657 onwards he lectured for several years in Oxford and London on astronomy. Pembroke College, Cambridge, and the Sheldonian Theatre, Oxford, were both designed by him. After the Great Fire of 1666 he built a new St Paul's Cathedral and furnished plans for over 50 other churches that had been destroyed. He also drew up elaborate plans for the improved rebuilding of the entire city. He was knighted in 1672, died Feb. 25, 1723, and was buried in St Paul's Cathedral.

Wrestling Form of athletics. Wrestling among the Greeks and Romans and formed a regular feature of the Olympic Games. The art of Ju-Jitsu, which differs considerably from wrestling, in that it seeks to defeat an opponent by dismemberment if he fails to yield, has also been practised by the Japanese from the earliest times. In Catch-as-catch can contests England has met with little success in recent years, but the formation of a National Wrestling Association has prevented the decay of the sport in this country.

Wrexham Borough and market town of Denbighshire. It is on the little River Clwydog, 12 m from Chester and 183 from London, and is reached by the G.W. and L.M.S. Rlys. Browning and malting are the principal industries. Pop. (1931) 18,567.

Wright Orville American aviator. He was born at Dayton, Ohio, Aug. 19, 1871. With his brother, Wilbur (d. 1912) he succeeded, after years of experimenting, in making the first flight in a heavier-than-air machine, Dec. 17, 1903, at Kitty Hawk, North Carolina. The brothers, on Sept. 12, 1908, established a second record by remaining in the air for 75 minutes in an improved aeroplane. In 1909 the French Academy awarded Orville a gold medal, and in 1917 he was made Major, U.S.A. Aviation Corps.

Wright Whitaker English financier. He was born Feb. 9, 1845, studied chemistry, and went to the United States in 1866 as an assayer. During his 23 years there, he made and lost three fortunes, chiefly in mining. Returning to England he floated several companies. The crash, in 1900, of the largest, the London and Globe Finance Corporation, caused widespread ruin, and Wright was charged with publishing false balance sheets. Convicted, Jan. 28, 1904, he swallowed cyanide of potassium after hearing the sentence pronounced.

Wrington Village of Somerset. It is 16 m from Bristol and 134 from London, by the G.W. Rly.

Wrinkles Ridges or furrows on the face or forehead. Though caused largely by old age, wrinkles may be increased by unhygienic factors such as malnutrition, the abuse of tea, coffee, alcohol and tobacco, constipation, worry, ill-temper, and lack of

fresh air. An astringent lotion or a facewash made from a piece of Paschall's Paste about the size of a hazel nut and rubbed up in 1 quart of water may lessen the intensity of the wrinkles. Such drastic methods as operative removal should never be employed.

Wrist Joint in the human body by which the hand is united to the arm. The anatomical name is the carpus. It has an anterior a posterior and two lateral ligaments. The wrist is liable to dislocation. **Wrist drop**, in which the hands hang down when the arms are outstretched, is a form of paralysis, frequently due to lead and alcohol poisoning.

Writ Document issued by a court of law ordering someone to do something. Almost all law cases of importance, except criminal cases, begin with the issue of a writ by the plaintiff on the defendant. Certain fees must be paid and the writ served on the defendant in person or given to his solicitors.

Writs are also issued for the election of members of the House of Commons. These are sent by the Speaker to the mayors, high sheriffs, provosts and others, ordering them to arrange for the election of a member, in some cases two, by a certain date.

Writer's Cramp Affliction due to excessive use of the pen. It is also found among persons who play the piano or violin, composers, tailors, and others who use the hands a good deal. It begins as cramp and after a time the muscles refuse to act. Great pain accompanies an attempt to do so, in serious cases paralysis results. The only cure is complete rest for the hands, but massage and electrical treatment are helpful.

Writing Forming letters and words by pen or pencil, also the act of literary composition. The earliest kind of writing was done by carving ideographs or pictures, each representing an idea, on stone, bone or other hard material. This may have been in existence as early as 4000 or 5000 B.C., and developed forward through the cuneiform and hieroglyphic writing as used by the Assyrians and Egyptians. The invention of papyrus made writing easier, and in course of time the cursive form became general. European alphabets were derived from the Phoenician. Small as well as capital letters were used, and cursive script spread over a good part of Europe. To make the signs the quill pen came into use, and the invention of paper gave a great impetus to writing. In the 19th century the steel pen largely supplanted the quill, and the ability to write, hitherto confined to a minority, became general.

Much of the handwriting of the Middle Ages, which was done almost entirely by monks, was extraordinarily beautiful, and the tradition of good calligraphy persisted into the 19th century. Before the invention of printing did away with the need for writing books and the like by hand, a different script in which abbreviations were greatly used was employed for these. After the invention of the steel pen the quality of the handwriting deteriorated, but soon the invention of typewriting made it unnecessary for most business purposes, although it is still used to some extent for legal documents.

Wrotham Urban district of Kent. It is 30 m from London by the S. Rly. Pop. (1931) 4510.

Workhouse British institution in which paupers are maintained. In England it is controlled under regulations passed by the Ministry of Health. The inmates are strictly disciplined and unassaged and infirm, work for what they receive.

Workington Borough and seaport of Cumberland. It stands at the mouth of the Derwent, 34 m from Carlisle and 320 from London, on the L.M.S. Rly. The chief industry is coal mining; there are also iron and steel works. Pop (1931) 24,691.

Workmen's Compensation

In Great Britain a system by which workmen or their families receive compensation for death or accident during employment. The employers usually cover their liability by insurance, and insurance policies for house holders usually include insurance against accidents to servants.

The law is contained in a measure passed in 1925 which consolidated the earlier acts. It applies to all manual workers, and to other workers provided they receive not more than £550 a year. To succeed in a claim the worker or his representative, must prove that the accident from which he suffered was not due to his own negligence. There are elaborate rules for calculating the amount that shall be paid. It may be as high as 60 per cent. of the man's earnings, but may never exceed £1 10s a week. If the worker is killed a sum not exceeding £600 may be paid to his dependants. In 1930 25,875,348 was paid out in compensation; the number of cases being 444,880. The largest amounts went to coal miners.

Works Office of English Government Department. It is under the control of a First Commissioner, all the secretaries of state and the President of the Board of Trade. Its main duty is the maintenance of the royal palaces and governmental buildings and parks open to the public. It also has control and care of ancient monuments.

Workshop Borough and market town of Nottinghamshire. It is 146 m from London and is reached by the L.N.E. and L.M.S. Rlys. The church with its Norman nave is a fine building. At one time there was a priory here and of it there are some remains, including the lady chapel restored as a war memorial. Workshop College is a public school for boys. Workshop has a cattle market and manufactures of chemicals and agricultural implements. Pop 26,286.

Worm Name applied loosely to many unrelated organisms with a long thin body. Thus there are the silk worm, ship worm, loth worm, blind worm, earth worm, tape worm, marine and freshwater worm, thread worm and other parasites infesting man and animals.

Worm In mechanics a screw thread on a shaft which engages the teeth of a gear wheel. A common application is in a reduction gear, the worm being the driving member and causing the gear wheel to rotate at a slower speed than the driving speed, according to the gear ratio. See GEAR.

Worms German city. It is situated on the Rhine in the republic of Hesse. One of the most ancient towns of Germany, it is the scene of the Niebelungenlied story in the struggles between the Church and the Holy Roman Empire, the powerful

bishops of Worms supported the Church against the citizens, who favoured the emperors. It possesses a fine Romanesque cathedral of the 12th century and is now important because of its manufactures and vine-cultivation. Pop 47,015.

Wormwood Herbaceous perennial plant (*Artemisia absinthium*) with strongly aromatic properties. It varies from 1 to 3 ft in height; the stems are rough and branching, the silky leaves are segmented and flat at the edge. The flower head is composed of drooping racemes of small yellow flowers, seed being developed from the outer ones only. It is common to many countries and grows wild in some localities in the British Isles.

Wormwood Scrubs District of London. It is about 6 m to the west of the city, on the N.L.Rly. Here is a large open space and a prison.

Worsborough Urban district of Yorkshire (W.R.). A colliery centre. It is 3 m S. of Barnsley, and 173 from London by the L.N.E. Rly. Dovecliffe being its station. Pop (1931) 12,397.

Worth Charles Frederick, English costume designer. He was born in Bourne, Lincolnshire, in 1825. In 1846 he went to Paris spending 12 years in a silk house. In 1858, in partnership with a Swede named Doherty, he began dress designing. He secured the patronage of the Empress Eugénie, and through her of the fashionable world, thus becoming the arbiter of French fashions. He died March 10, 1895.

Worthing Borough and watering place of Sussex. It is 61 m from London and 8 from Brighton, on the S. Rly. There is a fine parade and several public gardens with tennis courts, bowling greens, etc. In 1932 the erection of a new town hall was begun. In 1929 the area of the borough was extended by the inclusion of Goring and other outlying areas. Pop (1931) 46,230.

Woundwort Family of herbaceous plants (*Stachys*) of the labiate order. The common hedge woundwort (*S. sylvatica*) has rough hard branching stems, toothed heart-shaped leaves and is densely covered with soft bristles. The flowers grow in whorls of six or more round the stem and are of purplish red or rich crimson, two lipped, with white on the elongated under lip.

Wrangel Island in the Arctic Ocean. It lies off the coast of Siberia and is administered by Canada.

Wrangler Word used for a class of graduates at Cambridge University. It was given in the Middle Ages to one who took part in the disputations that were then the tests of knowledge. Later, until 1909 it was given to one who took a first class in the first part of the mathematical tripos. The senior wrangler headed the list and the rest were numbered in order of merit. Alphabetical class lists were adopted in 1909.

Wrath Cape of Sutherlandshire. The most north westerly point of Great Britain, it is over 500 ft. high. On it is a lighthouse.

Wrekin Hill in Shropshire. It is 2 m. high. From Wellington it is 1335 ft.

Wren Small song bird (*Troglodytes parvulus*). It is a native of European and Asiatic countries, and is common in

Great Britain The feathers are shaded brown, the short tall erect and the movements quick and restless. The domed nest has an aperture at the side, and is lined with feathers, hair or wool. The yellowish white eggs are spotted with light brown, and usually number 6 or 8.

Wren Sir Christopher English architect. He was born at East Knoyle, Wiltshire, Oct. 20, 1632, and educated at Westminster and Oxford, where he showed great aptitude for mathematics and science. From 1657 onwards he lectured for several years in Oxford and London on astronomy. Pembroke College Cambridge, and the Sheldonian Theatre Oxford, were both designed by him. Wrotham Urban district of Kent. It is 30 m. from London by the S. Rly. Pop. (1931) 4510.

Wroxeter Village of Shropshire. It is on the Severn 6 m. from Shrewsbury. It is chiefly known as occupying the site of the Roman city of Viroconium.

Wryneck Bird of the woodpecker family. It is insectivorous and its name is derived from its habit of twisting its neck about in feeding. It is 7 in long, the plumage being grey above mottled and streaked with black the under parts yellowish with darker arrow-like markings.

Wuchang City and river port of China. It is on the Yang tse Kiang, opposite Hankow, and is a great trading centre with manufactures of various kinds. Its population is included in that of Hankow (q v).

(a comedy), *The Plain Dealer*, and *The Way of the World*. He died Jan 1, 1716.

Wychwood District of Oxfordshire. It lies near Charlbury, between the Rivers Evenlode and Windrush, and was once a forest, a name which it still retains, although little of the original forest remains.

Wycliffe John English Reformer. Born near Hipswell, Yorkshire, about 1324, he became Master of Balliol College, Oxford, about 1360 and in 1374 was presented to the rectory of Lutterworth, which he held till his death. A scholar and theologian, he attacked the abuses in the Church particularly the worldly power and evil lives of the

knighted in 1902, and died in London, Jan 12, 1919

Wyndham George English states man and writer. He was born in London, Aug 29, 1863, and educated at Eton and Sandhurst. He served through the Sudan campaign of 1885. In 1887 he became private secretary to Arthur Balfour, and in 1889 he was elected unopposed as M P for Dover, a seat he held until his death in Paris, June 6, 1913. He held the post of Chief Secretary for Ireland during the difficult years 1900-1905. In his leisure moments he wrote for the *National Observer* and the *Acu*

Review, also valuable monographs on Shakespeare and Ronsard.

Wyoming State of the United States. It is in the west of the country and covers 97,914 sq m. Cheyenne is the capital. In the state is the Yellowstone National Park. The soil is poor, but irrigation has done something to improve it. Many sheep are reared and a good deal of coal and oil are mined. The state has a university and an agricultural college. There is a large Indian reservation. Wyoming, which became a state in 1890, is governed by a legislature of two houses. Pop (1930) 225,565.

XANTHIPPE Wife of Socrates. She was noted for her poorishness and ill-temper. Some say that Socrates married her in order to mortify his spirit by her continual nagging.

Xanthus City of Lycia. It was on the River Xanthus, about 8 m from its mouth. It was twice destroyed, first by Harpagus, the Persian, in 516 B.C., then by M Junius Brutus in 42 B.C. After this second destruction it was not restored.

Xanthus was another name for the River Scamander in Troy.

Xavier Francis Spanish missionary and saint. He was born at Xavero, at the foot of the Pyrenees, on April 7, 1506, and was one of the seven original members of the Society of Jesus founded by Ignatius Loyola in 1534. His missionary activities included work in India and the E Indies, 1541-47, a mission to Japan, 1549-51, and another to China where he died, Dec. 2, 1652. He was canonised in 1621.

Xenocrates Greek philosopher. He was born at Chalcodon in 396 B.C. and became a disciple of Plato, whom he accompanied (361) to Syracuse. In 339 he succeeded Speusippus as President of the Old Academy—a position which he held till his death in 314. In philosophy he modified the Platonic system by introducing the Pythagorean doctrine of numbers.

Xenophon Athenian soldier and writer. Born about 435 B.C., he was a pupil of Socrates, and one of the 10,000 Greeks who fought in the army of Cyrus of Persia. On his return to Greece, he entered the service of Agesilaus, King of Sparta, and fought for the Lacedaemonians against the Athenians at Coronea, 394 B.C. He then retired to Scillus, near Olympia, where he wrote his *Anabasis*, in which he tells

the story of the march of the Ten Thousand. His *Cyropaedia*, professing to be a description of the boyhood and training of Cyrus, is an essay embodying his ideas on education, while his brilliant dialogue, the *Symposium*, gives us a picture of Socrates and his table-talk. He died at Corinth about 355 B.C.

Xerxes King of Persia, 485-465 B.C. Son of Darius I., he led the second Persian expedition against Greece in 480 B.C. The Persians defeated the Greeks at Thermopylae, and were then defeated on sea at Salamis. A further defeat at Plataea in 479 led Xerxes to abandon his attempt to conquer the Greeks. He was assassinated in 465 B.C.

X-Rays (or Röntgen Rays) Invisible penetrative rays discovered by W K Röntgen in 1895. Produced by passing an electric current of high potential through a vacuum tube, the rays penetrate many substances opaque to light, and, by their effect of casting a shadow of bony parts, are of great value in the diagnosis of fractures, joint disorders, etc. Irradiation by the Röntgen rays is a method of treating cancerous growths, skin disorders, etc. They have been investigated and used extensively in science notably in the examination of crystal structure.

Xylene Name of one of three isometric hydrocarbons (C₈H₁₀) of the benzene series. They are found in coal and wood tar, and can also be made artificially. Commercial xylene, which contains all three forms, is used as a solvent, and in the making of aniline dyes.

Xylophone Percussion instrument, frequently used in orchestras. It consists of a series of wooden staves in the form of a half cylinder, at intervals of a semitone. It is played with small wooden hammers and has a range of two or three octaves.

Wroxeter Village of Shropshire. It is on the Severn, 6 m. from Shrewsbury. It is chiefly known as occupying the site of the Roman city of Viroconium.

Wryneck Bird of the woodpecker family. It is insectivorous and its name is derived from its habit of twisting its neck about in feeding. It is 7 in. long, the plumage being grey above, mottled and streaked with black, the under parts yellowish with darker arrow like markings.

Wuchang City and river port of China. It is on the Yang tse Kiang, opposite Hankow, and is a great trading centre, with manufactures of various kinds. Its population is included in that of Hankow (q v).

Württemberg Republic of Germany. It is in the south west of the country, between Switzerland, Bavaria and Baden and covers 7536 sq. m. Stuttgart is the capital, other places are Ulm, Heilbronn and Esslingen. Agriculture is the principal occupation and the vine is largely grown. The rivers include the Neckar and the Danube, and a part of the Black Forest and the Jura Mts. are in the state. There is a good deal of forest land.

Since 1918 Württemberg has been a republic. It is governed by a diet or landtag of 80 members elected by universal suffrage for 4 years, and a small ministry under a president. For several centuries after 1260 Württemberg was ruled by its counts and dukes. In 1806 it was made a kingdom, and in 1871 joined the German Empire. The kingdom lasted until 1918. Pop. (1925) 2,680,325.

Wurzburg City of Bavaria. It is situated on the Main, and is an ancient city with a Romanesque cathedral and a university founded in 1552. There is a vast 18th century palace, at one time the residence of the powerful prince bishops, later the property of the King of Bavaria. The city, which became finally Bavarian in 1815, is in the midst of some of the finest vineyards in Germany. Its manufactures include machinery, scientific instruments, pianos and tobacco. Pop. 89,910.

Wyandot Tribe of North American Indians. They were found in Canada early in the 17th century and later lived in the valley of the Ohio.

A breed of domestic fowl is called the Wyandotte. It was first bred in America. In colour the breeds are white and black and the hens are good for both laying and sitting.

Wyat Sir Thomas. English diplomat and poet. Born about 1503, he was a favourite of both Henry VII and Henry VIII, and was sent on several foreign missions. He also gained renown by his poetry. He died Oct. 11, 1542.

His son, also named Thomas, was born about 1530, and saw military service on the Continent between 1544 and 1550. Later he co-operated with the Duke of Suffolk, father of Lady Jane Grey, was taken prisoner and executed April 11, 1554.

Wycherley William. English dramatist. He was born about 1640 at Clivo, near Shrewsbury. He went to Oxford leaving without a degree, and entered the Middle Temple. He began to write plays early, among them, *The Country Wife* (coarse, but excellently constructed), *Love in a Wood*

(a comedy), *The Plain Dealer*, and *The Way of the World*. He died Jan. 1, 1710.

Wychwood District of Oxfordshire. It lies near Charlbury, between the Rivers Evenlode and Windrush, and was once a forest, a name which it still retains, although little of the original forest remains.

Wycliffe John. English Reformer. Born about 1324, he became Master of Balliol College, Oxford, about 1360, and in 1374 was presented to the rectory of Lutterworth, which he held till his death. A scholar and theologian, he attacked the abuses in the Church, particularly the worldly power and evil lives of the clergy. He also denied the doctrine of transubstantiation, but as he was supported by John of Gaunt, he escaped condemnation for heresy. The first complete translation of the Bible into English is associated with his name. The forerunner of the Protestant reformers, he influenced considerably the teaching of John Huss (q v). His followers were called Lollards and their preaching fomented the popular discontent which showed in the Peasants' Revolt of 1381. He died Dec. 31, 1384.

Wye Name of three rivers of Great Britain. The most famous rises in Montgomeryshire on Plinlimmon and flows through Radnorshire and then into England, where after passing through Herefordshire, it divides that county from Wales. It is 130 m. long, and enters the estuary of the Severn at Chepstow. It passes by Hereford and Monmouth and receives the waters of the Eian, Lugg, Monnow and other rivers. The scenery in the Wye valley is regarded as among the most beautiful in the country.

Another Wye is in Derbyshire, being a tributary of the Derwent, and another is a northern tributary of the Thames.

Wye Village of Kent. It is 10 m. S.W. of Canterbury, and 61 from London by the S. Ry. Here are the South-Eastern Agricultural College and a racecourse.

Wykeham William. English bishop and chancellor. Born at Wokingham, Hampshire, in 1324, he became surveyor of royal castles under Edward III. In 1367 he was appointed Bishop of Winchester and Chancellor. He founded New College, Oxford, in 1380, and in 1388-1394, Winchester School. Between 1394 and 1404 he was responsible for considerable building at Winchester Cathedral, and was buried there in 1404 in the chantry he had built.

Wymondham Market town of Norfolk. It is 10 m. from Norwich and a junction on the L.N.E. Ry. Pop. 4810.

Wynberg District of Capetown. It is on Table Mountain, 8 m. from the city. It is famous for its vines.

Wyndham Sir Charles. English actor. Born in Liverpool, March 23, 1837, he studied medicine and surgery, and served as army surgeon in the American civil war. On his return to England he acted with Irving and Ellen Terry. His most famous impersonation was David Garrick, in Robertson's play (1886). He opened Wyndham's Theatre in 1899, the New Theatre in 1903, and made six successful tours in America. He was

knights in 1902, and died in London, Jan 12, 1919

Wyndham George English states man and writer He was born in London, Aug 29, 1863, and educated at Eton and Sandhurst. He served through the Sudan campaign of 1885. In 1887 he became private secretary to Arthur Balfour, and in 1889 he was elected unopposed as M P for Dover, a seat he held until his death in Paris, June 6, 1913. He held the post of Chief Secretary for Ireland during the difficult years 1900-1905. In his leisure moments he wrote for the *National Observer* and the *New*

Review, also valuable monographs on Shakespeare and Ronsard.

Wyoming State of the United States. It is in the west of the country and covers 97,914 sq m. Cheyenne is the capital. In the state is the Yellowstone National Park. The soil is poor, but irrigation has done something to improve it. Many sheep are reared and a good deal of coal and oil are mined. The state has a university and an agricultural college. There is a large Indian reservation. Wyoming, which became a state in 1890, is governed by a legislature of two houses. Pop (1930) 225,565.

XANTHIPPE Wife of Socrates. She was noted for her peevishness and ill temper. Some say that Socrates married her in order to mortify his spirit by her continual nagging.

Xanthus City of Lycia. It was on the River Xanthus, about 8 m from its mouth. It was twice destroyed, first by Harpagus, the Persian, in 610 B.C., then by M Junius Brutus in 12 B.C. After this second destruction it was not restored.

Xanthus was another name for the River Scamander in Thracia.

Xavier Francis, Spanish missionary and saint. He was born at Navero, at the foot of the Pyrenees, on April 7, 1506, and was one of the seven original members of the Society of Jesus, founded by Ignatius Loyola in 1534. His missionary activities included work in India and the E. Indies 1541-47, a mission to Japan, 1549-51, and another to China, where he died, Dec 2, 1652. He was canonised in 1621.

Xenocrates Greek philosopher. He was born at Chalcedon in 396 B.C. and became a disciple of Plato, whom he accompanied (361) to Syracuse. In 339 he succeeded Speusippus as President of the Old Academy—a position which he held till his death in 314. In philosophy he modified the Platonic system by introducing the Pythagorean doctrine of numbers.

Xenophon Athenian soldier and writer. Born about 435 B.C., he was a pupil of Socrates, and one of the 10,000 Greeks who fought in the army of Cyrus of Persia. On his return to Greece, he entered the service of Agésilas, King of Sparta, and fought for the Lacedaemonians against the Athenians at Coronea, 394 B.C. He then retired to Scillus, near Olympia, where he wrote his *Anabasis*, in which he tells

the story of the march of the Ten Thousand. His *Cyropaedia*, professing to be a description of the boyhood and training of Cyrus, is an essay embodying his ideas on education, while his brilliant dialogue, the *Symposium*, gives us a picture of Socrates and his table-talk. He died at Corinth about 355 B.C.

Xerxes King of Persia, 485-465 B.C. Son of Darius I, he led the second Persian expedition against Greece in 480 B.C. The Persians defeated the Greeks at Thermopylae, and were then defeated on sea at Salamis. A further defeat at Plataea in 479 led Xerxes to abandon his attempt to conquer the Greeks. He was assassinated in 465 B.C.

X-Rays (or Röntgen Rays) Invisible penetrating rays discovered by W. K. Röntgen in 1895. Produced by passing an electric current of high potential through a vacuum tube, the rays penetrate many substances opaque to light, and, by their effect of casting a shadow of bony parts, are of great value in the diagnosis of fractures, joint disorders etc. Irradiation by the Röntgen rays is a method of treating cancerous growths, skin disorders, etc. They have been investigated and used extensively in science notably in the examination of crystal structure.

Xylene Name of one of three isometric hydrocarbons (C₈H₁₀), of the benzene series. They are found in coal and wood tar, and can also be made artificially. Commercial xylene, which contains all three forms, is used as a solvent, and in the making of aniline dyes.

Xylophone Percussion instrument, frequently used in orchestras. It consists of a series of wooden staves in the form of a half cylinder, at intervals of a semitone. It is played with small wooden hammers and has a range of two or three octaves.

YACHTING Racing or cruising in yachts. Before the 19th century yachts were few and most were owned by royalty, though the Royal Cork Yacht Club dates from 1720 and matches were sailed at Cowes in 1780. The

Royal Yacht Squadron, then the Yacht Club, was established at Cowes in 1812. In 1851 the *America* won a cup given by the Royal Yacht Squadron, the cup passing to the New York Yacht Club and becoming "The America Cup," for which Sir Thomas Lipton five times challenged unsuccessfully with his five *Sham* rocks. Yacht racing entered on a great era from 1870-80, but then declined till 1892, when another great period set in, witnessing the building, among others, of the King's famous cutter, *Briantia*, built for Edward VII, then Prince of Wales. International rules were first introduced in 1906, and the ideal of a combination of habitability and speed in yachts was introduced. The present international rules date from 1920. The principal regattas in the British Isles are held at Cowes, Ryde, Torquay, Plymouth, Lowestoft, Harwich, Belfast and elsewhere. Much yachting is done on the Norfolk Broads and rivers, and many regattas are held every year.

Yak Ungulate bovine mammal (*Bos grunniens*) of Tibet and neighbouring regions. Kept for its milk and flesh, and used as a beast of burden, the yak also occurs in the wild state. A heavy, hulky animal with short legs, it has long shaggy hair which hangs like a fringe from hips, shoulders and under parts, and forms a tuft to the tail. The male stands about 5½ ft at the shoulders.

Yakutsk Socialist republic of Soviet Asia. It has an area of 1,457,068 sq. m. and a pop. of 308,400 (1931). It borders the Arctic Circle, with a coastline on the Arctic Ocean. The republic is autonomous and was founded in 1922. The capital is Yakutsk, with a pop. of 10,613. Fur-bearing animals abound in the forests, and furs are among the principal exports. Cereals are grown in the S. and gold is mined in the hills.

Yale Elihu Indian administrator. He was born in or near Boston, Mass., April 5, 1648, of English parentage. His family returned to England in 1652, and in 1672 Yale went to India in the service of the E. India Company. He returned to London in 1699, having made a fortune by private trading. His name is chiefly remembered in connection with Yale University, established in 1701 in New Haven, Conn., and named after him in recognition of his gifts. He died July 8, 1721.

Yalu River of Asia. It rises in Manchuria and flows into the Yellow Sea. It is 300 m. long and partly navigable.

Yam Genus of tropical climbing plants of the order *Dioscoreaceae*. Natives of the E. Indies, yams are largely cultivated in the W. Indies and China. The stems are long, thin and trailing, and the large tuberous roots form a valuable food.

Yangtse-kiang River of China. It rises in Tibet and flows mainly E. through China, falling into the

sea just N. of Shanghai. The great river of central China, it is some 3,500 m. in length and drains an area of 700,000 sq. m. It is navigable by small steamers to Tchang and by large ones to Hankow, 700 m. up. Anking, Nanking and Chinkiang are ports near its mouth.

Yare River of Norfolk. It rises near E. Dereham, and flows for 60 m. in an easterly direction past Norwich to the North Sea at Yarmouth. A few miles from its mouth it unites with the Waveney to form Breydon Water.

Yarmouth County borough, watering place and market town of Norfolk, called in full Great Yarmouth. It stands at the mouth of the River Yare, 19 m. from Norwich and 122 from London, and has stations on the L. N. E. Rly. Gorleston, although in Suffolk, is part of the borough. The principal buildings are the large parish Church of S. Nicholas, the modern town hall and the tollhouse—now a library museum—of the 14th century. There are remains of the cloisters of a monastery and the town walls, while the Blackfriars tower and the fishermen's almshouses are very old. The town has associations with Nelson, to whom there is a memorial on the Denes. Yarmouth was bombarded by German ships on Nov. 3, 1914, April 25, 1916, and Jan. 14, 1918. Pop. (1931) 56,769.

Yarmouth Seaport of the Isle of Wight. It is at the mouth of the Yare at the extreme W. of the island. It has a station on the S. Rly., and from here steamers go regularly to Lympington. There is an interesting castle. The place is a yachting centre, and a regatta is held in August. Pop. 900.

Yarmouth Seaport of Nova Scotia, Canada. At the S.W. extremity of Nova Scotia, 218 m. from Halifax. It is a favourite summer resort, affording opportunities for deep-sea fishing. Fur farming and lumbering are carried on in the vicinity. Pop. (1931) 7055.

Yarrow Perennial plant (*Achillea millefolium*) of the order *Compositae*. The leaves are slender and segmented, presenting a delicate feathery appearance. The large flower head is made up of numerous smaller flower heads of pink or white blossoms with a yellow central disk. It is common in the British Isles in meadows and waste land from June onwards.

Yarrow River of Scotland. It rises at the town of Selkirk, falls into Ettrick Water. It is 14 m. long, and on its banks are Newark Castle and other border strongholds. It is famed for its beautiful scenery.

Yaws Tropical disease, occurring in the East and West Indies, Africa, America and South Pacific Islands. It is accompanied by a very troublesome ulceration. It is highly contagious and is spread by flies. Arseno benzol compounds have proved useful, but segregation of patients for proper treatment and strict sanitary measures imposed by authority are necessary.

Yeadon Urban district of Yorkshire (W. R.). A centre of the textile industry, it is 6 m. N.E. of Bradford. Pop. (1931) 7871.

Year Unit of time marked by the revolution of the earth in its orbit round the sun. The solar year is 365 days, 5 hours, 48 minutes, 49.7 seconds. The sidereal year, calculated somewhat differently, is 19 minutes longer. For practical purposes the year may be taken at 365½ days. It is therefore fixed at 365 days with an extra day every fourth year, which is called a leap year. The leap years are those which are divisible by four without remainder. To correct the discrepancy caused by the odd seconds every year that is divisible by 100, but not by 400, is a year of 365 not 366 days.

The arrangements follow the Gregorian Calendar which was introduced in 1582, and has been adopted throughout the civilised world, although Russia only took it up in 1917 and Greece in 1923. In this calendar the years are calculated from the birth of Jesus Christ which was termed Anno Domini (i.e., The year of Our Lord 1) and written A.D. 1, the years before that event being numbered backwards as B.C. (Before Christ). The Jewish Calendar dates from the supposed creation of the world. Their year begins in Sept., and Sept. 21, 1932, is the first day of 5694. The Mohammedan Year is one of 354 or 355 days only, consequently it loses some days each year by comparison with the Gregorian dates. Year 1 to the Mohammedan is A.D. 622 and year 1350 falls within the Christian year 1932. Until 1752 the legal year in England was from March 25 to March 25. The ecclesiastical year is from advent to advent.

Yeast Minute fungi of the *Saccharomyces*. In the presence of sugar the yeasts form the enzyme known as zymase, which promotes fermentation, decomposing the sugar into alcohol and carbon dioxide. Yeast is used in brewing, baking, and the manufacturing of vinegar. See FERMENTATION.

Yeats William Butler Irish author. Born in Dublin, June 13, 1865, he studied art first, but at 21 abandoned it for literature. A prolific writer of plays as well as verse, he is best known by *The Countess Kathleen*, *The Land of Heart's Desire* and *Deirdre*. *The Winding Stair* and other Poems appeared in 1937. Collected editions of his works were published in 1908 and 1926. In 1923 he was awarded a Nobel Prize for literature. His interest in the formation of the Irish Theatre brought him into contact with Lady Gregory, and led to the foundation of the Abbey Theatre, Dublin, in 1904, of which he is a director. In 1922 he was made a senator of the Irish Free State.

Yellow Fever Disease prevalent in tropical and semi-tropical countries. The fever is due to a variety of mosquito, and the disease begins with severe shivering and pains accompanied by a high temperature. The skin becomes yellow as in jaundice, and there is often vomiting and other symptoms. An injection of serum often produces good results, but rest and careful nursing are essential to recovery.

Yellow-hammer Bunting (*Emberiza citrinella*) of N. Europe. It is common in Britain, and is 6½ in long, the plumage yellow-brown above, with streaks of darker brown. The head and under parts are mainly yellow, with brown streaks, while the rump and wing coverts are edged with reddish-brown.

Yellowhead Pass of the Rocky Mountains between the provinces of Alberta and British Columbia.

Yellow River Name sometimes given to the Chinese river, Hwang ho (q.v.).

Yellow Sea Branch of the Pacific Ocean. It lies between China, Manchuria and Korea, and in it are the gulfs of Chihli, Korea and Lian-tung. Its greatest width is about 400 m. The name is due to the vast quantity of yellow mud brought down by the Hwang ho (q.v.).

Yellowstone River of the United States. It rises in the Rocky Mts. in Wyoming, and flows through the Yellowstone Lake and a wonderful canyon to the Missouri. It is about 1000 m long, with some fine falls. The river gives its name to the Yellowstone National Park. This is in Wyoming and covers 3350 sq m. Opened to the public in 1872 it is a mountainous area. There are several lakes in the park, but it is best known for its geysers and hot springs. It is mainly forest but there are good roads through it, and it has several hotels.

Yemen District of Arabia. It is in the S.W. of the country with a coastline on the Red Sea. Its area is 75,000 sq m., and it is governed by an Imam. Sana is the capital. The country is very mountainous, but produces coffee, wheat, millet and barley. Oats and hides are exported. Pop. 3,500,000.

Yen Japanese silver coin. The country's monetary unit, its value is nominally 2½ p, and it is divided into 100 sen.

Yenisei River of Asia. It rises in the mountains of Mongolia, and flows across Siberia into the Arctic Ocean. It is 3000 m long and enters the sea by an estuary. Its course is almost due N.

Yeoman Word meaning a countryman, and to farmers who own the land they till.

The Yeomen of the Guard are a permanent military corps in attendance on the sovereign. Instituted in 1485 as his personal bodyguard, their duties are now purely ceremonial. Their picturesque dress dates from Tudor times. Their headquarters are at the Tower of London. See BEFEATERS.

Yeomanry Branch of the British Army. Officers and men are volunteers, and the force serves as a reserve for the cavalry. First organised in 1794, each county has its own regiments, which are called out for a period of training each year. The men provide their own horses and receive a small payment. In 1914 there were 55 regiments of yeomanry, and most were sent to one or other of the theatres of war. A force of mounted men called the Imperial Yeomanry was raised for service during the war of 1899-1902 against the Boers.

In 1908 the yeomanry regiments were included in the Territorial Force and in 1921 a number of them were converted into artillery units. Fourteen regiments of yeomanry remain, the senior being the Royal Wiltshire.

Yeovil Borough and market town of Somerset. It is 23 m E. of Taunton and 125 m from London, on the Southern and G.W. Rlys. Situated on the Yeo, it manufactures gloves and has an agricultural trade. Pop. (1931) 19,078.

Yew (*Taxus baccata*) Evergreen tree of the order Coniferae. Varying from 15 to 50 ft in height, it is of spreading growth. The branches start from the short, massive bole, within a few feet from the base, and

extend almost horizontally. The twigs are many and thickly leaved, the leaves long and curved, of a glossy dark green above and pale underneath. The wax like vivid red berries are cup shaped with a central seed. The wood is hard and elastic, and is commercially valuable to day.

Yezidis A religious sect found in certain parts of Mesopotamia, Persia, etc. They are commonly called "devil worshippers," but their beliefs reveal affinities with Mohammedanism and (Nestorian) Christianity. Though hated and despised by their neighbours, they are a peaceful, cleanly and industrious people.

Yiddish Dialect of Hebrew spoken by the Jews. It contains a very large German element and is extensively used in the east end of London.

Yggdrasil A mystical ash tree which in Norse mythology typifies existence. It binds together heaven, earth and hell by means of its three roots, which stretch respectively, one to the realm of the gods, one to the frost giants, and the third to the underworld of death.

Ynisher District of Glamorganshire. It is on the S. Wales coalfield, 4 m. from Pontypridd and 170 m. from London, by the G.W. Ry.

Yoga A Hindu word derived from the Sanskrit meaning "union." It is the name of a system of Hindu philosophy which seeks to effect the emancipation of the devotee's soul through union with the universal spirit by means of meditation and the mortification of the body. Its disciples are known as Yogis.

Yokohama Seaport and city of Japan. It stands on Tokyo Bay, on the island of Honshu 15 m. by rail from Tokyo. It possesses a large harbour equipped in the most modern fashion, and from it a great deal of silk, coal, etc., are exported. Yokohama has been a treaty port since 1859. On Sept. 1, 1923, great damage was done by an earth quake, but this has been repaired. In 1927 the city boundaries were extended. Pop (1930) 620,306.

Yonge Charlotte Mary, English author. She was born at Otterbourne near Winchester, Aug. 11, 1823. *The Her of Redcliffe* (1853) brought her not only fame but enough money to provide the schooner *Southern Cross* for Bishop Selwyn's Melanesian mission. *The Daisy Chain* (1850) yielded enough to build a missionary college in Auckland, N.Z. She published 120 books, and for 47 years edited the *Monthly Packet*. She died March 24, 1901.

Yonkers City of New York State. It is on the Hudson to the N. of the city of New York, of which it is practically a suburb. It has a number of industries. Pop (1930) 134,646.

York City and market town of Yorkshire, also the county town. It is on the Ouse 138 m. from London, and is reached by the L.N.S. and L.N.E. Ry's. One of the oldest cities in England, York is full of buildings of interest, the finest being the cathedral or minster of St. Peter, one of the finest Gothic churches in England. It is famous for its stained glass, its vast front, its three noble towers, its chapter house, and its bells. Associated with it are the treasurer's house, the library, and St. William's College. Other old buildings are the guild hall and no fewer than 21 churches, among them Holy Trinity in

Goodramgate, St. Michael le Belfry, St. Helen's, St. Margaret's, St. Michael's, St. Mary's Senior and All Saints. The Merchant's Hall and the King's Manor may also be mentioned. Clifford's Tower is a relic of the castle.

The city, first known as Eboracum, was at one time the greatest Roman settlement in Britain, and has considerable Roman remains. Of the medieval city, the walls and gateways still stand, and there are ruins of an abbey and hospital. The mansion dates from the 18th century. The schools include St. Peter's, one of the oldest in England, and Bootham, maintained by the Society of Friends. Modern buildings are the Art Gallery, Assize Court and two museums. Skildergate and other bridges cross the river. York is a great railway junction and an important military centre. The industries include railway works, soap factories, printing works, flour mills, etc. It sends one member to Parliament. At Earswick, a suburb, a model village has been built.

York was made the seat of a bishop in 627. It has had an archbishop since 732, his province covering the north and north midlands of England. His palace is at Bishopsthorpe. The city is governed by a lord mayor, a dignity given to York in 1389. Pop (1931) 84,820.

York House of Branch of the British Royal Family It traces its origin back to Edward III., through his third son Lionel, Duke of Clarence and his fifth son, Edmund, Duke of York. Richard Plantagenet (killed, 1460), the father of Edward IV and Richard III., was the head of the house, and he claimed the crown in opposition to Henry VI., who assented to an Act by which Richard's two sons secured the succession. Latterly the title, Duke of York, has generally been held by the second son of the reigning monarch.

York Duke of Richard Duke of York, the only son of Richard, Earl of Cambridge and Anne Mortimer, being thus descended on both sides from Edward III. He was Protector of England during the mental incapacity of Henry VI., and it was his claim to the succession, involving the setting aside of Henry VI's son, Edward, that started the Wars of the Roses. He was killed at the Battle of Wakefield, Dec. 30, 1460. His claim descended to his eldest son, who became king as Edward IV in 1461.

York Duke of Frederick Augustus, second son of King George III., was born in London, Aug. 16, 1763 and on Feb. 27, 1764, was elected to the bishopric of Osnabrück, in order to draw its huge revenues. In 1784 he was created Duke of York. In 1793 and 1799 he commanded English contingents against the French, but failed ignominiously. He did good work, however, in carrying out reforms in the army at home. He died Jan. 5, 1827, and is commemorated by a column, with his statue on the top, at the end of Waterloo Place, London.

York Duke of H.R.H. Prince Albert Frederick Arthur George, Duke of York, Earl of Inverness and Baron Killarney, K.G., K.T., P.C., the second son of H.M. King George V., was born at York Cottage, Sandringham, Dec. 14, 1895. He is Rear-Admiral of the Fleet in the Royal Navy (June 3, 1932), Air Vice-Marshal in the Royal Air Force (June 3, 1932), and Colonel-in-Chief of several regiments. On April 26, 1923, he married Lady Elizabeth Bowes Lyon, daughter of the Earl of Strathmore,

and has two daughters, Elizabeth and Margaret Rose. He takes a keen interest in all social matters affecting the welfare of the people.

York House Royal residence in London. It forms part of St James's Palace. It was the London House of Edward VIII when Prince of Wales, and is now that of the Duke and Duchess of York.

Yorkshire County of England, the largest in the land. In the N of the country, it covers 6077 sq m between the Humber, Durham and Lancashire. It is divided into three ridings N, E and W. York is the county town, but each riding has its own capital, these being respectively Northallerton, Boverley and Wakefield.

Yorkshire contains some peaks of the Pennines and the Cleveland Hills. The chief rivers are the Ouse and its tributaries Wharfe, Aire, Nidd, Swale, Ure, Don and Derwent. In the N are the Tees and the Esk. The county has many large cities and towns, Sheffield, Leeds, Bradford, York, Wakefield, Hull, Doncaster, Huddersfield, Halifax, Barnsley, Kelghov and Middlesbrough among them, and many smaller ones with much historic interest such as Pontefract, Richmond, Ripon, Boverley and Selby. The watering places include Scarborough, Whitby, Bridlington and Redcar. Harrogate is an inland spa. Yorkshire was famous for its Cistercian Abbeys, Fountains and Kirkstall are outstanding examples.

The county contains a great industrial area which centres around Sheffield, Leeds and Bradford, and is known for its coal mines and woollen mills. Around Doncaster a new coalfield has been developed in the 20th century. There are also industrial areas around Hull and Middlesbrough but elsewhere in the E and N Ridings agriculture remains the dominant industry. The county is in the arch-diocese of York. It also contains the dioceses of Ripon, Wakefield, Sheffield and Bradford. It sends 26 members to Parliament, apart from those sent by the cities and boroughs. Pop (1971) 3 208,828.

Yorkshire is famous for its cricketers and its horses. The county cricket club has for years been one of the strongest in the country, and the county has horse-breeding establishments and race meetings, the most notable race being the St Leger at Doncaster.

A number of regiments are recruited in Yorkshire. The E Yorkshire, the old 15th Foot, has its depot at Boverley. The W Yorkshire, the old 14th Foot, has its depot at York. Both were raised in 1685. The Yorkshire Regiment, officially called the Green Howards, dates from 1688. It was the 20th of the line, and the depot is at Richmond. The Yorkshire Light Infantry and the York and Lancaster Regiment both have their depots at Pontefract. The former, known as the King's Own, is the 51st and 105th of the line. The latter is the old 66th and 84th Foot.

Yorkshire Terrier Small toy terrier derived from the Scottish terrier. It has long straight, silky hair, steel blue on the back, tan on the under parts, the legs and head being a light fawn. The nose is black.

Yorktown American township. It is situated on the York River in Virginia, U.S.A. Here Lord Cornwallis was forced by famine to surrender to Washington in 1781.

Yosemite National park in the United States. It is in the middle of California, on the western slopes of the Sierra Nevada, some 200 m to the E of San Francisco. It covers 1512 sq m, and is a scene of wild magnificence. In it is the Yosemite Valley, enclosed by granite rocks and a river called the Merced, which makes a number of remarkable falls. One of these, the Yosemite Falls, descends 2500 ft. in three leaps. The valley is 7 m long.

Youghal Seaport and market town of Co Cork, Irish Free State. It stands on the estuary of the Blackwater, 27 m from Cork, and is reached by the G.S. Rlys. There is a fine old church, and here is Yrtle Grove a house once occupied by Sir Walter Raleigh. Youghal has a good harbour, a trade in agricultural produce and some fishing. Pop (1926) 5339.

Young Brigham American Mormon leader. Born at Whittingham June 1, 1801, he joined the Mormon sect in 1832 and became its prophet and president in 1841. He organised the settlement of the Mormons in Utah in 1847, and was the founder of Salt Lake City. He died in Salt Lake City on Aug 29, 1877, being survived by 17 wives and about 50 children.

Young Francis Brett British novelist. Born in 1884 the son of a doctor, he was educated at Epsom College and the University of Birmingham, where he took a medical degree. During the Great War he served with the R.A.M.C. He has written novels, some plays and several volumes of poems. His novels include *The Crescent Moon*, *Woodsmoke*, *Cold Harbour*, *My Brother Jonathan*, and *Jim Redale*. In 1932 he published *House Under the Water*, in 1934 *This Little World*, and in 1935 *White Ladies*.

Young Owen D American financier. Born Oct. 27, 1874, in New York State, for a time he practised law in Boston, and in 1912 became connected with the General Electric Co. In 1924 he was a member of the committee that inquired into the ability of Germany to pay reparations, and for a short time he was Agent-General for Reparations. In 1929 he was a member of a similar committee, and on this occasion he put forward the scheme which was adopted, and is known as the Young Plan. See REPARATIONS.

Young Men's Christian Association. The Young Men's Christian Association (National Headquarters: Gt Russell St, W.C. 1) was founded in 1844 by (Sir) George Williams to unite young men in an endeavour to improve themselves physically, mentally and intellectually. The value of its good work was generally recognised during the war. In the United Kingdom there are (1932) 814 branches with a membership of 118,430, while the U.S.A. have 1435 centres with a membership of 1,011,144.

The Young Women's Christian Association (London Head Offices 16-22 Great Russell St, W.C. 1) was formed in 1855 with similar objects to those of the men's association. It has a British membership of 35,000 with 350 centres.

Younghusband Sir Francis. British soldier and explorer. Born in India, 31st May, 1863, he entered the army, becoming Lt Colonel in 1908. He has explored the mountains between Kashmir and China and accompanied the British mission to

Tibet in 1902 Among his many books of the countries he has explored are *Heart of a Continent* (1898), *India and Tibet* (1912), and *The Epic of Everest* (1927) He was made KCIE in 1904 and KCSI in 1917

Youngstown City of Ohio, USA It is 64 m from Cleveland and is an industrial centre Pop 170,002

Yo Yo Popular game for one person Introduced from the United States, it became popular in Great Britain in 1932 It consists of a rounded piece of wood, divided into two parts and attached to a string The game involves delicate control of the wood, rolling and unrolling it on the string

Ypres Earl of English soldier John Denton Pinkstone French was born at Ripple Kent, Sept 28, 1852 After four years in the navy he joined the army in 1874 As major general he commanded a cavalry division in the Boer War He became Chief of Imperial Staff in 1912, and Field-Marshal in 1913 From 1914 till December, 1915, he commanded the British Army on the western front and was created Viscount on resigning From 1918-21 he was Lord Lieutenant of Ireland, and received an earldom on resigning He died May 22, 1925

Ypres Town of Belgium Lying on the small River Yperlee, it was originally a rival to Bruges and Ghent, and its silk and lace goods were everywhere celebrated It suffered severely in the Great War, and at the end of the war nothing remained of the town Since 1918 from temporary hostels around the Menin Gate the town has been completely rebuilt The famous old Cloth Hall and churches have been restored, and a garden city has replaced the ancient working quarters.

There were three Battles of Ypres during the Great War The first took place in Oct. and Nov., 1914, and represented the defence of the Channel ports against the Germans under Falkenhayn Although the Germans failed to break through, some 55,000 Britishers lost their lives The Ypres battle of April May, 1915, was notable for the first use of poison gas by the Germans, but once recovered from the initial shock, the Allied troops gave little ground The third battle of June, 1917, formed part of the Allied offensive in Flanders Although mud seriously impeded the tanks, the Allies succeeded in capturing the whole range of heights between Armentières and Passchendaele, without, however, dislodging the Germans from the coast

Ysaye Eugène Belgian violinist Born at Liège, July 15, 1858, he studied under his father and Massart, and later under Wieniawski and Vieuxtemps Between 1879 and 1889 he appeared in Germany, Paris and London, and in 1880-93 was violin professor at the Brussels Conservatoire He conducted Beethoven's *Fidelio* at Covent Garden in 1907, and played sonata concerts with Raoul Pugno His most famous piece was the sonata dedicated to him by Lekeu He went to America during the war, and conducted the Cincinnati Orchestra Returning in 1922, he wrote the opera *Peter the Coalminer* He died May 12, 1931

Yser River of Belgium. It rises in N France and flows into the North Sea at Nieuport The Battle of the Yser occurred in October, 1914 For a while the Germans repelled at Dixmude appeared unlikely to get through the Belgian line, but the Belgians were finally forced to open the Nieuport Sluices The Germans could not advance through the flooded territory, and the coast was saved.

Ystradgynlais Village of Brecknockshire A colliery centre, it is 13 m from Swansea, 210 m from London by the G W Rly,

Yucatan District of Mexico It is a peninsula, 400 m long, in the S E of the country, covering some 55,000 sq m On it are extensive remains of the civilisation of the Mayas

Yugoslavia Kingdom of Europe, before 1929 called the kingdom of the Serbs Croats and Slovenes Its nucleus is the kingdom of Serbia, to which other areas were added after the Great War, although its boundaries were not officially settled until 1924 It thus includes Montenegro, as well as Bosnia, Herzegovina and other districts formerly under Austrian rule The area is 94,220 sq m, and it has a coastline on the Adriatic Sea Belgrade is the capital, Zagreb or Agram is the next largest place The ports include Sisak, Split and Kotor, and the country has by treaty a free zone at Salonika Belgrade is a great river port Much of the land is mountainous It is well watered by the Danube and its tributaries. The population (1931) is 13,930,818

Yugoslavia is an agricultural country Wheat, maize and hemp are the chief crops and many cattle and sheep are reared Much land is covered with forests Coal, iron ore and lead are mined

The kingdom is governed by a king and a ministry responsible to a legislature of two houses, a senate and a chamber of deputies of 305 members elected by all adults The people belong chiefly to the Serbian Orthodox and Roman Catholic churches There is an army recruited by compulsory service, and a small navy The country has a national bank, and the dinar is the unit of currency

The first king of the new kingdom was Peter of Serbia, who was succeeded in 1921 by his son, Alexander I In Jan, 1929, Alexander suspended the constitution and ruled for two years as a dictator In 1931 there was a return to constitutional government, but only in a modified form In Oct, 1934, King Alexander, on his way to an important conference in Paris, was assassinated at Marseilles He was succeeded by his young son Peter II (b 1923), with Prince Paul as First Regent

Yukon Territory and River of Canada The territory is the most N W one of Canada It has an area of 207,000 sq m In 1901, owing to the discovery of gold at Klondike, the population was 27,000 In 1931 it had declined to 4100 The capital is Dawson, with 975 people as compared with 2500 during the gold rush There is an abundance of big game, and there are huge forests The river, some 2000 m long, is navigable for 3 months in the year for large steamers from its mouth in the Bering Sea.

ZADKIEL Name taken by Richard James Morrison. Born on June 17, 1795, he was a sailor, but is better known as an astrologer. He founded in 1831 *The Herald of Astrology*, still issued every year as *Zadkiel's Almanac*. He died April 5, 1874.

Zaghlul Saad Egyptian nationalist, generally known as Zaghlul Pasha. Born in 1852, he was arrested for his share in the rebellion of Arabi Pasha. Later he was called to the Bar and took office as Minister of Education, then of Justice. His nationalist activities caused his deportation in 1921, but later he returned, and was Prime Minister in 1924. He died Aug. 23, 1927.

Zagreb (or Agram) Capital of Croatia, Yugoslavia, on the Sava river, situated among mountains but amid fertile land. The older part has narrow winding streets and contains a 15th century Gothic cathedral. A newer area of wide streets, public parks, etc., is the business and industrial centre, possessing also many churches, schools and a university. Many manufacturing industries are carried on. Pop. (1931) 185,581.

Zaharoff Sir Basil GCB (1919), GBE (1918), Hon DCL, Oxford. Grand Cross of Legion of Honour. Financier and politician. Born at Mughla, near Constantinople, Oct. 6, 1849, of Russian and Greek parentage, he dealt in cloth and armaments, and became a millionaire. He gave enormous sums of money to Greece during the Great War, and to various relief funds. He was consulted by Allied statesmen at the Paris Conference and he has founded chairs of aviation and of literature in England, Russia and France.

Zama Numidian town, situated about 75 m S.W. of Carthage. The decisive battle, in which Scipio Africanus Major defeated Hannibal in 202 B.C. and ended the Second Punic War, leaving 20,000 Carthaginians dead on the field and taking another 20,000 prisoner, takes its name from this place, though it was actually fought on the River Bagradas, some miles to the west.

Zambesi River of Africa. It rises in Angola and flows across the continent, mainly eastward, until it falls into the Indian Ocean by a great delta around Chinde in Mozambique. Much of its course is in Rhodesia and on it the Victoria Falls. It is 1600 m long, its chief tributary is the Shire and it is navigable for 400 m.

Zamora Niceto Alcalá President of the Spanish Republic. A lawyer by profession, he was originally a monarchist in politics. In April, 1930, he drew up a scheme for a Conservative Republic, and on the overthrow of the monarchy in 1931 became first president.

Zangwill Israel Jowish writer. He was born in London of poor parents, Feb. 14, 1864, and studied at London University. He became famous through the *Children of the Ghetto*, written at the request of the Jewish Publication Society of America for a story depicting Jewish life among the poorer classes. He wrote novels, plays and pamphlets,

made several successful lecture tours in America and was interested in the Zionist movement. He died Aug. 1 1926.

Zante One of the Ionian Islands. It belongs to Greece and produces currants and olives. The chief town is called Zante. Pop. 40,500.

Zanzibar Island and seaport of East Africa. A British protectorate it lies off the coast of Tanganyika, 25 m from Dar es Salaam. It is 53 m long and covers 610 sq m. The town is on the west coast of the island and has a very fine harbour. The chief product is cloves, which are sent all over the world. Copra and sugar are also exported. The protectorate includes the adjoining island of Pemba.

In the 19th century Zanzibar was an Arab state under a sultan, whose lands included a large area on the mainland. In 1890 it was declared a British protectorate, but the sultan retained his position on the island. Great Britain is represented by a resident and there are two councils, executive and legislative. Pop. (1931) 137,741.

Zealand Island of Denmark. It lies between the Great Belt and the Sound and covers 2690 sq m. On it are Copenhagen and Elsinore. See DENMARK.

Zebra Striped animal of the horse family (*Equidae*) of the *Perissodactyla*. The zebra is a native of Africa and resembles the ass in the shape of its ears, its tufted tail and erect mane. The tawny coat is striped with black on the head, limbs and body, the under parts being greyish. See QUAGGA.

Zebu Domesticated animal of the ox family. It is found in India and other parts of Asia and is used as a draught animal. About the size of a bull, the animals are horned and have a hump on the back. In colour they are white or grey.

Zebulon Israelitish tribe, named after the sixth son of Jacob and Leah. The tribal territory lay north-east of the Plain of Jerreel and was very fertile. Many warriors were of this tribe, specially mentioned in the "Song of Deborah" for its prowess in war.

Zechariah Hebrew minor prophet. A contemporary of Haggai, he shared with him the task of inducing the people to undertake the rebuilding of the Temple. The first part of the book which bears his name fits exactly into this historical setting and may be dated 520-518 B.C. The last six chapters were probably written by another hand at a post exilic date.

Zedekiah Last King of Judah (597-586 B.C.). The younger son of King Josiah, he was placed on the throne by Nebuchadnezzar, as his tributary. In 588 he joined in a revolt against Babylon. After a siege of a year and a half, Jerusalem was taken by Nebuchadnezzar, and Zedekiah was carried captive to Babylon.

Zedoary Herbaceous East Indian plant (*Curcuma zedoaria*) with aromatic tuberous root stocks. A warm, bitter drug with tonic properties is prepared from the tubers. Another species, *C. longa*, provides turmeric, a yellow powder used for pickling and in curry powder.

Zeebrugge Town and seaport of Belgium. It is on the coast, 8 m from Bruges, at the mouth of the canal that links that city with the sea. Zeebrugge is the terminus of a ferry service with Harwich and has some shipping. There is a harbour protected by an immense mole.

In Oct. 1914, the Germans took Zeebrugge and made it a submarine base. On April 23, 1918, a British force under Capt. A. B. Carpenter in H.M.S. *Vindictive* attacked the port, blocked up the entrance to the harbour and damaged the defences.

Zeehan Town of Tasmania. It is 25 m from the coast at Macquarie Harbour and is a railway junction. The chief industry is the smelting of the silver and lead that are mined in the vicinity. Pop. 3000.

Zeeland Province of the Netherlands. It is in the S.W. of the country and includes Walcheren and other islands. It covers 708 sq. m. and Middelburg is the capital.

Zeeman Pieter, Dutch physicist. Born May 18, 1865, he became Professor of Physics at Amsterdam in 1903. The Zeeman effect, discovered by him, which assisted in the development of the modern conception of atomic structure, refers to the fact that in a strong magnetic field each line in the spectrum of an element is split up into components.

Zenana Women's apartments in a Hindu household, equivalent to the Mohammedan harem.

Zend Avesta Parsee religious books. It is a collection of sacred lore, containing astronomy and medicine as well as moral precepts and prayers addressed to spirits good and bad. Traditionally ascribed to Zoroaster, the original copy is supposed to have been destroyed when Persia was invaded by Alexander, or at the time of the Arabian conquest.

Zeno Founder of the Stoic philosophy. Born at Citium, in Cyprus, probably early in the 4th century B.C., he went to Athens, where he eventually started his own school in the *stoa portico* or painted porch, whence the name Stoic. His philosophy of temperance and moderation earned him the respect of all Athenians. The date of his death is unknown.

Zenobia Queen of Palmyra. She married Odenatus, who shared the Roman Empire with Gallienus, and on the death of her husband she made it her ambition to elevate Palmyra to pre-eminence in the Eastern Roman Empire. She took the name Augusta and claimed to be Queen of the East. Her subjugation of Egypt caused the Emperor Aurelian to lead an expedition against her in A.D. 271. She was captured and allowed to retire to Tihur, where she died.

Zephaniah Hebrew minor prophet. He appears to have prophesied in the reign of Josiah, King of Judah (639-608 B.C.), before the great reformation of 621 B.C. (2 Kings xxiii, 4). The burden of his book is the near approach of a day of judgment.

Zeppelin Type of airship invented by Ferdinand, Count Zeppelin, a German. He was born at Constance, July 8, 1838, and became a soldier. He fought in the American Civil War and for his own country in 1866 and 1870-71, after which he retired. After many years of research and effort, he produced his first airship in 1890. From his

plans many others were built for the German government, and during the Great War they were employed for raiding purposes. Owing to their size and for other reasons they were not a conspicuous success, and a number were destroyed by the Allied airmen. The Count died March 8, 1917. After the Great War, a monster zeppelin called the *Graf Zeppelin*, was built. In 1929-30 it voyaged round the world, and in 1931 and 1932 it visited England. See AIRSHIP.

Zermatt Pleasure resort of Switzerland. It is 22 m. by railway from Visé and stands over 5000 ft. high. From it the Matterhorn and the Monte Rosa can be climbed.

Zerzura Oasis in the Libyan desert. Long regarded as a lost land, it was discovered by an expedition in April, 1932. It is some 300 m. to the west of Wadi Halfa on the Nile.

Zetland Marquess of English traveller. Born June 11, 1876, Lawrence John Lumley Dundas succeeded his father as second marquess in 1929. Educated at Harrow and Cambridge, he has travelled extensively in the far east. He was Governor of Bengal, 1916-22. He has been president of the Royal Geographical Society and the Royal Asiatic Society and is chairman of the National Trust.

As a writer Lord Zetland is better known under his previous title of Earl of Ronaldshay. He has written many books on the far east, the best known being *India—a Bird's Eye View*. He has also written the authorised *Life of Lord Curzon* and in 1932 a *Life of Lord Cromer*.

Zeus The principal god in the Greek pantheon. The chief seat of his worship was Mt. Olympus in Thessaly. He appears in two guises as a very human, amorous being, constantly suffering criticism from his wife, Hera, and as the all-powerful "Father of gods and men."

Ziggurat Building in Babylonia and Assyria. It is a temple built in a series of stages. The ruins of a famous one have been excavated at Ur.

Zimbabwe Ruins in Rhodesia. They are 17 m. from Victoria and are evidently part of a fortress. They were discovered in 1868 and examined some years later when carvings and vessels were found. They are the relics of a race possibly Bantu with a high degree of culture and were in some way connected with the gold mines.

Zinc (or Spelter). Chemical element with the symbol Zn, atomic number 30, and atomic weight 65.38. A bluish white metal with a melting point of 785° F. It is found chiefly as the carbonate calamine (ZnCO₃) and the sulphide, zincblende. It is used for the plates of electric batteries and for roofing, galvanising, etc. Applied as a protective coat to iron it prevents rusting. Alloyed with copper it forms brass, and there are other commercial alloys. The chloride is used as a flux for soldering. Salts of zinc are used extensively in medicine and as reagents.

Zinnia Genus of the order *Compositae*. They are perennial herbs, natives of the Southern U.S., from which popular garden forms have been developed with flowers of white, yellow, red, purple and many intermediate colours. They are easily grown in summer in good well-drained soil.

Zinoviev Gregory, Russian Communist. He was born Sept. 1, 1883, his real name being Grigory Evseyevich, and

became a journalist. For some years he was connected with revolutionary newspapers. In 1915 he helped to found the Third International, of which he became president four years later. A letter to British Communists purporting to be from him was published in the British press in 1921 and had far-reaching effect. He was expelled from his party in 1927, but readmitted the following year.

Zion Mount. One of the hills on which Jerusalem was situated. Actually Zion is the southern portion of the eastern hill on which the temple was built. The name, which is frequently personified, is variously applied, being used for the whole hill, for Jerusalem itself, and for the Jewish people.

Zionism Jewish nationalist movement. In 1897 the Zionist organization was established "to create for the Jewish people a home in Palestine secured by public law," but not till 1921 was the definite step taken of setting up in Palestine a national home for the Jews. There are two branches to the Zionist organization. One is concerned with the administration of the national fund for the purchase of land in Palestine, the other stresses the importance of the national home as a centre of Jewish culture.

Zirconium Chemical element, symbol Zr, atomic number 40, atomic weight 91. One of the rare earth elements, it is found in zircon and is used in the manufacture of tool steels.

Zither Musical instrument, the cithara of the Greeks. It consists of a shallow sound chest, shaped like a bottle. A number of strings, often as many as 12 are stretched over the frame, but four or five melody strings, which are of metal and are plucked by the player, form the main part of the instrument. The zither is still played in certain parts of Switzerland and Germany.

Zlin Town of Czechoslovakia. It is in Moravia, about 50 m. to the east of Brno. It was an agricultural centre when, about 1894, Tomas Bata erected a factory for manufacturing boots. Others were built as his business grew until the place became an industrial town of some size with schools, hospitals and other public buildings. Pop. (1930) 21,584.

Zodiac Belt of the heavens following the path of the sun. It extends 8° each side of the ecliptic, and was anciently divided into twelve parts, each with an appropriate sign and the name of the constellation which then occupied that division of the belt. On account of the precession (qv) of the equinoxes the constellations no longer inhabit the divisions bearing their names, and the division of Aries, the first, is now occupied by the constellation of Pisces, the last of the twelve. The twelve signs of the zodiac are Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricornus, Aquarius and Pisces. See ECLIPSE, SUN.

Zoetrope Mechanical toy. It consists of a rotating drum upon which are placed, around its inner periphery, strips of paper with figures of men, etc., thereon. By turning the cylinder the images are seen through slots in the upper side, and apparently they are in motion.

Zogu Ahmet, King of the Albanians. He was born in 1893 and educated in Constantinople. After serving in the Austrian army during the Great War, he became

Minister of the Interior (1920), then Minister for War (1921), and later Prime Minister (Dec. 1922). He was elected President of the Albanian Republic, Feb. 1, 1925, and proclaimed king Sept. 1, 1928.

Zola Emile, French author. He was born in Paris, April 2, 1840. Leaving school early, he engaged in journalism with but indifferent success. He showed greater aptitude for story telling, his *Contes et Noveaux* (1864) being a collection of charming tales. *L'Assommoir*, dealing with drunkenness, created a sensation. Among other works are *Une Page d'Amour*, *La Joie de Vivre*, *L'Œuvre*. Most of Zola's tales are distinctly unconventional, an exception being an idyllic story, *Le Rêve*. In 1898 he successfully espoused the cause of Captain Dreyfus in his letter to *L'Aurore*, beginning, "J'accuse." He died Sept. 29, 1902.

Zollverein German customs union. It was formed gradually between 1819 and 1834 under the leadership of Prussia and was one of the most powerful of the forces making for a united Germany. It includes all the states of the German republic and its object is to secure a uniform rate of customs duties throughout them.

Zoological Gardens Enclosure in which wild animals live in order that they may be seen. In England the chief garden is in Regent's Park, maintained by the Zoological Society, which has also a park at Whipsnade, where the animals live in the open air. Many large cities have zoological gardens, among these being Paris, Berlin, Washington and Edinburgh. A notable garden is the one near Hamburg founded by Carl Hagenbeck.

Zoology Study of living animals. Its chief branches are morphology, dealing with form and structure, anatomy, which investigates the position and relation of organs and parts, embryology, dealing with development from the ovary to maturity, and physiology, which treats of the organs of nutrition, reproduction and the nervous system.

Another department of zoology deal with the classification of animals. The classification now accepted is that of Gegenbaur who makes nine sub-kingdoms. There are protozoa, coelenterata, vermes, echnidodermata, arthropoda, brachlepeda, mollusca, tunicata and vertebrata.

Zoroaster Religious teacher, also known as Zarathustra. He lived about 800 B.C. and founded a religion which was the faith of the Persians from the sixth century B.C. to the seventh century A.D. His followers are now represented in India by the Parsees. He taught a lofty monotheism in marked contrast to the idolatry of his age, as well as an ethical doctrine of kindness and charity. To other faiths he displayed a large-hearted tolerance. The worship of fire, as the symbol of good, plays a prominent part in Zoroastrian ritual, while charred wood and darkness are taken to represent evil.

Zouave Soldier in the French army. The name is that of a tribe in Algeria from whom a regiment for service with the French was recruited in 1831. The Zouaves were officered by Frenchmen, but after a time Frenchmen also formed the rank and file, the recruiting of Arabs having stopped. They retained their picturesque Moorish dress.

Zuider Zee Sea of the Netherlands. It covers about 1200 sq. m. and is an opening of the North Sea, with which

It is connected by several channels between the Texel and other islands. It is a fishing ground, and a canal connects it with the North Sea at Ymuiden. It was formed in the 13th and 14th centuries, when the sea flooded over the land. It contains a number of islands and its waters are very shallow.

A good deal of land has been reclaimed from the Zuider Zee since the 17th century. In 1920 work was begun on a further project of reclamation. This involved the building of a dam or dyke, nearly 20 m long, across the entrance from North Holland to Friesland, stilling the Island of Wieringen. In May, 1932, the dam was completed and some 800 sq m were reclaimed.

Zululand Country of South Africa. It has a coastline on the Indian Ocean and its area is 10,425 sq m. The land is chiefly inhabited by Zulus, a tribe who possessed a powerful kingdom in the 18th century. Between them and the Boers there was perpetual dissension, and in 1879 there were also serious difficulties with Britain, the result being the Zulu War in which the British met with disaster at Isandhlwana and Rorke's Drift. At Ulundi, however, on July 4, 1879, the Zulus were defeated and their king, Cetewayo, was made prisoner. Zululand was then annexed and in 1897 was made part of Natal.

Zurich Lake of Switzerland. It is 25 m long and covers 34 sq m. The waters are carried by the River Limmat to the Aar.

Zurich City of Switzerland. It is situated at the northern end of the Lake of Zürich, 41 m from Lucerne. There are a number of old churches and some fine modern ones of the former may be mentioned the cathedral, associated with Zwingli, the Wasser

Kirche and the Frau Münster. The town hall dates from the 17th century. Zürich is a great educational centre. It has a university, a valuable library and a polytechnic school, and here is the Swiss National Museum and a building called the Ruhen, in which is a collection associated with Pestalozzi. Two fine bridges cross the Limmat. A great manufacturing centre, Zürich produces silk and cotton fabrics, machinery, etc. Pop (1930) 249,820.

Zutphen Town of Holland. At the confluence of the Rivers Yssel and Berkel, 18 m N N E of Arnhem, it has withstood many sieges, especially during the struggle of the Netherlands against Spanish domination in the sixteenth century. After the Battle of Zutphen, in 1586, it was captured by the Spaniards, but recovered by Maurice of Orange in 1591. It trades in grain and timber and has tanning, weaving, oil and paper industries. Pop 19,586.

Zwingli Ulrich Swiss reformer. Born Jan 1, 1484, he was educated at Berne and Basel and became a priest. In 1516 he settled at Einsiedeln and in 1518 at Zürich, where he denounced the sale of indulgences and other abuses of the Church of Rome. He married and in other ways broke away from the old faith. Under his direction the citizens accepted the reformed teaching and Zürich became a Protestant centre. In 1531 the canton of Zürich became involved in a war with other cantons and in a battle at Kappel, Zwingli, who was with the troops as a chaplain, was killed Oct 11, 1531.

Zygote Term used in biology. It is the cell which results from the fusion of two others (gametes), and from which a new individual develops.

FAMOUS CHARACTERS IN PROSE, POETRY AND TRADITION

A supplementary glossary of the characters, famous in literature, tradition and myth, to whom frequent reference is made in the literature and press of the day. Characters who also appear in history or who require full encyclopædic treatment will be found in their proper place in the body of the work.

Absolute Sir Anthony. From *The Rivals* (Sheridan) A hot-tempered, overbearing, yet generous old English gentleman, father of the hero, Captain Absolute

Acres Bob From *The Rivals* (Sheridan) A swashbuckling coward, rival of Captain Absolute for the hand of Lydia Langgish (q.v.) A braggart whose bravery "oozed out of his fingers' ends" when put to the test.

Adams Parson Simple country curate from Fielding's *Joseph Andrews* His ignorance of the ways of the world and his absentmindedness put him in many embarrassing situations

Admirable Crichton From *The Admirable Crichton* (Barrie) The perfect butler who, when his lord's yachting party is wrecked, masters the situation and successfully woos the Lady Mary, only to revert to his humble position after the rescue of the party

Aguecheek Sir Andrew Lank and simple knight, the constant companion of Sir Toby Belch (q.v.) and butt of many of his jokes From *Twelfth Night* (Shakespeare)

Alan-a-Dale Appears in Scott's *Ivanhoe* The minstrel among the outlaws of Robin Hood

Alice From *Alice in Wonderland* and *Through the Looking Glass* (Lewis Carroll) A little girl who, by falling down a rabbit-hole, reaches a strange land of non-sensical people and animals

Ancient Mariner Hero of S. T. Coleridge's poem, *The Rime of the Ancient Mariner*, who brings a curse on himself and his shipmates by shooting the Albatross

Aramis See MUSKETEERS, The Three

Merlin Magician of the legends of King Arthur, himself bewitched by the Lady of the Lake (q.v.). He appears as a minstrel in Celtic folk-lore. He figures in Tennyson's *Idylls of the King*.

Micawber Mr. William. Optimist who falls in every enterprise, but still expects something to turn up. From Dickens's *David Copperfield*.

Minnehaha Indian name, meaning "laughing water" or "waterfall," given to the bride of Hiawatha (q.v.) in Longfellow's poem.

Moses From Oliver Goldsmith's *Friend of Wakefield*. He was the slave son of Dr Primrose (q.v.) and exchanged a horse for a gross of green spectacles.

Mowgli Hero of *The Jungle Books* (Kipling). A little Hindoo boy who lives with the animals, and has learnt their language. As a baby he was suckled by a she-wolf that had lost her cubs.

Musketeers The Three. They were Porthos, a vain, merry, fat man, Athos, the aristocrat and eldest of the three, and Aramis, who was educated for the church, to which eventually he turns. They are companions of D'Artagnan in Dumas' *The Three Musketeers*, *Twenty Years After*, *The Vicomte de Bragelonne*, etc.

Nemo Captain. From *Twenty Thousand Leagues Under the Sea*, by Jules Verne. He is the captain and navigator of a mysterious submarine ship called the *Nautilus*.

Newcome Colonel. Exemplary character from *The Newcomes* (Thackeray). He loses his fortune but maintains his upright moral bearing.

Nickleby Nicholas. Hero of Dickens's novel of the same name. A boy of good parentage who seeks his own fortune, he is assistant in a Yorkshire school, member of a theatrical touring company, and finally gets a post in business in London.

O'Flynn Father. Jolly Irish priest of Donegal, celebrated in the popular song, "Father O'Flynn," by Alfred Perceval Graves.

Ogilvy Margaret. Beautiful Scotswoman from Barrie's book of the same name. The character, based on the author's mother, is a touching tribute to her.

Old Bill Humorous soldier in Great War journalism, created by Bruce Bairnsfather in his sketches and cartoons.

Old Mortality Eccentric old man in Scott's novel of the same name. He spent his time restoring tombstones and monuments.

O'Malley Charles. From Charles Lever's novel of the same name. A dragoon, hero of an Irish regiment.

O'More Rory. Celebrated in the song by Samuel Lover, which was suggested by the hero of the author's novel of the same name.

Ophelia Daughter of Polonius and heroine of Shakespeare's *Hamlet*. She loses her mind because of the apparent madness and cruelty of Hamlet towards her. Her body is found floating down a stream.

Orlando Young noble who meets and falls in love with Rosalind in the

Forest of Arden, from Shakespeare's *As You Like It*.

Ortheris Stanley Nimble witted Cockney who appears in many stories by Rudyard Kipling. One of the *Soldiers Three*, whose heart goes out to every dog he sees.

Othello Moorish general in the Venetian army, the hero of Shakespeare's tragedy *Othello*. He marries the fair Desdemona (q.v.) whom he kills out of jealousy. He then takes his own life.

O'Trigger Sir Lucius. Humorous Irish adventurer, friend of Absolote in *The Rivals* (Sheridan).

Page Mistress Windsor who helps in a plot to ridicule Falstaff (q.v.). She is the mother of "sweet Anne Page," from Shakespeare's *The Merry Wives of Windsor*.

Pamela Heroine of Richardson's *Pamela*. She is a maiden of model virtue who resists temptation and finally marries her would-be seducer and reforms him.

Pangloss Doctor. Poor scholar full of learned quotations. He becomes tutor to Dick Dowdles in George Colman's comedy, *The Heir at Law*. Another Dr. Pangloss is a figure in Voltaire's *Candide* (q.v.).

Pantagruel Gross but erudite son of Gargantua (q.v.). He is the hoisterous hero of Rabelais' *Gargantua and Pantagruel*, and is usually in the company of the drunken rake, Panurge.

Panza Sancho. Stolid, faithful squire to Don Quixote. He rides behind him on a donkey, making more commonsense remarks with the air of a wit. From Cervantes' *Don Quixote*.

Parsifal (or Sir Percival). Leader of the knights of the Holy Grail. He appears in Arthurian legend and is the hero of Wagner's opera, *Parsifal*.

Partington Mrs. Eccentric creation of B. P. Shillaber. She tried to sweep away the Atlantic Ocean with her mop.

Patterne Sir Willoughby. Central figure in *The Egoist*, by George Meredith. His overweening egotism obscures his good qualities, causes him to be jilted by two women of his own rank, and leads him to marry a woman of humbler position.

Peachum Polly. Beautiful and virtuous lady-love of the highwayman Macheath (q.v.) in John Gay's *Beggar's Opera*.

Pecksniff Mr. Rogue who appears to be a pious architect. From Dickens's *Martin Chuzzlewit*.

Peggotty Clara. Nurse to David Copperfield (q.v.), and sister of Daniel Peggotty, an old Yarmouth fisherman. She marries Barkis (q.v.) from Dickens's *David Copperfield*.

Peregrine Pickle Dissolute, vulgar and hot-headed practical joker. He is the hero of Smollett's *The Adventures of Peregrine Pickle*.

Peter Pan Boy who will not grow up. He is the half-elf, half human hero of Sir J. M. Barrie's play of that name.

Pew Sinister blind man, habitué of the Admiral Benbow Inn, whose approach was signalled by the tapping of his stick. From Stevenson's *Treasure Island*.

Pickwick Mr. Fat, genial president of the Pickwick Club, in Dickens's *Pickwick Papers*. He is the ingenious hero of many amusing adventures.

Pistol Insubordinate ensign of Falstaff (q.v.). A bullying rascal who marries Dame Quickly (q.v.). He appears in Shakespeare's *Henry IV*, *Henry V* and *The Merry Wives of Windsor*.

Poirot Hercule. Dapper little Belgian detective hero of Mrs. Agatha Christie's crime novels. He appears in *The Murder of Roger Ackroyd* and the dramatised version *Atibi*.

Polonius Chamberlain in the court of Denmark and father of Ophelia (q.v.). He is killed by Hamlet who mistakes him for the villainous King Claudius. From *Hamlet* (Shakespeare).

Pooh Bah Pompous Oriental who is the Lord High Executioner and every other official in the state. From Gilbert and Sullivan's *The Mikado*.

Porthos See *MUSKETEERS*, The Three.

Portia Heroine of Shakespeare's *Merchant of Venice*. A beautiful heiress who impersonates a lawyer in order to save the life of her lover, Antonio, who is being sued by Shylock (q.v.).

Primrose Doctor. Simple country clergyman. He is the hero of *The Vicar of Wakefield* (Oliver Goldsmith).

Prism Miss. Prudish spinster who sets her cap at a bachelor clergyman. Humorous character in Oscar Wilde's comedy, *The Importance of Being Earnest*.

Pry Paul. Inquisitive idler in John Poole's comedy of the same name. He is always using the phrase, "I hope I don't intrude."

Puck Mischief making elf of English fairy-legend. He confuses several pairs of lovers in Shakespeare's *A Midsummer Night's Dream*. He also appears in Rudyard Kipling's *Puck of Pook's Hill*. He is sometimes known as Robin Goodfellow.

Pujol Aristide. Humorous Frenchman, hero of *The Joyous Adventures of Aristide Pujol*, by William J. Looke.

Pure Simon. Quaker who is taken for the impostor of Colonel Feignwell when the reverse is actually true. He loses the hand of his lady love to the same rascal. From *A Bold Stroke for a Wife*, by Mrs. Centlivre.

Quasimodo One-eyed dwarf, hunch-backed but of prodigious strength, who dwelt on the roof of Notre Dame, Paris. He was official bell ringer and the protector of the heroine Esmeralda (q.v.). From Victor Hugo's *Hunchback of Notre Dame*.

Quatermain Allan. Hunter hero of several of Rider Haggard's novels, including *King Solomon's Mines*.

Quex Lord. Hero of the play *The Gay Lord Quex*, by Sir Arthur Pinero.

Quickly Mistress or Dame. Hostess of the tavern in Eastcheap frequented by Falstaff (q.v.). She marries his ensign Pistol (q.v.), and appears in three of Shakespeare's plays, *Henry IV*, *Henry V* and *The Merry Wives of Windsor*.

Quilp Daniel. Hideous and malicious dwarf in *The Old Curiosity Shop* (Dickens). He lives by petty crimes and money-lending, and is finally drowned in the Thames when fleeing from the law.

Rab Dog hero of Dr John Brown's *Rab and his Friends*. An affectionate mastiff with an almost human regard for his master, an old Scottish earler

Raffles Mr. Justice. Gentleman-burglar, hero of the novel *Raffles* and a series of crime stories by E W Hornung

Ralph Roister Doister

Conceited, blustering hero of *Ralph Roister Doister*, by Nicholas Udall, written at the beginning of the 16th century.

Random Roderick Sensual, selfish Scottish adventurer. He is a fortune-seeker and traveller who mixes with the most questionable characters, and hero of a novel of that name by Smollett.

Rebecca Beautiful daughter of Isaac of York. She is a Jewess who loves Ivanhoe but loses him to her rival, the Lady Rowena. From Scott's *Ivanhoe*

Red Cross Knight The Hero of Spenser's *The Faerie Queene*. To him Gloriana entrusted the care of Una (q v). He is the personification of holiness, who fights and slays the dragon (Slu)

Reeder J. G Detective-inspector of Scotland Yard. He is the central figure in the murder investigation in many of Edgar Wallace's mystery "thrillers"

Remus Uncle Negro story-teller on a cotton plantation who relates fables about animals. From J O Harris's *Uncle Remus's Stories*

Reynard the Fox Hero of John Massfield's great poem of the hunting field. The name comes from the central character in a famous beast-epic of the Middle Ages

Ridd John. Tall, robust Devonshire farmer, a famous wrestler. Hero of R. D Blackmore's *Lorna Doone*

Rima Forest maiden of great beauty, the chief figure of W H Hudson's South American romance, *Green Mansions*. The protectress of the birds, she is the subject of a piece of sculpture by Jacob Epstein in the bird sanctuary in Hyde Park, London

Roderick Dhu Gallant chief of a band of outlaws who figures in Scott's poem, *The Lady of the Lake*.

Romeo Son of the Montagues, a noble family of Verona. He is the hero of Shakespeare's *Romeo and Juliet*. See JULIET

Rosalind Heroine of *As You Like It* (Shakespeare). She is the beautiful daughter of the banished duke who disguises herself as a boy and seeks refuge in the forest of Arden. She meets and finally marries Orlando (q v)

Rose Mary Heroine of Sir J M Barrie's play of that name. She is mysteriously spirited away while on a picnic to a lonely island off the West Coast of Scotland

Rosinante Clumsy cart-horse upon which Don Quixote rode on his search for adventure. From Cervantes' *Don Quixote*

Sampson Dominie Village school-master who described everything as "Prodigious," from *Guy Mannering* (Scott)

Sawyer Bob Medical student often nicknamed "Sawbones" in *The Pickwick Papers* (Dickens)

Sawyer Tom Boy born and brought up in the Southern States of America. The mischievous and lovable hero of Mark Twain's novel, *Tom Sawyer*

Scheherazade Bride of the Caliph who saves herself from the fate of his previous wives by telling the stories known as *The Arabian Nights Entertainments*

Schlemihl Peter Man without a shadow, having sold it to the devil. He is the hero of the German story by Chamisso

Scrooge Ebenezer Heartless miser from Dickens's *Christmas Carol*. He suddenly becomes a model of generosity and goodwill after a vivid ghost dream

Shallow Justice Absurd and boastful country magistrate from Shakespeare's *Merry Wives of Windsor*

Shandy Tristram Hero of Sterne's novel of the same name. He is the nephew of Uncle Toby (q v)

Sharp Becky Fascinating adventuress whose ambition was to marry money and become good. Heroine of Thackeray's novel, *Pamty Fair*

She Mystical African queen and priestess, Ayesha; in full, She-who-must-be-obeyed. She is the central figure in Rider Haggard's novel, *She*

Sikes Bill Rough, cruel burglar who murders Nancy, his mistress, in Dickens's *Oliver Twist*. He is the accomplice of the thief Fagin (q v.)

Silver Long John. One-legged cook aboard the treasure-hunting ship, in Stevenson's *Treasure Island*. He is an old pirate who heads a mutiny.

Sinbad the Sailor Voyaging merchant of Bagdad from *The Arabian Nights Entertainments*

Smike Poor, ill-nourished boy found in a Yorkshire school and taken with Nicholas in his travels, from *Nicholas Nickleby* (Dickens). He proves to be the illegitimate son of the hero's uncle, Ralph

Snodgrass Mr Poetical member of the Pickwick Club from Dickens's *Pickwick Papers*

Squeers Mr Wackford Crafty, cruel hoggish schoolmaster of Dotheboys Hall, Yorkshire, sometime employer of Nicholas. From Dickens's *Nicholas Nickleby*

Stalky Schoolboy hero of Kipling's school story, *Stalky and Co*

Standish Miles Puritan captain who does his love-making by proxy. He is the hero of Longfellow's *The Courtship of Miles Standish*

Stiggins The Rev. Mr. Drunken hypocrite who poses as a spiritual adviser of Mrs. Weller. A Methodist minister from Dickens's *Pickwick Papers*

Svengali Villainous Jewish musician and mesmerist who hypnotises Trilby (q v) in George Du Maurier's novel, *Trilby*.

Swiveller Dick Dissipated, scatter-brained young law apprentice who finally marries money. From Dickens's *Old Curiosity Shop*.

Tam o' Shanter Hero of Robert Burns's poem of that name. He sees a dance of witches in a ruined church, led by Old Nick (Satan) himself, when returning drunk from market.

Tanqueray Paula. Heroine of the play, *The Second Mrs Tanqueray*, by Sir Arthur Pinero

Tapley Mark. Stable boy in Dickens's *Martin Chuzzlewit*. A body-servant to the hero, he was cheerful in the most difficult situations.

Tartarin Humorous and boastful hero of Alphonse Daudot's novel, *Tartarin de Tarascon*, and its sequels, *Tartarin sur Les Alpes*, etc

Tarzan Hero of Edgar Rice Burroughs's *Tarzan of the Apes*, etc. He is reared by a she ape when his parents die on a desert island, lives in the trees and becomes king of the jungle

Teazle Lady Roguish, coquettish young wife of Sir Peter Teazle in Sheridan's *School for Scandal*. She becomes involved in an intrigue with Surface

Tess Tragic heroine of Thomas Hardy's *Tess of the D'Urbervilles*. She is betrayed by her lover and afterwards hanged for his murder

Teufelsdröck Herr Professor with a special philosophy concerning clothes. He is the central figure in Carlyle's *Sartor Resartus*

Tiny Tim Delicate child of Bob Cratchit, a hard working clerk in Dickens's *Christmas Carol*

Toad of Toad Hall. Character of *The Wind in the Willows*, by Kenneth Grahame. His rash conceit leads him continually into trouble. He celebrates his own exploits and honour in boastful verses

Toby Uncle. Lovable old soldier wounded in the French wars. He is noted for his charitable, Christian character. From Sterne's *Tristram Shandy*

Tom Uncle. Aged and venerable negro-slave, hero of *Uncle Tom's Cabin*, by H. Beecher Stowe.

Topsy Mischievous young slave-girl of unknown parentage, who describes herself as having "just grooved." From Mrs Beecher Stowe's *Uncle Tom's Cabin*

Another Topsy is the modern heroine of *The Trials of Topsy*, and *Topsy, M.P.*, by A P Herbert.

Touchstone Jester or clown in Shakespeare's *As You Like It*. He combines philosophy with his wit.

Trilby Artist's model who becomes, under the influence of Svengali (q v), a noted opera singer. She is the heroine of George Du Maurier's *Trilby*

Tristram Sir. One of the knights of Arthurian legend. He falls in love with *Isolde* (q v), the wife of King Mark, his uncle. He is the hero of Arnold's *Tristram and Isolt* and Swinburne's *Tristram of Lyonesse*, and he also appears in Tennyson's *Idylls of the King* and Malory's *Morte D Arthur*

Trotwood Betsy. Old woman with a sharp tongue and a soft heart, great-aunt of David and his "second" mother. From Dickens's *David Copperfield*

Twist Oliver. Poor orphan boy, reared in workhouse, the young and

innocent accomplice of a gang of thieves. He is the hero of Dickens's *Oliver Twist*

Tytltyl Youthful hero of Maurice Maeterlinck's play, *The Blue Bird*

Una Heroine of Spenser's *Faerie Queene*. She is the personification of truth, and finally marries her champion, the Red Cross Knight (q v)

Van Winkle Rip. Man who falls asleep for twenty years and wakes to find very changed manners and customs in the same old world. He is the hero of Washington Irving's story, *Rip Van Winkle*.

Varden Dolly. From Dickens's *Barnaby Rudge*. Pretty heroine dressed in a flower trimmed hat and a little flowery gown now called after her. She marries the landlord of the Maypole Inn.

Vathek From the Eastern romance of the same name by William Beckford. A gifted caliph with an uncontrolled ambition which leads him to sell his soul for a throne to Eblis, or Satan

Vernon Diana. Heroine of Scott's *Rob Roy*. A maiden who knows no fear in her fight for the Jacobite cause

Viola From *Twelfth Night* (Shakespeare). Disguised as a page, she becomes the servant of the duke, Orsino, with whom she falls in love

Vivien The Lady of the Lake (q v). An enchantress in Arthurian legend (See MERLIN)

Vox Valentine. Ventriloquist hero of Henry Cockton's novel of the same name. He uses his powers largely to play amusing pranks

Watson Doctor. Friend of Sherlock Holmes (q v). From Conan Doyle's series of mystery novels

Weller Sam. Cockney boots of the White Hart Inn, who becomes personal servant to Mr Pickwick (q v) in Dickens's *Pickwick Papers*

Wendy Heroine of Barrie's *Peter Pan*. She becomes Peter's sweetheart and shares his home in the tree tops

Wilson Pudd'nhead. Hero of a humorous novel of the same name by Mark Twain. He was so nicknamed by his fellows on account of his stupid remarks

Wimble Will. Simple, happy member of the De Coverley Club with a love for fishing, cutting willow wands and innocent country pursuits. He appears in the essays of Addison and Steele in *The Spectator*

Winkle Mr. Member of the Pickwick Club who claimed to be a sportsman, but who made dismal failures as an ice skater and as a horseman. From Dickens's *Pickwick Papers*

Winkle Rip Van. See VAN WINKLE

Yellowplush Mr. Footman to smart London society, the hero author of *The Yellowplush Papers*

Yeo Salvation. Devonshire "Old salt" from Kingsley's *Westward Ho*

Yorick Jester to the King of Denmark, Hamlet's father, in Shakespeare's *Hamlet*. His skull is discovered by Hamlet in the graveyard, prompting the now proverbial remark, "Alas, poor Yorick!"

GUIDE TO THE CINEMA

THE early history of the cinematograph is a fruitful source of controversy, mainly because the moving picture may be said to have emerged from the chrysalis of the "still" magic lantern. America claims that Thomas Edison was responsible for the practicable invention of the motion picture in 1887, but an Englishman, John A. Roebuck Rudge, had in 1863 introduced movement in connection with picture projection, naming the resultant invention "The Light in the Lantern."

William Friese-Greene, another English pioneer, also was ahead of the Edison invention with a moving picture recorded in 1885 on paper which he rendered transparent by immersion in castor oil. It was not until 1889 that Friese-Greene evolved his first celluloid film. Their discoveries created world wide interest but although developments had, by 1903, presented the film of the story-telling medium—"The Great Train Robbery" was made in that year—it is doubtful whether any one could at that stage have foreseen the creation of any industry such as resulted.

Edison was also responsible for some of the earliest talkies, which he obtained by the simple process of synchronising the film with his famous Edison-Bell records.

To-day close on £850,000,000 is invested in the motion-picture industry of the world. During the year ended 1934 the total number of paid admissions in Great Britain was 963 millions. The amount paid by the public for these admissions was £41,120,000, and of this sum about £6,500,000 was deducted on account of the Entertainment Tax then in force.

The average weekly attendance is about 18½ millions.

The rate of progress of the cinema in public favour gained momentum during the years 1914 to 1920 until to-day it is the greatest entertainment medium in the world. Film producing companies floated their own distributing agencies and acquired or built chains of cinemas—a movement which spread to Britain, now the second-best film market in the world.

With the fast-growing popularity of films here American companies or their subsidiaries sought financial interest in British cinemas, and even to-day have strong holdings in one of the major circuits consisting of about 400 cinemas.

A reversal to this procedure was made early in 1936, when Lord Portal, at the head of a big group, acquired through General Film Distributors a very considerable holding in Universal Pictures, one of the most important major independent production units of America.

Another phase in this trend is noticed in the adoption by United Artists of Alexander Korda as an owner-producer of United Artists, thereby coming into association with Chaplin, Goldwyn and Fairbanks.

The main object of American investors who have placed finance in British cinemas has always been to secure such control of the cinemas as would ensure a maximum outlet in the country for the film production of Holly-

wood, which represents 65 per cent. of the world's output of films, judged by volume, and about 75 per cent. of the world's total, estimated in terms of cash.

In the United States there are 15,378 cinemas. Great Britain has a total of 4,712, in addition to approximately 200 places where films are exhibited occasionally.

Approximately 650 British cinemas, including a large percentage of the best in the country, are owned or controlled by film combines, the rest being owned singly or in groups, by companies or individuals with no interest in film production or distribution.

Since the Cinematograph Films Act came into force, the length of British feature films registered has increased steadily from 624,000 feet in the year ending March 31, 1930, to 1,183,000 feet five years later.

This Act decrees that of the total footage of film exhibited in every cinema in Great Britain a percentage shall be of British origin, and of the total footage stocked by every film distributor a slightly higher percentage shall be of British origin. This percentage, which started at 5 per cent. for the cinema owners and 7½ per cent. for the film distributors in 1927, has risen progressively year by year until 1936, when it reaches a total of 20 per cent. British film in both.

This large percentage in exhibition and distribution is often difficult to fulfil and in a number of instances has resulted in the production of cheap films (Quota quickies). These are universally condemned, and it is anticipated that when the Act expires in 1938 there will be a drastic overhauling. The wishes of the trade are being consulted, and it is safe to assume that as a result an entire redraft of the Act will ensue.

Immediately following the introduction of the Films Act of 1927 a large number of new British production companies was floated, principally on public subscription, which was in many cases generally taken up. Of nearly twenty such flotations only six or seven are now functioning successfully. This fact is due largely to the introduction by Warner Brothers Pictures of America, and the Vitaphone Corporation of America, of the synchronised talking film, and the consequent public demand for talking pictures in preference to silent ones. After recovering from the early setback the production side has made vast strides. With a total in the neighbourhood of 200 films 1935 was a boom year, and 1936 promises even a greater output. New and bigger studios are being erected, challenging the best in Hollywood.

The first British talkie film was shown in 1924 at the British Empire Exhibition by Dr Lee de Forest.

On September 27, 1928, the first public exhibition of American talking films (Vitaphone) was given at the Piccadilly Theatre, London, the programme including one full-length feature film, the "Jazz Singer," the first in its class seen in this country, and a number of short talking and musical films.

On September 28, 1928, some short talking films recorded in the British Acoustic system exploited by Gaumont-British were shown at the Capitol Theatre, London. A month earlier "Seventh Heaven" had been seen at the New Gallery, London, with Fox Movietone recorded music but no dialogue.

It was nearly a year after the first Vitaphone film reached this country that the first important British talking film, Alfred Hitchcock's "Blackmail" was completed at British International Studios, Elstree.

Since the earliest days of cinematography, the aim has been the presentation of moving pictures in natural colours. For about twenty years the studios in England, America and the Continent have been experimenting with colours trying to arrive at a system that would be nearly perfect in the reproduction of natural colours and economic to produce.

Since Charles Urban in 1912 produced his celebrated film of the Delhi Durbar there have been numerous systems invented, some like Urban's cinematocolor separating the primary colours in camera work and joining them together in projection, some firms even resorted to hand tinting.

Until the season 1934-5 little progress was made in developing colour as a commercial proposition. Now it promises to play an increasingly important part in film entertainment. Many subjects in colour are announced by American producers, and close on a score will be made in English studios during 1936.

The system to be used for the majority of these will be Technicolor. Dufaycolor, a

British system, which will also be employed, was used by Associated British Pictures for a sequence of "Radio Parade of 1935"—first commercial use of British colour process.

In the near future television is expected to play an important part in the film world. At the moment the news reel movement is perhaps the most actively interested in television development, and undoubtedly within the immediate future an attempt will be made to intersperse television programmes with the usual film fare. In Germany daylight television vans, operating on the intermediate film system, are employed in the films of topical events.

The film as an educational force is now receiving recognition in all parts of the country, especially in Scotland, where many of the town educational authorities have made grants for the installation of cinematograph equipment in schools. The L.C.C. have also devoted a large sum for experiments in this direction.

Much valuable work in educational film development is also being carried out by the British Film Institute.

One of the countries outside of Great Britain to make the biggest advance in film production during recent years is India. Here there are from forty to fifty production companies.

The most accurate production data available is an estimate based on the pictures censored by the Bombay and Calcutta Boards. During the period January to October, 1935, a total of 346 Indian pictures was examined by these boards. This total compares with 321 during April and March, 1933-4.

The total number of cinemas in India is 675.

WHO'S WHO IN THE CINEMA

A glossary of facts regarding the more important film actors, actresses, producers, and directors of the day. The following abbreviations have been used in the text: b born, m married, div divorced, r n real name.

Astaire Fred b May, 10, 1900, Omaha, Nebraska. Brown hair and eyes 5 ft 9 ins tall. Married Evelyn Potter. Made debut with Adele Astaire, his sister, in vaudeville in New York in 1912. First appearance in London in 1925, in "Stop Flinging." They appeared together in London and since 1931 Fred has appeared alone in "Flying Down to Rio," "Dancing Lady," "The Gay Divorcee," "Roberta," "Top Hat," and "Follow the Fleet." Address, o/o RKO Radio Studios, 780 Gower Street, Hollywood, California.

Arless George b April 10, 1888, Bloomsbury, London. Grey hair and brown eyes 5 ft. 9 in. tall. Married Florence Montgomery. He scored many successes on the American stage. Made his film debut in the silent version of "Disraeli." He next made "The Green Goddess" (silent). Other films include—"Disraeli," "Old English," "Alexander Hamilton," "Voltaire," "The House of Rothschild," "Cardinal Richelieu," "The Guv'nor," "The Tunnel," "The Mind of Mr. Reeder." Address, o/o Gaumont British Studios, Lime Grove, Shepherd's Bush, W 12.

Barrymore John b February 15, 1882, Philadelphia 5 ft. 10 ins tall. Brown hair and blue eyes. His films include—"Beau Brummel," "Grand Hotel," "Cardigan's Last Case," "A Bill of Divorcement," "Rasputin, the Mad Monk," "Dinner at Eight," "Twentieth Century," "Wednesday's Child," "Romeo and Juliet

and others. Address, o/o Metro Goldwyn-Mayer Studios, Culver City, California.

Barrymore Lionel b April 28, 1878, Philadelphia 6 ft. tall. Dark hair and blue eyes. On New York stage scored hits in "The Copperhead" and other plays. Films include—"Friends" (in which he made his screen debut), "Rasputin," "The Stranger's Return," "Dinner at Eight," "David Copperfield," "Little Colonel," "The Return of Peter Grimm." Address, o/o Metro-Goldwyn Mayer Studios, Culver City, California.

Baxter Warner b Columbus, Ohio, 1893 5 ft. 11½ in., dark brown hair. Married Winifred Bryson. Address, o/o "Those Who Dance," "are—," "Those Who are—," "Ramona," "addy," "Long Legs," "Such Women are—," "Confidential."

Be April 1, tall. Kansas and Gloria was for New a

Tug

Barnum," "West Point of the Air," "China Seas," "Mutiny on the Bounty," and "O'Shaughnessy's Boy." Address: c/o Metro-Goldwyn-Mayer Studios, Culver City, California.

Brook Ed Dulkwich College 5 ft. 11 ins. brown hair and grey eyes Married Mildred Evelyn, English actress Secretary, newspaper reporter and soldier, he took up stage work after the war, played for a time in England, then as a free lance played in Hollywood. He made, among others, "The Four Feathers," "A Dangerous Woman," "The Return of Sherlock Holmes," "The Laughing Lady," "East Lynne," "Cavalcade," "The Gallant Lady," "Dover Road," "Dictator," "Love in Exile," "Lonely Road." Address: c/o Associated Talking Pictures Ltd., Ealing Green, W 6

Cantor Eddie b January 31, 1893, New York. 5 ft 8 ins: dark brown eyes Married Ida Tobias. Became star of Ziegfeld Follies in 1920. Made his film debut in 1926 in "Kid Boots." Continues his stage career. Films include—"The Kid from Spain," "Roman Scandals," "Kid Millions," "Strike Me Pink." Address: o/o United Artists Studios, 1041 N Formosa Avenue, Hollywood, California.

Cagney James. b July 17, 1904, New York. 5 ft 9 in tall. Weighs 155 lbs. Red hair and brown eyes. Father—Irish Married Frances Vernon. Films include—"The Millionaire," "Jimmy the Gent," "Devil Dogs of the Air," "G Men," "A Midsummer Night's Dream," "The Irish in Us," "Frisco Kid." Address: c/o Warner Bros., First National Studios, Burbank, California.

Chaplin Charlie b April 16, 1889 London. Educated there 5 ft, 8 ins tall; dark hair, blue eyes Married (1) Mildred Harris, (2) Lita Grey (both marriages were dissolved). He toured in "Sherlock Holmes," as Billy, the page, and played in pantomime. Went to America and later made "Tillie's Punctured Romance," with Mario Dressler. His films since include the "Charlie" pictures, and since the war, "Carmen," "Circus," "The Kid," "The Gold Rush," "City Lights," "Modern Times." Address: c/o United Artists Studios, Hollywood, California.

Chevalier Maurice b September 12, 1894, Montilmontant, France. 5 ft 11½ in tall, brown hair and blue eyes Married Yvonne Vallee (divorced). Chevalier became dancing partner to Mistinguette at the Folies Bergere and continued the partnership after active war service. Films include—"The Love Parade," "Playboy of Paris," "The Merry Widow," "The Man from Folies Bergere." He came to England to make "The Beloved Vagabond." Address: o/o Twentieth Productions, 32 St James' Street, London, S W 1

Colbert Claudette b. September 13, 1905, Paris. Real name—Caludette Cauchoin. Black hair and brown eyes 5 ft. 5 in tall Stage debut—1924. Pictures include—"The Lady Lies," "The Misleading Lady," "The Man from Yesterday," "The Sign of the Cross," "The Gilded Lily," "Private Worlds," "She Married Her Boss." Address: o/o Paramount Studios, Hollywood, California.

Colman Ronald. b Feb 9, 1891, Richmond, Surrey. 6 ft. tall. Black

hair, brown eyes; did great deal of amateur acting and made his professional debut in 1914. After war service he played in "The Misleading Lady", subsequently went to America, 1920. Gave up stage for film work. Films include—"Romola," "The Dark Angel," "Lady Windermere's Fan," "Beau Geste," "Bulldog Drummond," "Raffles," "Bulldog Drummond Strikes Back," "Clive of India," "A Tale of Two Cities," "Under Two Flags." Address: o/o Twentieth-Century Fox Studios, 1401 N Western Avenue, Hollywood, California.

Cooper Gary. b May 7, 1901, Helena, Montana, of English descent 6 ft 2½ ins tall Light blue eyes and brown hair. Started as an extra and in Westerns. Films include—"The Lives of a Bengal Lancer," "The Wedding Night," "Peter Ibbetson," "Desire," "Opera Hat," "The General Died at Dawn," "The Light that Failed." Address: o/o Paramount Studios, Hollywood, California.

Courtneidge Cicely. b. April 1, 1893, Sydney, N S W. Brown hair and eyes Married Jack Hulbert. Has had a great number of stage successes. Films include—"The Ghost Train," "Jack's the Boy," "Soldiers of the King," "Things are Looking Up," "Mo and Marlborough," "The Imperfect Lady." Address: o/o Gaumont British Studios, Lime Grove, Shepherd's Bush, London W 12.

Crawford Joan. b. March 23, 1906, San Antonio, Texas. Reddish hair and dark-brown eyes 5 ft 4 ins tall. Real name, Billy Cassin. Married Douglas Fairbanks, junr, 1929 (divorced). Married Franchot Tone, 1935. Made her debut in revue in Chicago. Films include—"Our Dancing Daughters," "Untamed," "Montana Moon," "Dance, Feels, Dance," "Grand Hotel," "Dancing Lady," "Sadie McKee," "Forsaking All Others," "I Live My Life," "Elegance," and "The Demi-Widow." Address: o/o Metro-Goldwyn-Mayer Studios, Culver City, California.

Dietrich Marlene b December 27, 1906, Berlin 5 ft 5 ins tall. Red-gold hair and blue eyes Married Rudolf Sieber. Made her debut in the German version of "Broadway" and spent the next three years of her life playing in German films and on stage in musical comedy. Films include—"Morocco," "Dishonoured," "Shanghai Express," "The Blonde Venus," "Song of Songs," "The Scarlet Empress," "The Devil is a Woman," "Desire." Address: o/o Paramount Studios, Hollywood, California.

Disney Walt. b December 5, 1901, Chicago. Studied at a local art school and served as a camouflage expert in the Great War. Unsuccessful as a commercial artist, he produced the "Alice" comedies for the screen 1923-26. In 1928 he began the Mickey Mouse pictures. He also created the "Silly Symphonies." In 1935 won Academy Award for best short cartoon of 1934 with "The Tortoise and the Hare."

Gable Clark. b February 1, 1901, Cadiz, Ohio 6 ft 1 in tall Brown hair and grey eyes. Made film debut as an extra. Films include—"The Rise of Helga," "Forsaking All Others," "Call of the Wild," "Mutiny on the Bounty," "China Seas," "Wife Versus Secretary," and "San Francisco." Address: o/o Metro-Goldwyn-Mayer Studios, Culver City, California.

Garbo Greta. b September 18, 1900, Stockholm, Sweden. 5 ft. 0 ins tall. Blonde hair and green eyes. Daughter of Sven Gustafson. Eric Pertscher, Swedish comedy director, gave her a test. First picture "Erik the Tramp," a comedy, brought her to the attention of Mauritz Stiller, the greatest director in Sweden. First American role in "The Torrent." An immediate success, followed by "The Temptress," "The Kiss," "Flesh and the Devil," with John Gilbert. Also appeared with Gilbert in "Love." Other pictures include "The Divine Woman," "Wild Orchids," "The Mysterious Lady," "The Single Standard," "A Woman of Affairs." All these were silent. Talkies include "Anna Christie," "Romance," "Inspiration," "The Rise of Holger," "As You Desire Me," "Grand Hotel," "Queen Christina," "The Painted Veil," "Anna Karenina," "Canalle." Address o/o Metro-Goldwyn Mayor Studios, Culver City, California.

Gaynor Janet. b Philadelphia, Pa. October 6, 1907. Golden brown hair and brown eyes. 5 ft tall. Married Lydell Peck, September 11, 1929 (Divorced.) In 1924 she made her screen debut as an extra. "Seventh Heaven" (1927), a film which followed soon after, made her a star overnight. Other films are "Midnight Kiss," "Street Angel," "Sunny Side Up," "Daddy Long Legs," "Tess of the Storm Country," "Paddy the Next Best Thing," "The Farmer Takes a Wife," "Small Town Girl." Address o/o Fox Studios, Movietone City, Hollywood, California.

Harding Ann b August 7, 1904, Fort Sam Houston, Texas. Golden hair and blue eyes. 5 ft 2 ins. Married Harry Bannister (mar dis). A screen test led to starring contract. Pictures include—"Holiday," "Paris Bound," "The Girl of the Golden West," "Condemned," "East Lynne," "Life of Vergie Winters," "The Flame Within," "Peter Ibbetson," "The Lady Consents," and "Witness Chair." Address o/o Radio Studios, 780 Gower Street, Los Angeles, California.

Hardy Oliver b Atlanta, Georgia. Son of a politician. 6 ft 1 in. tall. Dark hair and eyes. Married. Hobby—golf. Films include—"Blotto," "The Laurel and Hardy Murder Case," "Chickens Come Home," "Pack Up Your Troubles," "Scram," "Fraternally Yours," "Hollywood Party," "Babes in Toyland," "Bonnie Scotland," "Bohemian Girl." Address o/o Metro Goldwyn Mayer Studios, Culver City, California.

Harlow Jean b Kansas City, March 3, 1911. Real name Harlean Carpenter. 5 ft 2 1/2 ins. Platinum blonde hair, blue-green eyes. Married (1) Charles McGrew of Chicago, (2) Paul Bern, well known Hollywood director, who committed suicide in 1932, soon after their marriage, (3) Hal Rosson, the cameraman, now divorced. Went to Hollywood where she was offered "extra" work. Later played for about two years in Hal Roach comedies, bits, etc, and had a role in Clara Bow's "Saturday Night Kid." Other pictures are "The Iron Man," "The Secret Six," "Enemies of the Public," "Dinner at Eight," "Hold Your Man," "Blonde Bombshell," "100 Per Cent. Pure," "Wife Versus Secretary." Address o/o Metro Goldwyn-Mayer Studios, Culver City, California.

Hepburn Katharine b November 8, 1908, daughter of Mr Hepburn of Hartford, Connecticut. Auburn hair and green eyes. Married Ludlow Smith

(marriage dissolved). First film "A Bill of Divorcement." Others are "Morning Glory," "Spitfire." Went to New York to star in stage production of "The Lark." Latest films—"The Little Minister," "Breaker of Hearts," "Alice Adams," "Sylvia Scarlett," and "Mary of Scotland." Address o/o Radio Studios, 780 Gower Street Los Angeles, California.

Hopkins Miriam. b October 18, 1902, Georgia, U.S.A. 5 ft., golden hair, blue eyes. Made stage debut in 1921. Films include "The House Between," "Dr Jekyll and Mr Hyde," "The World and the Flesh," "The Richest Girl in the World," "Becky Sharp," "Barbary Coast," "Splendor," "These Three," "The Princess and the Pauper." Address o/o Samuel Goldwyn Studios, 1041 N Formosa Avenue, Hollywood, California.

Hulbert Jack. b April 24, 1892, Ely, Cams. 6 ft. Brown hair and blue eyes. Married Olcely Courtneidge. Now famous on London stage, also well known as producer and writer. Films include—"Elstree Calling," "The Ghost Train," "Sunshine Susie," "Jack's the Boy," "Love on Wheels," "Happy Ever After," "Jack Ahoy," "The Camels are Coming," "Bulldog Jack," "Jack of All Trades." Address o/o Gaumont British Studios, Lime Grove, Shepherd's Bush, W 12.

Laughton Charles b July 1, 1899, Stonyhurst College and Royal Academy of Dramatic Art. Served during War. Married Elsa Lancaster. 5 ft. 10 ins., fair hair, blue eyes. Stage debut Barnes Theatre, 1928. Talkie film debut as drunk in "Pleasantly." Other films include "Comets," "Devil and the Deep," "The Sign of the Cross," "The Island of Lost Souls," "Henry VIII," "The Barretts of Wimpole Street," "Marie Antoinette," "The Prince of Darkness," and "Good-bye Mr Chips." Address o/o Metro Goldwyn Mayer Studio, Culver City, California.

Laurel Stan b June 16, 1895, Ulverston, England. Educated King's Grammar School, Bishop Auckland. Married Lois Neilson. 5 ft 9 ins tall, fair hair, blue eyes. Films include—"The Laurel and Hardy Murder Case," "Hollywood Party," "Babes in Toyland," "Bonnie Scotland," "Bohemian Girl." Address o/o Metro Goldwyn Mayer Studios, Culver City, California.

Lloyd Harold b April 21, 1894, Burohard, Nebraska, U.S.A. Educated public schools, Omaha, Denver, and San Diego. Married Mildred Davis. 5 ft 10 ins tall, black hair, blue eyes. Stage experience. Began film career 1900. Pictures include "Grandma's Boy," "Safety Last," "Kid Brother," "Speedy," "Welcome Danger," "The Cat's Paw," "The Milky Way." Address o/o Paramount Studios, Hollywood, California.

Loy Myrna. b August 2, 1905, Helena Montana. 5 ft. 4 ins. tall. Red hair and green eyes. Began screen career 1926. Films include—"The Desert Song," "Body and Soul," "Connecticut Yankee," "Transatlantic," "Skyline," "Married in Haste," "Dr Fu Manchu," "Thirteen Women," "Wings in the Dark," "Wife Versus Secretary," "The Great Ziegfeld," "The Whipsaw." Address o/o Metro Goldwyn Mayer Studios, Culver City, California.

Lynn Ralph b March 18, 1882, Manchester. 5 ft 10 ins. Sandy hair and blue eyes. Stage partnership with Tom Walls in Aldwych farces became famous

Pictures include "Rookery Nook," "Tons of Money," "Mischief," "Thark," "Turkey Time," "Cuckoo in the Nest," "A Cup of Kindness," "Dirty Work," "Fighting Stock," "Stormy Weather," "In the Soup" Address: o/o Gaumont British Studios, Lime Grove, Shepherd's Bush, London, W 12

McLaglen Victor b December 11, 1886, London Brown hair and blue-grey eyes 6 ft 5 ins tall Father, former Bishop of Claremont, Rt Rev Andrew McLaglen Travelled considerably and became champion boxer of Eastern Canada Served with Irish Fusiliers as Lieutenant in the War Made film debut in British picture, "The Call of the Road" Pictures include—"The Glorious Adventure," "Beau Geste," "Loves of Carmen," "Rackety Rax," "Hot Pepper," "Dick Turpin," "Klondyko Annie," "Under Two Flags," "Soldiers Three" (in England) Address: o/o Twentieth Century-Fox Studios, 1401 N Western Avenue, Hollywood, o/o Gaumont British Studios, Lime Grove, Shepherd's Bush, W.12 (whilst in England)

March Fredric b Racine, Wis, on August 31, 1897. Graduated from University of Wisconsin in 1920 Brown hair and brown eyes Favourite recreations—horseback riding, tennis and swimming Married Florence Eldredge Stago experience Films include "To-night Is Ours," "Design for Living," "The Barretts of Wimpole Street," "Les Misérables," "The Dark Angel," "Anthony Adverso," "Zero Hour," "Mary of Scotland" Address: o/o United Artists Studios, 1041 N Formosa Avenue, Los Angeles, California

Montgomery Robert b May 21, 1904, Beacon, New York 6 ft 1 in Brown hair and blue eyes Film debut in "So This is College", Others are "Their One Desire," "Free and Easy," "The Divorcee," "Private Lives," "Riptide," "Vanessa," "Death on the Diamond," "Biography of a Bachelor Girl," "Love On the Run" Address: o/o Metro Goldwyn-Mayer Studios, Culver City, California

Moore Grace b December 5, 1901, Joilleco. Married to Valentin Porcra. Blonde hair and blue eyes 1929 made debut at Metropolitan Opera House, New York, in *La Boheme* Acted on the stage in *The Dubarry*. Her films are "New Moon," "Jonny Lynd," "One Night of Love," "On Wings of

Song," "The King Steps Out," "Love Tales of Hoffman" Address: o/o Columbia Studios, 1438 Gower Street, Hollywood, California

Shearer Norma b August 10, 1904, Montreal, Canada 5 ft 3 ins tall Brown hair and blue eyes Married Irving Thalberg Started screen career 1920 in a college picture, next lead in a Western Films include—"Last of Mrs Chynoy," "Private Lives," "Smilin' Through," "Riptide," "The Barretts of Wimpole Street," "Romeo and Juliet" Address: o/o Metro Goldwyn-Mayer Studios, Culver City, California

Temple Shirley b April 23, 1929 Fair hair and blue eyes Her film debut was made in "Stand Up and Cheer" Other films include "Baby Take a Bow," "Curly Top," "The Littlest Rebel," "Captain January," "Poor Little Rich Girl" Address: o/o Fox Studios, Movietone City, Hollywood, California

Veidt Conrad b January 22, 1893, Berlin Brown hair and blue eyes 6 ft 2 ins tall Educated Berlin High School Married to Lili Praeger (second wife) Distinguished career in theatre Entored pictures 1919 Later went to Hollywood Films include "Rome Express," "F.P.J.," "I Was a Spy," "The Wandering Jew," "Jew Suss," "Bella Donna," "King of the Damned," "The Passing of the Third Floor Back" Address: o/o London Film Productions

Walls Tom b February 18, 1883, Kings-thorpe, Northants Dark hair and eyes 5 ft 11 ins tall Married Hilda Edwards Hobby—the Turf Made first stage appearance at Glasgow, Christmas, 1905 Made screen debut in "Rookery Nook" Other films include "Thark," "Chance of a Night Time," "Turkey Time," "A Cup of Kindness," "Lady in Danger," "Fighting Stock," "Mo and Marlborough" Address: o/o Gaumont British Studios, Lime Grove, Shepherd's Bush, London, W 12

West Mae b Brooklyn, New York 5 ft 4 ins tall Blue eyes, yellow hair Made first stage appearance at the age of five, and wrote several plays before going to Hollywood to play in feature role in "Night After Night" Starred in "Sho Done Him Wrong," "I'm No Angel," "Belle of the Nineties," "Going to Town" Address: o/o Paramount Studios, Marathon Street, Los Angeles, California

COMPETITION HINTS

CROSSWORD PUZZLES

THAT Crosswords can be made a profitable pastime as well as an absorbing hobby has been proved by scores of big winners in the prize competitions conducted by newspapers and periodicals in India. The widespread appeal of these fascinating puzzles may largely be accounted for by the fact that they vary from literary problems calculated to tickle the mental palate of the most erudite professor to cunningly contrived sets of Clues whose answers can readily be debated by the average man.

HOW CROSSWORDS COMMENCED—First the rage in America, Crosswords soon became popular in Great Britain not only as brain teasers but also as a means of making money. Though their square form is new, Crosswords are distinctly related to the Double Acrostic, the fashionable puzzle of London in the last century.

Acrostics themselves are of great antiquity. The term was first applied to the obscure prophecies of the Erythraean sibyl, these were written on loose leaves and the initial letters made a word when the leaves were sorted and laid in order. Certain old Hebrew poems were written in the form of Acrostics, consisting of twenty-two lines, beginning with succeeding letters of the alphabet.

MAKING THEM BETTER.—The essential difference between the prize Crossword, in which a large sum of money is offered for arriving at a correct solution, and what might be termed the "purely pastime" puzzle which is provided "just for fun," lies in the nature of certain of the Clues. In the "purely pastime" puzzles each clue is made a severe test of the solver's ingenuity, but once an answer is found all doubts are ended. With the prize puzzle, however, the finding of an answer is only half the battle, for many of the Clues admit of two or more possible answers and the knotty question lies in deciding which of these alternative answers is the most apt.

When prize Crosswords first achieved popularity there was seldom any rational principle on which competitors could go to work. Clues were apt to be ordinary and obvious, continual repetition of the same questions tended to make answering them a dull business. Nor, in those days, was there often any appreciable difference in merit between the various alternative answers. Competitors just had to pay their entry-fee, take their choice of alternatives and hope for the best.

Typical Clues and alternative answers of this type were *Short for Edward*—TED or NED and *A Girl's Name*—ADA or IDA.

COMMON SENSE CONQUERS—In recent years a marked improvement has taken place in the framing of prize Crossword puzzles. A racy, entertaining type of Clue has been introduced in which slang and colloquialisms both figure within reason. This makes the answering of every Clue amusing, regardless of whether or not an alternative answer is possible.

The most important change for the better which has taken place is the deliberate basing of Crosswords on common-sense reasoning. In selecting one alternative answer as the correct solution, the Competition Editor takes that which can be argued to be better and in some cases he even explains afterwards the reason for his choice.

With the new kind of common-sense Crossword, it clearly pays competitors to study closely the style of the Clues. Often the key to the apter of two answers may lie in some insignificant-looking word like "may" or "sometimes" one Compiler may have a liking for humorous answers whereas another may generally bind himself rigidly to sober facts. Success, then, is partly a matter of getting to know the Compiler's mental characteristics and this can best be done by confining your activities to one paper's puzzles.

OUTRIGHT VICTORIES—So cunningly are the better class of modern prize Crosswords compiled that, though arriving at a winning solution actually is a matter of using care and common sense, it is no easy matter to produce an entirely correct square. This is obviously as it should be, for unless the puzzles were made difficult to solve, so many entrants would succeed that the prize money would not be worth winning.

A striking instance of clever compiling is afforded by the famous London paper, *John Bull*. In 350 Crossword Contests a single outright winner has captured the first prize once in every five times.

SUCCESS IN INDIA—The national interest in the English language, coupled with a general aptitude for argument and deduction, makes the average Indian eager to draw swords with the keen-witted Compiler.

Apart from vast cash prizes that must be won, there is a fascination about Crosswords which makes them particularly popular with those whom old age has left lonely and others whose work takes them to outlying stations. Women find Crosswords a mental stimulant that mixes well with housework and their natural intuition helps them frequently to beat all their male rivals.

ILLUSTRATED WEEKLY OF INDIA CROSSWORDS—The popular puzzles conducted by the *Illustrated Weekly of India* are common-sense Crosswords which have a wide appeal throughout the country. Handsome prizes are offered, a typical one-week offer consisting of a Rs. 10,000 First Prize, with Rs 5,000 for distribution amongst runners-up (those with one error more than the First Prize winner or winners). Additional awards consisted of a Rs 100 Portable Gramophone for every sender of an entirely correct solution, a Rs 50 Kodak camera for each one-error winner and special consolation awards for entrants with two and three errors.

A typical result of an *Illustrated Weekly of India* Crossword shows four senders of all-correct solutions receiving Rs 2,125 each as well as a Portable Gramophone. One-error solutions were received from 7 solvers, to each of whom went Rs 214-5-0 and a Rs 32 Wrist Watch. Cash prizes of Rs 85-11-0 each were awarded to 42 entrants with two errors who also received bonus awards value Rs. 10, and finally, 148 three-error entries were rewarded with Rs 6-12-0 apiece as well as bonuses value Rs 3. The winning entries came from such widely scattered places as Bombay, Srinagar, Kandy and Lahore.

After the appearance of the official correct solution, the *Illustrated Weekly of India* publishes arguments from competitors showing why they decided on various correct alternative answers to the Clues, as well as comments by the Compiler himself. These helpful notes form a valuable guide to winning form and prove clearly that it is profitable to study closely the common-sense principles on which the puzzles are based.

INTERLOCKING WORDS—A typical Clue seen in an *Illustrated Weekly of India* Crossword was, *Constant repetition of this at social gatherings will not increase your popularity*, for the answer to which entrants had to decide between YARN or YAWN. Linked with this downward Clue was this across: *Responsible for many couples becoming acquainted*, to which alternative answers were RINK or WINK.

It will be noticed that the answers to these Clues could be made to "interlock." In this case the entrant's choice of the former answer's third letter (R or W) affected his decision to commence the other answer with R or W.

In this connection it is important to realise that each wrong word counts as one error and one wrong letter which makes two words wrong (as it would in this instance were the wrong two answers chosen) counts as two errors. An ingenious Compiler can arrange his puzzle so that one word interlocks with several others, but the number of alternatives in any one puzzle is always kept within reasonable bounds.

READ THE RULES—It is of course possible to achieve success by haphazard methods, and a hastily considered solution dashed down on a coupon at the last minute may turn out to be entirely correct. In the vast majority of cases, however, it is going to work on the Clues in a careful and systematic manner that commands success. There is nothing to prevent the same entrant winning time after time and one frequently sees the same names reappearing amongst the winners. Such consistent winning is invariably the result of carefully planned and regular entries.

Every entrant's first step on the road to the prize list should be to make himself thoroughly familiar with the rules. At first glance the regulations governing the completion of squares, method of entry and so on may seem, unreasonably rigid. It must be remembered, however, that conducting a Crossword is a complicated matter, demanding a time-table which must be adhered to relentlessly. With big amounts of prize-money to be distributed, it is only fair to all competitors that each one should be called upon to fulfil the requirements laid down.

First of all, a stated entry-fee is required. Indian Postal Orders or Indian Money Orders must be sent to cover the number of Crossword square coupons submitted. To facilitate sorting and checking, competitors are requested to attach Postal Orders to their entry coupons and write the official number of the Postal Order in the space provided on the coupons. Post Office receipts for Money Orders must also be attached to coupons.

TAKE CARE WITH COUPONS—All entries must be submitted on coupons provided. Coupons must be filled in with ink in block letters or else typewritten. Pen-cilled entries are disqualified.

No alterations or corrections are permitted once a square is completed, and any letter space left blank will cause the whole square to be disqualified. Copy squares are provided for competitors and, to avoid spoiling a valuable entry, it is advisable to use the copy squares for preliminary work.

The surname of each entrant is required to be written on the back of the envelope containing his entry.

CLAIMS AND SCRUTINIES—In the past competitors were usually expected to submit claims of successful solutions when the winning square was published. Now, in order to save entrants this trouble, most journals undertake to scrutinise every coupon received and notify winners. This is the method now in force with the *Illustrated Weekly of India*.

No claims are required in these contests but should any competitor not announced as a winner consider that he has entered a coupon eligible for a prize, he can submit a Scrutiny Claim. Such claims must be entered by a stated date and, in order to avoid unnecessary searching caused by frivolous claims, a Scrutiny Fee of Rs 5 is required. This fee is returned to the competitor should his claim prove correct. If a Scrutiny Claim does prove correct, the distribution of that contest's prize money has to be readjusted accordingly.

CLOSING DATE—All entries must be received by a specified closing date and Crossword squares arriving too late are disqualified. A one-week contest conducted by the *Illustrated Weekly of India* usually closes 12 days after date of publication, but an extension of 2 days is allowed to competitors in distant parts of India. This extension privilege applies to all districts 48 hours or more by mail from Bombay.

FAMILY ENTRIES—Many winners find that besides providing entertainment for the home, it pays to make Crosswords a family affair. Two heads are better than one and debating the Clues at a family conference often reveals unexpected angles on the Clues.

Family entries are accepted as a combined entry, provided all members entering bear the same surname. Coupons may be sent in one envelope with the family's surname and number of coupons submitted written on the back of the envelope. The surname and separate initials of each member of the family competing must be clearly written on their entry coupons. Such family entries may be covered by one Postal or Money Order.

Even the young folks can have their Crossword fun, for special Children's Crosswords are provided with attractive prizes.

DICTIONARY HELP—Although no uncommon or far-fetched words are used in common-sense Crosswords, a good dictionary can be of great service to competitors. Chambers's Twentieth Century Dictionary is the standard dictionary used by the Compiler of the *Illustrated Weekly of India's* Crosswords. At the back of this volume will be found a Supplement Section. This contains many slang words and up-to-date colloquialisms which figure in common-sense Crosswords.

FINAL HINTS—The surest way of improving your skill as a Crossword solver is to keep your copy squares and when the winning solution appears, note your errors carefully. Re-examine the Clues and you will be able to see why you went wrong as well as where.

Regular entry provides the finest training for would-be winners and here is an excellent axiom to remember. If you do not enter, you cannot possibly win!

INDIAN CONSTITUTIONAL REFORM

(UNOFFICIAL)

THE existing Indian Constitution had its origin in the announcement made by Mr. Montagu, the then Secretary of State for India, in the House of Commons on the 20th August, 1917, when he said —

"The policy of His Majesty's Government, with which the Government of India are in complete accord, is that of the increasing association of Indians in every branch of the administration and the gradual development of self-governing institutions with a view to the progressive realisation of responsible government in India as an integral part of the British Empire."

The announcement proceeded —

"I would add that progress in this policy can only be achieved by successive stages. The British Government and the Government of India, on whom the responsibility lies for the welfare and advancement of the Indian peoples, must be judges of the time and measure of each advance, and they must be guided by the operation received from those upon whom new opportunities of service will thus be conferred, and by the extent to which it is found that confidence can be reposed in their sense of responsibility."

This announcement was followed by the Government of India Act of 1919, under which India is administered to-day. The Royal Proclamation on the passing of that Act gives the story in brief of the political development of the country —

"The Act of 1833 opened the door for Indians to public office and employment. The Act of 1858 transferred the administration from the (East India) Company to the Crown and laid the foundations of public life which exist in India to-day. The Act of 1861 sowed the seed of representative institutions, and the seed was quickened into life by the Act of 1909. The Act which has now become law entrusts the elected representatives of the people with a definite share in the government and points the way to full responsible government hereafter."

The 1919 Act provided that an inquiry should be made into the working of the system of government and as to whether and to what extent it was desirable to establish the principle of responsible government. In pursuance of this provision the Indian Statutory Commission, under the Chairmanship of Sir John Simon, was appointed in 1927 to carry out this inquiry and the Commission presented its Report to Parliament in May, 1930.

But Sir John Simon, in a letter to the Prime Minister (Mr. Ramsay MacDonald) in October, 1929, pointed out that the Commission, in considering the direction which the future

constitutional development of India was likely to take, had been impressed with the need for a full examination of the possibilities of the relationship which might develop in the future between British India and the Indian States. The Commission therefore recommended that, after they had completed their Report, His Majesty's Government should meet representatives of British India and of the Indian States "for the purpose of seeking the greatest possible measure of agreement for the final proposals which it would later be the duty of His Majesty's Government to submit to Parliament."

This recommendation was accepted by the Government, and the Indian Round Table Conference, of which there were three sessions, was inaugurated by His Majesty the King in London, in November, 1930. This Conference laid the foundations of a Federation of the Indian States and of the Provinces of British India. The Burma Round Table Conference, which was called for the purpose of considering a separate Constitution for Burma, was opened by the Prince of Wales in November 1931.

These Conferences were followed by the presentation to Parliament in March, 1933, of the Government's proposals for the new Constitution. These proposals were founded on the following principles —

- (a) Autonomy for the Provinces of British India, with certain special powers in the hands of Governors,
- (b) A Federation of the Indian States and British India, and
- (c) Central responsibility, subject to certain safeguards, e.g., the reservation of Defence and Foreign Affairs, and the placing of powers in the hands of the Governor-General to enable him to carry out certain special responsibilities.

The House of Commons, after a three days' debate, commencing on 29th March, 1933, passed a Resolution in the following terms —

"That, before Parliament is asked to take a decision upon the proposals contained in Command Paper 4268, it is expedient that a Joint Select Committee of Lords and Commons, with power to call into consultation representatives of the Indian States and of British India, be appointed to consider the future government of India and, in particular, to examine and report upon the proposals in the said Command Paper."

On 6th April, after a three days' debate, the Peers concurred in this Resolution and a Joint Committee composed of 16 members of each House was ultimately constituted. With the Committee were brought into consultation seven delegates from the Indian States, 21 delegates from British India and 12 delegates from Burma. The delegates took part in over

Family entries are accepted as a combined entry, provided all members entering bear the same surname Coupons may be sent in one envelope with the family's surname and number of coupons submitted written on the back of the envelope The surname and separate initials of each member of the family competing must be clearly written on their entry coupons Such family entries may be covered by one Postal or Money Order

Even the young folks can have their Crossword fun, for special Children's Crosswords are provided with attractive prizes

DICTIONARY HELP—Although no uncommon or far-fetched words are used in common-sense Crosswords, a good dictionary can be of great service to competitors Chambers's Twentieth Century Dictionary is the standard dictionary used by the Compiler of the *Illustrated Weekly of India's* Crosswords At the back of this volume will be found a Supplement Section this contains many slang words and up-to-date colloquialisms which figure in common-sense Crosswords

FINAL HINTS—The surest way of improving your skill as a Crossword solver is to keep your copy squares and when the winning solution appears, note your errors carefully Re-examine the Clues and you will be able to see why you went wrong as well as where

Regular entry provides the finest training for would-be winners and here is an excellent axiom to remember If you do not enter, you cannot possibly win!

INDIAN CONSTITUTIONAL REFORM

(UNOFFICIAL)

THE existing Indian Constitution had its origin in the announcement made by Mr. Montagu, the then Secretary of State for India, in the House of Commons on the 20th August, 1917, when he said —

"The policy of His Majesty's Government, with which the Government of India are in complete accord, is that of the increasing association of Indians in every branch of the administration and the gradual development of self-governing institutions with a view to the progressive realisation of responsible government in India as an integral part of the British Empire."

The announcement proceeded —

"I would add that progress in this policy can only be achieved by successive stages. The British Government and the Government of India, on whom the responsibility lies for the welfare and advancement of the Indian peoples, must be judges of the time and measure of each advance, and they must be guided by the co-operation received from those upon whom new opportunities of service will thus be conferred, and by the extent to which it is found that confidence can be reposed in their sense of responsibility."

This announcement was followed by the Government of India Act of 1919, under which India is administered to-day. The Royal Proclamation on the passing of that Act gives the story in brief of the political development of the country —

"The Act of 1833 opened the door for Indians to public office and employment. The Act of 1858 transferred the administration from the (East India) Company to the Crown and laid the foundations of public life which exist in India to-day. The Act of 1861 sowed the seed of representative institutions, and the seed was quickened into life by the Act of 1909. The Act which has now become law entrusts the elected representatives of the people with a definite share in the government and points the way to full responsible government hereafter."

The 1919 Act provided that an inquiry should be made into the working of the system of government and as to whether and to what extent it was desirable to establish the principle of responsible government. In pursuance of this provision the Indian Statutory Commission, under the Chairmanship of Sir John Simon, was appointed in 1927 to carry out this inquiry and the Commission presented its Report to Parliament in May, 1930.

But Sir John Simon, in a letter to the Prime Minister (Mr. Ramsay MacDonald) in October, 1929, pointed out that the Commission, in considering the direction which the future

constitutional development of India was likely to take, had been impressed with the need for a full examination of the possibilities of the relationship which might develop in the future between British India and the Indian States. The Commission therefore recommended that, after they had completed their Report, His Majesty's Government should meet representatives of British India and of the Indian States "for the purpose of seeking the greatest possible measure of agreement for the final proposals which it would later be the duty of His Majesty's Government to submit to Parliament."

This recommendation was accepted by the Government, and the Indian Round Table Conference, of which there were three sessions, was inaugurated by His Majesty the King in London, in November, 1930. This Conference laid the foundations of a Federation of the Indian States and of the Provinces of British India. The Burma Round Table Conference, which was called for the purpose of considering a separate Constitution for Burma, was opened by the Prince of Wales in November, 1931.

These Conferences were followed by the presentation to Parliament in March, 1933, of the Government's proposals for the new Constitution. These proposals were founded on the following principles —

- (a) Autonomy for the Provinces of British India, with certain special powers in the hands of Governors,
- (b) A Federation of the Indian States and British India, and
- (c) Central responsibility, subject to certain safeguards, e.g., the reservation of Defence and Foreign Affairs, and the placing of powers in the hands of the Governor General to enable him to carry out certain special responsibilities.

The House of Commons, after a three days' debate, commencing on 29th March, 1933, passed a Resolution in the following terms —

"That, before Parliament is asked to take a decision upon the proposals contained in Command Paper 4268, it is expedient that a Joint Select Committee of Lords and Commons, with power to call into consultation representatives of the Indian States and of British India, be appointed to consider the future government of India and, in particular, to examine and report upon the proposals in the said Command Paper."

On 6th April, after a three days' debate, the Peers concurred in this Resolution and a Joint Committee composed of 16 members of each House was ultimately constituted. With the Committee were brought into consultation seven delegates from the Indian States, 21 delegates from British India and 12 delegates from Burma. The delegates took part in over

70 of the meetings. The Committee held over 150 meetings, examined over 120 witnesses and the volumes of evidence record over 17,000 questions.

The Report of the Committee was published on 21st November, 1934, and was debated by the House of Lords and by the House of Commons on the following motion —

"That this House accepts the recommendations of the Joint Committee on Indian Constitutional Reform as the basis for the revision of the Indian Constitution and considers it expedient that a Bill should be introduced on the general lines of the Report."

The motion was carried in the House of Lords by 239 votes to 62, and in the House of Commons by 410 to 127.

GOVERNMENT OF INDIA ACT

The Act provides for the establishment of an All India Federation constituted by linking eleven British Indian Provinces (two of them new) in a Federal system with those Indian States prepared to enter the Federation by the voluntary act of their Rulers. The establishment of the Federation is dependent on the accession of States containing not less than half the total States' population, and entitled to fill at least half the seats provided for States' representatives in the Federal Upper House. No change is made in the internal régime of the States, nor in the relationship between their Rulers and the Crown outside the Federal sphere. The provisions of the Bill enable the Provinces to manage their own affairs to a greater extent than at present. The great majority of the departments of Government which affect individuals from day to day (among them Law and Order), as well as certain items of revenue (for example, Land Taxes) are made the business of the Provinces. The Federation deals with matters such as Currency and Tariffs, which concern India as a whole. Two questions of great importance, however, Defence and Foreign Relations, remain the direct responsibility of the Governor-General.

Each of the Provinces has a directly elected Legislative Assembly, and in five Provinces there is an Upper as well as a Lower House. The Federation itself will have an Upper and a Lower House, composed of members in directly elected by the Provinces and representatives nominated by the States. In all the

Assemblies, Federal and Provincial, a quota of seats is ensured to the various minorities.

Both at the Federal Centre and in the Provinces, Governments will be formed of Ministers responsible to their Legislatures in much the same sense in which the Cabinet in this country is responsible to Parliament. Except in the three reserved Federal Departments of Defence, External Affairs, and Ecclesiastical Affairs, the Governor General and the Governors at the heads of the Federal Government and Provincial Governments, respectively, will be guided by the advice of their Ministers, so long as they are satisfied that to do so does not conflict with certain special responsibilities imposed on them in the Bill. These cover a wide field and include such duties as the prevention of "grave menace to peace and tranquillity," the safeguarding of minorities, and (in the case of the Governor-General) the safeguarding of financial stability and credit. Special provision is made to deal with the problem of Terrorism.

The general political effect of the Act is to provide that in the Provinces and, with certain reservations, at the Federal Centre, there will be a system of "Parliamentary" government, except when circumstances call for the exercise of the overriding powers of the Governor General or the Governor.

Provision is made that recruitment in the United Kingdom for the Indian Civil and the Police Services shall continue, and that Service rights shall be preserved. The discipline of the Police, and the independence of the Judiciary, are protected from the effects of political influences. A safeguard is introduced against the fiscal freedom of India being used deliberately to damage British trade with India.

Burma is to be separated from India, and the Act provides for a new constitution for Burma on the general lines of that proposed for India.

Provision is made for the transfer of the powers proposed to the Provinces before the establishment of the Federation, and for the changes consequentially necessary in the Central Government during the transitional period. Powers are also provided for the assumption by the Governor General of all the powers of government in the event of a breakdown in the Constitution.

(The number of Provinces in British India was, in 1936, increased to eleven by the creation of new Provinces of Sind and Orissa.)

FAULTS & REMEDIES IN WIRELESS RECEIVERS

THE faults which may occur in a radio receiver may result in (1) complete cessation of sounds from the loudspeaker, (2) intermittent reception, (3) low volume and poor selectivity, (4) distorted reproduction, or (5) reproduction marred by crackles and other interfering noises

(1) CESSATION OF SOUNDS FROM LOUDSPEAKER

This does not necessarily mean complete failure of the receiver. The set itself may be in perfect order and the breakdown due to some external cause. First make sure that the aerial and earth wires are properly connected to the sockets or terminals at the back of the receiver.

Next, ascertain that the receiver is getting its supply of current whether this be drawn from batteries or the mains. In a battery set, the leads making the connections to the batteries are particularly liable to become corroded. These should be scraped with a pocket-knife and a file may be used for final burnishing. The corrosion is caused by the "creeping" of the acid. This can be retarded by keeping the top of the accumulator clean and dry and by smearing a little vaseline round the bases of the terminals.

With a mains receiver, make sure that the supply is "on". The particular circuit to which the set is connected may have fused. The best check is to try an electric lamp on the same outlet.

Secondly, see that the leads from the set are making contact inside the connector which is plugged into the power point or lamp socket.

Proceeding to the set itself, see that the mains leads are properly joined to the switch, transformer or other component to which they go. Fuses may be found in circuit at this point and if they are blown, search should be made for the cause.

It is essential while handling components or any internal part of the set to switch off the mains—otherwise a severe shock may be picked up.

Most mains receivers have illuminated tuning scales. As long as the lamp behind the dial lights up one can assume that the "low-tension" side of the receiver and at least a part of the mains transformer are satisfactory. The trouble, therefore, is likely to be in the "high tension" or high voltage section—that is, the section of the circuit associated with part of the mains transformer, the rectifier (which may be either a valve or a "metal" unit), the smoothing choke and condensers (the smoothing choke may be a winding on the magnet of the loud-speaker) and the leads to the anodes of the valves.

Before examining these parts of the set, however, make certain that the loudspeaker is connected. With sets fitted with reaction or a pick-up a simple test which facilitates location of a fault is available. If the reaction or pick-

up operates satisfactorily, the fault is situated in the high-frequency part of the set—that is between the aerial and the detector valve.

Unless a fair knowledge of electricity and a certain amount of testing equipment is possessed, it is not advisable or, indeed, possible to carry the testing of a receiver much further. It cannot be overstressed that mains receivers are highly dangerous to any except the expert.

(2) INTERMITTENT RECEPTION

This is usually due to an intermittent connection in the aerial, earth, current supply or loudspeaker wires. These should be examined as described above.

The trouble may also be caused by a fault in the set itself. A badly soldered joint or fractured connection between components may have this result, although constant crackles are more likely to be the symptom in this case. Valves, particularly mains types, are liable to intermittent trouble and sometimes by watching the glow of the heaters it is possible to discover which is faulty.

Intermittent troubles are often introduced by components which become warm after a set is switched on. The resulting expansion fractures a wire or connection. Transformers, chokes and resistors are the components to suspect of this behaviour.

When a pick-up is fitted, this can be used roughly to localise the source of the trouble. If the breakdowns occur only during radio reception it is clear that the cause lies between the aerial input and the point to which the pick-up is connected—usually the grid of the detector valve. If the trouble occurs even while the pick-up is in use, it is located between the pick-up and the loudspeaker.

(3) LOW VOLUME AND POOR SELECTIVITY

Low volume can be caused by a poor connection in any external lead associated with the receiver, and preliminary tests should be devoted to the aerial, earth, current supply and loudspeaker wires.

Low volume may also result from loss of efficiency in the loudspeaker or deterioration of the valves, particularly the output valve and, in mains sets, of the rectifier valve.

Loudspeaker and rectifier are best tested by substituting new ones, other valves by measuring, with a milliammeter, the current passing in the anode circuits.

If a set loses its volumes suddenly, this may be due to a run-down accumulator, or in mains sets, providing the external leads are satisfactory, a breakdown in a condenser or resistor. This can be found only by systematic testing with meters.

When, simultaneously with loss of volume, a loss of selectivity becomes noticeable, the trimmers should be adjusted. But if the

receiver is a superhet, the trimmers and, in fact, all small adjustable "screws" should not be touched. They can only be set by a service engineer possessing elaborate equipment.

During the summer months it is natural for radio transmissions to become weaker

(4) DISTORTED REPRODUCTION

When this coincides with low volume the remarks made under (3) apply. High pitched reproduction at normal volume, particularly if a grating sound is noticeable, is probably due to the loudspeaker being out of adjustment. If the speaker is a moving iron type the adjusting knob should be regulated. If it is a moving-coil the cone needs re-centering or the gap is obstructed. To remedy either of these latter is a matter for the manufacturer.

Harsh, metallic jarring noises at ordinary volume suggest that (a) the output valve is not obtaining sufficient current (in a battery set, due to a run down battery, in a mains set, to a failing rectifier), (b) that the output valve is not properly biased, and (c) that the valve is "dying".

Distortion at maximum volume is only to be expected—there is a natural limit to the undistorted volume every receiver can produce

(5) CRACKLES AND INTERFERING NOISES

These may be due to causes similar to those mentioned under (2). Nowadays, however, as often as not, such noises are due to interference from external electrical appliances—from trams to vacuum cleaners and from dynamos to light switches.

With a battery set, one can discover whether the cause is in the set or external by disconnecting the aerial and earth. If the trouble ceases, it is being picked up from outside. With a mains set the noises may be introduced via the mains. In this case a cure may be effected by fitting a suppressor unit where the electricity mains enter the house. It may be necessary to fit additional units in neighbours' houses (if possible) and also near to the receiver itself.

Where the interference comes in as soon as the aerial is connected the remedy lies in the installation of an anti-static aerial.

Cases of interference are investigated by the Post Office upon request. The Post Office does not, however, take any practical measures to remedy the trouble.

Care and Maintenance of Batteries

To ensure long life, freedom from breakdowns, and efficient service, strict attention must be given to the following points—

- (1) The battery must be properly charged and the charging current must be carefully watched.
- (2) It must not be over-discharged; the voltage should never be allowed to fall below 1.8 volts per cell.
- (3) Short circuits between the plates, whether from separator failure or

accumulation of sediment under the plates, must be avoided.

- (4) The acid solution must be made up of pure sulphuric acid and distilled water, and its specific gravity must be right. The maximum specific gravity for a fully charged cell is about 1.27 to 1.30. The sulphuric acid must be water-clear in colour and show no sediment on standing.
- (5) The plates must be kept covered with electrolyte and only pure water used to replace evaporation.
- (6) Battery must not be left in discharged condition, and even if put away fully charged it should have a refresher charge periodically, say every three months.

Sulphation can be cured by long, slow charge and discharge. A good charging rate in this case is about one fifth of normal. High charging rates cause gassing and heating and do not hasten the process. The length of the charge will depend upon the degree of sulphation.

Radio in India

The listener in India is now well provided for as regards both programmes and suitable receivers.

The Indian State Broadcasting Service has made and is making great strides in the provision of a widespread service of programmes designed to appeal to every taste. At the same time the country has its own special transmissions broadcast on the short waves by the British Broadcasting Corporation from Daventry, England.

To some extent short-wave reception depends on local conditions. In most parts of India, however, three B.B.C. transmissions are receivable regularly. These take place daily at 8.30–9.40 a.m., 4.30–7.15 p.m., and 7.30–10.30 p.m. (Indian Standard Time).

Where circumstances permit it is often possible to receive other B.B.C. Empire transmissions during other hours of the day.

In India itself, the Indian State Broadcasting Service radiates programmes daily from Delhi, Bombay and Calcutta. In the words of the State Service, the programmes are intended to interest every one "from the oodle and jemadar, business man and mannequin to pediculist and surgeon, judge, lawyer, clerk and priest."

Private broadcasts are radiated from Allahabad, Madras and Peshawar.

As the B.B.C. broadcasts are on the short waves (between 16 and 50 metres) and the Indian broadcasts are on the medium waves (200 to 500 metres) the best set for the Indian listener is one that will receive on all these wavelengths—that is, an "all wave" set. To receive the programmes well over long distances it is advisable to have a sensitive super-heterodyne receiver. This type of set is fitted with automatic volume control which does much to banish the annoyance of fading programmes.

All the best British and American and other makes of receiver are available from the principal stores in India. Receivers for the short waves only are also obtainable and many of these are specially designed and built for use under the most exacting climatic conditions.

AIR MAIL SERVICES

Indian Internal Air Services (Inland Articles)

Inland articles, both registered and un-registered (but not insured articles or parcels), are accepted for transmission by air between any air stations on the Indian internal air services, Gvadur and Bahrain, subject to the existing conditions applicable to inland articles. No superscription regarding the route is necessary on inland articles. A blue air mail label (obtainable free at the post office) should be affixed to the article on the left hand top corner of the address side. The air fees on such articles are as shown below. The prepayment of Air Fee is compulsory.

For a post card	9 ples
For a letter or packet—	..
Up to ½ tola	1 anna
Over ½ tola but not over 1 tola	2 annas
Every additional tola or fraction of a tola	2 ..
For a money order (irrespective of the amount)	1 ..

The above Air Fees are payable on Air Mail articles in addition to ordinary postage, and the Registration Fee in the case of a registered article, and in the case of a Money Order, in addition to the money order commission.

SINGAPORE-CROYDON AIR SERVICE

The Air Fee per article which is provisionally fixed is 4 annas for Iraq, Palestine and Egypt, and 6 annas for any country in Europe including England, for every half-ounce or part of that weight.

Air Mail correspondence for countries in the East, viz, Siam, Malay States and Straits Settlements, as well as for countries served from the airport of Singapore, viz, the Dutch East Indies, Sarawak, the Philippine Islands and Japan, is accepted for despatch by air from any aerodrome on Indian Internal Air Services maintaining connection with the Croydon-Singapore Service.

AIR MAIL PARCELS

Air Mail parcels for despatch by air from Karachi are accepted at such post offices in India as accept foreign parcels for despatch for any post office in Great Britain and Northern Ireland. Air Mail parcels for any other country or inland parcels for delivery in India are not accepted.

	Rs	as	p
For the first half-pound	3	2	0
For every additional half-pound or fraction thereof up to a weight not exceeding 11 lbs	1	14	0
For every additional half-pound or fraction thereof above 11 lbs up to a maximum of 20 lbs	1	8	0

Insurance is not available. Each parcel must bear on the left-hand top corner of the address side a blue Air Mail label obtainable free of charge at any post office, and must be clearly and conspicuously superscribed in ink above or below the blue label with the words "Karachi-Croydon," as parcels are not carried by Indian Internal Air Services.

The Metric System of Weights and Measures.

MEASURE OF LENGTH

10 Millimetres	=	1 Centimetre
10 Centimetres	=	1 Decimetre.
10 Decimetres	=	1 Metre
10 Metres	=	1 Dekametre
10 Dekametres	=	1 Hectometre.
10 Hectometres	=	1 Kilometre
10 Kilometres	=	1 Myriametre
One Metre = 1 004 yards = 39 371 inches.		

MEASURE OF SURFACE.

10 Centiares	=	1 Declare
10 Declares	=	1 Are (100 sq metres)
10 Ares	=	1 Dekare
10 Dekares	=	1 Hectare
100 Hectares	=	1 Sq Kilometre
One Hectare = 2 acres, 1 rood, 35 poles.		

MEASURE OF WEIGHT.

10 Milligrams	=	1 Centigram.
10 Centigrams	=	1 Decigram.
10 Decigrams	=	1 Gram
10 Grams	=	1 Dekagram
10 Dekagrams	=	1 Hectogram.
10 Hectograms	=	1 Kilogram
10 Kilograms	=	1 Myriagram
1 Kilogram	=	2 lb 3½ oz.
1 Pound Avoir	=	4535 Kilogs

MEASURE OF CAPACITY.

10 Millilitres	=	1 Centilitre.
10 Centilitres	=	1 Decilitre
10 Decilitres	=	1 Litre
10 Litres	=	1 Dekalitre
10 Dekalitres	=	1 Hectolitre
10 Hectolitres	=	1 Kilolitre
1 Litre	=	1½ pints.

USEFUL DATA.
